4. PRIOR TO PLACEMENT OF HYDRO SEEDING, REMOVE TEMPORARY EROSION CONTROL MEASURES (STRAW WATTLE FENCE AND TRACKED LOOSE STRAW).
5. CONTRACTOR SHALL ASSUME SOLE RESPONSIBILITY FOR COMPLIANCE WITH STATE WATER RESOURCES CONTROL BOARD REQUIREMENTS.
6. ALL MATERIALS STORED ON-SITE SHALL HAVE PROPER ENCLOSURES AND/OR COVERINGS.
7. CONTRACTOR SHALL MAINTAIN ALL WATTLE OR SILT FENCES AND OTHER STORM WATER POLLUTION PREVENTION DEVICES THROUGHOUT CONSTRUCTION. CONTRACTOR SHALL INSPECT ALL EROSION CONTROL DEVICES WEEKLY AS WELL AS BEFORE, DURING, AND AFTER A STORM EVENT. CONTRACTOR SHALL REMOVE ALL EROSION CONTROL AND POLLUTION PREVENTION DEVICES AT THE END OF CONSTRUCTION AS REQUIRED. REFER TO SPECIFICATIONS AND ADDITIONAL REQUIREMENTS.
8. CONTRACTOR SHALL PROVIDE AND MAINTAIN CONSTRUCTION FENCING THROUGHOUT THE PROJECT. THIS FENCING SHALL DETER PEDESTRIANS AND NON-CONSTRUCTION RELATED PERSONNEL FROM ENTERING THE CONSTRUCTION SITE AREA TO THE GREATEST POSSIBLE EXTEND, THE CONTRACTOR SHALL COORDINATE THIS FENCING LAYOUT WITH SCHOOL DISTRICT PERSONNEL PRIOR TO ANY FENCING PLACEMENT SO AS TO NOT SIGNIFICANTLY INTERFERE WITH SCHOOL OPERATION.
9. CONTRACTOR SHALL ADEQUATELY PREVENT EXCESSIVE AMOUNTS OF MUD, SAND, DIRT, AND OTHER DEBRIS FROM BEING TRACKED ONTO THE STREET FROM CONSTRUCTION VEHICLE MOVEMENT. PROVIDE WASHING FACILITIES AT CONSTRUCTION ENTRANCE IF NECESSARY.
10. CONTRACTOR SHALL ADEQUATELY PREVENT EXCESSIVE AMOUNTS OF MUD, SAND, DIRT, AND OTHER DEBRIS FROM BEING TRACKED ONTO THE STREET FROM CONSTRUCTION VEHICLE MOVEMENT. PROVIDE WASHING FACILITIES AT CONSTRUCTION ENTRANCE IF NECESSARY.

ANY CHANGES MADE TO THE SWPPP IN THE FIELD MUST BE SHOWN ON THE MAP. UPDATE MAP TO REFLECT CHANGES.

MAINTENANCE/REPAIRS OF BMP FAILURE SHALL BEGIN WITHIN 72 HOURS OF IDENTIFICATION AND CHANGES SHALL BE COMPLETED PRIOR TO THE NEXT RAIN EVENT.

STORM DRAINAGE OUTFALL BMP'S
REFER TO PROTECT CONSTRUCTION PLAN DETAILS FOR SPECIFIC POST CONSTRUCTION BMP MEASURES AT OUTFALL STRUCTURES.

SEDIMENT AND EROSION CONTROL MEASURES ON SWPPP MAP ARE MINIMUM BMP'S RECOMMENDED FOR COMPLIANCE. CONSTRUCTION SITE MUST BE MONITORED AND BMP'S SHALL BE MODIFIED DEPENDING ON CONSTRUCTION SCHEDULE AND RAIN EVENTS.

ADD TO MAP AS LOCATED IN THE FIELD

- CONSTRUCTION TRAILER.
- VEHICLE/EQUIPMENT MAINTENANCE AND FUELING AREA.
- COVERED WASTE STORAGE (DUMPSTERS).
- STAGE — STAGING AREA
- MATERIAL STORAGE
- SP — SOIL STOCKPILES.
- CWO — CONCRETE WASHOUT.

DRY CREEK WASTEWATER TREATMENT PLANT

1800 BOOTH ROAD
ROSEVILLE, CALIFORNIA

Landscape Development Plans

PLANTING NOTES

1. Installing Contractor shall verify quantities and areas to be planted prior to start of job. Notify Landscape Architect of any discrepancies prior to starting work.
2. All planting areas shall be completely free of trash, debris, rocks, and construction materials larger than 2", and shall be brought to finish grade before planting begins. Finish grade shall be 2" below surface of walks, curbs, and paved areas in planting areas where bark is to be installed. Grades shall be flush at catch basins. Surfaces shall be sloped with regard to drainage requirements so that water does not puddle or stand.
3. If additional soil is required, it shall be approved loam as similar to the existing soil as possible, free of debris and noxious weeds. Prior to placing additional soil, disc or scarify the sub-grade to a depth of at least 8" to permit bonding to the sub-grade. Spread and rototill a one inch layer of new soil, then proceed to place remaining soil and establish finish grade.
4. Landscape contractor must conduct a soils test to determine amendment quantities. For bid purposes, assume the following soil preparation for all planting areas: Apply nitrified wood product amendment at a minimum rate of 6 cubic yards per 1000 sq. ft. and commercial fertilizer (16-16-16 NPK or equal) at a rate of 30 lbs. per 1000 sq.ft. for shrub and ground cover areas, 20 lbs. per 1000 sq.ft. for lawn areas. Rototill to a depth of 6" to 10". Compact and settle all areas by application of heavy irrigation to a minimum depth of 12".
5. Concrete headers shall be installed between all lawn and shrub/ground cover areas. Install per plans and details provided.
6. All plants shall be top quality nursery stock, free of disease and insect pests. Plants shall be normal size for container, vigorous, and true to name and variety. Plant holes shall be the same depth as the root ball, and three times the width for shrubs and four times the width for trees, see details.
7. Backfill for the plant holes shall be existing soil which has been previously amended. Apply Osmocote Controlled Release Formula fertilizer (18-6-12, 4 month formula) per manufacturer's recommendations.
8. When planted, crown of plant shall be 1-1/2" above finish grade. Prepare a water basin by forming a soil ring at least 3" high and as wide around the outer edge of the new plant hole. Water thoroughly to eliminate air pockets.
9. Upon completion of planting all containerized material, rake all shrub and ground cover areas to smooth grade, leaving watering basins intact. Prior to placement of bark mulch, all shrub and ground cover areas shall be treated with a pre-emergent herbicide (Ronstar or equal) per manufacturer's directions. Contractor to verify with manufacturer that pre-emergent will not adversely affect plant health.
10. Place a 3" layer of 'Walk-On' fir bark mulch, or approved equal, in all shrub and ground cover areas. Shredded redwood 'Gorilla Hair' is not acceptable.
11. Ground cover plants shall be planted in straight rows and evenly triangularly spaced a intervals noted in plant legend. Plant each rooted plant with its proportionate amount of rooting soil in a manner that will insure minimum disturbance of the root system.
12. For trees that require staking, use two 2" diameter treated lodgepole stakes set at minimum of 12" into undisturbed subgrade below the root ball. Place ties and stakes only to the level which will hold the tree upright; proper height is 6" above the point where the tree will snap to an upright position by itself if the top is pulled to one side as if wind loaded and then released. Ties shall be cinch-tie flexible vinyl (or equal) nailed to stake with galvanized nails, see details.
13. Sod lawns: After soil preparation, carefully smooth all surfaces and roll to expose depressions and irregularities. Regrade as necessary. Lay first strip of sod slabs along a straight line. Butt joints tightly, do not overlap edges. For remaining strips, stagger joints much as laying bricks. Use a sharp knife to cut sod to fit curves, edges, sprinkler heads, etc. When a conveniently large area has been sodded, water lightly to prevent drying. After laying all sod, roll lightly to eliminate irregularities and to form good contact between sod and soil. Water thoroughly; soil should be moistened at least 8 inches deep. Repeat sprinkling at regular intervals to keep sod moist at all times until rooted. After sod is established, decrease frequency and increase amount of water per application as necessary.
14. Contractor shall furnish all labor, material, equipment, and services required to maintain the landscape in an attractive condition as specified herein for a period of 90 days after final acceptance by Owner. Maintenance Period shall commence after all planting and related work has been completed in accordance with Plans and Notes. A prime requirement is that all lawn areas shall show an even, healthy stand of grass which shall have been mown at least twice. Any materials found to be dead, missing, or in poor condition during the Maintenance Period shall be replaced within 10 days of written notification by the Owner. Contractor shall not be held responsible for damage arising from acts of God, vandalism, theft, or negligence by Owner during the Maintenance Period.

IRRIGATION NOTES

1. Installing Contractor shall verify all dimensions and areas prior to start of job. Intent is for full coverage of planting. Notify Landscape Architect of any discrepancies prior to trenching.
2. Plan is diagrammatic and not intended to show exact locations of piping and valves. Install valves and piping in landscape areas wherever possible. Install valves near curbs and sidewalks whenever possible. Sprinkler head spacings are shown accurately and shall be installed as indicated by the center of the symbol. Contractor is responsible for pipe sizing the irrigation system correctly.
3. All materials shall be new and in perfect condition. No deviations from the specifications will be allowed without prior written approval of Landscape Architect.
4. Mainline shall be SCH 40 PVC or CL315 at a minimum depth of 18" below finish grade. Lateral lines shall be SCH 40 PVC at a minimum depth of 12" below grade. Use only the solvent supplied and recommended by the pipe manufacturer to make plastic pipe joints. Allow 15 minutes set-up curing time before moving or handling, and 24 hour curing time before water is placed in PVC pipe. Center load pipe with a small amount of backfill to prevent arching and whipping under pressure.
5. Where more than one pipe is installed in a trench, place pipe side by side at a minimum of 2" apart. Where soil conditions are rocky, place a 4" layer of fine material on bottom of trench prior to installation of pipe.
6. All valves shall be installed in Carson poly-plastic valve boxes with flush covers, or approved equal. Remote control valves shall be installed in Carson 1419 12" depth standard rectangular valve boxes; Drip zone remote control valves with filters and PRVs shall be installed in Carson 1220 12" depth jumbo rectangular valve boxes; Ball valves shall be installed in Carson 0011 10" diameter round valve boxes. Top of valve boxes shall be 1" above finish grade.
7. Install pop-up shrub heads and lawn spray heads 2" from curbs and walks.
8. Securely mount controller as directed by manufacturer. Complete all electrical connections to controller. All control wire shall be #14 U.L. direct burial. Taped and bundled every 20'. Place at a minimum depth of 18", installing in common trenches with mainline whenever possible. Where wire crosses paving, encase wire in a SCH 40 PVC sleeve. Run one extra wire, of a different color, to the last valve on each mainline leg, looping the wire through each valve box and label for future use.
9. At valves, both wires shall be brought into valve box and shall have an excess loop of 24" before being spliced into the solenoid pigtails using Pentite connectors.
10. After valves have been installed, test all mainlines for leaks at full line pressure for a period of 2 hours with couplings exposed and pipe sections center loaded. Before testing, fill line with water for at least 24 hours. Provisions shall be made for thoroughly bleeding the line of air and debris. Correct all defects and retest.
11. All excavations shall be backfilled with fine material to 4" above crown of pipe and tamped; then fill with earth and tamp. All trenches shall be left flush with adjoining grade and in a firm unyielding condition. Any subsequent settling shall be corrected by the Contractor.
12. Install systems without spray nozzles; open flush valves. Flush and operate each valve system at full pressure until all debris is removed. Install spray nozzles and close flush valves.
13. Test to determine that all sprinklers function according to manufacturer's data and give full coverage according to intent of drawing. Replace and adjust as necessary. Additional heads shall be provided by the Contractor to cover areas shown to be deficient by test.
14. Contractor shall set initial program for the controller. Contractor shall provide Owner with the instruction manual and demonstrate its operation to the Owner.
15. Contractor shall guarantee all parts and labor for one year with exception of damage caused by vandalism, theft, adverse natural conditions, or anything beyond the control of the Contractor.

GENERAL NOTES

1. Landscape areas not covered with live material shall be covered with a 3" 'Walk-On' fir bark mulch layer.
2. Adjust location of plant material to avoid interference with building numbers and addresses at mature height.
3. Provide a minimum three foot clearance around all fire protection equipment and associated landscape apparatus.
4. All trees planted adjacent to fire lanes shall have their canopies maintained at 13'-6" or higher where they overhang into the required width of the fire lane.
5. Landscaping shall be placed and pruned as to retain the required clearance for ladder access to windows around the building and to not interfere at maturity with 13'-6" emergency vehicle access clearance.
6. Turf slopes cannot exceed 4:1.
7. Maintain a minimum distance of 18" between edge of lawn and trunk of tree(s).
8. Landscape contractor shall provide protection for all concrete surfaces when installing landscape materials. Staining of concrete from dirt, tire marks and damaged curbs will not be permitted. All damaged surfaces shall be cleaned or replaced.
9. Landscape contractor shall coordinate and install the sleeving and stubbing for irrigation crossing parking lots and paved areas.
10. Landscape contractor shall grade all landscape areas 2% min. to drain to the street. Landscape contractor is responsible to provide positive drainage away from all buildings. All planters and planter islands should be crowned to prevent standing water.
11. Root barriers are required in all locations where trees are placed closer than 48" from curbs, sidewalks, concrete or asphalt refer to detail for specification and installation.
12. Quantities found in the plant legend are for contractor convenience. In the event that the quantities in the legend differ from those found on the plans, the quantities found on the plans will take precedence.
13. Contractor to hand dig only under existing tree canopies, no mechanical excavation will be allowed, do not cut any roots 2" or larger in diameter, if it is necessary to prune roots 2" in diameter or larger, contractor shall hire the services of a licensed arborist to supervise and direct the work, follow all recommendations of the arborist.

Valve Number
Valve Flow
#" Valve Size

NOTE: EXISTING IRRIGATION MAINLINE IS RECYCLED (NON-POTABLE) WATER. USE PURPLE PIPE AND PURPLE NP INDICATORS FOR ALL IRRIGATION EQUIPMENT.

NOTES

1. IRRIGATION DESIGN IS BASED ON A MAXIMUM DEMAND (GPM) AND MINIMUM OPERATING PRESSURE (PSI) AS INDICATED IN THE CRITICAL ANALYSES. LANDSCAPE CONTRACTOR SHALL TEST AND VERIFY PRESSURE AND FLOW PRIOR TO STARTING JOB AND NOTIFY LANDSCAPE ARCHITECT IMMEDIATELY IF WATER AND PRESSURE FLOWS DO NOT MEET THESE MINIMUM REQUIREMENTS. IF AVAILABLE PRESSURE DOES NOT MEET THE MINIMUM OPERATING PRESSURE, A BOOSTER PUMP MAY NEED TO BE INSTALLED. LANDSCAPE CONTRACTOR SHALL CONTACT LANDSCAPE ARCHITECT FOR BOOSTER PUMP SPECIFICATIONS.
2. IRRIGATION PLAN IS DIAGRAMMATIC; INSTALL IRRIGATION VALVES AND PIPE IN PLANTERS WHENEVER POSSIBLE. ALL PIPE UNDER PAVEMENT SHALL BE SLEEVED.
3. INSTALL FLUSH VALVES, OPERATIONAL INDICATORS AND AIR RELIEF VALVES IN DRIP AREAS PER IRRIGATION DETAILS.

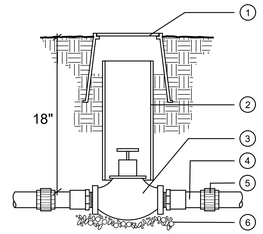
S:\Dwg\Dry Creek Wastewater Treatment\DWG's\CD\DCWT-PL.dwg\L-2.2\11 Feb 2025 2:34 PM by: Eric Stanley

NOTE:
MOUNT CONTROLLER TO WALL STUDS WITH FOUR EACH 3/8" X 3" MINIMUM GALVANIZED LAG SCREWS, IMBED 2" MIN.

CONTROLLER INSTALLATION (A)

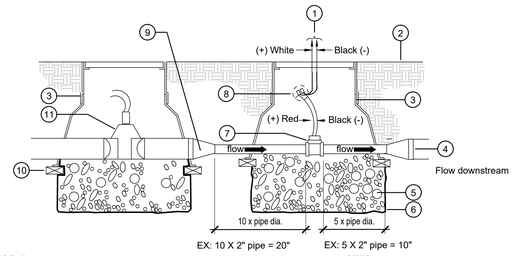
CTRL1 SCALE: N.T.S.



NOTE: DO NOT STACK PIPE ON TOP OF OTHER PIPE.

IRRIGATION TRENCH (B)

TRNCH1 SCALE: N.T.S.



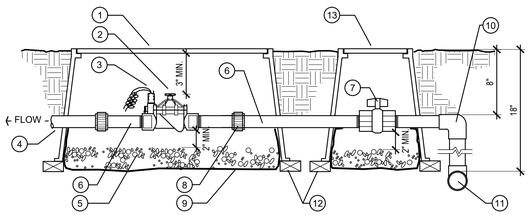
LEGEND

1. 9" VALVE BOX
2. 6" PVC SLEEVE
3. GATE VALVE
4. IRRIGATION MAINLINE
5. PVC UNION
6. PEAGRAVEL SUMP 6" MIN.

GATE VALVE (C)

VLV-GATE SCALE: N.T.S.

LEGEND



1. SENSOR CABLE - TWO #20 FOIL SHIELD W/DRAIN, BLACK JACKET, DIRECT BURIAL BLACK, WHITE. ALLOW 2' OF EXTRA CABLE.
2. FINISHED GRADE OR SURFACE.
3. VALVE BOX WITH EXTENSIONS AS REQUIRED.
4. FITTING OR REDUCING COUPLING AT DISTANCE EQUAL TO 5 X PIPE DIAMETER FROM FLOW SENSOR.
5. 3/4 " PEA GRAVEL SUMP, 6" DEEP.
6. FILTER FABRIC.
7. FLOW SENSOR BODY.
8. WATERPROOF CONNECTIONS * NOTE POLARITY ON SENSOR TO SENSOR CABLE HOOKUP.
9. FITTING OR REDUCING COUPLING AT DISTANCE EQUAL TO 10 X PIPE DIAMETER FROM FLOW SENSOR.
10. STANDARD BRICK.
11. MASTER VALVE.

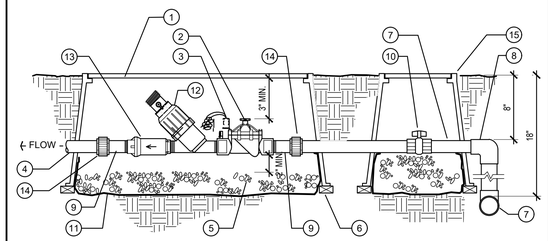
NOTES:

- NOTE: FLOW SENSOR MUST BE INSTALLED WITH INSERT (TOP) POSITIONED VERTICALLY AND BODY (TEE) POSITIONED HORIZONTALLY.
- NOTE: FLOW SENSOR CABLE MUST BE RUN IN 1" PVC CONDUIT FROM FLOW SENSOR TO CONTROLLER ENGLOSURE.
- NOTE: CONTRACTOR TO FOLLOW ALL MASTER VALVE AND FLOW SENSOR COMPANIES' DETAILS AND INSTALLATION PROCEDURES FOR INSTALLATION.

FLOW SENSOR/MASTER VALVE (D)

FLW-SENS-MST-VLV SCALE: N.T.S.

LEGEND



1. JUMBO RECTANGULAR VALVE BOX (15"x21")
2. REMOTE CONTROL VALVE
3. SOLENOID
4. PVC LATERAL
5. 6" PEA GRAVEL SUMP
6. PVC SCH 80 TOE NIPPLE, TYP.
7. PVC BALL VALVE
8. SCH. 80 PVC UNION, TYP.
9. FILTER FABRIC
10. SCH. 80 ST ELL
11. PVC MAIN LINE
12. STANDARD BRICK (3 5/8"x2 1/4"x8")
13. 10" ROUND VALVE BOX

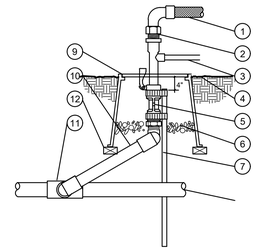
NOTES:

- USE TEFLON TAPE ON ALL THREADED MANIFOLD COMPONENTS
- USE A PVC BALL VALVE WITH EVERY VALVE OR MANIFOLD OF VALVES.
- LINE SUMP WITH FILTER FABRIC AND LEAVE EXPOSED ABOVE GRAVEL 2" MIN.

REMOTE CONTROL VALVE (E)

VLV-RMT-2 SCALE: N.T.S.

LEGEND



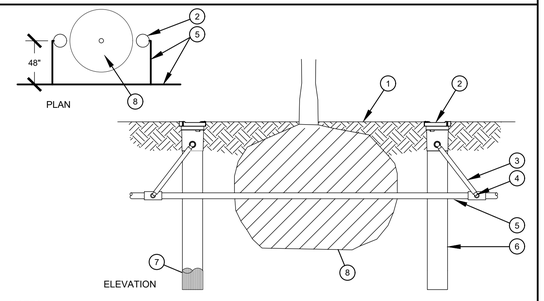
1. RECTANGULAR VALVE BOX
2. REMOTE CONTROL VALVE
3. SOLENOID
4. PVC LATERAL
5. 6" PEA GRAVEL SUMP
6. STANDARD BRICK (3 5/8"x2 1/4"x8")
7. PVC MAINLINE
8. PVC ELL
9. SCH. 80 PVC TOE NIPPLE
10. PVC BALL VALVE
11. FILTER FABRIC
12. FILTER
13. PRESSURE REGULATOR
14. SCH. 80 PVC UNION, TYP.
15. 10" ROUND VALVE BOX

NOTES:

- ¾" - 1" VALVES, USE 15"X21" VALVE BOX
- 1 ½" VALVE, USE 17"X30" VALVE BOX
- USE TEFLON TAPE ON ALL THREADED MANIFOLD COMPONENTS
- USE A PVC BALL VALVE WITH EVERY VALVE
- LINE SUMP WITH FILTER FABRIC AND LEAVE EXPOSED OVER GRAVEL 2" MIN.

REMOTE CONTROL VALVE FOR DRIP (F)

VLV-PRVF-2 SCALE: N.T.S.



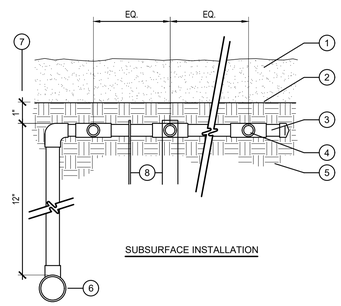
LEGEND

1. GARDEN HOSE
2. SWIVEL HOSE ELL
3. COUPLER
4. FINISHED GRADE
5. QUICK COUPLING VALVE
6. 6" MIN. PEA GRAVEL SUMP
7. #4 REBAR WITH HOSE CLAMPS
8. MAINLINE
9. 9" ROUND VALVE BOX
10. PVC SWING JOINT ASSEMBLY
11. TEE
12. STANDARD BRICK, 3 REQUIRED.

QUICK COUPLING VALVE (G)

VLV-QKCPL SCALE: N.T.S.

NOTES:



1. POSITION 2 UNITS EVENLY SPACED AROUND TREE. FOR NEW TREES PLACE 24" AWAY FROM TRUNK. FOR EXISTING TREES PLACE HALF THE DISTANCE BETWEEN CANOPY EDGE AND TREE TRUNK.
2. INSTALL PRODUCT WITH TOP EVEN WITH GROUND SURFACE.
3. WHEN INSTALLING IN EXTREMELY HARD OR CLAY SOILS, ADD 3/4" (1,9 CM) GRAVEL UNDER AND AROUND THE UNIT TO ALLOW FASTER WATER INFILTRATION AND ROOT PENETRATION.
4. ONCE UNIT HAS BEEN INSTALLED, FILL THE BASKET WITH PEA GRAVEL BEFORE LOCKING LID.
5. OPTIONAL SOCK FOR USE IN SANDY SOILS; CONTRACTOR TO DETERMINE SOIL TYPE AND INSTALL WITH SOCK IF NECESSARY.

LEGEND

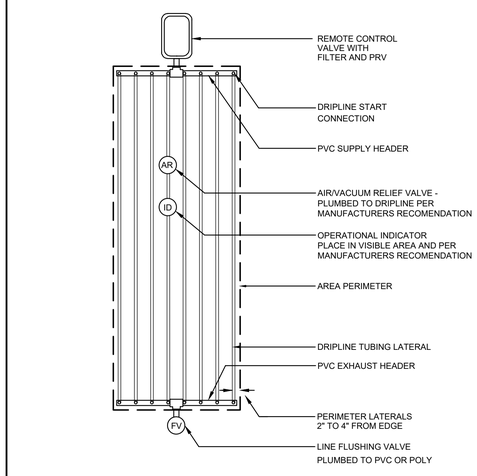
1. FINISH GRADE/TOP OF MULCH
2. ROOT WATERING SYSTEM
3. SWING ASSEMBLY (INCLUDED)
4. 1/2" (1,3 CM) MALE NPT INLET (INCLUDED) PVC SCH 40 TEE OR ELL
5. LATERAL PIPE
6. RIGID BASKET CANISTER (INCLUDED)
7. OPTIONAL SOCK FOR SANDY SOILS
8. TREE ROOT BALL

ROOT WATERING SYSTEM AT TREE (H)

BBLR-RWS SCALE: N.T.S.

SUBSURFACE INSTALLATION

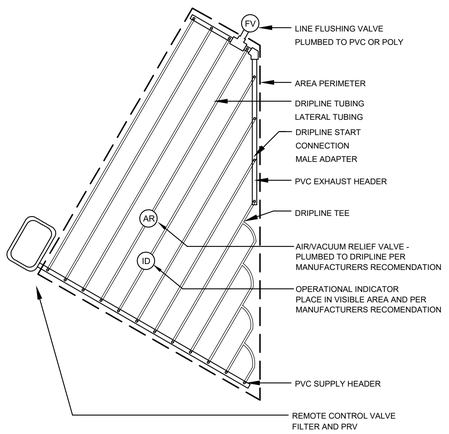
LEGEND



1. MULCH
2. FINISHED GRADE
3. HEADER
4. DRIPLINE, SEE PLANS FOR SPACING
5. SUBGRADE
6. SUPPLY LATERAL
7. DRIPLINE DEPTH
8. STAPLES

NOTES:

- CHOOSE HEADER STYLE BASED ON FLOW AND HEADER LAYOUT REQUIREMENTS.
- STAPLES ARE REQUIRED AT ALL BLANK TUBING HEADERS AND DRIPLINE, PER MANUFACTURES SPECIFICATIONS AND RECOMMENDATIONS.
- STAPLES ARE NOT REQUIRED ON PCV HEADERS.



SUBSURFACE HEADER & DRIPLINE INSTALLATION

NTFM-DPTH SCALE: N.T.S.

SITE PLAN GENERAL NOTES

A. ALL WORK SHALL CONFORM TO THE REQUIREMENTS OF THE CBC, TITLE 24, AND ADA.
B. DIMENSIONS INDICATED ARE FOR PLAN REVIEW PURPOSES ONLY; REFER TO CIVIL DRAWINGS FOR HORIZONTAL CONTROL PLAN, DIMENSIONS, SLOPES, BUILDING LOCATIONS, STRUCTURAL PAVING SECTIONS, ETC. TO BE USED FOR CONSTRUCTION.
C. REFER TO CIVIL DRAWINGS FOR FINISH GRADES AND CONFIRM SLOPE PERCENTAGES AS HEREIN NOTED ARE NOT EXCEEDED.
D. VERIFY GRADES AND SLOPES IN FIELD WITH ARCHITECT DURING FORMING AND PRIOR TO CONCRETE OR A.C. PAVING INSTALLATION.
E. VERIFY AND COORDINATE IN FIELD DURING LAYOUT THAT NEW WORK HAS CLEARANCE FROM AND DOES NOT IMPACT EXISTING ITEM OR UTILITY, PRIOR TO START OF WORK.
F. A PAVED ALL-WEATHER FIRE ACESS ROAD DESIGNED TO **CITY OF ROSEVILLE** STANDARD SPECIFICATIONS, AND FIRE HYDRANTS SHALL BE INSTALLED AND IN SERVICE PRIOR TO ANY COMBUSTIBLE CONSTRUCTION MATERIALS BEING BROUGHT ON SITE IN ACCORDANCE WITH [ENTER JURISDICTION] FIRE DEPARTMENT STANDARDS.
G. "EJ" DENOTES CONCRETE FLATWORK EXPANSION JOINT, TYPICAL ALL JOINTS NOT IDENTIFIED AS "EJ" SHALL BE CONTROL JOINTS (CJ) TYPICAL U.N.O.
H. FOR TYPICAL ASPHALT PAVING NOTES, REFER TO: CIVIL PLANS
FOR TYPICAL CONCRETE FLATWORK PAVING NOTES, REFER TO: CIVIL PLANS
I. REFER TO CIVIL AND LANDSCAPE DRAWINGS FOR OFF-SITE IMPROVEMENTS INCLUDING, BUT NOT LIMITED TO, CURB-GUTTER-SIDEWALK, STREET LIGHTING AND LANDSCAPE IMPROVEMENTS.
J. PROVIDE 12" WIDE CONCRETE MOW STRIP UNDER CHAIN LINK AND DECORATIVE IRON FENCING, TYPICAL; REFER TO SPECIFICATION SECTION 32 13 13.
K. PROTECT ALL EXISTING TREES TO REMAIN. IF ROOTS ARE ENCOUNTERED, NOTIFY ARCHITECT AND OWNER AND REQUEST DIRECTION. ALL ROOTS NEEDING TO BE REMOVED SHALL BE CUT NEAT AND CLEAN WITH A SAW OR PRUNNING CLIPPERS.
L. COORDINATE NEW WORK WITH DEMOLITION WORK. VERIFY EXTENT OF DEMOLITION NEEDED AND CONNECTION OF NEW AND EXISTING WORK PRIOR TO START OF DEMOLITION.
M. NEW CONCRETE SHALL MATCH EXISTING, ADJACENT CONCRETE IN COLOR, TEXTURE AND PATTERN.
N. TRANSITION FROM NEW PAVING/FLATWORK TO EXISTING PAVING/FLATWORK SHALL BE FLUSH, EVEN, LEVEL AND WITH A NEAT, CLEAN, AND STRAIGHT EDGE.
O. THICKNESS OF NEW A.C. PAVING SHALL MATCH EXISTING A.C. PAVING, OR BE A THICKER SECTION.
P. SEE MECHANICAL, ELECTRICAL, AND CIVIL DRAWINGS FOR UTILITIES.
Q. REROUT AND RECONENCT EXISTING UTILITIES TO BE IN PROPER AND FULLY FUNCTIONAL WORKING ORDER.
R. COORDINATE LOCATION OF NEW SIGNAGE AND NEW CURBS WITH RESPECT TO (E) TREES, WITH ARCHITECT IN FIELD, PRIOR TO INSTALLATION.
S. REINSTALL LANDSCAPE AND IRRIGATION IN DEMOLISHED AREAS TO MATCH EXISTING, MODIFY LANDSCAPE AND IRRIGATION AT ADJUSTED AREAS AS REQUIRED.
T. INSTALL NEW BASE TO MATCH (E) BASE IF REQUIRED TO ACHIEVE PAVING ELEVATION AND SLOPE. NEW BASE SHALL BE COMPACTED TO 95%.
U. FOR SITE DETAILS REFER TO **AS-601**
V. FOR SITE SIGNAGE DETALS REFER TO **AS-603**
W. **FOR ADDITIONAL SITE DEMOLITION & CONSTRUCTION REFER TO SPECIFICATIONS**

SITE PLAN GENERAL NOTES

A. ALL WORK SHALL CONFORM TO THE REQUIREMENTS OF THE CBC, TITLE 24, AND ADA.
B. DIMENSIONS INDICATED ARE FOR PLAN REVIEW PURPOSES ONLY; REFER TO CIVIL DRAWINGS FOR HORIZONTAL CONTROL PLAN, DIMENSIONS, SLOPES, BUILDING LOCATIONS, STRUCTURAL PAVING SECTIONS, ETC. TO BE USED FOR CONSTRUCTION.
C. REFER TO CIVIL DRAWINGS FOR FINISH GRADES AND CONFIRM SLOPE PERCENTAGES AS HEREIN NOTED ARE NOT EXCEEDED.
D. VERIFY GRADES AND SLOPES IN FIELD WITH ARCHITECT DURING FORMING AND PRIOR TO CONCRETE OR A.C. PAVING INSTALLATION.
E. VERIFY AND COORDINATE IN FIELD DURING LAYOUT THAT NEW WORK HAS CLEARANCE FROM AND DOES NOT IMPACT EXISTING ITEM OR UTILITY, PRIOR TO START OF WORK.
F. A PAVED ALL-WEATHER FIRE ACESS ROAD DESIGNED TO **CITY OF ROSEVILLE** STANDARD SPECIFICATIONS, AND FIRE HYDRANTS SHALL BE INSTALLED AND IN SERVICE PRIOR TO ANY COMBUSTIBLE CONSTRUCTION MATERIALS BEING BROUGHT ON SITE IN ACCORDANCE WITH [ENTER JURISDICTION] FIRE DEPARTMENT STANDARDS.
G. "EJ" DENOTES CONCRETE FLATWORK EXPANSION JOINT, TYPICAL ALL JOINTS NOT IDENTIFIED AS "EJ" SHALL BE CONTROL JOINTS (CJ) TYPICAL U.N.O.
H. FOR TYPICAL ASPHALT PAVING NOTES, REFER TO: CIVIL PLANS
FOR TYPICAL CONCRETE FLATWORK PAVING NOTES, REFER TO: CIVIL PLANS
I. REFER TO CIVIL AND LANDSCAPE DRAWINGS FOR OFF-SITE IMPROVEMENTS INCLUDING, BUT NOT LIMITED TO, CURB-GUTTER-SIDEWALK, STREET LIGHTING AND LANDSCAPE IMPROVEMENTS.
J. PROVIDE 12" WIDE CONCRETE MOW STRIP UNDER CHAIN LINK AND DECORATIVE IRON FENCING, TYPICAL; REFER TO SPECIFICATION SECTION 32 13 13.
K. PROTECT ALL EXISTING TREES TO REMAIN. IF ROOTS ARE ENCOUNTERED, NOTIFY ARCHITECT AND OWNER AND REQUEST DIRECTION. ALL ROOTS NEEDING TO BE REMOVED SHALL BE CUT NEAT AND CLEAN WITH A SAW OR PRUNNING CLIPPERS.
L. COORDINATE NEW WORK WITH DEMOLITION WORK. VERIFY EXTENT OF DEMOLITION NEEDED AND CONNECTION OF NEW AND EXISTING WORK PRIOR TO START OF DEMOLITION.
M. NEW CONCRETE SHALL MATCH EXISTING, ADJACENT CONCRETE IN COLOR, TEXTURE AND PATTERN.
N. TRANSITION FROM NEW PAVING/FLATWORK TO EXISTING PAVING/FLATWORK SHALL BE FLUSH, EVEN, LEVEL AND WITH A NEAT, CLEAN, AND STRAIGHT EDGE
O. THICKNESS OF NEW A.C. PAVING SHALL MATCH EXISTING A.C. PAVING, OR BE A THICKER SECTION.
P. SEE MECHANICAL, ELECTRICAL, AND CIVIL DRAWINGS FOR UTILITIES.
Q. REROUT AND RECONENCT EXISTING UTILITIES TO BE IN PROPER AND FULLY FUNCTIONAL WORKING ORDER.
R. COORDINATE LOCATION OF NEW SIGNAGE AND NEW CURBS WITH RESPECT TO (E) TREES, WITH ARCHITECT IN FIELD, PRIOR TO INSTALLATION.
S. REINSTALL LANDSCAPE AND IRRIGATION IN DEMOLISHED AREAS TO MATCH EXISTING, MODIFY LANDSCAPE AND IRRIGATION AT ADJUSTED AREAS AS REQUIRED.
T. INSTALL NEW BASE TO MATCH (E) BASE IF REQUIRED TO ACHIEVE PAVING ELEVATION AND SLOPE. NEW BASE SHALL BE COMPACTED TO 95%.
U. FOR SITE DETAILS REFER TO **AS-601**
V. FOR SITE SIGNAGE DETAILS REFER TO **AS-603**
W. **FOR ADDITIONAL SITE DEMOLITION & CONSTRUCTION REFER TO SPECIFICATIONS**

FLOOR PLAN GENERAL NOTES

A. ALL INTERIOR CONSTRUCTION ON THIS PROJECT IS DESIGNATED "AIRTIGHT" FOR THE PURPOSES OF SOUND ISOLATION AND NOISE CONTROL. THE REQUIREMENTS FOR AIRTIGHT CONSTRUCTION INCLUDE, BUT ARE NOT LIMITED TO, THE REQUIREMENTS DESCRIBED IN THE SPECIFICATIONS AND THE DETAILS SHOWN ON DRAWING SHEETS **A-740,741 & 750**. ALL NECESSARY PRODUCTS AND DETAILING SHALL BE PROVIDED TO ACHIEVE AIRTIGHT/LEAKPROOF CONSTRUCTION, WHETHER OR NOT THOSE PRODUCTS, OR DETAILS, ARE SPECIFICALLY DESCRIBED OR SHOWN IN THE PROJECT DOCUMENTS.
B. EXTERIOR DIMENSIONS ARE TO FACE OF SHEATHING OR FACE OF CMU, TYPICAL U.N.O.
C. INTERIOR DIMENSIONS ARE TO FACE OF STUD, TYPICAL U.N.O.
D. DOOR OPENINGS NOT LOCATED BY DIMENSIONS SHALL BE LOCATED 6" FROM FINISH WALL TO DOOR OPENING OR CENTERED IN WALL, U.N.O.
E. ALL INTERIOR WALLS SHALL BE 14'-0" U.N.O.
F. REFER TO STRUCTURAL DRAWINGS FOR ADDITIONAL DIMENSIONS.
G. FOR TOILET ROOM ACCESSORIES, DENOTED BY ◇, MOUNTING HEIGHTS AND BACKING REQUIREMENTS, REFER TO SHEET **G-900 & A-740.**
H. PROVIDE COAT HOOKS AND BUMPERS AT ALL TOILET PARTITION STALLS; REFER TO TOILET ROOM ACCESSORIES DETAIL FOR TYPE AND LOCATION.
I. FOR TYPICAL ACCESSIBLE MOUNTING HEIGHTS AND CLEARANCES, REFER TO SHEET **G-900**.
J. FOR SIGNAGE TYPES AND LOCATIONS, REFER TO EXITING AND SIGNAGE PLAN SHEET **G-923**
K. GENERAL CONTRACTOR SHALL PROVIDE BLOCKING AND/OR STRAPPING INSIDE WALLS FOR ATTACHING SHELVES, CABINETS, RAILINGS, MILLWORK, TOILET ACCESSORIES AND OTHER ITEMS REQUIRING SUPPORT; REFER TO DETAILS ON **G-900, A-740 & A-780**.
L. FIRE EXTINGUISHERS, TYPICAL U.N.O., SHALL HAVE A MINIMUM RATING OF 2A-10:BC WITH MULTI-PURPOSE DRY CHEMICAL FIRE EXTINGUISHER AGENT AND SHALL BE LOCATED SUCH THAT THE MAXIMUM TRAVEL DISTANCE BETWEEN EXTINGUISHERS DOES NOT EXCEED 75'. THE MAXIMUM FLOOR AREA PER UNIT OF "A" SHALL BE 3,000 S.F. AND THE MAXIMUM FLOOR AREA PER EXTINGUISHER SHALL BE 11,250 S.F. PER CBC TABLE 906.3(1).
M. FIRE EXTINGUISHERS AT ELECTRICAL AND IDF ROOMS SHALL HAVE A MINIMUM RATING OF 10B:C WITH CARBON DIOXIDE FIRE EXTINGUISHER AGENT AND SHALL BE LOCATED SUCH THAT THE MAXIMUM TRAVEL DISTANCE BETWEEN EXTINGUISHERS DOES NOT EXCEED 75'. THE MAXIMUM FLOOR AREA PER UNIT OF "A" SHALL BE 3,000 S.F. AND THE MAXIMUM FLOOR AREA PER EXTINGUISHER SHALL BE 11,250 S.F. PER CBC TABLE 906.3(1).
N. FIRE EXTINGUISHERS AT KITCHEN SHALL HAVE A MINIMUM RATING OF 40:BC WITH CLASS K FIRE EXTINGUISHER AGENT AND SHALL BE LOCATED SUCH THAT THE MAXIMUM TRAVEL DISTANCE BETWEEN EXTINGUISHERS DOES NOT EXCEED 75'. THE MAXIMUM FLOOR AREA PER UNIT OF "A" SHALL BE 1,000 S.F. AND THE MAXIMUM FLOOR AREA PER EXTINGUISHER SHALL BE 11,250 S.F. PER CBC TABLE 906.3(1).
O. REFER TO EXTERIOR ELEVATIONS FOR CLERESTORY WINDOW TYPES AND LOCATIONS.
P. ALL EXTERIOR WINDOWS SHALL HAVE SURFACE MOUNTED MANUALLY OPERATED ROLLER SHADES WITH DARKENING FABRIC PANELS, TYPICAL U.N.O.; ALL CONDUIT, WIRES, ETC. SHALL BE FULLY CONCEALED IN WALL; REFER TO SPECIFICATION SECTION 12 24 00.
Q. ALL EXTERIOR WINDOWS IN CONFERENCE, MEETING AND TRAINING ROOMS SHALL HAVE SURFACE MOUNTED MANUALLY OPERATED ROLLER SHADES WITH DARKENING AND BLACK OUT FABRIC PANELS, TYPICAL U.N.O.; ALL CONDUIT, WIRES, ETC. SHALL BE FULLY CONCEALED IN WALL; REFER TO SPECIFICATION SECTION 12 24 00.
R. CONTRACTOR SHALL PROVIDE BLOCKING AND/OR STRAPPING INSIDE WALLS/PARTITIONS FOR ATTACHING SHELVES, CABINETS, RAILINGS, MILLWORK, TOILET ACCESSORIES AND OTHER ITEMS REQUIRING SUPPORT INSIDE WALLS/PARTITIONS.
S. FOR EXTERIOR AND INTERIOR WINDOW TYPES, REFER TO SHEET **A-811.**

FLOOR PLAN GENERAL NOTES

A. ALL INTERIOR CONSTRUCTION ON THIS PROJECT IS DESIGNATED "AIRTIGHT" FOR THE PURPOSES OF SOUND ISOLATION AND NOISE CONTROL. THE REQUIREMENTS FOR AIRTIGHT CONSTRUCTION INCLUDE, BUT ARE NOT LIMITED TO, THE REQUIREMENTS DESCRIBED IN THE SPECIFICATIONS AND THE DETAILS SHOWN ON DRAWING SHEETS **A-742,741 & 750**. ALL NECESSARY PRODUCTS AND DETAILING SHALL BE PROVIDED TO ACHIEVE AIRTIGHT/LEAKPROOF CONSTRUCTION, WHETHER OR NOT THOSE PRODUCTS, OR DETAILS, ARE SPECIFICALLY DESCRIBED OR SHOWN IN THE PROJECT DOCUMENTS.
B. EXTERIOR DIMENSIONS ARE TO FACE OF SHEATHING OR FACE OF CMU, TYPICAL U.N.O.
C. INTERIOR DIMENSIONS ARE TO FACE OF STUD, TYPICAL U.N.O.
D. DOOR OPENINGS NOT LOCATED BY DIMENSIONS SHALL BE LOCATED 6" FROM FINISH WALL TO DOOR OPENING OR CENTERED IN WALL, U.N.O.
E. ALL INTERIOR WALLS SHALL BE 14'-0" U.N.O.
F. REFER TO STRUCTURAL DRAWINGS FOR ADDITIONAL DIMENSIONS.
G. FOR TOILET ROOM ACCESSORIES, DENOTED BY ◇, MOUNTING HEIGHTS AND BACKING REQUIREMENTS, REFER TO SHEET **G-900 & A-740.**
H. PROVIDE COAT HOOKS AND BUMPERS AT ALL TOILET PARTITION STALLS; REFER TO TOILET ROOM ACCESSORIES DETAIL FOR TYPE AND LOCATION.
I. FOR TYPICAL ACCESSIBLE MOUNTING HEIGHTS AND CLEARANCES, REFER TO SHEET **G-900**.
J. FOR SIGNAGE TYPES AND LOCATIONS, REFER TO EXITING AND SIGNAGE PLAN SHEET **G-923**
K. GENERAL CONTRACTOR SHALL PROVIDE BLOCKING AND/OR STRAPPING INSIDE WALLS FOR ATTACHING SHELVES, CABINETS, RAILINGS, MILLWORK, TOILET ACCESSORIES AND OTHER ITEMS REQUIRING SUPPORT; REFER TO DETAILS ON **G-900, A-740 & A-760.**
L. FIRE EXTINGUISHERS, TYPICAL U.N.O., SHALL HAVE A MINIMUM RATING OF 2A-10 BC WITH MULTI-PURPOSE DRY CHEMICAL FIRE EXTINGUISHER AGENT AND SHALL BE LOCATED SUCH THAT THE MAXIMUM TRAVEL DISTANCE BETWEEN EXTINGUISHERS DOES NOT EXCEED 75'. THE MAXIMUM FLOOR AREA PER UNIT OF "A" SHALL BE 3,000 S.F. AND THE MAXIMUM FLOOR AREA PER EXTINGUISHER SHALL BE 11,250 S.F. PER CBC TABLE 906.3(1).
M. FIRE EXTINGUISHERS AT ELECTRICAL AND IDF ROOMS SHALL HAVE A MINIMUM RATING OF 10B C WITH CARBON DIOXIDE FIRE EXTINGUISHER AGENT AND SHALL BE LOCATED SUCH THAT THE MAXIMUM TRAVEL DISTANCE BETWEEN EXTINGUISHERS DOES NOT EXCEED 75'. THE MAXIMUM FLOOR AREA PER UNIT OF "A" SHALL BE 3,000 S.F. AND THE MAXIMUM FLOOR AREA PER EXTINGUISHER SHALL BE 11,250 S.F. PER CBC TABLE 906.3(1).
N. FIRE EXTINGUISHERS AT KITCHEN SHALL HAVE A MINIMUM RATING OF 40;BC WITH CLASS K FIRE EXTINGUISHER AGENT AND SHALL BE LOCATED SUCH THAT THE MAXIMUM TRAVEL DISTANCE BETWEEN EXTINGUISHERS DOES NOT EXCEED 75'. THE MAXIMUM FLOOR AREA PER UNIT OF "A" SHALL BE 1,000 S.F. AND THE MAXIMUM FLOOR AREA PER EXTINGUISHER SHALL BE 11,250 S.F. PER CBC TABLE 906.3(1).
O. REFER TO EXTERIOR ELEVATIONS FOR CLERESTORY WINDOW TYPES AND LOCATIONS.
P. ALL EXTERIOR WINDOWS SHALL HAVE SURFACE MOUNTED MANUALLY OPERATED ROLLER SHADES WITH DARKENING FABRIC PANELS, TYPICAL U.N.O.; ALL CONDUIT, WIRES, ETC. SHALL BE FULLY CONCEALED IN WALL; REFER TO SPECIFICATION SECTION 12 24 00.
Q. ALL EXTERIOR WINDOWS IN CONFERENCE, MEETING AND TRAINING ROOMS SHALL HAVE SURFACE MOUNTED MANUALLY OPERATED ROLLER SHADES WITH DARKENING AND BLACK OUT FABRIC PANELS. TYPICAL U.N.O.:; ALL CONDUIT, WIRES, ETC. SHALL BE FULLY CONCEALED IN WALL; REFER TO SPECIFICATION SECTION 12 24 00.
R. CONTRACTOR SHALL PROVIDE BLOCKING AND/OR STRAPPING INSIDE WALLS/PARTITIONS FOR ATTACHING SHELVES, CABINETS, RAILINGS, MILLWORK, TOILET ACCESSORIES AND OTHER ITEMS REQUIRING SUPPORT INSIDE WALLS/PARTITIONS.
S. FOR EXTERIOR AND INTERIOR WINDOW TYPES, REFER TO SHEET **A-811.**
T. FOR DOOR SCHEDULE, REFER TO SHEET **A-801.**

G. METAL LOUVERS WITHIN HOLLOW METAL DOORS SHALL BE PAINTED TO MATCH DOOR.
H. REFER TO STRUCTURAL DRAWINGS FOR FOUNDATION INFORMATION.
I. CEMENT PLASTER CONTROL JOINTS SHALL BE PLACED IN THE FOLLOWING ORDER OF PRIORITY:
   a. AS NOTED ON ELEVATIONS
   b. ALIGN WITH ADJACENT EDGE OF OPENINGS, ALIGN WITH WINDOW MULLION EDGES OR CENTERLINE
   c. ALIGN WITH EXISTING JOINT PATTERN
J. MASONRY EXPANSION JOINTS SHALL BE PLACED IN ORDER OF PRIORITY IDENTIFIED FOR CEMENT PLASTER JOINTS, U.N.O.
K. CONTRACTOR TO COORDINATE AND CONFIRM EXPANSION AND CONTROL JOINT LOCATIONS WITH ARCHITECT PRIOR TO LAYOUT AND INSTALLATION.

FLOOR PLAN GENERAL NOTES

A. ALL INTERIOR CONSTRUCTION ON THIS PROJECT IS DESIGNATED "AIRTIGHT" FOR THE PURPOSES OF SOUND ISOLATION AND NOISE CONTROL. THE REQUIREMENTS FOR AIRTIGHT CONSTRUCTION INCLUDE, BUT ARE NOT LIMITED TO, THE REQUIREMENTS DESCRIBED IN THE SPECIFICATIONS AND THE DETAILS SHOWN ON DRAWING SHEETS **A-740,741 & 750**. ALL NECESSARY PRODUCTS AND DETAILING SHALL BE PROVIDED TO ACHIEVE AIRTIGHT/LEAKPROOF CONSTRUCTION, WHETHER OR NOT THOSE PRODUCTS, OR DETAILS, ARE SPECIFICALLY DESCRIBED OR SHOWN IN THE PROJECT DOCUMENTS.
B. EXTERIOR DIMENSIONS ARE TO FACE OF SHEATHING OR FACE OF CMU, TYPICAL U.N.O.
C. INTERIOR DIMENSIONS ARE TO FACE OF STUD, TYPICAL U.N.O.
D. DOOR OPENINGS NOT LOCATED BY DIMENSIONS SHALL BE LOCATED 6" FROM FINISH WALL TO DOOR OPENING OR CENTERED IN WALL, U.N.O.
E. ALL INTERIOR WALLS SHALL BE 14'-0" U.N.O.
F. REFER TO STRUCTURAL DRAWINGS FOR ADDITIONAL DIMENSIONS.
G. FOR TOILET ROOM ACCESSORIES, DENOTED BY ◇,MOUNTING HEIGHTS AND BACKING REQUIREMENTS, REFER TO SHEET **G-900 & A-740.**
H. PROVIDE COAT HOOKS AND BUMPERS AT ALL TOILET PARTITION STALLS; REFER TO TOILET ROOM ACCESSORIES DETAIL FOR TYPE AND LOCATION.
I. FOR TYPICAL ACCESSIBLE MOUNTING HEIGHTS AND CLEARANCES, REFER TO SHEET **G-900**.
J. FOR SIGNAGE TYPES AND LOCATIONS, REFER TO EXITING AND SIGNAGE PLAN SHEET **G-923**
K. GENERAL CONTRACTOR SHALL PROVIDE BLOCKING AND/OR STRAPPING INSIDE WALLS FOR ATTACHING SHELVES, CABINETS, RAILINGS, MILLWORK, TOILET ACCESSORIES AND OTHER ITEMS REQUIRING SUPPORT; REFER TO DETAILS ON **G-900, A-740 & A-780**.
L. FIRE EXTINGUISHERS, TYPICAL U.N.O., SHALL HAVE A MINIMUM RATING OF 2A-10:BC WITH MULTI-PURPOSE DRY CHEMICAL FIRE EXTINGUISHER AGENT AND SHALL BE LOCATED SUCH THAT THE MAXIMUM TRAVEL DISTANCE BETWEEN EXTINGUISHERS DOES NOT EXCEED 75'. THE MAXIMUM FLOOR AREA PER UNIT OF "A" SHALL BE 3,000 S.F. AND THE MAXIMUM FLOOR AREA PER EXTINGUISHER SHALL BE 11,250 S.F. PER CBC TABLE 906.3(1).
M. FIRE EXTINGUISHERS AT ELECTRICAL AND IDF ROOMS SHALL HAVE A MINIMUM RATING OF 10B:C WITH CARBON DIOXIDE FIRE EXTINGUISHER AGENT AND SHALL BE LOCATED SUCH THAT THE MAXIMUM TRAVEL DISTANCE BETWEEN EXTINGUISHERS DOES NOT EXCEED 75'. THE MAXIMUM FLOOR AREA PER UNIT OF "A" SHALL BE 3,000 S.F. AND THE MAXIMUM FLOOR AREA PER EXTINGUISHER SHALL BE 11,250 S.F. PER CBC TABLE 906.3(1).
N. FIRE EXTINGUISHERS AT KITCHEN SHALL HAVE A MINIMUM RATING OF 40:BC WITH CLASS K FIRE EXTINGUISHER AGENT AND SHALL BE LOCATED SUCH THAT THE MAXIMUM TRAVEL DISTANCE BETWEEN EXTINGUISHERS DOES NOT EXCEED 75'. THE MAXIMUM FLOOR AREA PER UNIT OF "A" SHALL BE 1,000 S.F. AND THE MAXIMUM FLOOR AREA PER EXTINGUISHER SHALL BE 11,250 S.F. PER CBC TABLE 906.3(1).
O. REFER TO EXTERIOR ELEVATIONS FOR CLERESTORY WINDOW TYPES AND LOCATIONS.
P. ALL EXTERIOR WINDOWS SHALL HAVE SURFACE MOUNTED MANUALLY OPERATED ROLLER SHADES WITH DARKENING FABRIC PANELS, TYPICAL U.N.O.; ALL CONDUIT, WIRES, ETC. SHALL BE FULLY CONCEALED IN WALL; REFER TO SPECIFICATION SECTION 12 24 00.
Q. ALL EXTERIOR WINDOWS IN CONFERENCE, MEETING AND TRAINING ROOMS SHALL HAVE SURFACE MOUNTED MANUALLY OPERATED ROLLER SHADES WITH DARKENING AND BLACK OUT FABRIC PANELS, TYPICAL U.N.O.;: ALL CONDUIT, WIRES, ETC. SHALL BE FULLY CONCEALED IN WALL; REFER TO SPECIFICATION SECTION 12 24 00.
R. CONTRACTOR SHALL PROVIDE BLOCKING AND/OR STRAPPING INSIDE WALLS/PARTITIONS FOR ATTACHING SHELVES, CABINETS, RAILINGS, MILLWORK, TOILET ACCESSORIES AND OTHER ITEMS REQUIRING SUPPORT INSIDE WALLS/PARTITIONS.
S. FOR EXTERIOR AND INTERIOR WINDOW TYPES, REFER TO SHEET **A-811.**
T. FOR DOOR SCHEDULE, REFER TO SHEET **A-801.**
U. FOR INTERIOR FINISH PLAND AND FINISH SCHEDULE REFER TO **A-251** & **A-252**

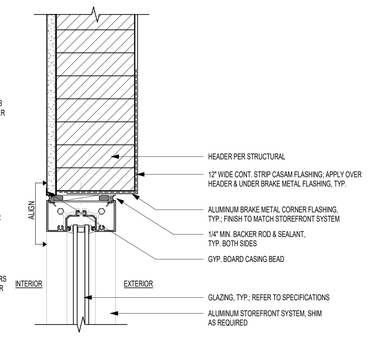
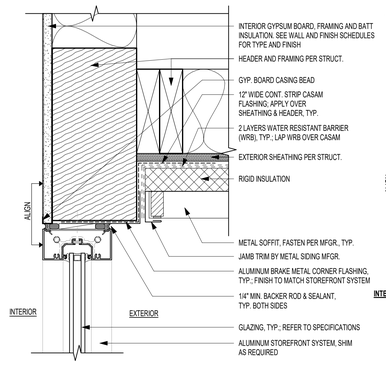
22 STOREFRONT DOOR HEAD
AT ENTRY CANOPY — 3"=1'-0"

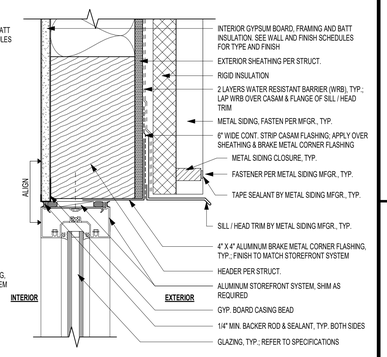
23 STOREFRONT WINDOW JAMB
AT CMU WALL — 3" = 1'-0"



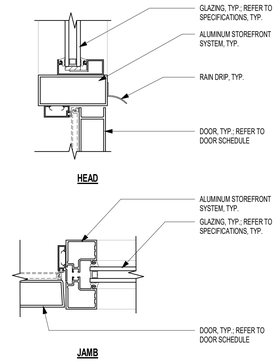
24 STOREFRONT WINDOW SILL
AT CMU BLOCK — 3"=1'-0"



GENERAL NOTES:
A. CASAM IS AN ABBREVIATION FOR COLD APPLIED SELF ADHERING MEMBRANE.
B. INSTALL IN ORDER AS SHOWN BY NUMBERS.
C. LEAVE RELEASE PAPER ON LOWER HALF OF SILL FLASHING; ADHERE OVER WATER RESISTANT BARRIER (WRB) ONCE INSTALLED.
D. APPLY WATER RESISTANT BARRIER (WRB) OVER CASAM MEMBRANE EXCEPT WHERE SPECIFICALLY NOTED; REFER TO SPECIFICATIONS FOR WRB ASSEMBLY AND WALL & WINDOW DETAILS FOR ADDITIONAL CASAM / WRB LAPPING INFORMATION.



17 MEMBRANE FLASHING
AT STOREFRONT WINDOW EXTERIOR OPENINGS — 1/4"=1'-0"



9 STOREFRONT WINDOW HEAD
AT ENTRY TOWER ROOF — 3" = 1'-0"

5 STOREFRONT WINDOW HEAD
AT EXTERIOR SOFFIT — 3"=1'-0"

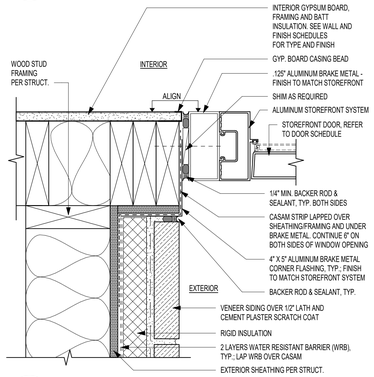
1 STOREFRONT WINDOW HEAD
AT METAL SIDING — 3" = 1'-0"

GENERAL NOTES FOR WINDOW AND FLASHING CONDITIONS

A. COLD APPLIED SELF ADHERING(CASAM) MEMBRANE AND WATER RESISTANT BARRIER(WRB) TO BE INSTALLED PER C.B.C. REQUIREMENTS
B. COORDINATE AND SEQUENCE WITH OTHER TRADES FOR PROPER INSTALLATION AND OVERLAP OF S.M. FLASHING, WATERPROOF MEMBRANE FLASHING AND WRB, WINDOW SEALANT, AND EXTERIOR FINISH MATERIALS TO FORM WATERTIGHT BARRIER.
C. METAL WINDOW FLASHING SHALL BE SET IN A CONTINUOUS BEAD OF SEALANT.
D. METAL WINDOW FLASHING SHALL BE SINGLE UNIT WITH FULLY SOLDERED WELDED SEAMS. IF UNIT MUST BE MORE THAN A SINGLE PECE, THE SEAMS SHALL BE AT MIDDLE PORTION OF HEAD AND SILL. JOINTS SHALL NOT OCCUR AT INTERSECTIONS OR CORNERS.
E. WINDOW DETAILS HAVE BEEN PROVIDED FOR GENERAL REFERENCE ONLY. SEE SHOP DRAWINGS FOR MORE SPECIFIC, DETAILED AND ADDITIONAL INFORMATION. COORDINATE ALL TRADES WITH WINDOW SHOP DRAWINGS.
F. SIZE AND SHAPE OF FLASHING SHALL BE ADJUSTED AS REQD. TO PROVIDE A MIN. 4" FLANGE BEHIND EXTERIOR PANEL ASSEMBLY, COLD APPLIED SELF ADHERING WATERPROOF MEMBRANE (CASAM), WRB, AND TO WORK WITH CURTAINWALL OR STOREFRONT MULLION AS APPLICABLE.

SILL FLASHING

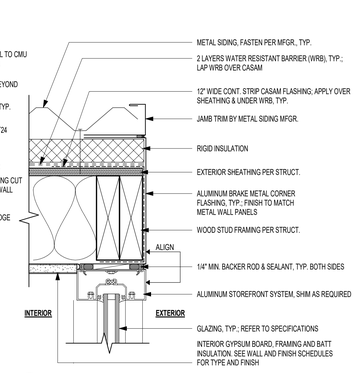
A. SHALL HAVE A VERTICAL REAR LEG, SEALED AT END TERMINATION.
B. SHALL HAVE SEALED END DAMS ALL TERMINATIONS
C. SHALL BE SIZED TO ACCOMMODATE VERTICAL FLASHING, WATERPROOF MEMBRANE, AND WRB AT JAMBS
D. ALL SPLICES MUST ALLOW FOR THERMAL AND DYNAMIC MOVEMENT AND BE SEALED IN ACCORDANCE WITH ASTM AND MANUFACTURERS REQUIREMENTS. THE SPLICE WILL HAVE A BRIDGE SEAL 1/4" THICK WITH A MIN. OF 1/4" BOND SURFACE TO BOTH SUBSTRATES. THE BRIDGE SEAL MUST NOT BE DISRUPTED WITH THREE SIDED ADHESION OR OTHER OBSTRUCTIONS.
E. ALL PENETRATIONS THROUGH THE SILL FLASHING MUST BE SEALED WATERTIGHT
F. ALL ATTACHMENTS MUST ACCOMMODATE THERMAL AND DYNAMIC MOVEMENT
G. ALL INTERRUPTIONS IN FLASHING MUST BE SEALED
H. GALV. SHEET METAL SILL FLASHING AND WATERPROOF MEMBRANE SILL FLASHING SHALL EXTEND BEYOND WINDOW FRAME JAMB AT ALL END CONDITIONS AND SHALL TURN UP 6" VERTICAL AT JAMB CONDITIONS.



VERTICAL JAMB AT SILL AND HEAD FLASHING AREAS

A. INSTALL VERTICAL WATERPROOF MEMBRANE FLASHING AT JAMB AND IT SHALL OVERLAP UPTURNED SILL FLASHING.
B. INSTALL WATERPROOF MEMBRANE FLASHING AT HEAD AND OVERLAP VERTICAL PIECES JAMB AND HEAD FLASHING
C. VERTICAL JAMB FLASHING SHALL RUN CONTINUOUS WITHOUT SPLICE, BREAK OR INTERRUPTION TO EDGE OF SILL FLASHING. IT SHALL BE FULLY SOLDERED/SEALED TO SILL FLASHING, SEAL MUST BE WATERTIGHT AND ALLOW FOR DYNAMIC AND THERMAL MOVEMENT
D. JAMB FLASHING SHALL MEET THE HEAD FLASHING BY BUTTING INTO THE BOTTOM EDGE. COMBINATION OF BRIDGE SEAL (AT FACE) AND FILLET BEAD (AT RETURN) MUST OCCUR AT ALL INTERSECTIONS
E. ALL FASTENER PENETRATIONS MUST BE SEALED WATERTIGHT
F. ATTACHMENTS MUST ALLOW FOR DYNAMIC AND THERMAL MOVEMENT
G. HEAD SPLICES TO BE SEALED WITH BRIDGE SEAL. SEE SILL FLASHING NOTES
H. ALL SPLICES MUST ALLOW FOR DYNAMIC AND THERMAL MOVEMENT AND BE SEALED IN ACCORDANCE WITH ASTM AND MANUFACTURERS REQUIREMENTS. THE SPLICE WILL HAVE A BRIDGE SEAL 1/4" THICK WITH A MIN. OF 1/4" BOND SURFACE TO BOTH SUBSTRATES. THE BRIDGE SEAL MUST NOT BE DISRUPTED WITH THREE SIDED ADHESION OR OTHER OBSTRUCTIONS.

PERIMETER SEALANT



A. EXTERIOR WINDOW PERIMETER SEALANT SHALL ALWAYS BE CONTINUOUS AND IN THE SAME PLANE
B. INSTALLER SHALL TAKE CARE TO COMPLETE SEALS AROUND ALL BRIDGE AND FILLET BEADS USED TO SEAL FLASHING

BID SET (PRELIMINARY)

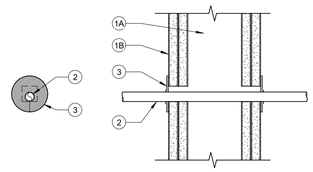
DATE PLOTTED: 7/5/2024 11:14:49 AM FILE LOCATION: C:\Users\kaleksandrov\OneDrive - Williams & Paddon\Documents\210015.01_CITY OF ROSEVILLE_DCWWTP ADMIN BLDG_A22_kaleksandrov4T455.rvt

System No. W-L-1527

ANSI/UL 1479 (ASTM E814)
F RATING - 1 and 2 Hr (See Item 1)
T RATING - 1 and 2 Hr (See Item 1)
L RATING AT AMBIENT - Less than 1 CFM/sq ft
L RATING AT 400F - Less than 1 CFM/sq ft

1. Wall Assembly — The 1 or 2 hr fire rated gypsum board/stud wall assembly shall be constructed of the materials and in the manner specified in the individual U300, U400, V400 or W400 Series Wall and Partition Designs in the UL Fire Resistance Directory and shall include the following construction features:
   A. Studs — Wall framing may consist of either wood studs or steel channel studs. Wood studs to consist of nom 2 by 4 in. (51 by 102 mm) lumber spaced 16 in. (406 mm) OC. Steel studs to be min 3-1/2 in. (89 mm) wide and spaced max 24 in. (610 mm) OC.
   B. Gypsum Board* — One or two layers of nom 5/8 in. (16 mm) thick gypsum board as specified in the individual Wall and Partition Design. Max diam of opening is 5 in. (127 mm).
      • The hourly F, T, FT, FH and FTH Ratings of the firestop system are equal to the hourly fire rating of the wall assembly in which it is installed.
2. Metallic Penetrant - One metallic pipe, conduit or tube to be installed either concentrically or eccentrically, penetrating wall assembly on one side of wall. The annular space between the pipe, conduit or tubing and the periphery of opening shall be min 0 in. (point contact) to max 7/8 in. (22 mm). Pipe, conduit or tubing shall be rigidly supported within the wall and on the penetrated side of the wall assembly. The following types and sizes of metallic pipes, conduits or tubing may be used:
   A. Steel Pipe - Nom 3 in. (76 mm) diam (or smaller) Schedule 5 (or heavier) steel pipe.
   B. Iron Pipe - Nom 3 in. (76 mm) diam (or smaller) cast or ductile iron pipe.
   C. Conduit - Nom 3 in. (76 mm) diam (or smaller) steel electrical metallic tubing (EMT), nom 3 in. (76 mm) diam steel conduit or nom 1 in. (25 mm) diam (or smaller) flexible steel conduit.
   D. Copper Tubing - Nom 1 in. (25 mm) diam (or smaller) Type L (or heavier) copper tubing.
   E. Copper Pipe - Nom 1 in. (25 mm) diam (or smaller) Regular (or heavier) copper pipe.
3. Fill, Void or Cavity Material* - Sealant - Min 5/8 in. (16 mm) thickness of fill material applied within annulus, flush with surfaceof wall assembly. At point contact location, min 3/8 in. (10 mm) diam bead of fill material to be applied at the penetrant/gypsum board interface.

SPECIFIED TECHNOLOGIES INC - SpecSeal Series SSS Sealant or SpecSeal LCI Sealant



* Indicates such products shall bear the UL or cUL Certification Mark for jurisdictions employing the UL or cUL Certification (such as Canada), respectively.

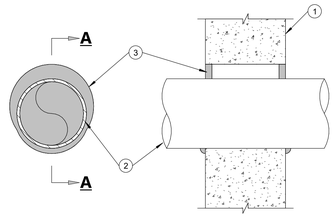
W-L-1527: PIPE @ MEMBRANE N.T.S. **3**

System No. W-L-1506

F RATING - 1 and 2 Hr (See Item 1)
T RATING - 1 and 2 Hr (See Item 1)
L RATING AT AMBIENT - Less than 1 CFM/Opening
L RATING AT 400F - Less than 1 CFM/Opening

1. Wall Assembly — The 1 or 2 hr fire rated gypsum board/stud wall assembly shall be constructed of the materials and in the manner specified in the individual U300, U400, V400 or W400 Series Wall and Partition Designs in the UL Fire Resistance Directory and shall include the following construction features:
   A. Studs — Wall framing may consist of either wood studs or steel channel studs. Wood studs to consist of nom 2 in. (51 mm) by 4 in. (102 mm) lumber spaced 16 in. (406 mm) OC. Steel studs to be min 3-1/2 in. (89 mm) wide and spaced max 24 in. (610 mm) OC.
   B. Gypsum Board* — 5/8 in. (16 mm) thick, 4 ft (1219 cm) wide with square or tapered edges. The gypsum wallboard type, thickness, number of layers, fastener type and sheet orientation shall be as specified in the individual Wall and Partition Design. Opening may be round, rectangular or irregular with a max diam or dimension of 1 in. (25 mm), or round with a max diam of 1-1/8 in. (29 mm).
      • The hourly F, FH, FT and FTH Ratings of the firestop system are equal to the hourly fire rating of the wall assembly in which it is installed.
2. Through-Penetrant — Max one metallic pipe, tubing or conduit installed either concentrically or eccentrically within the firestop system. The annular space between penetrant and periphery of the opening shall be min 0 in. (point contact). When opening dimension exceeds 1 in. (25 mm), the max annular space is 3/8 in. (9.5 mm). Pipe or tubing to be rigidly supported on both sides of wall assembly. The following types and sizes of pipes, tubing or conduit may be used:
   A. Steel Pipe — Nom 3/4 in. (19 mm) diam (or smaller) Schedule 5 (or heavier) steel pipe.
   B. Iron Pipe — Nom 3/4 in. (19 mm) diam (or smaller) cast or ductile iron pipe.
   C. Copper Tubing — Nom 1/2 in. (13 mm) diam (or smaller) Type L and Type K (or heavier) copper tubing.
   D. Copper Pipe — Nom 1/2 in. (13 mm) diam (or smaller) Regular (or heavier) copper pipe.
   E. Conduit — Nom 3/4 in. (19 mm) diam (or smaller) rigid or flexible steel conduit.
   F. Conduit — Nom 3/4 in. (19 mm) diam (or smaller) electrical metallic tubing (EMT).
3. Fill, Void or Cavity Material* — Nom 60 mm diam by 3 mm thick putty disc with one seam at radius. Paper-backer of disc to be removed and disc firmly pressed around the penetrant lapping nom 5 mm onto penetrant to completely cover opening and firmly pressed to lap onto the wall around periphery of opening. Disc seam to be firmly pressed and sealed tight. Disc to be installed at both surfaces of wall.
   • HILTI CONSTRUCTION CHEMICALS, DIV OF HILTI INC — CFS-D 1" Firestop Cable Disc



* Indicates such products shall bear the UL or cUL Certification Mark for jurisdictions employing the UL or cUL Certification (such as Canada), respectively.

W-L-1506: PIPE @ WALL ASSEMBLY N.T.S. **4**

System No. W-L-1065

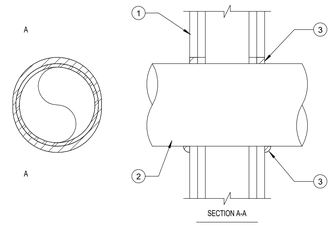
ANSI/UL 1479 (ASTM E814)
F RATING - 1 and 2 Hr (See Items 1 and 3)
T RATING - 0 Hr
L RATING AT AMBIENT - Less than 1 CFM/sq ft
L RATING AT 400F - Less than 1 CFM/sq ft

1. Wall Assembly — Min 3-3/4 in. and 5 in. (95 and 127 mm) thick reinforced lightweight or normal weight (100-150 pcf or 1600-2400 kg/m3) concrete for 1 and 2 h rated assemblies, respectively. Wall may also be constructed of any UL Classified Concrete Blocks*. Max diam of openings 32-1/4 in. (819 mm).is 32-1/4 in. (819 mm) See Concrete Blocks (CAZT) category in the Fire Resistance Directory for names of manufacturers.

2. Through—Penetrants — One metallic pipe, conduit or tubing to be centered within the firestop system. The annular space shall be min 0 in. to max 2-1/4 in. (57 mm). Pipe may be installed with continuous point contact. Pipe, conduit or tube may be installed at an an angle not greater than 45 degrees from perpendicular. Pipe, conduit or tubing to be rigidly supported on both sides of wall assembly. The following types and sizes of metallic pipes, conduits or tubing may be used:

   A. Steel Pipe — Nom 30 in. (762 mm) diam (or smaller) Schedule 10 (or heavier) steel pipe.
   B. Iron Pipe — Nom 30 in. (762 mm) diam (or smaller) cast or ductile iron pipe.
   C. Conduit — Nom 4 in. (102 mm) diam (or smaller) steel electrical metallic tubing or 6 in. (152 mm) diam (or smaller) steel conduit.
   D. Copper Tubing — Nom 6 in. (152 mm) diam (or smaller) Type L (or heavier) copper tubing.
   E. Copper Pipe — Nom 6 in. (152 mm) diam (or smaller) Regular (or heavier) copper pipe.

3. Fill, Void or Cavity Material* — Min 5/8 in. (16 mm) thickness of fill material applied within the annulus, flush with both surfaces of wall. At the point or continuous contact locations between pipe and wall, a min 1/2 in. (13 mm) diam bead of fill material shall be applied at the pipe-wall interface on both surfaces of wall. HILTI CONSTRUCTION CHEMICALS, DIV OF HILTI INC — FS-One Sealant or FS-ONE MAX Intumescent Sealant



* Indicates such products shall bear the UL or cUL Certification Mark for jurisdictions employing the UL or cUL Certification (such as Canada), respectively.

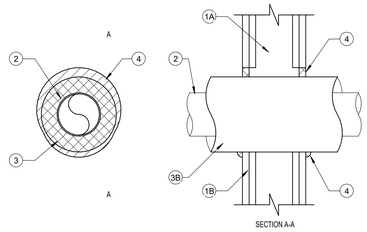
System No. W-L-1290

F RATING - 1 and 2 Hr (See Item 1)
T RATING - 0 Hr
L RATING AT AMBIENT - Less than 1 CFM/sq ft
L RATING AT 400F - Less than 1 CFM/sq ft

1. Wall Assembly – The 1 or 2 hr fire rated gypsum board/stud wall assembly shall be constructed of the materials and in the manner specified in the individual U300 or U400 Series Wall and Partition Designs in the UL Fire Resistance Directory and shall include the following construction features.
   A. Studs – The 1 or 2 hr fire rated gypsum board/stud wall assembly shall be constructed of the materials and in the manner specified in the individual U300 or U400 Series Wall and Partition Designs in the UL Fire Resistance Directory and shall include the following construction features.
   B. Gypsum Board* – Nom 5/8 in. thick, 4 ft wide with square or tapered edges. The gypsum board type, thickness, number of layers, fastener type and sheet orientation shall be as specified in the individual U300 or U400 Series Design in the Fire Resistance Directory. Max diam of opening is 5 in.
      • The hourly F and T Ratings of the firestop system are equal to the hourly fire rating of the wall assembly in which it is installed.
2. Through Penetrant – One metallic pipe, conduit or tubing installed concentrically or eccentrically within the firestop system. Pipe, conduit or tubing may be installed at an angle not greater than 45 degrees from perpendicular. Pipe, conduit or tube to be rigidly supported on both sides of wall assembly. The annular space between the pipe or tube and periphery of the opening shall be min 0 in (point contact) to max 1/2 in. The following types and sizes of metallic pipes, conduit or tube may be used:
   A. Steel Pipe – Nom 4 in. diam (or smaller) Schedule 40 (or heavier) steel pipe.
   B. Iron Pipe – Nom 4 in. diam (or smaller) cast or ductile iron pipe.
   C. Conduit – Nom 4 in. diam (or smaller) steel electrical metallic tubing (EMT) or steel conduit.
   D. Copper Tube – Nom 4 in. diam (or smaller) Type L (or heavier) copper tube.
   E. Copper Pipe – Nom 4 in. diam (or smaller) Regular (or heavier) copper pipe.
3. Fill, Void or Cavity Material*-Sealant – Min 5/8 in. thickness of fill material applied within the annulus, flush with both surfaces of wall. At the point contact location between pipe and wall, a min ½ in diam bead of fill material shall be applied at the pipe/wall interface.
   • HILTI CONSTRUCTION CHEMICALS, DIV OF HILTI INC – CP606 Flexible Firestop Sealant



*Bearing the UL Classification Mark

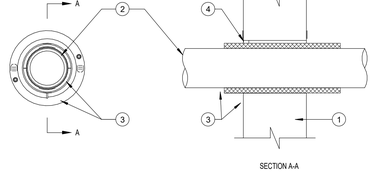
W-L-1290: PIPE @ WALL ASSEMBLY N.T.S. **5**

System No. W-L-5257

F RATING - 1 and 2 Hr (See Item 1)
T RATING - 0 and 1 Hr (See Item 1)
L RATING AT AMBIENT - 4 CFM/Sq Ft (See Item 4)
L RATING AT 400F - Less Than 1 CFM/Sq Ft (See Item 4)

1. Wall Assembly — The 1 or 2 hr fire-rated gypsum board/stud wall assembly shall be constructed of the materials and in the manner specified in the individual U300, U400 or V400 Series Wall or Partition Design in the UL Fire Resistance Directory and shall include the following construction features:
   A. Studs — Wall framing may consist of either wood studs or steel channel studs. Wood studs to consist of nom 2 by 4 in. (51 by 102 mm) lumber spaced 16 in. (406 mm) OC. Steel studs to be min 3-1/2 in. (89 mm) wide and spaced max 24 in. (610 mm) OC.
   B. Gypsum Board* — 5/8 in. (16 mm) thick, 4 ft (122 cm) wide, with square or tapered edges. Thickness, type, number of layers and fasteners as specified in the individual Wall and Partition Design. Max diam of opening is 8 in. (203 mm).
      • The hourly F Rating of the firestop system is equal to the hourly fire rating of the wall assembly in which it is installed. The hourly T Rating of the firestop system is 1 hr for 2 hr fire rated walls and 0 hr for 1 hr fire rated walls.
2. Through Penetrant — One metallic pipe or tube to be installed eccentrically or concentrically within the firestop system. Pipe or tube to be rigidly supported on both sides of the wall assembly. The following types and sizes of metallic pipes and tubes may be used:
   A. Steel Pipe — Nom 4 in. (102 mm) diam (or smaller) Schedule 5 (or heavier) steel pipe.
   B. Iron Pipe — Nom 4 in. (102 mm) diam (or smaller) cast or ductile iron pipe.
   C. Copper Pipe — Nom 4 in. (102 mm) diam (or smaller) Regular (or heavier) copper pipe.
   D. Copper Tube — Nom 4 in. (102 mm) diam (or smaller) Type L (or heavier) copper tube.
3. Pipe Covering* — Nom 1-1/2 in. (38 mm) thick hollow cylindrical heavy density (3.5 pcf or 24 kg/m3) glass fiber units jacketed on the outside with an all service jacket. Longitudinal joints sealed with metal fasteners or factory-applied self-sealing lap tape. Transverse joints secured with metal fasteners or with butt tape supplied with the product. The annular space between the insulated pipe and the periphery of the opening shall be min 0 in. (point contact) to max 7/8 in. (22 mm).
   • See Pipe Equipment Covering — Materials— (BRGU) Category in the Building Materials Directory for names of manufacturers. Any pipe covering material meeting the above specifications and bearing the UL Classification Marking with a Flame Spread Index of 25 or less and a Smoke Developed Index of 50 or less may be used.
4. Fill, Void or Cavity Material* — Sealant — Min 5/8 in. (16 mm) thickness of fill material applied within annulus, flush with both surfaces of wall assembly. At point contact location, min 1/2 in. (13 mm) diam bead of fill material applied at insulated metallic pipe/wall interface on both surfaces of wall. L Ratings apply only when FS-One Sealant is used.
   • HILTI CONSTRUCTION CHEMICALS, DIV OF HILTI INC — FS-One Sealant, CP 606 Sealant or CP 601S Sealant



*Bearing the UL Classification Mark

21.12.14 - 0000

W-L-5257: PIPE @ WALL ASSEMBLY N.T.S. **6**

System No. W-J-1215

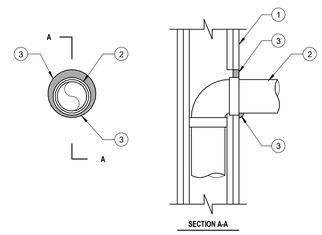
F RATING - 2 Hr
T RATING - 3/4 Hr

1. Wall Assembly — Min 5⅝ in. (143 mm) reinforced lightweight or normal weight (100150 pcf or 1600 2400 kg/m3) concrete. Wall may also be constructed of any UL Classified Concrete Blocks*. Opening in wall to be 2-1/2 in. (64 mm) diam for nominal 2 in. (51 mm) firestop device and 4 1/2 in. (114 mm) diam for nominal 4 in. (102 mm) firestop device. See Concrete Blocks (CAZT) category in the Fire Resistance Directory for names of manufacturers.

2. Through Penetrant — One metallic pipe, conduit or tubing to be installed concentrically within the firestop system. Pipe, conduit or tubing to be rigidly supported on both sides of the wall assembly. The following types and sizes of metallic pipes, conduits and tubes may be used:
   A. Steel Pipe — Nom 3 in. (76 mm) diam (or smaller) Schedule 5 (or heavier) steel pipe.
   B. Iron Pipe — Nom 3 in. (76 mm) diam (or smaller) cast or ductile iron pipe.
   C. Conduit — Nom 3 in. (76 mm) diam (or smaller) rigid steel conduit or steel electrical metallic tubing (EMT).

3. Firestop Device* — Firestop device consists of a corrugated steel tube with an inner plastic housing, intumescent material rings, tightly twisted inner fabric smoke seal, flanges and gasketing material (not shown). Firestop device to be installed in accordance with the accompanying installation instructions. Device slid into wall such that ends project an equal distance from the approximate centerline of the wall assembly. The annular space between the device and the periphery of the opening shall be min 0 in. (point contact). Device provided with flanges that are spun clockwise onto device threads, over gasketing material butting tightly to both sides of wall. As an alternate to gasket material, sealant (Item 4) maybe used.
   • HILTI CONSTRUCTION CHEMICALS, DIV OF HILTI INC — CP 653 2" Speed Sleeve and CP 653 4" Speed Sleeve

4. Fill, Void or Cavity Material* Sealant — As an alternate to gasket material (see Item 3), min ½ in. (13 mm) thickness of fill material applied within the annulus between firestop device and wall, flush with both surfaces of wall. An additional 1/4 in. (6 mm) bead shall be applied around periphery of device on each side of wall prior to securing device flanges.
   • HILTI CONSTRUCTION CHEMICALS, DIV OF HILTI INC — CP 606 or FSONE Sealant or FSONE MAX Intumescent Sealant.



* Indicates such products shall bear the UL or cUL Certification Mark for jurisdictions employing the UL or cUL Certification (such as Canada), respectively.

1. **Wall Assembly —** The 1, 2, 3 or 4 hr fire rated gypsum board/stud wall assembly shall be constructed of the materials and in the manner described within the individual U300, U400, V400 or W400 Series Wall or Partition Designs in the UL Fire Resistance Directory and shall incorporate the following construction features:
   A. **Studs -** Wall framing may consist of either wood studs or steel channel studs. Wood studs to consist of nom 2 by 4 in. (51 by 102 mm) lumber spaced max 16 in. (406 mm) OC. Steel studs to be min 3-1/2 in. (89 mm) wide and spaced max 24 in. (610 mm) OC.
   B. **Gypsum Board* —** Thickness, type, number of layers and fasteners as specified in the individual Wall and Partition Design. See Table for opening sizes.
      - The hourly F and FH Ratings are dependent upon the hourly rating of the wall in which it is installed.

2. **Firestop Device* —** Series 22 EZ Path device modules consist of a 1.4 by 1.4 by 10-1/2 in. (36 by 36 by 267 mm) long galv steel tube with an intumescent material lining. Series 33 EZ Path device modules consist of a 3 by 3 by 10-1/2 in. (76 by 76 by 267 mm) long galv steel tube with an intumescent material lining. Series 44+ EZ Path device modules consist of a 4 by 4-5/8 by 14 in. (102 by 118 by 356 mm) long galv steel tube with an intumescent material lining. Firestop device modules to be installed in accordance with the accompanying installation instructions. Firestop device modules secured in place by means of steel wall plates installed with gasketing material supplied with product. Steel wall plates installed on both sides of wall and secured to each device by means of steel screws provided with device. Firestop device module is to be installed with ends projecting an equal distance beyond each surface of the wall assembly. The annular space between the device and opening shall be min 0 in. (point contact) to max 1/8 in. (3 mm) for Series 22 device, max 1/2 in. (13 mm) for Series 33 device and max 1/4 in. (6 mm) for Series 44 device. The opening size and L Ratings for each device vary according to whether device module is blank (no cables) or loaded (with cables) and which cable type and size is used, as tabulated below:

Device	Max Cable Fill	Cable Type	L-Rating (CFM)		Opening Size Diam or Dimensions, in. (mm)
			Ambient	400° F	
Series 22	0%	-	1.4	1.4	2 (51) or 1-3/4 x 1-3/4 (44 x 44)
Series 22	1-25%	3A	Less Than 1	Less Than 1	2 (51) or 1-3/4 x 1-3/4 (44 x 44)
Series 22	26-50%	3A	Less Than 1	Less Than 1	2 (51) or 1-3/4 x 1-3/4 (44 x 44)
Series 22	51-75%	3A	Less Than 1	Less Than 1	2 (51) or 1-3/4 x 1-3/4 (44 x 44)
Series 22	76-100%	3A	Less Than 1	Less Than 1	2 (51) or 1-3/4 x 1-3/4 (44 x 44)
Series 22	100%	3F	Less Than 1	Less Than 1	2 (51) or 1-3/4 x 1-3/4 (44 x 44)
Series 33	0%	-	Less Than 1	Less Than 1	4 (102) or 3-1/4 x 3-1/4 (82 x 82)
Series 33	100%	3A	4	3	4 (102) or 3-1/4 x 3-1/4 (82 x 82)
Series 33	100%	3F	1.3	Less Than 1	4 (102) or 3-1/4 x 3-1/4 (82 x 82)
Series 33	100%	3G, 3H	7	2	4 (102) or 3-1/4 x 3-1/4 (82 x 82)
Series 33	100%	3I	1.8	1.8	4 (102) or 3-1/4 x 3-1/4 (82 x 82)
Series 44+	0%	-	Less Than 1	Less Than 1	6 (152) or 4-1/8 x 4-3/4 (120 x 120)
Series 44+	1-25%	3A-3I	1.5	1.5	6 (152) or 4-1/8 x 4-3/4 (120 x 120)
Series 44+	26-50%	3A-3I	2.3	2.3	6 (152) or 4-1/8 x 4-3/4 (120 x 120)
Series 44+	51-75%	3A-3I	2.3	2.3	6 (152) or 4-1/8 x 4-3/4 (120 x 120)
Series 44+	76%-100%	3A-3I	2.3	2.3	6 (152) or 4-1/8 x 4-3/4 (120 x 120)

SPECIFIED TECHNOLOGIES INC — EZ PATH Series 22, 33 or 44+ Fire Rated Pathway

- **Firestop Device* — Extension Module —** (Optional, Not Shown) — Module attached to ends of Series 33, Series 44+ firestop device (Item 2) to increase its length to facilitate installation in thicker walls. Each module consists of a galv steel tube with an intumescent material lining. Extension module to be installed in accordance with the accompanying installation instructions. When module is used, firestop device (Item 2) and extension module(s) secured in place by means of steel wall plates installed with gasketing material supplied with product. Steel wall plates installed on both sides of wall and secured to each device or extension module(s) by means of steel set screws provided with wall plates. Firestop device and extension module(s) assembly to be installed with ends projecting an equal distance beyond each surface of the wall assembly.
  SPECIFIED TECHNOLOGIES INC — EZ PATH Series 33 or Series 44+ Extension

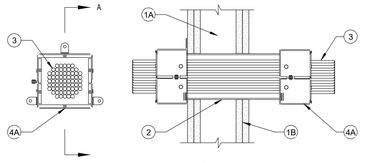
3. **Cables —** Cables may represent a 0 to max 100 percent visual fill within the loading area for the firestop device module. Cables to be rigidly supported on both sides of the wall assembly. Any combination of the following types of cables may be used:
   A. Max 400 pair No. 24 AWG (or smaller) copper conductor telecommunication cable with polyvinyl chloride (PVC) or plenum-rated jacketing and insulation.
   B. Max 750 kcmil single copper conductor power cable with XLPE jacket and insulation
   C. Max 7/C No. 12 AWG copper conductor control cable with PVC or XLPE jacket and insulation.
   D. Max 3/C No. 2/0 AWG metal clad or armored cable with steel or aluminum jacket.
   E. Max 3/C No. 8 AWG NM cable (Romex) with PVC insulation and jacket.
   F. Max fiber optic cable with PVC or polyethylene (PE) jacket and insulation and having a max diam of 5/8 in. (16 mm).
   G. Coaxial cable with fluorinated ethylene or PVC insulation and jacketing having a max diam of 5/8 in. (16 mm).
   H. Optical fiber cable with PVC or polyethylene (PE) jacket and insulation and having a max diam of 5/8 in. (16 mm).
   I. Max RG6/U coaxial cable with fluorinated ethylene, polyethylene (PE), PVC or plenum rated jacketing and insulation.

When Series 22 EZ Path device modules are used and when the hourly rating of the wall assembly is 1 hr, the T, FT and FTH Ratings are 3/4 hr except that for Items 3F, 3G and 3H, the T, FT and FTH Ratings are 1 hr. When the hourly fire rating of the wall assembly is 2 hr or greater, the T, FT and FTH Ratings are 3/4 hr when cables are installed. When no cables are installed within the device module, the T, FT and FTH Ratings are 1 hr in 1 hr walls and 1-1/2 hr for 2, 3 and 4 hr walls. When Item 3A, 3B, 3C, 3D or 3E is used, the maximum F and FH Ratings are 2 hr. When max 200 pair No. 24 AWG telecommunication cable and/or 350 kcmil power cable is used or when Item 3F, 3G, 3H or 3I is used, the maximum F and FH Ratings are 4 hr.

When Series 33 EZ Path device modules are used and when the hourly rating of the wall assembly is 1 hr, the T, FT and FTH Ratings are 3/4 hr. When the hourly fire rating of the wall assembly is greater than 1 hr, the T, FT and FTH Ratings are 3/4 hr when Item 3A, 3B, 3C, 3D or 3E is used. Otherwise the T, FT and FTH Ratings are 1 hr. When Item 3A, 3B, 3C, 3D or 3E is used, the maximum F and FH Ratings are 2 hr. When max 200 pair No. 24 AWG telecommunication cable is used or when Item 3F, 3G, 3H or 3I is used, the maximum F and FH Ratings are 4 hr.

When Series 44 + EZ Path device modules are used and when Item 3A, 3B, 3C, 3D or 3E is used, the max F and FH Ratings are 3 hr and the T, FT and FTH Ratings are 1 hr. When Item 3F or 3G is used, the max F and FH Ratings are 4 hr and the T, FT and FTH Ratings are 1-1/2 hr. When Item 3H or 3I is used, the max F and FH Ratings are 4 hr and the T, FT and FTH Ratings are 2 hr. When device empty, the T, FT and FTH Ratings are 1-1/2 Hr.

+Bearing the UL Listing Mark



* Indicates such products shall bear the UL or cUL Certification Mark for jurisdictions employing the UL or cUL Certification (such as Canada), respectively.

1. 1.**Wall Assembly -** The 1 or 2 hr fire rated gypsum board/stud wall assembly shall be constructed of the materials and in the manner specified in the individual U300, V300, U400, V400 or W400 Series Wall and Partition Designs in the UL Fire Resistance Directory and shall include the following construction features:
   A. **Studs -** Wall framing may consist of either wood studs or steel channel studs. Wood studs to consist of nom 2 by 4 in. (51 by 102 mm) lumber spaced 16 in. (406 mm) OC. Steel studs to be min 3-1/2 in. (89 mm) wide and spaced max 24 in. (610 mm) OC.
   B. **Gypsum Board* -** Thickness, type, number of layers, fastener type and sheet orientation shall be as specified in the individual U300, V300, U400 , V400 or W400 Series Design in the UL Fire Resistance Directory. Max diam of opening is 5-1/2 in. (140 mm) when sleeve (Item 2) extends from wall surface. When sleeve is flush with wall surface, opening sized to outside diameter of sleeve. Max diam of opening is 4 in. (102 mm) when sleeve is not used.
      - The F and FH Ratings of the firestop system are equal to the hourly fire rating of the wall in which it is installed.
2. **Steel Sleeve -** (Optional) - Nom 1-1/2 in. (38 mm), 2 in. (51 mm), 3 in. (76 mm) or 4 in. (102 mm) diam steel electrical metallic tubing (EMT), steel conduit, Schedule 5 (or heavier) steel pipe sleeve or min 0.016 in. thick (0.41 mm, No. 28 ga) galv sheet steel sleeve installed flush with wall surfaces. The annular space between the steel sleeve and periphery of opening shall be min 0 in. (continuous point contact) to max 1 in. (25 mm). Sheet steel sleeve to be installed in continuous point contact only. When Schedule 5 steel pipe, steel conduit or EMT is used, sleeve may be installed flush with or extend up to 3 in. (76 mm) beyond one or both wall surfaces. When sleeve projects from wall suface, it may be provided with a metallic or nonmetallic conduit bushing. Steel sleeve may be installed at an angle not greater than 45 degrees from perpendicular. Schedule 5 steel pipe, steel conduit or EMT sleeves may extend continuously beyond one wall surface. Sleeve to be rigidly supported when extending from the wall surfaces.
   - When sleeve is flush with wall surface in 2 hr rated assemblies, the T, FT, and FTH Ratings are 1/2 Hr. Otherwise, the T, FT, and FTH Ratings are 0 Hr.
3. **Cables -** Cables may represent a min 50 to max 100 percent visual fill within the loading area for the sleeve, a nom 2 in. (51 mm) diam opening or a nom 4 in. (102 mm) diam opening. Cables to be rigidly supported on both sides of the wall assembly. Any combination of the following types and sizes of cables may be used:
   A. Max 400 pair No. 24 AWG (or smaller) copper conductor telecommunication cable with polyvinyl chloride (PVC) or plenum-rated jacketing and insulation.
   B. Max 750 kcmil single copper conductor power cable with XLPE jacket and insulation.
   C. Max 7/C No. 12 AWG copper conductor control cable with PVC or XLPE jacket and insulation.
   D. Max 3/C No. 2/0 AWG metal clad or armored cable with steel or aluminum jacket.
   E. Max 3/C No. 8 AWG NM cable (Romex) with PVC insulation and jacket.
   F. Max four pair No. 22 AWG (or smaller) copper conductor data cable with PVC or plenum rated jacketing and insulation.
   G. Max four pair No. 22 AWG (or smaller) Cat 5, Cat 5E, Cat 6 or Cat 6A cable with PVC or plenum rated jacketing and insulation.
   H. Coaxial cable with fluorinated ethylene or PVC insulation and jacketing having a max diam of 5/8 in. (16 mm).
   I. Optical fiber cable with PVC or polyethylene (PE) jacket and insulation and having a max diam of 5/8 in. (16 mm).
   J. Max RG6/U coaxial cable with fluorinated ethylene, polyethylene (PE), PVC or plenum rated jacketing and insulation.
4. **Firestop System* -** The firestop system shall consist of the following:
   A. **Firestop Device -** A firestop device consisting of a rectangular galv steel housing with intumescent curtain sized to the specific diam of the sleeve or opening. Firestop device installed in accordance with the accompanying installation instructions on each side of the wall. Firestop device secured to end of sleeve when sleeve extends from wall surface. When sleeve extends continuously beyond one wall surface, firestop device shall be installed only on the side of the wall with a sleeve termination. When sleeve is flush with wall surface or when sleeve is not used, firestop device secured to assembly using provided anchor tabs by means of 1/8 in. (3.2 mm) diam by 1-3/4 in. (44 mm) long steel molly bolts or toggle bolts in conjunction with min 1-1/4 in. (32 mm) diam steel fender washers.
   B. **Fill, Void or Cavity Material* - Sealant or Putty -** (Optional, Not Shown) Any existing XHHW sealant or putty either partially or fully installed into one or both ends of the steel sleeve. When annular space is present between the sleeve and the periphery of the opening, a min 5/8 in. (16 mm) thickness of any existing XHHW sealant or putty shall be applied within the annulus, flush with both surfaces of wall.
   C. **Fill, Void or Cavity Material* - Sealant or Putty -** (Optional, Not Shown) - Min 1/2 in. (13 mm) thickness of sealant or putty applied within annulus, flush with both ends of sleeve. When annular space is present between the sleeve and the periphery of the opening, a min 1/2 in. (13 mm) thickness of sealant or putty shall be applied within the annulus, flush with both surfaces of the wall.
      - **Firestop Device* -** (Not Shown) - When nom 1-1/2 in. (38 mm) or nom 3 in. (76 mm) diam steel sleeve is used, an appropriately sized steel plate adaptor kit shall be used in conjunction with Item 4A. The steel plate shall be installed in accordance with the accompanying installation instructions.

T RATING - 0 Hr

CLASSIFIED C UL US
Classified by Underwriters Laboratories, Inc.
to UL 1479 and CAN/ULC-S115

1. Wall Assembly — Min 6 in. (152 mm) thick lightweight or normal weight (100-150 pcf or 1600-2400 kg/m3) concrete. Wall may also be constructed of any UL Classified Concrete Blocks*. Max diam of opening is 4 in. (102 mm). See Concrete Blocks (CAZT) category in the Fire Resistance Directory for names of manufacturers.
2. Cables — Aggregate cross-sectional area of cable in opening to be max 45 percent of the cross-sectional area of the opening. The annular space between the cable bundle and the periphery of the opening to be min 0 in. (point contact) to max 7/8 in. (22 mm) Cables to be tightly bundled and rigidly supported on both sides of the wall assembly. Any combination of the following types and sizes of copper conductor cables may be used.
   A. Max 7/C No. 12 AWG with polyvinyl chloride (PVC) insulation and jacket.
   B. Max 25 pair No. 24 AWG telephone cable with PVC insulation and jacket.
   C. Max 4 pr No. 22 AWG Cat 5 or Cat 6 computer cables.
   D. Type RG/U coaxial cable with polyethylene (PE) insulation and PVC jacket having a max outside diameter of ½ in. (13 mm).
   E. Max RG 6/U coaxial cable with fluorinated ethylene insulation and jacketing.
   F. Multiple fiber optical communication cable jacketed with PVC and having a max OD of 5/8 in. (16 mm).
   G. Max three copper conductor No. 8 AWG Metal-Clad Cable+.
   H. Max 3/C (with ground) (or smaller) No. 8 AWG copper conductor cable with PVC insulation and jacketing.
   I. Through Penetrating Product* — Any cables, Metal-Clad Cable+ or Armored Cable+ currently Classified under the Through Penetrating Products category.
3. Fill, Void or Cavity Material*– Sealant — Fill material applied within the annulus, flush with both surfaces of wall. A min 5/8 in. (16 mm) thickness of sealant is required for 2 hr F Rating. A min 1 in. (25 mm) thickness of sealant is required for the 3 hr F Rating. An additional 1/2 in. (13 mm) diam bead of fill material shall be applied at the point contact location of cable bundle/concrete interface on both surfaces of wall.

HILTI CONSTRUCTION CHEMICALS, DIV OF HILTI INC — CP606, FS-One Sealant or FS-ONE MAX Intumescent Sealant

1. Wall Assembly — The 1 or 2 hr fire rated gypsum wallboard/stud wall assembly shall be constructed of the materials and in the manner specified in the individual U300 or U400 Series Wall and Partition Designs in the UL Fire Resistance Directory and shall include the following construction features:

   A. Studs — Wall framing may consist of either wood studs or steel channel studs. Wood studs to consist of nom 2 by 4 in. lumber spaced 16 in. (406 mm) OC. Steel studs to be min 3-1/2 in. (89 mm) wide and spaced max 24 in. (610 mm) OC.

   B. Gypsum Board* — 5/8 in. thick, 4 ft wide with square or tapered edges. The gypsum wallboard type, thickness, number of layers, fastener type and sheet orientation shall be as specified in the individual U300 or U400 Series Design in the UL Fire Resistance Directory. Max diam of opening is 4-1/2 in.

The hourly F rating of the firestop system is equal to the hourly fire rating of the wall assembly in which it is installed.

2. Cables — Aggregate cross-sectional area of cables in steel sleeve to be 45 percent of the aggregate cross-sectional area of the sleeve.
Cables to be rigidly supported on both sides of wall assembly. Any combination of the following types and sizes of copper conductor cable may be used:

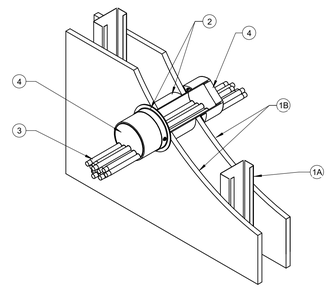
   A. Max 300 kcmil single conductor Type MTW, THHN, THWN or AWM power cables; cross-linked polyethylene (XLPE) insulation.
   B. Max 4 pair No. 24 AWG telephone cable intended for plenum applications.
   C. Max 3/C No. 12 AWG with polyvinyl chloride (PVC) insulation and jacket.

3. Firestop System — The firestop system shall consist of the following:
   A. Fill, Void or Cavity Material* — Sealant — (not shown) — Min 1/2 in. diam of sealant shall be applied around the perimeter of the firestop device on each side of the wall.
   HILTI CONSTRUCTION CHEMICALS, DIV OF
   HILTI INC — FS-ONE Sealant
   B. Firestop Device* — One of the following firestop devices may be used:

      1. Smooth steel sleeve device incorporating flat washers secured by sliding compression couplers. Device shall be installed in accordance with the accompanying installation instructions. Device provided in nom 1, 2 and 4 in. sizes. Max diam of opening in wall for 1, 2 and 4 in. sizes are 1-1/8, 2-1/4 and 4-1/2 in., respectively.
      UNIQUE FIRE STOP PRODUCTS INC — Smooth Sleeve
      2. Threaded steel sleeve device incorporating flat washers secured by threaded couplings. Device shall be installed in accordance with the accompanying installation instructions. Device provided in nom 1, 2 and 4 in. sizes. Max diam of opening in wall for 1, 2 and 4 in. size devices are 1-5/16, 2-3/8 and 4-1/2 in., respectively.
      UNIQUE FIRE STOP PRODUCTS INC — Threaded Sleeve
      3. Threaded steel sleeve halves incorporating split nuts and split washers sized to fit the specific diam of the opening. Device shall be installed around cables in accordance with the accompanying installation instructions. Device provided in nom 1, 2 and 4 in. sizes. Max diam of opening in wall for 1, 2 and 4 in size devices are 1-1/4, 2-7/16 and 4-1/2 respectively.
      UNIQUE FIRE STOP PRODUCTS INC — Split Sleeve

Firestop Device	L Rating, CFM/sq ft (CFM/firestop device)	
	Ambient	400F
Smooth Sleeve	22 (2)	18 (2)
Threaded Sleeve	22 (2)	18 (2)
Split Sleeve	54 (5)	47 (4)

The L Rating of the firestop system is dependent upon the type of firestop device as tabulated below:



C. Packing Material - (Optional) — Min 1 in. thickness of min 4.0 pcf mineral wool batt insulation firmly packed into each end of firestop device as a permanent form. Packing material to be recessed from each end of firestop device as required to accommodate the required thickness of fill material.
D. Fill, Void or Cavity Material* — Putty — Min 5/8 in. thickness of fill material applied within the firestop device, flush with both ends.

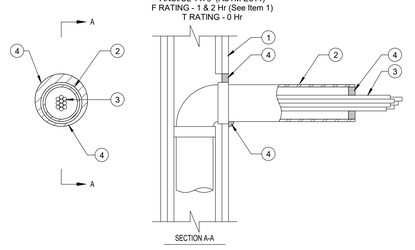
1. Wall Assembly — The 1 or 2 hr fire rated gypsum board/stud wall assembly shall be constructed of the materials and in the manner specified in the individual U300, U400 or V400 Series Wall and Partition Designs in the UL Fire Resistance Directory and shall include the following construction features:
   A. Studs — Wall framing may consist of either wood studs or steel channel studs. Wood studs to consist of nom 2 by 4 in. (51 by 102 mm) lumber spaced 16 in. (406 mm) OC. Steel studs to be min 3-1/2 in. (89 mm) wide and spaced max 24 in. (610 mm) OC.
   B. Gypsum Board* — 5/8 in. (16 mm) thick, 4 ft (1.2 m) wide with square or tapered edges. The gypsum board type, thickness, number of layers, fastener type and sheet orientation shall be as specified in the individual U300, U400 or V400 Series Design in the UL Fire Resistance Directory. Max diam of opening is 4-1/2 in. (114 mm).
      - The hourly F rating of the firestop system is equal to the hourly fire rating of the wall assembly in which it is installed.
2. Firestop Device* — Steel sleeve device centered within opening and installed in accordance with the accompanying installation instructions. Steel sleeve device secured in place by means of steel escutcheon plates installed with gasketing material supplied with product. Steel escutcheon plates installed on both sides of wall and secured to device by means of steel screws provided with device. Steel sleeve device provided in nom 1, 2 and 4 in. (25, 51 and 102 mm) sizes. The min and max opening sizes for each sleeve device are shown in the table below:

DEVICE SIZE	MIN OPENING SIZE	MAX OPENING SIZE
1 in. (25mm)	1.12 in. (28mm)	1.25 in. (32mm)
2 in. (51mm)	2.38 in. (60mm)	2.50 in. (64mm)
4 in. (102mm)	4.50 in. (114mm)	4.50 in. (114mm)

SPECIFIED TECHNOLOGIES INC — FS100, FS200, FS201, FS400 and FS401 SpecSeal Ready-Sleeves

3. Cables — Aggregate cross-sectional area of cables in steel sleeve to be max 33 percent of the aggregate cross-sectional area of the sleeve. Cables to be rigidly supported on both sides of wall assembly. Any combination of the following types and sizes of copper conductor cable may be used:
   A. Max 2/0 pair No. AWG (or smaller) copper conductor cable with polyvinyl chloride (PVC) jacketing and insulation.
   B. Max 3/C No. 2/0 AWG (or smaller) aluminum or copper conductor service entrance cable with PVC insulation and jacket.
   C. Max 3/C No. 8 AWG (or smaller) nonmetallic sheathed (Romex) cable with copper conductors, PVC insulation and jacket.
   D. Max 7/C No. 2/0 AWG (or smaller) multiconductor power and control cables with XLPE or PVC insulation and XLPE or PVC jacket.
   E. Max RG/U (or smaller) coaxial cable with fluorinated ethylene insulation and jacketing.
   F. Max 6/2 5/48 fiber optic cable with PVC insulation and jacketing.
   G. Max 4 pair No. 24 AWG (or smaller) copper conductor data cable with PVC insulation and jacket.
   H. Max 4/C No. 2/0 aluminum or copper conductor aluminum or steel Metal-Clad® or Armored-Clad® cable.
      - When Item 3G is used, the L Rating is 11.9 CFM/device at ambient and 5.2 CFM/device at 400F.
4. Fill, Void or Cavity Material* - Putty — Fill material supplied with firestop device (Item 2) applied to 1 in. (25 mm) thickness flush with each end of steel sleeve device. At point contact location, min 3/8 in. (9 mm) diam bead of fill material applied at grouped cable/steel sleeve interface on each side of wall.
   - SPECIFIED TECHNOLOGIES INC — SpecSeal Putty



* Indicates such products shall bear the UL or cUL Certification Mark for jurisdictions employing the UL or cUL Certification (such as Canada), respectively.

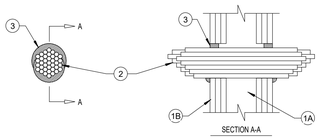
W-L-3376: CABLES @ WALL ASSEMBLY 1 1/2" = 1'-0" **3**

System No. W-L-3320

ANSI/UL 1479 (ASTM E814)
F RATING - 1 & 2 Hr (See Item 1)
T RATING - 0 Hr

1. Wall Assembly — The 1 or 2 hr fire-rated gypsum board/stud wall assembly shall be constructed of the materials and in the manner specified in the individual U300, U400 or V400 Series Wall and Partition Designs in the UL Fire Resistance Directory and shall include the following construction features:
   A. Studs — Wall framing may consist of either wood studs or steel channel studs. Wood studs to consist of nom 2 by 4 in. (51 by 102 mm) lumber spaced 16 in. (406 mm) OC. Steel studs to be min 3-1/2 in. (89 mm) wide and spaced max 24 in. (610 mm) OC.
   B. Gypsum Board* — 5/8 in. (16 mm) thick, 4 ft (1219 cm) wide with square or tapered edges. The gypsum wallboard type, thickness, number of layers, fastener type and sheet orientation shall be as specified in the individual Wall and Partition Design. Opening may be round, rectangular or irregular with a max diam or dimension of 1 in. (25 mm).
      - The hourly F, FT, FH and FTH Ratings of the firestop system are equal to the hourly fire rating of the wall assembly in which it is installed.
2. Cables — Single or tight bundle of cables penetrating wall assembly on one side of wall. Aggregate cross-sectional area of cables in opening to have a visual fill of min 0% to max 100%. The annular space between the cable bundle and the periphery of the opening to be min 0 in. (point contact). Cables to be rigidly supported on penetrating side of and within the wall assembly. Any combination of the following types and sizes of cables may be used:
   A. Max 3/C No. 8 AWG NM copper conductor cable (Romex) with PVC insulation and jacket.
   B. Max 4 pr No. 22 AWG (or smaller) Cat 5 or Cat 6 computer cables with PVC or plenum rated insulation and jacketing.
   C. Type RG/U coaxial cable with fluorinated ethylene or PVC insulation and jacketing having a max outside diameter of 1/2 in. (13 mm).
   D. Max 24 fiber optic cable with polyvinyl chloride (PVC) or polyethylene (PE) jacket and insulation.
   E. Max 25 pair No. 24 AWG (or smaller) copper conductor telecommunication cable with polyvinyl chloride (PVC) or plenum-rated jacketing and insulation.
   F. Through Penetrating Product* — Max two copper conductor No. 18 AWG (or smaller) Power or Non-Power Limited Fire Alarm Cable with or without a jacket under a metal armor.
      - AFC CABLE SYSTEMS INC
   G. Maximum 3/C No. 10 AWG copper conductor metal-clad cable.
3. Fill, Void or Cavity Material* — Nom 60 mm diam by 3 mm thick putty disc with one seam at radius. Paper-backer of disc to be removed and disc firmly pressed around the cable/cable bundle lapping nom 5 mm onto cables to completely cover opening and firmly pressed to lap onto the wall around periphery of opening. Disc seam to be firmly pressed and sealed tight, Disc to be installed at penetrated side of wall.
   - HILTI CONSTRUCTION CHEMICALS, DIV OF HILTI INC — CFS-D T Firestop Cable Disc



* Indicates such products shall bear the UL or cUL Certification Mark for jurisdictions employing the UL or cUL Certification (such as Canada), respectively.

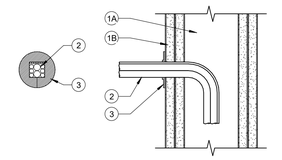
ANSI/UL 1479 (ASTM E814)
F RATING - 1, 2, and 3 Hr (See Item 1)
T RATING - 0 Hr

1. 1. Wall Assembly — The 1, 2 or 3 fire-rated gypsum wallboard/stud wall assembly shall be constructed of the materials and in the manner specified in the individual U300, U400, V400 or W400 Series Wall and Partition Designs in the UL Fire Resistance Directory and shall include the following construction features:
   A. Studs — Wall framing may consist of either wood studs or steel channel studs. Wood studs to consist of nom 2 in. (51 mm) by 4 in. (102 mm) lumber spaced 16 in. (406 mm) OC. Steel studs to be min 3-1/2 in. (89 mm) wide and spaced max 24 in. (610 mm) OC.
   B. Gypsum Board* — Nom 5/8 in. (16 mm) thick gypsum board, with square or tapered edges. The gypsum board type, thickness, number of layers, fastener type and sheet orientation shall be as specified in the individual Wall and Partition Design in the UL Fire Resistance Directory. Max diam of opening is 4 in. (102 mm).
      - The F Rating of the firestop system is equal to the fire rating of the wall assembly.
2. Cables — Aggregate cross-sectional area of cable in opening to be max 45 percent of the cross-sectional area of the opening. The annular space between the cable bundle and the periphery of the opening to be min 0 in. (point contact) to max 7/8 in. (22 mm) Cables to be tightly bundled and rigidly supported on both sides of the wall assembly. Any combination of the following types and sizes of copper conductor cables may be used:
   A. Max 7/C No. 12 AWG with polyvinyl chloride (PVC) insulation and jacket.
   B. Max 25 pair No. 24 AWG telephone cable with PVC insulation and jacket.
   C. Max 4 pr No. 22 AWG Cat 5 or Cat 6 computer cables.
   D. Type RG/U coaxial cable with polyethylene (PE) insulation and PVC jacket having a max outside diameter of ½ in. (13 mm).
   E. Max RG 6/U coaxial cable with fluorinated ethylene insulation and jacketing.
   F. Multiple fiber optical communication cable jacketed with PVC and having a max OD of 5/8 in. (16 mm).
   G. Max three copper conductor No. 8 AWG Metal-Clad Cable+.
   H. Max 3/C (with ground) (or smaller) No. 8 AWG copper conductor cable with PVC insulation and jacketing.
   I. Through Penetrating Product* — Any cables, Metal-Clad Cable+ or Armored Cable+ currently Classified under the Through Penetrating Products category.
3. Fill, Void or Cavity Material*— Sealant — Fill material applied within the annulus, flush with both surfaces of wall. A min 5/8 in. (16 mm) thickness of sealant is required for the 1 or 2 hr F Rating. A min 1 in. (25 mm) thickness of sealant is required for the 3 hr F Rating. An additional 1/2 in. (13 mm) diam bead of fill material shall be applied at the point contact location of cable bundle/concrete interface on both surfaces of wall.



HILTI CONSTRUCTION CHEMICALS, DIV OF HILTI INC — CP606 or FS-One Sealant or FS-ONE MAX Intumescent Sealant
* Indicates such products shall bear the UL or cUL Certification Mark for jurisdictions employing the UL or cUL Certification (such as Canada), respectively.

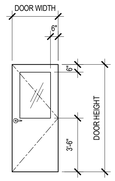
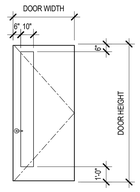
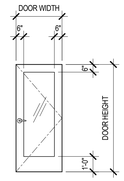
DOOR TYPE '1'



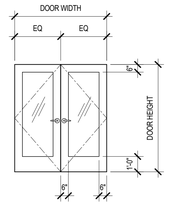
DOOR TYPE '2'



DOOR TYPE '3'



DOOR TYPE '4'



DOOR TYPE '5'

DOOR TYPE '6'

DOOR TYPE '7'

DOOR GENERAL NOTES

A. RATED DOORS SHALL BE POSITIVE LATCHING. RATED DOORS SHALL HAVE A MAXIMUM GAP OF 1/8" ON THE SIDES AND TOP, AND 3/8" ON THE BOTTOM. RATED ASSEMBLIES SHALL BE PROVIDED WITH APPROVED GASKET MATERIAL INSTALLED TO PREVENT A SEAL WHERE THE DOOR MEETS THE STOPS ON BOTH SIDES AND THE TOP. MANUFACTURERS INSTALLATION INSTRUCTIONS SHALL BE AVAILABLE ON THE JOB SITE. HARDWARE SHALL BE FIRE RATED.
B. DOOR OPENING FORCE - EFFORT OF OPERATION (CBC 11B-404.2.9)
   * 5 POUNDS FOR INTERIOR & EXTERIOR DOORS
   * 15 POUNDS FOR FIRE DOORS.
C. ALL DOOR CLOSERS SHALL BE MOUNTED ON ROOM SIDE OF DOORS, CONCEALED FROM CORRIDORS & COMMON AREAS. THE SWEEP PERIOD SHALL BE 5 SECONDS MINIMUM FROM 90° OPEN TO 12° FROM THE LATCH. CBC 11B-404.2.8.1
D. LATCHING AND LOCKING DOORS THAT ARE HAND ACTIVATED SHALL BE OPERABLE W A SINGLE EFFORT BY LEVER TYPE HARDWARE. BY PANIC BARS, PUSH-PULL ACTIVATING BARS,DESIGNED TO PROVIDE PASSAGE WITHOUT REQUIRING THE ABILITY TO GRASP THE OPENING HARDWARE.
E. EGRESS DOORS SHALL BE READILY OPERABLE FROM THE EGRESS SIDE WITHOUT THE USE OF A KEY OR SPECIAL KNOWLEDGE OR EFFORT. (CBC 11B-404.2.7)
F. 11B-404.2.7 DOOR AND GATE HARDWARE. HANDLES, PULLS, LATCHES, LOCKS, AND OTHER OPERABLE PARTS ON DOORS AND GATES SHALL COMPLY WITH SECTION 11B-309.4. OPERABLE PARTS OF SUCH HARDWARE SHALL BE 34 INCHES (864 MM) MINIMUM AND 44 INCHES (1118 MM) MAXIMUM ABOVE THE FINISH FLOOR OR GROUND. WHERE SLIDING DOORS ARE IN THE FULLY OPEN POSITION, OPERATING HARDWARE SHALL BE EXPOSED AND USABLE FROM BOTH SIDES.
G. THE UNLATCHING OF ANY DOOR OR LEAF SHALL NOT REQUIRE MORE THAN ONE OPERATION. (CBC 1010.1.9.5).
H. SPECIFIC FINISHES SHALL BE PER THE INTERIOR DESIGNER.
I. DOOR STOPS SHALL BE PROVIDED ON ALL DOORS. DOOR STOPS ON NON-RATED DOORS SHALL BE HINGE STOPS (HAGER 301D UNO. DOOR STOPS ON RATED DOORS SHALL BE INTEGRAL WITH THE CLOSING DEVICE.
J. SIGN ADJACENT TO MAIN EXIT DOOR SHALL STATE "DOORS TO REMAIN UNLOCKED DURING BUSINESS HOURS" WITH 1" HIGH CONTRASTING LETTERS.
K. PROVIDE A SIGN ON OR ADJACENT TO EACH BUILDING ENTRANCE OF THE INTERNATIONAL SIGN OF ACCESSIBILITY AT +60" AFF. MAX.
L. ALL KEYED LOCKS ARE TO BE PER FACILITY STANDARDS.
M. ALL NON-RATED DOORS SHALL HAVE DOOR SILENCERS ON THE DOOR FRAME.
N. ALL DOORS SHALL HAVE STAINLESS STEEL EDGE GUARDS, BEVELED FLUSH WITH LAMINATE 1/2" MAXIMUM RETURN. MOUNT ON BOTH SIDES OF DOOR.
O. DOOR ACCESSORIES
   -PROVIDE KICK PLATES WHERE SPECIFIED
   -PROVIDE LOUVERS WHERE SPECIFIED
P. DOORS SHALL BE 1-3/4" THICK UNLESS NOTED OTHERWISE.
Q. THE SYMBOL (P) FOLLOWING THE 'DOOR TYPE' DESIGNATION IN THE DOOR SCHEDULE INDICATES PAIR OF DOORS. BOTH LEAVES ARE THE SAME SIZE, U.N.O.
R. ALL DOORS IN BUILDINGS, INCLUDING, BUT NOT LIMITED TO DOORS OF TOILETS AND STORAGE ROOMS, SHALL CONFORM WITH THE REQUIREMENTS OF THE LATEST EDITION OF THE CALIFORNIA BUILDING CODE.
   a. EXIT DOOR SHALL BE OPERABLE FROM THE INSIDE WITHOUT THE USE OF A KEY OR ANY SPECIAL KNOWLEDGE OR EFFORT.
   b. HAND ACTIVATED DOOR OPENING HARDWARE SHALL BE CENTERED BETWEEN 34" AND 44" ABOVE FINISH FLOOR.
   c. DEAD BOLTS ARE NOT PERMITTED UNLESS OPERABLE WITH A SINGLE EFFORT LEVER TYPE HARDWARE.
   d. ALL ROOMS SERVING AN OCCUPANCY LOAD OF 50 OR GREATER AND DOORS LOCATED ON THE DISCHARGE OF EXIT CORRIDORS ARE REQUIRED TO BE PROVIDED WITH PANIC HARDWARE (CBC 1008.1.10).
   e. ALL FIRE DOOR LABELS SHALL COMPLY WITH CBC 716.2.9.
S. FIRE ASSEMBLIES REQUIRED TO HAVE A ONE-HOUR FIRE-PROTECTION RATING SHALL BE EITHER AUTOMATIC OR SELF-CLOSING FIRE ASSEMBLIES TO BE ACTIVATED BY AN INCREASE IN TEMPERATURE SHALL HAVE HEAT-ACTIVATING DEVICES INSTALLED ON EACH SIDE OF THE WALL AT THE CEILING HEIGHT WHERE THE CEILING IS MORE THAN 3 FEET ABOVE THE TOP OF THE OPENING OR BY A SINGLE FUSIBLE LINK IN THE OPENING INCORPORATED IN THE CLOSING DEVICE.
T. ALL FIRE-RESISTIVE ASSEMBLIES FOR PROTECTED OPENING SHOULD COMPLY WITH SECTION 716 CBC.
U. EXTERIOR: STEELCRAFT "L" SERIES 16 GA HONEYCOMB CORE OR "S" OR "A" SERIES 16 GA TUBULAR FOR FULL GLASS, GALVANIZED, WITH GALVANIZED 14 GA FRAMES. USE MINIMUM 6" WIDE STILE ON ALL STILE & RAIL TYPE DOORS TO ACCOMMODATE EXIT DEVICES.
V. INTERIOR STEEL DOORS: STEELCRAFT "L" SERIES HONEYCOMB CORE, OR "S" OR "A" SERIES FOR FULL GLASS, 18 GA WITH 16 GA FRAMES. USE MINIMUM 6" WIDE STILE ON ALL STILE & RAIL TYPE DOORS TO ACCOMMODATE EXIT DEVICES.
W. ALL INTERIOR HOLLOW METAL DOOR AND FRAMES TO HAVE JAMB AND HEAD GASKETING. PEMKO 319 OR EQUAL.
X. PROVIDE ACCESS CONTROL WIRING AND DOOR SWITCH WIRING PER HARDWARE SCHEDULE.
Y. ALL GLAZING SHALL BE 1/4" CLEAR GLASS UNLESS DOOR IS FIRE-RATED. THEN SAFETY GLAZING HALL BE AT CURRENT FEDERAL STANDARDS WHERE GLAZING OCCURS IN RATED DOOR ASSEMBLY. (WIRE GLASS IS NOT ACCEPTABLE)

DOOR GENERAL NOTES

A. FIELD VERIFY ALL DIMENSIONS PRIOR TO FABRICATION.
B. ALL DOORS AND HARDWARE SHALL BE INSTALLED IN STRICT COMPLIANCE WITH CALIFORNIA TITLE 24 ACCESSIBLE CODE OF REGULATIONS (ACCESS CODE) AND THE FEDERAL AMERICANS WITH DISABILITIES ACT GUIDELINES (2010 ADA STANDARDS).
C. EXIT DOORS SHALL BE ABLE TO BE OPENED FROM THE INSIDE WITHOUT THE USE OF A KEY OR ANY SPECIAL KNOWLEDGE OR EFFORT.
D. THE MAXIMUM EFFORT TO OPERATE DOORS SHALL NOT EXCEED 5 LBS. FOR EXTERIOR AND INTERIOR DOORS, EXCEPT FIRE DOORS, WHICH MAY HAVE A MAXIMUM EFFORT OF 15 LBS. OF FORCE APPLIED AT RIGHT ANGLES TO THE DOOR.
E. WHEN ADDITIONAL DOORS ARE PROVIDED FOR EGRESS PURPOSES, THEY SHALL COMPLY WITH ALL PROVISIONS OF CBC 1008.
F. SWINGING DOORS AND GATE SURFACES WITHIN 10 INCHES OF THE FINISH FLOOR OR GROUND MEASURED VERTICALLY SHALL HAVE A SMOOTH SURFACE ON THE PUSH SIDE EXTENDING THE FULL WIDTH OF THE DOOR OR GATE PER PER CBC SECTION 11B-404.2.10.
G. RATED DOORS MAY BE UNDERCUT A MAXIMUM OF 3/4" PER NFPA80 4.8.4.1, BUT SHALL BE 1/4" U.N.O.
H. FIRE DOORS AND FRAMES SHALL BE LABELED IN ACCORDANCE WITH CBC SECTION 716.5.7.1 AND 716.5.7.4.
I. SMOKE AND DRAFT CONTROL DOORS SHALL HAVE AN APPROVED "S" RATING PER SECTION 716.5.7.3.
J. ALL HARDWARE SHALL BE LEVER TYPE OR PANIC TYPE MOUNTED AT HEIGHT INDICATED IN THE SPECIFICATIONS AND SHALL BE MOUNTED NOT LESS THAN 34" NOR HIGHER THAN 44" ABOVE FINISH FLOOR.
K. DOOR CLOSERS SHALL BE ADJUSTED SUCH THAT FROM AN OPEN POSITION OF 70 DEGREES THE DOOR WILL TAKE A MINIMUM OF THREE SECONDS TO MOVE 3° FROM THE LATCH MEASURED FROM LEADING EDGE OF THE DOOR. FROM AN OPEN POSITION OF 90 DEGREES THE DOOR WILL TAKE A MINIMUM OF FIVE SECONDS TO MOVE 12° FROM THE LATCH MEASURED FROM LEADING EDGE OF THE DOOR.
L. OPERATION OF ELECTRIC EXIT HARDWARE (ELECTRIC PANIC DEVICES) SHALL UNLOCK THE DOOR TO PROVIDE EGRESS.
M. LOSS OF POWER TO ELECTRIC EXIT HARDWARE (ELECTRIC PANIC DEVICES) SHALL AUTOMATICALLY UNLOCK THE DOOR (FAIL SAFE) TO PROVIDE EGRESS.
N. PROVIDE SAFETY GLAZING IN ACCORDANCE WITH CHAPTER 26 OF THE CALIFORNIA BUILDING CODE AND AS HEREIN IDENTIFIED.
O. VISION LIGHTS WITHIN DOORS SHALL BE LOCATED SUCH THAT THE BOTTOM OF THE GLASS DOES NOT EXCEED 43 INCHES ABOVE THE FINISH FLOOR.
P. ALL OVERALL WINDOW DIMENSIONS SHOWN ARE MEASURED TO ROUGH OPENING, TYPICAL.
Q. ALLOW FOR AND PROVIDE SHIM SPACE AT ALL STOREFRONT AND CURTAIN WALL WINDOW FRAMES, REFER TO DETAILS.
R. REFER TO WINDOW DETAILS FOR ROUGH OPENING REFERENCE POINTS.
S. FOR GENERAL EXTERIOR WINDOW AND DOOR FLASHING NOTES, REFER TO.----

LEGEND - DOOR MATERIALS

DOOR CONSTRUCTION AND MATERIAL:-
HM - HOLLOW METAL

KEYNOTES

SHEET NOTES A-811

1 DOOR OPENING PER DOOR SCHEDULE
2 EMERGENCY ESCAPE & RESCUE OPENINGS SHALL COMPLY W/CBC 1031.3

WINDOW GENERAL NOTES

A. FIELD VERIFY ALL DIMENSIONS PRIOR TO FABRICATION.
B. ALL OVERALL WINDOW DIMENSIONS SHOWN ARE MEASURED TO ROUGH OPENING, TYPICAL.
C. PROVIDE SAFETY GLAZING IN ACCORDANCE WITH CALIFORNIA BUILDING CODE AND AS HEREIN LISTED.
D. ALLOW FOR AND PROVIDE SHIM SPACE AT ALL STOREFRONT AND CURTAIN WALL WINDOW FRAMES, REFER TO DETAILS.
E. REFER TO WINDOW DETAILS FOR ROUGH OPENING REFERENCE POINTS.
F. FOR WINDOW DETAILS REFER TO SHEET....
G. GLAZING IN DOORS, GLAZING WITHIN 18" OF FLOOR, OR GLAZING WITHIN 24" OF A DOOR AND LESS THAN 60" ABOVE WALKING SURFACE SHALL BE TEMPERED SAFETY GLAZING.

GLAZING GENERAL NOTES

A. EXTERIOR WINDOWS, SKYLIGHTS AND EXTERIOR GLAZED DOOR ASSEMBLIES SHALL BE CONSTRUCTED OF MULTI-PANED GLAZING WITH A MINIMUM OF ONE TEMPERED PANE MEETING THE REQUIREMENTS OF SECTION R308 SAFETY GLAZING.
B. EMERGENCY ESCAPE & RESCUE OPENINGS SHALL BE PER CBC 1031.3
   a. MINIMUM SIZE PER CBC 1031.3.1
      - EMERGENCY ESCAPE AND RESCUE OPENINGS SHALL HAVE A MINIMUM NET CLEAR OPENING OF 5.7 SF
      - EXCEPTION: MINIMUM NET CLEAR OPENING FOR GRADEFLOOR EMERGENCY ESCAPE AND RESCUE OPENINGS = 5 SF MIN
   b. MINIMUM DIMENSIONS PER CBC 1031.3.2
      - MINIMUM NET CLEAR OPENING HEIGHT = 24"
      - MINIMUM NET CLEAR OPENING WIDTH = 20"
   c. MAXIMUM HEIGHT FROM FLOOR PER CBC 1031.3.3
      - EMERGENCY ESCAPE OPENINGS SHALL HAVE BOTTOM OF CLEAR OPENING 44" MAXIMUM FROM THE FLOOR

LEGEND - GLAZING

GLAZING TYPES:
1" LOW-E: TYPICAL AT EXTERIOR WINDOWS & DOORS, U.N.O.
1/4" CLEAR: TYPICAL AT INTERIOR WINDOWS & DOORS, U.N.O.

BID SET (PRELIMINARY)

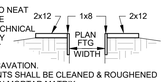
GENERAL NOTES

APPLICABLE TO ALL DRAWINGS UNLESS NOTED OR SHOWN OTHERWISE

GENERAL NOTES
1000N001



1. INTERPRETATION OF DRAWINGS & SPECIFICATIONS
   A. WHERE SPECIFICATIONS HAVE BEEN PREPARED FOR THIS PROJECT, THEY ARE ARRANGED IN SEVERAL SECTIONS, BUT SUCH SEPARATION SHALL NOT BE CONSIDERED AS THE LIMITS OF THE WORK REQUIRED OF ANY SEPARATE TRADE. THE TERMS AND CONDITIONS OF SUCH LIMITATIONS ARE WHOLLY BETWEEN THE CONTRACTOR AND THEIR SUBCONTRACTORS.
   B. IN GENERAL, THE WORKING DETAILS WILL INDICATE DIMENSIONS, POSITION AND KIND OF CONSTRUCTION, AND THE SPECIFICATIONS, QUALITIES AND METHODS. ANY WORK INDICATED ON THE WORKING DETAILS AND NOT MENTIONED IN THE SPECIFICATIONS, OR VICE VERSA, SHALL BE FURNISHED AS THOUGH FULLY SET FORTH IN BOTH. WORK NOT PARTICULARLY DETAILED, MARKED OR SPECIFIED, SHALL BE IDENTICAL OR SIMILAR TO LIKE CASES OF CONSTRUCTION THAT ARE DETAILED OR SPECIFIED. IF CONFLICTS OCCUR ON DRAWINGS AND/OR SPECIFICATIONS, THE MOST EXPENSIVE MATERIALS OR METHODS WILL PREVAIL.
   C. SHOULD AN ERROR APPEAR IN THE WORKING DETAILS OR SPECIFICATIONS OR IN WORK DONE BY OTHERS AFFECTING THIS WORK, THE CONTRACTOR SHALL NOTIFY THE ARCHITECT AT ONCE AND IN WRITING. IF THE CONTRACTOR PROCEEDS WITH THE WORK SO AFFECTED WITHOUT HAVING GIVEN SUCH WRITTEN NOTICE AND WITHOUT RECEIVING THE NECESSARY APPROVAL, DECISION OR INSTRUCTIONS IN WRITING FROM THE OWNER, THEN THE CONTRACTOR SHALL HAVE NO VALID CLAIM AGAINST THE OWNER FOR THE COST OF SO PROCEEDING AND SHALL MAKE GOOD ANY RESULTING DAMAGE OR DEFECT. NO VERBAL APPROVAL, DECISION, OR INSTRUCTION SHALL BE VALID OR BE THE BASIS FOR ANY CLAIM AGAINST THE OWNER, ITS OFFICERS, EMPLOYEES OR AGENTS. THE FOREGOING INCLUDES TYPICAL ERRORS IN THE SPECIFICATIONS OR NOTATIONAL ERRORS IN THE WORKING DETAILS WHERE THE INTERPRETATION IS DOUBTFUL OR WHERE THE ERROR IS SUFFICIENTLY APPARENT AS TO PLACE A REASONABLY PRUDENT CONTRACTOR ON NOTICE THAT, SHOULD THE CONTRACTOR ELECT TO PROCEED, THEY ARE DOING SO AT THEIR OWN RISK.
2. CONSTRUCTION SHALL CONFORM TO ALL APPLICABLE CODES AND REGULATIONS.
3. SHOP DRAWING NOTE:
   A. WHEN NOT ADDRESSED BY DIVISION 1 OF THE SPECIFICATIONS, SUBMITTALS SHALL BE ELECTRONIC PDF FORMAT.
   B. THE PURPOSE OF SHOP DRAWING SUBMITTALS BY THE CONTRACTOR IS TO DEMONSTRATE TO THE STRUCTURAL ENGINEER THAT THE CONTRACTOR UNDERSTANDS THE DESIGN CONCEPT BY INDICATING WHICH MATERIAL THE CONTRACTOR INTENDS TO FURNISH AND INSTALL, AND BY DETAILING THE FABRICATION AND INSTALLATION METHODS THE CONTRACTOR INTENDS TO USE ON A STAND ALONE SET OF DOCUMENTS. DUPLICATION OF DESIGN DOCUMENTS FOR THE PURPOSE OF SHOP DRAWINGS IS NOT ACCEPTABLE.
   C. PRIOR TO FABRICATION, SHOP DRAWINGS SHALL BE SUBMITTED FOR REVIEW BY THE STRUCTURAL ENGINEER. SHOP DRAWING SUBMITTALS SHALL INCLUDE, BUT ARE NOT NECESSARILY LIMITED TO, STRUCTURAL STEEL, REINFORCING STEEL, & GLUE-LAMINATED BEAMS.
   D. PRIOR TO SUBMISSION THE CONTRACTOR SHALL REVIEW ALL SUBMITTALS FOR CONFORMANCE WITH THE CONTRACT DOCUMENTS AND SHALL STAMP SUBMITTALS AS BEING "REVIEWED FOR CONFORMANCE".
   E. SHOP DRAWING SUBMITTALS PROCESSED BY THE STRUCTURAL ENGINEER ARE NOT CHANGE ORDERS.
   F. ANY DETAIL ON THE SHOP DRAWINGS THAT DEVIATES FROM THE CONTRACT DOCUMENTS SHALL CLEARLY BE MARKED WITH THE NOTE "THIS IS A CHANGE".
   G. SHOP DRAWINGS OR CALCULATIONS SUBMITTED FOR REVIEW THAT REQUIRE RESUBMITTAL FOR RE-REVIEW SHALL BE BILLED HOURLY FOR SUCH TIME TO THE GENERAL CONTRACTOR. RE-REVIEW WILL NOT PROCEED WITHOUT WRITTEN APPROVAL FROM THE GENERAL CONTRACTOR FOR ADDITIONAL ENGINEERING REVIEW SERVICES.
4. SAFETY NOTE:
   A. IT IS THE CONTRACTORS RESPONSIBILITY TO COMPLY WITH THE PERTINENT SECTIONS, AS THEY APPLY TO THIS PROJECT, OF THE "CONSTRUCTION SAFETY ORDERS" ISSUED BY THE STATE OF CALIFORNIA LATEST EDITION, AND ALL OSHA REQUIREMENTS.
   B. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ADEQUATE DESIGN AND CONSTRUCTION OF ALL FORMS AND SHORING REQUIRED. SHORING INDICATIONS (SIZE, SPACING, INSPECTION, DURATION, ETC.) ARE ONLY SHOWN ON THE STRUCTURAL DWGS WHEN REQUIRED TO IMPLEMENT THE DESIGN INTENT OF THE FINAL WORK PRODUCT. DETERMINATION WHETHER SHORING IS REQUIRED FOR TEMPORARY OR INTERMEDIATE CONDITIONS DURING CONSTRUCTION IS WHOLLY THE RESPONSIBILITY OF THE CONTRACTOR.
   C. THE OWNER AND THE STRUCTURAL ENGINEER DO NOT ACCEPT ANY RESPONSIBILITY FOR THE CONTRACTOR'S FAILURE TO COMPLY WITH THESE REQUIREMENTS.
5. THE CONTRACTOR SHALL NOTIFY THE ARCHITECT AND STRUCTURAL ENGINEER WHERE A CONFLICT OR DISCREPANCY OCCURS BETWEEN THE STRUCTURAL DRAWINGS AND ANY OTHER PORTION OF THE CONTRACT DOCUMENTS OR EXISTING FIELD CONDITIONS. SUCH NOTIFICATION SHALL BE GIVEN IN DUE TIME SO AS NOT TO AFFECT THE CONSTRUCTION SCHEDULE. IN CASE OF A CONFLICT BETWEEN STRUCTURAL DRAWINGS AND SPECIFICATIONS THE MORE RESTRICTIVE CONDITION SHALL TAKE PRECEDENCE UNLESS WRITTEN APPROVAL HAS BEEN GIVEN FOR THE LEAST RESTRICTIVE. CONTRACTOR SHALL VERIFY ALL DIMENSIONS WITH ARCHITECTURAL PRIOR TO COMMENCING ANY WORK.
6. WHEN CONSTRUCTION ATTACHES TO OR IS WITHIN AN EXISTING BUILDING, A COMPLETE SET OF DRAWINGS OF THE EXISTING BUILDING SHALL BE KEPT ON THE JOB SITE. CONTRACTOR TO OBTAIN THESE DRAWINGS FROM THE OWNER (IF THEY ARE AVAILABLE).
7. CONTRACTOR SHALL PROVIDE AN ALLOWANCE EQUAL TO 2% OF THE BID FOR STRUCTURAL STEEL, MISC. IRON AND REINFORCING STEEL TO BE USED AT THE DISCRETION OF THE STRUCTURAL ENGINEER. UNUSED AMOUNT TO REVERT TO THE OWNER UPON COMPLETION OF THE JOB.
8. ANY SUBSTITUTIONS FOR STRUCTURAL MEMBERS, HARDWARE OR DETAILS SHALL BE REVIEWED BY THE ARCHITECT AND STRUCTURAL ENGINEER. SUCH REVIEW WILL BE BILLED ON A TIME AND MATERIALS BASIS TO THE GENERAL CONTRACTOR WITH NO GUARANTEE THAT THE SUBSTITUTION WILL BE ALLOWED.
9. DO NOT SCALE DRAWINGS. CONTACT THE ARCHITECT OR STRUCTURAL ENGINEER FOR ANY DIMENSIONS NOT SHOWN.
10. THESE DRAWINGS ARE NOT COMPLETE UNTIL REVIEWED AND ACCEPTED BY LOCAL BUILDING OFFICIALS AND THE OWNER AND SIGNED BY THE STRUCTURAL ENGINEER.

DESIGN CRITERIA
1000N002

1. CODES AND STANDARDS
   2022 CALIFORNIA BUILDING CODE (CBC)
   ASCE 7-16
   ACI 318-19
   AISC 360-16, 341-16, 358-16
   AISI S100-16 w/ S2-20, S240-20, S400-20
   TMS 402/602-16
   2018 NDS, 2021 SDPWS
2. VERTICAL LOADS
   SOLAR ZONE ROOF DEAD LOAD = 4 PSF
   (INCLUDES 4 PSF FUTURE PV LOAD)
   ROOF LIVE LOAD = 20 PSF
   LIVE LOADS ARE REDUCED WHERE PERMITTED BY CODE.
3. SOILS VALUES
   ALLOWABLE SOILS PRESSURE
   A. DL + LL 3000 PSF
   B. DL + LL + SEISMIC 4000 PSF
   FOOTING
   MINIMUM DEPTH = 18"
   MINIMUM WIDTH = 12"
4. LATERAL LOADS
   SEISMIC:
   SITE CLASS D
   S_S = 0.45 ; S_{DS} = 0.43
   S_1 = 0.22 ; S_{D1} = 0.473
   R = 6.5 ; I_E = 1.0
   Ω_0 = 3.0 ; C_D = 4.0
   I_P = 1.0 TYPICAL
   I_P = 1.5 PER ASCE 7-16 SECT 13.1.3
   RISK CATEGORY: II
   SEISMIC DESIGN CATEGORY: D
   SEISMIC BASE SHEAR
   V = 26 KIPS (NS DIR.)
   = 26 KIPS (EW DIR.)
   SEISMIC FORCE RESISTING SYSTEM:
   LIGHT FRAMED WOOD BEARING SHEAR WALL
   ANALYSIS PROCEDURE: EQUIVALENT LATERAL FORCE
   WIND:
   V = 95 MPH
   RISK CATEGORY: II
   EXPOSURE CATEGORY: C
   GC_{Pi} = ±0.18

FOUNDATIONS
2000N001

1. THE BASIS OF DESIGN AND ALLOWABLE CAPACITIES OF THE FOUNDATION SYSTEM HAVE BEEN PROPORTIONED IN ACCORDANCE WITH THE RECOMMENDATIONS OF GEOTECHNICAL REPORT # 4438.000.002 BY ENGEO DATED MAY 10,2022. THE CONTRACTOR SHALL OBTAIN THE GEOTECHNICAL REPORT FROM THE OWNER. THE STRUCTURAL ENGINEER IS NOT RESPONSIBLE FOR THE ACCURACY OF THE INFORMATION PRESENTED IN THE GEOTECHNICAL REPORT.
2. FOUNDATIONS SHALL BEAR ON COMPETENT NATIVE SOIL OR COMPACTED FILL. SEE NOTES AND DETAILS ON SHEET **S501**
3. ALL FILLING, BACKFILLING AND COMPACTION SHALL BE DONE UNDER THE OBSERVATION OF A REPRESENTATIVE OF THE GEOTECHNICAL ENGINEER AND MUST BE COMPACTED TO THE MINIMUM DENSITY SPECIFIED IN ACCORDANCE WITH THE PROCEDURE OUTLINED IN THE GEOTECHNICAL REPORT.
4. BUILDING PAD CONSTRUCTION SHALL CONFORM TO THE REQUIREMENTS OF THE GEOTECHNICAL REPORT. THE EXTENT AND DEPTH OF OVEREXCAVATION AND PLACEMENT OF ENGINEERED FILL SHALL AT A MINIMUM BE AS SHOWN ON THE PLANS. FINAL DEPTH AND EXTENT OF EXCAVATION AND FILL SHALL BE DETERMINED AT TIME OF CONSTRUCTION BY A REPRESENTATIVE OF THE GEOTECHNICAL ENGINEER. FOUNDATION DEPTHS INDICATED ON PLANS ARE FOR ESTIMATING PURPOSES ONLY.
5. BOTTOMS OF ALL FOUNDATIONS SHALL BE LEVEL. CHANGES IN BOTTOM OF FOUNDATION ELEVATION SHALL BE MADE ACCORDING TO STEPPED FOOTING DETAIL ON THE TYPICAL DETAIL SHEET.
6. FOUNDATION CONCRETE MAY BE PLACED DIRECTLY INTO NEAT EXCAVATIONS PROVIDED THE EXCAVATIONS ARE STABLE (AS DETERMINED BY A REPRESENTATIVE OF THE GEOTECHNICAL ENGINEER), OTHERWISE, FOUNDATIONS SHALL BE FULLY FORMED. USE MINIMUM PLANKING SHOWN TO PROTECT AGAINST SLOUGHING, AS REQUIRED. PLANKING DOES NOT REPLACE FORMWORK REQUIRED TO STABILIZE EXCAVATION.

7. THE SURFACE OF ALL HORIZONTAL CONSTRUCTION JOINTS SHALL BE CLEANED & ROUGHENED BY EXPOSING CLEAN AGGREGATE SOLIDLY EMBEDDED IN MORTAR MATRIX.
8. NOTIFY THE STRUCTURAL ENGINEER 48 HOURS BEFORE CASTING FOUNDATIONS.
9. A REPRESENTATIVE OF THE GEOTECHNICAL ENGINEER SHALL ADVISE THE BUILDING OFFICIAL IN WRITING THAT:
   A. THE BUILDING PAD WAS PREPARED IN ACCORDANCE WITH THE GEOTECHNICAL REPORT.
   B. THE UTILITY TRENCHES HAVE BEEN PROPERLY BACKFILLED AND COMPACTED.
   C. THE FOUNDATION EXCAVATION DEPTH AND MATERIAL ARE ADEQUATE TO ACHIEVE DESIGN BEARING CAPACITY.
   D. FORMING COMPLIES WITH THE GEOTECHNICAL REPORT AND APPROVED PLAN.

CONCRETE
3000N001

1. CONCRETE SHALL ATTAIN 28 DAY COMPRESSIVE STRENGTH AS REQUIRED IN NOTE #28. MAXIMUM SLUMP SHALL NOT EXCEED 4 INCHES.
2. CONCRETE MIX DESIGNS SHALL BE PREPARED ACCORDING TO ACI 318-14 CHAPTER 26.4 AND ACI 301-10 SECTION 4, REVIEWED BY OWNER'S TESTING LABORATORY AND SUBMITTED TO THE STRUCTURAL ENGINEER FOR REVIEW.
3. CEMENTITIOUS MATERIALS:
   CEMENT SHALL CONFORM TO ASTM C-150 TYPE II OR V.
   FLY ASH SHALL CONFORM TO ASTM C-618. MAX. QUANTITY OF FLY ASH SHALL BE 25% OR AS GIVEN IN SPECS.
4. CONCRETE AGGREGATES SHALL CONFORM TO ASTM C-33 FOR NORMAL WEIGHT CONCRETE AND ASTM C-330 FOR LIGHTWEIGHT CONCRETE.
5. NON-SHRINK GROUT OR DRYPACK SHALL CONSIST OF A PREMIXED NONMETALLIC FORMULA.
6. REINFORCING STEEL SHALL CONFORM TO ASTM A-615 GRADE 60 UNO. REINFORCING STEEL TO BE WELDED SHALL CONFORM TO ASTM A-706 GRADE 60. CONTRACTOR SHALL SUBMIT REBAR MILL CERTIFICATES. REINFORCING STEEL IN SPECIAL REINFORCED SHEAR WALLS OR MOMENT FRAMES, EXCEPT TIES AND HOOPS, SHALL CONFORM TO ASTM A-706.
7. ALL PREHEATING AND WELDING OF REINFORCING BARS SHALL BE DONE IN ACCORDANCE WITH AWS D1.4 LATEST EDITION AND SHALL BE CONTINUOUSLY INSPECTED BY A QUALIFIED LABORATORY. CONTRACTOR SHALL FURNISH WPS FOR ALL REBAR WELDING TO THE LABORATORY.
8. REINFORCING STEEL SHALL BE FABRICATED ACCORDING TO "MANUAL OF STANDARD PRACTICE FOR REINFORCED CONCRETE CONSTRUCTION".
9. WIRE FABRIC SHALL CONFORM TO ASTM A-185.
10. DIMENSIONS SHOWN FOR LOCATION OF REINFORCING ARE TO THE FACE OF BARS LISTED AND DENOTE CLEAR COVERAGE. NON-PRESTRESSED, CAST-IN-PLACE CONCRETE COVERAGE SHALL BE AS FOLLOWS, UNO:
    CONCRETE DEPOSITED DIRECTLY AGAINST GROUND (EXCEPT SLABS)---------- 3"
    CONCRETE EXPOSED TO GROUND OR WEATHER BUT PLACED IN FORMS:
    #5 AND SMALLER---------- 1-1/2"
    #6 AND LARGER---------- 2"
    BEAMS & COLUMNS (TIES)---------- 1-1/2"
    BEAMS & COLUMNS (MAIN REINFORCING)---------- 2"
    CAST-IN-PLACE WALLS (EXTERIOR FACE & SOIL SIDE)---------- SEE ABOVE
    CAST-IN-PLACE WALLS (INTERIOR FACE-#11 & SMALLER)---------- 3/4"
    TILT-UP WALLS---------- SEE DETAILS
    SLABS (ON FORMS)---------- 3/4"
    SLABS (ON GROUND)---------- 2" CLEAR FROM TOP
11. SPLICES IN CONTINUOUS REINFORCEMENT SHALL BE LAPPED UNO, SEE SCHEDULE THIS SHEET. SPLICES IN ADJACENT BARS SHALL BE GREATER THAN 5'-0" APART. SPLICE CONTINUOUS BARS IN SOIL-BEARING GRADE BEAMS, STRUCTURAL SLABS ON GRADE AND MAT FOUNDATIONS AS FOLLOWS UNO: TOP BARS AT CENTERLINE OF SUPPORT; BOTTOM BARS AT MID-SPAN. SPLICE CONTINUOUS BARS IN ELEVATED SLABS AND BEAMS, ETC. AS FOLLOWS UNO: TOP BARS AT MID-SPAN; BOTTOM BARS AT SUPPORT. ALL BARS SIZE #14 AND LARGER SHALL BE CONTINUOUS FOR FULL LENGTH SHOWN OR SPLICED WITH MECHANICAL COUPLERS AS NOTED IN DETAILS. SPLICES IN WWF SHALL BE 1-1/2 MESHES WIDE.
12. THE MINIMUM CLEAR SPACING BETWEEN PARALLEL BARS IN A LAYER SHALL NOT BE LESS THAN THE LARGER OF BAR DIAMETER, 1", OR 33% GREATER THAN THE MAXIMUM AGGREGATE SIZE (NOMINAL), WHICHEVER IS GREATEST. THIS REQUIREMENT ALSO APPLIES TO THE CLEAR SPACING BETWEEN DIFFERENT LAPPED SPLICE BARS AND TO THE CLEAR DISTANCE BETWEEN A CONTACT LAP SPLICE AND ADJACENT SPLICES OR BARS.
13. ALL HOOKS SHALL BE STANDARD HOOKS UNLESS OTHERWISE SHOWN OR NOTED. AT WALLS, PROVIDE HOOKS AT ENDS OF ALL REINFORCING AT ENDS, CORNERS AND INTERSECTIONS, UNO.
14. CONSTRUCTION JOINTS SHALL BE MADE ROUGH AND ALL LAITANCE REMOVED FROM THE SURFACE OF THE PREVIOUS POUR BY CHIPPING THE ENTIRE SURFACE, SAND BLASTING, OR RAKING THE SURFACE TO PROVIDE 1/4" DEEP DEFORMATIONS.
15. REMOVE ALL DEBRIS FROM FORMS BEFORE CASTING ANY CONCRETE.
16. REINFORCING, ANCHOR BOLTS, BOLTS, ETC. TO BE EMBEDDED IN CONCRETE SHALL BE SECURELY POSITIONED BEFORE PLACING CONCRETE.
17. ANCHOR BOLTS (AB'S) CAST IN CONCRETE FOR WALL SILL AND LEDGER APPLICATIONS SHALL BE HEADED BOLTS WITH CUT THREADS CONFORMING TO ASTM F1554, GRADE 36, REFER TO "WOOD" NOTES FOR ADDITIONAL REQUIREMENTS FOR BOLTS IN CONTACT WITH PRESSURE TREATED OR FIRE RETARDANT MATERIAL. REFER TO 'STRUCTURAL STEEL' NOTE FOR REQUIREMENTS FOR ANCHOR RODS (AR'S) CAST IN CONCRETE FOR CUSTOM BASE PLATE AND STEEL EMBED APPLICATIONS.
18. WALLS SHALL BE CAST IN HORIZONTAL LAYERS OF 2'-0" MAXIMUM DEPTH.
19. CONCRETE IN WALLS, PIERS OR COLUMNS SHALL SET AT LEAST 2 HOURS BEFORE PLACING CONCRETE IN BEAMS, SPANDRELS, OR SLABS SUPPORTED THEREON.
20. HORIZONTAL WALL BARS IN MULTI-CURTAIN CAST IN PLACE WALLS SHALL BE STAGGERED.
21. DOWELS IN WALLS, PIERS OR COLUMNS SHALL BE CENTERED ON FOOTING OR SLAB WITH SAME SIZE BAR.
22. CONSOLIDATE CONCRETE PLACED IN FORMS BY MECHANICAL VIBRATING EQUIPMENT SUPPLEMENTED BY HAND-SPADING, RODDING OR TAMPING. USE EQUIPMENT AND PROCEDURES FOR CONSOLIDATION OF CONCRETE IN ACCORDANCE WITH THE RECOMMENDED PRACTICES OF ACI 309 TO SUIT THE TYPE OF CONCRETE AND PROJECT CONDITIONS. CONCRETE SHALL NOT BE DEPOSITED IN RETAINING WALLS (AND BACKFILLS AS IN WALLS) SO AS TO CAUSE SEGREGATION OF AGGREGATES. IN SUCH CASES HOPPERS AND CHUTES OR TRUNKS OF VARIABLE LENGTHS SHALL BE USED SO THAT THE FREE UNCONFINED FALL OF CONCRETE SHALL NOT EXCEED 6 FEET.
23. NO WOOD SPREADERS ALLOWED. NO WOOD STAKES ALLOWED IN AREAS TO BE CONCRETED.
24. ADDITIONAL REINFORCING IN PRECAST OR TILT-UP PANELS REQUIRED FOR LIFTING STRESSES SHALL BE SUPPLIED BY CONTRACTOR.
25. PROVIDE #4x4'-0" DIAGONAL REINFORCING AT EACH REINFORCING LAYER OF SLAB AT ALL RE-ENTRANT CORNERS TYPICAL UNO, THIS APPLIES TO SLAB ON GRADE, CONCRETE OVER METAL DECK, AND ELEVATED STRUCTURAL SLAB CONDITIONS.
26. ALL SAW CUTTING SHALL BE DONE AFTER INITIAL SET HAS OCCURRED TO AVOID TEARING OR DAMAGE BY THE SAW BLADE, BUT BEFORE INITIAL SHRINKAGE HAS OCCURRED.
27. NOTIFY STRUCTURAL ENGINEER A MINIMUM OF 48 HOURS BEFORE PLACING ANY CONCRETE.
28. CONCRETE STRENGTHS & MIX PROPERTIES:

ITEM	F'C @ 28 DAYS	MAX AGGR SIZE	WEIGHT	MAX W/CM* RATIO
A. FOUNDATIONS	3000 PSI	1-1/2"	NW	0.58
B. SLAB ON GRADE	3500 PSI	1"	NW	0.45
SITE & MISCELLANEOUS - SEE CIVIL OR ARCH DRAWINGS				

* W/CM = WATER : CEMENTITIOUS MATERIAL RATIO

STRUCTURAL STEEL
5000N001

1. FABRICATION, ERECTION AND MATERIALS SHALL CONFORM WITH THE AISC SPECIFICATION FOR STRUCTURAL STEEL BUILDINGS, THE AISC SEISMIC PROVISIONS FOR STRUCTURAL STEEL BUILDINGS AND THE AISC CODE OF STANDARD PRACTICE. LATEST EDITIONS ADOPTED BY THE BUILDING CODE SPECIFIED IN THE DESIGN CRITERIA NOTES, UNO.
2. ALL HOT ROLLED STEEL SHAPES, PLATES AND BARS SHALL BE NEW STEEL CONFORMING TO ASTM A6, UNO IN THE STRUCTURAL DRAWINGS. STRUCTURAL STEEL SHALL BE AS FOLLOWS:
   A. WIDE FLANGE AND WT SHAPES: ASTM A992
   B. M- AND S- SHAPES: ASTM A36
   C. C- AND MC- SHAPES: ASTM A992
   D. L- SHAPES: ASTM A572 GRADE 50
   E. ROUND HSS: ASTM A500 GRADE C (F_Y = 46 KSI)
   F. RECTANGULAR HSS: ASTM A500 GRADE C (F_Y = 50 KSI)
   G. PIPE: ASTM A53, GRADE B (F_Y = 35 KSI)
   H. BASE PLATES UP TO 4" THICK: ASTM A572 GRADE 50
   I. ALL OTHER PLATE MATERIAL: ASTM A572 GRADE 50, UNO
   J. BUILT UP COLUMNS: ASTM A572 GRADE 50
   K. PLATE GIRDERS: ASTM A572 GRADE 50
   L. CONNECTION MATERIAL
      a. COLUMN CONTINUITY PLATES AND DOUBLER PLATES: ASTM A572 GRADE 50
      b. BRACED FRAME GUSSET PLATES: ASTM A572 GRADE 50
3. ALL STRUCTURAL STEEL SHALL RECEIVE A MINIMUM OF ONE SHOP COAT OF RED PRIMER PAINT. DO NOT PAINT AREAS TO BE FIELD WELDED, FIREPROOFED, GALVANIZED, TO RECEIVE SLIP-CRITICAL HIGH STRENGTH BOLTS, OR TO BE EMBEDDED IN CONCRETE. PROVIDE ADDITIONAL PAINTING AS NOTED IN THE SPECIFICATIONS.
4. ALL STRUCTURAL STEEL SHALL BE ERECTED PLUMB AND TRUE TO LINE. TEMPORARY BRACING SHALL BE INSTALLED AND SHALL BE LEFT IN PLACE UNTIL OTHER MEANS ARE PROVIDED TO ADEQUATELY BRACE THE STRUCTURE. THE CONTRACTOR IS RESPONSIBLE FOR REVIEWING ALL BASE PLATE AND SUPPORT CONDITIONS DURING ERECTION AND BRACING AS REQUIRED. SEE AISC AND OSHA REQUIREMENTS.
5. GROUT BELOW BASE PLATES SHALL BE NON-METALLIC, NON-SHRINK GROUT WITH A MINIMUM COMPRESSIVE STRENGTH OF 8,000 PSI UNO. COLUMN BASE PLATES SHALL BE PROMPTLY GROUTED AFTER STEEL FRAME HAS BEEN PLUMBED AND PRIOR TO INSTALLATION OF METAL DECKING.
6. STRUCTURAL STEEL BELOW GRADE SHALL HAVE 3 INCHES MINIMUM OF CONCRETE COVER.
7. STRUCTURAL BOLTS AND THREADED FASTENERS
   A. BOLTED CONNECTIONS SHALL CONSIST OF UNFINISHED BOLTS CONFORMING TO ASTM F3125 GRADE A325 UNO.
   B. WHERE HIGH STRENGTH BOLTS ARE SPECIFIED, BOLTS CONFORMING TO ASTM F3125 GRADE A325 OR GRADE A490 SHALL BE PROVIDED AS INDICATED. HIGH STRENGTH BOLTS IN SLIP-CRITICAL AND PRETENSION JOINTS SHALL CONFORM TO THE REQUIREMENTS OF ASTM F1852 FOR TWIST OFF TYPE TENSION CONTROL BOLT. PRETENSIONING SHALL BE PROVIDED WITH DIRECT TENSION INDICATOR WASHERS CONFORMING TO THE REQUIREMENTS OF ASTM F959.
   C. ANCHOR RODS CAST IN CONCRETE OR MASONRY SHALL BE HEADED BOLTS WITH CUT THREAD, FULL DIAMETER BODY (OR CONFORMING TO ASTM F1554 GRADE 36, S5 WELDABLE PER S1 SUPPLEMENTARY REQUIREMENTS), OR GRADE 105 AS INDICATED ON DRAWINGS. IN LIEU OF HEADED ANCHOR RODS, THREADED ROD CONFORMING TO THE ABOVE SPECIFICATIONS MAY BE USED WHEN THE ROD OR DOUBLE NUTS TIGHTENED TO PREVENT ROTATION. ANCHOR ROD PROJECTION ABOVE TOP OF FOUNDATION SHALL BE AS NOTED ON THE DRAWINGS.
   D. BOLTED CONNECTIONS SHALL HAVE WASHERS CONFORMING TO ASTM F436 UNO. WASHERS MAY BE OMITTED AT SNUG-TIGHTENED AND SLIP-CRITICAL CONNECTIONS, EXCEPT WHERE REQUIRED BY THE RCSC SPECIFICATION FOR STRUCTURAL JOINTS, LATEST EDITION.
   E. BASE PLATES SHALL HAVE FLAT TOP AND BOTTOM SURFACES. HARDENED WASHERS FOR BASE PLATES SHALL BE A36 SQUARE OR CIRCULAR PLATE UNLESS ASTM F844 WASHERS ARE PERMITTED. SEE BASE PLATE DETAILS FOR PLATE WASHER SIZE AND PERMISSIBLE WASHER USE.
   F. THREADED RODS SHALL CONFORM TO ASTM A36 UNLESS NOTED OTHERWISE ON THE DRAWINGS.
   G. PINS: ALL PINS IN PIN CONNECTED MEMBERS SHALL CONFORM TO ASTM A36 OR ASTM A108 AS INDICATED ON THE DRAWINGS.
8. ADDITIONAL REQUIREMENTS FOR "SLIP-CRITICAL" BOLTED CONNECTIONS:
   A. "SLIP-CRITICAL" BOLTS WITH CUT THREADS (CONFORMING TO ASTM F1554, UNO, REFER TO "WOOD" NOTES FOR ADDITIONAL REQUIREMENTS FOR BOLTS IN CONTACT WITH PRESSURE TREATED OR FIRE RETARDANT MATERIAL. REFER TO 'STRUCTURAL STEEL' NOTE FOR REQUIREMENTS FOR ANCHOR RODS (AR'S) CAST IN CONCRETE FOR CUSTOM BASE PLATE AND STEEL EMBED APPLICATIONS.
   B. THE SPECIAL INSPECTOR MUST BE PRESENT DURING THE INSTALLATION AND TIGHTENING OPERATION OF "SLIP-CRITICAL" CONNECTIONS.
9. PROVIDE FILLER PLATES WITH STITCH BOLTS AND RING FILLS, SPACED AT NOT MORE THAN 2'-0" ON CENTER FOR ALL DOUBLE ANGLE MEMBERS UNO.
10. AT WOOD TO STEEL PARALLEL CONTACT, BOLT WITH 1/2" DIAMETER BOLTS AT MAXIMUM 24"CC UNLESS NOTED OTHERWISE IN THE DRAWINGS.
11. BOLT HOLES SHALL BE AISC STANDARD HOLES UNLESS SPECIFIED OTHERWISE. USE STANDARD AISC GAGE AND PITCH FOR BOLTS EXCEPT AS NOTED OTHERWISE.
12. WELDING SHALL BE DONE BY THE CONTRACTOR AND SHALL BE IN ACCORDANCE WITH AMERICAN WELDING SOCIETY STANDARDS, USING ONLY CERTIFIED WELDERS. ALL GROOVE WELDS SHALL HAVE COMPLETE PENETRATION UNLESS NOTED OTHERWISE. ALL ELECTRODES FOR WELDING SHALL COMPLY WITH GRADES 70 AND 80 REQUIREMENTS OF E70 SERIES MINIMUM.
13. WELD LENGTHS SPECIFIED ON PLANS ARE THE NET EFFECTIVE LENGTHS REQUIRED.
14. MINIMUM FILLET WELDS: (T = THICKNESS OF THINNER PART JOINED)
    3/16" @ T =< 1/2"
    1/4" @ T < 3/4"
    5/16" @ T > 3/4"
15. WELDING PROCEDURE SPECIFICATIONS (WPS) FOR SHOP AND FIELD PREQUALIFIED WELD JOINTS AND WELD JOINTS QUALIFIED BY TEST SHALL BE SUBMITTED FOR REVIEW BY THE STRUCTURAL ENGINEER AND THE OWNER'S TESTING LABORATORY PRIOR TO FABRICATION. ALL WELDING PROCEDURE ITEMS SUCH AS BASE METALS, WELDING PROCESSES, FILLER METALS AND JOINT DETAILS THAT MEET THE REQUIREMENTS OF AWS D1.1 SECTION 3 SHALL BE CONSIDERED AS PREQUALIFIED. ANY CHANGE OR SUBSTITUTION THAT IS BEYOND THE RANGE OR TOLERANCE OR REQUIREMENTS FOR PREQUALIFICATION SHALL BE QUALIFIED BY TEST PER AWS D1.1 SECTION 4 PART B. SUBMIT TEST REPORTS SHOWING SUCCESSFUL PASSAGE OF QUALIFICATION TESTS FOR ALL NON-PREQUALIFIED WELDING PROCEDURE SPECIFICATIONS.

METAL DECK NOTES
5800N001

1. PROVIDE METAL DECKING OF TYPE AND GAUGE AS SHOWN ON PLANS AND AS INDICATED IN THE METAL DECK SCHEDULE.
2. METAL FLOOR DECK SHALL BE COMPOSITE TYPE, CONFORMING TO ASTM A653, STRUCTURAL QUALITY, AND SHALL BE ZINC COATED PER ASTM A653, G60 COATING DESIGNATION.
3. METAL ROOF DECK SHALL CONFORM TO ASTM A653, STRUCTURAL QUALITY, AND SHALL BE ZINC COATED PER ASTM A653, G60 COATING DESIGNATION.
4. PRIOR TO FABRICATION, THE CONTRACTOR SHALL SUBMIT SHOP DRAWINGS FOR THE METAL DECKING, SHOWING DECK GAUGE, SIZE AND LAYOUT AS WELL AS CLOSURE CONDITIONS, WELDS TO SUPPORTS AND SIDE LAP DETAILS.
5. CONNECTION AND WELDING OF DECKING TO STRUCTURAL SUPPORTS AND DECK SIDE SEAMS SHALL BE AS SPECIFIED IN THE STRUCTURAL DRAWINGS. ALL ELECTRODES FOR WELDING SHALL COMPLY WITH AWS CODE, E60 SERIES MINIMUM.
6. ALL REINFORCED OPENINGS IN METAL DECK SHALL BE INSTALLED BY METAL DECK SUBCONTRACTOR.
7. AT METAL DECKS TO RECEIVE CONCRETE, ABSOLUTELY NO CONDUIT OR PIPING OF ANY TYPE IS TO BE PLACED HORIZONTALLY WITHIN THE DEPTH OF THE CONCRETE ABOVE THE METAL DECK.
8. AT METAL DECK WITHOUT CONCRETE FILL THE FOLLOWING MAY BE ATTACHED WITHOUT SPECIFIC APPROVAL OF THE STRUCTURAL ENGINEER: ACOUSTICAL TILE AND GYPSUM BOARD CEILINGS ONLY; NO PIPING, DUCTING OR CONDUIT. MAXIMUM CEILING WEIGHT - 3.5 PSF. MAXIMUM WIRE HANGER LOAD = 60#.
9. WHERE SUSPENSION OR HANGER WIRES ARE REQUIRED BY OTHERS, VERIFY AND COORDINATE LOCATIONS, PATTERNS, SPACINGS, ETC. WITH THE APPROPRIATE TRADE. DRILL OR PUNCH HOLES AT BOTTOM OF DECK FLUTES OF SUFFICIENT SIZE TO PASS SUPPORT WIRES. WIRE SUSPENSION SHALL BE SECURED WITH A MINIMUM OF THREE (3) TIGHT TURNS AROUND A MINIMUM 1-1/2" x 12" LONG FURRING CHANNEL OR NO. 3 x 12" LONG REINFORCING BAR CENTERED ABOVE THE HOLE AND LAID IN THE DECK FLUTES.

WINDOW SYSTEM DESIGN CRITERIA
1000N070

1. THE FOLLOWING DESIGN CRITERIA APPLIES TO ALL GLAZED OPENINGS (WINDOW SYSTEMS, STOREFRONT, CURTAIN WALL, WINDOW WALL, ETC). WINDOW SYSTEMS ARE A DELEGATED DESIGN SYSTEM TO BE OVERSEEN BY THE GENERAL CONTRACTOR.
2. ELEMENTS OF THE WINDO

STRUCTURAL SPECIAL INSPECTIONS AND TESTING

APPLICABLE TO ALL DRAWINGS UNLESS NOTED OR SHOWN OTHERWISE

STATEMENT OF STRUCTURAL SPECIAL INSPECTIONS AND TESTING
1105N001

1. SPECIAL INSPECTIONS AND TESTING SHALL BE PROVIDED BY A TESTING AND INSPECTION AGENCY, EMPLOYED BY THE OWNER (OR OWNER'S AUTHORIZED AGENT), AND APPROVED BY THE BUILDING OFFICIAL TO PROVIDE SPECIAL INSPECTIONS AND TESTING FOR THE PARTICULAR TYPE OF CONSTRUCTION.
2. TABLES OF SPECIAL INSPECTIONS AND TESTING ARE DERIVED FROM THE STRUCTURAL PROVISIONS OF THE CBC AND REFERENCED STANDARDS AND ARE FOR REFERENCE ONLY. THE INCLUDED TABLES ARE PROVIDED FOR THE CONVENIENCE OF THE OWNER, TESTING AGENCY AND CONTRACTOR IN DEVELOPING THE SCOPE OF WORK FOR REQUIRED TESTING AND INSPECTION OF STRUCTURAL MATERIALS AND COMPONENTS. FINAL DEFINITION OF THIS SCOPE OF WORK IS TO BE DETERMINED BY THE TESTING AGENCY AND THE OWNER (OR OWNER'S AUTHORIZED AGENT).
3. FREQUENCY OF SPECIAL INSPECTIONS AND TESTING SHALL BE, AT A MINIMUM, AS NOTED FOR THE INDIVIDUAL ELEMENTS WITHIN THE TABLES BELOW. THE CONTRACTOR SHALL COORDINATE TIMING OF SPECIAL INSPECTIONS AND TESTING WITH THE SPECIAL INSPECTION AND TESTING AGENCY.
4. PRIOR TO THE START OF CONSTRUCTION, THE TESTING AND INSPECTION AGENCY SHALL PROVIDE DOCUMENTATION TO THE BUILDING OFFICIAL DEMONSTRATING COMPETENCE AND RELEVANT EXPERIENCE OR TRAINING OF THE SPECIAL INSPECTORS WHO WILL PERFORM THE SPECIAL INSPECTIONS AND TESTS DURING CONSTRUCTION, IN ACCORDANCE WITH CBC SECTION 1704.2.1.
5. THE TESTING AND INSPECTION AGENCY SHALL SUBMIT REPORTS OF SPECIAL INSPECTIONS AND TESTS TO THE BUILDING OFFICIAL, STRUCTURAL ENGINEER OF RECORD AND THE CONTRACTOR, PER CBC SECTION 1704.2.4. THE REPORTS SHALL INDICATE WHETHER WORK INSPECTED OR TESTED CONFORMED TO THE APPROVED CONSTRUCTION DOCUMENTS. ANY DISCREPANCIES SHALL BE IMMEDIATELY BROUGHT TO THE ATTENTION OF THE CONTRACTOR FOR CORRECTION. IF DISCREPANCIES ARE NOT CORRECTED, THEY SHALL BE BROUGHT TO THE ATTENTION OF THE BUILDING OFFICIAL AND THE STRUCTURAL ENGINEER OF RECORD.
6. SPECIAL INSPECTION AND TESTING RECORDS SHALL BE RETAINED BY THE CONTRACTOR ON SITE UNTIL COMPLETION OF CONSTRUCTION.
7. THE CONTRACTOR SHALL SUBMIT A WRITTEN STATEMENT TO THE BUILDING OFFICIAL ACKNOWLEDGING RESPONSIBILITY FOR CONSTRUCTION OF THE MAIN LATERAL-FORCE RESISTING SYSTEM PRIOR TO COMMENCEMENT OF THAT WORK AS REQUIRED BY CBC SECTION 1704.4.
8. THE OWNER OR THE OWNER'S AUTHORIZED AGENT SHALL SUBMIT TO THE BUILDING OFFICIAL, A FINAL REPORT DOCUMENTING SPECIAL INSPECTIONS AND TESTS PER CBC SECTION 1704.2.4, AND REPORTS AND CERTIFICATES PER CBC SECTION 1704.5.
9. ALL SOILS AND FOUNDATION EXCAVATION INSPECTIONS SHALL BE BY THE GEOTECHNICAL ENGINEER OF RECORD, OR A GEOTECHNICAL FIRM HIRED BY THE OWNER PER CBC SECTION 1705.6.
10. SPECIAL INSPECTION IS REQUIRED FOR ALL SHOP FABRICATED MEMBERS OR ASSEMBLIES UNLESS WAIVED PER THE EXCEPTIONS IN CBC SECTION 1704.2.5.
11. DEFINITIONS:
    a. CONTINUOUS - SPECIAL INSPECTION BY THE SPECIAL INSPECTOR WHO IS CONTINUOUSLY PRESENT WHEN AND WHERE THE WORK TO BE INSPECTED IS BEING PERFORMED.
    b. PERIODIC - SPECIAL INSPECTION BY THE SPECIAL INSPECTOR WHO IS INTERMITTENTLY PRESENT WHERE THE WORK TO BE INSPECTED HAS BEEN OR IS BEING PERFORMED.
    c. QUALITY ASSURANCE (QA) - MONITORING AND INSPECTION TASKS PERFORMED BY AN AGENCY OR FIRM OTHER THAN THE FABRICATOR OR ERECTOR TO ENSURE THAT THE MATERIAL PROVIDED AND WORK PERFORMED BY THE FABRICATOR AND ERECTOR MEET THE REQUIREMENTS OF THE APPROVED CONSTRUCTION DOCUMENTS AND REFERENCED STANDARDS. QUALITY ASSURANCE INCLUDES THOSE TASKS DESIGNATED 'SPECIAL INSPECTION' BY THE APPLICABLE CODE.
    d. QUALITY CONTROL (QC) - CONTROLS AND INSPECTIONS IMPLEMENTED BY THE FABRICATOR OR ERECTOR, AS APPLICABLE, TO ENSURE THAT THE MATERIAL PROVIDED AND WORK PERFORMED MEET THE REQUIREMENTS OF THE APPROVED CONSTRUCTION DOCUMENTS AND REFERENCED STANDARDS.
    e. OBSERVE (O) - OBSERVE THESE ITEMS ON A RANDOM BASIS (DAILY FOR LFRS). OPERATIONS NEED NOT BE DELAYED PENDING THESE INSPECTIONS.
    f. PERFORM (P) - PERFORM THOSE TASKS PRIOR TO FINAL ACCEPTANCE FOR EACH ITEM OR ELEMENT.
    g. DOCUMENT (D) - THE INSPECTOR SHALL PREPARE REPORTS INDICATING THAT THE WORK HAS BEEN PERFORMED IN ACCORDANCE WITH THE CONTRACT DOCUMENTS. THE REPORT NEED NOT PROVIDE DETAILED MEASUREMENTS FOR JOINT FIT-UP, WPS SETTINGS, COMPLETED WELDS, OR OTHER INDIVIDUAL ITEMS LISTED IN THE TABLES. FOR SHOP FABRICATION, THE REPORT SHALL INDICATE THE PIECE MARK OF THE PIECE INSPECTED. FOR FIELD WORK, THE REPORT SHALL INDICATE THE REFERENCE GRID LINES AND FLOOR OR ELEVATION INSPECTED. WORK NOT IN COMPLIANCE WITH THE CONTRACT DOCUMENTS AND WHETHER THE NONCOMPLIANCE HAS BEEN SATISFACTORILY REPAIRED SHALL BE NOTED IN THE INSPECTION REPORT.
12. SPECIAL INSPECTIONS AND TESTING SHALL BE PERFORMED DURING CONSTRUCTION ON THE WORK SHOWN IN THE CONSTRUCTION DOCUMENTS AS REQUIRED BY CBC CHAPTER 17, THE TABLES LISTED BELOW, AND THE JURISDICTION'S SPECIAL INSPECTION AND TESTING FORM. IF DISCREPANCIES ARE NOTED, CONTACT THE SEOR. ALL EXCEPTIONS INCLUDED IN CBC CHAPTER 17 ARE PERMITTED TO BE USED.
    - SOILS
    - CONCRETE CONSTRUCTION (POST-INSTALLED ANCHORS)
    - MASONRY CONSTRUCTION - LEVEL 2 (POST-INSTALLED ANCHORS)

SOILS - REQUIRED SPECIAL INSPECTIONS AND TESTS

BID SET (PRELIMINARY)

FOUNDATION PLAN NOTES

1. NOTES AND DETAILS ON SHEETS LABELED AS "GENERAL" OR "TYPICAL" ARE APPLICABLE TO ALL DRAWINGS, UNO.
2. VERIFY ALL BUILDING DIMENSIONS AND ELEVATIONS w/ ARCH DRAWINGS. NOTIFY THE ARCHITECT IMMEDIATELY IF THERE ARE ANY CONFLICTS w/ DIMENSIONS SHOWN.
3. DIMENSIONS SHOWN ARE TO THE CL OF COLUMN, FACE OF STUD.
4. SITE PREPARATION AND BUILDING PAD CONSTRUCTION SHALL BE DONE IN ACCORDANCE WITH THE GEOTECHNICAL REPORT LISTED IN THE FOUNDATION GENERAL NOTES. BOTTOM OF FOOTING EXCAVATIONS SHALL BE REVIEWED BY GEOTECHNICAL ENGINEER PRIOR TO PLACEMENT OF REINFORCING STEEL. THE BOTTOM OF ALL FOOTINGS SHALL BE AT LEAST 18" BELOW ADJACENT MINIMUM PREPARED BUILDING PAD ELEVATION ON ALL SIDES, TYP UNO OR AS SHOWN ON SECTIONS.
5. SLAB ON GRADE SHALL BE 6" THICK CONCRETE w/ #3 @ 18"CC EW AT MID-DEPTH. CONCRETE SHALL BE INSTALLED OVER 15 MIL VAPOR RETARDER OVER 4" CLEAN CRUSHED ROCK. TOP OF CONCRETE SLAB IS 0'-0" UNO.
6. CONTRACTOR SHALL SUBMIT AN EDGE OF SLAB PLAN TO ARCHITECT & SEOR FOR REVIEW. SUBMITTAL SHALL BE DIMENSIONED AND LOCATED RELATIVE TO STRUCTURAL GRIDS.
7. PROVIDE SLAB ON GRADE CONTROL JOINTS (SJ) AS INDICATED PER **6/S501** TYP AT ALL INTERIOR SLABS. CONSTRUCTION JOINTS (CJ) MAY REPLACE CONTROL JOINTS AS REQUIRED.
8. IT IS THE CONTRACTOR'S RESPONSIBILITY TO COORDINATE SLAB CONTROL JOINTS WITH ANY ARCHITECTURALLY EXPOSED SLAB AREAS OR THE LOCATION OF TILE CRACK CONTROL JOINTS. VERIFY SPECIAL CONDITION CONTROL JOINTS WITH ARCH DRAWINGS.
9. CONTRACTOR TO COORDINATE EXACT DIMENSIONS AND LOCATIONS OF THICKENED SLABS, HOUSEKEEPING PADS, ETC. WITH ALL OTHER DISCIPLINE'S DRAWINGS AS WELL AS WITH THE EQUIPMENT PROVIDED, PRIOR TO COMMENCING WORK.
10. ALL DEPRESSIONS, SLOPES, ETC. ARE SHOWN FOR REFERENCE ONLY. FOR EXACT DEPTHS, SLOPES, EXTENTS, ETC. SEE OTHER DISCIPLINES' DRAWINGS.
11. COORDINATE CURB LOCATIONS AND EXTENTS WITH ARCH DRAWINGS. FOR CURBS BELOW NON-STRUCTURAL WALLS, SEE **10/S501** & **11/S501** .
12. TEMPORARY LOADS APPLIED DURING CONSTRUCTION HAVE NOT BEEN CONSIDERED IN SLAB ON GRADE DESIGN.
13. SEE ARCH & CIVIL DRAWINGS FOR ALL EXTERIOR CURBS, FLATWORK, PLANTERS, RAMPS, ETC.
14. PROVIDE 3" MIN. CONCRETE COVER AT STRUCTURAL STEEL AND ANCHOR BOLTS BELOW GRADE, TYP.
15. CONTINUE ALL REINFORCING IN CONTINUOUS FOOTINGS THROUGH SPREAD FOOTINGS, TYP UNO.
16. FACE OF CONCRETE AT PERIMETER OF BLDG SHALL BE 1/2" OUTSIDE FACE OF STUD, TYP UNO. COORDINATE WITH ARCH DWGS.
17. ANCHOR BOLTS AT NON-SHEARWALLS SHALL BE AS INDICATED ON **2/S511** .
18. All WOOD STUD WALLS ARE TO BE 2x6 @ 16" CC UNO ON THE PLANS, SECTIONS, OR SCHEDULES. COORDINATE STUD SIZE WITH ARCH DWGS.

FOUNDATION LEGEND

- (Mk) FOOTING MARK. SEE FOOTING SCHEDULE FOR TYPICAL TOF ELEVATION. ELEVATION IS RELATIVE TO REFERENCE ELEVATION (0'-0").
- (Mk -X'-XX") FOOTING MARK WITH TOP OF FOOTING ELEVATION. ELEVATION IS RELATIVE TO REFERENCE ELEVATION (0'-0").
- CONCRETE CURB. VERIFY EXTENT w/ ARCH DWGS.
- CONCRETE HOUSEKEEPING PAD PER **12/S801** . SEE ARCH FOR EXTENT. SEE NOTE#11 FOR ADDL INFO.
- SLOPED AND/OR DEPRESSED SLAB. DEPRESS BUILDING PAD AND PROVIDE FULL SLAB AND BASE THICKNESS. SEE **9/S501** & **8/S501** . WHERE DEPRESSION IS GREATER THAN 2" AND ADJACENT TO BUILDING FOUNDATION ELEMENT IT MAY BE NECESSARY TO STEP FOOTING IN ORDER TO MAINTAIN MINIMUM FOOTING EMBEDMENT PER SECTIONS. CONTRACTOR TO COORDINATE IN FIELD.
- MECHANICAL UNIT. THE CONTRACTOR SHALL COORDINATE ALL MECHANICAL EQUIPMENT FOR SIZE & LOCATION WITH OTHER TRADES & THE STRUCTURAL DRAWINGS. UNIT SIZES & LOCATIONS SHOWN ARE APPROXIMATE.
- 8" CMU WALL. FOR REINFORCING, SEE **1/S516** AND CMU GENERAL NOTES. CONDUITS IN CMU TO BE PER CMU GENERAL NOTES.
- WOOD STRUCTURAL WALL.
- WOOD POST, 6x6 @ 6" NOMINAL WALLS
- (X') (Mk) X'-X" SHEAR WALL TYPE, EXTENT, AND ANCHOR BOLT LAYOUT, SEE **A/S512** FOR SCHEDULE, UNO. EXTENT INDICATES MINIMUM REQUIRED SHEAR WALL LENGTH.
- 2 (2)6 SIMPSON HOLDOWN LOCATION. REFERENCE NUMBER INDICATES HDU HOLDOWN TYPE. SEE **B/S512** & **4/S512** .

FRAMING PLAN NOTES

1. NOTES AND DETAILS ON SHEETS LABELED AS "GENERAL" OR "TYPICAL" ARE APPLICABLE TO ALL DRAWINGS, UNO.
2. VERIFY ALL BUILDING DIMENSIONS AND ELEVATIONS w/ ARCH DRAWINGS. NOTIFY THE ARCHITECT IMMEDIATELY IF THERE ARE ANY CONFLICTS w/ DIMENSIONS SHOWN.
3. DIMENSIONS SHOWN ARE TO CL OF COLUMN, FACE OF STUD.
4. DESIGN, FABRICATION AND INSTALLATION OF MANUFACTURED STAIRS IS BY OTHERS.
5. FOR GUIDELINES AND LIMITATIONS FOR SUPPORTING FROM STRUCTURE, SEE SPECIFICATIONS.
6. SEPARATION JOINT DIMENSIONS SHOWN ON PLAN INDICATE MINIMUM CLEAR DISTANCE REQUIRED BETWEEN ADJACENT BLDG ELEMENTS. WHERE BLDG FINISHES/FIRE PROTECTION OCCUR, CLEAR DIMENSION SHALL BE MAINTAINED BTWN THOSE ELEMENTS.
7. ALL WOOD STUD WALLS ARE TO BE 2x6 @ 16"CC UNO ON THE PLANS, SECTIONS, OR SCHEDULES. COORDINATE STUD SIZE WITH ARCH DWGS.
8. ROOF SHEATHING SHALL BE 15/32" (1/2" NOMINAL) APA RATED SHEATHING/ STRUCTURAL 1 GRADE CD w/ EXTERIOR GLUE. MIN SPAN RATING SHALL BE 24/0. LAY LONG DIMENSION PERPENDICULAR TO SUPPORTS. ENDS STAGGERED AS SHOWN ON PLAN. NAIL w/ 10d NAILS @ 6"CC EDGES, 12"CC FIELD UNO ON PLANS. WHERE BLOCKING IS NOTED, USE 2x4 FLAT AT ALL SHTG EDGES SUPPORTED IN Z2 CLIPS. USE PLYCLIPS AT MIDSPAN OF UNSUPPORTED ROOF SHEATHING EDGES.
9. ALIGN JOISTS OVER STUDS BELOW WHERE FRAMING IS PERPENDICULAR TO WALL.
10. PROVIDE AN ADDITIONAL JOIST UNDER INTERIOR PARTITION WALLS THAT ARE PARALLEL TO THE JOISTS.
11. PROVIDE JOIST HANGERS WHERE SPECIFIED ON PLANS, SECTIONS, OR WHERE JOIST IS NOT IN DIRECT BEARING. FOR JOIST HANGER SCHEDULE AND NOTES, SEE .
12. FOR WOOD BEAM TO HSS COLUMN CONNECTION, SEE **10/S514** TYP, UNO.
13. SPLICES AT CMST STRAPS SHALL BE LAPPED A MINIMUM OF 16" w/ NAILS DRIVEN THRU BOTH.
14. INSTALL STRAPS OVER SHTG UNO. STRAP NAILS MAY REPLACE TYP DIAPHRAGM NAILING.
15. WHERE HSS COLUMNS INTERRUPT PLATES, SPLICE PER **4/S516** .
16. SEE ARCH DRAWINGS FOR FLOOR TOPPING MATERIAL AND THICKNESS. MAX WEIGHT OF TOPPING SHALL NOT EXCEED 10 PSF.
17. SEE ARCH DWGS FOR INFORMATION REGARDING VENT OPENINGS AT BLOCKING AND SHEATHING.
18. WHERE EXTENT OF SHEAR WALL DOES NOT COINCIDE WITH EXTENT OF WALL FACE, PROVIDE GYPSUM BOARD FURRING TO PLANE OUT FINISHES. COORDINATE SIDE OF WALL TO BE SHEATHED WITH ARCH DRAWINGS, UNO.
19. WHERE FRAMING HARDWARE IS REQUIRED TO BE IN THE SAME PLANE AS THE WALL FINISHES, HARDWARE SHALL BE "LET-IN" TO FINISHES FOR A FLAT, SMOOTH APPEARANCE. TYPICAL ALL FLOORS.
20. VERIFY ALL FLOOR OR ROOF OPENING DIMENSIONS w/ ARCH & MECH DRAWINGS PRIOR TO STAIR FABRICATION. GENERAL CONTRACTOR IS RESPONSIBLE FOR COORDINATION AND LOCATION OF PLACEMENT OF BEAMS ADJACENT TO STAIR OPENINGS.
21. WHERE WOOD STUD WALLS ABUT MASONRY WALLS, PROVIDE 5/8"Ø ANCHOR BOLTS w/ 5" EMBED @ 24"CC & 6" FROM T&B @ STUD END.
22. SEE ARCH FOR LOCATION OF CRICKETS REQUIRED FOR DRAINAGE. ROOF SHEATHING BELOW SHALL BE CONTINUOUS.
23. GENERAL CONTRACTOR TO COORDINATE SKYLIGHT LOCATIONS WITH ROOF TRUSS MANUFACTURER AND ARCH.
24. SEE PRE-MANUFACTURED WOOD TRUSS NOTES FOR LOADING AND CONFIGURATION INFORMATION.

FRAMING LEGEND

- OPENING. LOCATE OPENING PER AMEP DRAWINGS. FOR SUPPORT SEE **S202** .
- CONCRETE CURB. SEE **10/S501**.
- CONCRETE WALL. SEE FOUNDATION PLAN FOR ADDL INFO.
- TOP OF WALL. TYPE INDICATED AT BASE OF WALL ONLY.
- CONCRETE COLUMN. SIZE INDICATED AT BASE LEVEL OF COLUMN ONLY.
- X'-XX" TOW TOP OF WALL ELEVATION ABOVE REFERENCE TOP OF CONCRETE (0'-0").
- SOLID GROUTED CMU WALL. SEE FOUNDATION PLAN FOR ADDL INFO.
- TOP OF WALL. TYPE INDICATED AT BASE OF WALL ONLY.
- WALL BELOW, SEE FOUNDATION OR FRAMING LEVEL BELOW FOR WALL TYPE.
- CMU COLUMN. SIZE INDICATED AT BASE LEVEL OF COLUMN ONLY.
- X'-XX" TOW TOP OF WALL ELEVATION ABOVE REFERENCE TOP OF CONCRETE (0'-0").
- WOOD STRUCTURAL WALL BELOW.
- (X') (Mk) X'-X" SHEAR WALL ABOVE; TYPE AND EXTENT, SEE **A/S512** FOR SCHEDULE, UNO. EXTENT INDICATES MINIMUM REQUIRED SHEAR WALL LENGTH.
- SHEAR WALL BELOW
- LSL 3 1/2" WIDE x 11 7/8" DEEP LAMINATED STRAND LUMBER BEAM, TYP UNO.
- LVL 1 3/4" WIDE x 11 7/8" DEEP LAMINATED VENEER LUMBER BEAM, TYP UNO.
- PSL 5 1/4" WIDE x 11 7/8" DEEP PARALLEL STRAND LUMBER BEAM, TYP UNO.
- C= HEIGHT OF CL OF BEAM CAMBER AS NOTED ON PLANS. WHERE C IS NOT NOTED, BEAMS ARE NOT CAMBERED. FABRICATE AND ERECT ALL BEAMS WITH NATURAL BEAM CAMBER UP WHERE NO CAMBER IS INDICATED ON PLANS.
- RT1 ROOF TRUSS TYPE AND EXTENT. FOR PROFILES SEE SHEET **S515**
- RGT ROOF GIRDER TRUSS. COORDINATE GIRDER TRUSS PROFILE WITH ROOF CONFIGURATION.
- RCT ROOF COLLECTOR TRUSS. COORDINATE COLLECTOR TRUSS PROFILE WITH ROOF CONFIGURATION.
- DBL DOUBLE JOIST. TYPE AND SIZE TO MATCH ADJACENT JOISTS. CONNECT PER NAILING SCHEDULE OR **4/S514** .
- HDR HEADER BELOW. SEE **2/S511** UNO ON PLAN.
- MST48 SIMPSON STRAP PER PLAN.
- 2 (2)6 SIMPSON HOLDOWN LOCATION. REFERENCE NUMBER INDICATES HDU HOLDOWN TYPE. SEE **B/S512** & **8/S512** .
- (Mk) TOP PLATE SPLICE. TYPE PER **3/S512** . WHERE NO INDICATION OCCURS, SEE **2/S511** .
- (Mk) STRAP
- (Mk) NAILING
- X'-XX" TOF TOP OF FRAMING ELEVATION (i.e. UNDERSIDE OF FLOOR SHTG) ABOVE REFERENCE TOP OF CONCRETE (0'-0") TYP, UNO.
- X'-XX" TOW TOP OF WALL ELEVATION ABOVE REFERENCE TOP OF CONCRETE (0'-0") (i.e. TOP OF DBL TOP PL, TYP UNO).
- WOOD POST, 6x6 STUDS @ 6" NOMINAL WALLS, TYP UNO.
- (A) POST IS ABOVE ONLY
- EXTENT OF BLOCKED DIAPHRAGM.
- AREA OF OVERBUILD FRAMING. ROOF SHEATHING BELOW SHALL BE CONTINUOUS.
- MECHANICAL UNIT. THE CONTRACTOR SHALL COORDINATE ALL MECHANICAL EQUIPMENT FOR SIZE & LOCATION WITH OTHER TRADES & THE STRUCTURAL DRAWINGS. UNIT SIZES & LOCATIONS SHOWN ARE APPROXIMATE.

NOTE:
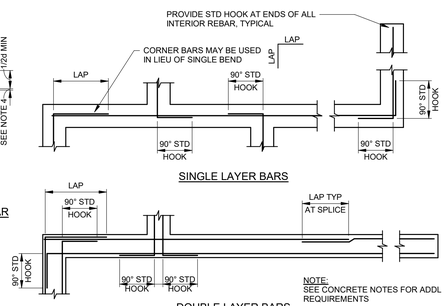
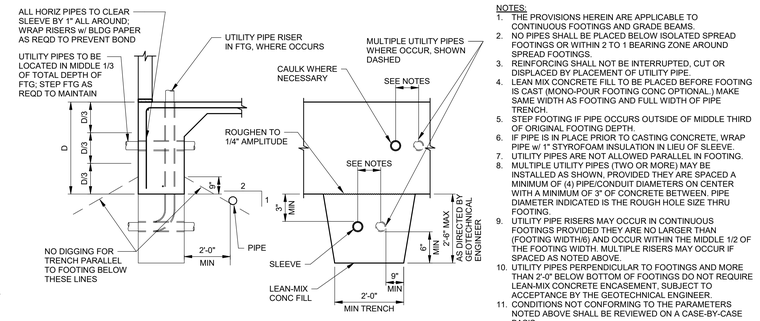
ALL HOOKS SHALL BE 90° OR 180° STANDARD HOOKS UNLESS OTHERWISE SHOWN OR NOTED.



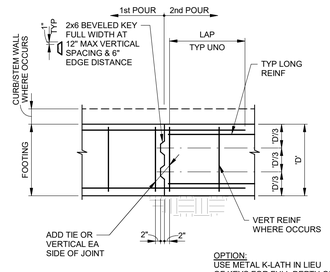
DO NOT EDIT

DETAIL 1/S501 — STANDARD REBAR HOOKS & BENDS
NO SCALE



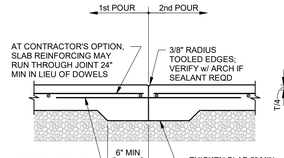
NOTES:
1. REINFORCING TO BE WELDED, EXCEPT ASTM A706, SHALL CONFORM TO THE MATERIAL PROPERTY REQUIREMENTS OF ANSI/AWS D1.4, NEWEST EDITION.
2. ALL PREHEATING AND WELDING SHALL BE DONE IN ACCORDANCE WITH ANSI/AWS D1.4, NEWEST EDITION. ALL ELECTRODES FOR WELDING SHALL COMPLY WITH AWS CODE, E80 SERIES MINIMUM FOR ASTM A706 GR60 AND E90 SERIES MINIMUM FOR ASTM A615 GR60. FOR HIGHER GRADE REINFORCING, REFER TO AWS D1.4, NEWEST EDITION, FOR ELECTRODE REQUIREMENTS.
3. ALL WELDING SHALL BE CONTINUOUSLY INSPECTED BY A QUALIFIED LABORATORY.
4. GAPS BETWEEN REBAR AND PLATE SHALL NOTE EXCEED 1/4d OR 3/16", WHICHEVER IS LESS.

DETAIL 2/S501 — REBAR WELDING
NO SCALE



NOTE:
SEE CONCRETE NOTES FOR ADDL REQUIREMENTS

DETAIL 3/S501 — INTERSECTION & CORNER REINF AT FTGS
NO SCALE



NOTES:
1. THE PROVISIONS HEREIN ARE APPLICABLE TO CONTINUOUS FOOTINGS AND GRADE BEAMS.
2. NO PIPES SHALL BE PLACED BELOW ISOLATED SPREAD FOOTINGS OR WITHIN 2 TO 1 BEARING ZONE AROUND SPREAD FOOTINGS.
3. REINFORCING SHALL NOT BE INTERRUPTED, CUT OR DISPLACED BY PLACEMENT OF UTILITY PIPE.
4. LEAN MIX CONCRETE FILL TO BE PLACED BEFORE FOOTING IS CAST (MOND-POUR FOOTING CONC OPTIONAL) MAKE SAME WIDTH AS FOOTING AND FULL WIDTH OF PIPE TRENCH.
5. STEP FOOTING IF PIPE OCCURS OUTSIDE OF MIDDLE THIRD OF ORIGINAL FOOTING DEPTH.
6. IF PIPE IS IN PLACE PRIOR TO CASTING CONCRETE, WRAP PIPE w/ 1" STYROFOAM INSULATION IN LIEU OF SLEEVE.
7. UTILITY PIPES ARE NOT ALLOWED PARALLEL IN FOOTING.
8. MULTIPLE UTILITY PIPES (TWO OR MORE) MAY BE INSTALLED AS SHOWN, PROVIDED THEY ARE SPACED A MINIMUM OF (4) PIPE/CONDUIT DIAMETERS ON CENTER WITH A MINIMUM OF 3" OF CONCRETE BETWEEN. PIPE DIAMETER INDICATED IS THE ROUGH HOLE SIZE THRU FOOTING.
9. UTILITY PIPE RISERS MAY OCCUR IN CONTINUOUS FOOTINGS PROVIDED THEY ARE NO LARGER THAN (FOOTING WIDTH/6) AND OCCUR WITHIN THE MIDDLE 1/2 OF THE FOOTING WIDTH. MULTIPLE RISERS MAY OCCUR IF SPACED AS NOTED ABOVE.
10. UTILITY PIPES PERPENDICULAR TO FOOTINGS AND MORE THAN 2'-0" BELOW BOTTOM OF FOOTINGS DO NOT REQUIRE LEAN-MIX CONCRETE ENCASEMENT, SUBJECT TO ACCEPTANCE BY THE GEOTECHNICAL ENGINEER.
11. CONDITIONS NOT CONFORMING TO THE PARAMETERS NOTED ABOVE SHALL BE REVIEWED ON A CASE-BY-CASE BASIS.

DETAIL 4/S501 — FOOTINGS AT UTILITY PIPES

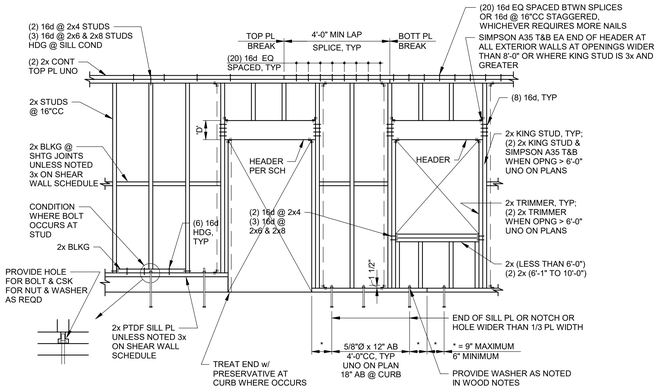
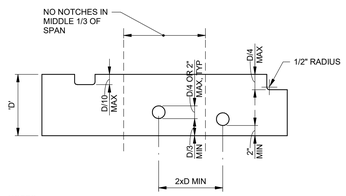
   3 OR MORE 2x MEMBERS ----------1/2" DIA BOLTS @ 12"CC STAGGERED
10. CEILING STRIPPING ----- HOLES SHALL BE PRE-DRILLED FOR NAILS AT ENDS OF STRIPPING BOARDS. WHERE CEILING IS PLASTER OR 5/8" GYPSUM USE ANNULAR RING NAILS (NO SLANT). — 1x ---------- (2)8d (1-SLANT); 2x ----------(2)16A (1-SLANT)
11. SHEAR WALL NAILING----------SEE **1/SS12** . ⚠1
12. FLOOR OR ROOF NAILING----------SEE PLAN NOTES AND **9/SS11**
13. NON-STRUCTURAL --------AT EDGES AND INTERIOR SIDING SUPPORTS — HDG CASING NAILS----------6d @ 6"CC
14. NON-STRUCTURAL ---------AT EDGES SHEATHING — AT FIELD — NAILS TO MATCH SHEAR WALLS @ 6"CC; NAILS TO MATCH SHEAR WALLS @ 12"CC ⚠1
15. USE DEFORMED SHANK NAILS FOR ALL FLOOR SHEATHING.
16. ALL EXPOSED FASTENERS SHALL HAVE A ZINC-COATING CORROSION RESISTIVE SURFACE.
17. NAILS USED INTO PRESSURE TREATED OR FIRE RETARDANT MATERIAL SHALL BE HOT-DIPPED GALVANIZED PER ASTM A123 OR STAINLESS STEEL.

NOTES:
(#) INDICATES CORRESPONDING NOTE FROM NAILING SCHEDULE ON GENERAL NOTES SHEET. THIS IS THE MINIMUM REQUIRED NAILING, SHEAR WALL SCHEDULE NAILING SUPERCEDES THIS DETAIL.
(X) INDICATES CORRESPONDING NAILING FROM SHEAR WALL SCHEDULE **2/SS11**.

DETAIL 3/S511 — STRUCTURAL STUD FRAMING CONDITIONS — NO SCALE



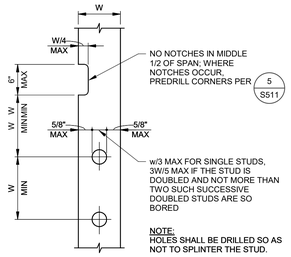
NOTES:
(#) INDICATES CORRESPONDING NOTE FROM NAILING SCHEDULE. THIS IS THE MINIMUM REQUIRED NAILING, SHEAR WALL SCHEDULE NAILING SUPERCEDES THIS DETAIL.
(X) INDICATES CORRESPONDING NAILING FROM SHEAR WALL SCHEDULE . 610SD001



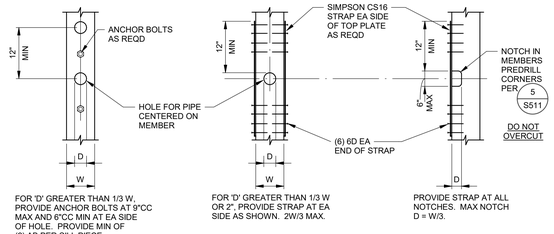
DETAIL 1/S511 — TYPICAL NAILING — NO SCALE

HEADER SCHEDULE	
WIDTH OF OPENING	NOMINAL HEADER DEPTH 'D'
0 TO 4'-0"	8"
4'-1" TO 6'-0"	10"
6'-1" TO 8'-0"	12"
> 8'-0"	SEE PLAN
TYP UNO ON PLAN OR IN PLAN NOTES	

NOTES:
1. HEADER SHALL BE FULL WIDTH OF STUD WALL.
2. PROVIDE POSTS & ANCHORS AT HOLDOWNS WHERE OCCUR PER PLAN, SEE **4/SS12**
3. AT OPENINGS FOR MECH DUCTS, SEE **4/SS12**
4. FOR SHEAR WALL NAILING, SEE SCH AND **4/SS12**
5. LOCATE TOP PLATE BREAKS OVER STUDS.

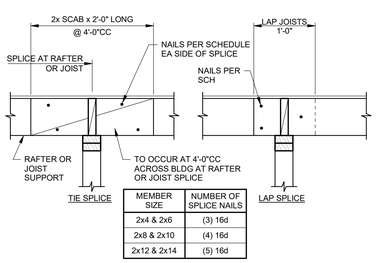


DETAIL 2/S511 — STRUCTURAL WALL FRAMING — NO SCALE



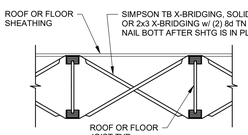
NOTES:
1. PREDRILL CORNERS OF NOTCHES SO AS NOT TO OVER CUT.
2. NOTCHES IN THE BOTTOM OF JOISTS ALLOWED ONLY WHERE SPECIFICALLY SHOWN ON DRAWINGS.
3. APPLIES TO SAWN LUMBER MEMBERS ONLY. NO NOTCHES ALLOWED IN OTHER TYPES OF MEMBER UNLESS SPECIFICALLY DETAILED IN THE DRAWINGS.

DETAIL 5/S511 — NOTCHES IN JOISTS & HEADERS — NO SCALE



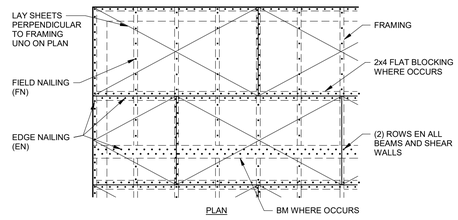
NOTE:
HOLES SHALL BE DRILLED SO AS NOT TO SPLINTER THE STUD.

DETAIL 4/S511 — HOLE OR NOTCH AT STUD — NO SCALE



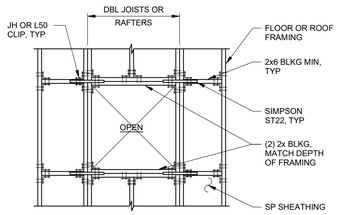
NOTE:
FOR MULTIPLE HOLES AND NOTCHES, MAINTAIN 18" CLEAR MIN AND EXTEND STRAP 12" PAST LAST HOLE OR NOTCH.

DETAIL 6/S511 — HOLE OR NOTCH THRU PLATES — NO SCALE



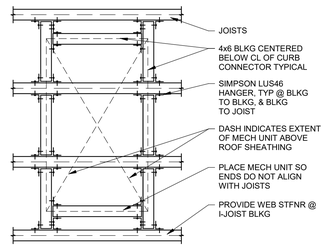
MEMBER SIZE	NUMBER OF SPLICE NAILS
2x4 & 2x6	(3) 16d
2x8 & 2x10	(4) 16d
2x12 & 2x14	(5) 16d

DETAIL 7/S511 — JOIST & RAFTER SPLICE — NO SCALE



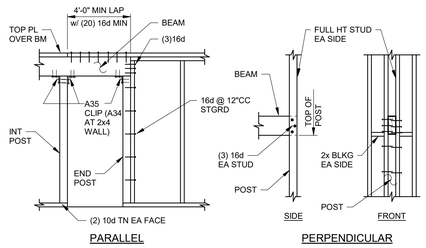
NOTE:
SIMILAR AT SOLID SAWN FRAMING. DETAIL OCCURS AT 8'-0"CC AT FLOORS AND 10'-0"CC AT ROOFS. OMIT AT SOLID SAWN ROOF RAFTERS 8" DEEP AND SMALLER, UNO.

DETAIL 8/S511 — CROSS BRIDGING — NO SCALE



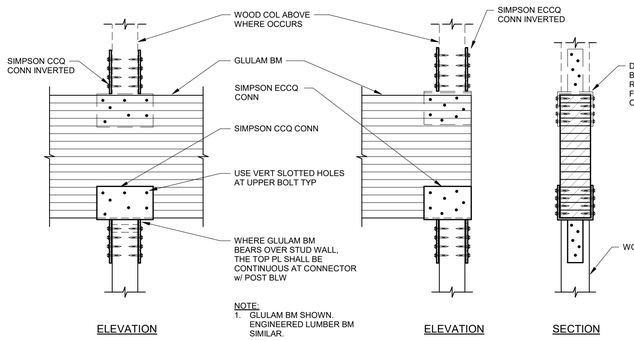
NOTES:
1. SEE PLAN FOR SHEATHING TYPE AND NAIL SIZE AND SPACING.
2. PROVIDE EN AT ALL SHEET EDGES, BEAMS, SHEAR WALLS, BLOCKING, AND MECHANICAL UNITS.
3. EN SHALL BE PER PLAN.
   FN SHALL BE @ 12"CC. NAIL SIZE TO MATCH EN.
4. PROVIDE FLAT BLOCKING AND EN AT ALL UNSUPPORTED EDGES WHERE BLOCKING AND NAILING ARE INDICATED ON PLAN.
5. STAGGER SP JOINTS AS SHOWN. MINIMUM PANEL DIMENSION IN EITHER DIRECTION IS 24".
6. EN SHALL BE 10d NAILS, UNO.
7. FRAMING AT PANEL EDGES, SHALL BE 3x WHERE NAILS ARE SPACED < 3"CC.
8. ALL 3x AND GREATER MATERIAL IN DIAPHRAGMS SHALL BE LESS THAN 19% MOISTURE CONTENT UNLESS SPECIFICALLY ALLOWED BY SEOR IN WRITING.

DETAIL 9/S511 — FLOOR & ROOF NAILING — NO SCALE



NOTE:
OPENINGS TO BE 4'-0" SQUARE MAXIMUM
SPACING NO CLOSER THAN 6'-0"CC

DETAIL 10/S511 — OPENING IN FLOOR OR ROOF — NO SCALE



NOTE:

I-JOIST
6405N001

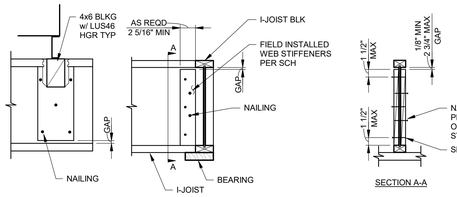
FLAT ROOF DESIGN LOAD 16 PSF DL 20 PSF LL

SLOPPED ROOF DESIGN LOAD 17 PSF DL 20 PSF LL

NET WIND UPLIFT LOAD (0.6D+0.6W) FOR ZONE 1' -2 PSF

NET WIND UPLIFT LOAD (0.6D+0.6W) FOR ZONE 1 -6 PSF

NET WIND UPLIFT LOAD (0.6D+0.6W) FOR ZONE 2 & 3 -10 PSF



WIND LOAD ZONES DEFINED IN ASCE 7-16 FIG 30.3

DISCONTINUITY DISTANCE 'A' = 8.4 FT.

1. I-JOISTS AS INDICATED ON DRAWINGS ARE I-LEVEL (OR RED-BUILT) DESIGNATIONS AND ARE FOR REFERENCE TO INDICATE REQUIRED DEPTH, SPACING AND CAPACITY ONLY. SUBMIT ALLOWABLE LOAD TABLES AND ICC-ESR FOR EQUIVALENT I-JOIST AND HARDWARE REVIEW BY DIRECT COMPARISON. FOR MINIMUM MATERIAL PROPERTIES AT NORMAL DURATION SEE TABLE BELOW.

JOIST TYPE	DEPTH	FLANGE	FLANGE GRADE	WEB	RESIST MOMENT	RESIST SHEAR	MIN E/x10^6
-	"	"X"	2.0DF	7/16"	'#'	#	#IN²
-	"	"X"	2.0DF	7/16"	'#'	#	#IN²
-	"	"X"	2.0DF	7/16"	'#'	#	#IN²
-	"	"X"	2.0DF	7/16"	'#'	#	#IN²
-	"	"X"	2.0DF	7/16"	'#'	#	#IN²

2. CHORD MATERIAL SHALL BE LAMINATED VENEER LUMBER (LVL) OR MACHINE STRESS RATED LUMBER WITH A MINIMUM SPECIFIC GRAVITY OF 0.50.
3. WEB MATERIAL SHALL BE OSB.
4. DESIGN AND FABRICATION SHALL CONFORM TO THE MANUFACTURERS ICC-ESR.
5. ALLOWABLE STRESS INCREASE FOR LOAD DURATION SHALL BE:
   WIND/SEISMIC - 60% ROOF - 25% SNOW - 15% FLOOR - 0%
6. I-JOIST SHOP DRAWINGS AND CALCULATIONS SHALL BE SUBMITTED TO THE ARCHITECT AND/OR STRUCTURAL ENGINEER FOR REVIEW PRIOR TO FABRICATION. DRAWINGS SHALL BE "STAND ALONE" WITH NO REFERENCES TO STRUCTURAL PLANS OR DETAILS. DETAILING FOR INSTALLATION SHALL BE COMPLETE. DUPLICATION (I.E. PHOTOCOPYING) OF DESIGN DRAWINGS IS NOT ACCEPTABLE.
7. I-JOIST SHOP DRAWINGS SHALL DETAIL THE REQUIRED BRIDGING AT ANY UNBRACED CHORD IN COMPRESSION UNDER ANY APPLICABLE LOAD COMBINATION. SPACING OF BRIDGING SHALL BE AS REQUIRED BY MANUFACTURER'S ICC REPORT OR ENGINEERING ANALYSIS.
8. MANUFACTURER TO PROVIDE LOCATIONS WHERE WEB STIFFENERS ARE REQUIRED (AT EACH SIDE OF WEB) AS PART OF THE I-JOIST SHOP DRAWINGS
9. CALCULATIONS SHALL BE SIGNED BY A PROFESSIONAL ENGINEER REGISTERED IN THE STATE IN WHICH THE PROJECT IS LOCATED.
10. I-JOIST DESIGNER SHALL INCORPORATE ONE 400# (150#DL, 250#LL NON-CONCURRENT) VERTICAL LOAD ON THE BOTTOM CHORD OF ALL JOISTS FROM ONE SPRINKLER LINE. JOIST MUST BE DESIGNED TO CARRY THE LOAD AT ANY POINT.
11. I-JOISTS SHALL BE DESIGNED FOR ALL CONCENTRATED LOADS SHOWN ON DRAWINGS IN ADDITION TO THE UNIFORM LOADINGS SHOWN ABOVE.
12. SEE FRAMING PLANS AND MECHANICAL PLANS FOR LOCATIONS AND WEIGHTS OF MECHANICAL UNITS. COORDINATE ADDITIONAL EQUIPMENT LOADS WITH THE MECHANICAL CONTRACTOR PRIOR TO FABRICATION.
13. FLOOR JOISTS SHALL BE DESIGNED FOR A MAXIMUM L/VE LOAD DEFLECTION OF L/360 AND TOTAL LOAD DEFLECTION OF L/240. ROOF JOISTS SHALL BE DESIGNED FOR A MAXIMUM LIVE LOAD DEFLECTION OF L/240 AND A MAXIMUM TOTAL LOAD DEFLECTION OF L/180. IF ROOF JOISTS SUPPORT PLASTER CEILINGS A MAXIMUM TOTAL LOAD DEFLECTION OF L/240 IS REQUIRED.
14. PROVIDE FULL HEIGHT BLOCKING AND/OR RIM JOIST AT ALL BOTTOM CHORD BEARING CONDITIONS AND WHERE NOTED ON DRAWINGS.
15. GENERAL CONTRACTOR TO PROVIDE TEMPORARY ERECTION BRACING AS REQUIRED BY MANUFACTURER'S ICC-ESR.
16. MANUFACTURER TO VERIFY AND GENERAL CONTRACTOR TO APPROVE ALL DIMENSIONS REQUIRING COORDINATION BETWEEN STRUCTURAL DRAWINGS WITH ARCHITECTURAL DRAWINGS. ADDITIONALLY, GENERAL CONTRACTOR SHALL VERIFY SUPPORT DIMENSIONS AND WALL LAYOUT IN FIELD PRIOR TO FABRICATION.
17. MANUFACTURER TO COORDINATE I-JOIST LAYOUT WITH PLUMBING DRAWINGS. PROVIDE ADDITIONAL I-JOIST AS REQUIRED TO MAINTAIN I-JOIST SPACING LIMITS EACH SIDE OF PIPE OR FIXTURE.
18. PROVIDE AN ADDITIONAL I-JOIST UNDER INTERIOR PARTITION WALLS THAT ARE PARALLEL TO THE I-JOISTS WHERE WALL LENGTH IS GREATER THAN 1/3 OF THE JOIST SPAN AND WHERE JOIST IS OFFSET UP TO WIDTH OF WALL.
19. WHERE DOUBLE I-JOISTS ARE REQUIRED OR INDICATED ON DESIGN DRAWINGS PROVIDE LOAD TRANSFER PER DOUBLE I-JOIST ATTACHMENT DETAIL **4/S514**.
20. FIRE SPRINKLER INSTALLER SHALL USE CONNECTORS WITH ICC APPROVAL.
21. CONTRACTOR TO PROVIDE BEVELED WOOD PLATES, BEAMS, NAILERS ETC. AT ALL SLOPED BEARING CONDITIONS 1/4:12 OR GREATER.
22. ALLOWABLE PENETRATIONS IN I-JOISTS SHALL BE COORDINATED WITH AND APPROVED BY I-JOIST MANUFACTURER PRIOR TO CONSTRUCTION. ALLOWABLE PENETRATIONS IN I-JOISTS SHALL BE PER **5/S514**.

1. **DO NOT** CUT, DRILL, OR NOTCH FLANGES.
2. **DO NOT** CUT HOLES LARGER THAN 1 1/2" IN CANTILEVER WITHOUT CONSULTING MFR.
3. SEE I-JOIST MANUFACTURER FOR ALLOWABLE HOLE SIZES AND MINIMUM DISTANCE BETWEEN HOLES AND BETWEEN HOLES AND NEAREST SUPPORT. ALLOWABLE HOLE SIZES AND MINIMUM DISTANCES MAY VARY BASED ON SUPPORT AND LOADING CONDITIONS.
4. MAINTAIN MINIMUM DISTANCE FROM BOTH SUPPORTS.
5. HOLES SHOULD BE LOCATED VERTICALLY IN THE WEB PER THE MFR TOLERANCES. LEAVE A MINIMUM OF 1/8" OF WEB AT TOP AND BOTTOM OF HOLE. DO NOT CUT FLANGES.
6. WHERE 1 1/2" KNOCKOUTS ARE PRESENT, CONFIRM WITH THE MFR THAT THEY DO NOT AFFECT HOLE PLACEMENT.

BID SET (PRELIMINARY)

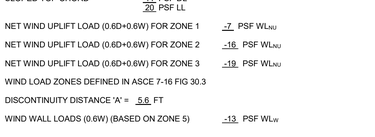
PRE-MANUFACTURED WOOD TRUSS NOTES
6505N001

TYP ROOF DESIGN LOADS UNO, SEE **3/S515** .

SLOPED TOP CHORD 11 PSF DL
20 PSF LL

NET WIND UPLIFT LOAD (0.6D+0.6W) FOR ZONE 1 -7 PSF WL_{NU}

NET WIND UPLIFT LOAD (0.6D+0.6W) FOR ZONE 2 -16 PSF WL_{NU}

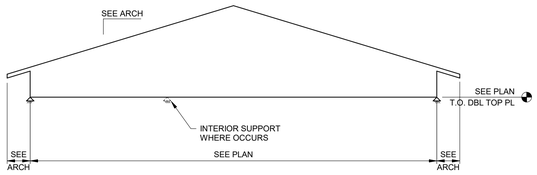


NET WIND UPLIFT LOAD (0.6D+0.6W) FOR ZONE 3 -19 PSF WL_{NU}

WIND LOAD ZONES DEFINED IN ASCE 7-16 FIG 30.3

DISCONTINUITY DISTANCE 'A' = 5.6 FT

WIND WALL LOADS (0.6W) (BASED ON ZONE 5) -13 PSF WL_W



1. ALL MEMBERS SHALL BE 2x4 MIN UNO.
2. ALL TOP CHORD MEMBERS SHALL BE OF MATERIAL w/ A MINIMUM SPECIFIC GRAVITY OF 0.50.
3. PLATE MATERIAL SHALL BE ASTM A-446 GRADE A OR BETTER.
4. DESIGN AND FABRICATION SHALL CONFORM TO THE CODE AS DESIGNATED IN THE DESIGN CRITERIA NOTES AND ANSI/TPI 1-2014.
5. DESIGN AND CONSTRUCTION OF CONNECTIONS SHALL BE IN ACCORDANCE WITH PUBLISHED APPROVALS OF MANUFACTURER'S ICC-ESR. HEEL JOINT DESIGN SHALL CONSIDER THE EFFECTS OF ECCENTRIC LOADING IN ACCORDANCE WITH TRUSS PLATE INSTITUTE (TPI).
6. TRUSS DESIGNER SHALL OVERSIZE PLATES FOR CHORD MEMBERS TO ACCOUNT FOR WOOD DEFECTS LIKE KNOTS, KNOT HOLES AND GREATLY DISTORTED GRAINS. MAXIMUM ALLOWABLE DEFECT SIZE PER MEMBER SHALL BE 2 SQUARE INCHES. NO DEFECTS ALLOWED UNDER PLATES FOR WEB MEMBERS.
7. STRUCTURAL DESIGN OF BEAMS, POSTS & FOUNDATIONS SUPPORTING ROOF TRUSSES HAS BEEN BASED ON FRAMING CONFIGURATIONS SHOWN ON PLANS. DEVIATIONS TO THE FRAMING CONFIGURATIONS SHOWN WILL REQUIRE ADDITIONAL DESIGN COORDINATION AND POTENTIAL REVISIONS TO FRAMING AND FOUNDATIONS. ANY REQUIRED REVISIONS TO THE STRUCTURAL DRAWINGS WILL BE PREFORMED ON A TIME AND MATERIAL BASIS AND WILL BE CHARGED TO THE GENERAL CONTRACTOR.
8. ALL HARDWARE REQUIRED FOR CONNECTING TRUSSES (JACK TO HIP, HIP TO GIRDER OR GIRDER TO GIRDER, ETC.) SHALL BE DESIGNED, DETAILED AND PROVIDED BY TRUSS DESIGNER/MANUFACTURER.
9. TRUSS DESIGNER TO ACCOUNT FOR THE WEIGHT AND LATERAL RESTRAINT FORCES OF ALL EQUIPMENT IN THE DESIGN OF ALL TRUSSES WHICH SUPPORT SUCH EQUIPMENT. SEE OTHER DISCIPLINES DRAWINGS FOR WEIGHTS AND DETAILING. ADDITIONALLY, TRUSS DESIGNER SHALL INCORPORATE WEIGHT AND SEISMIC RESTRAINT FORCES OF ALL PIPING AND CONDUIT IN TRUSS DESIGN. SEE OTHER DISCIPLINES DWGS FOR TYPE AND LOCATION.
10. TRUSS DESIGNER SHALL INCORPORATE ONE 400# (150#DL, 250#LL NON-CONCURRENT) VERTICAL LOAD ON THE BOTTOM CHORD OF ALL TRUSSES FROM ONE SPRINKLER LINE. TRUSS MUST BE DESIGNED TO CARRY THE LOAD AT ANY POINT ALONG THE TOP AND BOTTOM CHORDS.
11. TRUSS DESIGNER SHALL INCORPORATE COLLECTOR LOADS FOR ALL COLLECTOR TRUSSES SHOWN ON PLANS. COLLECTOR LOADS ARE SHOWN @ 0.7E OR 0.6W (ASD FORCE LEVELS). WHERE LOAD NOT INDICATED ON PLAN, COLLECTOR LOAD = 2500 LBS MIN. TRUSS MUST BE DESIGNED TO RESIST FULL COLLECTOR LOAD APPLIED AXIALLY AT ANY POINT ALONG THE TOP OR BOTTOM CHORD AND TO TRANSFER THE COLLECTOR LOAD THROUGH WEB MEMBERS AND CONNECTIONS FROM TOP CHORD DOWN TO BOTTOM CHORD (APPLIED IN POUNDS PER FOOT) ALONG THE LENGTH OF THE TRUSS.
12. THE STRUCTURAL DRAWINGS GENERALLY INDICATE THE WIND UPLIFT CONNECTION DETAILING AT THE TRUSS SUPPORTS. TRUSS MANUFACTURER SHALL REVIEW THE STRUCTURAL DRAWINGS FOR UPLIFT DESIGN AND SHALL MAKE A STATEMENT ON THE SHOP DRAWING SUBMITTAL STATING SUCH. ANY CONNECTIONS THAT ARE INCOMPATIBLE WITH THE TRUSS SYSTEM SHALL BE BROUGHT TO THE ATTENTION OF THE STRUCTURAL ENGINEER FOR REVIEW AND INPUT DURING THE SHOP DRAWING SUBMITTAL PROCESS.
13. TRUSS MANUFACTURER SHALL PROVIDE DESIGNS THAT DO NOT EXCEED A BEARING STRESS OF 600 PSI AT THE REACTION POINTS. AT TRUSS MANUFACTURER'S OPTION, BEARING PLATES OR OTHER CONNECTORS AS REQUIRED TO REDUCE BEARING STRESS AT SUPPORTING MEMBER TO 600 PSI MAX MAY BE DESIGNED, DETAILED, AND SUBMITTED FOR REVIEW TO THE ARCHITECT/STRUCTURAL ENGINEER.
14. ROOF JOISTS SHALL BE DESIGNED FOR A MAXIMUM TOTAL LOAD DEFLECTION OF L/180. IF ROOF JOISTS SUPPORT PLASTER CEILINGS A MAXIMUM TOTAL LOAD DEFLECTION OF L/240 IS REQUIRED.
15. TRUSS DESIGNER/MANUFACTURER SHALL CLEARLY DESIGNATE TRUSS MEMBER BRACING LOCATIONS IN THE SHOP DRAWINGS.
16. TRUSS MANUFACTURER TO VERIFY ALL DIMENSIONS SHOWN ON STRUCTURAL DRAWINGS WITH ARCHITECTURAL DRAWINGS AND IN FIELD WITH WALL LAYOUT PRIOR TO FABRICATION. PROVIDE SHOP DRAWINGS WHICH SHALL INCLUDE PLAN DRAWING SHOWING TRUSS LOCATIONS AND TRUSS PROFILES, WITH DIMENSIONS REVIEWED AND APPROVED BY GENERAL CONTRACTOR, PRIOR TO FABRICATION.
17. TRUSS LAYOUT AND PROFILE DRAWINGS, CALCULATIONS AND THE LATEST ICC APPROVED TEST DATA FOR TRUSS METAL PLATE CONNECTORS SHALL BE SUBMITTED TO THE ARCHITECT AND/OR ENGINEER FOR REVIEW AND SHALL ADDRESS ALL COMMENTS FROM THAT REVIEW PRIOR TO SUBMITTAL TO THE BUILDING DEPARTMENT.
18. TRUSS LAYOUT, PROFILE DRAWINGS AND CALCULATIONS FOR TRUSS DESIGNS AND ANY BEARING DETAILING PER NOTE 13 SHALL BE SIGNED BY A PROFESSIONAL ENGINEER REGISTERED IN THE STATE IN WHICH THE PROJECT IS LOCATED. IT SHALL BE THE RESPONSIBILITY OF THE MANUFACTURER TO OBTAIN BUILDING DEPARTMENT APPROVAL PRIOR TO FABRICATION.
19. BUILT UP GIRDER TRUSSES SHALL BE LAMINATED USING 1/2"Ø BOLTS AT 24"CC MAXIMUM THROUGH ALL MEMBERS (OR OTHER METHOD BY WRITTEN REQUEST).
20. GABLE END TRUSSES SHALL HAVE 2x VERTICALS AT 16"CC TYPICAL UNLESS NOTED OTHERWISE. WHERE GABLE END TRUSSES ARE REQUIRED TO SPAN OVER OPENINGS OR TRANSFER COLLECTOR LOADS VERTICALS SHALL BE INFILLED AROUND TYPICAL WEB MEMBERS. TRUSS MANUFACTURER SHALL DESIGN, DETAIL AND PROVIDE INTERMEDIATE BRACING OF THE GABLE TRUSS WEBS AND VERTICALS AS REQUIRED TO RESIST OUT-OF-PLANE WIND LOADS.
21. GENERAL CONTRACTOR TO DETERMINE AND PROVIDE TEMPORARY ERECTION BRACING AS REQUIRED.
22. FIRE SPRINKLER INSTALLER SHALL USE CONNECTORS WITH ICC APPROVAL.

LEGEND:
DL = DEAD LOAD
LL = LIVE LOAD
WL_{NU} = WIND NET UPLIFT LOAD
DLm = DEAD LOAD AT MECHANICAL UNIT, SEE PLAN FOR WEIGHT AND VERIFY LOCATIONS w/ MECH
WLw = WIND LOAD AT WALL (APPLY WALL LOAD TO GABLE TRUSS VERTICAL AND WEB ELEMENTS)

NOTE:
SEE PLANS, SECTIONS AND DETAILS FOR ADDITIONAL LOADS.

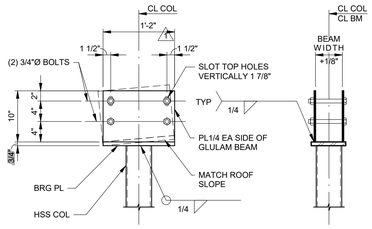
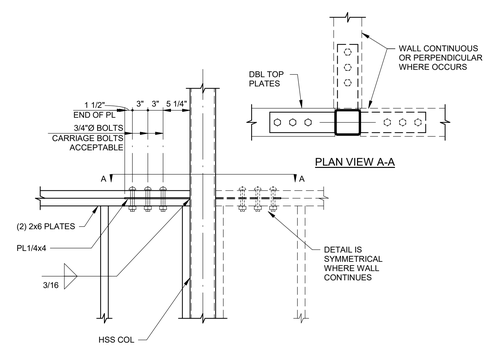
BID SET (PRELIMINARY)



REINFORCING - EACH FACE

REINFORCING - CENTERED



1. REFER TO CMU GENERAL NOTES ON SHEET FOR CONCRETE BLOCK UNITS, MORTAR AND GROUT REQUIREMENTS.
2. VERTICAL REINFORCING:
   A. DOWELS WITH STANDARD 90° HOOKS INTO THE FOUNDATION SHALL MATCH AND LAP VERTICAL REINFORCING.
   B. WHERE VERTICAL REINFORCING IS LOCATED AT EACH FACE, THE BARS DO NOT NEED TO BE PLACED IN THE SAME CELL, BUT THE SPACING NOTED NEEDS TO BE MAINTAINED FOR EACH SIDE OF THE WALL.
3. HORIZONTAL REINFORCING:
   A. INSTALL STD 180° HOOK AROUND VERTS AT WALL ENDS AND JOINTS IN ALL HORIZONTAL REINFORCING BARS.
   B. WHERE THE VERTICAL BARS ARE CENTERED IN THE WALL, HORIZONTAL REINFORCING BARS SHALL BE LOCATED ON ONE SIDE (OR BOTH SIDES) OF THE VERTICAL BARS, ALLOWING THE VERTICAL BARS TO BE CENTERED.
   C. WHERE THE VERTICAL BARS ARE AT EACH FACE IN THE WALL, HORIZONTAL REINFORCING BARS SHALL BE LOCATED TOWARD THE CENTER OF THE CELL, ALLOWING THE VERTICAL BARS TO BE LOCATED BETWEEN THE HORIZONTAL REINFORCING AND THE NEAREST FACE OF THE WALL.

DETAIL 1/S516 NO SCALE
CMU WALL REINFORCING

NOTES:
1. SPLICE BEAMS AT CL OF COLUMN EXCEPT AT CANTILEVER CONDITION.
2. INCREASE WIDTH OF BEARING PLATE AS REQUIRED WHERE COLUMN IS WIDER THAN SUPPORTED BEAM.

BID SET (PRELIMINARY)

GENERAL NOTES

1. PLANS ARE NOT FOR CONSTRUCTION UNTIL APPROVED BY THE AUTHORITY HAVING JURISDICTION. THE CONTRACTOR SHALL NOT ORDER ANY MATERIALS OR INSTALL ANY EQUIPMENT, PIPING, ETC. UNTIL PLANS ARE APPROVED BY THE AUTHORITY HAVING JURISDICTION.
2. ALL WORK SHALL BE IN ACCORDANCE WITH ALL FEDERAL, STATE, CITY AND LOCAL CODES AND ORDINANCES.
3. THE CONTRACTOR SHALL READ ALL OF THE GENERAL NOTES, SPECIFICATIONS AND PLANS AND SHALL BE SATISFIED TO THEIR TRUE MEANING AND INTENT AND SHALL BE RESPONSIBLE FOR COMPLYING WITH EACH. WHEREVER TWO OR MORE SPECIFICATIONS MAY CONFLICT, THE MORE STRINGENT SPECIFICATION SHALL TAKE PRECEDENCE.
4. IT IS INTENDED THAT THESE PLANS AND SPECIFICATIONS REQUIRE ALL LABOR AND MATERIAL NECESSARY AND PROPER FOR THE WORK CONTEMPLATED AND THAT THIS WORK BE COMPLETED IN ACCORDANCE WITH THEIR TRUE INTENT AND PURPOSE. THE CONTRACTOR SHALL NOTIFY THE OWNER'S REPRESENTATIVE IMMEDIATELY REGARDING ANY DISCREPANCIES OR AMBIGUITIES THAT MAY EXIST IN THE PLANS AND/OR SPECIFICATIONS PRIOR TO SUBMITTING BID. THE OWNER'S REPRESENTATIVE AND THE ENGINEER'S INTERPRETATION THEREOF SHALL BE CONCLUSIVE.
5. THE CONTRACTOR SHALL BE HELD RESPONSIBLE FOR ANY FIELD CHANGES MADE WITHOUT PRIOR WRITTEN AUTHORIZATION FROM THE OWNERS REPRESENTATIVE.
6. CONTRACTOR SHALL INSTALL ALL PIPING AND DUCTWORK SYSTEMS TO BEST SUIT FIELD CONDITIONS, AND COORDINATE WITH THE INSTALLATION WORK OF OTHER TRADES. THE DRAWINGS ARE DIAGRAMMATIC AND SHALL NOT BE SCALED TO DETERMINE EXACT LOCATION OF PIPING. NOTIFY CONSTRUCTION MANAGER OF ANY DEVIATIONS FROM THESE DRAWINGS PRIOR TO FABRICATION AND/OR INSTALLATION.
6. LOCATIONS AND DIMENSIONS OF EQUIPMENT, PIPING, AND THEIR SUPPORTS ARE SHOWN DIAGRAMMATICALLY AND SHALL NOT BE SCALED TO DETERMINE EXACT LOCATION OF PIPING OR DUCTWORK. ACTUAL DIMENSIONS AND LOCATIONS ARE DEPENDENT ON MATERIAL SUPPLIED BY CONTRACTORS. CONTRACTORS SHALL PROVIDE OR DETERMINE DIMENSIONS AND PROVIDE LAYOUT DRAWINGS FOR COORDINATION WITH OTHER TRADES IN ACCORDANCE WITH THE SPECIFICATIONS.
7. CONTRACTOR SHALL REMOVE RUBBISH WASTE MATERIALS ON DAILY BASIS AND PROTECT AREAS FROM DAMAGE WHICH MAY OCCUR DURING CONSTRUCTION. CONTRACTOR SHALL BE RESPONSIBLE FOR ANY DAMAGE WHICH MAY OCCUR.
8. ALL WORK SHOWN ANYWHERE ON THE DRAWINGS IS INCLUDED; SHOULD AN ITEM (SUCH AS A VALVE) BE SHOWN ON A DETAIL OR SCHEMATIC BUT NOT ON A PLAN VIEW OR VICE VERSA, IT MUST BE PROVIDED AS THOUGH IT WERE SHOWN IN ALL PLACES ON THE DRAWINGS.
9. CONTRACTOR SHALL FURNISH ALL NECESSARY STRUCTURES, INSERTS, SLEEVES, HANGING DEVICES, MISCELLANEOUS ANGLES, CHANNELS, UNISTRUT ETC. FOR INSTALLATION OF MECHANICAL AND PLUMBING EQUIPMENT, DUCTWORK AND PIPING, ETC. CONTRACTOR SHALL COORDINATE WITH GENERAL CONTRACTOR AND ALL BUILDING TRADES TO AVOID CONFLICTS AND TO MAINTAIN EQUIPMENT ACCESS AND SERVICEABILITY.
10. EACH MECHANICAL APPLIANCE SHALL BE APPROVED BY THE ADMINISTRATIVE AUTHORITY FOR SAFE USE OR COMPLY WITH APPLICABLE NATIONALLY RECOGNIZED STANDARDS AS EVIDENCED BY THE LISTING AND LABEL OF AN APPROVED AGENCY.
11. THERMOSTAT SETPOINTS SHALL BE PER CALIFORNIA T-24 REQUIREMENT. ANY DEVIATION FROM THESE SETPOINTS BECOMES THE RESPONSIBILITY OF THE USER OR CONTRACTOR.
12. SEISMIC BRACING FOR PIPING CARRYING HAZARDOUS OR COMBUSTIBLE MATERIALS (SUCH AS NATURAL LINES) SHALL BE PROVIDED FOR ALL PIPES > 1" DIAMETER IN SIZE. BRACING SHALL BE PER CBC SECTION 1616A.1.26. ACCEPTABLE SEISMIC BRACING DETAILS INCLUDE THOSE SHOWN IN EATON/COOPER B-LINE OPM-0052-13.
13. SEISMIC BRACING FOR PIPING CARRYING HAZARDOUS OR COMBUSTIBLE MATERIALS (SUCH AS WATER LINES) SHALL BE PROVIDED FOR ALL PIPES > 3" DIAMETER IN SIZE. BRACING SHALL BE PER CBC SECTION 1616A.1.26. ACCEPTABLE SEISMIC BRACING DETAILS INCLUDE THOSE SHOWN IN EATON/COOPER B-LINE OPM-0052-13.

ACCEPTANCE TESTING REQUIREMENT

THE CALIFORNIA ENERGY CODE SECTION 10-103 REQUIRES ACCEPTANCE TESTING ON ALL NEWLY INSTALLED LIGHTING CONTROLS, MECHANICAL SYSTEMS, ENVELOPES, AND PROCESS EQUIPMENT AFTER INSTALLATION AND BEFORE PROJECT COMPLETION. AN ACCEPTANCE TEST IS A FUNCTIONAL PERFORMANCE TEST TO HELP ENSURE THAT NEWLY INSTALLED EQUIPMENT IS OPERATING AND IN COMPLIANCE WITH THE ENERGY CODE.

LIGHTING CONTROLS ACCEPTANCE TESTS MUST BE PERFORMED BY A CERTIFIED LIGHTING CONTROLS ACCEPTANCE TEST TECHNICIAN (ATT).

MECHANICAL SYSTEM ACCEPTANCE TESTS MUST BE PERFORMED BY A CERTIFIED MECHANICAL ATT FOR PROJECTS SUBMITTED ON OR AFTER OCTOBER 1, 2021.

A LISTING OF CERTIFIED ATT CAN BE FOUND AT HTTPS://WWW.ENERGY.CA.GOV/PROGRAMS-AND-TOPICS/PROGRAMS/ACCEPTANCE-TEST-TECHNICIAN-CERTIFICATION-PROVIDER-PROGRAM/ACCEPTANCE

THE ACCEPTANCE TESTING PROCEDURES MUST BE REPEATED, AND DEFICIENCIES MUST BE CORRECTED BY THE BUILDER OR INSTALLING CONTRACTOR UNTIL THE CONSTRUCTION/INSTALLATION OF THE SPECIFIED SYSTEMS CONFORM AND PASS THE REQUIRED ACCEPTANCE CRITERIA.

PROJECT INSPECTORS WILL COLLECT THE FORMS TO CONFIRM THAT THE REQUIRED ACCEPTANCE TESTS HAVE BEEN COMPLETED.

NOTES:
1. PROVIDE WITH SINGLE CIRCUIT LINE SETS FROM CONDENSER TO INDOOR UNITS.
2. PROVIDE CONTROLS WIRING BEWTEEN OUTDOOR ACCU UNITS AND INDOOR CRAC UNITS.
3. REFRIGERANT 410A.
4. CONTRACTOR SHALL COORDINATE AND PROVIDE THE MANUFACTURER'S REPRESENTATIVE THE FINAL REFRIGERANT ROUTE (PRIOR TO ORDERING OR INSTALLING ANY PIPING) TO VERIFY SIZES. MAXIMUM LENGTH = 150 FT. AND 20 FEET MAX. VERTICAL DIFFERENCE BETWEEN INDOOR AND OUTDOOR UNIT. CONTRACTOR SHALL HAVE MANUFACTURER PROVIDE AN ENGINEERED SHOP DRAWING IN THE SUBMITTAL.

NOTES:
1. PROVIDE WITH STANDARD FEATURES.
2. PROVIDE UNIT MOUNT CONDENSATE PUMP.
3. COOLING CAPACITIES ARE BASED ON 105°F AMBIENT, 75°F EDB, 61°F EWB, 45% RH. LAT = 54.3°F.
4. COOLING CAPACITY OF UNITS IS BASED ON A MAXIMUM OF 3 KW COMPUTER RACK LOAD.
5. PROVIDE UNIT WITH CONTACTS FOR AUTO-SHUT OFF.
6. PROVIDE UNIT WITH PIPE ROUTING THRU TOP.
7. COORDINATE WITH ELECTRICAL FOR POWER AND DISCONNECTS.
8. R-410A REFRIGERANT.
9. PROVIDE REMOTE UNIT START/STOP AND ALARM DRY CONTACT.

5. FH-1, FH-2, & FH-3 SHALL BE ACCESSIBLE. HEIGHT OF HOOD & UTILITIES SHALL MEET ALL ACCESSIBILITY REQUIREMENTS.
6. COORDINATE WITH LAB FURNITURE PROVIDER FOR ALL REQUIREMENTS.
7. HOOD SHALL BE 316 STAINLESS STEEL INTERIOR ACID TYPE HOOD, WASHDOWN SYSTEM, INTEGRAL WORK SURFACE, DRAINAGE TROUGHS AND CONTROL PANEL.
8. REMOVABLE FRONT ACCESS PANELS, LIGHT WITH ON-OFF SWITCH.
9. PROVIDE OVAL CUPSINK (BACK -LEFT) FOR FH-1 & (FRONT-LEFT) FOR FH-2 & FH-3. ORIENTATION PER USER.
10. PROVIDE OUTLETS AND FAUCET FOR VACUUM, AIR, NITROGEN & DI WATER. SEE PLUMBING PLANS FOR LOCATIONS.
11. PROVIDE FUME HOOD ALARM.
12. VERIFY ALL MODEL NUMBERS WITH MANUFACTURER.
13. FUME HOODS SHALL BE PROVIDED BY CONTRACTOR.
14. PROVIDE CABINET BASED UNDER HOOD.
15. PROVIDE STAINLESS STEEL CLOSURE PANELS ABOVE HOOD TO CEILING.

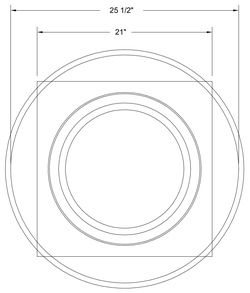
ASSEMBLY INSTRUCTIONS

HANGING ANGLE MUST BE SUPPORTED WITH 1/2" - 13 TPI GRADE 5 (MINIMUM) ALL-THREAD. SANDWICH HANGING ANGLES AND CEILING ANCHOR POINTS WITH 1/2" GRADE 5 (MINIMUM) STEEL FLAT WASHERS AND 1/2" - 13 TPI GRADE 5 (MINIMUM) HEX NUTS AS SHOWN. MUST USE DOUBLED HEX NUT CONFIGURATION BENEATH HOOD HANGING ANGLES AND ABOVE CEILING ANCHORS. MAINTAIN 1/4" OF EXPOSED THREADS BENEATH BOTTOM HEX NUT. TORQUE ALL HEX NUTS TO 57 FT-LBS.



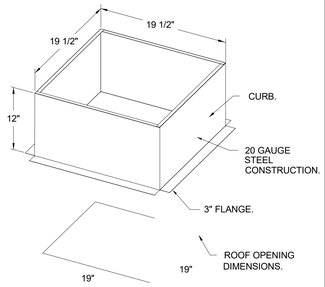
SECTION VIEW – MODEL 3624VHB-G
HOOD – #1

FAN #1 DU33HFA - EXHAUST FAN

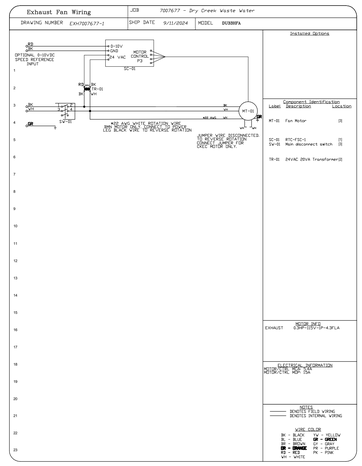
DUCTWORK BETWEEN EXHAUST RISER ON HOOD AND FAN (BY OTHERS).

TOP VIEW

FEATURES:



- DIRECT DRIVE CONSTRUCTION (NO BELTS/PULLEYS).
- ROOF MOUNTED FANS.
- RESTAURANT MODEL.
- UL705
- VARIABLE SPEED CONTROL.
- INTERNAL WIRING.
- THERMAL OVERLOAD PROTECTION (SINGLE PHASE).
- HIGH HEAT OPERATION 300°F (149°C).



- NEMA 3R SAFETY DISCONNECT SWITCH.

NORMAL TEMPERATURE TEST
EXHAUST FAN MUST OPERATE CONTINUOUSLY WHILE EXHAUSTING AIR AT 300°F (149°C) UNTIL ALL FAN PARTS HAVE REACHED THERMAL EQUILIBRIUM, AND WITHOUT ANY DETERIORATING EFFECTS TO THE FAN WHICH WOULD CAUSE UNSAFE OPERATION.

OPTIONS

- ECM WIRING PACKAGE - MANUAL OR 0-10VDC REFERENCE SPEED CONTROL -RTC- (TELCO MOTOR), CCW ROTATION.
- 2 YEAR PARTS WARRANTY.

BID SET (PRELIMINARY)

CERTIFICATE OF COMPLIANCE - NONRESIDENTIAL PERFORMANCE COMPLIANCE METHOD — **NRCC-PRF-E**

Nonresidential Performance Compliance Method — **(Page 3 of 23)**

C1. COMPLIANCE SUMMARY

COMPLIES[3]

	Time Dependent Valuaton (TDV)		Source Energy Use
	Efficiency[1] (kBtu/ft² - yr)	**Total[2] (kBtu/ft² - yr)**	**Total[2] (kBtu/ft² - yr)**
Standard Design	467.79	372.4	43.51
Proposed Design	452.82	347.16	36.22
Compliance Margins	**14.97**	**25.24**	**7.29**
	Pass	**Pass**	**Pass**

[1] Efficiency measures include improvements like a better building envelope and more efficient equipment
[2] Compliance Totals include efficiency, photovoltaics and batteries
[3] New Construction, Complete Addition Scope: Building complies when all efficiency and total compliance margins are greater than or equal to zero and unmet load hour limits are not exceeded
Existing, Addition and Alteration Scope: Building complies when efficiency compliance margin is greater than or equal to zero and unmet load hour limits are not exceeded

CERTIFICATE OF COMPLIANCE - NONRESIDENTIAL PERFORMANCE COMPLIANCE METHOD — **NRCC-PRF-E**

Nonresidential Performance Compliance Method — **(Page 2 of 23)**

B. PROJECT SUMMARY

Table B shows which building components are included in the performance calculation. If indicated as not included, the project must show compliance prescriptively if within the permit application.

Building Components Complying via Performance					Building Components Complying Prescriptively	
Envelope (See Table G)	Nonres	Performance	Solar Thermal Water Heating (See Table I3)	☐ Performance	The following building components are ONLY eligible for prescriptive compliance and should be documented on the NRCC form listed if within the scope of the permit application (i.e. compliance will not be shown on the NRCC-PRF-E).	
	MultiFam	Not Included		☒ Not Included		
Mechanical (See Table H)	Nonres	Performance	Covered Process: Commercial Kitchens (see Table J)	☐ Performance	Indoor Lighting (Unconditioned) 140.6 & 170.2(e)	NRCC-LTI-E is required
	MultiFam	Not Included		☒ Not Included	Outdoor Lighting 140.7 & 170.2(e)	NRCC-LTO-E is required
Domestic Hot Water (See Table I)	Nonres	Not Included	Covered Process: Laboratory Exhaust (see Table J)	☒ Performance	Sign Lighting 140.8 & 170.2(e)	NRCC-LTS-E is required
	MultiFam	Not Included		☐ Not Included	**Building Components Complying with Mandatory Measures**	
Lighting (Indoor Conditioned, see Table K)	Nonres	Not Included	Photovoltaics (see Table F)	☒ Performance	Electrical power systems, commissioning, solar ready, elevator and escalator requirements are mandatory and should be documented on the NRCC form listed if applicable (i.e. compliance will not be shown on the NRCC-PRF-E.)	
	MultiFam	Not Included		☐ Not Included	Electrical Power Distribution 110.11	NRCC-ELC-E is required
			Battery (see Table F)	☐ Performance	Commissioning 120.8	NRCC-CXR-E is required
				☒ Not Included	Solar and Battery 110.10	NRCC-SAB-E is required

CERTIFICATE OF COMPLIANCE - NONRESIDENTIAL PERFORMANCE COMPLIANCE METHOD — **NRCC-PRF-E**

Nonresidential Performance Compliance Method — **(Page 1 of 23)**

Project Name: **Dry Creek Admin Building** — **Date Prepared:** **2024-09-13**

12	Project Scope	• New envelope and mechanical	**13**	Number of Dwelling Units	0
14	Total Conditioned Floor Area in Scope (ft²)	11099	**15**	Total # of hotel/motel rooms	0
16	Total Unconditioned Floor Area (ft²)	0	**17**	Fuel Type	Natural gas
18	Nonresidential Conditioned Floor Area	11099	**19**	Total # of Stories (Habitable Above Grade)	1
20	Residential Conditioned Floor Area	0			

CERTIFICATE OF COMPLIANCE - NONRESIDENTIAL PERFORMANCE COMPLIANCE METHOD — **NRCC-PRF-E**

Nonresidential Performance Compliance Method — **(Page 6 of 23)**

C4. SOURCE ENERGY COMPLIANCE RESULTS FOR PERFORMANCE COMPONENTS (Annual SOURCE Energy Use, kBtu/ft² /yr)

COMPLIES[2]

Energy Component	Standard Design (SOURCE)	Proposed Design (SOURCE)	Compliance Margin (SOURCE)[1]
Space Heating	19.95	15.06	4.89
Space Cooling	7.41	9.62	-2.21
Indoor Fans	15.84	10.85	4.99
Heat Rejection	0	0	0
Pumps & Misc.	0	0	0
Domestic Hot Water	1.53	1.53	0
Indoor Lighting	3	3	0
Flexibility	---	---	---
EFFICIENCY COMPLIANCE TOTAL	**47.73**	**40.06**	**7.67 (16.1%)**
Photovoltaics	-3.43	-3.84	0.41
Batteries	-0.79	---	-0.79
TOTAL COMPLIANCE	**43.51**	**36.22**	**7.29 (16.8%)**

[1] Notes: This number in parenthesis following the Compliance Margin in column 4, represents the Percent Better than Standard.

CERTIFICATE OF COMPLIANCE - NONRESIDENTIAL PERFORMANCE COMPLIANCE METHOD — **NRCC-PRF-E**

Nonresidential Performance Compliance Method — **(Page 5 of 23)**

C3. TDV ENERGY RESULTS FOR NON-REGULATED COMPONENTS[1]

Non-Regulated Energy Component	Standard Design (TDV)	Proposed Design (TDV)	Compliance Margin (TDV)[1]
Receptacle	133.86	133.86	---
Process	80.33	80.33	---
Other Ltg	---	---	---
Process Motors	---	---	---
TOTAL (TOTAL COMPLIANCE + NON-REGULATED COMPONENTS)	**586.59**	**561.35**	**25.24 (4.3%)**

[1] Notes: This table is not used for Energy Code Compliance.

CERTIFICATE OF COMPLIANCE - NONRESIDENTIAL PERFORMANCE COMPLIANCE METHOD — **NRCC-PRF-E**

Nonresidential Performance Compliance Method — **(Page 4 of 23)**

C2. TDV ENERGY COMPLIANCE RESULTS FOR PERFORMANCE COMPONENTS (Annual TDV Energy Use, kBtu/ft² - yr)

COMPLIES[2]

Energy Component	Standard Design (TDV)	Proposed Design (TDV)	Compliance Margin (TDV)[1]
Space Heating	88.52	108.84	-20.32
Space Cooling	163.2	189.62	-26.42
Indoor Fans	172.42	110.71	61.71
Heat Rejection	0	0	0
Pumps & Misc.	0	0	0
Domestic Hot Water	6.71	6.71	0
Indoor Lighting	36.94	36.94	0
Flexibility	---	---	---
EFFICIENCY COMPLIANCE TOTAL	**467.79**	**452.82**	**14.97 (3.2%)**
Photovoltaics	-93.42	-105.66	12.24
Batteries	-1.97	---	-1.97
TOTAL COMPLIANCE	**372.4**	**347.16**	**25.24 (6.8%)**

[1] Notes: This number in parenthesis following the Compliance Margin in column 4, represents the Percent Better than Standard.

CERTIFICATE OF COMPLIANCE - NONRESIDENTIAL PERFORMANCE COMPLIANCE METHOD — **NRCC-PRF-E**

Nonresidential Performance Compliance Method — **(Page 9 of 23)**

C8. ENERGY USE INTENSITY (EUI)

	Standard Design (kBtu/ft² / yr)	Proposed Design (kBtu/ft² / yr)	Margin (kBtu/ft² / yr)	Margin Percentage
GROSS EUI[1]	102.97	92.63	10.34	10.04
NET EUI[1]	86.74	74.55	12.19	14.05

[1] Notes: Gross EUI is Energy Use Total (not including PV)/Total Building Area. Net EUI is Energy Use Total (including PV)/Total Building Area.

C9. UNMET LOAD HOURS

Thermal Zone Name	Cooling Unmet Load Hour Limit for Thermal Zone	Proposed Cooling Unmet Load Hours	Heating Unmet Load Hour Limit for Thermal Zone	Proposed Heating Unmet Load Hours
16-DOAS SUPPLIED	150	0	150	1969.25
17-DOAS-C	150	0	150	693.5

D1. EXCEPTIONAL CONDITIONS

• The project uses the Simplified Geometry Performance Modeling Approach which is not capable of modeling daylighting controls and assumes the prescriptive Secondary Daylit Control requirements are met. PRESCRIPTIVE COMPLIANCE documentation (form NRCC-LTI-02-E) for the requirements of section 140.6(d) Automatic Daylighting Controls in Secondary Daylit Zones is required.
• The building does not include service water heating. Verify that service water heating is not required and is not included in the design.
• The user model includes space(s) that are designed to be served by mechanical cooling systems, but the cooling systems were not included in the simulation model. A cooling system has been modeled for both the proposed and standard cases.
• The user model includes space(s) without sufficient cooling equipment. Cooling equipment has been added to the model to meet cooling loads.
• PV/Battery Building Type has been modified from software defaults for one or more spaces. Review project's PV/Battery Building Type(s) with documentation author. Refer to Energy Code section 140.10 for Nonresidential or 170.2(g) for more information.

CERTIFICATE OF COMPLIANCE - NONRESIDENTIAL PERFORMANCE COMPLIANCE METHOD — **NRCC-PRF-E**

Nonresidential Performance Compliance Method — **(Page 8 of 23)**

C7. ENERGY USE SUMMARY

Energy Component	Standard Design Site (MWh)	Proposed Design Site (MWh)	Margin (MWh)	Standard Design Site (MBtu)	Proposed Design Site (MBtu)	Margin (MBtu)
Space Heating	19.1	43.5	-24.4	157.1	---	---

L. DECLARATION OF REQUIRED CERTIFICATES OF INSTALLATION

Selections made by Documentation Author indicate which Certificates of Installation must be submitted for the features to be recognized for compliance. These documents must be retained and provided to the building inspector during construction and can be found online

Building Component	Form/Title
Envelope	NRCI-ENV-01-E - Must be submitted for all buildings
Envelope	NRCI-ENV-E - Envelope (for all buildings)
Mechanical	NRCI-MCH-01-E - Must be submitted for all buildings
Mechanical	NRCI-MCH-E - For all buildings with Mechanical Systems
	NRCI-SAB-E - Solar Water Heating, PV and Battery Storage Systems
Covered Process	NRCI-PRC-01-E - Must be submitted for all Covered Processes

STATE OF CALIFORNIA

Domestic Water Heating System

CALIFORNIA ENERGY COMMISSION

CERTIFICATE OF COMPLIANCE NRCC-PLB-E

This document is used to demonstrate compliance for nonresidential occupancies with requirements in 110.1, 110.3, 120.3, and 140.5, and with requirements in 141.0 for additions and alterations, for domestic water heating scopes using the prescriptive path. For high-rise residential and hotel/motel occupancies compliance is demonstrated with requirements in 110.1, 110.3, 160.4 and 170.2(d), and with requirements 180.1 for additions and 180.2 for alterations.

Project Name: Dry Creek | **Report Page:** (Page 1 of 6)

Project Address: 1800 Booth Road | **Date Prepared:** 9/13/2024

A. GENERAL INFORMATION

01	Project Location (city)	Roseville	02	Climate Zone	11
03	Occupancy Types Within Project (select all that apply):				

● Office ● Support Areas ● All Other Occupancies

B. PROJECT SCOPE

This table includes domestic water heating systems that are within the scope of the permit application and are demonstrating compliance using the prescriptive paths outlined in 140./170.2(d) and 141.0(a)/ 180.1, or 141.0(b)2N / 180.2 for additions or alterations. Solar water heating systems are documented on the NRCC-SAB compliance document. Combined hydronic water heating systems are documented on the NRCC-MCH compliance document.

01	02	03		
My project consists of (check all that apply):	System Type[1,2]	System Components		
☒ New system (DHW system being installed for the first time)	Individual System (serving nonresidential spaces)	☒ Equipment	☒ Distribution	☒ Controls
☐ System Alteration (equipment, distribution or controls)		☐ Equipment	☐ Distribution	☐ Controls

FOOTNOTES: Point of use water heaters, or other non-central systems used to serve nonresidential spaces, are considered individual systems.

[2] *Dwelling units refers to hotel/motel guest rooms and units in a multifamily residential occupancy.*

[3] *DHW systems serving 2 or more dwelling units are considered "Central Systems" for multifamily occupancies*

C. COMPLIANCE RESULTS

Table C will indicate if the project data input into the compliance document is compliant with water heating requirements. If this table says "DOES NOT COMPLY" or "COMPLIES with Exceptional Conditions" refer to Table D. or the table indicated as not compliant for guidance.

01	02	03	04
Domestic Hot Water Equipment	Distribution Systems	Controls	**Compliance Results**
Table F	Table G	Table H	
Yes	Yes	Yes	COMPLIES

D. EXCEPTIONAL CONDITIONS

This table is auto-filled with uneditable comments because of selections made or data entered in tables throughout the form.

Date Prepared: 9/13/2024

H. DOMESTIC HOT WATER CONTROLS

This table is used to demonstrate compliance with control requirements in 110.3 for all occupancies. For multifamily residential and hotel/motel occupancies, compliance is also demonstrated with requirements in 160.4(e) / 170.2(d).

	Yes	No	Not Applicable	Requirement
01	☒	☐	☐	Construction documents require manufacturer certification that service water-heating systems are equipped with automatic temperature controls capable of adjusting temperature settings per 110.3(a).
02	☒	☐	☐	Systems with capacity > 167,000 BTUH equipped with outlet temperature controls per 110.3(c)1 unless covered by California Plumbing Code 613.0.
03	☐	☐	☒	Controls for circulating pumps or electrical heat trace systems are capable of automatically turning off the system per §110.3(c)2 unless systems serves healthcare facility.
04	☐	☐	☒	For recirculation systems serving multiple dwelling units, design includes automatic pump controls per 170.2(d) or 180.1(b)3 for additions.
05	☐	☐	☒	For recirculation systems serving individual dwelling units, design includes manual on/off controls as specified in Reference Appendix RA4.4.9 per 170.2(d).
06	☐	☐	☒	Combustion air positive shut-off shall be provided per 160.4(3) on all newly installed commercial boilers as follows: • Boilers with input capacity >= 2.5 MMBtu/h, in which the boiler is designed to operate with a nonpositive vent static pressure • Boilers where one stack serves two or more boilers with a total combined input capacity per stack of 2.5 MMBtu/h.
07	☐	☐	☒	Boiler combustion air fans with motor >= 10 hp shall meet one of the following • The fan motor shall be driven by a variable speed drive OR • The fan motor shall include controls that limit the fan motor demand to <=30% of the total design wattage at 50% of the design air volume.
08	☐	☐	☒	Newly installed boilers with an input capacity [d.gte/] 5MMBtu/h and a steady state full-load combustion efficiency < 90% shall maintain excess (stack-gas) oxygen concentrations <= 5% by volume on a dry basis over firing rates of 20-100%. Combustion air volume shall be controlled with respect to firing rate or flue gas oxygen concentration. Use of a common gas and combustion air control linkage or jack shaft is prohibited.

Project Name: Dry Creek | **Report Page:** (Page 3 of 6)

Date Prepared: 9/13/2024

G. DOMESTIC HOT WATER DISTRIBUTION SYSTEM

This table is used to demonstrate compliance for nonresidential occupancies with distribution requirements in 120.3 and 140.5. For multifamily and hotel/motel occupancies, compliance is demonstrated with requirements 110.3(c), 160.4, 170.2(d).

Mandatory Pipe Insulation All Occupancies

13	☐	For systems serving dwelling units, pipe insulation must meet the minimum insulation requirements in Table 160.4-A (see blow) except: • Piping that penetrates framing members shall not be required to have pipe insulation for the distance of the framing penetration. Piping that penetrates metal framing shall use grommets, plugs, wrapping or other insulating material to assure that no contact is made with the metal framing. Insulation shall abut securely against all framing members • Piping installed in interior or exterior walls shall not be required to have pipe insulation if all of the requirements are met for compliance with Quality Insulation Installation (QII) as specified in the Reference Residential Appendix RA3.5. • Piping surrounded with a minimum of 1 inch of wall insulation, 2 inches of crawlspace insulation, or 4 inches of attic insulation, shall not be required to have pipe insulation.
14	☒	For systems serving nonresidential spaces, pipe insulation for the following applications is specified to comply with Table 120.3-A (see below) per 120.3: • Recirculating system piping, including supply and return piping of the water heater • The first 8 ft of hot and cold outlet piping, including between storage tank and heat trap, for a nonrecirculating storage system • Pipes that are externally heated
15	☒	Insulation shall be protected from damage, including that due to sunlight, moisture, equipment maintenance, and wind. Insulation exposed to weather shall be installed with a cover suitable for outdoor service per 120.3(b) / 160.4(f). Pipe insulation buried below grade must be installed in a water proof and non-crushable casing or sleeve.

TABLE 120.3-A / 160.4-A PIPE INSULATION THICKNESS

Responsible Person's Declaration statement

I certify the following under penalty of perjury, under the laws of the State of California:

1. The information provided on this Certificate of Compliance is true and correct.
2. I am eligible under Division 3 of the Business and Professions Code to accept responsibility for the building design or system design identified on this Certificate of Compliance (responsible designer)
3. The energy features and performance specifications, materials, components, and manufactured devices for the building design or system design identified on this Certificate of Compliance conform to the requirements of Title 24, Part 1 and Part 6 of the California Code of Regulations.
4. The building design features or system design features identified on this Certificate of Compliance are consistent with the information provided on other applicable compliance documents, worksheets, calculations, plans and specifications submitted to the enforcement agency for approval with this building permit application.
5. I understand that a registered copy of this Certificate of Compliance shall be made available with the building permit(s) issued for the building, and made available to the enforcement agency for all applicable inspections, and I will take the necessary steps to accomplish this requirement.
6. I understand that a registered copy of this Certificate of Compliance is required to be included with the documentation the builder provides to the building owner at occupancy, and I will take the necessary steps to accomplish these requirements.

Nonresidential Performance Compliance Method (Page 22 of 23)

M. DECLARATION OF REQUIRED CERTIFICATES OF ACCEPTANCE

Selections made by Documentation Author indicate which Certificates of Acceptance must be submitted for the features to be recognized for compliance. These documents must be provided to the building inspector during construction and must be completed through an Acceptance Test Technician Certification Provider (ATTCP).

Building Component	Form/Title & System Name(s)
Envelope	NRCA-ENV-02-F - NRFC label verification for fenestration
Covered Process	NRCA-PRC-14-F Lab Exhaust Ventilation System
Mechanical	NRCA-MCH-02-A - Outdoor Air must be submitted for all newly installed HVAC units. Note: MCH-02-A can be performed in conjunction with MCH-07-A Supply Fan VFD Acceptance (if applicable) since testing activities overlap
	DOAS-A, DOAS-B, DOAS-C and CRAC-1 ACCU-1., FC-1D, FC-1E, DFC-1F, DFC-1G HP-1G and DFC-1H2H.
Mechanical	NRCA-MCH-03-A - Constant Volume Single Zone HVAC
	DOAS-A, DOAS-B, DOAS-C and CRAC-1 ACCU-1., FC-1D, FC-1E, DFC-1F, DFC-1G HP-1G and DFC-1H2H.

N. DECLARATION OF REQUIRED CERTIFICATES OF VERIFICATION

Selections made by Documentation Author indicate which Certificates of Verification must be submitted for the features to be recognized for compliance. These documents must be retained and provided to the building inspector during construction and can be found online

There are no Certificates of Verification applicable to this project

CERTIFICATE OF COMPLIANCE	NRCC-PLB-E
This document is used to demonstrate compliance for nonresidential occupancies with requirements in 110.1, 110.3, 120.3, and 140.5, and with requirements in 141.0 for additions and alterations, for domestic water heating scopes using the prescriptive path. For high-rise residential and hotel/motel occupancies compliance is demonstrated with requirements in 110.1, 110.3, 160.4 and 170.2(d), and with requirements 180.1 for additions and 180.2 for alterations.	
Project Name: Dry Creek	**Report Page:** (Page 1 of 8)
Project Address:	**Date Prepared:** 2024-09-13T14:02:10-04:00

A. GENERAL INFORMATION

01	Project Location (city)	Roseville	02	Climate Zone	11
03	Occupancy Types Within Project (select all that apply):				

● All Other Occupancies ● Office

B. PROJECT SCOPE

This table includes domestic water heating systems that are within the scope of the permit application and are demonstrating compliance using the prescriptive paths outlined in 140./ 170.2(d) and 141.0(a)/ 180.1, or 141.0(b)2N / 180.2 for additions or alterations. Solar water heating systems are documented on the NRCC-SAB compliance document. Combined hydronic water heating systems are documented on the NRCC-MCH compliance document.

01	02	03	
My project consists of (check all that apply):	System Type[1,2]	System Components	
☒ New system (DHW system being installed for the first time)	Central System (serving nonresidential spaces)	☒ Equipment ☒ Distribution	☒ Controls
☐ System Alteration (equipment, distribution or controls)		☐ Equipment ☐ Distribution	☐ Controls

[1]FOOTNOTES: Point of use water heaters, or other non-central systems used to serve nonresidential spaces, are considered individual systems.
[2] Dwelling units refers to hotel/motel guest rooms and units in a multifamily residential occupancy.
[3] DHW systems serving 2 or more dwelling units are considered "Central Systems" for multifamily occupancies

C. COMPLIANCE RESULTS

Table C will indicate if the project data input into the compliance document is compliant with water heating requirements. If this table says "DOES NOT COMPLY" or "COMPLIES with Exceptional Conditions" refer to Table D. or the table indicated as not compliant for guidance.

01	02	03	04
Domestic Hot Water Equipment	Distribution Systems	Controls	**Compliance Results**
Table F	Table G	Table H	
Yes	Yes	Yes	COMPLIES

D. EXCEPTIONAL CONDITIONS

This table is auto-filled with uneditable comments because of selections made or data entered in tables throughout the form.

G. DOMESTIC HOT WATER DISTRIBUTION SYSTEM

This table is used to demonstrate compliance for nonresidential occupancies with distribution requirements in 120.3 and 140.5. For multifamily and hotel/motel occupancies, compliance is demonstrated with requirements 110.3(c), 160.4, 170.2(d).

Recirculation Loops in Central Systems Serving Dwelling Units or Nonresidential Spaces

	Yes	No	Not Applicable	Requirement
01	●	○	○	Air release valve or vertical pump installation per 110.3(c)4A
02	●	○	○	Check valve or similar located between recirculation pump and water heating equipment to prevent backflow per 110.3(c)4B
03	●	○	○	Hose bibb installed between pump and equipment and isolation valve between hose bibb and equipment per 110.3(c)4C
04	●	○	○	Isolation valves on both sides of the pump per 110.3(c)4D
05	●	○	○	Cold water and recirculation loop piping shall not be connected to the hot water storage tank drain port per 110.3(c)4E
06	●	○	○	Check valve installed on cold water supply between hot water system and next closest tee on cold water supply per 110.3(c)4F
07	○	○	●	DWELLING UNITS ONLY: For central systems serving multiple dwelling units, design includes a recirculation system serving separate dwelling units per 170.2(d) unless building has <=8 dwelling units.
08	○	○	●	DWELLING UNITS ONLY: For heat pump water heating systems, the hot water return from the recirculation loop shall connect to a recirculation loop tank and shall not directly connect to the primary heat pump water heater inlet or the primary thermal storage tanks per 170.2(d)2A.
09	○	○	●	DWELLING UNITS ONLY: For heat pump water heating systems, the fuel source for the recirculation loop tank shall be electricity if auxiliary heating is needed. The recirculation loop heater shall be capable of multi-pass water heating operation per 170.2(d)2B.

CERTIFICATE OF COMPLIANCE	NRCC-PLB-E
Project Name: Dry Creek	**Report Page:** (Page 6 of 8)
	Date Prepared: 2024-09-13T14:02:10-04:00

H. DOMESTIC HOT WATER CONTROLS

This table is used to demonstrate compliance with control requirements in 110.3 for all occupancies. For multifamily residential and hotel/motel occupancies, compliance is also demonstrated with requirements in 160.4(e) / 170.2(d).

	Yes	No	Not Applicable	Requirement
01	☒	☐	☐	Construction documents require manufacturer certification that service water-heating systems are equipped with automatic temperature controls capable of adjusting temperature settings per 110.3(a).
02	☐	☐	☒	Systems with capacity > 167,000 BTUH equipped with outlet temperature controls per 110.3(c)1 unless covered by California Plumbing Code 613.0.
03	☐	☐	☒	Controls for circulating pumps or electrical heat trace systems are capable of automatically turning off the system per 9110.3(c)2 unless systems serves healthcare facility.
04	☐	☐	☒	For recirculation systems serving multiple dwelling units, design includes automatic pump controls per 170.2(d) or 180.1(b)3 for additions.
05	☐	☐	☒	For recirculation systems serving individual dwelling units, design includes manual on/off controls as specified in Reference Appendix RA4.4.9 per 170.2(d).
06	☐	☐	☒	Combustion air positive shut-off shall be provided per 160.4(3).on all newly installed commercial boilers as follows: • Boilers with input capacity >= 2.5 MMBtu/h, in which the boiler is designed to operate with a nonpositive vent static pressure • Boilers where one stack serves two or more boilers with a total combined input capacity per stack of 2.5 MMBtu/h.
07	☐	☐	☒	Boiler combustion air fans with motor >= 10 hp shall meet one of the following • The fan motor shall be driven by a variable speed drive OR • The fan motor shall include controls that limit the fan motor demand to <=30% of the total design wattage at 50% of the design air volume.
08	☐	☐	☒	Newly installed boilers with an input capacity (d:gte/] 5MMBtu/h and a steady state full-load combustion efficiency < 90% shall maintain excess (stack-gas) oxygen concentrations <= 5% by volume on a dry basis over firing rates of 20-100%. Combustion air volume shall be controlled with respect to firing rate or flue gas oxygen concentration. Use of a common gas and combustion air control linkage or jack shaft is prohibited.

I. DECLARATION OF REQUIRED CERTIFICATES OF INSTALLATION

Selections have been made based on information provided in this document. If any selection have been changed by permit applicant, an explanation should be included in Table E. Additional Remarks. These documents must be provided to the building inspector during construction and can be found online

Form/Title
NRCI-PLB-E - Must be submitted for all buildings

J. DECLARATION OF REQUIRED CERTIFICATES OF ACCEPTANCE

There are no forms required for this project.

K. DECLARATION OF REQUIRED CERTIFICATES OF VERIFICATION

There are no forms required for this project.

E. ADDITIONAL REMARKS

This table includes remarks made by the permit applicant to the Authority Having Jurisdiction.

G. DOMESTIC HOT WATER DISTRIBUTION SYSTEM

Mandatory Pipe Insulation All Occupancies

13	☐	For systems serving dwelling units, pipe insulation must meet the minimum insulation requirements in Table 160.4-A (see blow) except: • Piping that penetrates framing members shall not be required to have pipe insulation for the distance of the framing penetration. Piping that penetrates metal framing shall use grommets, plugs, wrapping or other insulating material to assure that no contact is made with the metal framing. Insulation shall abut securely against all framing members • Piping installed in interior or exterior walls shall not be required to have pipe insulation if all of the requirements are met for compliance with Quality Insulation Installation (QII) as specified in the Reference Residential Appendix RA3.5. • Piping surrounded with a minimum of 1 inch of wall insulation, 2 inches of crawlspace insulation, or 4 inches of attic insulation, shall not be required to have pipe insulation.
14	☒	For systems serving nonresidential spaces, pipe insulation for the following applications is specified to comply with Table 120.3-A (see below) per 120.3: • Recirculating system piping, including supply and return piping of the water heater • The first 8 ft of hot and cold outlet piping, including between storage tank and heat trap, for a nonrecirculating storage system • Pipes that are externally heated
15	☒	Insulation shall be protected from damage, including that due to sunlight, moisture, equipment maintenance, and wind. Insulation exposed to weather shall be installed with a cover suitable for outdoor service per 120.3(b) / 160.4(f). Pipe insulation buried below grade must be installed in a water proof and non-crushable casing or sleeve.

TABLE 120.3-A / 160.4-A PIPE INSULATION THICKNESS

Fluid Temperature Range (°F)	Conductivity Range (Btu-in per hour per ft² per °F)	Insulation Mean Rating Temp (°F)	Nominal Pipe Diameter (in)			
			< 1	1 to < 1.5	1.5 to < 4	1.5 to < 4 Multifamily & Hotel/Motel
			Minimum Insulation Required			
105-140	0.22 - 0.28	100	1.0 in or R-7.7	1.5 in or R-12.5	1.5 in or R-11	2.0 in or R-16

DOCUMENTATION AUTHOR'S DECLARATION STATEMENT

I certify that this Certificate of Compliance documentation is accurate and complete.

Documentation Author Name: Tyler Chandara	Documentation Author Signature:
Company: Peters Engineering	Signature Date: 9/13/24
Address: 7750 College Town Dr, Suite 101	CEA/ HERS Certification Identification (if applicable):
City/State/Zip: Sacramento, CA 95826	Phone: 9164472841

RESPONSIBLE PERSON'S DECLARATION STATEMENT

I certify the following under penalty of perjury, under the laws of the State of California:

1. The information provided on this Certificate of Compliance is true and correct.
2. I am eligible under Division 3 of the Business and Professions Code to accept responsibility for the building design or system design identified on this Certificate of Compliance (responsible designer)
3. The energy features and performance specifications, materials, components, and manufactured devices for the building design or system design identified on this Certificate of Compliance conform to the requirements of Title 24, Part 1 and Part 6 of the California Code of Regulations.
4. The building design features or system design features identified on this Certificate of Compliance are consistent with the information provided on other applicable compliance documents, worksheets, calculations, plans and specifications submitted to the enforcement agency for approval with this building permit application.
5. I will ensure that a completed signed copy of this Certificate of Compliance shall be made available with the building permit(s) issued for the building, and made available to the enforcement agency for all applicable inspections. I understand that a completed signed copy of this Certificate of Compliance is required to be included with the documentation the builder provides to the building owner at occupancy.

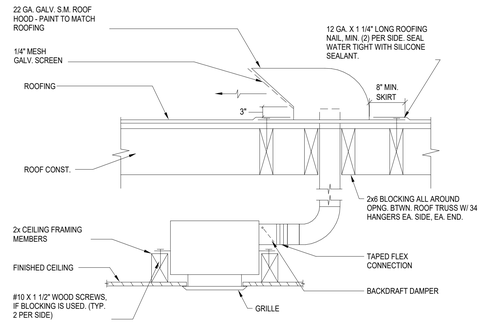
System No. W-L-7042

Classified by Underwriters Laboratories, Inc. to UL 1479

ANSI/UL1479 (ASTM E814)	CAN/ULC S115
F Ratings - 1 and 2 Hr (See Items 1 and 3)	F Ratings - 1 and 2 Hr (See Items 1 and 3)
T Rating - 0 Hr	FT Rating - 0 Hr
	FH Ratings - 1 and 2 Hr (See Items 1 and 3)
	FTH Rating - 0 Hr

SECTION A-A



1. Wall Assembly — The 1 or 2 hr fire rated wallboard/stud wall assembly shall be constructed of the materials and in the manner specified in the individual U300, U400, V400 or W400 Series Wall and Partition Designs in the UL Fire Resistance Directory and shall include the following construction features.
   A. Studs — Wall framing may consist of either wood studs or steel channel studs. Wood studs to consist of nom 2 by 4 in. (51 by 102 mm) lumber spaced 16 in. (406 mm) OC. Steel studs to be min 2-1/2 in. (64 mm) wide and spaced 24 in. (610 mm) OC.
   B. Gypsum Board* — For 1 hr assembly, one layer of min 5/8 in. (16 mm) thick wallboard as required in the individual Wall and Partition Design. For 2 hr assembly, two layers of min 5/8 in. (16 mm) thick wallboard as required in the individual Wall and Partition Design. Max diam of opening is 14-1/2 in. (368 mm) for wood stud walls and 21-3/4 in. (552 mm) for steel stud walls.
   The hourly F and FH Ratings of the firestop system are equal to the hourly fire rating of the wall assembly in which it is installed.
2. Through Penetrant — Galv steel duct to be installed concentrically or eccentrically within the firestop system. The annular space between the duct and periphery of opening shall be 0 in. (0 mm, point contact) and max 1-1/2 in. (64 mm) Duct to be rigidly supported on both sides of wall assembly.
   A. Spiral Wound HVAC Duct — Nom 20 in. (502 mm) diam (or smaller) No. 24 MSG (or heavier) galv steel spiral wound duct.
   B. Sheet Metal Duct — Nom 12 in. (305 mm) diam (or smaller) No. 28 MSG (or heavier) galv sheet steel duct.
3. Fill, Void or Cavity Material*—Sealant — Min 5/8 in. (16 mm) and 1-1/4 in. (32 mm) thickness of fill material applied within annulus, flush with both surfaces of wall assembly for 1 or 2 hr rated walls, respectively. At the point contact location between duct and wallboard, a min 1/2 in. (13 mm) diam bead of sealant shall be applied at the wallboard/duct interface on both surfaces of wall assembly.
   HILTI CONSTRUCTION CHEMICALS, DIV OF HILTI INC — CP601S Elastomeric Firestop Sealant, FS-ONE Sealant, FS-ONE MAX Intumescent Sealant or CP606 Flexible Firestop Sealant

* Indicates such products shall bear the UL or cUL Certification Mark for jurisdictions employing the UL or cUL Certification (such as Canada), respectively.

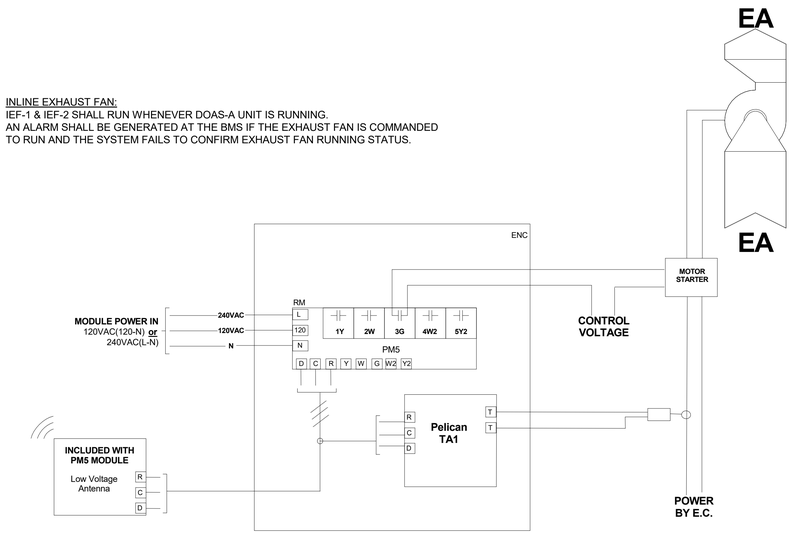
BID SET (PRELIMINARY)

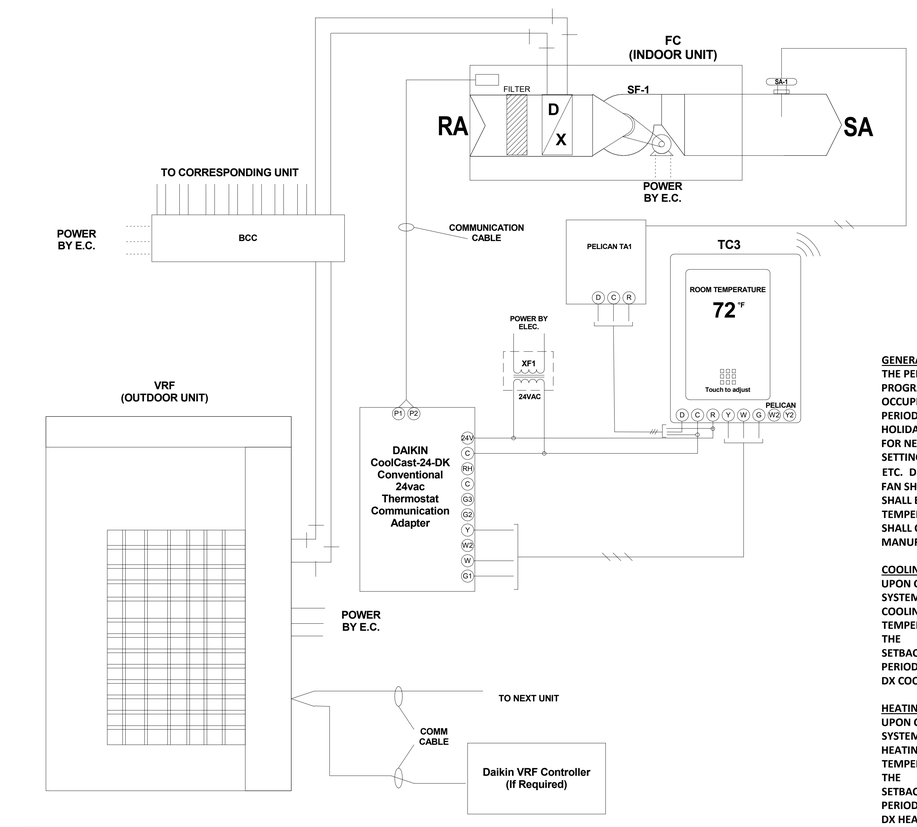
1 DOAS SYSTEM CONTROL DETAIL
SCALE: NONE

SEQUENCE OF OPERATION



GENERAL:
THE NETWORK THERMOSTAT SHALL BE PROGRAMMED AS DIRECTED BY THE OWNER FOR OCCUPIED PERIODS, UNOCCUPIED PERIODS AND HOLIDAYS. DURING PERIODS OF OCCUPANCY, THE SUPPLY FAN SHALL BE ENABLED AND STAGED HEATING OR COOLING SHALL BE PROVIDED TO MAINTAIN TEMPERATURE SETPOINT. THE OUTSIDE AIR DAMPER SHALL MODULATE FULLY CLOSED WHENEVER THE UNIT IS DISABLED.

COOLING:
ON A CALL FOR COOLING, STAGES OF DX COOLING SHALL BE ENABLED TO MAINTAIN ROOM COOLING SETPOINT.

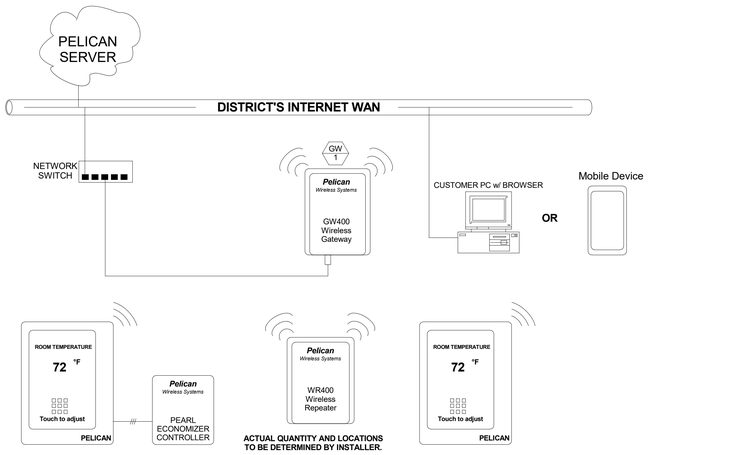


HEATING:
ON A CALL FOR HEATING, STAGES OF HEATING SHALL BE ENABLED TO MAINTAIN ROOM HEATING SETPOINT.

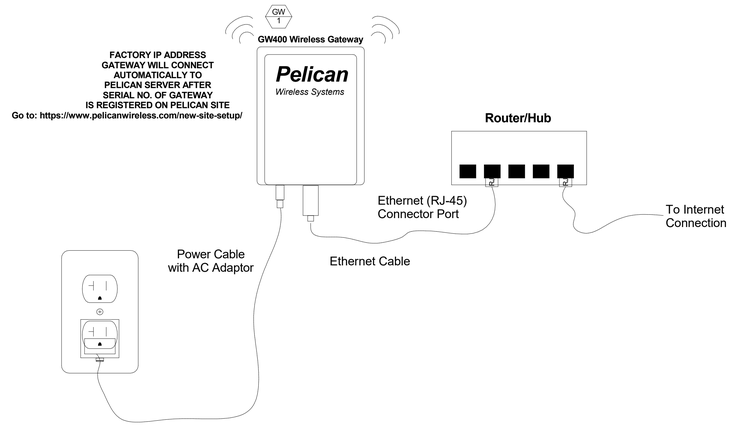
SAFETIES:
THE DUCT SMOKE DETECTOR(S) SHALL BE HARD WIRED TO STOP THE EQUIPMENT WHEN PRODUCTS OF COMBUSTION ARE DETECTED IN THE AIR STREAM. PROVIDED BY ELECTRICAL CONTRACTOR (E.C.) INSTALLED BY MECHANICAL CONTRACTOR (M.C.)

INLINE EXHAUST FAN:
IEF-1 & IEF-2 SHALL RUN WHENEVER DOAS-A UNIT IS RUNNING.
AN ALARM SHALL BE GENERATED AT THE BMS IF THE EXHAUST FAN IS COMMANDED TO RUN AND THE SYSTEM FAILS TO CONFIRM EXHAUST FAN RUNNING STATUS.

2 INLINE EXHAUST FAN CONTROL DETAIL
SCALE: NONE



3 VRF SYSTEM CONTROL DETAIL
SCALE: NONE



SEQUENCE OF OPERATION: VRF INDOOR UNITS:

GENERAL:
THE PELICAN NETWORK THERMOSTAT SHALL BE PROGRAMMED AS DIRECTED BY THE DISTRICT FOR OCCUPIED
PERIODS, UNOCCUPIED PERIODS AND HOLIDAYS.COORDINATE WITH DISTRICT REPRESENTATIVE FOR NETWORK
SETTINGS, OCCUPANCY SCHEDULES, SETPOINTS, SETBACK, ETC. DURING PERIODS OF OCCUPANCY, THE SUPPLY FAN SHALL BE ENABLED AND STAGED HEATING OR COOLING SHALL BE PROVIDED TO MAINTAIN ROOM TEMPERATURE SETPOINT. PELICAN WIRELESS THERMOSTAT SHALL COMMUNICATE WITH THE FAN COIL THROUGH MANUFACTURER'S 24VAC THERMOSTAT ADAPTER.

COOLING:
UPON CALL FROM PELICAN ZONE THERMOSTAT, THE VRF SYSTEM INTERNAL CONTROL LOGIC ACTIVATES DX COOLING AS REQUIRED TO MAINTAIN THE ZONE TEMPERATURE SETPOINT DURING OCCUPIED PERIODS OR THE
SETBACK TEMPERATURE SETPOINT DURING UNOCCUPIED PERIODS. AFTER SETPOINT TEMPERATURE IS SATISFIED DX COOLING DEACTIVATES.

HEATING:
UPON CALL FROM PELICAN ZONE THERMOSTAT, THE VRF SYSTEM INTERNAL CONTROL LOGIC ACTIVATES DX HEATING AS REQUIRED TO MAINTAIN THE ZONE TEMPERATURE SETPOINT DURING OCCUPIED PERIODS OR THE
SETBACK TEMPERATURE SETPOINT DURING UNOCCUPIED PERIODS. AFTER SETPOINT TEMPERATURE IS SATISFIED DX HEATING DEACTIVATES.

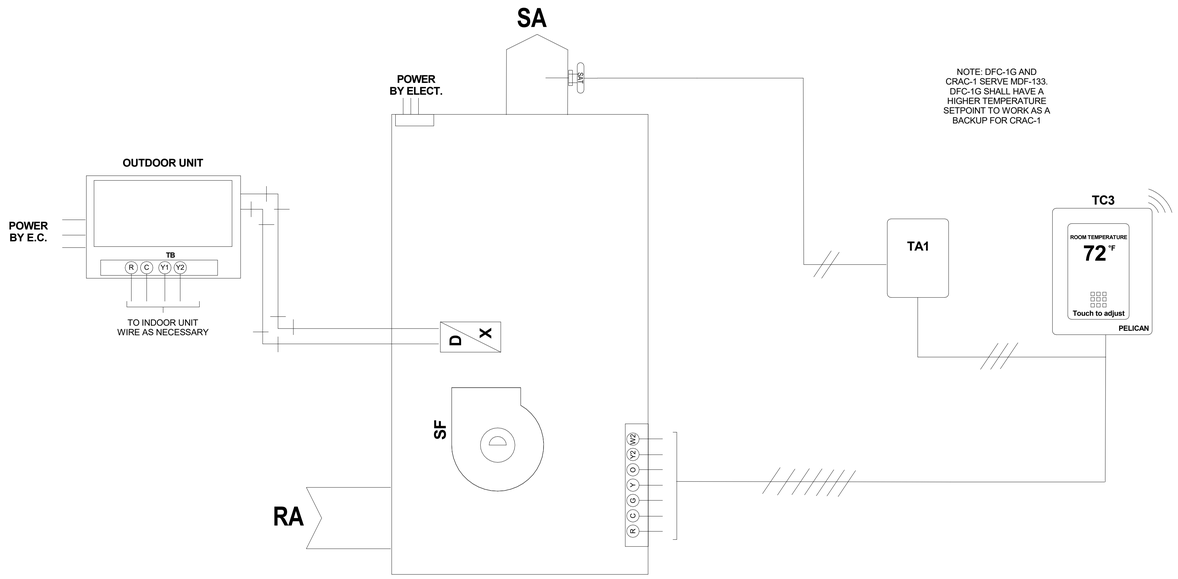
BID SET (PRELIMINARY)

NOTE: DFC-1H & DFC-2H SERVE ELECTRICAL-134. DFC-1H & DFC-2H THERMOSTATS SHALL HAVE HEATING LOCKED OUT. ONE UNTI SHALL RUN A TIME WITH THE OTHER AS BACK UP.

SEQUENCE OF OPERATION



GENERAL:
THE NETWORK THERMOSTAT SHALL BE PROGRAMMED AS DIRECTED BY THE DISTRICT FOR REQUIRE SETPOINTS AND ALARMS DURING OCCUPIED AND UNOCCUPIED PERIODS. THE UNIT SHALL ENABLE THE SUPPLY FAN AND DX COOLING OR HEATING TO MAINTAIN ZONE TEMPERATURE SETPOINT AS COMMANDED BY THE ZONE THERMOSTAT.

COOLING:
ON A CALL FOR COOLING, DX COOLING SHALL BE ENABLED TO MAINTAIN ROOM COOLING SETPOINT.

HEATING:
ON A CALL FOR HEATING, DX HEATING SHALL BE ENABLED TO MAINTAIN ROOM HEATING SETPOINT.

ALARMS:
TEMPERATURE ALARM SHALL ACTIVATE ANYTIME THE SPACE TEMPERATURE EXCEEDS THE DEFINED LIMITS.

1 **INDOOR FAN COIL UNIT CONTROL DETAIL**
SCALE: NONE

NOTE: DFC-1G AND CRAC-1 SERVE MDF-133. DFC-1G SHALL HAVE A HIGHER TEMPERATURE SETPOINT TO WORK AS A BACKUP FOR CRAC-1

SEQUENCE OF OPERATION

GENERAL:
THE NETWORK THERMOSTAT SHALL BE PROGRAMMED AS DIRECTED BY THE DISTRICT FOR REQUIRE SETPOINTS AND ALARMS DURING OCCUPIED AND UNOCCUPIED PERIODS. THE UNIT SHALL ENABLE THE SUPPLY FAN AND DX COOLING TO MAINTAIN ZONE TEMPERATURE SETPOINT AS COMMANDED BY THE ZONE THERMOSTAT.

COOLING:
ON A CALL FOR COOLING, STAGES OF DX COOLING SHALL BE ENABLED TO MAINTAIN ROOM COOLING SETPOINT.

ALARMS:
SAFE TEMPERATURE ALARM SHALL ACTIVATE ANYTIME THE SPACE TEMPERATURE EXCEEDS THE DEFINED LIMITS.
SUPPLY SAFE TEMPERATURE ALARM SHALL ACTIVATE ANYTIME DURING HEATING OR COOLING IF THE LEAVING AIR TEMPERATURE EXCEEDS THE DEFINED LIMITS.

BID SET (PRELIMINARY)

COLD WATER CALCULATIONS

DESIGN CRITERIA

Total estimated demand (GPM) from fixture calc sheet:			76
1. Pressure @ Street Main (Static Pressure - information can be aquired from the local Water Purveyor)			75
2. Pressure loss due to height (from buried depth below grade to the highest most point in the system - above ceiling, floor level of a multi-story building, etc…)	17	ft. x .434	7.378
3. Pressure loss thru meter (Note: losses may vary from 2 PSI up to 5 PSI - verify meter type and losses with the local Water Purveyor)			5
4. Pressure loss thru other devices (i.e., BFP) (Note: losses may vary from 8 PSI up to 15 PSI - verify BFP type and losses with the local Water Purveyor)			10
5. Total pressure loss (add lines 2, 3 & 4)			22.378
6. Pressure required at highest fixture (Note: 20 PSI for a Flush Tank Water Closet and 25 PSI for a Flush Valve Water Closet)			25
7. Pressure available for Friction Loss (line1-line 5-line 6)			27.622
8. Total developed length of run (Note: Add an addition 25% of total pipe length to account for equivalent length of fittings and valves).			350

FRICTION LOSS CALCULATION

from line 7 27.622 PSI X 100 = 7.89 PSI/100 ft.
from line 8 350

NOTE: IF YOU END UP WITH A (-) NEGATIVE VALUE, A BOOSTER PUMP WILL BE REQUIRED.
IF SO, REFER TO BOOSTER PUMP CALCULATION SHEET.

Cold Water Service Required: 2

Water meter size required, based on above demand: -

WATER SIZING

(SIZED PER CPC 2022 - APPENDIX A)

NOTES:
(1) TRAP PRIMER CONNECTION ONLY WHERE NOTED ON PLANS.
(2) TEMPERED OR HOT WATER ONLY WHERE INDICATED ON PLANS.
(3) FLOOR SINKS SERVING FIRE SPRINKLER RISER ROOMS REQUIRE A 6" WASTE AND 3" VENT CONNECTION.

PLUMBING GENERAL NOTES

1. PLANS ARE NOT FOR CONSTRUCTION UNTIL APPROVED BY THE AUTHORITY HAVING JURISDICTION. THE CONTRACTOR SHALL NOT ORDER ANY MATERIALS OR INSTALL ANY EQUIPMENT, PIPING, ETC. UNTIL PLANS ARE APPROVED BY THE AUTHORITY HAVING JURISDICTION.
2. ALL FIXTURES WHITE UNLESS OTHERWISE NOTED.
3. ALL FIXTURES SHALL BE PROVIDED WITH STOP VALVES. VALVES MAY BE IN SUPPLY PIPES OR INTEGRAL WITH SUPPLY FITTINGS.
4. WHERE FLUSHOMETER VALVE CONFLICTS WITH GRAB BARS, CONTRACTOR SHALL MODIFY VACUUM BREAKER TUBE TO ENSURE VALVE AND GRAB BAR ARE ADEQUATELY SEPARATED.
5. CONTRACTOR SHALL COORDINATE ALL PLUMBING LINE LOCATIONS WITH OTHER TRADES.
6. REFER TO ARCHITECTURAL DRAWINGS FOR EXACT LOCATION OF FIXTURES AND MOUNTING HEIGHTS.
7. CONTRACTOR SHALL OBTAIN ALL NECESSARY PERMITS AND PAY ALL COSTS INVOLVED.
8. INSULATE HOT & COLD WATER SUPPLY PIPES, STOPS, P-TRAP AND DRAIN LINE AT EACH ADA LAVATORY AND SINK WITH ANTI-MICROBIAL, SEAMLESS, VANDAL RESISTANT PROTECTIVE PIPE COVER "PROWRAP" OR EQUAL.
9. ALL PIPE PENETRATIONS THROUGH ROOF SHALL BE FLASHED SIMILAR TO VTR'S.
10. ALL SANITARY SEWER VENT PIPE PENETRATIONS THROUGH ROOF SHALL TERMINATE AT A MINIMUM DISTANCE OF 25' FROM ANY FRESH AIR INTAKE.
11. MINIMUM LOCAL CONNECTION SIZES SHALL BE MADE IN ACCORDANCE WITH THE SCHEDULE OF CONNECTIONS.
12. ALL WATER PIPING SIZED IN ACCORDANCE WITH 2022 CPC, APPENDIX A.
13. GAS PIPING SIZED IN ACCORDANCE WITH TABLE 1216.2, 2022 CPC. FOR XXXX MBH AND A MAXIMUM LENGTH OF XXXX'.
14. ALL WASTE, WATER, FIRE AND STORM DRAIN PIPING SHALL BE STUBBED 5' OUTSIDE BUILDING TO CONNECTION POINT SHOWN. SEE CIVIL DRAWINGS FOR CONTINUATION. CONTRACTOR SHALL MAKE FINAL CONNECTIONS TO SITE PIPING.
15. COORDINATE ALL TRENCHING WITH CONTRACTOR.
16. ALL HOSE BIBBS SHALL BE 3/4" AND MOUNTED AT 12" ABOVE FINISHED FLOOR UNLESS OTHERWISE NOTED. ALL HOSE BIBBS SHALL HAVE A NON-REMOVABLE VACUUM BREAKER.
17. PROVIDE MATERIALS IN ACCORDANCE WITH 2022 CALIFORNIA PLUMBING CODE AND STATE CODE REGULATIONS.
18. SEISMIC SUPPORTS AND BRACING FOR ALL PIPING SHALL BE PROVIDED IN ACCORDANCE WITH 2022 CBC SECTION 1613, LATEST EDITION OF ASCE/SEI 7, CCR SECTION 13.6.1 AND NFPA 13 STANDARDS FOR SUPPORT AND ANCHORAGE. METHODS AND MATERIALS PUBLISHED BY SMACNA AND APPROVED BY STATE AGENCIES SHALL BE USED.
19. THE CONDENSATE DRAIN RECEPTACLE (CDR) AND ASSOCIATED WASTE AND VENT PIPING IS NOT REQUIRED AT SITES WHERE THE ROOF DRAINS CONNECT TO A STORM DRAIN SYSTEM. CD LINES FROM ROOFTOP MECHANICAL EQUIPMENT MAY SPILL OVER ROOF DRAINS WITH A TURNED-DOWN ELBOW.
20. THE WATER CLOSET CONTROLS (FLUSH HANDLE) MUST BE LOCATED ON THE CLEAR/ WIDE SIDE OF THE ACCESSIBLE WATER CLOSETS.
21. HAZARDOUS AND COMBUSTIBLE MATERIAL LINES (E.G. GAS LINES) GREATER THAN 1" IN DIAMETER AND NON-HAZARDOUS LINES (E.G. WATER LINES) GREATER THAN 3" IN DIAMETER REQUIRE SEISMIC BRACING PER 2022 CBC SECTION 1617A.1.26. ACCEPTABLE SEISMIC BRACING DETAILS INCLUDE THOSE SHOWN IN THE EATON/COOPER B-LINE OPM-0052-13 WITH 2022 REVISIONS OR MASON INDUSTRIES OPM-0043-13 WITH 2022 REVISIONS. CONTRACTOR TO CONFIRM BRACING DETAILS WITH DESIGN TEAM.
22. ANY HORIZONTAL DRAINAGE PIPE SERVING SINKS OR URINALS SHALL BE PROVIDED WITH A CLEANOUT AT ITS UPPER TERMINAL PER CPC 2022 707.4. A CLEANOUT SHALL BE FURNISHED ABOVE THE FIXTURE CONNECTION FITTING SERVING EACH URINAL, REGARDLESS OF THE LOCATION OF THE URINAL IN THE BUILDING.
23. A CLEANOUT IS REQUIRED ON ALL RAINWATER AND OVERFLOW LEADERS AT THE BASE OF THE LEADER BEFORE IT DROPS BELOW GRADE TO CONNECT TO THE HORIZONTAL DRAIN. CLEANOUTS SHALL ALSO BE INSTALLED ON LEADERS AT INTERVALS NOT TO EXCEED 100 FET IN STRAIGHT HORIZONTAL RUNS, AND FOR EACH AGGREGATE HORIZONTAL CHANGE IN DIRECTION EXCEEDING 135 DEGREES.
24. ALL PIPING SHALL BE LABELED AS PER SPECIFICATION 22 05 53.
25. ALL NEW WATER PIPING SHALL BE DISINFECTED PER SPECIFICATION SECTION 22 11 16.

PLUMBING FIXTURE SCHEDULE

SYMBOL	MAKE	NUMBER	DESCRIPTION/TRIM	SUPPORT	MATERIAL	LOCATION
WC-1 ACCESSIBLE	KOHLER	K-96057-0 HIGHLINE	FLUSH VALVE WATER CLOSET WITH ELONGATED BOWL, TOP SPUD, 16-5/8" RIM HEIGHT.	FLOOR	VIT. CHINA	---
	SLOAN VALVE (SENSOR) BATTERY	OPTIMA 111-1.28	LOW CONSUMPTION SENSOR FLUSH VALVE (1.28 GPF), PROVIDED WITH MANUAL OVERRIDE BUTTON. KOHLER K-4731-C OPEN FRONT WHITE SEAT. PROVIDE SUPPLY AND STOP, COMMERCIAL CLOSET CARRIER. MOUNTING HEIGHT PER ARCHITECTURAL PLANS, FLUSH VALVE LEVER ON WIDE SIDE OF STALL.			
WC-2	KOHLER	K-96053-0 WELLCOMME	FLUSH VALVE WATER CLOSET WITH ELONGATED BOWL, TOP SPUD, 15-1/4" RIM HEIGHT.	FLOOR	VIT. CHINA	---
	SLOAN VALVE (SENSOR) BATTERY	OPTIMA 111-1.28	LOW CONSUMPTION SENSOR FLUSH VALVE (1.28 GPF), PROVIDED WITH MANUAL OVERRIDE BUTTON. KOHLER K-4731-C OPEN FRONT WHITE SEAT. PROVIDE SUPPLY AND STOP, COMMERCIAL CLOSET CARRIER. MOUNTING HEIGHT PER ARCHITECTURAL PLANS, FLUSH VALVE LEVER ON WIDE SIDE OF STALL.			
UR-1 ACCESSIBLE	KOHLER	K-4991-ET BARDON	WASHOUT URINAL, 3/4" TOP SPUD, 2" THREADED OUTLET.	WALL	VIT. CHINA	---
	SLOAN VALVE (SENSOR) BATTERY	SFSM 186-0.125	LOW CONSUMPTION SENSOR FLUSH VALVE (0.125 GPF), PROVIDED WITH MANUAL OVERRIDE BUTTON. PROVIDE COMMERCIAL CARRIER AND WALL CLEANOUT. MOUNTING HEIGHT PER ARCHITECTURAL PLANS.			
L-1 ACCESSIBLE	KOHLER	K-2209 CAXTON	LAVATORY, 14" X 17" OVAL, UNDERMOUNT SINK, PROVIDE P-TRAP, FLAT GRID STRAINER AND STOPS.	COUNTER	VIT. CHINA	LOCKER RM
	CHICAGO FAUCET (MANUAL)	420-T41E2805 ABCP	HOT AND COLD SUPPLY , 4" CENTERS, 4-1/4" LEVER HANDLE, 0.5 GPM, 4-5/8" CENTER TO CENTER SPOUT LOCATION, ANTI-SCALD. (ASSE 1070 CERITIFIED)			
L-2 ACCESSIBLE	KOHLER	K-2031 GREENWICH	LAVATORY, 20-1/4" X 18-1/4" X 4-1/4, SINGLE HOLE. PROVIDE "CHICAGO" 327-XCP FLAT GRID STRAINER, P-TRAP, SUPPLIES AND STOPS, AND COMMERCIAL FLOOR MOUNTED WALL CARRIER WITH CONCEALED ARMS.	WALL	VIT. CHINA	RESTROOM
	CHICAGO FAUCET (SENSOR) BATTERY	116.221.AB.1	HOT AND COLD SUPPLY, SINGLE HOLE, SENSOR OPERATED FAUCET, 0.5 GPM, SET TIMER TO 20 SECONDS. USER ADJUSTABLE TEMPERATURE CONTROL MIXER, 6 VOLT LITHIUM BATTERY INCLUDED.			
	LEONARD	170-ALF-BP BRKT	THERMOSTATIC MIXING VALVE, INTEGRAL CHECK VALVES, MOUNTING BRACKET, LEAD FREE, 0.25 GPM MIN. FLOW, LOCKING TEMPERATURE REGULATOR, 3/8" INLETS, 3/8" OUTLET, SET AT A MAX. TEMP. OF 110° F	BRACKET		
SH-1 ACCESSIBLE	MOEN	3988EP SERIES	SHOWER TRIM, SINGLE FUNCTION HAND SHOWER WITH 30" SLIDE BAR, DOUBLE CHECK VALVE IN HANDLE, 69" HOSE, 1.75 GPM. PROVIDE WITH "MOEN" A721 SERIES DROP ELL FOR HANDSHOWER, PROVIDE "MOEN" S1001EP SERIES 10" RAINSHOWER HEAD @ 1.75 GPM, PROVIDE "MOEN" S110 SERIES 14" SHOWER ARM AND FLANGE FOR THE SHOWERHEAD. PROVIDE "MOEN" M-CORE 3 SERIES VALVE TRIM WITH INTEGRATED DIVERTER, TEMPERATURE AND PRESSURE BALANCE SYSTEM CERTIFIED TO (ASME A112.18.1/CSA B-125-1, ASSE 1016)	WALL	---	LOCKER RM
MS-1	ACORN	TCR-28	28" x 28" x 12" HIGH TERRAZZO CORNER MOP SINK WITH INTEGRAL STAINLESS STEEL CAP, INTEGRAL 3" FLOOR DRAIN SUPPLIED WITH REMOVABLE STAINLESS STEEL GRID STRAINER. PROVIDE 1453-BB STRAINER AND P-TRAP. PROVIDE ACORN KH36 HOSE WITH WALL HANGER, KMH MOP HANGER WITH 3 SPRING LOADED GRIPS ON BRACKET.	FLOOR (CORNER)	PORTLAND CEMENT (WHITE W/WHITE CHIPS)	JANITOR RM 121
	CHICAGO (FAUCET)	897-CP	WALL MOUNTED H & CW FAUCET WITH VACUUM BREAKER SPOUT WITH PAIL HOOK, WALL BRACE, LEVER HANDLES, PROVIDE SUPPLIES AND STOPS.			
DF-1 ACCESSIBLE	ELKAY (SURFACE)	LZSTLG8W SLK	DUAL HEIGHT DRINKING FOUNTAIN AND BOTTLER FILLER. FILTERED, REFRIGERATED, 8.0 GPH OF 50°F. "FLEXI-GUARD" BUBBLERS, ELECTRONIC FRONT AND SIDE PUSH BUTTONS. ELECTRONIC SENSOR BOTTLER FILLER. PROVIDE MLP200 MOUNTING FRAME, P-TRAPS, SUPPLY AND ISOLATION BALL VALVE. ELEC.: 115V, 60Hz, 360W, 6 FLA	WALL	LIGHT GRAY FINISH	CORRIDOR RM 118
KS-1 KITCHEN	ELKAY	ELUHAD 281655	SINGLE COMPARTMENT UNDERMOUNT SINK, 18-1/2" X 30-1/2" X 5-3/8" DEPTH, 18 GAUGE TYPE 304 STAINLESS STEEL, 8" CENTERS, REAR CENTER DRAIN LOCATION. PROVIDE BASKET STRAINER AND TAILPIECE, P-TRAP. SUPPLIES AND STOP.	COUNTER	STAINLESS STEEL	KITCHEN RM 109
	CHICAGO FAUCET (MANUAL)	1100-E35-317ABCP	HOT AND COLD SUPPLY, 8" CENTERS, L-TYPE SWING SPOUT, 4" WRIST BLADES, 1.5 GPM AERATOR.			
GD	INSINKERATOR	EVOLUTION COMPACT	FOOD WASTE DISPOSER, MULTI GRIND. PROVIDE WITH INSINKERATOR "QUICK LOCK" MOUNTING CONFIGURATION.			
	LEONARD	170-ALF-BP BRKT	THERMOSTATIC MIXING VALVE, INTEGRAL CHECK VALVES, MOUNTING BRACKET, LEAD FREE, 0.25 GPM MIN. FLOW, LOCKING TEMPERATURE REGULATOR, 3/8" INLETS, 3/8" OUTLET, SET AT A MAX. TEMP. OF 110° F	BRACKET		
DSN	ZURN	Z199	DOWNSPOUT NOZZLE, NICKEL BRONZE BODY. DECORATIVE FACE OF WALL FLANGE AND OUTLET NOZZLE.	WALL	CERAMIC	NORTH EXTERIOR
RD/OFD	ZURN	Z165	COMBINATION ROOF AND OVERFLOW DRAINS WITH UNDERDECK CLAMP, SUMP RECEIVER AND CAST IRON DOME	ROOF	CAST IRON	ROOF

EQUIPMENT SCHEDULE

SYMBOL	MAKE	NUMBER	DESCRIPTION/TRIM	LOCATION	DETAIL
EWH 1	A.O. SMITH	DSE-100A	ELECTRIC WATER HEATER, 70-1/4" HIGH X 28"□. 100 GALLON CAPACITY, 88 GPH RECOVERY AT 80° F. TEMP. RISE, DIRECT VENT. SET AT 140° F. OPERATING WEIGHT. = 1400 LBS., **ELECTRICAL: 15KW, 208V, 1PH, 72.1 AMPS.**	MECHANICAL ROOM 132	2 P-402
CP 1	B & G	NBF-36	CIRCULATION PUMP, LEAD FREE BRONZE CONSTRUCTION, 10 GPM, 25' HEAD. PROVIDE TIMER KIT AND AQUASTAT. 1-1/4" CONNECTION, 3-SPEED OPERATION. WEIGHT: 13.1 LBS **ELECTRICAL: 115V, 60 HZ, 270W, 1PH**	MECHANICAL ROOM 132	2 P-402
ET 1	THERM-X-TROL	ST-5C	THERMAL EXPANSION TANK, 2 GALLONS TOTAL VOLUME, 0.45 MAXIMUM ACCEPTANCE FACTOR. SECURE WITH HOLDRITE QUICK STRAP #QS-U BRACKET.	MECHANICAL ROOM 132	2 P-402
LAC 1 3	BEACON MEDAES	LAS02D-080 V-D	OIL-LESS SCROLL LABORATORY AIR, SINGLE POINT CONNECTION, BASE MOUNT, DUPLEX DESSICANT DRYING SYSTEM WITH PURGE CONTROL, PIPED 3-VALVE BYPASS ASSEMBLY, ELECTRONIC DRAIN VALVE, LIQUID LEVEL GUAGE GLASS, SAFETY RELIEF VALVE AND MANUAL DRAIN VALVE. V-BELT DRIVEN COMPRESSOR, 3600 RPM, ONE INLET AIR FILTER, INTEGRAL AIR-COOLED AFTERCOOLER, INTEGRATED DRAIN TRAP WITH AUTOMATIC SOLENOID DRAIN VALVE, INCLUDES FLEX CONNECTOR, SAFETY RELIEF VALVE, ISOLATION VALVE AND CHECK VALVE. PROVIDE WITH HCAI (OSHPD) PRE-APPROVED SEISMICALLY RESTRAINED ISOLATION. DRYING INCLUDES PREFILTER RATED FOR 0.01 MICRON WITH AUTOMATIC DRAIN AND ELEMENT CHANGE INDICATOR. CONTROL SYSTEM INCLUDES TOUCH SCREEN CONTROLS, CIRCUIT BREAKER DISCONNECTS FOR EACH MOTOR. WEIGHT: 1,134 LBS ELECTRICAL: 460V, 3PH, 2 HP SYSTEM	EQUIPMENT ROOM 136	1 P-403
VAC 1	POWEREX	IBVS0202	DIRECT DRIVEN SYSTEM, 2 HP SYSTEM, ROTARY VANE VACUUM PUMP. VERTICAL TANK MOUNT, 11 SCFM AT 19"HgV, AIR COOLED, OIL DRAIN VALVE ASSEMBLY, MOUNTED ON VIBRATION ISOLATORS, 10 MICRON INLET FILTER. FLEXIBLE CONNECTOR. VACUUM RECEIVER RATED FOR MINIMUM 200 PSIG DESIGN PRESSURE. CHECK VALVE BETWEEN INLET FILTER AND VACUUM PUMP. EPOXY LINED 30 GALLON VERTICAL RECEIVER WITH VACUUM GAUGE AND MANUAL DRAIN. EXHAUST FLEX HOSE WITH DRIP LEG AND VALVE. PURCHASE WITH SPEEDAIRE XDV SERIES TIMED ELECTRIC AUTO DRAIN. 115V WEIGHT: 326 LBS **ELECTRICAL: 208V, 3PH, 8.0 FLA.**	EQUIPMENT ROOM 136	1 P-402
DI 1 2	CULLIGAN	D-350-MB	CULLIGAN DEIONIZER SYSTEM, PORTABLE EXCHANGE DEIONIZERS. PROVIDE: CATION RESIN TANK, ANION RESIN TANK, MIXED BED POLISHER, 1 MICRON FILTER, RESIN TRAP FILTER, WATER QUALITY MONITOR, RESISTIVITY SENSOR AND GAUGES.	EQUIPMENT ROOM 136	4 P-401
DIWP 1 1	GOULDS	3SV5GC4 F60N	DIONIZED WATER PUMP. MULTI STAGE, 15 GPM, 126.8FT HEAD. **ELEC: 208V, 1HP, 4.1A**	EQUIPMENT ROOM 136	4 P-401
RPBFP 1	ZURN	975XL	REDUCED PRESSURE BACKFLOW PREVENTER. PROVIDE WITH FULL PORT BALL VALVES, UNION AND "Y" STRAINER. 1-1/4" SIZE.	EQUIPMENT ROOM 136	4 P-401

SHEET NOTES:

1. ALL EXISTING EQUIPMENT, PIPE ROUTING, VAVLES, ETC., SHOWN ON PLANS ARE BASED ON AVAILABLE EXISTING DRAWINGS AND LIMITED SITE SURVEYS, AND SHOWN FOR CLARITY ONLY.
2. CONTRACTOR SHALL VEIFY EXISTING UNDERGROUND GAS PIPE MATERIAL AND CONTACT ENGINEER.

KEYED NOTES:

1. NEW 1"Ø GAS PIPE UNDERGROUND. LOCATE A MINIMUM 24" BELOW SUBGRADE. COORDINATE WITH ALL NEW AND EXISTING UNDERGROUND UTILITIES. SEE SHEET **C3.1**.
2. CONNECT NEW 1"Ø GAS PIPE TO EXISTING WITH SHUT-OFF VALVE AND VALVE BOX.
3. CONNECT NEW 1"Ø GAS PIPE TO EXISTING UNDERGOUND.
4. PROVIDE NEW 3"Ø UNDERGROUND GAS PIPE. LOCATE AT 24" BELOW SUBGRADE.
5. RECONNECT GAS PIPING FROM PHASE 1 TO NEW GAS PIPING IN PHASE 2.

DEMOLITION KEYED NOTES:

1. REMOVE EXISTING UNDERGROUND GAS PIPE AND ALL APPURTENENCES. INSTALL A NEW PIPE.

SHEET NO.
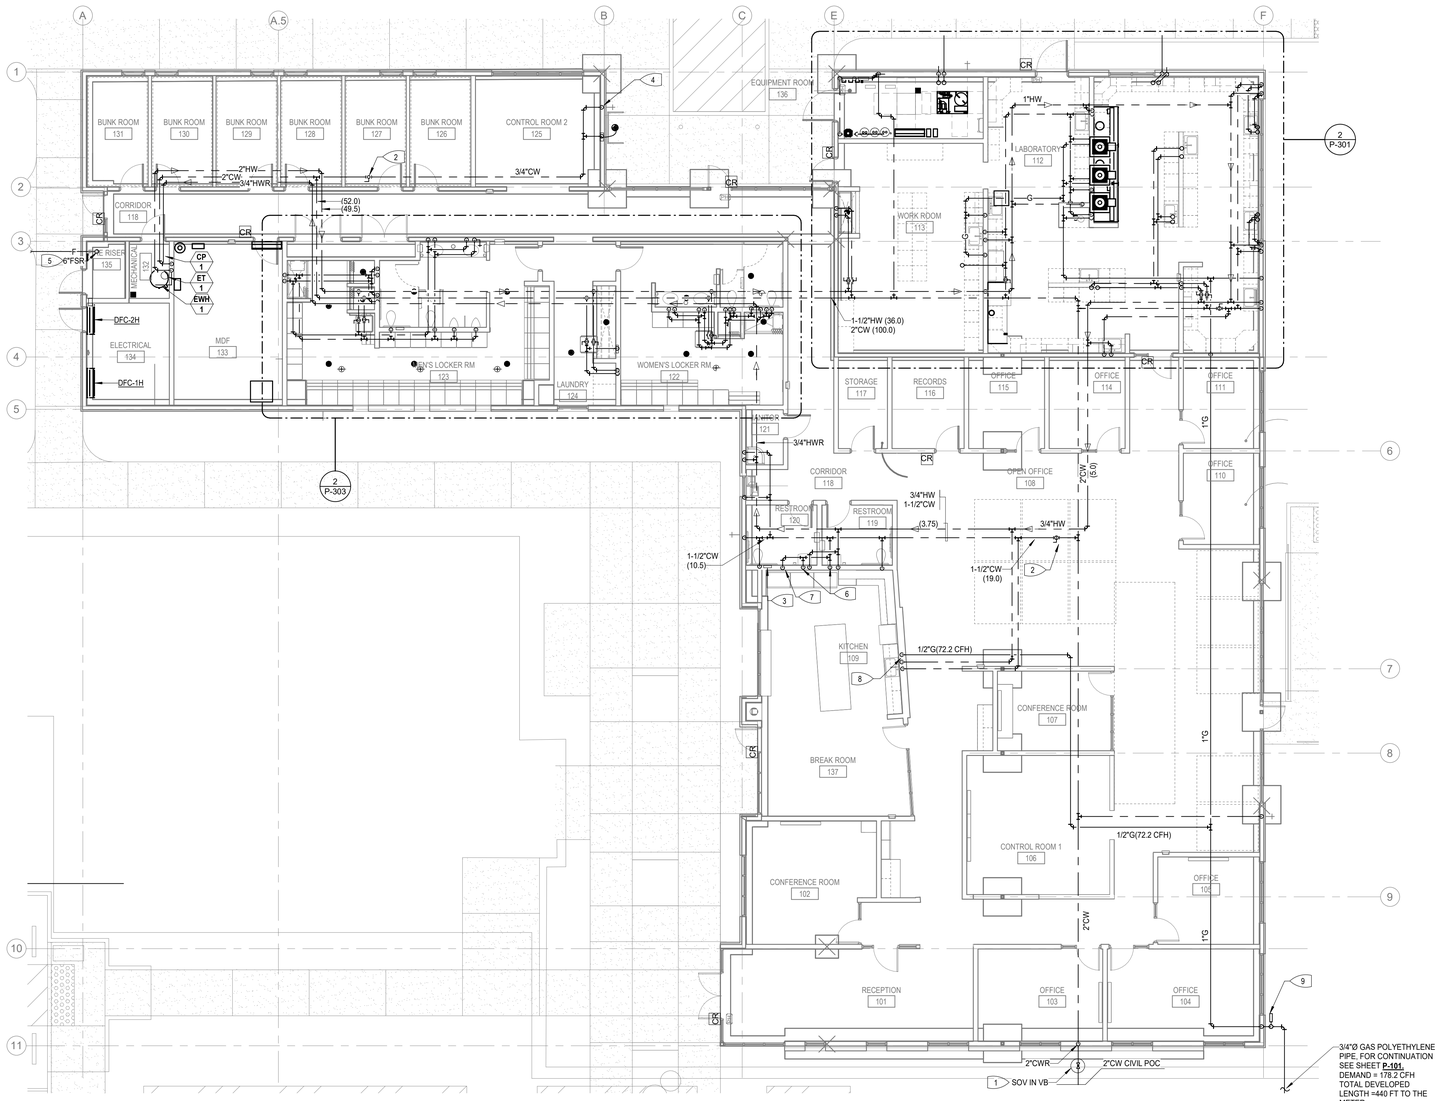
P-201

DATE: 4/24/18

BID SET (PRELIMINARY)

DATE PLOTTED: 9/16/2024 3:38:15 PM FILE LOCATION: S:\23.020 Dry Creek WWTP\drwgs\REVIT\23.020 Dry Creek WWTP MEP_r22.rvt

SHEET NOTES:



1. SEE SHEET **P-200** FOR FIXTURE IDENTIFICATION.
2. SEE SHEET **P-201** FOR WASTE AND VENT LAYOUT.
3. SEE ENLARGED SHEET **P-302** FOR AIR, VACUUM AND DI WATER LAYOUT.
4. FOR DETAILED NOTES NOT LISTED ON THIS SHEET REFER TO ENLARGED PLANS.
5. NUMBERS LISTED ON THE PLANS IN PARENTHESIS ARE WATER FIXTURE UNIT VALUES.

KEYED NOTES:

1. PROVIDE PRESSURE REDUCING VALVE IN VALVE BOX AND SET TO 75 PSI.
2. PROVIDE LINE SIZED ISOLATION BALL VALVE ACCESSIBLE ABOVE THE T-BAR CEILING.
3. PROVIDE WATER HAMMER ARRESTOR BEHIND 12" X 16" WALL ACCESS PANEL. MOUNT PANEL BELOW GRAB BAR. PROVIDE WITH ISOLATION BALL VALVE.
4. DROP 3/4"Ø COLD WATER DOWN WALL TO EXTERIOR HOSE BIB. TEE 1/2" COLD WATER LINE TO TRAP PRIMER LOCATION AND RUN TRAP PRIMER LINE TO TRENCH DRAIN. MOUNT HOSE BIB AT 30" A.F.G.
5. REFER TO FIRE SPRINKLER PLANS FOR FIRE SPRINKLER RISER LOCATION.
6. DROP 1/2"Ø CW TO FEED LAVATORY AND ICE MAKER BOX FOR REFRIGERATORS. LOCATE IMB AT 24" ABOVE FINISHED FLOOR.
7. DROP 1/2"Ø CW TO ICE MAKER BOX FOR REFRIGERATORS. LOCATE IMB AT 24" ABOVE FINISHED FLOOR.
8. DROP 1/2"Ø GAS DOWN IN WALL TO 12" ABOVE FINISHED FLOOR. PROVIDE 1/2" SHUT OFF VALVE AND FLEX PIPE FOR FUTURE CONNECTION TO GAS BURNER. TERMINATE WITH MALE PIPE THREAD FOR CONNECTION TO APPLIANCE PRESSURE REGULATOR.
9. 1"Ø GAS RISER WITH GAS PRESSURE REGULATOR FROM 9.5 PSI TO 7" W.C. INSIDE THE BUILDING.

GAS LOAD:

RANGE/STOVE = 72.2 MBH
BUNSEN BURNES = 4 MBH EACH (4 TOTAL)
FUME HOOD = 30 MBH EACH (3 TOTAL)
TOTAL MBH = **178.2 MBH**
TOTAL DEVELOPED LENGTH FROM GAS REGULATOR= 220 FEET
2022 CPC TABLE 1215.2
LESS THAN 2 PSI, PRESSURE DROP 0.5 IN W.C.

1 **ENLARGED LAB PLAN - WASTE & VENT**
1/4" = 1'-0"

2 **ENLARGED LAB PLAN - WATER & GAS**
1/4" = 1'-0"

SHEET NOTES:

1. RUN ALL WASTE AND VENT AT 1/4" PER FOOT SLOPE.
2. SEE SHEET **P-200** FOR FIXTURE IDENTIFICATION.
3. SEE OVERALL PLANS **P-201** AND **P-202** FOR CONTINUATION OF PIPING LAYOUT.
4. SEE SHEET **P-302** FOR AIR, VACUUM AND DI WATER LAYOUT.
5. NUMBERS LISTED ON THE PLANS IN PARENTHESIS ARE WATER FIXTURE UNIT VALUES. UNLESS NOTED OTHERWISE IN THE CASE OF NATURAL GAS.
6. ALL LAB EQUIPMNET IS PROVIDED BY OTHERS. FOR EQUIPMENT LAYOUT AND LIST REFER TO ARCHITECTURAL PLANS.

KEYED NOTES:

1. DROP 1"Ø HOT AND COLD WATER DOWN WALL TO BELOW FLOOR AND RUN TO SERVE THE LAB SINKS SHOWN.
2. PROVIDE LINE SIZED ISOLATION BALL VALVE ACCESSIBLE ABOVE THE T-BAR CEILING.
3. DROP 3/4"Ø HOT AND COLD WATER DOWN WALL AND RUN HORIZONTALLY BELOW THE WINDOW TIGHT TO THE BACK OF THE CABINET TO SERVE THE LAB SINK. PIPING TO THE SINK IS SHOWN OFFSET FOR CLARITY.
4. 3/4"Ø COLD WATER RISER TO ROOF HOSE BIBB.
5. 1/2"Ø COLD WATER DROP AND 1/2"Ø GAS DROP DOWN TO FUME HOOD. PROVIDE END OF LINE WATER CONNECTION WITH SOV. CONNECT GAS TO OUTLET AT THE FUME HOOD
6. DROP 1/2"Ø GAS LINE DOWN WALL AND PROVIDE EMERGENCY GAS SHUT OFF VALVE BEHIND ACCESS PANEL AND RISE GAS BACK UP TO CEILING SPACE TO FEED EACH OUTLET SHOWN ON PLANS. FOR DETAIL SEE **3/P-400**.
7. DROP 3/4"Ø HOT AND COLD WATER DOWN WALL AND TEE TO FEED EACH BACK TO BACK SINK.
8. DROP 1/2"Ø GAS DOWN WALL AND RUN TO GAS OUTLET TURRET AT THE DECK.
9. DROP 3/4"Ø HOT AND COLD WATER DOWN WALL AND RUN THROUGH THE THERMOSTATIC MIXING VALVE AND RUN TO THE EMERGENCY EYE WASH AND EMERGENCY SHOWER. SEE DETAIL **6/P-400**.
10. FOR CONTINUATION SEE SHEET **P-202.**
11. DROP 1/2"Ø COLD WATER DOWN WALL AND STUB EXPOSED BEHIND EQUIPMENT. PROVIDE 6' MINIMUM OF COILED COPPER TUBING, TO ALLOW FOR EQUIPMENT TO MOVE AWAY FROM WALL. PROVIDE WITH SHUT OFF VALVE AND 1/4"Ø COMPRESSION FITTING FOR CONNECTION TO ICE MAKER.
12. 3/4"Ø CONDENSATE DROP FROM MECHANICAL EQUIPMENT ON ROOF. ROUTE TIGHT TO UNDERSIDE OF STRUCTURE AND GRAVITY DRAIN TO DROP.
13. SPILL 3/4"Ø CONDENSATE, **LAC-1** DRAINAGE, AND **VAC-1** DRAINAGE OVER FLOOR SINK WITH 1" AIRGAP.
14. CONNECT 3"Ø ACID WASTE TO 4"Ø SANITARY SEWER.
15. DROP 1"Ø CW DOWN WALL AND DAYLIGHT TO EQUIPMENT ROOM TO RUN THROUGH **RPBFP/1**. FOR PIPE SUPPORT ON WALL SEE DETAIL **5/P-401**.
16. DROP AND RUN DRAIN FROM **RPBFP/1** TO FLOOR SINK WITH 1" AIRGAP. FOR PIPING DIAGRAM WITH VALVES SEE DETAIL **4/P-401.**
17. 1 MICRON DI WATER PRE-FILTER FOR DI WATER SYSTEM. FOR PIPING DIAGRAM REFER TO DETAIL **4/P-401**.
18. RISE 1"Ø ICW HIGH ON WALL AND RUN OVER DOORWAY AS SHOWN. FOR PIPE SUPPORT ON WALL SEE DETAIL **5/P-401**.
19. DROP 1"Ø ICW DOWN WALL AND RUN TO DIP/1. FOR PIPING DETAIL SEE **4/P-401**. FOR PIPE SUPPORT ON WALL SEE DETAIL **5/P-401**.
20. DI PIPING IS SHOWN ON ENLARGED PLAN SHEET **P-302**. THIS SHEET SHOWS DOMESTIC COLD WATER PIPING ONLY. FOR CONTINUATION OF WATER PIPING, DI WATER, REFER TO REFERENCED SHEET.
21. MOUNT DRAIN TIGHT TO WALL AND ROUTE TO SINK.
22. CONNECT DRAIN FROM **L-EQ-10** AND **L-EQ-49** TO SINK TAILBIECE. SEE DETAIL **3/P402**
23. PROVIDE **DSN** AT OVERFLOW TERMINATION POINT. REFER TO ARCHITECTURAL PLANS FOR OVERFLOW SPOUT LOCATION.
24. 3"Ø RAIN WATER LEADER TO DROP IN WALL TO BELOW GRADE. RUN AT 1/4" PER FOOT SLOPE. REFER TO CIVIL PLANS FOR POINT OF CONNECTION.
25. 2"Ø AV FROM ISLAND SINKS DROP TO BELOW GRADE AND ROUTE TO RISER LOCATION. SEE DETAIL **7/P-400**.
26. ROUTE DRAIN FROM AIR COMPRESSOR AT 1/4" PER FOOT TO FLOOR SINK WITH 1" AIRGAP.

1 ENLARGED LAB PLAN - VAC & AIR

1/4" = 1'-0"

2 ENLARGED LAB PLAN - DI WATER

1/4" = 1'-0"

SHEET NOTES:

1. SEE SHEET **P-200** FOR FIXTURE IDENTIFICATION.
2. SEE OVERALL PLAN **P-202** FOR CONTINUATION OF PIPING LAYOUT.
4. SEE SHEET **P-301** FOR WATER, WASTE AND VENT LAYOUT.
5. VACUUM LINE SIZING IS PER 2022 CPC TABLE 1323.1.4(6).

KEYED NOTES:

1. DROP A 1"DI WATER LOOP DOWN TO SINK AND RISE BACK UP WITH SHUT OFF VALVES AND BYPASS. CONNECT DI TO DI FAUCET AT COUNTER. TYPICAL.
2. DROP LA AND LV TO BELOW GRADE.
3. LINE-SIZE BYPASS VALVES ON DI WATER LOOP TO BE ACCESSIBLE ABOVE T-BAR CEILING. BYPASS VALVE TO REMAIN CLOSED.
4. 1/2" LA AND 3/4" LV DOWN IN WALL TO FUME HOOD. PROVIDE LINE-SIZE ISOLATION VALVES ACCESSIBLE BEHIND ACCESS PLATE ON THE HOOD. CONNECT VACUUM AND AIR TO CONTROLLED SERVICE FIXTURE VALVE WITH QUICK RELEASE FOR CONNECTION TO HOOD.
5. PROVIDE LINE-SIZE BYPASS VALVE ACCESSIBLE ABOVE T-BAR CEILING, TYP.
6. LA AND LV TO RISE ABOVE GRADE AND CONNECT TO THE OUTLETS ON THE COUNTERS. SEE PLANS FOR SIZING.
7. DROP LA AND LV IN WALL TO ROUTE BELOW THE COUNTERS. SEE PLANS FOR SIZING.
8. LA AND LV TO RISE TO CONNECT TO OUTLETS ON THE COUNTER.
9. FOR DOMESTIC COLD WATER SUPPLY FEEDING THE BACKFLOW PREVENTER AND THE DI WATER PRE-FILTER REFER TO ENLARGED DOMESTIC WATER PLAN **2/P-301**. AND FOR PIPING RELATED TO THE DI WATER SYSTEM REFER TO DETAIL **4/P-401**.
10. DI WATER SUPPLY TO LAB AREA.
11. DI WATER RETURN. REFER TO DETAIL **4/P-401** FOR VALVES AND CONNECTION POINT.
12. LA TO DROP BELOW GRADE. SEE PLANS FOR SIZING.
13. LV TO DROP BELOW GRADE. SEE PLANS FOR SIZING.
14. DROP 3/4" LA TO 3'-2-3/4" ABOVE FINISHED FLOOR WITH LINE-SIZED SOV. TERMINATE WITH SOUTH FACING ELL 3/4"NPT MALE ADAPTER FOR CONNECTION TO AIR COMPRESSOR.

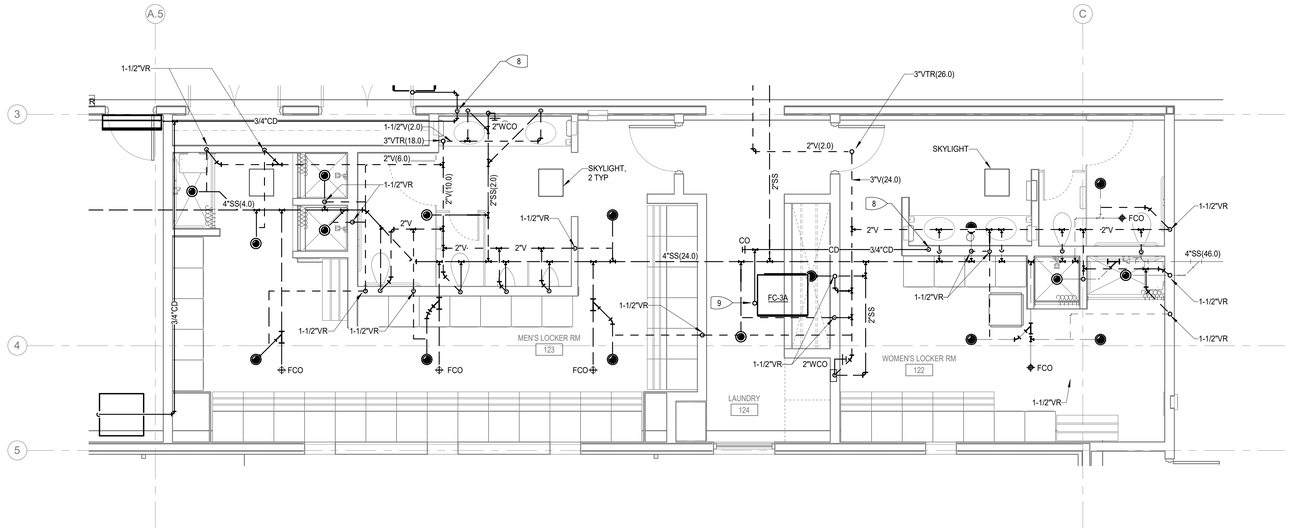
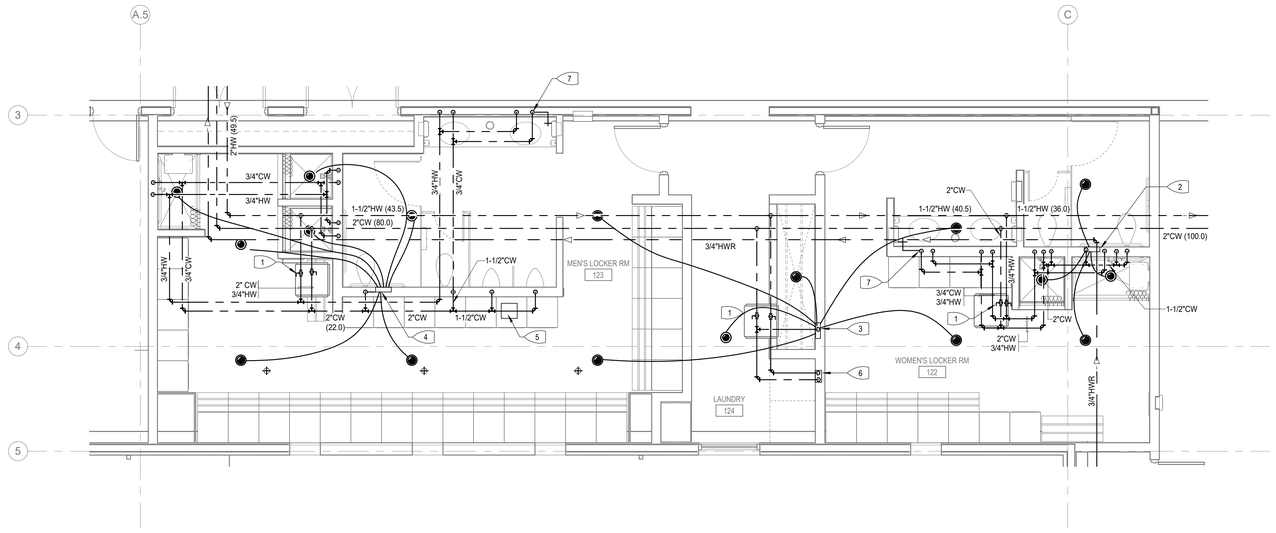
ENLARGED LAB DI WATER, AIR AND VAC PLANS



DRAWN BY: Author JOB NUMBER: 210015.01

SHEET NO.
P-302



DATE: 4/24/18

BID SET (PRELIMINARY)

DATE PLOTTED: 9/16/2024 3:38:31 PM FILE LOCATION: S:\23.020 Dry Creek WWTP\dwgs\REVIT\23.020 Dry Creek WWTP MEP_r22.rvt

1 **ENLARGED FLOOR PLAN - PLUMBING WASTE & VENT**
1/4" = 1'-0"

2 **ENLARGED FLOOR PLAN - PLUMBING WATER & GAS**
1/4" = 1'-0"

SHEET NOTES:

1. RUN ALL WASTE AND VENT AT 1/4" PER FOOT SLOPE.
2. SEE SHEET **P-200** FOR FIXTURE IDENTIFICATION.
3. SEE OVERALL PLANS **P-201** AND **P-202** FOR CONTINUATION OF PIPING LAYOUT.
4. NUMBERS LISTED ON THE PLANS IN PARENTHESIS ARE WATER OR WASTE FIXTURE UNIT VALUES.

KEYED NOTES:

1. PROVIDE LINE SIZED ISOLATION BALL VALVE ACCESSIBLE ABOVE 24" X 24" CEILING ACCESS PANEL.
2. PROVIDE TRAP PRIMER AND WATER HAMMER ARRESTOR BEHIND 12" X 16" WALL ACCESS PANEL. MOUNT PANEL BELOW GRAB BAR. MAINTAIN 12" A.F.F. FOR THE TRAP PRIMER LOCATION PER CODE. RUN TO FLOOR DRAINS SHOWN ON PLAN. SEE DETAIL **5/P-400**.
3. PROVIDE TRAP PRIMER BEHIND 12" X 16" WALL ACCESS PANEL. MOUNT PANEL ABOVE LAUNDRY FOLDING TABLE. RUN TO FLOOR DRAINS SHOWN ON PLANS. SEE DETAIL **2/P-401**.
4. PROVIDE TRAP PRIMER BEHIND 12" X 16" WALL ACCESS PANEL. MOUNT PANEL BELOW GRAB BAR. MAINTAIN 12" A.F.F. FOR THE TRAP PRIMER LOCATION PER CODE. RUN TO FLOOR DRAINS SHOWN ON PLAN. SEE DETAIL **2/P-401**.
5. PROVIDE WATER HAMMER ARRESTOR ABOVE 14" X 14" CEILING ACCESS PANEL. PROVIDE WITH ISOLATION BALL VALVE.
6. DROP 3/4" HOT AND COLD WATER DOWN WALL AND RUN TO WASHING MACHINE BOX. MAKE FINAL CONNECTION TO CLOTHES WASHER.
7. DROP 3/4" COLD WATER DOWN WALL FOR LAVATORY CONNECTION AND TEE 3/4" IN WALL FOR HOSE BIBB BELOW LAV COUNTER.
8. DROP 3/4"CONDENSATE IN WALL TO SINK TAIL PIECE. SEE DETAIL **3/P-402**.
9. CONNECT 3/4"CONDENSATE TO MECHANICAL EQUIPMENT WITH CLEANOUT. RISE CONDENSATE UP TIGHT TO STRUCTURE AND GRAVITY DRAIN TO DROP.

BID SET (PRELIMINARY)

MEP COMPONENT ANCHORAGE NOTE

ALL MECHANICAL, PLUMBING AND ELECTRICAL COMPONENTS SHALL BE ANCHORED AND INSTALLED PER THE DETAILS ON THE AHJ APPROVED CONSTRUCTION DOCUMENTS. THE FOLLOWING COMPONENTS SHALL BE ANCHORED AND BRACED TO MEET THE FORCE AND DISPLACEMENT REQUIREMENTS PRESCRIBED IN THE 2019 CBC SECTIONS 1617A.1.18 THROUGH 1617A.1.26 AND ASCE 7-16 CHAPTERS 13, 26 AND 30:

1. ALL PERMANENT EQUIPMENT AND COMPONENTS.
2. TEMPORARY, MOVEABLE OR MOBILE EQUIPMENT THAT IS PERMANENTLY ATTACHED (E.G. HARD WIRED) TO THE BUILDING UTILITY SERVICES SUCH AS ELECTRICITY, GAS OR WATER. "PERMANENTLY ATTACHED" SHALL INCLUDE ALL ELECTRICAL CONNECTIONS EXCEPT PLUGS FOR 110/20 VOLT RECEPTACLES HAVING A FLEXIBLE CABLE.
3. TEMPORARY, MOVEABLE OR MOBILE EQUIPMENT WHICH IS HEAVIER THAN 400 POUNDS OR HAS A CENTER OF MASS LOCATED 4 FEET OR MORE ABOVE THE ADJACENT FLOOR OR ROOF LEVEL THAT DIRECTLY SUPPORTS THE COMPONENT IS REQUIRED TO BE RESTRAINED IN A MANNER APPROVED BY THE AHJ.

THE FOLLOWING MECHANICAL AND ELECTRICAL COMPONENTS SHALL BE POSITIVELY ATTACHED TO THE STRUCTURE, BUT NEED NOT DEMONSTRATE DESIGN COMPLIANCE WITH THE REFERENCES NOTED ABOVE. THESE COMPONENTS SHALL HAVE FLEXIBLE CONNECTIONS PROVIDED BETWEEN THE COMPONENT AND ASSOCIATED DUCTWORK, PIPING, AND CONDUIT. FLEXIBLE CONNECTIONS MUST ALLOW MOVEMENT IN BOTH TRANSVERSE AND LONGITUDINAL DIRECTIONS:

A. COMPONENTS WEIGHING LESS THAN 400 POUNDS AND HAVING A CENTER OF MASS LOCATED 4 FEET OR LESS ABOVE THE ADJACENT FLOOR OR ROOF LEVEL THAT DIRECTLY SUPPORTS THE COMPONENT.
B. COMPONENTS WEIGHING LESS THAN 20 POUNDS, OR IN THE CASE OF DISTRIBUTED SYSTEMS, LESS THAN 5 POUNDS PER FOOT, WHICH ARE SUSPENDED FROM A ROOF OR FLOOR OR HUNG FROM A WALL.

THE ANCHORAGE OF ALL MECHANICAL, ELECTRICAL AND PLUMBING COMPONENTS SHALL BE SUBJECT TO THE APPROVAL OF THE DESIGN PROFESSIONAL IN GENERAL RESPONSIBLE CHARGE OR STRUCTURAL ENGINEER DELEGATED RESPONSIBILITY AND ACCEPTANCE BY THE AHJ. THE PROJECT INSPECTOR WILL VERIFY THAT ALL COMPONENTS AND EQUIPMENT HAVE BEEN ANCHORED IN ACCORDANCE WITH THE ABOVE REQUIREMENTS.

PIPING, DUCTWORK, AND ELECTRICAL DISTRIBUTION SYSTEM BRACING NOTE

PIPING, DUCTWORK, AND ELECTRICAL DISTRIBUTION SYSTEMS SHALL BE BRACED TO COMPLY WITH THE FORCES AND DISPLACEMENTS PRESCRIBED IN ASCE 7-16 SECTION 13.3 AS DEFINED IN ASCE 7-16 SECTIONS 13.6.5, 13.6.6, 13.6.7, 13.6.8 AND 2019 CBC, SECTIONS 1617A.1.24, 1617A.1.25 AND 1617A.1.26.

THE METHOD OF SHOWING BRACING AND ATTACHMENTS TO THE STRUCTURE FOR THE IDENTIFIED DISTRIBUTION SYSTEM ARE AS NOTED BELOW. THE STRUCTURAL ENGINEER OF RECORD SHALL VERIFY THE ADEQUACY OF THE STRUCTURE TO SUPPORT THE HANGER AND BRACE LOADS.

MECHANICAL PIPING (MP), MECHANICAL DUCTS (MD), PLUMBING PIPING (PP), ELECTRICAL DISTRIBUTION SYSTEMS (E):

MP ☐ MD ☐ PP ☐ E ■ OPTION 1: DETAILED ON THE APPROVED DRAWINGS WITH PROJECT SPECIFIC NOTES AND DETAILS.

MP ☐ MD ☐ PP ☐ E ☐ OPTION 2: SHALL COMPLY WITH THE APPLICABLE HCAI PRE-APPROVAL (OPM #) #_____.

120V BRANCH CIRCUIT VOLT DROP CONDUCTOR LENGTH CHART

LOAD IN VOLT AMPERES	LENGTH OF CONDUCTOR WIRE SIZE IN (GAUGE)				
	#12	#10	#8	#6	#4
1200VA	74	121	183	284	434
1560VA	57	93	141	218	334
1800VA	49	81	122	189	289
1920VA	46	76	115	178	271
2340VA	X	62	94	146	223
2880VA	X	51	76	118	181
3000VA	X	48	73	114	174
3900VA	X	X	56	87	134
4800VA	X	X	46	71	108

NOTES
1. THIS CHART IS FOR COPPER CONDUCTORS ONLY.
2. THIS CHART ASSUMES AN 80% POWER FACTOR AND STEEL RACEWAYS.
3. 2019 CALIFORNIA ENERGY CODE, 130.5(c) ALLOWS A MAXIMUM COMBINED VOLTAGE DROP OF 5%. THIS CHART ASSUMES A MAXIMUM DROP OF 3% FOR FEEDERS. THIS CHART PROVIDES THE MAXIMUM LENGTH OF CONDUCTORS FOR LESS THAN 2% VOLTAGE DROP ON A BRANCH CIRCUIT AT GIVEN VA LOAD.
4. USE WIRE SIZE FROM THIS CHART UNLESS LARGER CONDUCTOR SIZES ARE NOTED ON THE DRAWINGS.
5. FOR VA VALUES NOT SHOWN USE NEXT HIGHEST VALUE FROM THE CHART

GENERAL NOTES

1. PLANS ARE NOT FOR CONSTRUCTION UNTIL APPROVED BY THE AUTHORITY HAVING JURISDICTION. THE CONTRACTOR SHALL NOT ORDER ANY MATERIALS OR INSTALL ANY EQUIPMENT, PIPING, ETC. UNTIL PLANS ARE APPROVED BY THE AUTHORITY HAVING JURISDICTION.
2. PROTECT EXISTING EQUIPMENT AND FURNISHINGS FROM ANY DAMAGE DUE TO DUST, MOISTURE OR CONTACT WITH WORK CREW OR MATERIALS.
3. ADEQUATELY STRAP AND SUPPORT ALL CONDUIT WORK PER CEC. IN GENERAL, SUPPORT ALL CONDUIT WITHIN THREE FEET (3') OF OUTLET BOX, CABINET OR PANEL AND MAXIMUM TEN FEET (10') ON CENTER THEREAFTER.
4. CORE BORE SHALL BE 1" DIAMETER LARGER THAN EACH CONDUIT. SPACE CONDUIT HOLES 3" APART. SEAL AROUND CONDUIT WITH NON-SHRINK, NON-METALLIC GROUT.
5. ALL CONDUCTORS INSTALLED IN PANELBOARDS SHALL BE TRAINED, LACED, AND INSTALLED WITH PHASE TAPE ON ALL CONDUCTORS.
6. LABEL DEVICES (I.E. RECEPTACLES, ETC.) ON EACH COVER PLATE IDENTIFYING CIRCUIT AND PANEL DEVICE IS CONNECTED TO.
7. CLEAN ALL EXTERIOR AND INTERIOR SURFACES OF PANELS AND ALL MATERIAL AND METAL SHAVINGS FROM PANEL AND CABINET INTERIORS. ALL OPENINGS SHALL BE SEALED AND APPLY TOUCH-UP SPRAY PAINT WHERE NEEDED.
8. FIELD COORDINATE DEVICE LOCATIONS PRIOR TO ROUGH-IN.
9. CONTRACTOR WILL PROVIDE WARNING LABELS NOTING THE POTENTIAL FOR ELECTRIC ARC FLASH HAZARDS PER CEC 110.16. PROVIDE LABELS ON EQUIPMENT SUCH AS SWITCHBOARDS, SWITCHGEAR, PANELBOARDS, INDUSTRIAL CONTROL PANELS, METER SOCKET ENCLOSURES, MOTOR CONTROL CENTERS, MOTOR STARTER / CONTACTOR PANELS, DISCONNECTS, ETC.
   9.1. CONTRACTOR TO PROVIDE BREAKER COORDINATION STUDY COMPLETE WITH BREAKER SETTINGS.
   9.2. CONTRACTOR WILL PROVIDE ARC FLASH LABELS FOR ELECTRICAL POWER PANELS INCLUDED IN THE PROJECT SCOPE IN ACCORDANCE WITH NFPA 70E AND SPECIFICATION SECTION 26 05 73 'OVERCURRENT PROTECTIVE DEVICE COORDINATION STUDY'. THE ARC-FLASH LABELS MESSAGE OR CONTENT SHALL BE PROVIDED BY THE CONTRACTOR.
10. INSTALLATION SHALL COMPLY WITH CEC 210.4 - EACH MULTIWIRE BRANCH CIRCUIT SHALL BE PROVIDED WITH A MEANS THAT WILL SIMULTANEOUSLY DISCONNECT ALL UNGROUNDED CONDUCTORS AT THE POINT WHERE THE BRANCH CIRCUIT ORIGINATES. THEREFORE ANY CIRCUIT SHARING A COMMON NEUTRAL SHALL BE CAPABLE OF SIMULTANEOUS DISCONNECT OR DEDICATED NEUTRALS SHALL BE INSTALLED. ⚠
11. ALL EQUIPMENT AND APPURTENANCES USE IN THIS PROJECT SHALL BE UL (NRTL) LISTED AND LABELED FOR THE PURPOSE AS PER CEC-2019ART.110.3 AND 690.4B.
12. SUPPORT ENCLOSURES, BOXES AND CONDUIT INSTALLATIONS PER CEC 314.23 (A) THROUGH (H).
13. SEAL CONDUIT OPENINGS THROUGH WALLS AND CEILINGS. INSTALL ESCUTCHEON PLATES AT BUILDING INTERIOR. WHERE EQUIPMENT IS INSTALLED ON THE EXTERIOR WALL, STUB CONDUITS THROUGH WALL AND SEAL CONDUIT OPENINGS, THEN INSTALL EXTERIOR EQUIPMENT. ALSO, SEAL AROUND THE PERIMETER EDGE OF THE EQUIPMENT ENCLOSURE BETWEEN THE ENCLOSURE AND BUILDING.
14. RACEWAY SEALS. ALL RACEWAYS ENTERING/EXITING A BUILDING SHALL BE SEALED AT BOTH ENDS TO PREVENT MOISTURE AND RODENTS FROM ENTERING THE BUILDING. SEALANTS SHALL BE LISTED FOR USE WITH CABLE INSULATION, CONDUCTOR INSULATION, BARE CONDUCTOR, SHIELD, OR OTHER COMPONENTS.
15. CONDUITS INSTALLED ON ROOF AND BUILDING EXTERIOR SHALL BE RIGID GALV. STEEL (HEAVY WALL) WITH THREADED FITTINGS. CONDUIT AND WALL TO BE PAINTED OUT TO MATCH EXTERIOR FINISH.
16. EXPOSED CONDUITS TRANSITIONING FROM BELOW OR AT GRADE TO A HEIGHT OF 8 FEET AFG SHALL BE RMC OR IMC.
17. SPLICES AND TERMINALS SHALL BE COMPRESSION TYPE OF SEAMLESS PURE COPPER, TIN PLATED, LONG BARREL (TERMINALS WITH TWO-HOLE PAD AND INSPECTION WINDOW WITH NEMA DRILLING), AS MANUFACTURED BY BURNDY TYPE YS, YAZ-2N OR EQUAL. CLEAN ALL SURFACES AND INSTALL WITH OXIDE INHIBITING COMPOUND, BURNDY PENETROX-E OR EQUAL. APPLY COMPOUND BETWEEN BUS AND LUG PAD AND BETWEEN CONDUCTOR AND LUG BARREL. INSTALL COMPRESSION CONNECTORS WITH 360° CIRCUMFERENTIAL COMPRESSION DYE, BURNDY HYPRESS OR EQUAL. THE INDENTER OR OTHER TYPE TOOLS WILL NOT BE ACCEPTABLE.
18. INSTALL 'MECHANICALLY FASTENED PHENOLIC NAMEPLATE WITH WHITE LETTERING ON BLACK BACKGROUND ON ALL EQUIPMENT, INCLUDING PULL BOXES, WITH DESCRIPTION INDICATED ON DRAWINGS. NAMEPLATES SHALL READ EXACTLY AS DESCRIBED ON THE DRAWINGS. IN GENERAL NAMEPLATE LETTERING SIZE SHALL BE 3/16" HIGH FOR ALL NAMEPLATES SERVING FEEDER AND BRANCH CIRCUIT BREAKERS. ON MAIN SERVICE PANEL, DISTRIBUTION PANELS AND ALL OTHER NAMEPLATES LETTERING SHALL BE 1/4" HIGH.
   18.1. ALL SWITCHBOARDS, SWITCHGEAR, PANELBOARDS, VFD'S, MOTORS, JUNCTION BOXES, PULL BOXES, DISCONNECT SWITCHES, ETC., SHALL BE MARKED TO INDICATE EACH DEVICE OR EQUIPMENT WHERE THE POWER ORIGINATES PER CEC 408.4, FIELD IDENTIFICATION REQUIRED, (B) SOURCE OF SUPPLY.
19. EVERY CIRCUIT SHALL BE IDENTIFIED IN A CIRCUIT DIRECTORY AND AT EACH SWITCH OR CIRCUIT BREAKER PER CEC 408.4, FIELD IDENTIFICATION REQUIRED, (A) CIRCUIT DIRECTORY OR IDENTIFICATION. CIRCUIT DIRECTORIES (NEW AND MODIFIED) SHALL BE TYPE WRITTEN. HAND MADE MODIFICATIONS TO PANEL DIRECTORIES WILL NOT BE ACCEPTABLE. CIRCUIT NUMBERS AT SWITCHES OR CIRCUIT BREAKERS SHALL BE ENGRAVED OR A PERMANENTLY AFFIXED PRE-PRINTED LABELS.
20. COORDINATE EQUIPMENT LOCATIONS, CONTROL AND POWER WIRING REQUIREMENTS AND CONNECT POINTS WITH ALL APPLICABLE DISCIPLINES.
21. PROVIDE AND INSTALL FUSES PER UNIT NAMEPLATE DATA ON THE EQUIPMENT PROVIDED.
22. VERIFY CEILING TYPES PRIOR TO ORDERING LUMINAIRES. CONFIRM THAT FEATURES DESCRIBED IN THE SPECIFICATION OF THE LUMINAIRE ARE INCLUDED AS WELL AS PART NUMBERS LISTED ON SCHEDULE IN THE SUBMITTAL PACKAGE. CLARIFY NOTED DISCREPANCIES WITH ENGINEER PRIOR TO BID.
23. A LAMINATED COPY OF THE FINAL RECORD ONE LINE DIAGRAM SHALL BE PLACED IN EACH ELEC ROOM.
24. PROVIDE WIRING DEVICES AND COVER PLATES IN COLOR(S) SELECTED BY ARCHITECT. THE COLOR OF THE WIRING DEVICE AND COVER PLATE SHALL BE THE SAME UNLESS SPECIFICALLY NOTED OTHERWISE.
25. RECEPTACLE WEATHERPROOF COVERS SHALL BE LISTED "EXTRA DUTY", LOCAKBLE, METAL, IN-USE TYPE.
   25.1. GROUND FAULT CIRCUIT INTERRUPTER DUPLEX OUTLETS INSTALLED OUTDOORS SHALL BE "WEATHER RESISTANT", (WR) LISTED.
26. ALL CONDUITS PASSING THROUGH A BUILDING SHOULD BE METALLIC PER NEC ART.690.31E. ⚠
27. FOR ROOF PENETRATIONS, REFER TO ARCHITECTURAL PLANS FOR INSTALLATION REQUIREMENTS.
28. FOR WALL PENETRATION INSTALLATIONS, REFER TO ARCHITECTURAL PLANS FOR REQUIREMENTS.
29. PROVIDE "LOCK-ON" DEVICE FOR ALL CIRCUIT BREAKERS ON EMERGENCY DEDICATED CIRCUITS.
30. DRAWINGS ARE TO BE CONSIDERED DIAGRAMMATIC. CONTRACTOR SHALL ACCEPT RESPONSIBILITY IN FAMILIARIZING THEMSELVES WITH ARCHITECTURAL AND STRUCTURAL CONDITIONS ALONG WITH INHERENT SPACE LIMITATIONS. WITH THAT UNDERSTANDING SHALL PROVIDE ALL ITEMS OF LABOR, MATERIALS AND TOOLS REQUIRED TO PROVIDE A COMPLETE INSTALLATION.
31. PROVIDE SWITCHED/CONTROLLED RECEPTACLES WITH PERMANENT MARKINGS PER THE CALIFORNIA ENERGY CODE. MARKING SHALL BE AS PROVIDED BY THE MANUFACTURER OF THE RECEPTACLE, STAMPED INTO THE FACE (IE, LEVITON #5362-1PW OR EQUAL.) SYMBOL SHALL BE OF CONTRASTING COLOR TO THE DEVICE COLOR.
32. PROVIDE DATA SHEETS FOR ALL ELECTRICAL AND LOW VOLTAGE EQUIPMENT (INCLUDING BUT NOT LIMITED TO LIGHTING CONTROLS, FIRE ALARM, INTRUSION ALARM, CCTV, ACCESS CONTROL, INTERCOM, DATA/TELECOMMUNICATIONS AND SOUND REINFORCEMENT SYSTEMS) INCLUDED IN THIS PROJECT FOR REVIEW AND APPROVAL PRIOR TO ORDERING ANY EQUIPMENT OR DEVICES. REFER TO PROJECT SPECIFICATIONS FOR ADDITIONAL SUBMITTAL REQUIREMENTS.
33. SUBMIT SHOP DRAWINGS FOR ALL ELECTRICAL AND LOW VOLTAGE SYSTEMS (INCLUDING BUT NOT LIMITED TO LIGHTING CONTROLS, FIRE ALARM, INTRUSION ALARM, CCTV, ACCESS CONTROL, INTERCOM, DATA/TELECOMMUNICATIONS AND SOUND REINFORCEMENT SYSTEMS) FOR REVIEW AND APPROVAL PRIOR TO THE INSTALLATION OF ANY EQUIPMENT, DEVICES, RACEWAY OR WIRING. REFER TO PROJECT SPECIFICATIONS FOR ADDITIONAL SUBMITTAL REQUIREMENTS.

ABBREVIATION LIST

@	AT
A	AMPERE
AC	ALTERNATING CURRENT
A/C	AIR CONDITIONING
AER	ARC ENERGY REDUCTION
AF	AMP FRAME RATING OR AMP FUSE SIZE
AFF	ABOVE FINISHED FLOOR
AIC	AMPERES INTERRUPTING CAPACITY
AS	AMP SWITCH RATING
AT	AMP TRIP SETTING
AWG	AMERICAN WIRE GAUGE
BC	BARE COPPER
BD	BOARD
BFC	BELOW FINISHED CEILING
BRKR	BREAKER
BLDG	BUILDING
BMS	BUILDING MANAGEMENT SYSTEM
BPS	BOOSTER POWER SUPPLY
C	CONDUIT
C/B	CIRCUIT BREAKER
CFCI	CONTRACTOR FURNISHED, CONTRACTOR INSTALLED
CIRC	CIRCUIT
CLG	CEILING
CO	CONDUIT ONLY, WITH PULL LINE
CONT	CONTINUOUS
CPT	CONTROL POWER TRANSFORMER
CU	COPPER
CWP	METALLIC COLD WATER PIPE
(D)	DEMOLISH
DC	DIRECT CURRENT
DISC	DISCONNECT
DP	DISTRIBUTION PANEL
(E)	EXISTING
E/W	EACH WITH
EA	EACH
EL	EVENING LIGHT

- A2 2a — LED LIGHT FIXTURE { CONTROLLED BY SWITCH "a" / CONNECTED TO CIRCUIT 2 / FIXTURE TYPE: A2 } APPLIES TO ALL FIXTURES
- LED WALL SCONCE
- LED RECESSED DOWN LIGHT
- LED LIGHT FIXTURE - SEE FIXTURE SCHEDULE FOR MOUNTING
- LED LIGHT FIXTURE - WALL MOUNTED
- EXIT SIGN FIXTURE
- SHADING INDICATES FIXTURE HAS EMERGENCY BATTERY BACKUP
- SITE LIGHTING FIXTURE AND POLE
- BOLLARD AND/OR POLE TOP LIGHT FIXTURE
- GROUND MOUNTED FLOODLIGHT FIXTURE
- $ SINGLE POLE SWITCH
- $2 TWO POLE SWITCH
- $3 THREE WAY SWITCH
- $4 FOUR WAY SWITCH
- $K KEYED SWITCH
- $LV LOW VOLTAGE SWITCH
- $M MANUAL MOTOR CONTROL SWITCH
- $F FAN / LIGHT / NIGHT LIGHT SWITCH, PER MECHANICAL
- $OS WALL MOUNTED OCCUPANCY AUTO-OFF LIGHT SWITCH
- $OS DIMMER SWITCH WITH OCCUPANCY SENSOR, LINE VOLTAGE
- $ DIMMER SWITCH, LOW VOLTAGE
- OS CEILING MOUNTED OCCUPANCY AUTO-OFF LIGHT SWITCH. INSTALL PER MANUFACTURER REQUIREMENTS.
- DL CEILING MOUNTED DAY LIGHT SENSOR INSTALL PER MANUFACTURER REQUIREMENTS.
- RM ROOM CONTROLLER INSTALL PER MANUFACTURER REQUIREMENTS.
- PM PLUG CONTROLLER INSTALL PER MANUFACTURER REQUIREMENTS.
- DISCONNECT SWITCH
- F FUSED DISCONNECT SWITCH
- DUPLEX CONVENIENCE OUTLET
- DOUBLE DUPLEX CONVENIENCE OUTLET
- GROUND FAULT CIRCUIT INTERRUPTER DUPLEX OUTLET
- GROUND FAULT CIRCUIT INTERRUPTER DOUBLE DUPLEX OUTLET
- SPLIT DUPLEX OUTLET WITH: ONE CONVENIENCE OUTLET / ONE CONTROLLED OUTLET
- DOUBLE DUPLEX OUTLET WITH: ONE DUPLEX CONVENIENCE OUTLET / ONE CONTROLLED DUPLEX OUTLET
- SPECIAL OUTLET TO MATCH CAP PROVIDED WITH MACHINE
- FLUSH FLOOR BOX OR "POKE-THRU" UNIT EQUIPPED WITH FLUSH OR PEDESTAL DUPLEX RECEPTACLE AND VOICE/DATA OUTLETS AS NOTED, OR REFER TO SCHEDULE ON DRAWINGS.
- PLUGMOLD/WIREMOLD RECEPTACLE SYSTEM
- TRANSFORMER
- JUNCTION BOX, SIZE AS REQUIRED BY CODE
- FLEX CONNECTION TO FIXTURE
- TELEPHONE OUTLET BOX
- DATA OUTLET BOX
- TELEPHONE/DATA OUTLET BOX
- WAP WIRELESS ACCESS POINT OUTLET BOX IN ACCESSIBLE CEILING
- CR CARD READER OUTLET BOX AT +48"
- M CR CARD READER, MULLION MOUNT AT +48"
- PANELBOARD, RECESSED MOUNTED
- PANELBOARD, SURFACE MOUNTED
- MAIN SWITCHBOARD
- TERMINAL CABINET, RECESSED MOUNTED
- TERMINAL CABINET, SURFACE MOUNTED
- HOMERUN TO PANELBOARD OR RESPECTIVE TERMINAL
- CONDUIT RUN CONCEALED IN CEILING OR WALL, SEE SYMBOLS LIST NOTES
- CONDUIT RUN UNDERGROUND OR UNDER FLOOR
- EM EMERGENCY SYSTEM CONDUIT AND WIRES
- INSULATED GREEN GROUND CONDUCTOR
- INSULATED ISOLATED GROUND CONDUCTOR, GREEN WITH TRACER STRIPE
- CONDUIT RISER
- EXISTING EQUIPMENT, LIGHTING, DEVICES, CONDUIT, WIRING, ETC., ARE SHOWN LIGHT. NEW OR RELOCATED EQUIPMENT, LIGHTING, DEVICES, CONDUIT, WIRING, ETC., ARE SHOWN DARK.
- EXISTING ELECTRICAL EQUIPMENT TO BE REMOVED
- WIREMOLD SURFACE RACEWAY(S) WITH OUTLETS AS SHOWN OR NOTED, SEE SURFACE RACEWAY SCHEDULE
- 1 1 SYMBOLS REFERRING TO KEYED NOTES ON SAME SHEET
- EM MECHANICAL EQUIPMENT BY OTHERS, CONNECTED BY ELECTRICAL CONTRACTOR
- A DETAIL DESIGNATION, "A" SIGNIFIES DETAIL, "E-1" SIGNIFIES SHEET NUMBER
- (1)1-1/2"C INDICATES SIZE OF CONDUIT = ONE AND ONE HALF INCH CONDUIT
- NUMBER WITHIN PARENTHESIS INDICATES QUANTITY OF CONDUITS

SYMBOLS LIST NOTES:

1. MOUNT SWITCH BOXES AT +48" TO TOP OF BOX UNLESS OTHERWISE NOTED.
2. MOUNT OUTLET BOXES AT +15" TO BOTTOM OF BOX UNLESS OTHERWISE NOTED.
3. "A" ADJACENT TO OUTLET INDICATES OUTLET BOX TO BE MOUNTED ABOVE COUNTER. COORDINATE WITH COUNTER HEIGHT AND DEPTH PRIOR TO ROUGH IN. MOUNT OUTLET ABOVE COUNTERS AT:
   3.1. +46" MAX TO TOP OF BOX WHERE BOX IS INSTALLED OVER BASE CABINET.
   3.2. +44" MAX TO TOP OF BOX WITH OPEN COUNTERS WITH FORWARD APPROACH.
4. OUTLET BOXES SHALL BE:
   4.1. WALL MOUNTED - 4" SQ. x 2-1/8" DEEP MINIMUM
   4.2. CEILING MOUNTED - 4" SQ. OR 4" OCT. x 2-1/8" DEEP MINIMUM
5. OUTLET BOXES REQUIRING 1-1/4", 1-1/2" OR 2" CONDUITS SHALL BE 4-11/16" x 3-1/4" DEEP MINIMUM.
6. FLUSH MOUNTED OUTLET BOXES SHALL UTILIZE TRIM RINGS. COORDINATE TRIM RING DEPTH WITH WALL FINISH PRIOR TO ROUGH-IN.
7. NO CROSSBARS ON CONDUIT RUN INDICATES MINIMUM 3/4" CONDUIT (OR SURFACE RACEWAY EQUIVALENT), TWO #12 CU CONDUCTORS PLUS 1#12 CU GND. CROSSBARS INDICATE NUMBER OF #12 CU CONDUCTORS IN CONDUIT. CONDUCTOR SIZES OTHER THAN #12 NOTED ON DRAWINGS. INCREASE CONDUIT SIZE AS REQUIRED TO ACCOMMODATE C.E.C. WIRE FILL REQUIREMENTS. INCLUDE ADDITIONAL BOND WIRE IN ALL PVC AND FLEXIBLE CONDUIT. LONG CROSSBAR INDICATES NEUTRAL CONDUCTOR, SHORT CROSSBAIRS INDICATE PHASE CONDUCTORS.
8. INCREASE BRANCH CIRCUIT CU CONDUCTOR SIZES AS REQUIRED BY THE 120V BRANCH CIRCUIT VOLT DROP CONDUCTOR LENGTH CHART BELOW. USE CONDUCTOR LENGTHS AS FIELD MEASURED, BASED UPON MEASURED FIELD ROUTING LENGTHS. INCREASE MINIMUM CONDUIT SIZE AS REQUIRED TO ACCOMMODATE A MAXIMUM 40% CONDUCTOR FILL OF THE BRANCH CIRCUIT CONDUCTORS. WHERE NECESSARY, PROVIDE A JUNCTION BOX AT ACCESSIBLE CEILING SPACE TO CONVERT THE LAST 15 FEET OF CONDUCTORS TO #10 AWG TO ACCOMMODATE TERMINATION OF CONDUCTORS AT WIRING DEVICES, LIGHTING FIXTURES, CIRCUIT BREAKER, ETC.
9. INSTALL CU GROUND CONDUCTOR IN ALL BRANCH CIRCUITS FOR LIGHT FIXTURES AND POWER DEVICES.

F. INDOOR LIGHTING FIXTURE SCHEDULE

This table includes all planned permanent and portable lighting other than dwelling unit/ hotel/ motel room lighting. Multifamily dwelling unit and hotel/motel room lighting is documented in Table T. If using Table T to document lighting in multifamily common use areas providing shared provisions for living, eating, cooking or sanitation, those luminaires are not included here.

Unconditioned					=		≥		=		
Controls Compliance (See Table H for Details)											COMPLIES
Rated Power Reduction Compliance (See Table Q for Details)											

D. EXCEPTIONAL CONDITIONS

This table is auto-filled with uneditable comments because of selections made or data entered in tables throughout the form.

E. ADDITIONAL REMARKS

This table includes remarks made by the permit applicant to the Authority Having Jurisdiction.

STATE OF CALIFORNIA
Indoor Lighting CALIFORNIA ENERGY COMMISSION

CERTIFICATE OF COMPLIANCE		NRCC-LTI-E
Project Name: Dry Creel WWTP	**Report Page:**	(Page 1 of 10)
Project Address: 1800 Booth Road	**Date Prepared:**	5/9/2024

This document is used to demonstrate compliance with requirements in 110.9, 110.12(c), 130.0, 130.1, 140.6 and 141.0(b)2 for indoor lighting scopes using the prescriptive path for nonresidential and hotel/motel occupancies. It is also used to document compliance with requirements in 160.5, 170.2(e) and 180.2(b)4 for indoor lighting scopes using the prescriptive path for multifamily occupancies. Multifamily includes dormitory and senior living facilities.

A. GENERAL INFORMATION

01	Project Location (city)	Roseville	04 Total Conditioned Floor Area (ft²)	10,160
02	Climate Zone	11	05 Total Unconditioned Floor Area (ft²)	0
03	Occupancy Types Within Project (select all that apply):		06 # of Stories (Habitable Above Grade)	1

● Office ● Support Areas ● All Other Occupancies

B. PROJECT SCOPE

This table includes any lighting systems that are within the scope of the permit application and are demonstrating compliance using the prescriptive path outlined in 140.6 / 170.2(e) or 141.0(b)2 / 180.2(b)4 for alterations.

F. OUTDOOR LIGHTING FIXTURE SCHEDULE

For new or altered lighting systems demonstrating compliance with 140.7 / 170.2(e)6 all new luminaires being installed and any existing luminaires remaining or being moved within the spaces covered by the permit application are included in the Table below. For altered lighting systems using the Existing Power method per 141.0(b)2L only new luminaires being installed and replacement luminaires being installed as part of the project scope are included (ie, existing luminaires remaining or existing luminaires being moved are not included). Outdoor lighting attached to multifamily buildings and controlled from the inside of a dwelling unit are included in Table H, and are not included here. All other multifamily outdoor lighting is included here.

Designed Wattage:

01	02		03	04	05	06	07	08	09	10	
Name or Item Tag	Complete Luminaire Description		Watts per luminaire[1, 2]	How is Wattage determined	Total Number Luminaires [2]	Luminaire Status[3]	Excluded per 140.7(a) / 170.2(e)6A	Design Watts	Cutoff Req. > 6,200 initial lumen output 130.2(b) / 160.5(c)1[4]	Field Inspector	
										Pass	Fail
B1/B1E	14W LED Downlight Wet	☐ Linear	13.8	Mfr. Spec	4	New	☐	55.2	NA: < 6200 lumens	☐	☐

SW/SWE	30W LED Wall Packs	☐ Linear	30	Mfr. Spec	6	New	☐	180	NA: < 6200 lumens	☐	☐
							Total Design Watts:	1126			

* NOTES: Selections with a * require a note in the space below explaining how compliance is achieved.
EX: Luminaire is lighting a statue; EXCEPTION 2 to 130.2(b)

[1] FOOTNOTES: Authority Having Jurisdiction may ask for Luminaire cut sheets to confirm wattage used for compliance per 130.0(c) / 160.5(b)
[2] For linear luminaires, wattage should be indicated as W/lf instead of Watts/luminaire. Total linear feet should be indicated in column 05 instead of number of luminaires.
[3] Select "New" for new luminaires in a new outdoor lighting project, or for added luminaires in an alteration. Select "Altered" for replacement luminaires in an alteration. Select "Existing to Remain" for existing luminaires within the project scope that are not being altered and are remaining. Select "Existing Reinstalled" for existing luminaires which are being removed and reinstalled as part of the project scope.
[4] Compliance with mandatory shielding requirements is required for luminaires with initial lumen output >= 6,200 unless exempted by 130.2(b)/ 160.5(c)

C. COMPLIANCE RESULTS

Results in this table are automatically calculated from data input and calculations in Tables F through N. Note: If any cell on this table says "COMPLIES with Exceptional Conditions" refer to Table D. Exceptional Conditions for guidance or see applicable Table referenced below.

Calculations of Total Allowed Lighting Power (Watts) 140.7 / 170.2(e)6 or 141.0(b)2L / 180.2(b)4Bv												Compliance Results		
01		02		03		04		05		06		07		08	09
General Hardscape Allowance 140.7(d)1 / 170.2(e)6 (See Table I)	+	Per Application 140.7(d)2 / 170.2(e)6 (See Table J)	+	Sales Frontage 140.7(d)2 (See Table K)	+	Ornamental 140.7(d)2 / 170.2(e)6 (See Table L)	+	Per Specific Area 140.7(d)2 / 170.2(e)6 (See Table M)	OR	Existing Power Allowance 141.0(b)2L / 180.2(b)4Bv (See Table N)	=	**Total Allowed** (Watts)	≥	**Total Actual** (Watts)	**07 must be >= 08**
1,461	+	---	+	---	+	---	+	---	OR	---	=	1,461	≥	1,126	COMPLIES
Shielding Compliance (See Table G for Details)															N/A
Controls Compliance (See Table H for Details)															COMPLIES

D. EXCEPTIONAL CONDITIONS

This table is auto-filled with uneditable comments because of selections made or data entered in tables throughout the form.

E. ADDITIONAL REMARKS

This table includes remarks made by the permit applicant to the Authority Having Jurisdiction.

This document is used to demonstrate compliance with requirements in 110.9, 130.0, 130.2, 140.7, and 141.0(b)2L for outdoor lighting scopes using the prescriptive path for nonresidential and hotel/motel occupancies. It is also used to document compliance with requirements in 160.5, 170.2(e)6, 180.1(a) and 180.2(b)4Bv for outdoor lighting scopes using the prescriptive path for multifamily and mixed-use occupancies. Multifamily includes dormitory and senior living facilities.

A. GENERAL INFORMATION

01	Project Location (city)	Roseville	04	Total Illuminated Hardscape Area (ft²)	50671
02	Climate Zone	11			
03	Outdoor Lighting Zone per Title 24 Part 1 10.114 or as designated by Authority Having Jurisdiction (AHJ):				
☐	LZ-0: Very Low - Undeveloped Parkland	☒ LZ-2: Moderate - Urban Clusters	☐ LZ-4: High - Must be reviewed by CA Energy Commission for Approval		
☐	LZ-1: Low - Rural Areas	☐ LZ-3: Moderately High - Urban Areas			
05	Occupancy Types within Project				

● Office ● Support Areas ● All Other Occupancies

B. PROJECT SCOPE

This table includes outdoor lighting systems that are within the scope of the permit application and are demonstrating compliance using the prescriptive path outlined in 140.7 / 170.2(e)6 or 141.0(b)2L / 180.2(b)4Bv for alterations.

My Project Consists of:

01	02	
☒ New Lighting System	Must Comply with Allowances from 140.7 / 170.2(e)6	
☐ Altered Lighting System	Is your alteration increasing the connected lighting load (Watts)?	◯ Yes ◯ No
03	04	05
% of Existing Luminaires Being Altered[1]	Sum Total of Luminaires Being Added or Altered	Calculation Method
☐ < 10% ☐ >= 10% and < 50% ☐ >= 50%		

Please proceed to Table F. Outdoor Lighting Fixture Schedule to define the project's luminaires.

[1] FOOTNOTES: % of Existing Luminaires Being Altered = (Sum Total of Luminaires Being Added or Altered / Existing Luminaires within the Scope of the Permit Application) x 100.

M. LIGHTING ALLOWANCE: PER SPECIFIC AREA

This section does not apply to this project.

N. EXISTING CONDITIONS POWER ALLOWANCE (alterations only)

This section does not apply to this project.

O. DECLARATION OF REQUIRED CERTIFICATES OF INSTALLATION

Selections have been made based on information provided in this document. If any selection has been changed by permit applicant, an explanation should be included in Table E. Additional Remarks. These documents must be provided to the building inspector during construction and can be found online

Form/Title
NRCI-LTO-E - Must be submitted for all buildings

P. DECLARATION OF REQUIRED CERTIFICATES OF ACCEPTANCE

Selections have been made based on information provided in this document. If any selection has been changed by permit applicant, an explanation should be included in Table E. Additional Remarks. These documents must be provided to the building inspector during construction and must be completed through an Acceptance Test Technician Certification Provider (ATTCP). For more information visit: http://www.energy.ca.gov/title24/attcp/providers.html

Form/Title	Systems/Spaces To Be Field Verified
NRCA-LTO-02-A - Must be submitted for all outdoor lighting controls except for alterations where controls are added to <= 20 luminaires.	Pedestrian Hardscape; Automotive Hardscape;

I. LIGHTING POWER ALLOWANCE (per 140.7 / 170.2(e))

This table includes areas using allowance calculations per 140.7 / 170.2(e). General Hardscape Allowance is per Table 140.7-A/Table 170.2-R while "Use it or lose it" Allowances are per Table 140.7-B /Table 170.2-S. Indicate which allowances are being used to expand sections for user input. Luminaires that qualify for one of the "Use it or lose it" allowances shall not qualify for another "Use it or lose it" allowance.
Outdoor lighting attached to multifamily buildings and controlled from the inside of a dwelling unit are included in Table H. and are not included here. All other multifamily outdoor lighting is included here.

	01				
	☒ General Hardscape Allowance Table I (below)	"Use it or lose it" Allowance (select all that apply) (select all that apply)			
		☐ Per Application Table J	☐ Sales Frontage Table K	☐ Ornamental Table L	☐ Per Specific Area Table M

Calculated General Hardscape Lighting Power Allowance per Table 140.7-A for Nonresidential & Hotel/Motel

02	03	04	05	06	07	08	09
Area Description	Area Wattage Allowance (AWA)			Linear Wattage Allowance (LWA)			Total General AWA + LWA (Watts)
	Illuminated Area (ft²)	Allowed Density (W/ft²)	Area Allowance (Watts)	Perimeter Length (lf)	Allowed Density (W/lf)	Linear Allowance (Watts)	
Parking lot	28085	0.019	533.6	1334	0.2	200.1	734
Pedestrian Hardscape	22586	0.019	429.1	657	0.2	98.6	528
Initial Wattage Allowance for Entire Site (Watts):							200
Instances of Initial Wattage Allowance (LZ 0 only)[1]							
Total General Hardscape Allowance (Watts):							1461

J. LIGHTING ALLOWANCE: PER APPLICATION

This section does not apply to this project.

K. LIGHTING ALLOWANCE: SALES FRONTAGE

This section does not apply to this project.

L. LIGHTING ALLOWANCE: ORNAMENTAL

This section does not apply to this project.

G. SHIELDING REQUIREMENTS (BUG)

This section does not apply to this project.

H. OUTDOOR LIGHTING CONTROLS

This table demonstrates compliance with controls requirements for all new or altered luminaires installed as part of the permit application. For alteration projects, luminaires which are existing to remain (ie untouched) and luminaires which are removed and reinstalled (wiring only) do not need to be included in this table even if they are within the spaces covered by the permit application.
Outdoor lighting for nonresidential buildings, parking garages and common service areas in multifamily buildings must be documented separately from outdoor lighting attached to multifamily buildings and controlled from the inside of a dwelling unit

Mandatory Controls for Nonresidential Occupancies, Parking Garages & Common Areas in Multifamily Buildings

01	02	03	04	05	
Area Description	Shut-Off 130.2(c)1 / 160.5(c)	Auto-Schedule 130.2(c)2 / 160.5(c)	Motion Sensor 130.2(c)3 / 160.5(c)	Field Inspector	
				Pass	Fail
Pedestrian Hardscape	Photocontrol	Provided	Provided	☐	☐
Automotive Hardscape	Photocontrol	Provided	Provided	☐	☐

[1] FOOTNOTE: Text has been abbreviated, please refer to Table 160.5-A to confirm compliance with the specific light source technologies listed.
[2] Authority having jurisdiction may ask for cutsheets or other documentation to confirm compliance of light source.
[3] Recessed luminaires marked for use in fire-rated installations, and recessed luminaires installed in non-insulated ceilings are excepted from ii and iii.

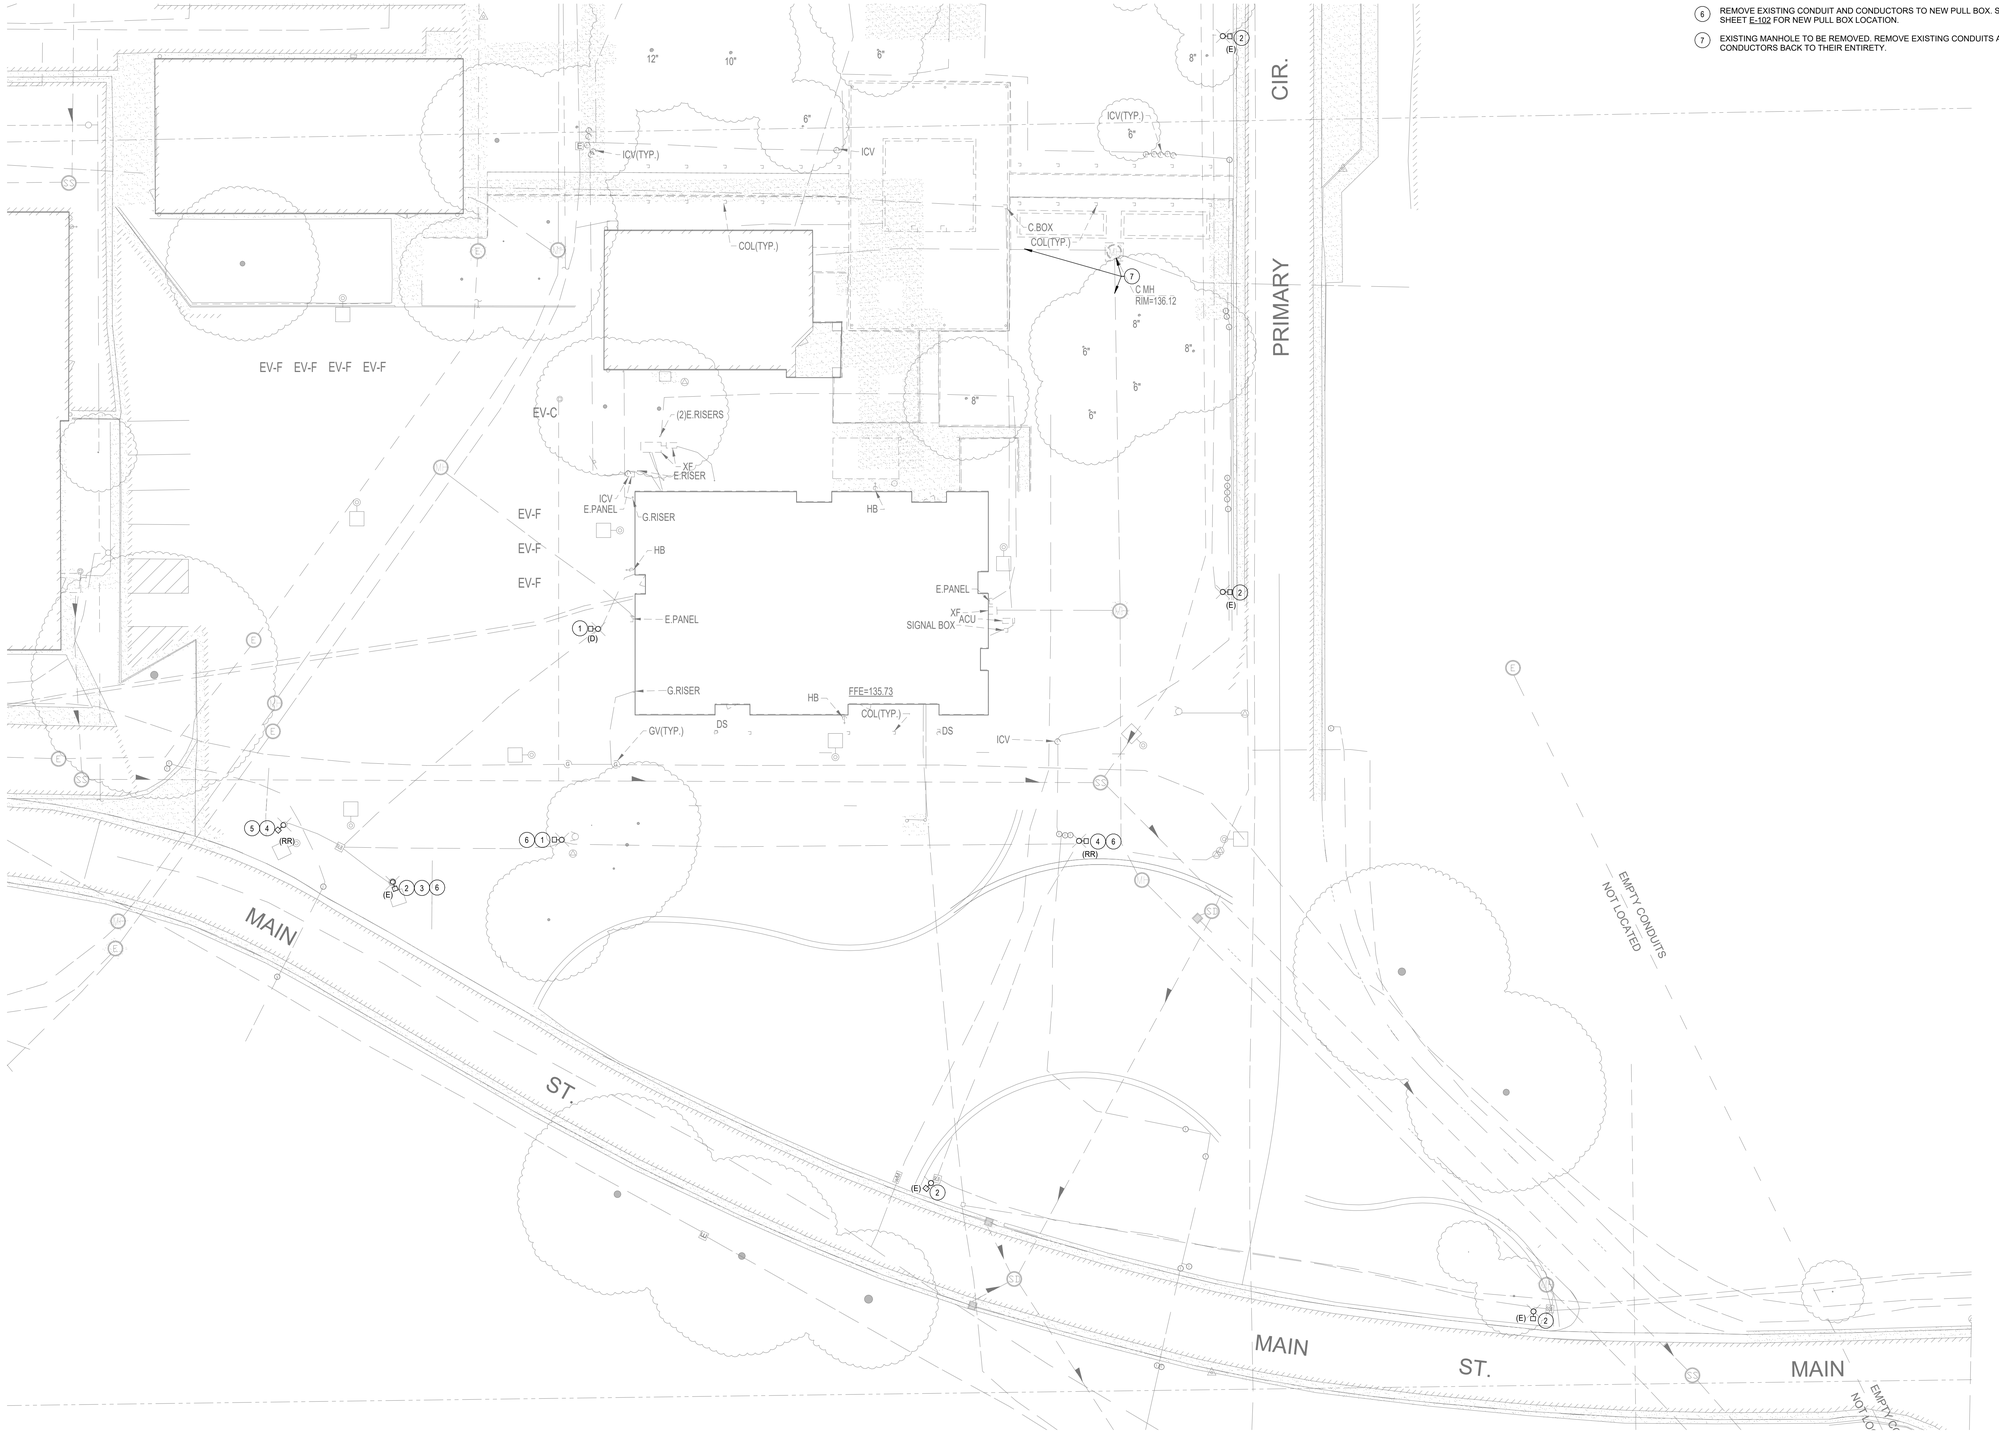
DATE: 4/24/18

DATE PLOTTED: 10/29/2024 1:17:40 PM FILE LOCATION: C:\Users\nikovtash\Documents\23.020 Dry Creek WWTP MEP_r22_nkovtash.rvt



BID SET (PRELIMINARY)

SHEET NOTES:

1. ALL EXISTING EQUIPMENT, DEVICES, CONDUIT AND WIRING, ETC., SHOWN ON PLANS ARE BASED ON AVAILABLE EXISTING DRAWINGS AND LIMITED SITE SURVEYS, AND SHOWN FOR CLARITY ONLY.

KEYED NOTES:

1. DISCONNECT AND REMOVE EXISTING SITE LIGHTING POLE .
2. EXISTING SITE LIGHTING POLE TO REMAIN. PROTECT EXISTING POLE, LIGHTS, CONDUIT, CONDUCTORS, AND CONTROL DEVICES DURING DEMOLITION AND NEW CONSTRUCTION.
3. INTERCEPT AND EXTEND THE EXISTING STREET LIGHTING CIRCUIT TO POWER THE (E) POLE LIGHTS FROM NEAREST VERIFIED EXISTING ELECTRICAL PANEL IN THE EXISTING BUILDING NOT IN THE SCOPE OF DEMO AND CONSTRUCTION WORK.
4. REMOVE EXISTING LIGHT POLE AND PROTECT FOR RE-USE. SEE SHEET E-102 FOR NEW LOCATION. PROTECT EXISTING POLE, LIGHTS, CONDUIT, CONDUCTORS, AND CONTROL DEVICES DURING DEMOLITION AND NEW CONSTRUCTION.
5. REMOVE EXISTING CONDUIT AND CONDUCTORS BACK TO EXISTING PULL BOX.
6. REMOVE EXISTING CONDUIT AND CONDUCTORS TO NEW PULL BOX. SEE SHEET E-102 FOR NEW PULL BOX LOCATION.
7. EXISTING MANHOLE TO BE REMOVED. REMOVE EXISTING CONDUITS AND CONDUCTORS BACK TO THEIR ENTIRETY.

BID SET (PRELIMINARY)

SHEET NOTES:

1. LOCATE CONDUIT STUBS WITHIN 5 FEET OF BUILDING.
2. REFER TO ONE LINE DIAGRAM E-401 AND ONE LINE DIAGRAM - SOLAR E-402 FOR FEEDER CONDUIT AND CONDUCTOR SIZES.
3. PV INVERTERS SHALL BE LISTED AND LABELED WITH UL1741, AND SYSTEMS CONNECTED TO UTILITY GRID SHALL USE INVERTERS LISTED FOR UTILITY INTERACTION PER CBC3111.3.1 EQUIPMENT.
4. PROVIDE CONDUIT MINIMUM 1" SIZE FOR SITE WORK.
5. PROVIDE TRENCH PLATES FOR ANY TRENCH WORK CROSSING DRIVE AISLES.

KEYED NOTES:

1. PROVIDE TWO(2) OPCONNECT TYPE HCS-40R OR EQUAL ELECTRIC VEHICLE CHARGERS ON DUAL MOUNT PEDESTAL.
2. PROVIDE ONE(1) OPCONNECT TYPE HCS-40R OR EQUAL ELECTRIC VEHICLE CHARGER ON SINGLE MOUNT PEDESTAL.
3. PROVIDE CHRISTY N09 UNDERGROUND PULL BOX IN CONCRETE WALK WITH CONCRETE AND LOCK BOLTS LABELED 'ELECTRICAL' FOR FUTURE EV CHARGING STATION . TYPICAL FOR (7) LOCATIONS.
4. RISE UP IN WALL TO THE PULL BOX ON ROOF. SEE SHEETS E-205 AND E-402 FOR REFERENCE.
5. PROVIDE CHRISTY N09 UNDERGROUND PULL BOX FOR WATER FEATURE. COORDINATE POWER CONNECTION AND CONTROLS REQUIREMENTS WITH SHOP DRAWINGS. COORDINATE LOCATION WITH LANDSCAPE.
6. ELECTRIC VEHICLE CHARGING PEDESTAL 'EV'. REFER TO EV PEDESTAL DETAIL 1/E-605.
7. PROVIDE THE FOLLOWING FEEDERS AND CIRCUITS.
   a. STANDBY POWER FEEDERS PER ONE LINE DIAGRAM.
   b. (1) 1"C., W/ BATTERY CHARGER CIRCUIT: LR-29 2#10 + 1#10 GND.
   BLOCK HEATER CIRCUIT: LR-31 2#10 + 1#10 GND. EPO CIRCUIT 2#12 AND 4#12 SPARE.
8. COORDINATE ACTUAL LOCATION OF PULL BOX IN FIELD, PRIOR TO ROUGH-IN, TO AVOID IMPACT TO EXISTING TREES.

KEYED NOTES:

1. PROVIDE DEDICATED CIRCUITS FOR MICROWAVES.
2. PROVIDE 1"CONDUIT FROM FLOOR BOX UNDER FLOOR TO NEAREST WALL AND RISE IN WALL AND STUB IN ACCESSIBLE CEILING SPACE. TYPICAL.
3. PROVIDE RECESSED 2-GANG FLOOR BOX HUBBEL #GFB2G25R WITH (2) 1 INCH KO TRADE FOR POWER, (2) 2 INCH KO TRADE FOR DATA AND COVER # 24GTCVR. COORDINATE COVER FINISH WITH ARCHITECT PRIOR TO ORDERING. TYPICAL OF (6) LOCATIONS.
4. PROVIDE REMOTE RAPID SHUTDOWN BUTTON AND EMERGENCY STOP FOR PV INVERTER. SEE DETAILS AND SIGNAGE REQUIREMENTS ON SHEET E402.
5. TRANSFORMERS STACKED ON RACK PER DETAIL **7/E601**. TRANSFORMER "TLP1' BELOW "TMH".
6. TRANSFORMERS STACKED ON RACK PER DETAIL **8/E601**. TRANSFORMER "TLP2' BELOW "TMDF".
7. DRYER RECEPTACLE VOLTAGE AND STYLE TO BE DETERMINED ON SELECTION OF EQUIPMENT.
8. UNDERCOUNTER RECEPTACLE WIRED VIA SWITCH FOR GARBAGE DISPOSAL.
9. PROVIDE POWER AND DATA RECEPTACLES FOR TV. COORDINATE EXACT LOCATIONS WITH ARCITECTURAL DROWINGS PRIOR TO INSTALLATION. TYPICAL OF (6) LOCATIONS.
10. PROVIDE 1"C.O. FROM STORE FRONT MULLION INTO ACCESSIBLE CEILING SPACE ON SECURED SIDE OF DOORWAY.
11. PROVIDE 1"C.O. FROM OUTLET BOX INTO ACCESSIBLE CEILING SPACE ON SECURED SIDE OF DOORWAY.
12. PROVIDE 2"C.O. DATA FROM FLOOR BOX TO ACCESSIBLE CEILING SPACE.
13. PROVIDE 1-1/4"C.O. FROM OUTLET BOX TO ACCESSIBLE CEILING SPACE. TYPICAL FROM EACH DATA, TELEPHONE AND TELEPHONE/DATA OUTLET BOX.
14. PROVIDE OUTLET BOX FLUSH IN WALL, ADJACENT TO CARD READER OUTLET BOX, FOR AUTOMATIC DOOR OPENER PUSH BUTTON.
15. LOCATE FOR AND CONNECT TO DOOR ACTUATOR. COORDINATE EXACT LOCATION IN FIELD PRIOR TO ROUGH-IN.
16. PROVIDE FOR AND CONNECT TO MOTORIZED BLINDS. COORDINATE EXACT LOCATION IN FIELD PRIOR TO ROUGH-IN.
17. PROVIDE EMPTY OUTLET BOX FOR FUTURE MOTORIZED BLINDS. COORDINATE LOCATION USING OUTLET BOX INSTALLED FOR OTHER BLINDS FOR REFERENCE.
18. SWITCH FOR MOTORIZED BLINDS. PROVIDE WIRING BETWEEN SWITCH AND BLINDS PER MANUFACTURER'S REQUIREMENTS.
19. PROVIDE REMOTE EMERGENCY POWER OFF (EPO) BUTTON FOR GENERATOR. PROVIDE AND PLACE ABOVE THE EPO A WARNING SIGN INDICATING EMERGENCY GENERATOR SHUTOFF.

SHEET NOTES:

1. SEE ONE LINE DIAGRAM ON SHEET E401 FOR REFERENCE.
2. SEE PANEL SCHEDULES ON SHEETS E501 AND E502 FOR REFERENCE.
3. GFCI RECEPTACLES NEED TO BE ACCESSIBLE FOR RESETTING.
4. PROVIDE A PERMANENT PLAQUE PER CEC705.10, IDENTIFICATION OF POWER SOURCES. MARKINGS SHALL COMPLY WITH CEC 110.21(B). LOCATE ON DESIGNATED WALL IN THE ELECTRICAL ROOM.
5. ALL RECEPTACLES IN BUNK ROOMS SHALL BE AFCI LISTED. ⚠1

Frame	Anodized aluminium alloy
J-Box	IP68, 3 bypass diodes
Cable	4 mm² (IEC), 12 AWG (UL)
Cable Length (Including Connector)	500 mm (19.7 in) (+) / 350 mm (13.8 in) (-) or customized length*
Connector	T4 series or MC4-EVO2
Per Pallet	30 pieces
Per Container (40' HQ)	660 pieces

* For detailed information, please contact your local Canadian Solar sales and technical representatives.

TEMPERATURE CHARACTERISTICS

Specification	Data
Temperature Coefficient (Pmax)	-0.34 % / °C
Temperature Coefficient (Voc)	-0.26 % / °C
Temperature Coefficient (Isc)	0.05 % / °C
Nominal Module Operating Temperature	41 ± 3°C

PARTNER SECTION

* The specifications and key features contained in this datasheet may deviate slightly from our actual products due to the on-going innovation and product enhancement. CSI Solar Co., Ltd. reserves the right to make necessary adjustment to the information described herein at any time without further notice.
Please be kindly advised that PV modules should be handled and installed by qualified people who have professional skills and please carefully read the safety and installation instructions before using our PV modules.

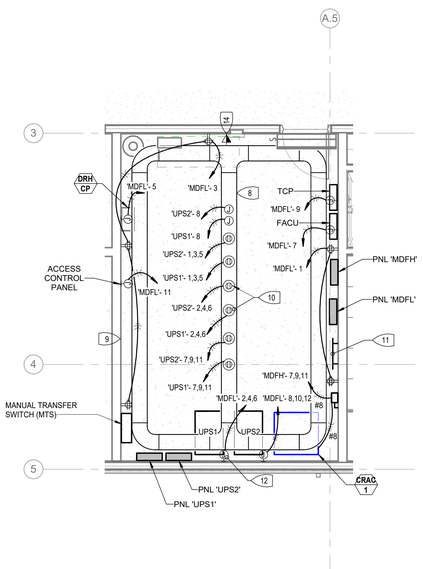
ROOF PLAN - SOLAR

DRAWN BY: Author JOB NUMBER: 210015.01

SHEET NO.
E-205

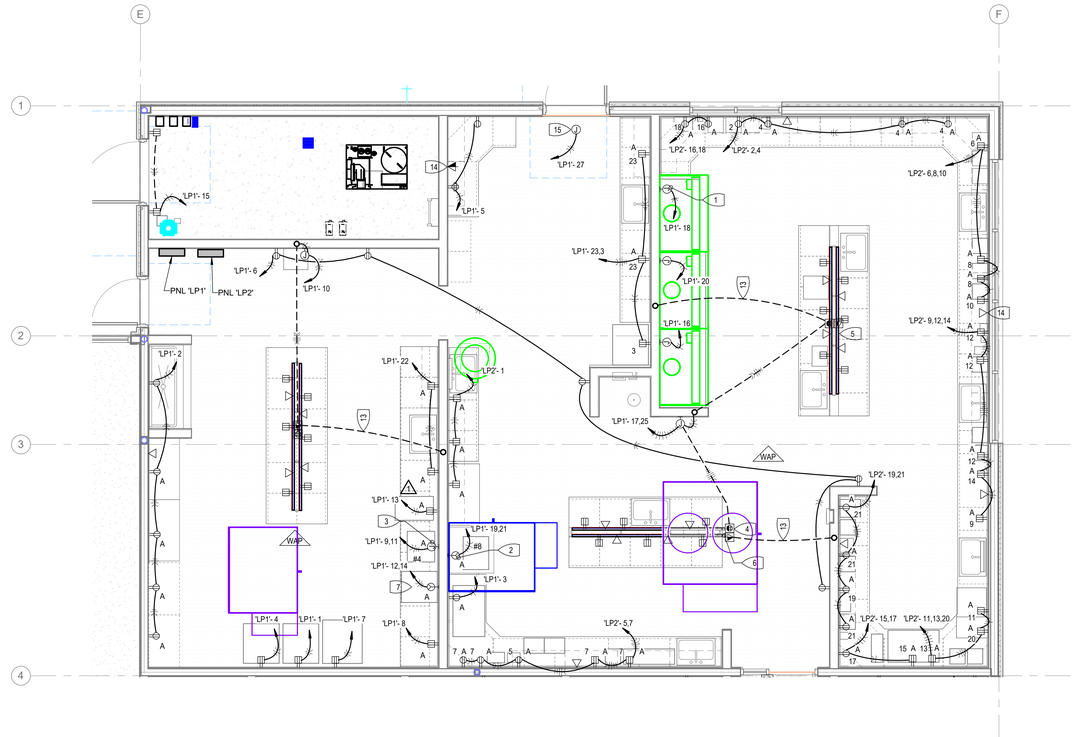
DATE: 4/24/18

DATE PLOTTED: 10/23/2024 1:18:10 PM FILE LOCATION: C:\Users\nkovtash\Documents\23.020 Dry Creek WWTP MEP _r22_nkovtash.rvt



BID SET (PRELIMINARY)

SHEET NOTES:



1. SEE ONE LINE DIAGRAM ON SHEET E-401 FOR REFERENCE.
2. SEE PANEL SCHEDULES ON SHEETS E-501 AND E-502 FOR REFERENCE.
3. GFCI RECEPTACLES NEED TO BE ACCESSIBLE FOR RESETTING.
4. PROVIDE FUSED DISCONNECT SWITCH TO EACH MECHANICAL UNIT.

KEYED NOTES:

1. PROVIDE JUNCTION BOX FOR FUME HOOD. COORDINATE LOCATION WITH MANUFACTURE REQUIREMENTS PRIOR TO ROUGH-IN.
2. EQUIPMENT RECEPTACLE VOLTAGE AND STYLE TO BE DETERMINED ON SELECTION OF EQUIPMENT.
3. PROVIDE JUNCTION BOX FOR AUTOCLAVE. COORDINATE LOCATION WITH MANUFACTURE REQUIREMENTS PRIOR TO ROUGH-IN.
4. PROVIDE RECESSED 2-GANG FLOOR BOX HUBBEL #GFB2G25R WITH (1) 1/2 INCH KO TRADE FOR POWER, (1) 1 INCH KO TRADE FOR DATA AND COVER # 24GTCVR. COORDINATE COVER FINISH WITH ARCHITECT PRIOR TO ORDERING. TYPICAL OF (3) LOCATIONS.
5. PROVIDE WIREMOLD LEGRAND SERIES #4000 WITH DIVIDER MOUNTED TO THE SHELVING SYSTEM STATION 12" ABOVE TOP OF THE WORKSTATION. COORDINATE EXACT LOCATION AND MOUNTING DETAILS WITH SHELVES MANUFACTURER REQUIREMENTS PRIOR TO ORDERING AND MOUNTING. SEE DETAIL 8/E-604 FOR REFERENCE. TYPICAL OF (6) LOCATIONS.
6. PROVIDE VERTICAL MOUNTED TO THE WORKSTATION SIDE WIREMOLD TO HORIZONTAL WIREMOLD. COORDINATE EXACT LOCATION AND MOUNTING DETAILS WITH WORKSTATIONS MANUFACTURER REQUIREMENTS PRIOR TO ORDERING AND MOUNTING. TYPICAL OF (6) LOCATIONS.
7. PROVIDE 5-20P PLUG FOR LAB DISHWASHER.
8. PROVIDE 12" LADDER RACK. MOUNT ALONG WALLS AND OVER DATA RACKS. COORDINATE EXACT LOCATION WITH MDF ROOM DRAWINGS PRIOR TO ROUGH-IN
9. LINE FULL LENGTH OF WEST, SOUTH AND EAST WALLS WITH 3/4" VOID FREE, FIRE RATED, PLYWOOD. PAINT PLYWOOD WITH (2) COATS WHITE PAINT. MASK FIRE RATED LABELS TO REMAIN VISIBLE AFTER PLYWOOD IS PAINTED.
10. PROVIDE (2) LOCKING RECEPTACLES L14-30R OR EQUAL FOR EACH SERVER RACKS. COORDINATE EXACT LOCATION WITH MDF ROOM DRAWINGS PRIOR TO ROUGH-IN. TYPICAL OF (3) LOCATION.
11. PROVIDE 2" BY 12" BY 1/4" GROUND BAR ON STANDOFFS IN THE MDF ROOM.
12. PROVIDE JUNCTION BOX FOR UPS. COORDINATE LOCATION WITH UPS MANUFACTURE REQUIREMENTS PRIOR TO ROUGH-IN. TYPICAL OF (2) LOCATIONS.
13. PROVIDE 2"C.O. DATA FROM FLOOR BOX TO ACCESSIBLE CEILING SPACE.
14. PROVIDE 1-1/4"C.O. FROM OUTLET BOX TO ACCESSIBLE CEILING SPACE. TYPICAL FROM EACH DATA, TELEPHONE AND TELEPHONE/DATA OUTLET BOX.
15. LOCATE FOR AND CONNECT TO DOOR ACTUATOR. COORDINATE EXACT LOCATION IN FIELD PRIOR TO ROUGH-IN.

SOLAR CALCULATIONS

CANADIAN SOLAR HiKu PHOTOVOLTAIC PANELS (PV)
PERFORMANCE @ STC
- MAX POWER (PMAX) = 445 WATTS
- EFFICENCY = 19.9 %
- OPEN CIRCUIT VOLTAGE (VOC) = 48.9 VOLTS
- CITY OF SACRAMENTO RECORDED AVERAGE LOW TEMPERATURE
- CEC 690.7 TEMPERATURE FACTOR = 1.14
- SHORT CIRCUIT CURRENT (ISC) = 11.54 AMPS
- MAX POWER VOLTAGE (VPM) = 40.9 VOLTS
- MAX POWER CURRENT (IPM) = 10.89 AMPS

1 — 72 PV PANELS AT 410 WATTS/1000 = 32.04 KW
USE ONE (1) 60 KW INVERTER UNIT(S).
W/ MAX POWER PER INVERTER = 25.63 KW
2 — 60 KW INVERTER AT UNITY P.F. = 72 AMPS @ 480V, 3ø
72 AMPS AT 125% = 90 AMPS
USE 100 AMP BREAKER FOR EACH UNIT
TOTAL BREAKER TRIP VALUE = 100 AMPS

100 AMP INPUT BREAKER CONNECTED AHEAD OF THE MAIN BREAKER. INCREASE OF BUS SIZE NOT REQUIRED.

3 — MAXIMUM SOLAR POWER DC VOLTAGE (VOC)
ONE(1) PV VOC = 48.9 VOLTS
48.9 VOC AT 1.14 FOR 26°F PER CEC 690.7 = 55.7 VOC
9 PV PANELS PER STRING @55.746VOC = 501.7 Voc

1000 VDC MAX / 55.746 VOC FOR 9 PV PANELS PER STRING IS ADEQUATE

4 — MAXIMUM CURRENT PER MPPT INPUT
IMP= 10.89 AMPS PER STRING
2 STRINGS PER MPPT = 21.78 AMPS
MAXIMUM INPUT PER MPPT 36 AMPS

THE INVERTER MPPT INPUT AT 36 AMPS IS ADEQUATE FOR 2 STRINGS AT 10.68 AMPS EACH TOTALING 21.36 AMPS.

5 — MAXIMUM SOLAR PANEL ARRAY SHORT CIRCUIT CURRENT
PV (ISC) = 11.54 AMPS
9 PV PANELS IN SERIES = ONE(1) STRING
ONE(1) STRING ISC = 11.54 AMPS
ONE(1) ARRAY = EIGHT(8) STRINGS
EIGHT (8) CIRCUITS ISC = 8 x 11.54 AMPS
ISC AMPS PER INVERTER 92.32 AMPS
INVERTER CIRCUITS MAX = 2
TOTAL ISC = 184.64 AMPS
184.64 AMPS AVAILABLE SHORT CIRCUIT CURRENT

DERATING CALCULATION PER CEC-2022 TABELS 310.15 AND 310.16

#10 AWG 90°C = 40AMP

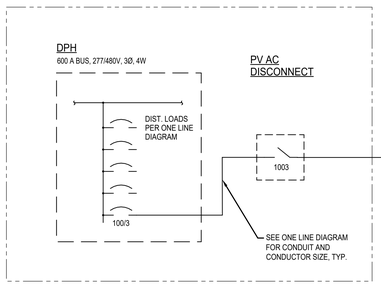
ADJUSTMENT FACTORS FOR (4) AND (6) CONDUCTORS IS 80%

4-6 #10 AWG = 32AMP

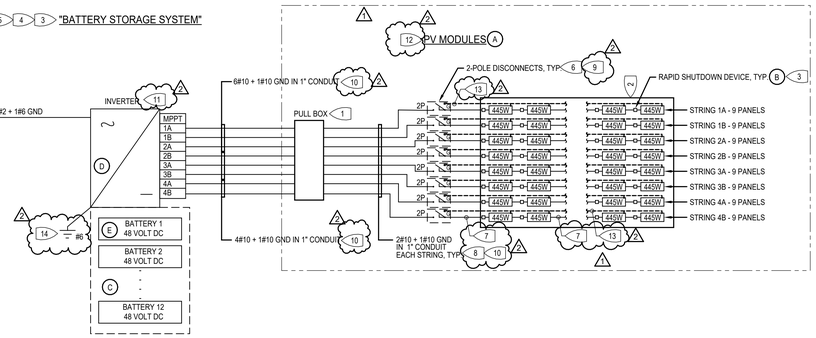
PV STRING INPUT IS 10.89AMP

#10 CONDUCTOR(S) EXCEED(S) STRING INPUT LOADS.

SHEET NOTES:



1. PV INVERTERS SHALL BE LISTED AND LABELED WITH UL1741 AND SYSTEMS CONNECTED TO UTILITY GRID SHALL USE INVERTERS LISTED FOR UTILITY INTERACTION PER CBC3111.3.1 EQUIPMENT.
2. ROOFTOP MOUNTED PHOTOVOLTAIC PANELS, MODULES, AND PANEL SYSTEMS SHALL BE LISTED AND LABELED IN ACCORDANCE WITH UL1703 OR WITH BOTH UL61730-1 AND UL61730-2, PER CBC 3111.3.1.



KEYED NOTES:

1. PROVIDE HOFFMAN #ASE18X18X6SSNK PULL BOX.
2. PROVIDE WARNING SIGNS PER CEC 690.31(G)(3)&(4) "WARNING- PHOTOVOLTAIC POWER SOURCE " WITH PERMANENT MARKING ON REFLECTIVE LABELS, CAPITALIZED LABELS, MINIMUM 3/8-INCH WHITE LETTERING ON RED BACKGROUND. SPACING OF LABELS SHALL NOT EXCEED 10 FEET. LABELS SHALL BE APPLIED TO THE FOLLOWING :
   1. EXPOSED RACEWAYS, CABLE TRAYS, AND OTHER WIRING METHODS.
   2. COVERS OR ENCLOSURES OF PULL BOXES AND JUNCTION BOXES.
   3. CONDUIT BODIES IN WHICH ANY OF THE AVAILABLE CONDUIT OPENINGS ARE UNUSED.
3. PROVIDE LABELS FOR SOLAR PV SYSTEM RAPID SHUTDOWN PER CEC 690.56 (C)(1)(a). SEE CEC FIGURE 690.56 (C)(1)(A) FOR LABEL REQUIREMENTS. PER CEC 690.56(C)(3) PROVIDE LABELS WITHIN 3 FEET OF THE RAPID SHUTDOWN SWITCH NOTING "RAPID SHUTDOWN SWITCH FOR SOLAR PV SYSTEM". LABELING SHALL HAVE MINIMUM 3/8 IN. HIGH WHITE LETTERING ON RED BACKGROUND. SEE DETAIL 2/E-402 FOR REFERENCE
4. PROVIDE FOUR (4) SEPARATE LABELS AND A DIRECTORY WITHIN 3 FEET OF INTEGRAL BATTERY SYSTEM DISCONNECTING MEANS PER CEC 480.7 (A)(F)(G), 705.10, 705.12., 706.15 (C) WITH PERMANENT MARKING ON REFLECTIVE LABELS, CAPITALIZED LABELS, MINIMUM 3/8-INCH WHITE LETTERING ON RED BACKGROUND PER 110.21(B). SEE BELOW FOR THE REQUIRED WORDING OF EACH LABEL:
   1. "ENERGY STORAGE SYSTEM DISCONNECT
      NOMINAL ESS AC VOLTAGE: ____
      MAXIMUM ESS DC VOLTAGE: _____
      AVAILABLE FAULT CURRENT: _____
      DATE CALCULATION PERFOMED: ____ "
   2. "CAUTION: MULTIPLE SOURCES OF POWER"
   3. "WARNING: DUAL POWER SOURCE
      SECOND SOURCE IS PV SYSTEM"
   4. "MAIN BATTERY SYSTEM DISCONNECT"

   AN ADDITIONAL ARC-FLASH LABEL MUST ALSO BE APPLIED.
5. PROVIDE SOLARK LIMITER SENSOR CT'S ON THE LOAD SIDE CONDUCTORS OF THE AUTOMATIC TRANSFER SWITCH IN THE MAIN ELECTRICAL ROOM. PROVIDE SHORTING TERMINAL BLOCKS FOR THE C.T.'S. CONNECT THE C.T.'S VIA THE SHORTING TERMINAL BLOCKS TO INVERTER WITH CAT6A CABLES, (1) PER CT. COORDINATE WITH MANUFACTURER'S INSTRUCTIONS.
6. PROVIDE EATON #DCU2061PMW PHOTOVOLTAIC STRING DISCONNECT ON ROOF NEXT TO STRING OUTPUT: (1) CIRCUIT, 600VDC, 30A, 20A FUSES, NEMA 4, WITH VIEWING WINDOW. MOUNT DISCONNECT ON 7/8" BY 1-5/8" 12 GAUGE STRUT SPANNING ROOFING SEAMS USING CLIPS AS SPECIFIED FOR THE PV PANELS IN DETAIL 6/E-604. (DISCONNECT WEIGHT: 10 LBS).
7. #12 AWG PV WIRE TO BE PROVIDED WITH EACH PV PANEL
8. SEE DETAIL 2/E-604 FOR ROOF CONDUITS MOUNTING. TYP. FOR ALL CONDUITS ON THE ROOF.
9. PROVIDE MARKING LABEL PER CEC 690.13(B). "PV SYSTEM DISCONNECT" WITH PERMANENT MARKING ON REFLECTIVE LABELS, CAPITALIZED LABELS, MINIMUM 3/8-INCH WHITE LETTERING ON RED BACKGROUND. REFER TO KEYED NOTE #6 ON SHEET E-601 FOR WARNING SIGN. PROVIDE VISIBLE LABEL PER CEC 690.53 INDICATING THE HIGHEST MAXIMUM SOLAR POWER DC VOLTAGE AND MAXIMUM CIRCUIT CURRENT. APPLIED TO ALL PV DC DISCONNECTS.
10. PROVIDE MARKING LABEL FOR CIRCUIT CONDUCTORS WITH THE POLARITY INDICATION PER CEC 690.55 .
11. PROVIDE MARKING LABEL FOR INVERTER PER CEC 690.54 AT AN ACCESSIBLE LOCATION AS A POWER SOURCE AND WITH THE RATED AC OUTPUT CURRENT AND THE NOMINAL OPERATING AC VOLTAGE.
12. MARKING LABEL FOR MODULES SHALL BE PROVIDED BY MANUFACTURER PER CEC 690.51 WITH IDENTIFICATION OF TERMINALS OR LEADS AS TO POLARITY, MAXIMUM OVERCURRENT DEVICE RATING FOR MODULE PROTECTION, AND WITH THE FOLLOWING RATINGS:
    - OPEN-CIRCUIT VOLTAGE
    - OPERATING VOLTAGE
    - MAXIMUM PERMISSIBLE SYSTEM VOLTAGE
    - OPERATING CURRENT
    - SHORT-CIRCUIT CURRENT
    - MAXIMUM POWER
13. PROVIDE #6 AWG PV WIRE. ATTACH COPPER GROUNDING WIRE TO A PRE-RILLED GROUNDING HOLE ON PV PANEL FRAME AT EACH PANEL WITH A GROUNDING KIT CONTAINING AN M5 (3/16") SS CAP BOLT, AN M5 (3/16") SS FLAT WASHER, AN M5 (3/16") SS CUP WASHER, AND AN M5 (3/16") SS NUT (WITH TEETH).
14. BOND TO (2) 3/4 DIA BY 10 FOOT GROUND RODS SPACED 10 FEET APART.

PANEL SCHEDULE NOTES:

1. PROVIDE COPPER BUSSING INCLUDING GROUND BUSS.
2. DOOR-IN-DOOR CONSTRUCTION
3. PROVIDE SURGE PROTECTION DEVICE (SPD), SCHNEIDER SURLOGIC SERIES OR EQUAL. LOCATE SPD BREAKER ON BUSSING RELATIVE TO INCOMING FEED. LOCATE AT TOP OF BUSSING FOR TOP FED PANELS AND AT BOTTOM OF BUSSING FOR BOTTOM FED PANELS. 120KA PER PHASE AND 60KA PER MODE.
4. FOR EACH RECESSED PANELBOARD, STUB FOUR(4) 3/4" EMPTY CONDUITS FROM PANELBOARD INTO ACCESSIBLE CEILING SPACE.

BID SET (PRELIMINARY)

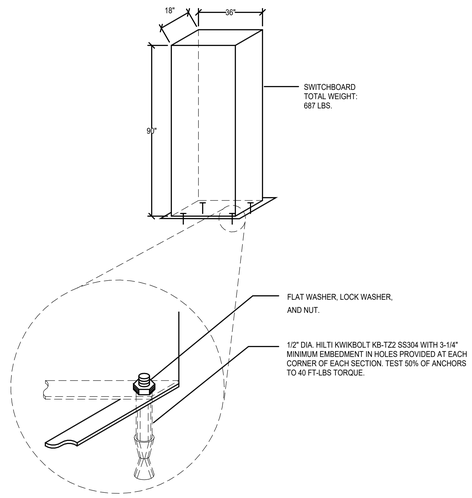
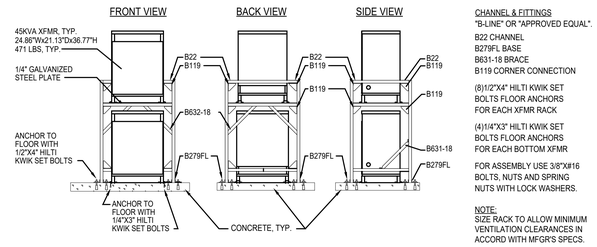
6 DISC. MOUNTING ON ROOF
NONE



TRANSFORMER SPECIFICATIONS 480Y-208/120V, 3Ø				
KVA	WIDTH	DEPTH	HEIGHT	WEIGHT
75	30.5	24"	43"	665 lbs
112.5	34.49"	31.48"	50.92"	1271 lbs



NOTE: DIMENSIONS AND WEIGHTS BASED ON EATON XFMRS WITH COPPER COILS.

NOTES:
1. PROVIDE VENTILATED TRANSFORMERS WITH RODENT SCREENS AND DRIP SHIELDS ON ALL TRANSFORMERS UNLESS OTHERWISE NOTED.
2. PROVIDE 115°C TRANSFORMERS UNLESS OTHERWISE NOTED
3. PROVIDE K1 K FACTOR TRANSFORMERS UNLESS OTHERWISE NOTED.
4. PROVIDE HOUSEKEEPING PAD AT 112.5KVA TRANSFORMER. SEE SHEET E-101 AND DETAIL 3/E-605 FOR REFERENCE.
5. REMOVE SHIPPING BOLTS FROM TRANSFORMERS DURING INSTALLATION.

3 XFMR MOUNTING DETAIL
NONE

1 MAIN SWITCHBOARD ANCHORAGE
NONE

CHANNEL & FITTINGS
"B-LINE" OR "APPROVED EQUAL".

B22 CHANNEL
B279FL BASE
B631-18 BRACE

(8)1/2"X4" HILTI KWIK SET BOLTS FLOOR ANCHORS FOR EACH XFMR RACK

(4)1/4"X3" HILTI KWIK SET BOLTS FLOOR ANCHORS FOR EACH BOTTOM XFMR

FOR ASSEMBLY USE 3/8"X#16 BOLTS, NUTS AND SPRING NUTS WITH LOCK WASHERS.

NOTE:
SIZE RACK TO ALLOW MINIMUM VENTILATION CLEARANCES IN ACCORD WITH MFGR'S SPECS.

7 STACKED XFMR MOUNTING 45KVA XFMRS
NONE

PANEL WEIGHTS	
PANEL AMPS	WEIGHT
100	125 LBS
225	250 LBS
400	410 LBS

4 RECESSED PANEL MOUNTING - WOOD
NONE

SWITCHBOARD NOTES

1. SWITCHBOARD CONSTRUCTION SHALL BE OF THE TYPE, CLASS AND ARRANGEMENT AS INDICATED. BREAKER FRAME CLASS AND SIZES SHALL BE AS NOTED. DESIGN IS BASED ON EATON.
2. THE CONSTRUCTION OF THE SWITCHBOARD SHALL BE DEAD FRONT TYPE COMPLETELY METAL ENCLOSED WITH SELF SUPPORTING STRUCTURE OF THE UNIVERSAL FRAME TYPE USING DIE-FORMED, WELDED AND BOLTED MEMBERS. FORMED FRONT AND SIDE COVERS SECTIONALIZED AND REMOVABLE WITH SCREW-ON PLATES. FORMED HINGED DOORS WITH KNURLED KNOBS OR THREE POINT LATCH WHERE SHOWN. COMPONENTS SHALL BE MOUNTED ON BACK PANS OR STRUCTURAL FRAMING AND NOT ON SIDE OR BACK COVERS OF THE ENCLOSURE.
3. ALL BUSSING SHALL BE COPPER WITH SILVER PLATED CONNECTIONS AND JOINTS. BUSSING SHALL BE SIZED TO LIMIT TEMPERATURE RISE OF 55°C PER U.L. STANDARDS BRACED TO WITHSTAND A MINIMUM SHORT CIRCUIT CURRENT OF 65,000 RMS SYMMETRICAL AMPERES OR AS OTHERWISE NOTED. ALL BUSSES SHALL BE RATED 100% AND SHALL EXTEND THE FULL LENGTH AND HEIGHT OF THE USABLE SPACE. TAPERING OF BUS OR FLEX BUS IS NOT PERMITTED.
4. BREAKERS SHALL BE FULLY RATED FOR THE SYMMETRICAL SHORT CIRCUIT CURRENT RATING NOTED IN THE DRAWINGS.
5. WHERE SPACES ARE INDICATED ALL REQUIRED PROVISIONS INCLUDING HARDWARE AND TRIM SHALL BE INSTALLED TO ALLOW FUTURE INSTALLATION OF BREAKERS.
6. CABLE AND CONDUCTOR LUGS SHALL BE TWO-HOLE PAD, NEMA DRILLED, UN-INSULATED COPPER, LONG BARRELED, TIN PLATED COMPRESSION TERMINALS. BURNDY TYPE YZ-2N OR EQUAL.
7. CONSTRUCTION IS NEMA 1, INDOOR.
   7.1. PROVIDE SWITCHBOARD WITH 1-1/2" HIGH BASE CHANNEL.
   7.2. GROUT SEAL ANY GAPS BETWEEN BASE AND CONCRETE PAD.
   7.3. RODENTPROOF THE ASSEMBLY
8. PAINT COAT SHALL BE A POLYESTER PLASTIC DRY POWDER COAT ELECTROSTATICALLY APPLIED. COLOR: ANSI 70 (GRAY)
9. EQUIPMENT SHALL BE COMPLETELY FACTORY ASSEMBLED, WIRED AND TESTED PRIOR TO DELIVERY. DESIGN AND CONSTRUCTION SHALL MEET ALL OF THE REQUIREMENTS OF THE CEC, NEC, NEMA, OHSA AND SHALL BE U.L. LISTED.
10. MANUFACTURER SHALL PROVIDE THE EQUIPMENT TO MEET THE SPACE PROVIDED AND SHALL NOT REDUCE THE NUMBER OF SECTIONS SHOWN ON THE DRAWINGS.
11. THE BOTTOM OF THE SWITCHBOARD SHALL BE OPEN.
12. ALIGN THE FRONT OF THE SWITCHBOARD
13. REFER TO SPECIFICATION 26 24 13 SWITCHBOARDS FOR ADDITIONAL REQUIREMENTS.
14. SEE DETAIL 1/E601 FOR MOUNTING ANCHORAGE.
15. GROUND BUS BAR SHALL BE 1/4" X 2 1/4" MINIMUM. NEMA DRILLED FOR 2-HOLE PAD LUGS AND EXTEND THE ENTIRE WIDTH OF THE ENCLOSURE.
16. NEUTRAL BAR SHALL BE ACCESSIBLE FROM THE FRONT, INSTALL BELOW THE CHASIS AND TO THE FRONT.
17. ELECTRICAL EQUIPMENT SHALL BE FIELD MARKED WITH A WARNING TO QUALIFIED PERSONNEL OF THE POTENTIAL ARC FLASH HAZARDS PER NFPA-70E AND NEC 110-16.
18. MAIN SERVICE DISCONNECT SHALL BE PERMANENTLY MARKED TO IDENTIFY IT AS A SERVICE DISCONNECT PER CEC 230.70(B).

2 MAIN SWITCHBOARD ELEVATION
NONE

CHANNEL & FITTINGS
"B-LINE" OR "APPROVED EQUAL".

B22 CHANNEL
B279FL BASE
B631-18 BRACE

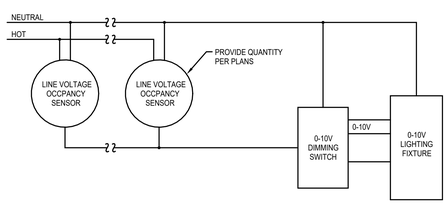
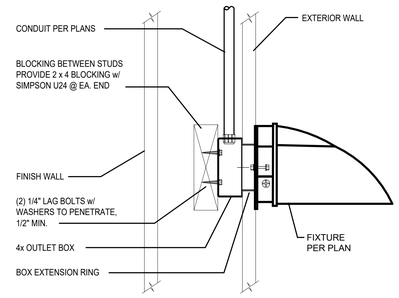
BID SET (PRELIMINARY)



NOTES:
1. PROVIDE CONTROL PANEL WITH INTEGRAL ASTRONOMICAL TIME CLOCK.
2. THE PANEL SHALL BE CAPABLE OF DEMAND RESPONSE. SEE WIRING DIAGRAM ON SHEET
3. BEST PRACTICES TO FEED SAME SIDE AS LOAD RELAY(S). CABINET HAS BOTTOM WIREWAY CONNECTING SIDE WIREWAYS.
4. CONSULT FACTORY DOCUMENTS FOR LOADING WITH EMERGENCY AND NORMAL CIRCUITS.
5. USE REMOTE LOW VOLTAGE INPUT CABINETS WHEN ADDITIONAL POWER FOR GREENMAX DIGITAL CONTROLS IS REQUIRED, OR WHEN UP TO 16 ADDITIONAL LOCAL ANALOG INPUTS ARE NECESSARY.
6. ONLY EIGHT(8) CONTROLLED LIGHTING CIRCUITS ARE SHOWN. ADDITIONAL CIRCUITS MAY BE SPECIFIED TO BE PROVIDED ON FLOOR PLANS.
7. PROVIDE A MINIMUM OF FOUR(4) SPARE RELAYS.
8. ALL PRODUCTS SPECIFIED OR INDICATED HEREIN TO BE PROVIDED AS A WIRED PRODUCT SHALL NOT BE SUBMITTED WITH A WIRELESS PRODUCT AS PROPOSED SUBSTITUTION. ONLY ITEMS SPECIFICALLY IDENTIFIED TO BE PROVIDED AS A WIRELESS PRODUCT MAY HAVE A PROPOSED SUBSTITUTION WITH ANOTHER WIRELESS PRODUCT.



7 LIGHTING CONTROL PANEL

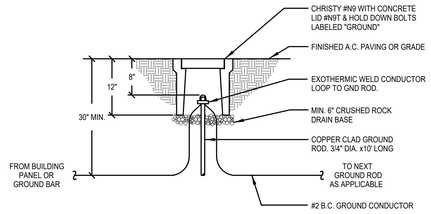
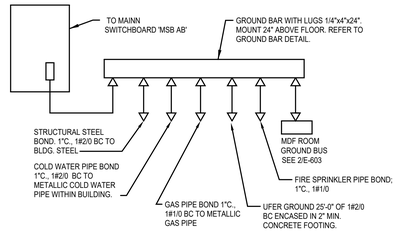
BID SET (PRELIMINARY)



KEY NOTES:

1. WHERE CONDUITS SERVE INCOMING AND OUTGOING CIRCUITS KEEP RISERS SEPARATED INSIDE PULLBOX TO ALLOW FOR SLACK CONDUCTORS.
2. TOPS OF CONDUITS MUST NOT EXTEND INTO PULLBOX MORE THAN 1/3 OF THE TOTAL AVAILABLE INSIDE BOX HEIGHT. IN ORDER TO ALLOW ADEQUATE SPACE FOR CABLE SLACK.
3. #4 COPPER GROUNDING BOND JUMPER BETWEEN LIDS. PROVIDE LENGTH WITH SLACK AS REQUIRED TO COMPLETELY REMOVE LID FROM BOX.

7 NON-TRAFFIC RATED PULL BOX

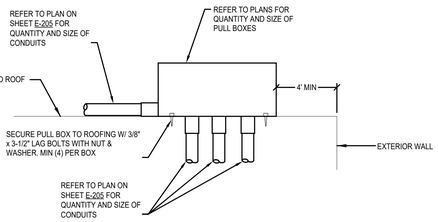


NONE

NOTE: PROVIDE A MINIMUM OF (2) GROUND RODS PER CEC 250.53(A)(2).

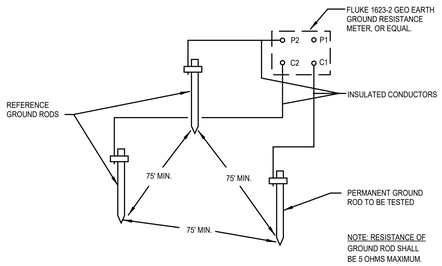
4 GROUND ROD AND INSPECTION WELL

NONE



NOTES:

1. TYPICAL AT EACH BUILDING.
2. UFER GROUND, 25' BARE COPPER CONDUCTOR ENCASED IN CONCRETE FOOTING 3" FROM BOTTOM.
3. PROVIDE A MINIMUM OF (2) GROUND RODS PER CEC 250.53(2).
4. PROVIDE BOND TO BUILDING STEEL, METALLIC COLD WATER PIPE, MAIN GAS PIPE AND FIRE SPRINKLER PIPE AT BUILDINGS WHERE APPLICABLE.
5. PROVIDE GROUND CONDUCTOR TO IT ROOM/DF SIZED PER BICSI STANDARDS UNLESS OTHERWISE NOTED, WHERE APPLICABLE.



1 MAIN GROUND BUS

NONE

8 ROOF MOUNTED PV J-BOX

NONE

NOTE: RESISTANCE OF GROUND ROD SHALL BE 5 OHMS MAXIMUM.

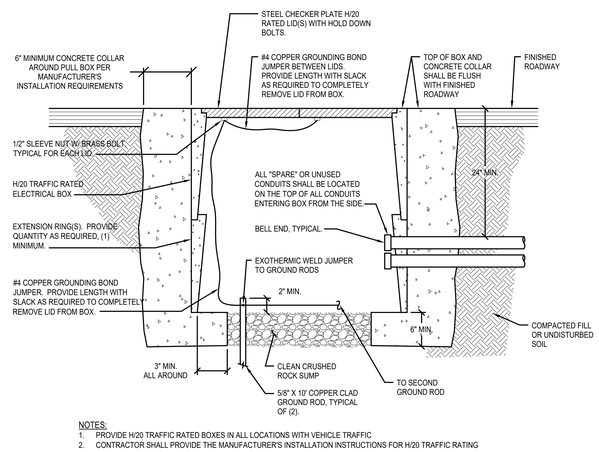
5 METHOD OF TESTING GROUND RODS

NONE

FALL OF POTENTIAL TEST METHOD

NOTES:

1. POWER EQUIPMENT OR SYSTEMS WITH CAPACITY OF 500KVA OR LESS: 10 OHMS.
2. POWER EQUIPMENT OR SYSTEMS WITH CAPACITY OF 500 TO 1000KVA: 5 OHMS.
3. POWER EQUIPMENT OR SYSTEMS WITH CAPACITY GREATER THAN 1000KVA: 3 OHMS.
4. POWER DISTRIBUTION UNITS OR PANELBOARDS SERVING ELECTRONIC I.T. EQUIPMENT: 3 OHMS.
5. MAN-HOLE GROUNDS: 10 OHMS.



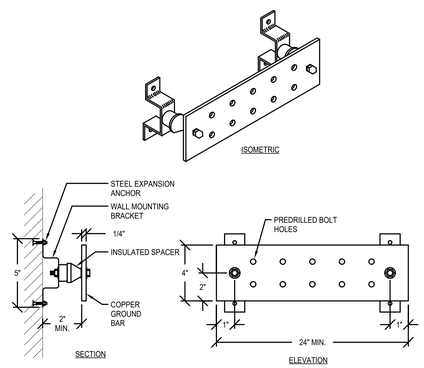
FALL OF POTENTIAL 3-POINT TEST:

GROUND RING, I.E. 10 BY 10 RING, 14' DIAGONAL LENGTH ISOLATION FROM UTILITY NEUTRAL PROBE Z IS DRIVEN A DISTANCE OF 10 TIMES DIAGONAL LENGTH OF THE GROUNDING ROD SYSTEM (ROD X). A SECOND PROBE (Y) IS PLACED IN LINE AT A DISTANCE FROM ROD X EQUAL TO THE DIAGONAL LENGTH OF THE GROUNDING SYSTEM.

AT THIS POINT, A KNOWN CURRENT IS APPLIED ACCROSS X & Z, WHILE THE RESULTING VOLTAGE IS MEASURED ACROSS X & Y. OHMS LAW APPLIED R=V/I. THEN (Y) MOVED TO 2 TIMES THE DIAGONAL LENGTH, THEN MOVE OUT TO 3 TIMES(3X). 4X... 9X THE DIAGONAL LENGTH TO COMPLETE THE 3 POINT TEST WITH A TOTAL OF NINE RESISTANCE MEASUREMENTS.

2 MDF ROOM GROUND BUS

NONE



NOTES:

1. PROVIDE H/20 TRAFFIC RATED BOXES IN ALL LOCATIONS WITH VEHICLE TRAFFIC
2. CONTRACTOR SHALL PROVIDE THE MANUFACTURER'S INSTALLATION INSTRUCTIONS FOR H/20 TRAFFIC RATING REQUIREMENTS AS PART OF THE SUBMITTALS.

6 TRAFFIC RATED PULL BOX

NONE

NOTES:

1. PROVIDE A MINIMUM OF 1 MOUNTING POINT PER 12" OF BAR LENGTH.
2. PROVIDE QUANTITY OF PREDRILLED STANDARD NEMA BOLT HOLES SIZED AND SPACED AS REQUIRED FOR CONNECTIONS USED.
3. FOR ALL ADDITIONAL INSTALLATION REQUIREMENTS REFER TO SPEC SECTIONS 26 05 26.

3 GROUND BAR DETAIL

NONE

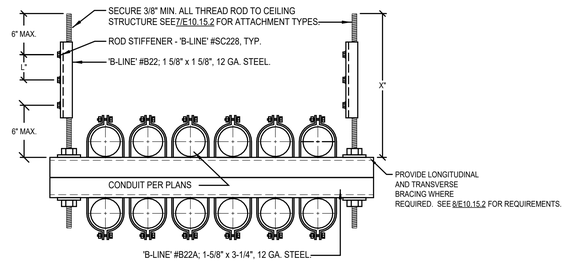
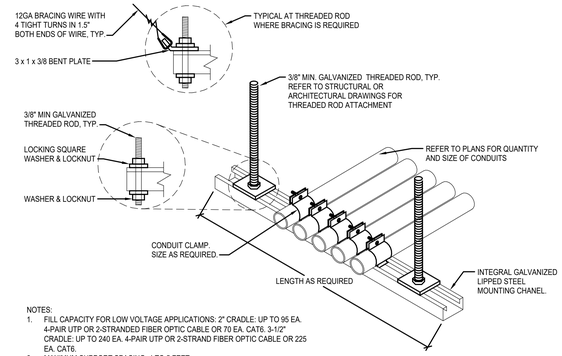
BID SET (PRELIMINARY)



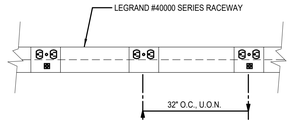
NOTES:
1. UPON INSTALLATION OF SMS TO UNISTRUT TO METAL DECK, CONTRACTOR TO PATCH AND REPAIR DAMAGE TO (E) SPRAY APPLIED FIREPROOFING. RESTORE TO ORIGINAL FIREPROOFING THICKNESS AND FIRE RATING.

NOTES:
1. UPON INSTALLATION OF ROD HANGER TO METAL DECK, CONTRACTOR TO PATCH AND REPAIR DAMAGE TO (E) SPRAY APPLIED FIREPROOFING. RESTORE TO ORIGINAL FIREPROOFING THICKNESS AND FIRE RATING.



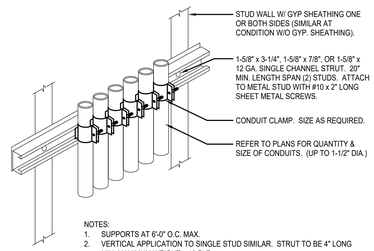
7 ROD TO METAL DESK
NONE

ROD STIFFENER SCHEDULE	
ROD Ø	**'L' MAX**
3/8"	10"
1/2"	14"
5/8"	16"
3/4"	20"



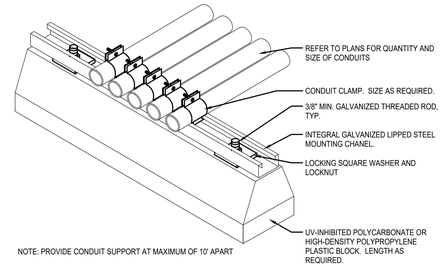
NOTES:
1. WHERE 'X' = 24" OR LESS, ROD STIFFENERS ARE NOT REQUIRED.
2. PROJECT MAX LOAD: 15 LBS/FT.
3. CHANNEL TRAPEZE SHALL BE SPACED MAX. 6'-0" O.C.
4. AIRCRAFT CABLE MAY BE OMITTED WHEN HANGER ROD LENGTH DOES NOT EXCEED 12".

4 CONDUIT TRAPEZE - DUBLE SIDED
NONE



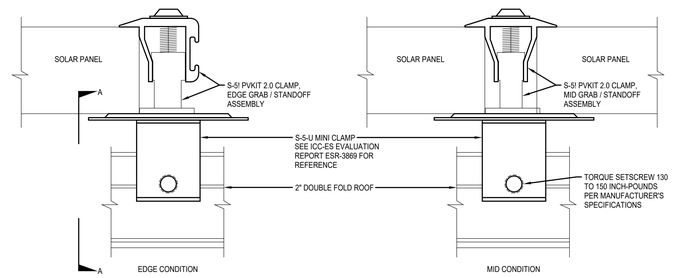
NOTES:
1. FILL CAPACITY FOR LOW VOLTAGE APPLICATIONS: 2" CRADLE: UP TO 95 EA. 4-PAIR UTP OR 2-STRANDED FIBER OPTIC CABLE OR 70 EA. CAT6. 3-1/2" CRADLE: UP TO 240 EA. 4-PAIR UTP OR 2-STRAND FIBER OPTIC CABLE OR 225 EA. CAT6.
2. MAXIMUM SUPPORT SPACING: 4 TO 5 FEET.
3. MAXIMUM TOTAL UNIFORM LOAD, 10 LBS/SF. MAXIMUM LOAD PER "COMFORT CRADLE", 25 LBS.
4. MAXIMUM TOTAL PER HANGER, 45 LBS.
5. PROVIDE A MINIMUM WORKING CLEARANCE OF 18" ON THE CABLE PLACEMENT SIDE OF THE CABLE SUPPORTS.
6. DETAIL WILL APPLY TO CABLE TRAY. PROVIDE LONGITUDINAL BRACING PARALLEL CABLE TRAY AT 20'-0" MAX. SPACING, EACH SIDE OF TRAY.

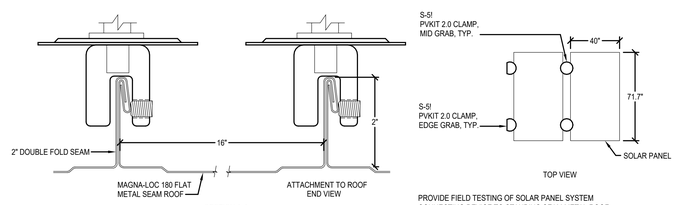
1 CONDUIT TRAPEEZE
NONE



NOTE: THE POWER COMPARTMENT OF THE WIREWAY SHALL BE WIRED THROUGHOUT WITH CIRCUIT CONDUCTOR PER PLAN TO ALL RECEPTACLES. FURNISH & INSTALL (8) CABLE TYPE "H" THE ENTIRE LENGTH OF ALL DATA COMPARTMENTS FOR TERMINATION/CONNECTION BY OWNER.

8 PWR & SIG WIREWAY DETAIL
NONE

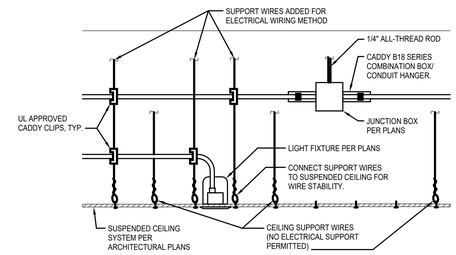




NOTES:
1. SUPPORTS AT 6'-0" O.C. MAX.
2. VERTICAL APPLICATION TO SINGLE STUD SIMILAR. STRUT TO BE 4" LONG MIN. MAXIMUM WEIGHT + 10 PLF.

5 VERTICAL CONDUIT SUPPORT
NONE

2 ROOF CONDUIT SUPPORT
NONE



FIELD TESTS ARE REQUIRED TO VERIFY PROPER INSTALLATION OF THE SEAM CONNECTING DEVICE. AFTER ALL THE CONNECTING DEVICES HAVE BEEN INSTALLED, TEST A MINIMUM OF 20 CONSECUTIVE DEVICES TO TWICE THE MAXIMUM ALLOWABLE STRESS DESIGN (ASD) WIND UPLIFT LOAD TRIBUTARY TO THE CONNECTING DEVICE BASED ON THE WIND PRESSURE AT AREAS OF DISCONTINUITY SUCH AS ROOF EDGES AND RIDGES. IF THERE IS NO FAILURE IN 20 CONSECUTIVE TESTS, TEST 10 PERCENT OF THE REMAINING INSTALLED CONNECTING DEVICES. IF FAILURE OCCURS BEFORE 20 CONSECUTIVE SUCCESSFUL TESTS ARE COMPLETED, THEN ADDITIONAL TESTS SHALL BE PERFORMED UNTIL 20 CONSECUTIVE SUCCESSFUL TESTS ARE COMPLETED, THEN CONTINUE AT A RATE OF 10 PERCENT ON THE REMAINING INSTALLED DEVICES.

PROVIDE FIELD TESTING OF SOLAR PANEL SYSTEM CONNECTING DEVICE TO STANDING SEAM METAL ROOF PER DSA IR 16-8, 5.1.3.1.

SOLAR PANEL PULL TEST REPORT SHALL INCLUDE:
NUMBER OF TESTS PERFORMED AT EACH BUILDING IN EACH WIND ZONE.
ANY FAILURES DURING TESTING.
ANY NOTICEABLE DEFORMATION AFTER TESTING.

6 PV MOUNTING DETAIL
NONE

IN ACCORDANCE WITH CEC 300.11, RACEWAYS, CABLE ASSEMBLIES, BOXES, CABINETS, AND FITTINGS SHALL NOT BE SECURED TO, OR SUPPORTED BY, THE CEILING ASSEMBLY, INCLUDING THE CEILING SUPPORT WIRES. AN INDEPENDENT MEANS OF SECURE SUPPORT SHALL BE PROVIDED AND SHALL BE SECURED AT BOTH ENDS. IN FIRE-RATED ASSEMBLIES THE INDEPENDENT SUPPORT WIRES SHALL BE DISTINGUISHABLE BY COLOR, TAGGING, OR OTHER EFFECTIVE MEANS FROM THOSE THAT ARE PART OF THE FIRE-RATED DESIGN.

3 SUSPENDED CONDUIT SUPPORT
NONE

Classified by Underwriters Laboratories, Inc. to UL 1479 and CAN/ULC-S115

SECTION A-A

1. Wall Assembly — The 1 or 2 hr fire-rated gypsum wallboard/stud wall assembly shall be constructed of the materials and in the manner specified in the individual U300 or U400 Series Wall and Partition Designs in the UL Fire Resistance Directory and shall include the following construction features:
   A. Studs — Wall framing may consist of either wood studs or steel channel studs. Wood studs to consist of nom 2 by 4 in. (51 by 102 mm) lumber spaced 16 in. (406 mm) OC. Steel studs to be min 2-1/2 in. (64 mm) wide and spaced max 24 in. (610 mm) OC. When steel studs are used and the diam of opening exceeds the width of stud cavity, the opening shall be framed on all sides using lengths of steel stud installed between the vertical studs and screw-attached to the steel studs at each end. The framed opening in the wall shall be 4 to 6 in. (102 to 152 mm) wider and 4 to 6 in. (102 to 152 mm) higher than the diam of the penetrating item such that, when the penetrating item is installed in the opening, a 2 to 3 in. (51 to 76 mm) clearance is present between the penetrating item and the framing on all four sides.
   B. Gypsum Board* — 5/8 in. (16 mm) thick, 4 ft (122 cm) wide with square or tapered edges. The gypsum board type, thickness, number of layers, fastener type and sheet orientation shall be as specified in the individual U300 or U400 Series Design in the UL Fire Resistance Directory. Max diam of opening is 32-1/4 in. (819 mm) for steel stud walls. Max diam of opening is 14-1/2 in. (368 mm) for wood stud walls.

   The F and FH Ratings of the firestop system are equal to the fire rating of the wall assembly.
2. Through-Penetrants — One metallic pipe, conduit or tubing to be installed either concentrically or eccentrically within the firestop system. The annular space shall be min 0 in. to max 2-1/4 in. (57 mm). Pipe may be installed with continuous point contact. Pipe, conduit or tubing may be installed at an angle not greater than 45 degrees from perpendicular. Pipe, conduit or tubing to be rigidly supported on both sides of wall assembly. The following types and sizes of metallic pipes, conduits or tubing may be used:
   A. Steel Pipe — Nom 30 in. (762 mm) diam (or smaller) Schedule 10 (or heavier) steel pipe.
   B. Iron Pipe — Nom 30 in. (762 mm) diam (or smaller) cast or ductile iron pipe.
   C. Conduit — Nom 4 in. (102 mm) diam (or smaller) steel electrical metallic tubing or 6 in. (152 mm) . diam steel conduit.
   D. Copper Tubing — Nom 6 in. (152 mm) diam (or smaller) Type L (or heavier) copper tubing.
   E. Copper Pipe — Nom 6 in. (152 mm) diam (or smaller) regular (or heavier) copper pipe.
3. Fill, Void or Cavity Material* — Sealant — Min 5/8 in. (16 mm) thickness of fill material applied within the annulus, flush with both surfaces of wall. At the point or continuous contact locations between pipe and wall, a min 1/2 in. (13 mm) diam bead of fill material shall be applied at the pipe wall interface on both surfaces of wall.

   HILTI CONSTRUCTION CHEMICALS, DIV OF HILTI INC— FS-One Sealant or FS-ONE MAX Intumescent Sealant

* Indicates such products shall bear the UL or cUL Certification Mark for jurisdictions employing the UL or cUL Certification (such as Canada), respectively.

Product information

FIRESTOP CP 617 PUTTY PADS

Product description
- A moldable firestop putty designed to help protect electrical outlet boxes, junction boxes, and large steel boxes

Applications for use
- Protection of electrical outlet boxes, large steel boxes and junction boxes
- General gypsum wall assemblies with wood or metal studs
- When two outlets on opposite sides of the wall are located within a single stud / cavity or within 24" measured horizontally (not back-to-back unless specified by specific UL approval)

Advantages
- Applied by hand, no tools required. Pad can be molded without leaving residue on hands
- No electrical conductivity
- Quick and simple to install
- Can be used for commercial and residential applications
- Asbestos, formaldehyde and LABS free
- Red list compliant
- No oil migration. Putty remains flexible over time
- Excellent adhesion to gypsum, metal and plastic
- Hilti-branded paper has integrated IFU on each pad
- No methylene diisocynate, phthalates, volatile solvents or abestos fibers

Installation instructions
- See Hilti literature or third-party listings for complete application and installation details

Technical Data

Chemical basis	Butyl rubber
Color	Red
Recommended application temperature	32° to 104° F
Storage and transportation temperature range	23° to 104° F
Density	1.6 g/cm³
Temperature resistance range	-4° to 104° F
Mold and mildew performance	Class 0 (ASTM G21-96)
Tested in accordance with	UL 1479, CAN / ULC-S115, ASTM E814
Surface burning characteristics	Flame spread 15 (ASTM E84) Smoke development 10 (ASTM E84)
LEED v4.1 compliance	Complies with CDPH standard method v1.2-2017
LEED VOC	2 g/L
Dimensions (LxWxH)	CP 617 6"x7": 6"x7"x1/8" (15x18x0.3 cm) CP 617 L 7"x7": 7"x7"x1/8" (18x18x0.3 cm) CP 617 XL 9"x9": 9"x9"x1/8" (23x23x0.3 cm)
Package includes	20 pcs per box
Acoustics performance	64 (relates to specific construction) ASTM E90
Shelf life	Not relevant
Curing time	Non-curing

Order designation	Sales pack quantity	Item number
CP 617 6"x7"	20	309760
CP 617 L 7"x7"	20	333583
CP 617 XL 9"x9"	20	373387

FIRE ALARM SYSTEM NOTES

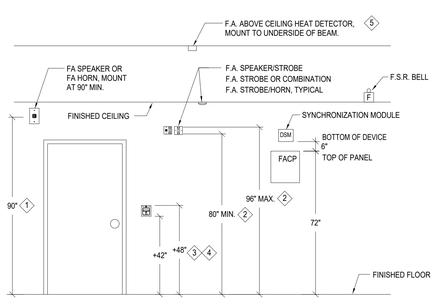
1. THE INSTALLATION OF THE FIRE ALARM SYSTEM SHALL CONFORM TO THE APPLICABLE EDITION OF THE FOLLOWING CODES AND STANDARDS MATCHING WITH TITLE SHEET EDITION:
   a. CODE OF FEDERAL REGULATIONS (CFR)
   b. AMERICAN NATIONAL DISABILITY ACT (ADA)
   c. ENVIRONMENTAL PROTECTION AGENCY (EPA)
   d. FEDERAL COMMUNICATIONS COMMISSION (FCC)
   e. OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION (OSHA)
   f. UNDERWRITERS LABORATORIES INC. (UL)
   g. AMERICAN NATIONAL STANDARDS INSTITUTE (ANSI)
   h. NATIONAL FIRE PROTECTION ASSOCIATION 72 (NFPA 72) WITH CALIFORNIA AMENDMENTS.
   i. CALIFORNIA ELECTRICAL CODE (CEC)
   j. CALIFORNIA BUILDING CODE (CBC)
   k. CALIFORNIA FIRE CODE (CFC)
2. FIRE ALARM PACKAGE SHALL INCLUDE DETAILED SHOP DRAWINGS, CUT SHEETS, AND COPIES OF THE APPROVED CSFM (CALIFORNIA STATE FIRE MARSHAL) LISTINGS FOR DEVICES, PROGRAMING, COMMISSIONING, STARTUP, AND ONE YEAR OF MAINTENANCE AFTER THE INSTALLATION IS ACCEPTED AND SIGNED OFF BY THE INSPECTOR OF RECORD.
3. PRIOR TO ORDERING AND INSTALLATION THE FIRE ALARM SYSTEM AND ASSOCIATED EQUIPMENT PREPARE AND SUBMIT A COMPLETE SUBMITTAL PACKAGE COMPLETE WITH DETAILED SHOP DRAWINGS (INCLUSIVE OF CALCULATIONS AND POINT BY POINT WIRING DIAGRAMS), CUT SHEETS AND COPIES OF THE APPROVED CALIFORNIA STATE FIRE MARSHAL LISTINGS FOR EACH COMPONENT OF THE SYSTEM TO BE INSTALLED.
4. ANY DISCREPANCIES IN THE DRAWING SET WITH APPLICABLE CODES OR RECOGNIZED STANDARDS SHALL BE BROUGHT TO THE ATTENTION OF THE ARCHITECT/ENGINEER PRIOR TO ORDERING AND INSTALLING EQUIPMENT.
5. INFORMATION SHOWN ON THESE PLANS RELATING TO THE EXISTING FIRE ALARM SYSTEM HAS BEEN OBTAINED FROM THE ORIGINAL AND "AS BUILT/RECORD" DRAWINGS AND FROM FIELD OBSERVATIONS. THE CONTRACTOR SHALL BE RESPONSIBLE FOR VERIFICATION OF ALL EXISTING WIRING AND RELATED CONDITIONS BEFORE PROCEEDING WITH THE EXECUTION OF WORK. MODIFICATIONS TO THE EXISTING WIRING SYSTEMS SHALL ENSURE CIRCUIT CONTINUITY TO ALL REMAINING EXISTING DEVICES OR EQUIPMENT ASSOCIATED WITH THE EXISTING REMAINING WIRING SYSTEM.
6. A STAMPED SET OF APPROVED FIRE ALARM SHOP DRAWINGS SHALL BE KEPT ON THE JOB SITE AND USED FOR INSTALLATION. ANY DEVIATION FROM THE APPROVED DOCUMENTS, INCLUDING SUBSTITUTION OF DEVICES, SHALL BE APPROVED BY THE INSPECTOR OF RECORD. ALL DEVIATIONS SHALL BE MARKED-UP ON THE JOB SITE SET OF THE APPROVED DOCUMENTS. THE APPROVED DOCUMENTS SHALL BE KEPT UP-TO-DATE WITH ALL DEVIATIONS (INCLUDING CONDUIT/CABLE ROUTING CHANGES, WIRING CHANGES AND DEVICE ADDRESS CHANGES) AND SHALL BE USED AS REDLINES FOR THE FINAL AS AS-BUILT SET OF DRAWINGS.
7. UPON ACTIVATION OF ANY INITIATION DEVICE THE FIRE ALARM SYSTEM SHALL TRANSMIT AN ALARM OR SUPERVISORY SIGNAL TO THE MONITORING STATION OF THE OWNER'S CHOICE.
8. UPON RECEIPT OF ANY TROUBLE CONDITION THE FIRE ALARM SYSTEM SHALL TRANSMIT A TROUBLE SIGNAL TO THE MONITORING STATION OF THE OWNER'S CHOICE.
9. THE TOTAL SOUND PRESSURE LEVEL PRODUCED BY COMBINING THE AMBIENT SOUND PRESSURE LEVEL WITH ALL AUDIBLE NOTIFICATION APPLIANCES OPERATING SHALL NOT EXCEED 110 dBA AT THE MINIMUM HEARING DISTANCE (NFPA 72, 2019 EDITION SECTION 18.4.1.2).
10. TO ENSURE THAT AUDIBLE PUBLIC MODE SIGNALS ARE CLEARLY HEARD THEY SHALL HAVE A SOUND LEVEL AT LEAST 15 dB ABOVE THE AVERAGE AMBIENT SOUND LEVEL OR 5 dB ABOVE THE MAXIMUM SOUND LEVEL HAVING A DURATION OF AT LEAST 60 SECONDS, WHICHEVER IS GREATER, MEASURED 5 FT ABOVE THE FLOOR IN THE AREA REQUIRED TO BE SERVED BY THE SYSTEM USING THE A-WEIGHTED SCALE (dBA) (NFPA 72, 2019 EDITION CBC CHAPTER 35).
11. THE ALARM AUDIBLE SIGNAL PATTERN USED TO NOTIFY OCCUPANTS OF THE NEED TO EVACUATE (LEAVE THE BUILDING) OR RELOCATE (FROM ONE AREA TO ANOTHER) SHALL BE THE STANDARD ALARM EVACUATION SIGNAL CONSISTING OF A THREE-PULSE TEMPORAL PATTERN (NFPA 72, 2019 EDITION CBC CHAPTER 35).
12. VISUAL DEVICES SHALL NOT EXCEED 2 FLASHES PER SECOND AND SHALL NOT BE SLOWER THAN 1 FLASH EVERY SECOND. THE DEVICE SHALL HAVE A PULSING LIGHT SOURCE NOT LESS THAN .0375 LUMENS PER SQUARE FEET AND MEET ADA COMPLIANCE. WHEN THERE IS MORE THAN TWO VISUAL APPLIANCES OR GROUPS OF SYNCHRONIZED VISUAL APPLIANCES WITHIN THE FIELD OF VIEW ALL APPLIANCES SHALL BE SYNCHRONIZED.
13. AN AVERAGE AMBIENT SOUND LEVEL GREATER THAN 105 dBA SHALL REQUIRE THE USE OF A VISIBLE NOTIFICATION APPLIANCE (NFPA 72, 2016 EDITION CBC CHAPTER 35).
14. THE FLASH RATE SHALL NOT EXCEED TWO FLASHES PER SECOND (2 Hz) NOR BE LESS THAN ONE FLASH EVERY SECOND (1 Hz) THROUGHOUT THE LISTED VOLTAGE RANGE OF THE APPLIANCE (NFPA 72, 2019 EDITION SECTION 18.5.3.1)
15. WHERE MORE THAN TWO VISIBLE NOTIFICATION APPLIANCES OR GROUPS OF SYNCHRONIZED APPLIANCES ARE IN THE SAME ROOM OR ADJACENT SPACE IN THE FIELD OF VIEW ALL APPLIANCES ARE REQUIRED SYNCHRONIZE TOGETHER (NFPA 72, 2019 EDITION SECTION 18.5.5.4.2)
16. T-TAP ONLY WHERE SHOWN ON THE DRAWINGS AND APPROVED BY THE MANUFACTURER'S DOCUMENTATION.
17. FIRE ALARM CIRCUITS SHALL BE INSTALLED IN A MINIMUM OF 3/4" CONDUITS. CONDUIT FILL SHALL BE MAINTAINED PER THE APPLICABLE CEC.
18. PENETRATIONS THROUGH RATED ASSEMBLIES AND WALLS SHALL BE SEALED WITH A LISTED SYSTEM THAT IS EQUAL TO OR EXCEEDS THE RATING OF THE ASSEMBLY. REFER TO FIRESTOP DETAIL.
19. WIRING SHALL BE UL APPROVED AS DESIGNATED IN THE FIRE ALARM SYSTEM WIRING SCHEDULE OR THE MANUFACTURER'S INSTALLATION MANUAL. FIRE ALARM CABLES SHALL BE PROVIDED WITH RED PVC JACKET. WIRING INSTALLED UNDERGROUND SHALL BE LISTED FOR WET LOCATION.
20. WIRING PULLED THROUGH A JUNCTION BOX OR BACK BOX SHALL TERMINATE AT A DEVICE, SYSTEM PANEL OR TERMINAL CABINET WITH NO SPLICES. SIZE BOXES PER WIRE FILL AS DEFINED IN THE CEC. PROVIDE A MINIMUM OF 6 " OF LEAD WIRE FROM THE BOX TO CONNECT EACH DEVICE.
21. FIRE ALARM CABLES/CONDUCTORS SHALL BE LABELED AT BOTH ENDS. REFER TO SPECIFICATIONS FOR LABELING REQUIREMENTS.
22. UPON COMPLETION OF INSTALLATION CONDUCT A TEST OF THE SYSTEMS OPERATION IN ACCORDANCE WITH NFPA 72, 2016 EDITION CBC CHAPTER 35 IN THE PRESENCE OF THE ARCHITECT AND THE INSPECTOR OF RECORD. COMPLETE REQUIRED DOCUMENTATION IN ACCORDANCE WITH NFPA 72, 2019 EDITION CBC CHAPTER 35. PROVIDE ORIGINAL TO INSPECTOR OF RECORD AND COPIES TO OWNER'S REPRESENTATIVE AND INSPECTOR OF RECORD.
23. THE INSPECTOR OF RECORD, AND THE OWNER'S REPRESENTATIVE SHALL RECEIVE FORTY EIGHT (48) HOURS NOTICE PRIOR TO THE DATE OF A FUNCTIONAL TEST AND FINAL INSPECTION.
24. THE INSPECTOR OF RECORD AND THE ARCHITECT SHALL RECEIVE ONE (1) WEEKS NOTICE FOR A FINAL PUNCH LIST WALK.
25. INITIATING DEVICES SHALL BE INSTALLED IN A MANNER THAT PROVIDES ACCESSIBILITY FOR PERIODIC INSPECTION, TESTING AND MAINTENANCE (NFPA 72, 2019 EDITION CBC CHAPTER 35).
26. THE FOLLOWING SHALL BE COMPLETED AND SUBMITTED TO THE ENGINEER FOR A FINAL TO BE GRANTED:
   a. AS-BUILT DRAWINGS, PROGRAMMING DOCUMENTS, SCHEMATICS (DEVICE & EQUIPMENT CUTSHEETS), AND MANUALS PER SPECIFICATIONS. PROVIDE SUCH DOCUMENTS IN PAPER FORM AND ON CD.
   b. A 1/2 SIZE LAMINATED POSTING OF THE AS-BUILT PRINTS AT THE FIRE ALARM CONTROL PANEL.
   c. TYPED RECORD OF COMPLETION PER NFPA 72.
   d. ITEMS ON A PUNCH LIST SHALL BE COMPLETE AND SIGNED OFF BY THE INSPECTOR OF RECORD.
   e. ACCEPTANCE OF THE FUNCTIONAL TEST SIGNED OFF BY THE INSPECTOR OF RECORD.
28. PER CEC 760.41(B) THE BRANCH CIRCUIT SUPPLYING THE FIRE ALARM EQUIPMENT(S) SHALL SUPPLY NO OTHER LOADS. THE LOCATION OF THE BRANCH-CIRCUIT OVERCURRENT PROTECTIVE DEVICE SHALL BE PERMANENTLY IDENTIFIED AT THE FIRE ALARM CONTROL UNIT OR NOTIFICATION POWER SUPPLY. THE CIRCUIT DISCONNECTING MEANS SHALL HAVE RED IDENTIFICATION, SHALL BE ACCESSIBLE ONLY TO QUALIFIED PERSONNEL, AND SHALL BE IDENTIFIED AS "FIRE ALARM CIRCUIT".
29. AUTOMATIC FIRE ALARM SYSTEM SHALL BE MONITORED AND SHALL TRANSMIT THE ALARM, SUPERVISORY AND TROUBLE SIGNALS TO AN APPROVED SUPERVISING STATION IN ACCORDANCE WITH NFPA 72. AS AMENDED BY CFC CHAPTER 80. THE SUPERVISING STATION SHALL BE LISTED AS EITHER UUFX (CENTRAL STATION) OR UUJS (REMOTE & PROPRIETARY) BY UNDERWRITERS LABORATORY INC. (UL) OR OTHER APPROVED LISTING AND TESTING LABORATORY OR SHALL COMPLY WITH THE REQUIREMENTS OF STANDARD, FACTORY MUTUAL (FM) 3011. TERMINATION OF MONITORING SERVICES SHALL BE IN ACCORDANCE WITH CBC/CFC SECTION 907.6.6.2.

SCOPE OF WORK

THE FOLLOWING IS A BRIEF DESCRIPTION OF THE SCOPE OF WORK FOR THIS PROJECT. IT IS GENERAL IN NATURE AND DOES NOT CONSTITUTE ALL THAT IS TO BE DONE NOR DOES IT INDICATE THE SEQUENCE OF INSTALLATION. IT IS THE CONTRACTOR'S RESPONSIBILITY TO FULLY COMPLETE THE WORK IDENTIFIED IN THE PLAN DOCUMENTS.

1. PROVIDE REMOTE ANNUNCIATOR IN RECEPTION
2. PROVIDE AUTOMATIC INITIATION FOR INDICATED MECHANICAL UNITS
3. PROVIDE NOTIFICATION THROUGHOUT PUBLIC AREAS OF BUILDING

FIRE ALARM DEFERRED APPROVAL



THE FIRE ALARM PLAN HEREWITH THIS DRAWING SET IS SHOWN FOR DEFERRED APPROVAL AND BID PURPOSES ONLY. THE CONTRACTOR SHALL SUBMIT A COMPLETE SET OF FIRE ALARM SUBMITTALS TO THE BUILDING DEPARTMENT FOR FIRE ALARM PLAN CHECK REVIEW. THE SUBMITTAL SHALL INCLUDE THE FOLLOWING:

1. FIRE ALARM SYSTEM OPERATIONS MATRIX
2. FIRE ALARM SYSTEM RISER DIAGRAM
3. VOLTAGE DROP & BATTERY CALCULATIONS
4. EQUIPMENT SCHEDULE
5. MANUFACTURER CUT SHEETS AND CALIFORNIA STATE FIRE MARSHAL LISTINGS
6. COMPLETE FIRE ALARM PLANS PER NFPA 72
7. COPY OF CENTRAL STATION MONITORING CONTRACT

CABLE SCHEDULE

	MANUFACTURER	DESCRIPTION	USAGE	O.D. (INCHES)	AREA (SQ IN.)
A	WEST PENN	2#16, FPLR #990	AUDIO NOTIFICATION APPLIANCE CIRCUIT (SPEAKERS)	.168	.022

VB	WEST PENN	2#16, FPLR #990	VBUS	.168	.022

NOTES:
1. ALL CABLES & WIRES SHALL TERMINATE AT TERMINALS. NO SPLICES.
2. ENDS OF STRANDED CABLES SHALL BE TWISTED AND SOLDERED.
3. ALL CABLES LISTED ABOVE MAY NOT BE USED ON THIS PROJECT.

DETAIL NOTES:

1. NFPA 18.4.8.1 "WHERE CEILING HEIGHTS ALLOW, AUDIBLE APPLIANCES SHALL HAVE THEIR TOPS AT HEIGHTS ABOVE FINISH FLOOR OF NOT LESS THAN 90" AND BELOW FINISHED CEILING OF NOT LESS THAN 6".
2. NFPA 18.5.4.1 VISUAL APPLIANCES SHALL HAVE ENTIRE LENS AT HEIGHTS ABOVE FINISHED FLOOR OF NOT LESS THAN 80" AND NO GREATER THAN 96" OR 6" BELOW CEILING, WHICHEVER IS LOWER.
3. NFPA 17.14.4 THE OPERABLE PART OF EACH MANUAL FIRE ALARM BOX SHALL NOT BE LESS THAN 42" AND NOT MORE THAN 48" ABOVE THE FLOOR.
4. MAINTAIN CONSISTENT HEIGHTS THROUGH OUT PROJECT.
5. INSTALL CEILING ACCESS PANEL AT ALL NON-LAYIN TYPE CEILINGS, WHERE HEAT DETECTOR ABOVE CEILING IS INDICATED.

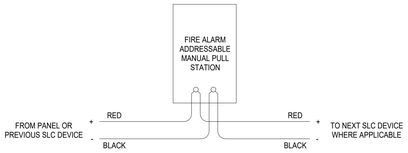
NOTES:

1. ON CEILINGS 10 FT TO 30 FT HIGH, HEAT DETECTOR SPACING SHALL BE REDUCED IN ACCORDANCE WITH TABLE 17.6.3.5.1 PRIOR TO ANY ADDITIONAL REDUCTIONS FOR BEAMS, JOIST OR SLOPE, WHERE APPLICABLE (NFPA 72, 2016 EDITION SECTION 17.6.3.5.1).
2. WIRING SHALL NOT BE LOOPED THROUGH DEVICE TERMINALS. INPUT AND OUTPUT WIRING DEVICE CONNECTIONS SHALL BE MADE ON SEPARATE TERMINALS OR SHALL BE SEPARATE WIRE LEADS MOUNTED UNDER A COMMON TERMINAL. THE MONITORING OF CIRCUIT INTEGRITY RELIES ON THE INTERRUPTION OF THE WIRING CONTINUITY WHEN THE CONNECTION TO THE INITIATING DEVICE IS LOST (NFPA 72, 2016 EDITION SECTION A.17.4.6).
3. WHERE DETECTORS ARE INSTALLED BUT NOT OPERATIONAL DURING CONSTRUCTION, THEY SHALL BE PROTECTED FROM CONSTRUCTION DEBRIS, DIRT, AND DAMAGE IN ACCORDANCE WITH THE MANUFACTURER'S RECOMMENDATIONS AND VERIFIED TO BE OPERATING IN ACCORDANCE WITH THE LISTED SENSITIVITY, OR THEY SHALL BE REPLACED PRIOR TO THE FINAL COMMISSIONING OF THE SYSTEM (NFPA 72, 2016 EDITION SECTION 17.7.1.11.2).
4. WHERE DETECTION IS NOT REQUIRED DURING CONSTRUCTION, DETECTORS SHALL NOT BE INSTALLED UNTIL AFTER ALL OTHER CONSTRUCTION TRADES HAVE COMPLETED CLEANUP (NFPA 72, 2016 EDITION SECTION 17.7.1.11.3).
5. FIRE ALARM WIRING SHALL BE LABELED AT BOTH ENDS. REFER TO SPECIFICATIONS FOR LABELING REQUIREM ENTS.

7 TYPICAL ADDRESSABLE HEAT DETECTOR - WIRING DIAGRAM

NONE

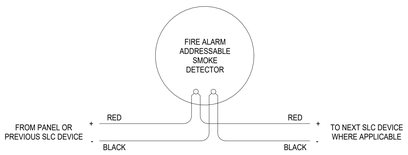


NOTES:

1. ON CEILINGS 10FT TO 30FT HIGH, HEAT DETECTOR SPACING SHALL BE REDUCED IN ACCORDANCE WITH TABLE 17.6.3.5.1 PRIOR TO ANY ADDITIONAL REDUCTIONS FOR BEAMS, JOIST OR SLOPE, WHERE APPLICABLE (NFPA 72, 2019 EDITION SECTION 17.6.3.5.1).
2. WIRING SHALL NOT BE LOOPED THROUGH DEVICE TERMINALS. INPUT AND OUTPUT WIRING DEVICE CONNECTIONS SHALL BE MADE ON SEPARATE TERMINALS OR SHALL BE SEPARATE WIRE LEADS MOUNTED UNDER A COMMON TERMINAL. THE MONITORING OF CIRCUIT INTEGRITY RELIES ON THE INTERRUPTION OF THE WIRING CONTINUITY WHEN THE CONNECTION TO THE INITIATING DEVICE IS LOST (NFPA 72, 2019 EDITION SECTION A.17.4.6).
3. WHERE DETECTORS ARE INSTALLED BUT NOT OPERATIONAL DURING CONSTRUCTION, THEY SHALL BE PROTECTED FROM CONSTRUCTION DEBRIS, DIRT, AND DAMAGE IN ACCORDANCE WITH THE MANUFACTURER'S RECOMMENDATIONS AND VERIFIED TO BE OPERATING IN ACCORDANCE WITH THE LISTED SENSITIVITY, OR THEY SHALL BE REPLACED PRIOR TO THE FINAL COMMISSIONING OF THE SYSTEM (NFPA 72, 2019 EDITION SECTION 17.7.1.11.2).
4. WHERE DETECTION IS NOT REQUIRED DURING CONSTRUCTION, DETECTORS SHALL NOT BE INSTALLED UNTIL AFTER ALL OTHER CONSTRUCTION TRADES HAVE COMPLETED CLEANUP (NFPA 72, 2019 EDITION SECTION 17.7.1.11.3).
5. FIRE ALARM WIRING SHALL BE LABELED AT BOTH ENDS. REFER TO SPECIFICATIONS FOR LABELING REQUIREMENTS.

8 TYPICAL CONVENTIONAL HEAT DETECTOR - WIRING DIAGRAM

NONE

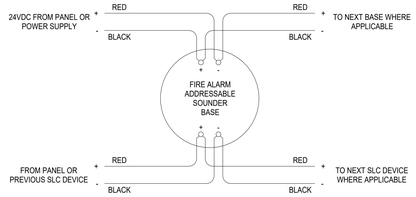


NOTES:

1. WHERE SHOWN ON DRAWINGS, MANUAL FIRE ALARM BOXES SHALL BE LOCATED WITHIN 5 FT OF EACH EXIT DOORWAY ON EACH FLOOR (NFPA 72, 2016 EDITION SECTION 17.14.8.4).
2. WHERE MANUAL FIRE ALARM BOXES ARE INSTALLED, ADDITIONAL MANUAL FIRE ALARM BOXES SHALL BE PROVIDED SO THAT THE TRAVEL DISTANCE TO THE NEAREST MANUAL FIRE ALARM BOX WILL NOT EXCEED 200 FT, MEASURED HORIZONTAL ON THE SAME FLOOR (NFPA 72, 2016 EDITION SECTION 17.14.8.5).
3. WHERE SHOWN ON DRAWINGS, MANUAL FIRE ALARM BOXES SHALL BE MOUNTED ON BOTH SIDES OF GROUPED OPENINGS OVER 40FT IN WIDTH, AND WITHIN 5 FT OF EACH SIDE OF THE GROUPED OPENING (NFPA 72, 2016 EDITION SECTION 17.14.8.6).
4. WIRING SHALL NOT BE LOOPED THROUGH DEVICE TERMINALS. INPUT AND OUTPUT WIRING DEVICE CONNECTIONS SHALL BE MADE ON SEPARATE TERMINALS OR SHALL BE SEPARATE WIRE LEADS MOUNTED UNDER A COMMON TERMINAL. THE MONITORING OF CIRCUIT INTEGRITY RELIES ON THE INTERRUPTION OF THE WIRING CONTINUITY WHEN THE CONNECTION TO THE INITIATING DEVICE IS LOST (NFPA 72, 2016 EDITION SECTION A.17.4.6).
5. FIRE ALARM WIRING SHALL BE LABELED AT BOTH ENDS. REFER TO SPECIFICATIONS FOR LABELING REQUIREMENTS.

4 TYPICAL ADDRESSABLE MANUAL PULL STATION - WIRING DIAGRAM

NONE

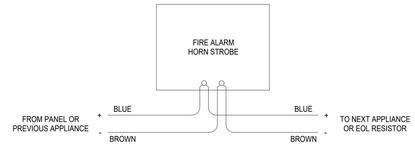


NOTES:

1. SMOKE DETECTORS SHALL NOT BE INSTALLED WITHIN 1'-0" OF A FIRE SPRINKLER HEAD.
2. DETECTORS SHOULD NOT BE LOCATED IN A DIRECT AIRFLOW OR CLOSER THAN 36 IN. FROM AN AIR SUPPLY DIFFUSER OR RETURN AIR OPENING. SUPPLY OR RETURN SOURCES LARGER THAN THOSE COMMONLY FOUND IN RESIDENTIAL AND SMALL COMMERCIAL ESTABLISHMENTS CAN REQUIRE GREATER CLEARANCE TO SMOKE DETECTORS. SIMILARLY, SMOKE DETECTORS SHOULD BE LOCATED FARTHER AWAY FROM HIGH VELOCITY AIR SUPPLIES (NFPA 72, 2019 EDITION SECTION A.17.7.4.1).
3. WIRING SHALL NOT BE LOOPED THROUGH DEVICE TERMINALS. INPUT AND OUTPUT WIRING DEVICE CONNECTIONS SHALL BE MADE ON SEPARATE TERMINALS OR SHALL BE SEPARATE WIRE LEADS MOUNTED UNDER A COMMON TERMINAL. THE MONITORING OF CIRCUIT INTEGRITY RELIES ON THE INTERRUPTION OF THE WIRING CONTINUITY WHEN THE CONNECTION TO THE INITIATING DEVICE IS LOST (NFPA 72, 2019 EDITION SECTION A.17.4.6).
4. WHERE DETECTORS ARE INSTALLED BUT NOT OPERATIONAL DURING CONSTRUCTION, THEY SHALL BE PROTECTED FROM CONSTRUCTION DEBRIS, DIRT, AND DAMAGE IN ACCORDANCE WITH THE MANUFACTURER'S RECOMMENDATIONS AND VERIFIED TO BE OPERATING IN ACCORDANCE WITH THE LISTED SENSITIVITY, OR THEY SHALL BE REPLACED PRIOR TO THE FINAL COMMISSIONING OF THE SYSTEM (NFPA 72, 2019 EDITION SECTION 17.7.1.11.2).
5. WHERE DETECTION IS NOT REQUIRED DURING CONSTRUCTION, DETECTORS SHALL NOT BE INSTALLED UNTIL AFTER ALL OTHER CONSTRUCTION TRADES HAVE COMPLETED CLEANUP (NFPA 72, 2019 EDITION SECTION 17.7.1.11.3).
6. FIRE ALARM WIRING SHALL BE LABELED AT BOTH ENDS. REFER TO SPECIFICATIONS FOR LABELING REQUIREMENTS.

5 TYPICAL ADDRESSABLE SMOKE DETECTOR - WIRING DIAGRAM

NONE

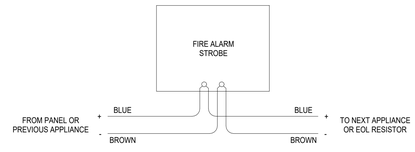


NOTES:

1. WIRING SHALL NOT BE LOOPED THROUGH DEVICE TERMINALS. INPUT AND OUTPUT WIRING DEVICE CONNECTIONS SHALL BE MADE ON SEPARATE TERMINALS OR SHALL BE SEPARATE WIRE LEADS MOUNTED UNDER A COMMON TERMINAL. THE MONITORING OF CIRCUIT INTEGRITY RELIES ON THE INTERRUPTION OF THE WIRING CONTINUITY WHEN THE CONNECTION TO THE INITIATING DEVICE IS LOST (NFPA 72, 2016 EDITION SECTION A.17.4.6).
2. FIRE ALARM WIRING SHALL BE LABELED AT BOTH ENDS. REFER TO SPECIFICATIONS FOR LABELING REQUIREMENTS.

6 TYPICAL ADDRESSABLE SOUNDER BASE - WIRING DIAGRAM

NONE

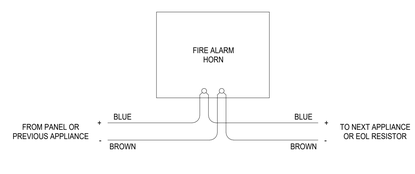


NOTES:

1. AN AVERAGE AMBIENT SOUND LEVEL GREATER THAN 105 dBA SHALL REQUIRE THE USE OF A VISIBLE NOTIFICATION APPLIANCE (NFPA 72, 2016 EDITION SECTION 18.4.1.1)
2. THE TOTAL SOUND PRESSURE LEVEL PRODUCED BY COMBINING THE AMBIENT SOUND PRESSURE LEVEL WITH ALL AUDIBLE NOTIFICATION APPLIANCES OPERATING SHALL NOT EXCEED 110 dBA AT THE MINIMUM HEARING DISTANCE (NFPA 72, 2016 EDITION SECTION 18.4.1.2)
3. THE ALARM AUDIBLE SIGNAL PATTERN USED TO NOTIFY OCCUPANTS OF THE NEED TO EVACUATE (LEAVE THE BUILDING) OR RELOCATE (FROM ONE AREA TO ANOTHER) SHALL BE THE STANDARD ALARM EVACUATION SIGNAL CONSISTING OF A THREE-PULSE TEMPORAL PATTERN (NFPA 72, 2016 EDITION SECTION 18.4.2.1).
4. TO ENSURE THAT AUDIBLE PUBLIC MODE SIGNALS ARE CLEARLY HEARD THEY SHALL HAVE A SOUND LEVEL AT LEAST 15 dB ABOVE THE AVERAGE AMBIENT SOUND LEVEL OR 5 dB ABOVE THE MAXIMUM SOUND LEVEL HAVING A DURATION OF AT LEAST 60 SECONDS, WHICHEVER IS GREATER, MEASURED 5 FT ABOVE THE FLOOR IN THE AREA REQUIRED TO BE SERVED BY THE SYSTEM USING THE A-WEIGHTED SCALE (dBA) (NFPA 72, 2016 EDITION SECTION 18.4.3.1).
5. THE FLASH RATE SHALL NOT EXCEED TWO FLASHES PER SECOND (2 Hz) NOR BE LESS THAN ONE FLASH EVERY SECOND (1 Hz) THROUGHOUT THE LISTED VOLTAGE RANGE OF THE APPLIANCE (NFPA 72, 2016 EDITION SECTION 18.5.3.1).
6. WHERE MORE THAN TWO VISIBLE NOTIFICATION APPLIANCES OR GROUPS OF SYNCHRONIZED APPLIANCES ARE IN THE SAME ROOM OR ADJACENT SPACE IN THE FIELD OF VIEW ALL APPLIANCES ARE REQUIRED SYNCHRONIZE TOGETHER (NFPA 72, 2016 EDITION SECTION 18.5.5.4.2).
7. WIRING SHALL NOT BE LOOPED THROUGH DEVICE TERMINALS. INPUT AND OUTPUT WIRING DEVICE CONNECTIONS SHALL BE MADE ON SEPARATE TERMINALS OR SHALL BE SEPARATE WIRE LEADS MOUNTED UNDER A COMMON TERMINAL. THE MONITORING OF CIRCUIT INTEGRITY RELIES ON THE INTERRUPTION OF THE WIRING CONTINUITY WHEN THE CONNECTION TO THE INITIATING DEVICE IS LOST (NFPA 72, 2016 EDITION SECTION A.17.4.6).
8. FIRE ALARM WIRING SHALL BE LABELED AT BOTH ENDS. REFER TO SPECIFICATIONS FOR LABELING REQUIREMENTS.

1 TYPICAL 2-WIRE HORN STROBE - WIRING DIAGRAM

NONE



NOTES:

1. AN AVERAGE AMBIENT SOUND LEVEL GREATER THAN 105 dBA SHALL REQUIRE THE USE OF A VISIBLE NOTIFICATION APPLIANCE (NFPA 72, 2016 EDITION SECTION 18.4.1.1)
2. THE FLASH RATE SHALL NOT EXCEED TWO FLASHES PER SECOND (2 Hz) NOR BE LESS THAN ONE FLASH EVERY SECOND (1 Hz) THROUGHOUT THE LISTED VOLTAGE RANGE OF THE APPLIANCE (NFPA 72, 2016 EDITION SECTION 18.5.3.1).
3. WHERE MORE THAN TWO VISIBLE NOTIFICATION APPLIANCES OR GROUPS OF SYNCHRONIZED APPLIANCES ARE IN THE SAME ROOM OR ADJACENT SPACE IN THE FIELD OF VIEW ALL APPLIANCES ARE REQUIRED SYNCHRONIZE TOGETHER (NFPA 72, 2016 EDITION SECTION 18.5.5.4.2).
4. WIRING SHALL NOT BE LOOPED THROUGH DEVICE TERMINALS. INPUT AND OUTPUT WIRING DEVICE CONNECTIONS SHALL BE MADE ON SEPARATE TERMINALS OR SHALL BE SEPARATE WIRE LEADS MOUNTED UNDER A COMMON TERMINAL. THE MONITORING OF CIRCUIT INTEGRITY RELIES ON THE INTERRUPTION OF THE WIRING CONTINUITY WHEN THE CONNECTION TO THE INITIATING DEVICE IS LOST (NFPA 72, 2016 EDITION SECTION A.17.4.6).
5. FIRE ALARM WIRING SHALL BE LABELED AT BOTH ENDS. REFER TO SPECIFICATIONS FOR LABELING REQUIREMENTS.

2 TYPICAL STROBE - WIRING DIAGRAM

NONE

NOTES:

1. THE TOTAL SOUND PRESSURE LEVEL PRODUCED BY COMBINING THE AMBIENT SOUND PRESSURE LEVEL WITH ALL AUDIBLE NOTIFICATION APPLIANCES OPERATING SHALL NOT EXCEED 110 dBA AT THE MINIMUM HEARING DISTANCE (NFPA 72, 2016 EDITION SECTION 18.4.1.2).
2. THE ALARM AUDIBLE SIGNAL PATTERN USED TO NOTIFY OCCUPANTS OF THE NEED TO EVACUATE (LEAVE THE BUILDING) OR RELOCATE (FROM ONE AREA TO ANOTHER) SHALL BE THE STANDARD ALARM EVACUATION SIGNAL CONSISTING OF A THREE-PULSE TEMPORAL PATTERN (NFPA 72, 2016 EDITION SECTION 18.4.2.1).
3. TO ENSURE THAT AUDIBLE PUBLIC MODE SIGNALS ARE CLEARLY HEARD THEY SHALL HAVE A SOUND LEVEL AT LEAST 15 dB ABOVE THE AVERAGE AMBIENT SOUND LEVEL OR 5 dB ABOVE THE MAXIMUM SOUND LEVEL HAVING A DURATION OF AT LEAST 60 SECONDS, WHICHEVER IS GREATER, MEASURED 5 FT ABOVE THE FLOOR IN THE AREA REQUIRED TO BE SERVED BY THE SYSTEM USING THE A-WEIGHTED SCALE (dBA) (NFPA 72, 2016 EDITION SECTION 18.4.3.1).
4. WIRING SHALL NOT BE LOOPED THROUGH DEVICE TERMINALS. INPUT AND OUTPUT WIRING DEVICE CONNECTIONS SHALL BE MADE ON SEPARATE TERMINALS OR SHALL BE SEPARATE WIRE LEADS MOUNTED UNDER A COMMON TERMINAL. THE MONITORING OF CIRCUIT INTEGRITY RELIES ON THE INTERRUPTION OF THE WIRING CONTINUITY WHEN THE CONNECTION TO THE INITIATING DEVICE IS LOST (NFPA 72, 2016 EDITION SECTION A.17.4.6).
5. FIRE ALARM WIRING SHALL BE LABELED AT BOTH ENDS. REFER TO SPECIFICATIONS FOR LABELING REQUIREMENTS.

BID SET (PRELIMINARY)

NOTES:

1. COMMON AND B CONNECTIONS WILL CLOSE WHEN VANE IS DEFLECTED, I.E., WHEN WATER IS FLOWING. DUAL SWITCHES PERMIT APPLICATIONS TO BE COMBINED ON A SINGLE DETECTOR.
2. USE END OF THE LINE RESISTORS WITH INTEGRAL SPADE CONNECTORS TO PREVENT LOOSE CONNECTIONS.
3. INITIATION OF THE ALARM SIGNAL SHALL OCCUR WITHIN 90 SECONDS OF WATERFLOW AT THE ALARM-INITIATING DEVICE WHEN FLOW OCCURS THAT IS EQUAL TO OR GREATER THAN THAT FROM A SINGLE SPRINKLER OF THE SMALLEST ORIFICE SIZE INSTALLED IN THE SYSTEM (NFPA 72, 2019 EDITION SECTION 17.12.2). MOVEMENT OF WATER DUE TO WASTE, SURGES, OR VARIABLE PRESSURE SHALL NOT INITIATE AN ALARM SIGNAL (NFPA 72, 2019 EDITION SECTION 17.12.3).
4. WIRING SHALL NOT BE LOOPED THROUGH DEVICE TERMINALS. INPUT AND OUTPUT WIRING DEVICE CONNECTIONS SHALL BE MADE ON SEPARATE TERMINALS OR SHALL BE SEPARATE WIRE LEADS MOUNTED UNDER A COMMON TERMINAL. THE MONITORING OF CIRCUIT INTEGRITY RELIES ON THE INTERRUPTION OF THE WIRING CONTINUITY WHEN THE CONNECTION TO THE INITIATING DEVICE IS LOST (NFPA 72, 2019 EDITION SECTION A.17.4.6).
5. FIRE ALARM CABLES SHALL BE LABELED AT BOTH ENDS. REFER TO SPECIFICATIONS FOR LABELING REQUIREMENTS.

SECTION A-A

1. Wall Assembly — The 1 or 2 hr fire-rated gypsum wallboard/stud wall assembly shall be constructed of the materials and in the manner specified in the individual U300 or U400 Series Wall and Partition Designs in the UL Fire Resistance Directory and shall include the following construction features:
   A. Studs — Wall framing may consist of either wood studs or steel channel studs. Wood studs to consist of nom 2 by 4 in. (51 by 102 mm) lumber spaced 16 in. (406 mm) OC. Steel studs to be min 2-1/2 in. (64 mm) wide and spaced max 24 in. (610 mm) OC. When steel studs are used and the diam of opening exceeds the width of stud cavity, the opening shall be framed on all sides using lengths of steel stud installed between the vertical studs and screw-attached to the steel studs at each end. The framed opening in the wall shall be 4 to 6 in. (102 to 152 mm) wider and 4 to 6 in. (102 to 152 mm) higher than the diam of the penetrating item such that, when the penetrating item is installed in the opening, a 2 to 3 in. (51 to 76 mm) clearance is present between the penetrating item and the framing on all four sides.
   B. Gypsum Board* — 5/8 in. (16 mm) thick, 4 ft (122 cm) wide with square or tapered edges. The gypsum board type, thickness, number of layers, fastener type and sheet orientation shall be as specified in the individual U300 or U400 Series Design in the UL Fire Resistance Directory. Max diam of opening is 32-1/4 in. (819 mm) for steel stud walls. Max diam of opening is 14-1/2 in. (368 mm) for wood stud walls.

   The F and FH Ratings of the firestop system are equal to the fire rating of the wall assembly.
2. Through-Penetrants — One metallic pipe, conduit or tubing to be installed either concentrically or eccentrically within the firestop system. The annular space shall be min 0 in. to max 2-1/4 in. (57 mm). Pipe may be installed with continuous point contact. Pipe, conduit or tubing may be installed at an angle not greater than 45 degrees from perpendicular. Pipe, conduit or tubing to be rigidly supported on both sides of wall assembly. The following types and sizes of metallic pipes, conduits or tubing may be used:
   A. Steel Pipe — Nom 30 in. (762 mm) diam (or smaller) Schedule 10 (or heavier) steel pipe.
   B. Iron Pipe — Nom 30 in. (762 mm) diam (or smaller) cast or ductile iron pipe.
   C. Conduit — Nom 4 in. (102 mm) diam (or smaller) steel electrical metallic tubing or 6 in. (152 mm) . diam steel conduit.
   D. Copper Tubing — Nom 6 in. (152 mm) diam (or smaller) Type L (or heavier) copper tubing.
   E. Copper Pipe — Nom 6 in. (152 mm) diam (or smaller) regular (or heavier) copper pipe.
3. Fill, Void or Cavity Material* — Sealant — Min 5/8 in. (16 mm) thickness of fill material applied within the annulus, flush with both surfaces of wall. At the point or continuous contact locations between pipe and wall, a min 1/2 in. (13 mm) diam bead of fill material shall be applied at the pipe wall interface on both surfaces of wall.
   HILTI CONSTRUCTION CHEMICALS, DIV OF HILTI INC — FS-One Sealant or FS-ONE MAX Intumescent Sealant

* Indicates such products shall bear the UL or cUL Certification Mark for jurisdictions employing the UL or cUL Certification (such as Canada), respectively.

GENERAL CLEAN AGENT SYSTEM NOTES:

1. THESE DRAWINGS ARE DIAGRAMMATIC IN NATURE AND ARE NOT INTENDED TO SHOW THE LOCATIONS OF ALL CLEAN AGENT SYSTEM COMPONENTS OR ALL REQUIRED SYSTEM COMPONENTS. THE CONTRACTOR SHALL COORDINATE COMPONENT LOCATIONS WITH THE ND-USER AND OTHER TRADES.
2. THE DESIGN SHALL INCLUDE COMPLETE CALCULATIONS AND SHOP DRAWINGS PER NFPA 2001 SECTION 5.1.2.
3. THE MINIMUM DESIGN CONCENTRATION SHALL MEET THE REQUIREMENTS OF CURRENT APPROVED NFPA OR LOCAL CODES AND REGULATIONS FOR A CLASS C HAZARD FOR THIS SYSTEM TYPE.
4. PIPING AND FITTINGS SHALL MEET THE REQUIREMENTS OF CURRENT APPROVED NFPA.
5. DETECTION AND CONTROL COMPONENTS SHALL BE LISTED AND APPROVED FOR US IN FIRE ALARM SYSTEMS AND FULLY ADDRESSABLE.
6. THE FSCU SHALL INCLUDE THE FOLLOWING MONITORING POINTS

-1ST ALARM
-2ND ALARM
-TROUBLE
-SUPERVISORY
-SYSTEM DISCHARGED
-SYSTEM ABORTED

GENERAL CONSTRUCTION NOTES:

1. THE CONTRACTOR SHALL VERIFY ALL DIMENSIONS AND CONDITIONS AT THE JOB SITE BEFORE COMMENCING WORK.
2. IT IS THE RESPONSIBILITY OF THE INSTALLING CONTRACTOR TO ENSURE THAT ALL FIELD INSTALLATION PERSONNEL HAVE ACCESS TO A COMPLETE AND CURRENT SET OF CONSTRUCTION DRAWINGS AT THE JOB SITE.
3. ALL REQUIRED MATERIALS AND WORK SHALL COMPLY WITH THE ADOPTED STATE CODES AND REGULATIONS LISTED IN THE PROJECT PLANS AS WELL AS WITH FEDERAL, LOCAL CODES AND CUSTOMER CONTRACT SPECIFICATIONS WHERE APPLICABLE.
4. ALL FIRE PROTECTION EQUIPMENT SHOWN ON THE DRAWINGS SHALL BE REPLACED EXCEPT AS NOTED.
5. ALL FIRE ALARM EQUIPMENT INSTALLED OUTSIDE OR IN A WET ENVIRONMENT SHALL BE INSTALLED IN A PROTECTIVE ENCLOSURE THAT IS FURNISHED BY THE INSTALLER, UNLESS OTHER WISE NOTED ON THE DRAWINGS.
6. PENETRATIONS OF WALLS AND WALL MEMBRANES REQUIRED TO HAVE PROTECTED OPENINGS HALL BE PROTECTED WITH THROUGH-PENETRATION FIRE STOPS SUITABLE FOR THE METHOD OF PENETRATION. THROUGH-PENETRATION FIRE STOPS SHALL CONFORM TO THE ASTM E 814 OR UL1479. SEE THE ARCHITECTURAL DRAWINGS FOR SYSTEM INFORMATION.

GENERAL CLEAN AGENT INSTALLATION NOTES:

1. THE FOLLOWING NOTES APPLY TO FK-5-1-12 CLEAN AGENT SYSTEMS.
2. ALL PIPE AND FITTINGS MUST COMPLY WITH THE 2018 NFPA 2001 CLEAN AGENT FIRE EXTINGUISHING SYSTEMS. REFER TO THE FSSA PIPE DESIGN GUIDE FOR ALLOWED WORKING PRESSURES.
3. PIPE HANGERS, BRACING AND OTHER MEANS OF PIPE SUPPORTS SHALL BE INSTALLED IN ACCORDANCE WITH STATE AND LOCAL CODES AND STANDARDS. REFER TO NFPA 13 AND THE FSSA PIPE DESIGN GUIDE.
4. PIPING SHALL BE RIGIDLY BRACED. REFER TO NFPA 13 AND THE FSSA PIPE DESIGN GUIDE.
5. NOZZLES SHALL BE ORIENTED PER MANUFACTURER REQUIREMENTS.
6. NOZZLES SHALL BE LOCATED PER MANUFACTURER REQUIREMENTS.
7. NOZZLES SHALL BE RIGIDLY SUPPORTED TO PREVENT MOVEMENT DURING A DISCHARGE.
8. PIPING SHALL BE PRESSURE TESTED PER 2018 NFPA 2001.
9. THE PIPING SHALL BE PUFF TESTED PER 2018 NFPA 2001 TO CONFIRM THE PIPING NETWORK IS UNOBSTRUCTED.
10. PIPE RUNS IN THESE DRAWINGS ARE FOR ILLUSTRATION PURPOSES ONLY. NEW PIPES RUNS SHALL BE COORDINATED IN THE FIELD.

COUNCIL COMMUNICATION

CC #: 3829
File #: 0800-03

Title:	Maintenance of the Gas Conditioning Systems at the Dry Creek and Pleasant Grove Wastewater Treatment Plants – Sole Source Contract Purchase Agreements
Contact:	Audrey Ficker 916-746-1865 agficker@roseville.ca.us

Meeting Date: 4/16/2025
Item #: 7.7.

RECOMMENDATION TO COUNCIL

Staff recommends that the City Council adopt a resolution to approve Contract Purchase Agreement #3004434 and #3004433 with Unison Solutions, Inc. to provide materials, parts and services for the gas condition systems at the Dry Creek and Pleasant Grove Wastewater Treatment Plants, and authorize the City Manager to execute them on behalf of the City of Roseville.

Additionally, staff requests authority for the City Manager or his designee to execute four (4) additional one (1) year renewals for both contract purchase agreements without further City Council approval, provided that the applicable budget is approved by the City Council each year, or until City staff determines that continuing with the same vendors is not in the City's best interest.

BACKGROUND

The Environmental Utilities Department (EUD) has gas conditioning systems at both the Dry Creek and Pleasant Grove Wastewater Treatment Plants (WWTPs) that use filtering media for the removal of hydrogen sulfide and siloxane as part of the biogas treatment. Conditioned biogas is used as fuel for generator systems at both plants and for renewable natural gas (rNG) at the Pleasant Grove WWTP that is used by the Environmental Utilities Waste Service's vehicles. These gas conditioning systems were designed and manufactured by Unison Solutions Inc. and require the filtering media and certain parts to be periodically replaced to maintain filter compliance. Unison Solutions Inc. also provides the media change out services where their factory trained contracted technicians perform the media change out process according to the manufacturer's standards. Sourcing the replacement filtering media, replacement parts, and the media change out, gas testing, and support services from the equipment manufacturer guarantees the certified performance of the system as designed.

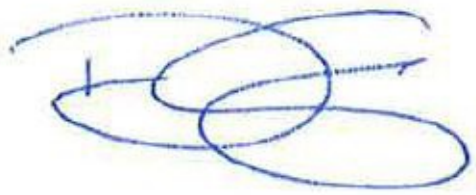
EUD is recommending a one-year contract purchase agreement with Unison Solutions Inc. for each WWTP, both with four optional renewal years at one-year intervals for a total of five (5) years.

FISCAL IMPACT

The estimated total cost for the services for the two agreements is $930,000 for year one; $1,030,000 for year two; $1,130,000 for year three; $1,255,000 for year four; and $1,365,000 for year five. The total not-to-exceed cost for the two agreements including the four additional one (1) year renewals is $5,710,000. Funding source will be provided from the Environmental Utilities Department's annual budgets in the Wastewater Operations Fund.

ENVIRONMENTAL REVIEW

The proposed project involves the maintenance of existing facilities. This activity is categorically exempt from CEQA as a Class 1 Exemption (State CEQA Guidelines Section 15301). The Exemption has been prepared and no further CEQA action is required.



CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal C - Maintain a safe and healthy community
Goal E - Deliver exceptional city services
Goal F - Invest in well-planned infrastructure and growth

Respectfully Submitted,

Audrey Ficker, Administrative Technician

Sean Bigley, Environmental Utilities Director

_____
Dominick Casey, City Manager

RESOLUTION NO. 25-088

APPROVING A CONTRACT PURCHASE AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND UNISON SOLUTIONS, INC., AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE

WHEREAS, a contract purchase agreement (3004434) to provide hydrogen sulfide and siloxane removal media for the Dry Creek Wastewater Treatment Plant, by and between the City of Roseville and Unison Solutions, Inc., has been reviewed by the City Council; and

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Roseville that said agreement is hereby approved and the City Manager is authorized to execute it on behalf of the City of Roseville.

BE IT FURTHER RESOLVED, that the City Manager or his or her designee is authorized to execute four (4) additional one (1) year renewals without further City Council approval, provided that the applicable budget is approved by the City Council, or until staff determines that continuing with this consultant is not in the best interest of the City.

PASSED AND ADOPTED by the Council of the City of Roseville this ___ day of _____, 20__, by the following vote on roll call:

This Contract Purchase Agreement is sent for your review and acceptance. Notify the Buyer via email of any needed changes to the company name, address, and contact information. The Buyer will update the agreement prior to you signing the document.

Return signed copies of the agreement to the Buyer noted on the agreement. Alterations or modifications to the agreement are not allowed. Upon receipt of all necessary documents, the City will sign the agreement and return a fully executed copy to you. Receipt of the signed copy will be your notice to proceed with the work in accordance with the terms and conditions of the agreement. Work must not begin until the contract has been fully executed.

The following guidelines must be followed for the signature block on the agreement:

Sole proprietorship - **By owner**

Partnership - **Any general partner**

Corporation - **Two options:**
(1) A signature from the President and the corporate seal; **OR**
(2) One signature from the Chairman of the Board, President, or any Vice President **AND** one signature from the Secretary, any Assistant Secretary, Chief Financial Officer, or any Treasurer or Assistant Treasurer of the corporation

*General Manager, Office Manager and/or Sales Manager are **not** corporate officer titles. The agreement will be rejected if not signed in accordance with these guidelines.

Insurance requirements:
The City's insurance requirements are referenced on Attachment A of the agreement. By signing the agreement, you are confirming that your company has the minimum insurance limits required.

Description of Labor, equipment and/or materials

The vendor shall provide H2S and Siloxane removal media for the Dry Creek Wastewater Treatment Plant gas conditioning system, biogas testing services, media change out and support services, and gas conditioning system replacement parts on an as-needed basis in accordance with the attached Unison Solutions, Inc. proposal #'s PM-125.2061 dated 3/3/25, GT-125.698 dated 3/5/25, and PM-424.2034.1 dated 3/4/25. The Siloxane removal media and any parts for the gas conditioning system must be quoted and approved in advance by an authorized member of the Environmental Utilities (EU) Department on an as-needed basis.

Contact Audrey Ficker in the EU Dept. at (916)746-1865 or agficker@roseville.ca.us for any questions regarding this agreement.

**Total amount listed is an approximation only. The City does not guarantee whatsoever the actual value of this agreement.

Contract Terms and Conditions

Negotiated T&Cs for Unison Solutions, Inc., 3/12/25

1. To the fullest extent allowed by law, Contractor shall defend, indemnify, and save and hold harmless the City, its officers, agents, employees and volunteers from any claims, suits or actions of every name, kind and description brought forth, or on account of, injuries to or death of any person (including but not limited to workers and the public), or damage to property, resulting from or arising out of Contractor's willful misconduct or negligent act or omission while engaged in the performance of obligations or exercise of rights created by this Agreement, except to the extent those matter arise from City's active negligence or willful misconduct. Contractor's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement. In no event shall Contractor be liable for consequential damages nor shall Contractor's liability exceed the required insurance limits.

2. Contractor is an independent contractor, and shall not be considered an officer, agent, or employee of the City.

3. Without the written consent of the City, this Agreement is not assignable by Contractor either in whole or in part.

4. Time is of the essence of this Agreement.

5. At any time during the term of this Agreement, the City has the right to terminate this Agreement, provided Contractor is given thirty (30) days written notice. City's termination shall be without further liability to City; however, Contractor shall be entitled to all costs reasonably incurred prior to the date of termination. Contractor acknowledges that City may terminate this Agreement should funds not be appropriated by its governing body to continue services under this Agreement.

6. This Agreement may only be amended or modified in writing. It is integrated and contains the complete understanding of the parties.

7. All equipment, supplies and services sold to the City of Roseville shall conform to the general safety orders of the State of California.

8. Unless notified to the contrary, in writing, the City assumes that the Contractor has accepted the work in accordance with the plans and specifications (if any) and agrees to do the work in compliance with this Agreement.

9. All prevailing wages and fair employment practices must be adhered to. For prevailing wage contracts over $25,000, copies of certified payroll must be submitted with invoices. Prevailing wage rates may be obtained from the State Department of Industrial Relations and/or the following website address: http://www.dir.ca.gov/dlsr/DPreWageDetermination.htm. In compliance with Labor Code Section 1773.2, as may be amended from time to time, Contractor shall cause a copy of this website to be posted at each jobsite, as applicable.

10. Contractor agrees to the below insurance requirements:

    a. Unless otherwise specified, the Contractor shall maintain the policies of

Docusign Envelope ID: 6EE97DC4-7D4F-4135-B575-17A4A30A0C14

insurance outlined in Attachment A, incorporated herein by this reference, in full force and effect during the term of this Agreement. The City of Roseville retains sole discretion in determining the types and proper levels of insurance coverage.

b. Form. Contractor shall submit a certificate evidencing such coverage for the period covered by this Agreement in a form satisfactory to Risk Management and the City Attorney, prior to undertaking any work hereunder. Any insurance written on a claims made basis is subject to the approval of Risk Management and the City Attorney.

c. Additional Insureds. Contractor shall also provide a separate endorsement or section of the policy showing City, its officers, agents, employees, and volunteers as additional insureds for each type of coverage (except Workers' Compensation) and for ongoing and completed operations. Such insurance shall specifically cover the contractual liability of Contractor. The additional insured coverage under the Contractor's policy shall be primary and noncontributory, as evidenced by a separate endorsement or section of the policy, and shall not seek contribution from City's insurance or self-insurance. In addition, the additional insured coverage shall be at least as broad as the Insurance Services Office (ISO) CG 20 01 Endorsement. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be:

(1) the minimum coverage and limits specified in this Agreement; or
(2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater.

d. Cancellation/Modification. Contractor shall provide thirty (30) days written notice to City prior to cancellation or modification of any insurance required by this Agreement.

e. Umbrella/Excess Insurance. The limits of insurance required in this Agreement may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of City (if agreed to in a written contract) before City's own insurance shall be called upon to protect it as a named insured.

f. Subcontractors. Contractor agrees to include in its contracts with all subcontractors the same requirements and provisions of this Agreement, including the indemnity and insurance requirements, to the extent they apply to the scope of the subcontractor's work. Furthermore, Contractor shall require its subcontractors to agree to be bound to Contractor and City in the same manner and to the same extent as Contractor is bound to City under this Agreement. Additionally, Contractor shall obligate its subcontractors to comply with these same provisions with respect to any tertiary subcontractor, regardless of tier. A copy of City's indemnity and insurance provisions will be furnished to the subcontractor or tertiary subcontractor upon request.

g. Self-Insured Retentions. All self-insured retentions (SIR) must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or City. City reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.

Docusign Envelope ID: 6EE97DC4-7D4F-4135-B575-17A4A30A0C14

h. Waiver of Subrogation. Contractor hereby agrees to waive subrogation which any insurer of Contractor may acquire from Contractor by virtue of the payment of any loss under a Workers Compensation, Commercial General Liability or Automobile Liability policy. All Workers Compensation, Commercial General Liability and Automobile Liability policies shall be endorsed with a waiver of subrogation in favor of City, its officers, agents, employees and volunteers for all work performed by Contractor, its employees, agents and subcontractors.

i. Liability/Remedies. Insurance coverage in the minimum amounts set forth herein shall not be construed to relieve Contractor of liability in excess of such coverage, nor shall it preclude City from taking such other actions as are available to it under any other provisions of this Agreement or law.

11. Contractor shall comply with all federal, state and local laws and ordinances, including but not limited to the City's storm water regulations, as may be applicable to the performance of services under this Agreement. Failure to comply with local ordinances may result in monetary fines and cancellation of this Agreement. Refer to www.roseville.ca.us/stormwater for links to more information on the City's storm water regulations.

12. In the event that the terms of any attachment or exhibit conflict with any terms of this Agreement, the terms of this Agreement shall control.

13. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. In the event that any signature is delivered by facsimile transmission or by e-mail delivery of a ".pdf" format data file, such signature shall create a valid and binding obligation of the party executing (or on whose behalf such signature is executed) with the same force and effect as if such facsimile or ".pdf" signature page were an original thereof.

14. If either party commences any legal action against the other party arising out of this Agreement or the performance thereof, the prevailing party in such action shall be entitled to recover its reasonable litigation expenses, including but not limited to, court costs, expert witness fees, discovery expenses, and attorneys' fees. Any action arising out of this Agreement shall be brought in Placer County, California, regardless of where else venue may lie. This Agreement shall be governed by and construed in accordance with the laws of the State of California.

15. This Agreement shall be binding upon the heirs, successors, executors, administrators and assigns of the respective parties hereto.

16. If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

17. For purposes of this Agreement, the terms "Contractor," "Consultant," and "Supplier" are used interchangeably.

18. No contractor or subcontractor may work on a public works project unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. During the performance of this agreement, Contractor and its subcontractors shall have a continuing legal obligation to maintain current registration with the Department of Industrial Relations. Contractor is hereby notified that this project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.

19. Vehicles with a gross vehicle weight rating (GVWR) greater than 8,500 lbs. and light-duty package delivery vehicles operated in California may be subject to the California Air Resources Board (CARB) Advanced Clean Fleets regulations. Such vehicles may

Docusign Envelope ID: 6EE97DC4-7D4F-4135-B575-17A4A30A0C14

therefore be subject to requirements to reduce emissions and air pollutants. For more information, visit the CARB Advanced Clean Fleet webpage at https://ww2.arb.ca.gov/our-work/programs/advanced-clean-fleets.

20. Contractor/consultant's duties and services under this agreement shall not include preparing or assisting the public entity with any portion of the public entity's preparation of a request for proposals, request for qualifications, or any other solicitation regarding a subsequent or additional contract with the public entity. The public entity entering this agreement shall at all times retain responsibility for public contracting, including with respect to any subsequent phase of this project. Contractor/consultant's participation in the planning, discussions, or drawing of project plans or specifications, if any, shall be limited to conceptual, preliminary, or initial plans or specifications. Contractor/consultant shall cooperate with the public entity to ensure that all bidders for a subsequent contract on any subsequent phase of this project have access to the same information, including all conceptual, preliminary, or initial plans or specifications prepared by contractor pursuant to this agreement.

21. Contractor must submit all claims as defined in and in accordance with the claim resolution process set forth in Section 9204 of the Public Contract Code. Each such claim must be sent to the City by registered mail or certified mail with return receipt requested and must contain reasonable documentation to support the claim. All claims must be received prior to acceptance of the work.

22. Contractor certifies that Contractor, its employees, directors, officers, agents, subcontractors, vendors, and volunteers are not presently debarred, excluded, suspended, declared ineligible, voluntarily excluded, or proposed for debarment, exclusion, suspension, or ineligibility by any federal, state, or local department or agency.

23. The Levine Act (Govt. Code, Section 84308) requires a Party (and its agent(s), if any) to a Proceeding before the City of Roseville that involves any action or consideration related to their contract, license, permit, or other entitlement for use, to disclose any campaign contributions made to City elected or appointed officers totaling more than $250 within the twelve (12) months prior to the City decision and while a proceeding is pending, and includes certain prohibitions on contribution activity thereafter. If applicable campaign contributions have been made by Contractor and/or its agent(s), Contractor is responsible for compliance, including for its disclosure obligations, if any, as further described at: https://www.roseville.ca.us/government/departments/city_clerk/transparency/levine_act.

24. This Agreement may be amended via change order, but only if such change order is made in writing, approved by the City, and signed by both parties.

25. CONTRACTOR agrees to defend and indemnify CITY if, despite the parties intent and practice, any venue, agency, or court with competent jurisdiction determines that CONTRACTOR and/or any of its agents, officers, employees, volunteers, independent contractors, or subcontractors, are characterized as employee(s) of CITY.

CONTRACTOR and CITY agree that: (a) CONTRACTOR is free from the control and direction of CITY in connection with the performance of the work; (b) CONTRACTOR is providing services directly to CITY; (c) CONTRACTOR has and will maintain at all relevant times a business license; (d) CONTRACTOR maintains a business location that is separate from CITY; (e) CONTRACTOR is customarily engaged in an independently established business of the same nature as that involved in the work performed hereunder; (f) CONTRACTOR actually contracts with other businesses to provide the same or similar services and maintains a clientele without restrictions from CITY; (g) CONTRACTOR advertises and holds itself out to the public as available to provide the same or similar services; (h) CONTRACTOR provides its own tools, vehicles, and equipment to perform the services; (i) CONTRACTOR has negotiated its own rates; (j) CONTRACTOR set its own hours and location of work in accomplishing CITY's on-call

Docusign Envelope ID: 6EE97DC4-7D4F-4135-B575-17A4A30A0C14

needs; and (k) CONTRACTOR has the right to control the manner and means of accomplishing the result desired and exercises its own expert independent judgement.

The supplier named hereon by the acceptance of this order agrees to the provisions of this document titled "Contract Purchase Agreement" and all accompanying terms, conditions, and attachments.

Insurance Submission Process

The City of Roseville Human Resources/Risk Management Department uses a service called EBIX to manage our insurance certificate tracking.

How It Works

- The vendor's contact information is entered into EBIX. EBIX will contact the vendor to request proof of insurance.
- The Vendor can forward the request to their Insurance Agent(s) if necessary.
- Vendor/Insurance Agent submits insurance to EBIX by email to roseville@ebix.com or by fax to (770) 325-5727. After faxing or emailing the certificate, please DO NOT send the certificate by mail to EBIX. Please do not mail, email or fax any certificates to the City of Roseville.
- Once submitted, EBIX reviews the insurance documentation. If there are deficiencies, EBIX will send a follow up letter or email requesting additional information.

Questions Regarding Insurance Submission: Contact EBIX at (951) 652-4239
Questions Regarding Insurance Requirements Contact Risk Management at (916) 774-5202

Asbestos-Containing Materials in City-Owned Buildings

California Health and Safety Code Section 25915 requires that all City of Roseville employees, contractors and lessees be notified annually of the presence of asbestos in City-owned buildings constructed prior to 1979. Please post this notice in an area(s) accessible to all employees, contractors and lessees. Contact Facility Maintenance & Operations at (916) 774-5740 for more information about Asbestos Containing Materials (ACMs) in specific City-owned buildings. For more information about asbestos refer to the OSHA website.

The City of Roseville is committed to maintaining a safe and healthy work environment. The City's Facility Maintenance & Operations staff conducts ongoing inspections to identify and safely manage previously installed asbestos-containing products. Renovation of City-owned buildings **MUST** be reviewed in advance by Facility Maintenance & Operations to ensure the City is in compliance with building codes, Americans with Disabilities Act and that no ACMs are disturbed without proper safeguards. Work that requires removal or repair of ACMs is restricted to trained and qualified persons only. **Facility Maintenance & Operations will need to approve the qualified contractors**.

Use the following measures to protect you and others from exposure to airborne asbestos:

- Presume all building materials contain asbestos until determined otherwise by Facility Maintenance & Operations.
- Do not install walls, closets, cabinets, ceilings.
- Do not remove, cut, drill, sand, grind or otherwise disturb any material in the buildings, including carpet and tile.
- Do not paint (this includes any walls, ceilings, floors and electrostatic painting of office furniture).
- Do not remove any items nailed or screwed to the walls (this includes pictures, cabinets, electrical, etc.).
- Do not go above ceilings, behind walls or into building spaces such as attics and crawlspaces unless these areas have been inspected and cleared by Facility Maintenance & Operations.
- Do not pull cable or wiring through above-ceiling spaces with asbestos.
- Do not install screws, pins, nails or hangers into asbestos ceiling or wall plaster.
- Be careful not to damage walls, ceilings or floors when moving furniture or equipment. It is recommended that Facility Maintenance & Operations be contacted prior to moving furniture or equipment.
- Do not brush, sweep or vacuum textured asbestos ceiling plaster or plaster debris.
- Immediately report any damage or deterioration of suspect building materials to Facility Maintenance & Operations or Risk Management.

It is important to note that the presence of asbestos does not mean you have been exposed. Exposure results when friable asbestos particles are inhaled or ingested. Asbestos becomes friable when material containing asbestos is drilled, sanded or disturbed by remodeling or demolition work or when the ACM has deteriorated. Intact, bonded, sealed or undisturbed asbestos does not pose a hazard.

Employees may review the asbestos survey reports, results of bulk sampling or air monitoring conducted in City-owned buildings. All asbestos data will be available by appointment with Facility Maintenance & Operations.

CALIFORNIA AIR RESOURCES BOARD REGULATION COMPLIANCE

Please indicate whether the Contractor is subject to, and/or in compliance with, the following regulations of the California Air Resources Board.

In-Use Off-Road Diesel-Fueled Fleets Regulation

1) Will vehicles subject to Cal. Code Regs., tit. 13, §§ 2449 et seq. be used for the project? This includes, but is not limited to:
   a) Vehicles with a diesel-fueled or alternative diesel fueled off-road compression-ignition engine with maximum power (max hp) of 25 horsepower (hp) or greater provided that the vehicle cannot be registered and driven safely on-road or was not designed to be driven on-road, even if it has been modified so that it can be driven safely on-road
   b) Workover rigs
   c) Certain two-engine vehicles

   Yes ____ No X

2) If you answered "Yes" to 1), you **must** submit a valid Certificate of Reported Compliance to the City as provided in Cal. Code Regs., tit. 13, § 2449(n).

Advanced Clean Fleets Regulation

Pursuant to Cal. Code Regs., tit. 13, § 2013(i)(1), the Contractor shall submit to the City a document evidencing that it is listed on the CARB Advanced Clean Fleets webpage as a compliant fleet **OR** a signed statement stating that it is not subject to the High Priority and Federal Fleets regulation of title 13, CCR section 2015 through 2015.6.

The High Priority Fleets regulation applies to, without limitation, entities with more than $50 million in gross annual revenues and/or which own, operate, or direct the operation of 50 or more vehicles in the total fleet.

1) Is the Contractor subject to the High Priority and Federal Fleets regulation of title 13, CCR section 2015 through 2015.6?

   Yes ____ No X

2) If you answered "Yes" to 1), you **must** submit a document evidencing that you are listed on the CARB Advanced Clean Fleets webpage as a compliant fleet.

CITY OF ROSEVILLE CALIFORNIA

April, 2022

RE: Contractor and Grantee Compliance with Economic Sanctions Imposed in Response to Russia's Actions in Ukraine

Dear Vendor:

On March 4, 2022, Governor Gavin Newsom issued Executive Order N-6-22 (EO) regarding sanctions in response to Russian aggression in Ukraine. The EO is located at https://www.gov.ca.gov/wp-content/uploads/2022/03/3.4.22-Russia-Ukraine-Executive-Order.pdf.

The EO directs all agencies and departments that are subject to the Governor's authority to take certain immediate steps, including notifying all contractors and grantees of their obligations to comply with existing economic sanctions imposed by the U.S. government in response to Russia's actions in Ukraine, as well as any sanctions imposed under state law.

This correspondence serves as a notice under the EO that as a contractor or grantee, compliance with the economic sanctions imposed in response to Russia's actions in Ukraine is required, including with respect to, but not limited to, the federal executive orders identified in the EO and the sanctions identified on the U.S. Department of the Treasury website (https://home.treasury.gov/policy-issues/financial-sanctions/sanctions-programs-and-country-information/ukraine-russia-related-sanctions). Failure to comply may result in the termination of contracts or grants, as applicable.

Please note that for any agreements or grants valued at $5 million or more you must report to the City of Roseville your compliance with economic sanctions including steps you have taken in response to Russia's actions in Ukraine, including, but not limited to, desisting from making new investments in, or engaging in financial transactions with, Russian entities, not transferring technology to Russia or Russian entities, and directly providing support to the government and people of Ukraine.

Sincerely,

March 4, 2025

Dry Creek WWTP, Roseville CA

Attn: Audrey Ficker

PM-424.2034.1 - Media Change Out Services

Dear Audrey,

Unison Solutions, Inc. is pleased to provide you with this proposal for media change out services for the H2S and siloxane removal media used in your biogas conditioning system. This proposal includes removal of spent media, installation of new material, and purging the vessels with nitrogen. The spent H2S removal media will be removed from the vessel and left on site for disposal by others. Due to its reaction with oxygen, the H2S removal media should be spread on a non-flammable surface and kept wet until its exothermic reaction has completed. Siloxane removal media may be a candidate for recycling for other applications. If not suitable for recycling, spent media will be left onsite in bulk bags.

H2S AND SILOXANE REMOVAL MEDIA CHANGE OUT SERVICES

Includes the following:

- Assumes no changes to current site conditions
- Media and foam pads must be at the site, ready for the change out services on scheduled dates.
- H2S vessels must be vented and flooded at least 24 hours prior technicians arrival
- Removal of spent media, H2S – 52,800 lb., Siloxane – 4,730 lb.
- Spent H2S removal media to be left on site at customer specified location(s), ideally within 200 feet of vessels
- Loading of new media in all vessels
- Industrial grade nitrogen purge of vessels
- Confirmation of tight seals with an air monitor.
- 54 ft, grade all forklift to be provided
- Meeting prevailing wage criteria for the state of California, contractor DIR registration number 1000009862. Based on 3 technicians working no more than 32 total hours over no more than 4 days.

PRICING SUMMARY

Included in pricing is transportation to/from site; (1) nitrogen purge, vacuum truck removal, removal of spent media and new media filling.....**$ 42,500.00/change**

Spent carbon media testing, 8260 TCLP and CAM 17.....$550.00

Your existing spent media profile is valid until 11/8/2025. Depending on the timing of your change out, a spent siloxane removal media sample may need to be taken at least 3 weeks prior to change out and sent to a lab for testing. Unless your raw biogas has changed significantly, we're assuming that the media will be suitable for regeneration, and can be removed from the site immediately after the change out.

Docusign Envelope ID: 6EE97DC4-7D4F-4135-B575-17A4A30A0C14

The spent product becomes the property of the recycling company. Note that regenerated media is not suitable for siloxane removal but can be used for applications such as odor control. Pulling and shipping a spent media sample to be completed by plant personnel.

Terms – Net 30, Prices do not reflect any taxes that may be applicable and are valid until April 1, 2026.

All testing of spent material and disposal costs are the responsibility of the plant, for both media types.

I hope this information is helpful. Please feel free to contact me if you have any questions or concerns.

Sincerely,

Kim Murdock-Timmerman, Unison Solutions Inc.

RESOLUTION NO. 25-089

APPROVING A CONTRACT PURCHASE AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND UNISON SOLUTIONS, INC., AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE

WHEREAS, a contract purchase agreement (3004433) to provide hydrogen sulfide and siloxane removal media for the Pleasant Grove Wastewater Treatment Plant, by and between the City of Roseville and Unison Solutions, Inc., has been reviewed by the City Council; and

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Roseville that said agreement is hereby approved and the City Manager is authorized to execute it on behalf of the City of Roseville.

BE IT FURTHER RESOLVED, that the City Manager or his or her designee is authorized to execute four (4) additional one (1) year renewals without further City Council approval, provided that the applicable budget is approved by the City Council, or until staff determines that continuing with this consultant is not in the best interest of the City.

Contract Terms and Conditions

Negotiated T&Cs for Unison Solutions, Inc., 3/12/25

1. To the fullest extent allowed by law, Contractor shall defend, indemnify, and save and hold harmless the City, its officers, agents, employees and volunteers from any claims, suits or actions of every name, kind and description brought forth, or on account of, injuries to or death of any person (including but not limited to workers and the public), or damage to property, resulting from or arising out of Contractor's willful misconduct or negligent act or omission while engaged in the performance of obligations or exercise of rights created by this Agreement, to the extent those matters arise from City's active negligence or willful misconduct. Contractor's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement. In no event shall Contractor be liable for consequential damages nor shall Contractor's liability exceed the required insurance limits.

2. Contractor is an independent contractor, and shall not be considered an officer, agent, or employee of the City.

3. Without the written consent of the City, this Agreement is not assignable by Contractor either in whole or in part.

4. Time is of the essence of this Agreement.

5. At any time during the term of this Agreement, the City has the right to terminate this Agreement, provided Contractor is given thirty (30) days written notice. City's termination shall be without further liability to City; however, Contractor shall be entitled to all costs reasonably incurred prior to the date of termination. Contractor acknowledges that City may terminate this Agreement should funds not be appropriated by its governing body to continue services under this Agreement.

6. This Agreement may only be amended or modified in writing. It is integrated and contains the complete understanding of the parties.

7. All equipment, supplies and services sold to the City of Roseville shall conform to the general safety orders of the State of California.

8. Unless notified to the contrary, in writing, the City assumes that the Contractor has accepted the work in accordance with the plans and specifications (if any) and agrees to do the work in compliance with this Agreement.

9. All prevailing wages and fair employment practices must be adhered to. For prevailing wage contracts over $25,000, copies of certified payroll must be submitted with invoices. Prevailing wage rates may be obtained from the State Department of Industrial Relations and/or the following website address: http://www.dir.ca.gov/dlsr/DPreWageDetermination.htm. In compliance with Labor Code Section 1773.2, as may be amended from time to time, Contractor shall cause a copy of this website to be posted at each jobsite, as applicable.

10. Contractor agrees to the below insurance requirements:

    a. Unless otherwise specified, the Contractor shall maintain the policies of

Docusign Envelope ID: CADFDF4A-67A3-4E1B-991A-E81ECCCF1C21

insurance outlined in Attachment A, incorporated herein by this reference, in full force and effect during the term of this Agreement. The City of Roseville retains sole discretion in determining the types and proper levels of insurance coverage.

b. Form. Contractor shall submit a certificate evidencing such coverage for the period covered by this Agreement in a form satisfactory to Risk Management and the City Attorney, prior to undertaking any work hereunder. Any insurance written on a claims made basis is subject to the approval of Risk Management and the City Attorney.

c. Additional Insureds. Contractor shall also provide a separate endorsement or section of the policy showing City, its officers, agents, employees, and volunteers as additional insureds for each type of coverage (except Workers' Compensation) and for ongoing and completed operations. Such insurance shall specifically cover the contractual liability of Contractor. The additional insured coverage under the Contractor's policy shall be primary and noncontributory, as evidenced by a separate endorsement or section of the policy, and shall not seek contribution from City's insurance or self-insurance. In addition, the additional insured coverage shall be at least as broad as the Insurance Services Office (ISO) CG 20 01 Endorsement. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be:

(1) the minimum coverage and limits specified in this Agreement; or
(2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater.

d. Cancellation/Modification. Contractor shall provide thirty (30) days written notice to City prior to cancellation or modification of any insurance required by this Agreement.

e. Umbrella/Excess Insurance. The limits of insurance required in this Agreement may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of City (if agreed to in a written contract) before City's own insurance shall be called upon to protect it as a named insured.

f. Subcontractors. Contractor agrees to include in its contracts with all subcontractors the same requirements and provisions of this Agreement, including the indemnity and insurance requirements, to the extent they apply to the scope of the subcontractor's work. Furthermore, Contractor shall require its subcontractors to agree to be bound to Contractor and City in the same manner and to the same extent as Contractor is bound to City under this Agreement. Additionally, Contractor shall obligate its subcontractors to comply with these same provisions with respect to any tertiary subcontractor, regardless of tier. A copy of City's indemnity and insurance provisions will be furnished to the subcontractor or tertiary subcontractor upon request.

g. Self-Insured Retentions. All self-insured retentions (SIR) must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or City. City reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.

Docusign Envelope ID: CADFDF4A-67A3-4E1B-991A-E81ECCCF1C21

h. Waiver of Subrogation. Contractor hereby agrees to waive subrogation which any insurer of Contractor may acquire from Contractor by virtue of the payment of any loss under a Workers Compensation, Commercial General Liability or Automobile Liability policy. All Workers Compensation, Commercial General Liability and Automobile Liability policies shall be endorsed with a waiver of subrogation in favor of City, its officers, agents, employees and volunteers for all work performed by Contractor, its employees, agents and subcontractors.

i. Liability/Remedies. Insurance coverage in the minimum amounts set forth herein shall not be construed to relieve Contractor of liability in excess of such coverage, nor shall it preclude City from taking such other actions as are available to it under any other provisions of this Agreement or law.

11. Contractor shall comply with all federal, state and local laws and ordinances, including but not limited to the City's storm water regulations, as may be applicable to the performance of services under this Agreement. Failure to comply with local ordinances may result in monetary fines and cancellation of this Agreement. Refer to www.roseville.ca.us/stormwater for links to more information on the City's storm water regulations.

12. In the event that the terms of any attachment or exhibit conflict with any terms of this Agreement, the terms of this Agreement shall control.

13. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. In the event that any signature is delivered by facsimile transmission or by e-mail delivery of a ".pdf" format data file, such signature shall create a valid and binding obligation of the party executing (or on whose behalf such signature is executed) with the same force and effect as if such facsimile or ".pdf" signature page were an original thereof.

14. If either party commences any legal action against the other party arising out of this Agreement or the performance thereof, the prevailing party in such action shall be entitled to recover its reasonable litigation expenses, including but not limited to, court costs, expert witness fees, discovery expenses, and attorneys' fees. Any action arising out of this Agreement shall be brought in Placer County, California, regardless of where else venue may lie. This Agreement shall be governed by and construed in accordance with the laws of the State of California.

15. This Agreement shall be binding upon the heirs, successors, executors, administrators and assigns of the respective parties hereto.

16. If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

17. For purposes of this Agreement, the terms "Contractor," "Consultant," and "Supplier" are used interchangeably.

18. No contractor or subcontractor may work on a public works project unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. During the performance of this agreement, Contractor and its subcontractors shall have a continuing legal obligation to maintain current registration with the Department of Industrial Relations. Contractor is hereby notified that this project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.

19. Vehicles with a gross vehicle weight rating (GVWR) greater than 8,500 lbs. and light-duty package delivery vehicles operated in California may be subject to the California Air Resources Board (CARB) Advanced Clean Fleets regulations. Such vehicles may

Docusign Envelope ID: CADFDF4A-67A3-4E1B-991A-E81ECCCF1C21

therefore be subject to requirements to reduce emissions and air pollutants. For more information, visit the CARB Advanced Clean Fleet webpage at https://ww2.arb.ca.gov/our-work/programs/advanced-clean-fleets.

20. Contractor/consultant's duties and services under this agreement shall not include preparing or assisting the public entity with any portion of the public entity's preparation of a request for proposals, request for qualifications, or any other solicitation regarding a subsequent or additional contract with the public entity. The public entity entering this agreement shall at all times retain responsibility for public contracting, including with respect to any subsequent phase of this project. Contractor/consultant's participation in the planning, discussions, or drawing of project plans or specifications, if any, shall be limited to conceptual, preliminary, or initial plans or specifications. Contractor/consultant shall cooperate with the public entity to ensure that all bidders for a subsequent contract on any subsequent phase of this project have access to the same information, including all conceptual, preliminary, or initial plans or specifications prepared by contractor pursuant to this agreement.

21. Contractor must submit all claims as defined in and in accordance with the claim resolution process set forth in Section 9204 of the Public Contract Code. Each such claim must be sent to the City by registered mail or certified mail with return receipt requested and must contain reasonable documentation to support the claim. All claims must be received prior to acceptance of the work.

22. Contractor certifies that Contractor, its employees, directors, officers, agents, subcontractors, vendors, and volunteers are not presently debarred, excluded, suspended, declared ineligible, voluntarily excluded, or proposed for debarment, exclusion, suspension, or ineligibility by any federal, state, or local department or agency.

23. The Levine Act (Govt. Code, Section 84308) requires a Party (and its agent(s), if any) to a Proceeding before the City of Roseville that involves any action or consideration related to their contract, license, permit, or other entitlement for use, to disclose any campaign contributions made to City elected or appointed officers totaling more than $250 within the twelve (12) months prior to the City decision and while a proceeding is pending, and includes certain prohibitions on contribution activity thereafter. If applicable campaign contributions have been made by Contractor and/or its agent(s), Contractor is responsible for compliance, including for its disclosure obligations, if any, as further described at: https://www.roseville.ca.us/government/departments/city_clerk/transparency/levine_act.

24. This Agreement may be amended via change order, but only if such change order is made in writing, approved by the City, and signed by both parties.

25. CONTRACTOR agrees to defend and indemnify CITY if, despite the parties intent and practice, any venue, agency, or court with competent jurisdiction determines that CONTRACTOR and/or any of its agents, officers, employees, volunteers, independent contractors, or subcontractors, are characterized as employee(s) of CITY.

CONTRACTOR and CITY agree that: (a) CONTRACTOR is free from the control and direction of CITY in connection with the performance of the work; (b) CONTRACTOR is providing services directly to CITY; (c) CONTRACTOR has and will maintain at all relevant times a business license; (d) CONTRACTOR maintains a business location that is separate from CITY; (e) CONTRACTOR is customarily engaged in an independently established business of the same nature as that involved in the work performed hereunder; (f) CONTRACTOR actually contracts with other businesses to provide the same or similar services and maintains a clientele without restrictions from CITY; (g) CONTRACTOR advertises and holds itself out to the public as available to provide the same or similar services; (h) CONTRACTOR provides its own tools, vehicles, and equipment to perform the services; (i) CONTRACTOR has negotiated its own rates; (j) CONTRACTOR set its own hours and location of work in accomplishing CITY's on-call

Docusign Envelope ID: CADFDF4A-67A3-4E1B-991A-E81ECCCF1C21

needs; and (k) CONTRACTOR has the right to control the manner and means of accomplishing the result desired and exercises its own expert independent judgement.

The supplier named hereon by the acceptance of this order agrees to the provisions of this document titled "Contract Purchase Agreement" and all accompanying terms, conditions, and attachments.

Insurance Submission Process

The City of Roseville Human Resources/Risk Management Department uses a service called EBIX to manage our insurance certificate tracking.

How It Works

- The vendor's contact information is entered into EBIX. EBIX will contact the vendor to request proof of insurance.
- The Vendor can forward the request to their Insurance Agent(s) if necessary.
- Vendor/Insurance Agent submits insurance to EBIX by email to roseville@ebix.com or by fax to (770) 325-5727. After faxing or emailing the certificate, please DO NOT send the certificate by mail to EBIX. Please do not mail, email or fax any certificates to the City of Roseville.
- Once submitted, EBIX reviews the insurance documentation. If there are deficiencies, EBIX will send a follow up letter or email requesting additional information.

Questions Regarding Insurance Submission: Contact EBIX at (951) 652-4239
Questions Regarding Insurance Requirements Contact Risk Management at (916) 774-5202

Asbestos-Containing Materials in City-Owned Buildings

California Health and Safety Code Section 25915 requires that all City of Roseville employees, contractors and lessees be notified annually of the presence of asbestos in City-owned buildings constructed prior to 1979. Please post this notice in an area(s) accessible to all employees, contractors and lessees. Contact Facility Maintenance & Operations at (916) 774-5740 for more information about Asbestos Containing Materials (ACMs) in specific City-owned buildings. For more information about asbestos refer to the OSHA website.

The City of Roseville is committed to maintaining a safe and healthy work environment. The City's Facility Maintenance & Operations staff conducts ongoing inspections to identify and safely manage previously installed asbestos-containing products. Renovation of City-owned buildings **MUST** be reviewed in advance by Facility Maintenance & Operations to ensure the City is in compliance with building codes, Americans with Disabilities Act and that no ACMs are disturbed without proper safeguards. Work that requires removal or repair of ACMs is restricted to trained and qualified persons only. **Facility Maintenance & Operations will need to approve the qualified contractors**.

Use the following measures to protect you and others from exposure to airborne asbestos:

- Presume all building materials contain asbestos until determined otherwise by Facility Maintenance & Operations.
- Do not install walls, closets, cabinets, ceilings.
- Do not remove, cut, drill, sand, grind or otherwise disturb any material in the buildings, including carpet and tile.
- Do not paint (this includes any walls, ceilings, floors and electrostatic painting of office furniture).
- Do not remove any items nailed or screwed to the walls (this includes pictures, cabinets, electrical, etc.).
- Do not go above ceilings, behind walls or into building spaces such as attics and crawlspaces unless these areas have been inspected and cleared by Facility Maintenance & Operations.
- Do not pull cable or wiring through above-ceiling spaces with asbestos.
- Do not install screws, pins, nails or hangers into asbestos ceiling or wall plaster.
- Be careful not to damage walls, ceilings or floors when moving furniture or equipment. It is recommended that Facility Maintenance & Operations be contacted prior to moving furniture or equipment.
- Do not brush, sweep or vacuum textured asbestos ceiling plaster or plaster debris.
- Immediately report any damage or deterioration of suspect building materials to Facility Maintenance & Operations or Risk Management.

It is important to note that the presence of asbestos does not mean you have been exposed. Exposure results when friable asbestos particles are inhaled or ingested. Asbestos becomes friable when material containing asbestos is drilled, sanded or disturbed by remodeling or demolition work or when the ACM has deteriorated. Intact, bonded, sealed or undisturbed asbestos does not pose a hazard.

Employees may review the asbestos survey reports, results of bulk sampling or air monitoring conducted in City-owned buildings. All asbestos data will be available by appointment with Facility Maintenance & Operations.

CALIFORNIA AIR RESOURCES BOARD REGULATION COMPLIANCE

Please indicate whether the Contractor is subject to, and/or in compliance with, the following regulations of the California Air Resources Board.

In-Use Off-Road Diesel-Fueled Fleets Regulation

1) Will vehicles subject to Cal. Code Regs., tit. 13, §§ 2449 et seq. be used for the project? This includes, but is not limited to:
   a) Vehicles with a diesel-fueled or alternative diesel fueled off-road compression-ignition engine with maximum power (max hp) of 25 horsepower (hp) or greater provided that the vehicle cannot be registered and driven safely on-road or was not designed to be driven on-road, even if it has been modified so that it can be driven safely on-road
   b) Workover rigs
   c) Certain two-engine vehicles

   Yes ____ No X

2) If you answered "Yes" to 1), you **must** submit a valid Certificate of Reported Compliance to the City as provided in Cal. Code Regs., tit. 13, § 2449(n).

Advanced Clean Fleets Regulation

Pursuant to Cal. Code Regs., tit. 13, § 2013(i)(1), the Contractor shall submit to the City a document evidencing that it is listed on the CARB Advanced Clean Fleets webpage as a compliant fleet **OR** a signed statement stating that it is not subject to the High Priority and Federal Fleets regulation of title 13, CCR section 2015 through 2015.6.

The High Priority Fleets regulation applies to, without limitation, entities with more than $50 million in gross annual revenues and/or which own, operate, or direct the operation of 50 or more vehicles in the total fleet.

1) Is the Contractor subject to the High Priority and Federal Fleets regulation of title 13, CCR section 2015 through 2015.6?

   Yes ____ No X

2) If you answered "Yes" to 1), you **must** submit a document evidencing that you are listed on the CARB Advanced Clean Fleets webpage as a compliant fleet.

CITY OF ROSEVILLE CALIFORNIA

April, 2022

RE: Contractor and Grantee Compliance with Economic Sanctions Imposed in Response to Russia's Actions in Ukraine

Dear Vendor:

On March 4, 2022, Governor Gavin Newsom issued Executive Order N-6-22 (EO) regarding sanctions in response to Russian aggression in Ukraine. The EO is located at https://www.gov.ca.gov/wp-content/uploads/2022/03/3.4.22-Russia-Ukraine-Executive-Order.pdf.

The EO directs all agencies and departments that are subject to the Governor's authority to take certain immediate steps, including notifying all contractors and grantees of their obligations to comply with existing economic sanctions imposed by the U.S. government in response to Russia's actions in Ukraine, as well as any sanctions imposed under state law.

This correspondence serves as a notice under the EO that as a contractor or grantee, compliance with the economic sanctions imposed in response to Russia's actions in Ukraine is required, including with respect to, but not limited to, the federal executive orders identified in the EO and the sanctions identified on the U.S. Department of the Treasury website (https://home.treasury.gov/policy-issues/financial-sanctions/sanctions-programs-and-country-information/ukraine-russia-related-sanctions). Failure to comply may result in the termination of contracts or grants, as applicable.

Please note that for any agreements or grants valued at $5 million or more you must report to the City of Roseville your compliance with economic sanctions including steps you have taken in response to Russia's actions in Ukraine, including, but not limited to, desisting from making new investments in, or engaging in financial transactions with, Russian entities, not transferring technology to Russia or Russian entities, and directly providing support to the government and people of Ukraine.

Sincerely,

March 4, 2025

City of Roseville, Pleasant Grove WWTP
Attn: Audrey Ficker
Proposal Number: PM-424.2033.1

Dear Audrey,

Unison Solutions, Inc. is pleased to provide you with this proposal for media change out services for your siloxane vessels used on the Pleasant Grove biogas upgrading system. This proposal includes spent siloxane media removal, and new siloxane media installation only.

SILOXANE REMOVAL MEDIA CHANGE OUT SERVICES

Includes the following:

- Assumes no changes to current site conditions and good access to vessels
- Removal of spent siloxane media from all vessels, 4,950 lbs.
- Loading of new siloxane media, UNI-CC5V & UNI-CL3E
- Industrial grade nitrogen purge of vessels
- Transportation and disposal of spent siloxane media if non-hazardous, (Approximately 4,950 lbs.)
- Contractor license 842091, Exp. 7/3/26
- Based on 2 technicians working 1 day, no more than 6 hours on site.

PRICING SUMMARY

Included in pricing is transportation to/from site; (1) nitrogen purge, vacuum truck removal, new media filling, transportation, and disposal of spent media if non-hazardous.....**$ 14,**700**.00 /change**

New media must be at the site, ready for the change out services on scheduled dates. Terms – Net 30, Prices do not reflect any taxes that may be applicable and are valid until April 1, 2026.

Spent media testing .....$ 550.00/test, 2 required $ 1,100.00
Approximately 1 month prior to service, plant personnel will pull a spent media samples from siloxane vessels #1 and #2 and ship them for testing. Based on the testing results, a spent media profile will be done and suitability for recycling the media will be determined at that time. Note that spent media will not be removed from site without this profile being up to date. The spent product becomes the property of the recycling company. Note that regenerated media is not suitable for siloxane removal but can be used for applications such as odor control. Pulling and shipping a spent media sample to be completed by plant personnel.

I hope this information is helpful. Please feel free to contact me if you have any questions or concerns.

Sincerely,

Kim Murdock-Timmerman, Unison Solutions Inc.

Sincerely,

Kim Murdock-Timmerman, Unison Solutions Inc.

Notice of Exemption

To: Placer County Clerk
Recorder's Office
2954 Richardson Drive
Auburn, CA 95603

From: City of Roseville
Development Services Dept.
311 Vernon Street
Roseville, CA 95678

Project Title: Replacement Filtering Media, Parts, and Services for the Maintenance of the Gas Conditioning Systems at the Dry Creek and Pleasant Grove Wastewater Treatment Plants – Contract Purchase Agreements

Project Location(s): 1800 Booth Road (APNs 474-080-009-000, 474-110-001-000, 474-110-002-000, 473-080-000-000, and 473-080-002-000) and 5051 Westpark Drive (APN 017-101-025-000, Roseville, CA 95747.

Project Description: Environmental Utilities (EU) staff requests approval and award of two (2) contract purchase agreements including four (4) additional one-year renewals with Union Solutions, Inc. provide replacement filtering media and parts, gas testing, and media change out and support services for the maintenance of the gas conditioning systems at the Dry Creek and Pleasant Grove Wastewater Treatment Plants (DCWWTP and PGWWTP). The gas conditioning systems at the WWTPs use filtering media for the removal of hydrogen sulfide and siloxane as part of the biogas treatment. The gas conditioning systems require the filtering media and certain parts to be periodically replaced to maintain filter compliance. The contract purchase agreements would include media change out services. These components and services are necessary for ongoing maintenance and operation at the WWTPs would not result in an expansion of use.

Public Agency Approving Project: Roseville City Council

Agency/Individual Carrying Out Project: City of Roseville Environmental Utilities Department

Reason why this Project is Exempt: The project qualifies for a Class 1 Categorical Exemption as described in Section 15301 of the California Environmental Quality Act (CEQA) guidelines which states:

> "Class 1 (Existing Facilities) consists of the operation… of existing public or private structures, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of use.

The project consists of two contracts with Synagro to haul biosolids from the DCWWTP and PGWWTP. This is consistent with standard ongoing operation practices for wastewater treatment facilities and would not result in expansion of use. Consequently, the Class 1 Categorical Exemption applies.

Lead Agency Contact Person: Audrey Ficker, Roseville Department of Environmental Utilities (916-746-1865).

Title: Distribution Transformers (RFQ 10-3385) - Purchase Orders
Contact: Sue Jessup 916-746-1107 sjessup@roseville.ca.us

Meeting Date: 4/16/2025
Item #: 7.8.

RECOMMENDATION TO COUNCIL

Staff recommends that the City Council adopt a resolution to approve open purchase orders with Anixter, Inc.; First Philec, Inc.; Hyundai Corporation USA; Mader Supply LLC, and Next Gen Power, Inc. as the lowest responsive and responsible bidders for the purchase of distribution transformers in response to Request for Quotations No. 10-3385.

The bid allowed for four optional renewal years at one-year intervals. Staff requests authorization to continue utilizing the remaining optional renewal years without further Council approval, provided that the applicable budget is approved by the City Council each year, until the contract expires, or until City staff determines that continuing with the same vendors is not in the City's best interest.

BACKGROUND

The Electric Department has a recurring requirement for distribution transformers. The purpose of a transformer is to convert power to a lower voltage to be used for new development construction and replacement of aged and failed equipment. A formal bid was issued where vendors were asked to provide pricing for 33 different transformers. The City received eight responses and, of those, five were deemed responsive after staff review.

Along with other electric utilities nationwide, Roseville Electric has been confronted with a shortage of electric utility transformers. Manufacturers are struggling to get the specialized raw materials, including “core” steel used in transformer production. The shortage is exacerbated by competition for that same steel from the auto industry and labor shortages. Given these procurement difficulties and the uncertainty of potential tariffs, Roseville Electric staff believes that it is in the City’s best interest to award a contract to each of the (5) responsive bidders to diversify orders as much as possible. There is no guarantee that the City will purchase transformers from any or all of the (5) responsive bidders. Staff is requesting that the individual contract awards allow Roseville Electric the ability to order all line items from any of the (5) responsive bidders based on the needs of the City at the time of the order. When placing orders for transformers, staff will make purchases from one or more of the responsive bidders based on objective factors such as price, lead time, past performance, current order quantities, and factory location or proximity to the City.

A formal bid was issued, and the vendor responses are listed on the attached bid summary sheet.

JST Power, JSHP Transformer, MVA Power, Inc., and Power Electronics were deemed non-responsive for not providing the requested information.

FISCAL IMPACT

The total spending authority for the initial contract period and optional renewal years through FY2028-29 is a not-to-exceed amount of $9,500,000.

Purchase of these materials are done on an as-needed basis; there are no set not-to-exceed amounts per fiscal year. Funding is included in the Electric Fund budget for FY2024-25. Future year funding will be included in proposed department budgets and will be contingent upon Council approval of budgets.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. The purchase of the distribution transformers meets the above criteria and is not subject to CEQA. No additional environmental review is required.

RECOMMENDATION TO COUNCIL

Staff recommends that the City Council adopt the following resolutions:

1. Resolution of the City Council of the City of Roseville, California, Initiating Proceedings for the Annual Levy of Assessments for the Historic District Landscaping and Lighting District for Fiscal Year 2025/2026.

Resolution of the City Council of the City of Roseville, California, Declaring Its Intention to Levy Annual Assessments for the Historic District Landscaping and Lighting District for Fiscal Year 2025/2026.

Resolution of the City Council of the City of Roseville, California, Preliminary Approval of the Engineer's Annual Levy Report for the Historic District Landscaping and Lighting District for Fiscal Year 2025/2026.

2. Resolution of the City Council of the City of Roseville, California, Initiating Proceedings for the Annual Levy of Assessments for the Infill Area Landscaping and Lighting District for Fiscal Year 2025/2026.

Resolution of the City Council of the City of Roseville, California, Declaring Its Intention to Levy Annual Assessments for the Infill Area Landscaping and Lighting District for Fiscal Year 2025/2026.

Resolution of the City Council of the City of Roseville, California, Preliminary Approval of the Engineer's Annual Levy Report for the Infill Area Landscaping and Lighting District for Fiscal Year 2025/2026.

3. Resolution of the City Council of the City of Roseville, California, Initiating Proceedings for the Annual Levy of Assessments for the Johnson Ranch Landscaping and Lighting District for Fiscal Year 2025/2026.

Resolution of the City Council of the City of Roseville, California, Declaring Its Intention to Levy

Annual Assessments for the Johnson Ranch Landscaping and Lighting District for Fiscal Year 2025/2026.

Resolution of the City Council of the City of Roseville, California, Preliminary Approval of the Engineer's Annual Levy Report for the Johnson Ranch Landscaping and Lighting District for Fiscal Year 2025/2026.

4. Resolution of the City Council of the City of Roseville, California, Initiating Proceedings for the Annual Levy of Assessments for the North Central Roseville Specific Plan Landscaping and Lighting District for Fiscal Year 2025/2026.

Resolution of the City Council of the City of Roseville, California, Declaring Its Intention to Levy Annual Assessments for the North Central Roseville Specific Plan Landscaping and Lighting District for Fiscal Year 2025/2026.

Resolution of the City Council of the City of Roseville, California, Preliminary Approval of the Engineer's Annual Levy Report for the North Central Roseville Specific Plan Landscaping and Lighting District for Fiscal Year 2025/2026.

5. Resolution of the City Council of the City of Roseville, California, Initiating Proceedings for the Annual Levy of Assessments for the Northwest Roseville Specific Plan Landscaping and Lighting District for Fiscal Year 2025/2026.

Resolution of the City Council of the City of Roseville, California, Declaring Its Intention to Levy Annual Assessments for the Northwest Roseville Specific Plan Landscaping and Lighting District for Fiscal Year 2025/2026.

Resolution of the City Council of the City of Roseville, California, Preliminary Approval of the Engineer's Annual Levy Report for the Northwest Roseville Specific Plan Landscaping and Lighting District for Fiscal Year 2025/2026.

6. Resolution of the City Council of the City of Roseville, California, Initiating Proceedings for the Annual Levy of Assessments for the Olympus Pointe Landscaping and Lighting District for Fiscal Year 2025/2026.

Resolution of the City Council of the City of Roseville, California, Declaring Its Intention to Levy Annual Assessments for the Olympus Pointe Landscaping and Lighting District for Fiscal Year 2025/2026.

Resolution of the City Council of the City of Roseville, California, Preliminary Approval of the Engineer's Annual Levy Report for the Olympus Pointe Landscaping and Lighting District for Fiscal Year 2025/2026.

7. Resolution of the City Council of the City of Roseville, California, Initiating Proceedings for the Annual Levy of Assessments for the Riverside Avenue Landscaping and Lighting District for Fiscal Year 2025/2026.

Resolution of the City Council of the City of Roseville, California, Declaring Its Intention to Levy Annual Assessments for Riverside Avenue Landscaping and Lighting District for Fiscal Year 2025/2026.

Resolution of the City Council of the City of Roseville, California, Preliminary Approval of the Engineer's Annual Levy Report for the Riverside Avenue Landscaping and Lighting District for Fiscal Year 2025/2026.

8. Resolution of the City Council of the City of Roseville, California, Initiating Proceedings for the Annual Levy of Assessments for the Vernon Street Landscaping and Lighting District for Fiscal Year 2025/2026.

Resolution of the City Council of the City of Roseville, California, Declaring Its Intention to Levy Annual Assessments for the Vernon Street Landscaping and Lighting District for Fiscal Year 2025/2026.

Resolution of the City Council of the City of Roseville, California, Preliminary Approval of the Engineer's Annual Levy Report for the Vernon Street Landscaping and Lighting District for Fiscal Year 2025/2026.
Staff also recommends that May 21, 2025 at 6 p.m. be set as the date and time to hold the public hearing.

Each Engineer's Report submitted for the Public Hearing will include an affidavit signed by the Engineer. The Engineer shall sign the affidavit for each following Council's preliminary approval of the Engineer's Reports.

BACKGROUND

The City of Roseville currently has eight active Landscaping and Lighting Districts (LLDs). These districts were formed within the City of Roseville to levy and collect assessments for maintenance of public improvements pursuant to the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code (the Act) Sections 22500, et seq., and Article XIII D of the California Constitution.

The Historic District Landscaping and Lighting District was formed in 2006 to levy and collect assessments for the maintenance and operation of improvements benefiting parcels within the District. The cost of maintaining the streetscape improvements is spread equally to the subject properties, based on their percentage of the total front footage of all affected parcels. The District is located in the Historic Old Town area in Downtown Roseville.

The Infill Area Landscaping and Lighting District was formed in 1995 to levy and collect assessments to maintain certain public improvements that benefit parcels within the District. The District is located in the Infill Plan area.

The Johnson Ranch Landscaping and Lighting District was formed in 1989 to levy and collect assessments for maintaining certain public landscape, open space, floodway and stream courses located within the Southeast Roseville Specific Plan area.

The North Central Roseville Specific Plan Landscaping and Lighting District was formed in 1990 to levy and collect assessments for the maintenance of certain public improvements within the North Central Roseville Specific Plan area. In 2004, the property owners in the District approved, through a mailed ballot, an assessment increase and the addition of an annual escalation factor.

This enables the City to keep up with increased costs associated with maintaining the landscaping at proper levels.

The Northwest Roseville Specific Plan Landscaping and Lighting District was formed in 1989 to levy and collect assessments for maintenance of certain public landscape medians and corridors, vernal pool preserves, bike trails, and park improvements. In 2004, the Dunmore Junction subdivision was annexed into the LLD as Zone A, and the Legacy subdivision was annexed into Zone B. In 2011, the property owners voted against an overlay LLD for the Northwest Specific Plan. In 2006 and, most recently, in 2021, the property owners voted against an assessment increase as well as the addition of an annual escalation factor.

The Olympus Pointe Landscaping and Lighting District was formed in 1989 to levy and collect assessments for the maintenance of certain public improvements within the Northeast Roseville Specific Plan Area. In 2005, the property owners in the District approved, through a mailed ballot, an assessment increase and an annual escalation factor. This enables the City to keep up with increased costs associated with maintaining the landscaping at proper levels.

The Riverside Avenue Landscaping and Lighting District was formed in 2007 to levy and collect assessments for the maintenance and operation of improvements benefiting parcels within the District. The cost of maintaining the streetscape improvements is spread equally among the subject properties based on their percentage of the total front footage of all affected parcels.

The Vernon Street Landscaping and Lighting District was formed in 2001 to levy and collect assessments for maintenance of improvements installed by the Vernon Streetscape. The cost of maintaining the streetscape improvements is spread equally to the subject properties on their percentage of the total front footage of all affected parcels.

Assessment Statistics

					Prior year
District	**Proposed FY 2025-26 Levy**	**Maximum Annual Assessment**	**Levied Parcels**	**% Change from FY 2024-25**	**FY 2024-25 Levy**
Historic District LLD	$44,812.42	$44,812.91	60	3%	$43,507.08
Infill Area LLD	$30,983.04	$44,132.80	222	25%	$24,794.92
Johnson Ranch LLD	$48,053.02	$55,957.72	1,044	-2%	$49,087.04
North Central LLD	$786,101.16	$818,932.07	3,507	4%	$758,970.68
Northwest LLD	$481,336.00	$481,336.00	4,752	0%	$481,336.00
Olympus Pointe LLD	$236,613.82	$468,374.76	826	8%	$219,329.08
Riverside Avenue LLD	$50,048.54	$50,049.17	76	2.38%	$48,885.16
Vernon Street LLD	$46,593.08	$46,593.66	60	2.39%	$45,505.40
Totals	**$1,724,541.08**	**$2,010,189.09**	**10,547**		

The Infill Area LLD assessment increases are due to higher project expenditures and lower use of operating reserves planned for FY 2025-26. The Olympus Pointe LLD assessment increases are due to higher project expenditures and utility costs in FY2025-26. Both of these district

assessments are well below the maximum annual assessment amounts.

FISCAL IMPACT

All charges are needed to fund landscape services in each LLD. There is no impact to the General Fund.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Adoption of these resolutions meets the above criteria and is not subject to CEQA. No additional environmental review is required.

RESOLUTION NO. 25-106

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, INITIATING PROCEEDINGS FOR THE ANNUAL LEVY OF ASSESSMENTS FOR THE HISTORIC DISTRICT LANDSCAPING AND LIGHTING DISTRICT, FOR FISCAL YEAR 2025/2026, PURSUANT TO THE PROVISIONS OF PART 2 OF DIVISION 15 OF THE CALIFORNIA STREETS AND HIGHWAYS CODE

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the Historic District Landscaping and Lighting District (hereafter referred to as the "District") pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the "Act"), that provides for the levy and collection of assessments by the County of Placer for the City of Roseville to pay for the maintenance and services of street lighting, landscaping, and all appurtenant facilities and operations related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter "Engineer") for the purpose of assisting with the establishment of the assessments, the annexation of territory, and to prepare and file an Engineer's Annual Levy Report (hereinafter referred to as the "Engineer's Report") with the City Clerk in accordance with the Act, and in accordance with the California Constitution, Articles XIIIC and XIIID;

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE HISTORIC DISTRICT LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 Engineer's Report: The City Council hereby orders the Engineer to prepare and file with the City Clerk the Engineer's Report concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22622* of the Act.

Section 2 Proposed improvements and any substantial changes in existing improvements: The District improvements include: maintenance and operation of and the furnishing of services, materials and/or improvements for landscape, lighting, streetscape and hardscape areas, and other public improvements within the street right-of-way areas and all appurtenant facilities related thereto as further described in the Engineer's Report. The Engineer's Report describes all new improvements or substantial changes in existing improvements.

RESOLUTION NO. 25-107

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, DECLARING ITS INTENTION TO LEVY ANNUAL ASSESSMENTS FOR THE HISTORIC DISTRICT LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2025/2026

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the Historic District Landscaping and Lighting District (hereafter referred to as the "District"), and initiated proceedings for Fiscal Year 2025/2026, pursuant to the provisions of the *Landscaping and Lighting Act of 1972*, *Part 2 of Division 15 of the Streets and Highways Code of California*, *beginning with Section 22500* (hereafter referred to as the "Act") that provides for the levy and collection of assessments by the County of Placer for the City of Roseville to pay for the maintenance, operation and servicing of all improvements and facilities related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services for the purpose of assisting with the Annual Levy of the District, and to prepare and file a report (hereinafter referred to as the "Engineer's Report") with the City Clerk in accordance with the Act; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE HISTORIC DISTRICT LANDSCAPING AND LIGHTING DISTRICT, PURSUANT TO *CHAPTER 3, SECTION 22624* OF THE ACT, AS FOLLOWS:

Section 1 Intention: The City Council hereby declares that it is its intention to seek the Annual Levy of the District pursuant to the Act, over and including the land within the District boundary, and to levy and collect assessments on all such land to pay for the annual costs of the improvements.

Section 2 Proposed improvements and any substantial changes in existing improvements: The District improvements include: the maintenance and operation of and the furnishing of services, materials or improvements for landscape, lighting, streetscape and hardscape areas, including fencing, walls, signage, monuments, ground cover, shrubs, plants, irrigation systems, drainage systems, and other public improvements within the street right-of-way areas and all appurtenant facilities related thereto as further described in the Engineer's Report. The Engineer's Report also describes all new improvements or substantial changes in existing improvements.

Section 3 Boundaries and Designation: The boundaries of the District are described as the boundaries previously defined in the formation documents of the original District. The District is known and designated as:

"Historic District Landscaping and Lighting District"

Section 4 Proposed Assessment Amounts: The proposed assessments are outlined in the Engineer's Report. District Assessments are calculated in accordance with the method of apportionment established for the District and do not exceed the assessment rates and annual inflationary adjustment previously authorized by the City Council and approved by the property owners in accordance with the provisions of the California State Constitution, Article XIIID.

Section 5 Public Hearing(s): The City Council hereby declares its intention to conduct a Public Hearing annually concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22626* of the Act.

Section 6 Notice: The City Clerk shall give notice of the time and place of the Public Hearing by causing this Resolution to be published once in the local newspaper not less than ten (10) days before the date of the hearing and by posting a copy of this Resolution on the official bulletin board customarily used by the City Council for the posting of notices.

Section 7 Time and Place of Public Hearing: Notice is hereby given that a Public Hearing on these matters will be held by the City Council on **Wednesday, May 21, 2025 at 6:00 p.m.**, or as soon thereafter as feasible in the regular meeting chambers located at 311 Vernon Street, Roseville, California.

RESOLUTION NO. 25-108

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR PRELIMINARY APPROVAL OF THE ENGINEER'S ANNUAL LEVY REPORT FOR THE HISTORIC DISTRICT LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2025/2026

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, the City Council has, by previous Resolutions, ordered the preparation of an Annual Levy Report (hereafter referred to as the "Engineer's Report") for the district known and designated as the Historic District Landscaping and Lighting District (hereafter referred to as the "District"), pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California*, *beginning with Section 22500* (hereinafter referred to as the "Act"); and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter "Engineer"), for the purpose of assisting with the establishment of the assessments and to prepare and file an Engineer's Report with the City Clerk in accordance with the Act, and in accordance with the requirements of the California Constitution, Articles XIIIC and XIIID; and,

WHEREAS, there has now been presented to this City Council the Engineer's Report as required by *Chapter 1, Article 4, Section 22566* of said Act; and,

WHEREAS, this City Council has carefully examined and reviewed the Engineer's Report as presented, and is preliminarily satisfied with the District, each and all of the budget items and documents as set forth therein, and is satisfied that the assessments, on a preliminary basis, have been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed within the District, as set forth in said Engineer's Report; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE HISTORIC DISTRICT LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 That the above recitals are all true and correct.

Section 2 That the Engineer's Report, as presented, consists of the following:

a. A Description of Improvements
b. The Annual Budget (Costs and Expenses of Maintenance, Services, Operations and District Administration)
c. The Assessment Roll containing the Fiscal Year 2025/2026 Levy for each Assessor Parcel within the District

Section 3 The Engineer's Report is hereby approved on a preliminary basis and ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection.

Section 4 That the City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation of the Engineer's Report.

ENGINEER'S REPORT AFFIDAVIT

Establishment of Annual Rates and Charges for the:

Historic District
Landscaping and Lighting District

City of Roseville

Placer County, State of California

This Report describes the District and any relevant zones therein, including the improvements, budgets, parcels and assessments to be levied for Fiscal Year 2025/26 as they existed at the time of the passage of the Resolution of Intention. Reference is hereby made to the Placer County Assessor's maps for a detailed description of the lines and dimensions of parcels within the District. The undersigned respectfully submits the enclosed Report as directed by the City Council.

APPENDIX A – DISTRICT BOUNDARY MAP 20

APPENDIX B — FY 2025/26 ASSESSMENT ROLL 23

I. OVERVIEW

A. INTRODUCTION

The City of Roseville ("City") annually levies and collects special assessments in order to maintain the improvements within the Historic District Landscaping and Lighting District ("District"). The District was formed on April 5, 2006 and is levied annual assessments pursuant to the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code ("1972 Act").

The Engineer's Report ("Report") describes the District, any new annexations, changes to the District, and the proposed assessments for the period of July 1, 2025 through June 30, 2026. The special benefit assessments are based on historical and estimated costs to maintain the District improvements. These assessments, which provide a direct and special benefit to properties within the District, will provide funding for the operation and maintenance of District improvements.

The word "parcel," for the purposes of this Report, refers to an individual property assigned its own Assessor's Parcel Number ("APN") by the Placer County Assessor's Office. The Placer County Auditor/Controller uses Assessor's Parcel Numbers and specific Tax Code Accounts, to identify on the County's tax roll, properties assessed for special district benefit assessments.

Following approval of the Report, the City Council will by resolution order the improvements to be made and confirm the levy and collection of assessments herein pursuant to the 1972 Act. The assessment rates and method of apportionment described in this Report as approved or modified by the City Council define the assessments to be applied to each parcel within the District for Fiscal Year ("FY") 2025/26. The assessments as approved will be submitted to the Placer County Auditor/Controller to be included on the property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the Current Fiscal Year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved by the City Council.

B. COMPLIANCE WITH THE CURRENT LEGISLATION

The City Council, pursuant to the provisions of the "Landscaping and Lighting Act of 1972", being Division 15, Part 2 of the Streets and Highways Code of the State of California, beginning with Section 22500 (the "1972 Act"); Article XIIID of the Constitution of the State of California ("Article XIIID"); and the Proposition 218 Omnibus Implementation Act, beginning with Government Code Section 53750 (the "Implementation Act") (the 1972 Act, Article XIIID and the Implementation Act are referred to collectively as the "Assessment Law") initiated proceedings for the formation of the District on February 15, 2006 and to levy and collect annual assessments against lots and parcels within the District for FY 2006/07. On April 5, 2006, pursuant to Assessment Law, the City conducted a Public Hearing and tabulated the returned ballots. The City determined that a majority protest did not exist and approved the District's maximum assessment rate and annual inflationary adjustment factor.

Pursuant to the 1972 Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments, to review the Engineer's Annual Levy Report prior to approving the annual assessments to be levied on the County tax rolls. The assessments described in this Report have been prepared in accordance with the 1972 Act and Assessment Law.

C. DESCRIPTION OF DISTRICT BOUNDARIES

The territory within the District consists of all lots, parcels and subdivisions of land as shown on the Boundary Map titled "Boundary Map of Historic District Landscaping and Lighting District" as referenced in Appendix A-1 of this Report.

The District is located within the City's Historic Old Town, west of Highway 80, south of Pleasant Street, north and east of Washington Boulevard, and north and west of the Union Pacific Railroad. The District consists of mostly commercial parcels in a concentrated area of the Downtown primarily fronting the following streets: Church Street northeast of Washington Boulevard, Main Street between Washington Boulevard and Lincoln Street, Pacific Street and Lincoln Street where the improvements end approximately one block south of Pleasant Street.

D. IMPROVEMENTS AUTHORIZED BY THE 1972 ACT

As applicable or may be applicable to a proposed District, the 1972 Act defines improvements to mean one or any combination of the following:

- The installation or planting of landscaping.
- The installation or construction of statuary, fountains, and other ornamental structures and facilities.
- The installation or construction of public lighting facilities.
- The installation or construction of any facilities which are appurtenant to any of the foregoing or which are necessary or convenient for the maintenance or servicing thereof, including, but not limited to, grading, clearing, removal

of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities.

- The maintenance or servicing, or both, of any of the foregoing.
- The acquisition of any existing improvement otherwise authorized pursuant to this section.

Incidental expenses associated with the improvements including, but not limited to:

The cost of preparation of the report, including plans, specifications, estimates, diagram, and assessment;

- The costs of printing, advertising, and the publishing, posting, and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;
- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
- Any expenses incidental to the issuance of bonds or notes pursuant to Section 22662.5.
- Costs associated with any elections held for the approval of a new or increased assessment.

The 1972 Act defines "Maintain" or "maintenance" to mean furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement, including:

- Repair, removal, or replacement of all or any part of any improvement.
- Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury.
- The removal of trimmings, rubbish, debris, and other solid waste.
- The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Furthermore, the 1972 Act specifies that where the cost of improvements (other than maintenance and operations) is greater than can be conveniently raised from a single annual assessment, an assessment to be levied and collected in annual installments. In that event, the governing body may choose to do any of the following:

- Provide for the accumulation of the moneys in an improvement fund until there are sufficient moneys to pay all or part of the cost of the improvements.
- Provide for a temporary advance to the improvement fund from any available and unencumbered funds of the local agency to pay all or part of

the cost of the improvements and collect those advanced moneys from the annual installments collected through the assessments.

- Borrow an amount necessary to finance the estimated cost of the proposed improvements. The amount borrowed, including amounts for bonds issued to finance the estimated cost of the proposed improvements.

E. DESCRIPTION OF THE IMPROVEMENTS AND MAINTENANCE

The District, through the levy of special assessments, provides funding for ongoing maintenance, operation and servicing of landscaping and lighting improvements located within the public rights-of-ways and dedicated easements located within the District. These improvements may include, but are not limited to, all materials, equipment, utilities, labor, and appurtenant facilities related to the ongoing maintenance of the improvements. Maintenance services will be provided by City personnel and/or private contractors. The proposed improvements to be maintained and services are generally described as follows:

Landscaping Improvements

The landscaping improvements have been designed to enhance the area within the District and may include, but are not limited to ground cover, shrubs and plants, trees, irrigation and drainage systems, trash receptacles, ornamental lighting, masonry walls or other fencing, hardscape improvements, monuments and landmarks, recreational facilities and associated appurtenances located within the street rights-of-way and public areas within the District. Specifically, the proposed landscape improvement areas for this District are:

- Parkway landscaping and hardscape improvements within the public right of ways of the streets within the district including, but not limited to, Lincoln Street, Main Street, Church Street, Pacific Street, and the northeast side of Washington Boulevard estimated at 14,450 square feet of landscaping;
- Various amenities associated with the landscape improvements and public areas within the District, including, but not limited to, trash receptacles, street furniture, bike racks, entry signs, sidewalks, fencing, and retaining walls.

Specifically, not included as District improvements are those improvements located on private property, improvements and facilities that are outside the boundaries of the District and/or are funded by other sources available to the City, including those portions of the median and parkway landscaping on Washington Boulevard (southwest side of the street) that are outside the District boundaries.

Public Lighting Improvements

The lighting improvements may include, but are not limited to, the cost of providing, maintaining, and servicing of lighting fixtures, poles, meters, conduits, electrical cable, and associated appurtenant facilities associated with:

- Lighting facilities within the landscaped areas and public areas including safety lights, security lights or ornamental lights installed as part of the District improvements; and
- Public street light improvements located on the streets within the District.

Specifically excluded from the assessment are the street light energy costs. These costs will continue to be paid for by the City from other revenue sources.

Detailed maps of the locations and descriptions of the specific improvements to be maintained by the District are on file in the Office of Public Works and by reference are made part of this Report.

Description of Maintenance and Services

Maintenance means the furnishing of services and materials for the ordinary and usual maintenance, operation and servicing of landscaping and street lighting improvements facilities and appurtenant facilities, including repair, removal or replacement of all or part of any of the landscaping and street lighting improvements, or appurtenant facilities; providing for the life, growth, health and beauty of landscaping improvements including cultivation, irrigation, trimming, mowing, spraying, fertilizing and treating for disease or injury; the removal of trimmings, rubbish, debris and other solid waste; and the cleaning sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Servicing means the furnishing of water and electricity for the irrigation of the landscape improvements or appurtenant facilities and the furnishing of electric current or energy for the operation of the landscaping improvements or appurtenant facilities. The street lighting improvements shall be maintained to provide adequate illumination; however, the City will be paying the actual energy costs to provide illumination.

II. METHOD OF APPORTIONMENT

A. GENERAL

The 1972 Act permits the establishment of assessment districts by agencies for the purpose of providing certain public improvements which include the construction, maintenance and servicing of public lights, landscaping, and appurtenant facilities. The 1972 Act further requires that the cost of these improvements be levied according to benefit rather than assessed value:

> *"The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements."*

The formula used for calculating assessments in the District therefore reflects the composition of the parcels, and the Improvements and services provided, to fairly apportion the costs based on estimated benefit to each parcel.

B. BENEFIT ANALYSIS

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIIID addresses several key criteria for the levy of assessments, notably:

Article XIIID Section 2d defines District as follows:

"District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service";

Article XIIID Section 2i defines Special Benefit as follows:

"Special benefit" means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute "special benefit."

Article XIIID Section 4a defines proportional special benefit assessments as follows:

"An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be

imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel."

This District was formed to establish and provide for the improvements that enhance the presentation of the surrounding properties and developments. These improvements will directly benefit the parcels to be assessed within the District. The assessments and method of apportionment is based on the premise that the assessments will be used to construct and install landscape and lighting improvements within the District as well as provide for the annual maintenance of those improvements, and the assessment revenues generated by District will be used solely for such purposes.

The costs of the proposed improvements have been identified and allocated to properties within the District based on special benefit. The improvements to be provided by this District and for which properties will be assessed have been identified as an essential component and local amenity that provides a direct reflection and extension of the properties within the District which the property owners and residents have expressed a high level of support.

The method of apportionment (method of assessment) set forth in the Report is based on the premise that each assessed property receives special benefits from the landscape and lighting improvements within the District, and the assessment obligation for each parcel reflects that parcel's proportional special benefits as compared to other properties that receive special benefits.

To identify and determine the proportional special benefit to each parcel within the District, it is necessary to consider the entire scope of the improvements provided as well as the properties that benefit from those improvements. The improvements and the associated costs described in this Report, have been carefully reviewed and have been identified and allocated based on a benefit rationale and calculations that proportionally allocate the net cost of only those improvements determined to be of special benefit to properties within the District. The various public improvements and the associated costs have been identified as either "general benefit" (not assessed) or "special benefit".

The City initiated and conducted property owner protest ballot proceedings in accordance with Article XIIID. Each of the proposed Improvements, the associated costs and assessments were identified and allocated based on special benefit pursuant to the provisions of Article XIIID and 1972 Act. Additionally, the Improvements and the annual costs of ensuring the maintenance and operation of the Improvements are of direct and special benefit to the properties.

The City annually levies and collects special benefit assessments in order to maintain and service the District Improvements. The District provides for specific Improvements and services that include the maintenance and operation of landscaping and lighting Improvements and associated appurtenances located within the District's public rights-of-way and dedicated easements. The annual

assessment is based on the historical and estimated costs to maintain the Improvements that provide a benefit to properties within these Districts. The Improvements within the District and the costs of those Improvements are identified and budgeted separately, including all expenditures, deficits, surpluses, revenues, and reserves.

All Improvements within the District and the properties associated with those Improvements were reviewed for benefit prior to the formation of the District. Because the Improvements affront the benefited parcels, it has been determined that there is no measurable general benefit to properties outside the District or to the public at large. In making this determination it should be noted that similar improvements within California are typically maintained by individual property owners, through some type of association or a special district as allowed by State Law since the on-going maintenance of these improvements are a special benefit to the properties associated with those improvements.

The method of apportionment (method of assessment) for the District is based on the premise that each of the assessed parcels within the District receives special benefit from the Improvements maintained and financed by District assessments. The presence of these Improvements and the close proximity of the Improvements to the properties within the District enhance the desirability and security of properties within the District.

The landscape Improvements provided by the District may include landscaped parkways, perimeters, entryways, local medians, slopes, internal amenities and appurtenant facilities. Street lighting Improvements may include all energy costs and necessary maintenance to the facilities related thereto. The annual assessments outlined in this Report are proposed to cover the estimated costs to provide all necessary service, operation, administration, and maintenance required to keep these Improvements in a healthy, vigorous, and satisfactory condition. The special benefits associated with the local landscaping Improvements are specifically:

The special benefits associated with all landscaping Improvements are specifically:

- Enhanced desirability of properties through association with the Improvements.
- Improved aesthetic appeal of properties providing a positive representation of the area and properties.
- Enhanced adaptation of the urban environment within the natural environment from adequate landscaping.
- Environmental enhancement through improved dust and debris control, and fire prevention.
- Increased sense of pride in ownership of property within the District resulting from well-maintained Improvements associated with the properties.

- Enhanced quality of life through well-maintained landscaped areas.
- Reduced criminal activity and property-related crimes (especially vandalism) against properties in the District through well-maintained surroundings and amenities including abatement of graffiti.
- Enhanced environmental quality of the parcels by moderating temperatures, providing oxygenation and attenuating noise.

The special benefits of street lighting are the convenience, safety, and security of property, improvements, and goods. Specifically:

- Enhanced deterrence of crime and the aid to police protection.
- Increased nighttime safety on streets and roads within the Districts.
- Improved ability of pedestrians and motorists to see.
- Improved ingress and egress to property.
- Reduced vandalism and other criminal acts and damage to Improvements or property.
- Improved traffic circulation and reduced nighttime accidents and personal property loss.
- Increased promotion of business during nighttime hours in the case of commercial properties.

All of the preceding special benefits contribute to a specific enhancement and desirability of each of the assessed parcels within the District.

C. DESCRIPTION OF THE METHOD OF APPORTIONMENT

To establish the special benefit to the individual parcels within the District a formula that spreads the costs of the maintenance based on the special benefit must be established. The improvements have been reviewed and the following formula has been established to apportion the maintenance costs based on benefit.

For purposes of the Assessment Methodology, the terms hereinafter set forth have been the following meanings:

Acreage means the land area of an Assessor's Parcel as shown on an Assessor's Parcel map-, or if the land area is not shown on an Assessor's parcel map, the land area shown on the applicable final map, parcel map, condominium plan, record of survey or other recorded document creating and describing such area of land.

Multi-Family Residential means a residence for which building permits have been issued for attached residential units for rental purposes.

Single-Family Residential Unit means a single residential home. This land use includes detached or attached for sale units intended for single-family occupancy.

Commercial means property being used or zoned for either commercial or industrial use.

Three components were used in the methodology to determine each parcels assessment; 1) Front footage of parcels along the proposed street improvements; 2) acreage of benefiting parcels; and 3) Current land use of parcels. Based on these three components the assessments were determined as follows:

First, the parcels Front Footage was determined based on Assessor's Parcel maps or other sources. Only Front footage on streets that will be improved was used. For parcels with Front Footage on more than one side (corner lots), the total Front Footage was divided by two to provide an average Front Footage. It was determined that twenty percent (20%) of the total budget was reasonably attributed to Front Footage; therefore twenty percent (20%) of the budget was spread to Front Footage.

Second, each parcel's Acreage was calculated based on Assessors Parcels map. It was determined that eighty percent (80%) of the budget was reasonably attributed to Acreage; therefore eighty (80%) of the budget was spread on Acreage. In the event that common area parcels are created subsequent to the formation of the District, the acreage of any such common area parcels shall be apportioned to the remaining assessable parcels of the subdivision and/or parcel split(s) related to the creation of the common area parcel(s).

Third, the current land use of the parcel was determined using the County's secured roll. Parcels currently used as a Single-Family Residence or Multi-Family Residences were determined to receive twenty-five (25%) of the benefit in relation to commercial parcels. Additionally, it was determined that single Family Residential Parcels benefit equally from the improvements, therefore the total assessment calculated based on the formula was averaged between the five Single Family Residential parcels to determine a Single-Family Residential rate per Unit.

The base year maximum assessment rates approved to be levied in FY 2006/07 are provided in the table below.

Base Year (FY 2006/07) Maximum Assessment Rates			
Land Use	Front Footage	Acreage Rate	Flat Rate
Commercial	$1.99 per Front Foot	$2,582.41 per Acre	N/A
Multi-Family Residential	$0.50 per Front Foot	$645.60 per Acre	N/A
Single-Family Residential	N/A	N/A	$132.00 per Unit

The following formula is used to calculate each parcel's assessment (proportional benefit) for those parcels that are not Single-Family Residential parcels.

Front Footage Rate x Parcel's Adjusted Front Footage = Parcel Front Footage Levy

Acreage Rate x Parcel's Adjusted Acreage = Parcel Acreage Levy

Proposed Levy per Parcel = Parcel Front Footage Levy + Parcel Acreage Levy

The Assessment Range Formula shall be applied to all future assessments within the District beginning in fiscal year 2007/08. Generally, if the proposed annual assessment for the current fiscal year is less than or equal to the calculated Maximum Assessment, then the Assessment is equal to the initial Assessment (approved by property owners within the District) adjusted annually by three percent (3%).

Beginning in the second fiscal year (Fiscal Year 2007/08) and each fiscal year thereafter, the Maximum Assessment would be recalculated, and a new Maximum Assessment established within the District.

The Maximum Assessment is adjusted annually and is calculated independent of the District's annual budget and proposed annual assessment. Any proposed annual assessment is not considered an increased assessment, even if the proposed assessment is greater than the assessment applied in the prior fiscal year.

Although the Maximum Assessment will increase each year, the actual assessment may remain unchanged. The Maximum Assessment adjustment is designed to establish a reasonable limit on assessments. The Maximum Assessment calculated each year does not require or facilitate an increase to the annual assessment and neither does it restrict assessments to the adjustment maximum amount. If the budget and assessment for the fiscal year do not require an increase, or the increase is less than the adjusted Maximum Assessment, the required budget and assessment may be applied without additional property owner balloting. If the budget and assessments calculated requires an increase greater than the adjusted Maximum Assessment, then the assessment is considered an increased assessment and would be subject to balloting.

D. ANNUAL INFLATIONARY ADJUSTMENT

If the proposed assessment rates increase over the prior fiscal year's maximum assessment rates by a percentage no greater than the 3%, then the proposed assessment rates are not considered an increase.

III. DISTRICT BUDGET

A. FY 2025/26 BUDGET

DESCRIPTION	AMOUNT (FUND 2021)
DIRECT COSTS	
Contract Maintenance - Landscaping	$13,452.00
Repair & Maintenance - Landscaping	7,800.00
Repair & Maintenance - Lighting	1,500.00
Repair and Maintenance - Streetscape and Signage	
Repair and Maintenance - Tree Work	2,128.00
Utilities	12,600.00
Rehab Reserve Expenditures - Non-Routine Tree Work	2,553.00
Rehab Reserve Project Expenditures	7,400.00
Total Direct Costs	**$47,433.00**
ADMINISTRATION COSTS	
City Administration	$844.00
Contract Administration - Park's Dept	2,200.00
County Auditor Fees	448.13
Consulting & Professional Services	4,249.00
Public Hearing Publishing Costs	376.00
Total Administrative Costs	**$8,117.13**
Total Direct and Administration Costs	**$55,550.13**
BUDGET ADJUSTMENTS	
Replenishment/(Use) of Operating Reserve	($784.22)
Contribution for /(Use of) Rehab Reserve	(9,953.00)
Rounding Adjustment	(0.49)
Total Adjustments	**($10,737.71)**
BALANCE TO LEVY	**$44,812.42**

Fund balance information is reported in Section C on the following page.

B. FY 2025/26 ASSESSMENT RATES

DESCRIPTION	AMOUNT (FUND 2021)
FY 2025/26 ASSESSMENT DATA	
Number of Assessable Parcels	60
Total Front Footage - Commercial	2,283.19
Total Front Footage - MFR	691.68
Total Assessable Acreage - Commercial	6.3090
Total Assessable Acreage - MFR	2.4819
Total Single Family Residences	21
Applied Assessment Rate per Front Foot - Commercial	$3.4895
Applied Assessment Rate per Front Foot - MFR	$0.8768
Applied Assessment Rate per Acre - Commercial	$4,528.2716
Applied Assessment Rate per Acre - MFR	$1,132.0635
Applied Assessment Rate per SF Residence	$231.4628
Maximum Assessment Rate per Front Foot - Commercial	$3.4895
Maximum Assessment Rate per Front Foot - MFR	$0.8768
Maximum Assessment Rate per Acre - Commercial	$4,528.2716
Maximum Assessment Rate per Acre - MFR	$1,132.0635
Maximum Assessment Rate per SF Residence	$231.4628
Potential Maximum Assessment	**$44,812.91**

C. FY 2025/26 FUND BALANCE INFORMATION

DESCRIPTION	AMOUNT (FUND 2021)
OPERATING RESERVE	
Beginning Operating Reserve Balance 7-1-2025 (est.)	**$26,819.50**
add: Replenishment from FY 2025/26 Levy	
less: Use for FY 2025/26 Expenses	(784.22)
Transfer from/(to) the Rehab Reserve	(2,318.78)
Ending Operating Reserve Balance 6-30-2026 (est.)	**$23,716.50**
REHABILITATION RESERVE	
Beginning Rehab Reserve Balance 7-1-2025 (est.)	**$62,555.50**
add: Collect from FY 2025/26 Levy	
less: Use for FY 2025/26 Rehab Projects	(9,953.00)
Transfer from/(to) the Operating Reserve	2,318.78
Ending Rehab Reserve Balance 6-30-2026 (est.)	**$54,921.28**

D. DESCRIPTION OF BUDGET ITEMS

Description of the terms used in the preceding Budget, Assessment Rates and Fund Balance tables are listed below:

BUDGET:

DIRECT COSTS

Contract Maintenance - Landscaping - Includes all regularly scheduled contract labor, required to properly maintain and ensure the satisfactory condition of all landscaping, irrigation and drainage systems and appurtenant facilities.

Repair and Maintenance - Landscaping - This item includes landscape improvement repair and maintenance costs that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism, storms, etc. Planned replacements or upgrades that provide a direct benefit to the District during the Current Fiscal Year may also be included. Costs could include the renovation of improvements such as irrigation systems.

Repair and Maintenance - Lighting - This item includes lighting improvement repair and maintenance costs. This may include repair of damaged amenities due to vandalism, storms, etc. Planned replacements or upgrades that provide a direct benefit to the District during the Current Fiscal Year may also be included.

Repair and Maintenance - **Streetscape and Signage** - This item includes repair and maintenance costs of streetscape and sign improvements. Streetscape improvements include street furniture, sidewalks, curbs, gutters, parking stripes, brick pavers, benches, bike racks, and trash receptacles. This may include repair of damaged amenities due to vandalism, storms, etc. May include planned replacements or upgrades not listed below that provide a direct benefit to the District.

Repair & Maintenance – Tree Work - This line item includes annual costs for tree maintenance not included in the annual contract maintenance portion of the budget. If zero, this line item may not be shown in the budget.

Utilities - The furnishing of water and electricity required for the operation and maintenance of the improvements.

Rehab Reserve Expenditures - Non-Routine Tree Work – Expected costs to maintain trees other than costs of annual repair and maintenance. If zero, this line item may not be shown in the budget.

Rehab Reserve Project Expenditures – Expected costs for installation, replacement or planned upgrades of District improvements for the current year that

were previously funded or accumulated in the Rehabilitation Reserve. The Rehabilitation Reserve is used to accumulate funds for costs associated with the future rehabilitation or replacement of District improvements that cannot be conveniently raised from a single year's assessment. If zero, this line item may not be shown in the budget.

ADMINISTRATION COSTS

City Administration – Estimated costs incurred by the City Finance Department and other Departments in preparing the annual budget for the Engineer's Report, together with other financial information required to determine the annual assessment. These costs would also include the preparation, posting and publishing of public notices required for City Council action relating to the District, as well as the costs to perform legal review of documents.

Contract Administration – Park's Dept – Estimated Costs of Park and Recreation Department staff to coordinate and oversee the maintenance contracts and overall repair and maintenance of the District. This amount also includes the cost of the Department's estimates and analysis of certain budget items, estimated costs and useful lives of certain District Improvements.

County Auditor Fees - A fee of 1% of the total levy amount that is charged to the District by the County for placing assessments on property tax bills.

Consulting and Professional Services – Includes the costs and expenses of contracting with various professionals to provide legal, engineering and district administration services directly related to the District, including the calculation of the annual assessment amounts, the preparation of the Engineer's' Report.

Public Hearing Publishing Costs –Includes the out of pocket costs to publish public notices required for City Council action relating to the District.

Total Direct and Administration Costs – The total expected costs of the District.

BUDGET ADJUSTMENTS

Replenishment/(Use) of Operating Reserve – A "Replenishment" increases the levy in order to replenish the Operating Reserve. On the other hand, a "Use" of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the budget. Further information regarding the function of the Operating Reserve is provided under "FUND BALANCE INFORMATION" in the following pages of this Section.

Contribution for / (Use of) Rehab Reserve — A "Contribution" increases the levy in order to generate funding for the Rehabilitation Reserve. This reserve allows for the accumulation of funds for possible rehabilitation projects or replacements in future years. On the other hand, a "Use of" of the Rehabilitation Reserve provides current year funding of rehabilitation projects or replacements from available funds within the Rehabilitation Reserve. If zero, this line item may not be shown in the budget. Further information regarding the function of the Rehabilitation Reserve is provided under "FUND BALANCE INFORMATION" in the following pages of this Section.

Rounding Adjustment – The necessary rounding adjustment(s) due to limitations of the County property tax system that requires even penny levy amounts to be placed on the secured tax roll.

BALANCE TO LEVY - This is the total amount to be levied and collected through assessments for the current fiscal year for each zone. The Balance to Levy represents the sum of the total District costs together with any applicable adjustments to the budget as described above.

ASSESSMENT RATES:

Number of Assessable Parcels - The total number of parcels that are expected to be assessed. Non-assessable lots or parcels include government-owned land, public utility-owned property, land principally encumbered by public rights-of-way or easements, common areas, and/or parcels within the boundaries of the District currently do not benefit from the improvements and are therefore not assessed.

Total Assessable Front Footage – the total number of Front Feet within the District, adjusted for corner parcels, Multi-Family Residential and Single-Family Residential Parcels will be assessed as calculated in accordance with the methodology set out in Section C of this Report.

Total Assessable Acreage – the total Acreage within the District, adjusted for Multi-Family Residential and Single-Family Residential Parcels that will be assessed as calculated in accordance with the methodology set out in Section C of this Report.

Total Single-Family Residential Parcels – the total number of parcels currently being used as Single-Family Residences.

Applied Assessment Rates – The applied assessment rates for each of the District's land use types.

Maximum Assessment Rates per Front Foot – The maximum dollar amount that can be assessed per Adjusted Front Foot for the District's land use type for the current fiscal year.

Maximum Assessment Rates per Acre – The maximum dollar amount that can be assessed per Adjusted Acreage Foot for the District's land use type for the current fiscal year.

Maximum Assessment Rate per SF Residential Unit – The maximum dollar amount that can be assessed per Single Family Unit within the District for the current fiscal year.

Potential Maximum Assessment – The total amount that is expected to be assessed against all parcels within the District for the Current Fiscal Year.

FUND BALANCE INFORMATION:

OPERATING RESERVE

Beginning Operating Reserve Balance 7-1-2025 (est.) - The anticipated beginning balance of cash and receivables net of any unpaid prior year obligations for each Zone. These beginning balances shall be used to fund each Zone's expenditures from July 1, 2025 to December 31, 2025, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's fiscal year and the receipt of the collections from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

Replenish from FY 2025/26 Levy – This amount is added to the FY 2025/26 levy in order to replenish the Operating Reserve. Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve balance shall be sufficiently funded to provide for expenditures from the period of July 1, 2025 (the beginning of the Fiscal Year) through December 31, 2025. If zero, this line item may not be shown in the budget.

Use for FY 2025/26 Expenses – The amount of the Operating Reserve to be used to fund FY 2025/26 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve Balance to an amount no greater than the expected District costs for the period of July 1, 2025 (the beginning of the Fiscal Year) through December 31, 2025. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Rehab Reserve — The amount of Operating Reserve monies to be transferred to or from the Rehabilitation Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or

equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Operating Reserve Balance 6-30-2026 (est.) - This amount represents the anticipated Operating Reserve balance/(deficit) for each Zone as of June 30, 2026. The size of each Zone's Operating Reserve is limited by Streets and Highways Code 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance, service and incidental expenses from the first day of the fiscal year (July 1) to the date that the Agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each Zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

REHABILITATION RESERVE

Beginning Rehab Reserve Balance 7-1-2025 (est.) — The projected balance of funds in the Rehabilitation Reserve as of July 1, 2025. Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Collect from FY 2025/26 Levy — This amount is added to the FY 2025/26 levy to accumulate funding of future year rehabilitation projects, replacements, restorations or upgrades of District improvements. If zero, this line item may not be shown in the budget.

Use for FY 2025/26 Rehab Projects – The amount of Rehabilitation Reserve monies expected to be transferred out of the Rehabilitation Reserve to fund the costs of installation, replacement or planned upgrades of District improvements for the current year. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Operating Reserve — The amount of Rehabilitation Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Rehab Reserve Balance 6-30-2026 (est.) - The projected balance of funds in the Rehabilitation Reserve as of June 30, 2026. These funds shall be used to provide for future year rehabilitation projects, replacements, restorations or

upgrades of District improvements which cannot be conveniently raised from a single year's assessment.

Should the District have no Rehabilitation Reserve balances or related activity, no Rehabilitation Reserve information shall be presented in the Report.

E. REHABILITATION RESERVE – CAPITAL IMPROVEMENT PLAN

Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

The Report provides a five-year Capital Improvement Plan ("CIP") which shows projected expenditures related to the rehabilitation, restoration and/or replacement of District improvements, and other allowable costs. The Current Fiscal Year CIP is shown in the preceding Budget Section A. The projected CIP costs for the remaining four years are provided below.

Description	FY 2026-27	FY 2027-28	FY 2028-29	FY 2029-30	4 Year Total
Repair, replace and/or refurbish street furniture (pots)	$2,500	$2,500	$2,500	$3,400	$10,900
Repair, replace streetscape and hardscape	2,500	2,500	2,500	2,500	10,000
Replace, repair, renovate and/or refurbish plants, landscape & related mat'ls	4,000	4,000	4,000	4,000	16,000
Replace, repair lighting fixtures	2,400	2,500	2,500	1,500	8,900
Non-routine tree work	2,420	2,420	1,750	2,553	9,143
Total Projected Expenditures	**$13,820**	**$13,920**	**$13,250**	**$13,953**	**$54,943**

From time to time, funds held in a Rehabilitation Reserve may be needed to respond to changing needs due to the condition of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the Districts' Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and/or operation of the improvements.

APPENDIX A – DISTRICT BOUNDARY MAP

The boundary map for the District has previously been submitted to the Clerk of the City in the format required under the 1972 Act and is, by reference, hereby made part of this Report. These District Boundary Maps are available for inspection at the office of the City Clerk during normal business hours.

For general reference purposes, a summary of the District's Boundaries is presented herein.

APPENDIX B — FY 2025/26 ASSESSMENT ROLL

Parcel identification, for each lot or parcel within the District, shall be the parcel as shown on the Placer County Assessor's map for the year in which this Report is prepared.

A listing of parcels to be assessed within this District, along with the proposed assessment amounts, shall be submitted to the City Clerk, under separate cover, and by reference is made part of this Report.

Non-assessable lots or parcels may include areas of public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas and rights-of-ways including public greenbelts and parkways; utility rights-of-ways; common areas; landlocked parcels, small parcels vacated by the County, bifurcated lots, and any other property that cannot be developed, excepting common area parcels. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempted from assessment.

At the conclusion of the public hearing for the District and the proposed assessments, approval of the Report (as submitted or as modified) confirms the method of apportionment and the assessment rate to be levied against each eligible parcel and thereby constitutes the approved levy and collection of assessments for FY 2025/26. The listing of parcels and the amount of assessment to be levied shall be submitted to the County Auditor/Controller and included on the FY 2025/26 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the Current Fiscal Year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved in this Report. Therefore, if a single parcel has changed to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

RESOLUTION NO. 25-109

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, INITIATING PROCEEDINGS FOR THE ANNUAL LEVY OF ASSESSMENTS FOR THE INFILL AREA LANDSCAPING AND LIGHTING DISTRICT, FOR FISCAL YEAR 2025/2026, PURSUANT TO THE PROVISIONS OF PART 2 OF DIVISION 15 OF THE CALIFORNIA STREETS AND HIGHWAYS CODE

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the Infill Area Landscaping and Lighting District and annexed territory therein (hereafter referred to as the "District") and annexed territory therein pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the "Act"), that provides for the levy and collection of assessments by the County of Placer for the City of Roseville to pay for the maintenance and services relating to landscaping, all appurtenant facilities and operations related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter "Engineer") for the purpose of assisting with the establishment of the assessments, the annexation of territory, and to prepare and file an Engineer's Annual Levy Report (hereinafter referred to as the "Engineer's Report") with the City Clerk in accordance with the Act, and in accordance with the California Constitution, Articles XIIIC and XIIID;

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE INFILL AREA LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 Engineer's Report: The City Council hereby orders the Engineer to prepare and file with the City Clerk the Engineer's Report concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22622* of the Act.

Section 2 Proposed improvements and any substantial changes in existing improvements: The District improvements include: maintenance and operation of and the furnishing of services, materials and/or improvements for the landscape and lighting areas adjacent to property within the Pheasant Run, Cirby Oaks II and Reuter Ranch subdivisions, and other public improvements within the street right-of-way areas and all appurtenant facilities related thereto as further described in the Engineer's Report. The Engineer's Report also describes all new improvements or substantial changes in existing improvements.

RESOLUTION NO. 25-110

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, DECLARING ITS INTENTION TO LEVY ANNUAL ASSESSMENTS FOR THE INFILL AREA LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2025/2026

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the Infill Area Landscaping and Lighting District (hereafter referred to as the "District"), and initiated proceedings for Fiscal Year 2025/2026, pursuant to the provisions of the *Landscaping and Lighting Act of 1972*, *Part 2 of Division 15 of the Streets and Highways Code of California*, *beginning with Section 22500* (hereafter referred to as the "Act") that provides for the levy and collection of assessments by the County of Placer for the City of Roseville to pay for the maintenance, operation and servicing of all improvements and facilities related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services for the purpose of assisting with the Annual Levy of the District, and to prepare and file a report (hereinafter referred to as the "Engineer's Report") with the City Clerk in accordance with the Act; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE INFILL AREA LANDSCAPING AND LIGHTING DISTRICT, PURSUANT TO *CHAPTER 3, SECTION 22624* OF THE ACT, AS FOLLOWS:

Section 1 Intention: The City Council hereby declares that it is its intention to seek the Annual Levy of the District pursuant to the Act, over and including the land within the District boundary, and to levy and collect assessments on all such land to pay for the annual costs of the improvements.

Section 2 Proposed improvements and any substantial changes in existing improvements: The District improvements include: maintenance and operation of and the furnishing of services, materials or improvements for the landscape and lighting areas, including turf, ground cover, shrubs and trees, irrigation systems, drainage systems, and other public improvements within the street right-of-way areas and all appurtenant facilities related thereto as further described in the Engineer's Report. The Engineer's Report also describes all new improvements or substantial changes in existing improvements.

Section 3 Boundaries and Designation: The boundaries of the District are described as the boundaries previously defined in the formation documents of the original District and any annexations thereto. The District includes the parcels within the areas known as the Pheasant Run, Cirby Oaks II and Reuter Ranch subdivisions. The District is known and designated as:

"Infill Area Landscaping and Lighting District"

Section 4 Proposed Assessment Amounts: The proposed assessments are outlined in the Engineer's Report. District Assessments are calculated in accordance with the method of apportionment established for the District and do not exceed the assessment rates.

Section 5 Public Hearing(s): The City Council hereby declares its intention to conduct a Public Hearing annually concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22626* of the Act.

Section 6 Notice: The City Clerk shall give notice of the time and place of the Public Hearing by causing this Resolution to be published once in the local newspaper not less than ten (10) days before the date of the hearing and by posting a copy of this Resolution on the official bulletin board customarily used by the City Council for the posting of notices.

Section 7 Time and Place of Public Hearing: Notice is hereby given that a Public Hearing on these matters will be held by the City Council on **Wednesday, May 21, 2025 at 6:00 p.m.**, or as soon thereafter as feasible in the regular meeting chambers located at 311 Vernon Street, Roseville, California.

RESOLUTION NO. 25-111

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR PRELIMINARY APPROVAL OF THE ENGINEER'S ANNUAL LEVY REPORT FOR THE INFILL AREA LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2025/2026

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, the City Council has, by previous Resolutions, ordered the preparation of an Annual Levy Report (hereafter referred to as the "Engineer's Report") for the district known and designated as the Infill Area Landscaping and Lighting District (hereafter referred to as the "District"), pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California*, *beginning with Section 22500* (hereinafter referred to as the "Act"); and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter "Engineer"), for the purpose of assisting with the establishment of the assessments and to prepare and file an Engineer's Report with the City Clerk in accordance with the Act, and in accordance with the requirements of the California Constitution, Articles XIIIC and XIIID; and

WHEREAS, there has now been presented to this City Council the Engineer's Report as required by *Chapter 1, Article 4, Section 22566* of said Act; and,

WHEREAS, this City Council has carefully examined and reviewed the Engineer's Report as presented, and is preliminarily satisfied with the District, each and all of the budget items and documents as set forth therein, and is satisfied that the assessments, on a preliminary basis, have been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed within each Zone, as set forth in said Engineer's Report; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE INFILL AREA LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 That the above recitals are all true and correct.

Section 2 That the Engineer's Report, as presented, consists of the following:

a. A Description of Improvements
b. The Annual Budget (Costs and Expenses of Maintenance, Services, Operations and District Administration)
c. The Assessment Roll containing the Fiscal Year 2025/2026 Levy for each Assessor Parcel within the District

Section 3 The Engineer's Report is hereby approved on a preliminary basis, and ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection.

Section 4 That the City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation of the Engineer's Report.

APPENDIX B — FY 2025/26 ASSESSMENT ROLL 20

I. OVERVIEW

A. INTRODUCTION

The City of Roseville ("City") annually levies and collects special assessments in order to maintain the improvements within the City's existing Infill Area Landscaping and Lighting District ("District"). The District was formed and levies annual assessments pursuant to the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code (the "Act").

The Engineer's Report ("Report") describes the District, any new annexations, changes to the District, and the proposed assessments for the period of July 1, 2025 through June 30, 2026 (hereafter "Fiscal Year" or "FY 2025/26"). The special benefit assessments are based on historical and estimated costs to maintain the District improvements. These assessments, which provide a direct and special benefit to properties within the District, will provide funding for the operation and maintenance of District improvements.

The District consists of three (3) zones of benefit, Zones A, B and C (individually the "Zone" and collectively the "Zones"). The improvements that benefit properties within each Zone and the costs to maintain and service those improvements are identified and budgeted separately by Zone. The total cost of landscape maintenance within a Zone is equitably spread among only the benefiting parcels.

The word "parcel," for the purposes of this Report, refers to an individual property assigned its own Assessor's Parcel Number ("APN") by the County of Placer ("County") Assessor. The County Auditor-Controller ("Auditor-Controller") uses Assessor's Parcel Numbers and specific tax code accounts, to identify on the County's tax roll, properties assessed for special district benefit assessments.

Following approval of the Report, the Roseville City Council (the "City Council") will by resolution, order the improvements to be made, if any, and confirm the levy and collection of assessments pursuant to the Act. The assessment rates and method of apportionment described in this Report, as approved, or modified by the City Council, define the assessments to be applied to each parcel within the District and respective Zones for FY 2025/26. The assessments as approved will be submitted to the Placer County Auditor-Controller to be included on the FY 2025/26 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor-Controller to be an invalid parcel number for the current Fiscal Year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the Auditor-Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rates approved by the City Council.

B. COMPLIANCE WITH CURRENT LEGISLATION

All assessments described in this Report and approved by the City Council are prepared in accordance with the Act and are in compliance with the substantive and procedural requirements of the California State Constitution Articles XIIIC and XIIID ("Articles XIIIC and XIIID") and the provisions of the Proposition 218 Omnibus Implementation Act [Government Code Section 53750 and following] (the "Implementation Act"). Articles XIIIC and XIIID and the Implementation Act collectively are hereinafter referred to as "Proposition 218".

Pursuant to the California Constitution Article XIIID Section 5, certain existing assessments are exempt from the substantive and procedural requirements of Article XIIID Section 4 and property owner balloting for the assessments is not required until such time that the assessments are increased. Specifically, the City determined that all improvements and the annual assessments originally established for the District were part of the conditions of property development and approved by the original property owner (developer). As such, pursuant to Article XIIID Section 5(b), all the property owners approved the existing District assessments at the time the assessments were created (originally imposed pursuant to a 100% landowner petition). Therefore, the pre-existing assessment amounts (the maximum assessment rates of Zones A, B, & C identified in this Report) are exempt from the procedural requirements Article XIIID Section 4, provided the assessments are not increased above these previously approved maximum assessment rates.

The District and all Zones therein have been formed pursuant to the Act. Pursuant to the Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments, to review the Report prior to approving the annual assessments to be levied on the County tax rolls. The assessments described in this Report have been prepared in accordance with the Act.

C. DESCRIPTION OF DISTRICT BOUNDARIES

The three Zones within the District are comprised of three non-contiguous residential subdivisions, namely Pheasant Run, Cirby Oaks II and Reuter Ranch, are located in the southern portion of the City and are within the boundaries of the City's "Infill Planning Area." A general depiction of the boundaries of each Zone can be found in Appendix A of this Report.

D. IMPROVEMENTS AUTHORIZED BY THE 1972 ACT

As applicable or may be applicable to a proposed District, the 1972 Act defines improvements to mean one or any combination of the following:

- The installation or planting of landscaping.
- The installation or construction of statuary, fountains, and other ornamental structures and facilities.
- The installation or construction of public lighting facilities.
- The installation or construction of any facilities which are appurtenant to any of the foregoing, or which are necessary or convenient for the maintenance or servicing thereof, including, but not limited to, grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities.
- The maintenance or servicing, or both, of any of the foregoing.
- The acquisition of any existing improvement otherwise authorized pursuant to this section.

Incidental expenses associated with the improvements including, but not limited to:

- The cost of preparation of the Report, including plans, specifications, estimates, diagram, and assessment;
- The costs of printing, advertising, and the publishing, posting, and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;
- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
- Any expenses incidental to the issuance of bonds or notes pursuant to Section 22662.5.
- Costs associated with any elections held for the approval of a new or increased assessment.

The 1972 Act defines "maintain" or "maintenance" to mean furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement, including:

- Repair, removal, or replacement of all or any part of any improvement.
- Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury.
- The removal of trimmings, rubbish, debris, and other solid waste.

- The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Furthermore, the 1972 Act specifies that where the cost of improvements (other than maintenance and operations) is greater than can be conveniently raised from a single annual assessment, an assessment to be levied and collected in annual installments. In that event, the governing body may choose to do any of the following:

- Provide for the accumulation of the moneys in an improvement fund until there are sufficient moneys to pay all or part of the cost of the improvements.
- Provide for a temporary advance to the improvement fund from any available and unencumbered funds of the local agency to pay all or part of the cost of the improvements and collect those advanced moneys from the annual installments collected through the assessments.
- Borrow an amount necessary to finance the estimated cost of the proposed improvements. The amount borrowed, including amounts for bonds issued to finance the estimated cost of the proposed improvements.

E. DESCRIPTION OF IMPROVEMENTS AND BENEFITS

This District, by special benefit assessments, provides funding for the maintenance and operation of certain landscaping improvements located within the public rights-of-way and dedicated easements:

The District provides all services necessary to maintain the landscaped corridors adjacent to the privately-owned parcels comprising the three subdivisions. Improvements include shrubs, trees, and other landscaping vegetation, as well as irrigation controllers, automatic valves, and irrigation systems. Services provided include all necessary services, operations, and maintenance required in keeping the improvements in a healthy, vigorous condition and in proper working order.

The District encompasses three subdivisions, each of which is located in a separate Zone. The Zones have specific improvements and costs associated with those improvements that benefit the parcels within each respective Zone. The total cost of landscape maintenance within a Zone is equitably spread among only the benefiting parcels within the Zone and only parcels that receive a Special Benefit from the improvements are assessed.

The specific locations of the improvements within each Zone of the District are described as follows:

Zone A – Pheasant Run

Maintenance of 6,880 square feet of landscaping and related improvements within the Pheasant Run subdivision.

Zone B – Cirby Oaks

Maintenance of 7,447 square feet of landscaping and related improvements within the Cirby Oaks II subdivision.

Zone C – Reuter Ranch

Maintenance of 24,700 square feet of landscaping and related improvements within the Reuter Ranch subdivision. A larger amount of landscaping benefits the properties within Reuter Ranch and typically results in a larger per parcel assessment for these properties as compared to Zones A and B.

II. METHOD OF APPORTIONMENT

A. GENERAL

The Act permits the establishment of assessment districts by agencies for the purpose of providing certain public improvements which include the construction, maintenance and servicing of public lights, landscaping, and appurtenant facilities. The Act further requires that the cost of these improvements be levied according to benefit rather than assessed value:

> *"The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements."*

The formula used for calculating assessments in each Zone of the District therefore reflects the composition of the parcels, and the improvements and services provided, to fairly apportion the costs based on estimated benefit to each parcel.

B. SPECIAL BENEFIT ANALYSIS

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIIID addresses several key criteria for the levy of assessments, notably:

Article XIIID Section 2d defines District as follows:

"District means an area determined by an agency to contain all parcels which will receive a Special Benefit from a proposed public improvement or property-related service;"

Article XIIID Section 2i defines Special Benefit as follows:

"Special Benefit" means a particular and distinct benefit over, and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute "Special Benefit."

Article XIIID Section 4a defines proportional Special Benefit assessments as follows:

"An agency which proposes to levy an assessment shall identify all parcels which will have a Special Benefit conferred upon them and upon which an assessment will be imposed. The proportionate Special Benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No

assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional Special Benefit conferred on that parcel."

These improvements will directly benefit the parcels to be assessed within the District. The assessments and method of apportionment is based on the premise that the assessments will be used to construct and install landscape and lighting improvements within the District as well as provide for the annual maintenance of those improvements, and the assessment revenues generated by District will be used solely for such purposes.

Each of the proposed improvements; the associated costs and assessments have been reviewed, identified, and allocated based on Special Benefit pursuant to the Act. All improvements associated with the Zones were necessary and required through the conditions of property development. Therefore, the improvements and the annual costs of ensuring the maintenance and operation of the improvements are of direct and Special Benefit to the properties.

The method of apportionment (method of assessment) is based on the premise that each assessed parcel within each Zone receives a Special Benefit from the improvements. The desirability and security of properties is enhanced by well-maintained landscaping in close proximity to those properties.

The special benefits associated with all landscaping improvements are specifically:

- Enhanced desirability of properties through association with the improvements.
- Improved aesthetic appeal of properties providing a positive representation of the area and properties.
- Enhanced adaptation of the urban environment within the natural environment from adequate green space and landscaping.
- Environmental enhancement through improved erosion resistance, dust and debris control, and fire prevention.
- Increased sense of pride in ownership of property within the Zones resulting from well-maintained improvements associated with the properties.
- Enhanced quality of life through well-maintained green belts and landscaped areas.
- Reduced criminal activity and property-related crimes (especially vandalism) against properties in the Zones through well-maintained surroundings and amenities including abatement of graffiti.
- Enhanced environmental quality of the parcels by moderating temperatures, providing oxygenation, and attenuating noise.

All of the preceding special benefits allowed the property to be developed for the enjoyment of the property owners and contribute to a specific enhancement and desirability of each of the assessed parcels within the Zones.

The improvements are for Special Benefit, enhancement, and use of properties within the Zones. Although the improvements include public easements, rights-of-way, streets, and other amenities available or visible to the public at large, the construction and installation of these improvements are only necessary for the development of properties within the Zones and are not required nor necessarily desired by any properties or developments outside the Zone's boundaries. Therefore, any public access or use of the improvements by others is incidental and there is no measurable general benefit to properties outside the Zones or to the public at large.

C. RATE AND METHOD OF APPORTIONMENT

Pursuant to the Act, the costs of each Zone of the District must be spread to each parcel based upon a benefit formula. Each assessable parcel in the District receives a direct and Special Benefit from the improvements in the Zone. This direct and Special Benefit was determined to be equal for all dwelling units within each Zone; costs for each Zone shall be calculated separately within each respective Zone. Each single-family residence is equal to one dwelling unit (unit) and the formula used to arrive at each parcel's annual assessment is described below. Public parcels lying within the landscape corridors are considered to receive no benefit from the improvements and are therefore not assessed.

Costs associated with each Zone are to be charged only to assessable parcels within the respective Zone as follows:

$$\frac{\textit{Balance to Levy in Zone}}{\textit{Total Units in Zone}} = \textit{Assessment Per Unit in Zone}$$

The Maximum Annual Assessment Rates are not to exceed $193.32 per unit for Zone A and $200.00 per unit for Zones B and C.

III. DISTRICT BUDGET

A. FY 2025/26 BUDGET

DESCRIPTION	ZONE A (Pheasant Run) Fund 2014	ZONE B (Cirby Oaks II) Fund 2015	ZONE C (Reuter Ranch) Fund 2017
DIRECT COSTS			
Contract Maintenance - Landscaping	$1,488.00	$2,172.00	$4,248.00
Repair & Maintenance - Landscaping	3,000.00	3,000.00	2,000.00
Repair & Maintenance - Tree Work	522.00	754.00	1,452.00

D. DESCRIPTION OF BUDGET ITEMS

Description of the terms used in the preceding Budget, Assessment Rates and Fund Balance tables are listed below:

BUDGET:

DIRECT COSTS

Contract Maintenance - Landscaping - Includes all regularly scheduled contract labor, materials, supplies, and equipment required to properly maintain and ensure the satisfactory condition or maintenance of all landscaping corridors, street medians, entryways, irrigation, and related drainage systems as well as maintenance of appurtenant facilities (the “improvements”).

Repair & Maintenance – Landscaping - This line item includes repairs that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism, storms, etc. If zero, this line item may not be shown in the budget.

Repair & Maintenance – Tree Work - This line item includes annual costs for tree maintenance not included in the annual contract maintenance portion of the budget. If zero, this line item may not be shown in the budget.

Utilities - The furnishing of water and electricity required for the operation and maintenance of the improvements.

Utilities Telecom – connectivity services required for the operation of certain improvements.

Rehab Reserve Expenditures – Non-Routine Tree Work – Expected costs to maintain trees other than costs of annual repair and maintenance. If zero, this line item may not be shown in the budget.

Rehab Reserve Project Expenditures – Expected costs for installation, replacement, or planned upgrades of District improvements for the current year that were previously funded or accumulated in the Rehabilitation Reserve. The Rehabilitation Reserve is used to accumulate funds for costs associated with the future rehabilitation or replacement of District improvements that cannot be conveniently raised from a single year's assessment. If zero, this line item may not be shown in the budget.

ADMINISTRATION COSTS

City Administration – Estimated costs incurred by the City's Finance Department and other Departments in preparing the annual budget for the Report, together with other financial information required to determine the annual assessment. These costs would also include the preparation, posting and publishing of public notices required for City Council action relating to the District, as well as costs to perform legal review of documents.

Contract Administration – Park's Dept – Estimated Costs of Park and Recreation Department staff to coordinate and oversee the maintenance contracts and overall repair and maintenance of the District. This amount also includes the cost of the Department's estimates and analysis of certain budget items, estimated costs and useful lives of certain District Improvements.

County Auditor Fees - A fee of 1% of the total levy amount that is charged to the District by the County for placing assessments on property tax bills.

Consulting and Professional Services – Includes the costs and expenses of contracting with various professionals to provide legal, engineering and district

administration services directly related to the District, including the calculation of the annual assessment amounts and the preparation of the Report and any out-of-pocket costs related to district administration.

Public Hearing Publishing Costs –Includes the out-of-pocket costs to publish public notices required for City Council action relating to the District.

Total Direct and Administration Costs – The total expected costs of the District.

BUDGET ADJUSTMENTS

Replenishment/(Use) of Operating Reserve – A "Replenishment" increases the levy in order to replenish the Operating Reserve. On the other hand, a "Use" of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the budget. Further information regarding the function of the Operating Reserve is provided under "FUND BALANCE INFORMATION" in the following pages of this Section.

Contribution for / (Use of) Rehab Reserve — A "Contribution" increases the levy in order to generate funding for the Rehabilitation Reserve. This reserve allows for the accumulation of funds for possible rehabilitation projects or replacements in future years. On the other hand, a "Use of" the Rehabilitation Reserve provides current year funding of rehabilitation projects or replacements from available funds within the Rehabilitation Reserve. If zero, this line item may not be shown in the budget. Further information regarding the function of the Rehabilitation Reserve is provided under "FUND BALANCE INFORMATION" in the following pages of this Section.

Rounding Adjustment – The necessary rounding adjustment(s) due to limitations of the County property tax system that requires even penny levy amounts to be placed on the secured tax roll.

BALANCE TO LEVY - This is the total amount to be levied and collected through assessments for the current Fiscal Year for each Zone. The Balance to Levy represents the sum of the total District costs together with any applicable adjustments to the budget as described above.

ASSESSMENT RATES:

Number of Assessable Units - The total number of residential units that are expected to be assessed. Non-assessable lots or parcels include government-owned land, public utility-owned property, land principally encumbered by public rights-of-way or easements, common areas, and/or parcels within the boundaries of the District currently do not benefit from the improvements and are therefore not assessed.

Applied Assessment Rate per Unit - The per unit assessment rates to be applied to the non-exempt parcels within the District for the current Fiscal Year.

Maximum Assessment Rate per Unit - The per unit maximum assessment rates for the current Fiscal Year.

Potential Maximum Assessment Per Zone – The total amount that can be assessed against all parcels within each Zone for the current Fiscal Year based upon the expected number of units to be assessed.

FUND BALANCE INFORMATION:

OPERATING RESERVE

Beginning Operating Reserve Balance 7-1-2025 (est.) - The anticipated beginning balance of cash and receivables net of any unpaid prior year obligations for each Zone. These beginning balances shall be used to fund each Zone's expenditures from July 1, 2025 to December 31, 2025, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's Fiscal Year and the receipt of the collections from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

Replenish from FY 2025/26 Levy – This amount is added to the FY 2025/26 levy in order to replenish the Operating Reserve. Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve balance shall be sufficiently funded to provide for expenditures from the period of July 1, 2025 (the beginning of the Fiscal Year) through December 31, 2025. If zero, this line item may not be shown in the budget.

Use for FY 2025/26 Expenses – The amount of the Operating Reserve to be used to fund FY 2025/26 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve Balance to an amount no greater than the expected District costs for the period of July 1, 2025 (the beginning of the Fiscal Year) through December 31, 2025. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Rehab Reserve — The amount of Operating Reserve money to be transferred to or from the Rehabilitation Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same Zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Operating Reserve Balance 6-30-2026 (est.) - This amount represents the anticipated Operating Reserve balance/(deficit) for each Zone as of June 30, 2026. The size of each Zone's Operating Reserve is limited by Streets and Highways Code 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance, service and incidental expenses from the first day of the fiscal year (July 1) to the date that the Agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each Zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

REHABILITATION RESERVE

Beginning Rehab Reserve Balance 7-1-2025 (est.) — The projected balance of funds in the Rehabilitation Reserve as of July 1, 2025. Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Collect from FY 2025/26 Levy — This amount is added to the FY 2025/26 levy to accumulate funding for future year rehabilitation projects, replacements, restorations, or upgrades of District improvements. If zero, this line item may not be shown in the budget.

Use for FY 2025/26 Rehab Projects – The amount of Rehabilitation Reserve money expected to be transferred out of the Rehabilitation Reserve to fund the costs of installation, replacement, or planned upgrades of District improvements in FY 2025/26. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Operating Reserve — The amount of Rehabilitation Reserve moneys to be transferred to or from the Operating Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same Zone's Operating Reserve, at the discretion of the Parks and Recreation Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Rehab Reserve Balance 6-30-2026 (est.) - The projected balance of funds in the Rehabilitation Reserve as of June 30, 2026. These funds shall be used to provide for future year rehabilitation projects, replacements, restorations, or upgrades of District improvements which cannot be conveniently raised from a single year's assessment.

E. REHABILITATION RESERVE – CAPITAL IMPROVEMENT PLAN

Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

The Report provides a five-year Capital Improvement Plan ("CIP") which shows projected expenditures by Zone related to the rehabilitation, restoration and/or replacement of District improvements, and other allowable costs. The Current Fiscal Year CIP is shown in the preceding Budget Section A. The projected CIP costs for the remaining four years are shown in the table below.

Zone A

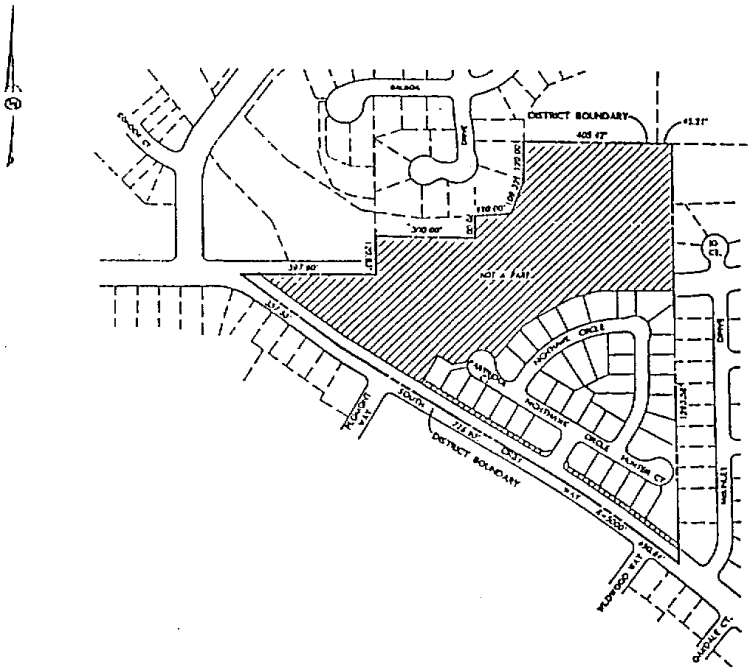
Description	FY 2026-27	FY 2027-28	FY 2028-29	FY 2029-30	4 Year Total
Repair and/or refurbish sound wall improvements	$0	$0	$0	$3,000	$3,000
Replace, repair, renovate and/or refurbish plants, landscape & related mat'ls	500	500	500	500	2,000
Non-routine tree work	400	$0	400	500	1,300
Total Projected Expenditures	**$900**	**$500**	**$900**	**$4,000**	**$6,300**

Zone B

Description	FY 2026-27	FY 2027-28	FY 2028-29	FY 2029-30	4 Year Total
Repair and/or refurbish sound wall improvements	$0	$0	$8,200	$10,000	$18,200
Replace, repair, renovate and/or refurbish plants, landscape & related mat'ls	2,000	2,000	1,500	7,800	13,300
Non-routine tree work	675	675	675	2,200	4,225
Total Projected Expenditures	**$2,675**	**$2,675**	**$10,375**	**$20,000**	**$35,725**

Zone C

Description	FY 2026-27	FY 2027-28	FY 2028-29	FY 2029-30	4 Year Total
Repair and/or refurbish sound wall improvements	$0	$0	$7,000	$0	$7,000
Replace, repair, renovate and/or refurbish plants, landscape & related mat'ls	3,000	1,300	3,000	3,000	10,300
Non-routine tree work	1,500	1,500	1,700	1,700	6,400
Total Projected Expenditures	**$4,500**	**$2,800**	**$11,700**	**$4,700**	**$23,700**



Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same Zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements.

APPENDIX A – DISTRICT BOUNDARY MAPS

The Assessment Diagrams for the District have previously been submitted to the City Clerk in the format required under the Act and are, by reference, made part of this Report. The boundary maps are available for inspection at the office of the City Clerk during normal business hours.

For general reference purposes, a rendering of the District and Zone Boundaries are presented herein.

APPENDIX B — FY 2025/26 ASSESSMENT ROLL

Parcel identification, for each lot or parcel within the District, shall be the parcel as shown on the Placer County Assessor's map for the year in which this Report is prepared.

A listing of parcels to be assessed within this District, along with the proposed assessment amounts, may be submitted to the City Clerk, under a separate cover, and by reference is made part of this Report.

Non-assessable lots or parcels may include areas of public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas and rights-of-way, including public greenbelts and parkways; utility rights-of-way; small parcels vacated by the County, bifurcated lots, and other property that cannot be developed, excepting common area parcels. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempt from assessment.

At the conclusion of the public hearing for the District and the proposed assessments, approval of the Report (as submitted or as modified) confirms the method of apportionment and the assessment rate to be levied against each eligible parcel and thereby constitutes the approved levy and collection of assessments for FY 2025/26. The listing of parcels and the amount of assessment to be levied shall be submitted to the County Auditor/Controller and included on the FY 2025/26 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current Fiscal Year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved in this Report. Therefore, if a single parcel has changed to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

RESOLUTION NO. 25-112

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, INITIATING PROCEEDINGS FOR THE LEVY OF ASSESSMENTS FOR THE JOHNSON RANCH LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2025/2026, PURSUANT TO THE PROVISIONS OF PART 2 OF DIVISION 15 OF THE CALIFORNIA STREETS AND HIGHWAYS CODE

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the Johnson Ranch Landscaping and Lighting District and annexed territory therein (hereafter referred to as the "District") pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the "Act"), that provides for the levy and collection of assessments by the County of Placer for the City of Roseville to pay for the maintenance and services of street lighting, landscaping, and all appurtenant facilities and operations related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter "Engineer") for the purpose of assisting with the establishment of the assessments, the annexation of territory, and to prepare and file an Engineer's Annual Levy Report (hereinafter referred to as the "Engineer's Report") with the City Clerk in accordance with the Act, and in accordance with the California Constitution, Articles XIIIC and XIIID;

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE JOHNSON RANCH LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 Engineer's Report: The City Council hereby orders the Engineer to prepare and file with the City Clerk the Engineer's Report concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22622* of the Act.

Section 2 Proposed improvements and any substantial changes in existing improvements: The District improvements include: the maintenance and operation of and the furnishing of services, materials and/or improvements for landscape, lighting, open space, floodway, stream course and wetland areas, and other public improvements within the street right-of-way areas and all appurtenant facilities related thereto as further described in the Engineer's Report. The Engineer's Report also describes all new improvements or substantial changes in existing improvements.

RESOLUTION NO. 25-113

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, DECLARING ITS INTENTION TO LEVY ANNUAL ASSESSMENTS FOR THE JOHNSON RANCH LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2025/2026

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the Johnson Ranch Landscaping and Lighting District (hereafter referred to as the "District"), and initiated proceedings for Fiscal Year 2025/2026, pursuant to the provisions of the *Landscaping and Lighting Act of 1972*, *Part 2 of Division 15 of the Streets and Highways Code of California*, *beginning with Section 22500* (hereafter referred to as the "Act") that provides for the levy and collection of assessments by the County of Placer for the City of Roseville to pay for the maintenance, operation and servicing of all improvements and facilities related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services for the purpose of assisting with the Annual Levy of the District, and to prepare and file a report (hereinafter referred to as the "Engineer's Report") with the City Clerk in accordance with the Act; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE JOHNSON RANCH LANDSCAPING AND LIGHTING DISTRICT, PURSUANT TO *CHAPTER 3, SECTION 22624* OF THE ACT, AS FOLLOWS:

Section 1 Intention: The City Council hereby declares that it is its intention to seek the Annual Levy of the District pursuant to the Act, over and including the land within the District boundary, and to levy and collect assessments on all such land to pay for the annual costs of the improvements.

Section 2 Proposed improvements and any substantial changes in existing improvements: The District improvements include: the maintenance and operation of and the furnishing of services, materials or improvements for landscape, lighting, open space, floodway, stream course and wetland areas, including certain mitigation monitoring activities therein, turf, ground cover, shrubs and trees, irrigation systems and drainage systems, bike trails, and other public improvements within the street right-of-way areas and all appurtenant facilities related thereto as further described in the Engineer's Report. The Engineer's Report also describes all new improvements or substantial changes in existing improvements.

Section 3 Boundaries and Designation: The boundaries of the District are described as the boundaries previously defined in the formation documents of the original District and any annexations thereto. The District generally includes the parcels within the area known as the Southeast Roseville Specific Plan. The District is known and designated as

"Johnson Ranch Landscaping and Lighting District"

Section 4 Proposed Assessment Amounts: The proposed assessments are outlined in the Engineer's Report. District Assessments are calculated in accordance with the method of apportionment established for the District and do not exceed the assessment rates and applicable annual inflationary adjustment previously authorized by the City Council and approved by the property owners in accordance with the provisions of the California State Constitution, Article XIIID.

Section 5 Public Hearing(s): The City Council hereby declares its intention to conduct a Public Hearing annually concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22626* of the Act.

Section 6 Notice: The City Clerk shall give notice of the time and place of the Public Hearing by causing this Resolution to be published once in the local newspaper not less than ten (10) days before the date of the hearing and by posting a copy of this Resolution on the official bulletin board customarily used by the City Council for the posting of notices.

Section 7 Time and Place of Public Hearing: Notice is hereby given that a Public Hearing on these matters will be held by the City Council on **Wednesday, May 21, 2025 at 6:00 p.m.**, or as soon thereafter as feasible in the regular meeting chambers located at 311 Vernon Street, Roseville, California.

RESOLUTION NO. 25-114

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR PRELIMINARY APPROVAL OF THE ENGINEER'S ANNUAL LEVY REPORT FOR THE JOHNSON RANCH LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2025/2026

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, the City Council has, by previous Resolutions, ordered the preparation of an Annual Levy Report (hereafter referred to as the "Engineer's Report") for the district known and designated as the Johnson Ranch Landscaping and Lighting District (hereafter referred to as the "District"), pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California*, *beginning with Section 22500* (hereinafter referred to as the "Act"); and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter "Engineer"), for the purpose of assisting with the establishment of the assessments and to prepare and file an Engineer's Report with the City Clerk in accordance with the Act, and in accordance with the requirements of the California Constitution, Articles XIIIC and XIIID; and,

WHEREAS, there has now been presented to this City Council the Engineer's Report as required by *Chapter 1, Article 4, Section 22566* of said Act; and,

WHEREAS, this City Council has carefully examined and reviewed the Engineer's Report as presented, and is preliminarily satisfied with the District, each and all of the budget items and documents as set forth therein, and is satisfied that the assessments, on a preliminary basis, have been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed within each Zone, as set forth in said Engineer's Report; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE JOHNSON RANCH LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 That the above recitals are all true and correct.

Section 2 That the Engineer's Report, as presented, consists of the following:

a. A Description of Improvements
b. The Annual Budget (Costs and Expenses of Maintenance, Services, Operations and District Administration)
c. The Assessment Roll containing the Fiscal Year 2025/2026 Levy for each Assessor Parcel within the District

Section 3 The Engineer's Report is hereby approved on a preliminary basis and ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection.

Section 4 That the City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation of the Engineer's Report.

APPENDIX B — FY 2025/26 ASSESSMENT ROLL 18

I. OVERVIEW

A. INTRODUCTION

The City of Roseville ("City") annually levies and collects special assessments in order to maintain the improvements in the southeast section of the City of Roseville, known as Johnson Ranch Landscaping and Lighting District ("District"). The District was formed and is levied annual assessments pursuant to the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code (the "1972 Act").

The Engineer's Report ("Report") describes the District, any new annexations, changes to the District, and the proposed assessments for the period of July 1, 2025 through June 30, 2026. The special benefit assessments are based on historical and estimated costs to maintain the District improvements. These assessments, which provide a direct and special benefit to properties within the District, will provide funding for the operation and maintenance of District improvements.

The District consists of five (5) zones of benefit, Zones A, B, C, D and E (individually the "Zone" and collectively the "Zones"). The improvements that benefit properties within each Zone and the costs to maintain and service those improvements are identified and budgeted separately by Zone. The total cost of landscape maintenance within a Zone is equitably spread among only the benefiting parcels.

The word "parcel," for the purposes of this Report, refers to an individual property assigned its own Assessor's Parcel Number ("APN") by the Placer County Assessor's Office. The Placer County Auditor/Controller uses Assessor's Parcel Numbers and specific Tax Code Accounts, to identify on the County's tax roll, properties assessed for special district benefit assessments.

Following approval of the Report, the City Council will, by resolution, order the improvements to be made, if any, and confirm the levy and collection of assessments pursuant to the 1972 Act. The assessment rates and method of apportionment described in this Report as approved or modified by the City Council define the assessments to be applied to each parcel within the District and respective Zones for Fiscal Year ("FY") 2025/26. The assessments as approved will be submitted to the Placer County Auditor/Controller to be included on the FY 2025/26 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the

resubmitted parcel or parcels shall be based on the method of apportionment and assessment rates approved by the City Council.

B. COMPLIANCE WITH CURRENT LEGISLATION

All assessments described in this Report and approved by the City Council are prepared in accordance with the 1972 Act and are in compliance with the substantive and procedural requirements of the California State Constitution Articles XIIIC and XIIID ("Articles XIIIC and XIIID") and the provisions of the Proposition 218 Omnibus Implementation Act [Government Code Section 53750 and following] (the "Implementation Act"). Articles XIIIC and XIIID and the Implementation Act collectively are hereinafter referred to as "Proposition 218".

Pursuant to the California Constitution Article XIIID, Section 5, certain existing assessments are exempt from the substantive and procedural requirements of Article XIIID Section 4 and property owner balloting for the assessments is not required until such time that the assessments are increased. Specifically, the City determined that all improvements and the annual assessments originally established for the District were part of the conditions of property development and approved by the original property owner (developer). As such, pursuant to Article XIIID Section 5(b), all the property owners approved the existing District assessments at the time the assessments were created (originally imposed pursuant to a 100% landowner petition). Therefore, the pre-existing assessment amounts (the maximum assessment rates of Zones A, B, C & D identified in this Report) are exempt from the procedural requirements of Article XIIID Section 4, provided the assessments are not increased above these previously approved maximum assessment rates.

In Fiscal Year 1999/00, the City initiated and conducted property owner protest ballot proceedings in accordance with Article XIIID for Zone E in order to increase the assessment to cover additional costs for services. The proposed assessment increase presented to property owners included an annual inflationary factor of 3%. In Fiscal Year 1999/00 the maximum assessment rate was $623.10 per acre. At the conclusion of the Public Hearing, all property owner ballots returned were tabulated and the City determined that a majority protest did not exist. The City Council then approved the increased assessment and the inflationary factor for maintaining the improvements within the District.

The District and all Zones therein have been formed pursuant to the 1972 Act. Pursuant to the 1972 Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments, to review the Engineer's Annual Levy Report prior to approving the annual assessments to be levied on the County tax rolls. The assessments described in this Report have been prepared in accordance with the Act.

C. DISTRICT BOUNDARIES

The District lies within a portion of the Southeast Roseville Specific Plan, which is located in the southeast section of the City of Roseville. The District is generally located east of I-80 on the south side of Douglas Boulevard. See Appendix A for a rendering of the District boundary map.

D. IMPROVEMENTS AUTHORIZED BY THE 1972 ACT

As applicable or may be applicable to a proposed District, the 1972 Act defines improvements to mean one or any combination of the following:

- The installation or planting of landscaping.
- The installation or construction of statuary, fountains, and other ornamental structures and facilities.
- The installation or construction of public lighting facilities.
- The installation or construction of any facilities which are appurtenant to any of the foregoing, or which are necessary or convenient for the maintenance or servicing thereof, including, but not limited to, grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities.
- The maintenance or servicing, or both, of any of the foregoing.
- The acquisition of any existing improvement otherwise authorized pursuant to this section.

Incidental expenses associated with the improvements including, but not limited to:

- The cost of preparation of the report, including plans, specifications, estimates, diagram, and assessment;
- The costs of printing, advertising, and the publishing, posting, and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;
- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
- Any expenses incidental to the issuance of bonds or notes pursuant to Section 22662.5.
- Costs associated with any elections held for the approval of a new or increased assessment.

The 1972 Act defines "Maintain" or "maintenance" to mean furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement, including:

- Repair, removal, or replacement of all or any part of any improvement.

- Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury.
- The removal of trimmings, rubbish, debris, and other solid waste.
- The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Furthermore, the 1972 Act specifies that where the cost of improvements (other than maintenance and operations) is greater than can be conveniently raised from a single annual assessment, an assessment to be levied and collected in annual installments. In that event, the governing body may choose to do any of the following:

- Provide for the accumulation of the moneys in an improvement fund until there are sufficient moneys to pay all or part of the cost of the improvements.
- Provide for a temporary advance to the improvement fund from any available and unencumbered funds of the local agency to pay all or part of the cost of the improvements and collect those advanced moneys from the annual installments collected through the assessments.
- Borrow an amount necessary to finance the estimated cost of the proposed improvements. The amount borrowed, including amounts for bonds issued to finance the estimated cost of the proposed improvements.

E. DESCRIPTION OF THE IMPROVEMENTS AND BENEFITS

Zones A, B and C

Zones A, B and C of the District, by special benefit assessments, provide annual funding for the continual maintenance of certain landscaping, open space areas; including floodway and stream course areas as well as the maintenance of bike trails. The specific locations of the floodways, stream courses and areas adjacent thereto to be maintained are described below:

- Parcel 70 - Floodway that feeds Cirby Creek and is located between Douglas Boulevard and Eureka Road. (7.76 acres) - Zone C
- Parcel 71 - Strap Ravine floodway between Douglas Boulevard and East Roseville Parkway. (3.38 acres) - Zone A
- Parcel 72 - Floodway between Roseville Parkway east to commercial development. (8.98 acres) - Zone C
- Parcel 73 - Recreational floodway in Strap Ravine between East Roseville Parkway and Sierra College Boulevard. (16.11 acres) - Zone A
- Parcels 74 & 75 - Recreational floodway that eventually feeds Linda Creek, beginning at Sierra College Boulevard then east to the Roseville City limits. (6.2 acres and 10.8 acres, respectively) - Zone B

Zone D

Zone D of the District, by special benefit assessments, provides annual funding for the costs of mitigation monitoring and costs to maintain landscaped open space areas within certain wetland / riparian area(s) to comply with a Section 404 Permit. The issuance of this Section 404 permit was a condition of the development of the Johnson Ranch East Project, which represents the parcels comprising Zone D.

Zone E

Zone E of the District, by special benefit assessments, provides annual funding for the maintenance of certain landscaping, bike trails and open space areas that include floodway and stream course areas and the costs of mitigation monitoring to comply with both a Section 404 Permit (Federal) and a 1603 Permit (State). The issuance of these permits was a condition of the development of Parcel 9. The specific locations of the floodway and stream courses to be maintained are described as:

- Parcel 76 - Streambed and floodway area located at Cirby Creek from the southwest side of Eureka Boulevard to the end of the Coker Development. (2.79 acres)

II. METHOD OF APPORTIONMENT

A. GENERAL

The Act permits the establishment of assessment districts by agencies for the purpose of providing certain public improvements which include the construction, maintenance and servicing of public lights, landscaping, and appurtenant facilities. The Act further requires that the cost of these improvements be levied according to benefit rather than assessed value:

> *"The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements."*

The formula used for calculating assessments in each Zone of the District therefore reflects the composition of the parcels, and the improvements and services provided, to fairly apportion the costs based on estimated benefit to each parcel.

B. PROPOSITION 218 BENEFIT ANALYSIS

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIIID addresses several key criteria for the levy of assessments regarding Zone E, notably:

Article XIIID Section 2d defines District as follows:

"District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service;"

Article XIIID Section 2i defines Special Benefit as follows:

"Special benefit" means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute "special benefit."

Article XIIID Section 4a defines proportional special benefit assessments as follows:

"An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be

imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel."

The method of apportionment (method of assessment) set forth in the Report is based on the premise that each assessed property receives special benefits from the improvements within the District, and the assessment obligation for each parcel reflects that parcel's proportional special benefits as compared to other properties that receive special benefits.

C. DESCRIPTION OF METHOD OF APPORTIONMENT

Pursuant to the Act, the costs of the District must be spread to each parcel based upon a benefit formula. Each assessable parcel in the District receives a direct and special benefit from the improvements in the District. The formula used to arrive at each parcel's annual levy amount in each zone is as follows:

Zones A and B

Thirty percent (30%) of the total budgeted costs of Zones A & B are to be levied to floodway Parcel 82 (APN 458-020-001). The remaining Seventy percent (70%) of costs are then allocated equally on a per acre basis to all assessable parcels within these Zones. Acreage of common area parcels shall be apportioned to the remaining assessable parcels of a subdivision and/or parcel split(s) related to the creation of the common area parcel(s).

Zones C, D and E

The budgeted costs of Zones C, D and E are to be allocated equally on a per acre basis to all assessable parcels within each respective Zone. Acreage of common area parcels shall be apportioned to the remaining assessable parcels of a subdivision and/or parcel split(s) related to the creation of the common area parcel(s).

D. INFLATIONARY ADJUSTMENT FACTOR

For Zone E only, if the proposed assessment rate increases over the prior fiscal year's maximum assessment rate by a percentage no greater than the 3%, then the proposed assessment rate is not considered an increase.

III. DISTRICT BUDGET

A. FY 2025/26 BUDGET

DESCRIPTION	ZONE A [1] Fund 2001	ZONE B [1] Fund 2002	ZONE C Fund 2003	ZONE D Fund 2004	ZONE E Fund 2005

D. DESCRIPTION OF BUDGET ITEMS

Description of the terms used in the preceding Budget, Assessment Rates and Fund Balance tables are listed below:

BUDGET:

DIRECT COSTS

Contract Maintenance - Open Space – Includes all regularly scheduled contract labor, materials, supplies, and equipment required to properly maintain and ensure the satisfactory condition of all open space landscaping, irrigation, drainage systems, lighting, floodplain improvements and appurtenant facilities (the "improvements").

Maintenance - Bike Trails - Costs associated with the resurfacing of the Bike trail. If zero, this line item will not be shown in the budget.

Utilities - The furnishing of water and electricity required for the operation and maintenance of the improvements. If zero, this line item will not be shown in the budget.

Mitigation Monitoring – Costs associated with monitoring certain impacts to riparian areas in or near the District under the terms of a Section 404 or 1603 permit. If zero, this line item will not be shown in the budget.

Water Hyacinth Eradication – Costs associated with the eradication of the Water Hyacinth plant in the creek beds. If zero, this line item will not be shown in the budget.

Rehab Reserve Project Expenditures – Expected costs for installation, replacement, or planned upgrades of District improvements for the current year that were previously funded or accumulated in the Rehabilitation Reserve. The Rehabilitation Reserve is used to accumulate funds for costs associated with the future rehabilitation or replacement of District improvements that cannot be conveniently raised from a single year's assessment. If zero, this line item may not be shown in the budget.

ADMINISTRATION COSTS

City Administration – Estimated costs incurred by the City Finance Department and other Departments in preparing the annual budget for the Engineer's Report, together with other financial information required to determine the annual assessment. These costs would also include the preparation, posting and publishing of public notices required for City Council action relating to the District, as well as costs to perform legal review of documents.

Contract Administration – Park's Dept – Estimated costs of Park and Recreation Department staff to coordinate and oversee the maintenance contracts and overall repair and maintenance of the District. This amount also includes the cost of the Department's estimates and analysis of certain budget items, estimated costs and useful lives of certain District Improvements.

Contract Administration – Open Space – Estimated costs of City staff to coordinate and oversee the maintenance contracts and non-contract maintenance of the open space areas of the District. This amount also includes the cost of the Department's estimates and analysis of certain budget items.

County Auditor Fees - A fee of 1% of the total levy amount that is charged to the District by the County for placing assessments on property tax bills.

Consulting and Professional Services – Includes the costs and expenses of contracting with various professionals to provide legal, engineering and district administration services directly related to the District, including the calculation of the annual assessment amounts and the preparation of the Engineer's' Report.

Public Hearing Publishing Costs –Includes the out-of-pocket costs to publish public notices required for City Council action relating to the District.

Total Direct and Administration Costs – The total expected costs of the District.

BUDGET ADJUSTMENTS

Replenishment/(Use) of Operating Reserve – A "Replenishment" increases the levy in order to replenish the Operating Reserve. On the other hand, a "Use" of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the budget. Further information regarding the function of the Operating Reserve is provided under "FUND BALANCE INFORMATION" in the following pages of this Section.

Contribution for / (Use of) Rehab Reserve — A "Contribution" increases the levy in order to generate funding for the Rehabilitation Reserve. This reserve allows for the accumulation of funds for possible rehabilitation projects or replacements in future years. On the other hand, a "Use of" of the Rehabilitation Reserve provides current year funding of rehabilitation projects or replacements from available funds within the Rehabilitation Reserve. If zero, this line item may not be shown in the budget. Further information regarding the function of the Rehabilitation Reserve is provided under "FUND BALANCE INFORMATION" in the following pages of this Section.

Rounding Adjustment – The necessary rounding adjustment(s) due to limitations of the County property tax system that requires even penny levy amounts to be placed on the secured tax roll.

BALANCE TO LEVY - This is the total amount to be levied and collected through assessments for the current fiscal year for each Zone. The Balance to Levy represents the sum of the total District costs together with applicable adjustments related to the Reserve Fund replenishments or reductions and/or Capital Improvement Fund activity.

Parcel 82 Levy Recap – A recap of the cost breakdown between certain parcels. Thirty percent (30%) of the total budgeted costs of Zones A & B are to be levied to floodway Parcel 82 (APN 458-020-001). 70% of costs are to be assessed to the remaining parcels.

ASSESSMENT RATES:

Number of Assessable Parcels - The total number of parcels within each Unit that are expected to be assessed. Non-assessable lots or parcels include government-owned land, public utility-owned property, land principally encumbered by public rights-of-way or easements, common areas, and/or parcels within the boundaries of the District that currently do not benefit from the improvements due possibly to development restrictions.

Total Assessable Acres – Non-Parcel 82 Properties - The total number of acres within Zones A and B that are to be assessed on an acreage basis for the current fiscal year; this acreage excludes Parcel 82.

Applied Assessment Rates - The assessment rates to be applied to the non-exempt parcels within the District for the current fiscal year.

Maximum Assessment Rates - The maximum assessment rates for the current fiscal year.

Maximum Potential Assessment – The total amount that is expected to be assessed against all parcels within the District for the Current Fiscal Year.

FUND BALANCE INFORMATION:

OPERATING RESERVE

Beginning Operating Reserve Balance 7-1-2025 (est.) - The anticipated beginning balance of cash and receivables net of any unpaid prior year obligations for each Zone. These beginning balances shall be used to fund each Zone's expenditures from July 1, 2025 to December 31, 2025, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's fiscal year and the receipt of the collections from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

Replenish from FY 2025/26 Levy – This amount is added to the FY 2025/26 levy in order to replenish the Operating Reserve. Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve balance shall be sufficiently funded to provide for expenditures from the period of July 1, 2025 (the beginning of the Fiscal Year) through December 31, 2025. If zero, this line item may not be shown in the budget.

Use for FY 2025/26 Expenses – The amount of the Operating Reserve to be used to fund FY 2025/26 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve Balance to an amount no greater than the expected District costs for the period of July 1, 2025 (the beginning of the Fiscal Year) through December 31, 2025. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Rehab Reserve — The amount of Operating Reserve monies to be transferred to or from the Rehabilitation Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Operating Reserve Balance 6-30-2026 (est.) - This amount represents the anticipated Operating Reserve balance/(deficit) for each Zone as of June 30, 2026. The size of each Zone's Operating Reserve is limited by Streets and Highways Code 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance, service, and incidental expenses from the first day of the fiscal year (July 1) to the date that the Agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each Zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

REHABILITATION RESERVE

Beginning Rehab Reserve Balance 7-1-2025 (est.) — The projected balance of funds in the Rehabilitation Reserve as of July 1, 2025. Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Collect from FY 2025/26 Levy — This amount is added to the FY 2025/26 levy to accumulate funding of future year rehabilitation projects, replacements, restorations, or upgrades of District improvements. If zero, this line item may not be shown in the budget.

Use for FY 2025/26 Rehab Projects – The amount of Rehabilitation Reserve monies expected to be transferred out of the Rehabilitation Reserve to fund the costs of installation, replacement, or planned upgrades of District improvements for the current year. If zero, this line item may not be shown in the budget.

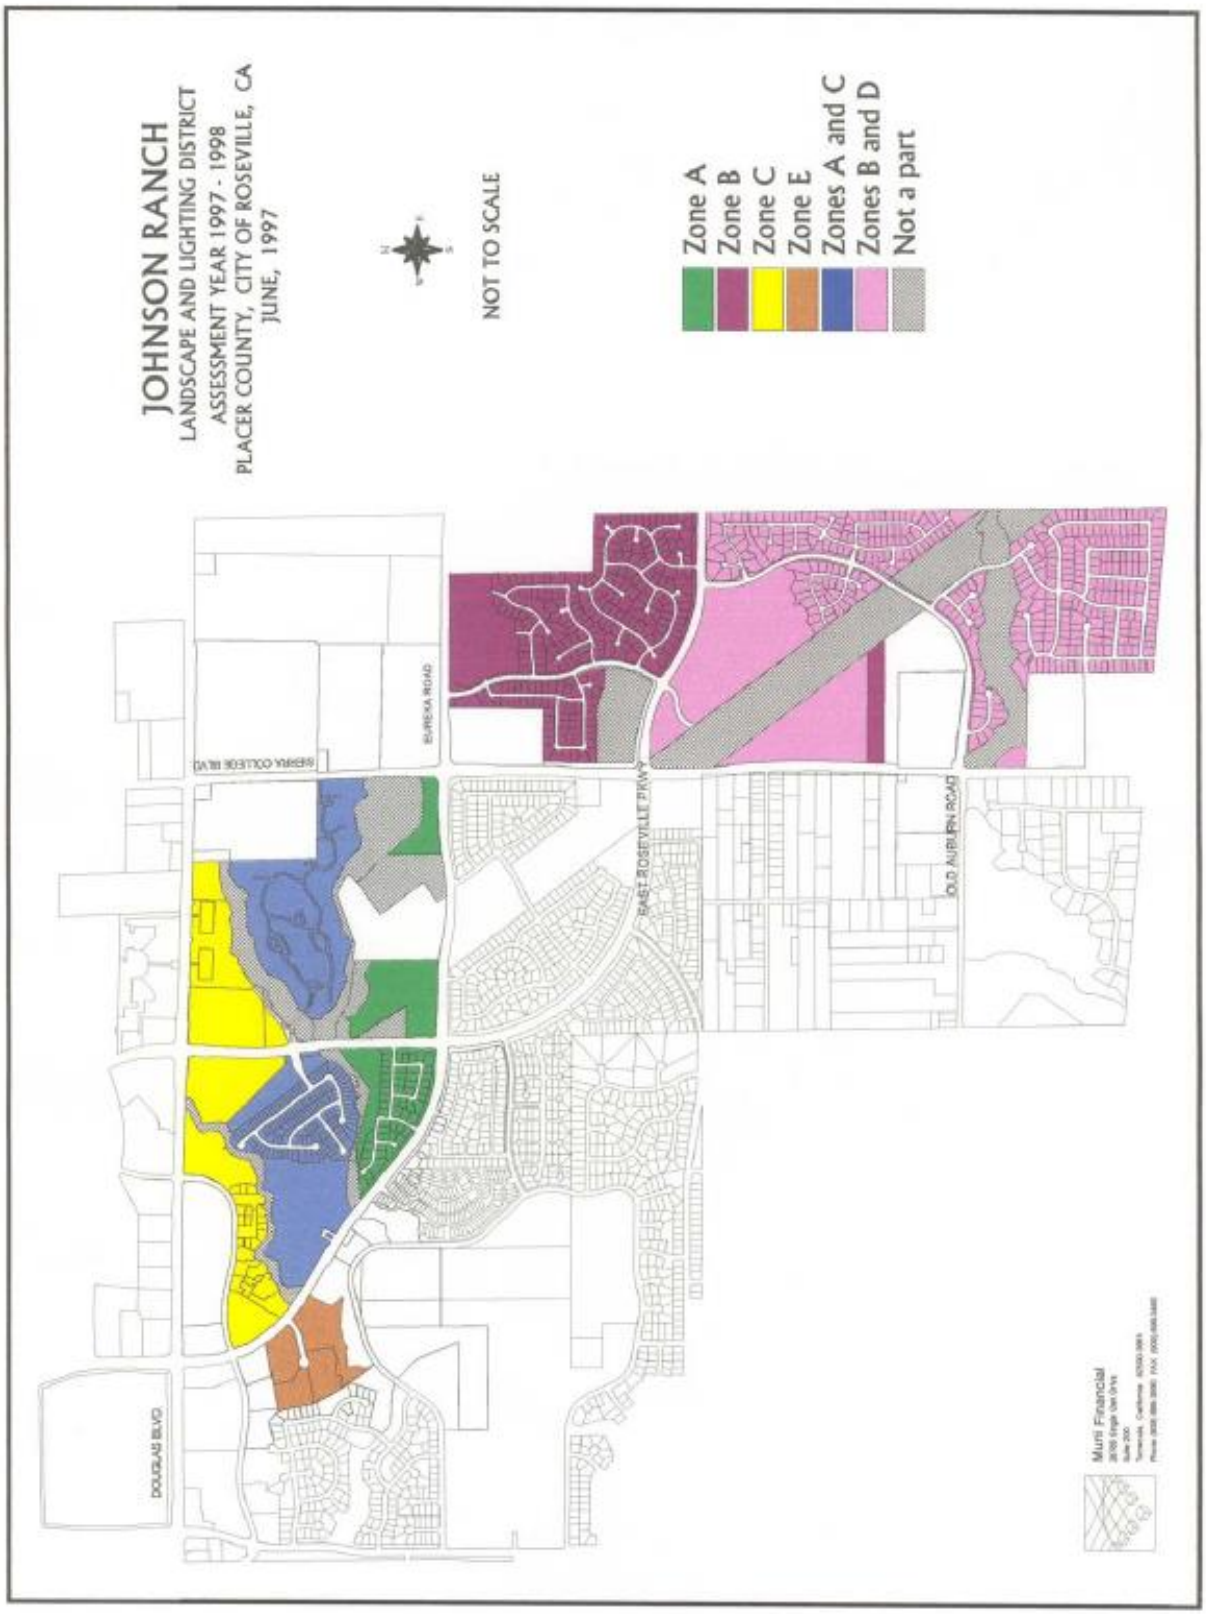
Transfer from/(to) the Operating Reserve — The amount of Rehabilitation Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same Zone's Operating Reserve, at the discretion of the Parks and Recreation Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Rehab Reserve Balance 6-30-2026 (est.) - The projected balance of funds in the Rehabilitation Reserve as of June 30, 2026. These funds shall be used to provide for future year rehabilitation projects, replacements, restorations, or upgrades of District improvements which cannot be conveniently raised from a single year's assessment.

E. REHABILITATION RESERVE – CAPITAL IMPROVEMENT PLAN

Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

The Report provides a five-year Capital Improvement Plan ("CIP") which shows projected expenditures by Zone related to the rehabilitation, restoration and/or replacement of District improvements, and other allowable costs. The Current Fiscal Year CIP is shown in the preceding Budget Section A. The projected CIP costs for the remaining four years are shown in the table below.



Description	FY 2026-27	FY 2027-28	FY 2028-29	FY 2029-30	4 Year Total
Zone A - General open space, creek rehab	$375	$375	$342	$600	$1,692
Zone B - General open space, creek rehab	$276	$280	$280	$280	$1,116
Zone D - General open space, creek rehab	$75	$50	$89	$50	$264
Zone E - General open space, creek rehab	$150	$150	$150	$105	$555

Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the District or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same Zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements.

APPENDIX A – DISTRICT BOUNDARY MAP

The Assessment Diagrams for the District have previously been submitted to the Clerk of the City in the format required under the Act and are, by reference, made part of this Report. The boundary maps are available for inspection at the office of the City Clerk during normal business hours.

For general reference purposes, a one-page rendering of the District's Boundaries is presented herein.

APPENDIX B — FY 2025/26 ASSESSMENT ROLL

Parcel identification, for each lot or parcel within the District, shall be the parcel as shown on the Placer County Assessor's map for the year in which this Report is prepared.

A listing of parcels to be assessed within this District, along with the proposed assessment amounts, may be submitted to the City Clerk, under a separate cover, and by reference is made part of this Report.

Non-assessable lots or parcels may include areas of public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas and rights-of-way, including public greenbelts and parkways; utility rights-of-way; small parcels vacated by the County, bifurcated lots, and other property that cannot be developed, excepting common area parcels. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempt from assessment.

At the conclusion of the public hearing for the District and the proposed assessments, approval of the Report (as submitted or as modified) confirms the method of apportionment and the assessment rate to be levied against each eligible parcel and thereby constitutes the approved levy and collection of assessments for FY 2025/26. The listing of parcels and the amount of assessment to be levied shall be submitted to the County Auditor/Controller and included on the FY 2025/26 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved in this Report. Therefore, if a single parcel has changed to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

RESOLUTION NO. 25-115

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, INITIATING PROCEEDINGS FOR THE LEVY OF ASSESSMENTS FOR THE NORTH CENTRAL ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2025/2026, PURSUANT TO THE PROVISIONS OF PART 2 OF DIVISION 15 OF THE CALIFORNIA STREETS AND HIGHWAYS CODE

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the North Central Roseville Specific Plan Landscaping and Lighting District and annexed territory therein (hereafter referred to as the "District") pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the "Act"), that provides for the levy and collection of assessments by the County of Placer for the City of Roseville to pay for the maintenance and services of street lighting, landscaping, and all appurtenant facilities and operations related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter "Engineer") for the purpose of assisting with the establishment of the assessments, the annexation of territory, and to prepare and file an Engineer's Annual Levy Report (hereinafter referred to as the "Engineer's Report") with the City Clerk in accordance with the Act, and in accordance with the California Constitution, Articles XIIIC and XIIID;

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE NORTH CENTRAL ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 Engineer's Report: The City Council hereby orders the Engineer to prepare and file with the City Clerk the Engineer's Report concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22622* of the Act.

Section 2 Proposed improvements and any substantial changes in existing improvements: The District improvements include: the maintenance and operation of and the furnishing of services, materials and/or improvements for certain areas, including landscape, lighting, park, open space, parkway, slope and median areas together with trees, shrubs, turf and other ornamental vegetation, drainage and irrigation systems, recreation equipment, bike paths, pedestrian trails, walls and fences, and other public improvements within the street right-of-way areas and other appurtenant facilities as further described in the Engineer's Report. The Engineer's Report also describes all new improvements or substantial changes in existing improvements.

RESOLUTION NO. 25-116

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, DECLARING ITS INTENTION TO LEVY ANNUAL ASSESSMENTS FOR THE NORTH CENTRAL ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2025/2026

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the North Central Roseville Specific Plan Landscaping and Lighting District (hereafter referred to as the "District"), and initiated proceedings for Fiscal Year 2025/2026, pursuant to the provisions of the *Landscaping and Lighting Act of 1972*, *Part 2 of Division 15 of the Streets and Highways Code of California*, *beginning with Section 22500* (hereafter referred to as the "Act") that provides for the levy and collection of assessments by the County of Placer for the City of Roseville to pay for the maintenance, operation and servicing of all improvements and facilities related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services for the purpose of assisting with the Annual Levy of the District, and to prepare and file an Engineer's Annual Levy Report (hereinafter referred to as the "Engineer's Report") with the City Clerk in accordance with the Act; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE NORTH CENTRAL ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, PURSUANT TO *CHAPTER 3, SECTION 22624* OF THE ACT, AS FOLLOWS:

Section 1 Intention: The City Council hereby declares that it is its intention to seek the Annual Levy of the District pursuant to the Act, over and including the land within the District boundary, and to levy and collect assessments on all such land to pay for the annual costs of the improvements.

Section 2 Proposed improvements and any substantial changes in existing improvements: The District improvements include: the maintenance and operation of and the furnishing of services, materials or improvements for certain areas, including landscape, lighting, park, open space, parkway, slope and median areas together with trees, shrubs, turf and other ornamental vegetation, drainage and irrigation systems, recreation equipment, bike paths, pedestrian trails, walls and fences, and other public improvements within the street right-of-way areas and other appurtenant facilities as further described in the Engineer's Report. The Engineer's Report also describes all new improvements or substantial changes in existing improvements.

Section 3 Boundaries and Designation: The boundaries of the District are described as the boundaries previously defined in the formation documents of the original District and any annexations thereto. The District generally includes the parcels within the area known as the North Central Roseville Specific Plan. The District is known and designated as

"North Central Roseville Specific Plan Landscaping and Lighting District"

Section 4 Proposed Assessment Amounts: The proposed assessments are outlined in the Engineer's Report. District Assessments are calculated in accordance with the method of apportionment established for the District and do not exceed the assessment rates and annual inflationary adjustment previously authorized by the City Council and approved by the property owners in accordance with the provisions of the California State Constitution, Article XIIID.

Section 5 Public Hearing(s): The City Council hereby declares its intention to conduct a Public Hearing annually concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22626* of the Act.

Section 6 Notice: The City Clerk shall give notice of the time and place of the Public Hearing by causing this Resolution to be published once in the local newspaper not less than ten (10) days before the date of the hearing and by posting a copy of this Resolution on the official bulletin board customarily used by the City Council for the posting of notices.

Section 7 Time and Place of Public Hearing: Notice is hereby given that a Public Hearing on these matters will be held by the City Council on **Wednesday, May 21, 2025 at 6:00 p.m.**, or as soon thereafter as feasible in the regular meeting chambers located at 311 Vernon Street, Roseville, California.

RESOLUTION NO. 25-117

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR PRELIMINARY APPROVAL OF THE ENGINEER'S ANNUAL LEVY REPORT FOR THE NORTH CENTRAL ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2025/2026

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, the City Council has, by previous Resolutions, ordered the preparation of an Engineer's Annual Levy Report (hereafter referred to as the "Engineer's Report") for the district known and designated as the North Central Roseville Specific Plan Landscaping and Lighting District (hereafter referred to as the "District"), pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California*, *beginning with Section 22500* (hereinafter referred to as the "Act"); and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter "Engineer"), for the purpose of assisting with the establishment of the assessments and to prepare and file an Engineer's Report with the City Clerk in accordance with the Act, and in accordance with the requirements of the California Constitution, Articles XIIIC and XIIID; and,

WHEREAS, there has now been presented to this City Council the Engineer's Report as required by *Chapter 1, Article 4, Section 22566* of said Act; and,

WHEREAS, this City Council has carefully examined and reviewed the Engineer's Report as presented, and is preliminarily satisfied with the District, each and all of the budget items and documents as set forth therein, and is satisfied that the assessments, on a preliminary basis, have been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed within each Zone, as set forth in said Engineer's Report; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE NORTH CENTRAL ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 That the above recitals are all true and correct.

Section 2 That the Engineer's Report, as presented, consists of the following:

a. A Description of Improvements
b. The Annual Budget (Costs and Expenses of Maintenance, Services, Operations and District Administration)
c. The Assessment Roll containing the Fiscal Year 2025/2026 Levy for each Assessor Parcel within the District

Section 3 The Engineer's Report is hereby approved on a preliminary basis and ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection.

Section 4 That the City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation of the Engineer's Report.

RESOLUTION NO. 25-117

PASSED, APPROVED, AND ADOPTED THIS_____day of_____, 2025.

ENGINEER'S REPORT AFFIDAVIT

Establishment of Annual Rates and Charges for the:

North Central Roseville Specific Plan
Landscaping and Lighting District

City of Roseville

Placer County, State of California

This Report describes the District and any relevant zones therein, including the improvements, budgets, parcels and assessments to be levied for Fiscal Year 2025/26 as they existed at the time of the passage of the Resolution of Intention. Reference is hereby made to the Placer County Assessor's maps for a detailed description of the lines and dimensions of parcels within the District. The undersigned respectfully submits the enclosed Report as directed by the City Council.

APPENDIX B — FY 2025/26 ASSESSMENT ROLL 24

I. OVERVIEW

A. INTRODUCTION

The City of Roseville ("City") annually levies and collects special assessments in order to maintain the improvements within the existing North Central Roseville Specific Plan Landscaping and Lighting District ("District") within the City. The District was formed in 1990. The District was formed and is levied annual assessments pursuant to the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code (the "Act").

This Engineer's Annual Levy Report for Fiscal Year 2025/26 ("Report") describes the District, any annexations, changes to the District, and the proposed assessments for the period of July 1, 2025 through June 30, 2026. The maintenance, operation and servicing of the improvements associated with specific areas of the City that provide a special benefit to the properties in that area are identified as Zones. The costs of the improvements and services are identified and budgeted separately for each Zone and each parcel within a Zone is assessed proportionately for only those improvements and services that are a direct and special benefit to the properties within the Zone. The budgets and assessments are based on the estimated cost (considering historical costs) to maintain the District improvements that provide a direct and special benefit to properties within the District.

The District consists of four landscaping benefit Zones:

- District Wide Benefit Zone
- Local Benefit Zone
- Zone F
- Zone G

In 2003, the City initiated and conducted property owner protest ballot proceedings, in accordance with the Act and Proposition 218, for the territory now known as Zones F & G. After the results of the ballots were tabulated, the City determined that a majority protest did not exist. The City then approved the annexation of Zones F and G, the maximum assessment rates, and annual inflationary adjustment factor.

In 2004, the City initiated and conducted property owner protest ballot proceedings, in accordance with the Act and Proposition 218, to reengineer Zones A, B, C, D & E and approve the maximum assessment rates and annual inflationary adjustment factor. After the results of the ballots were tabulated, the City determined that a majority protest did not exist. The City then approved the Engineer's Annual Levy Report for FY 2004/05, which reconstituted the reengineered zones into the respective District Wide Benefit Zone or Local Benefit Zone.

Zones A, B, C, D and E were reengineered in order to more accurately identify the Zones and areas of special benefit within this portion of the District. These zones were combined into two new Zones based primarily on level of service, similarity of improvement types, and the proximity to improvements.

The word "parcel," for the purposes of this Report, refers to an individual property assigned its own Assessor's Parcel Number ("APN") by the Placer County Assessor's Office. The Placer County Auditor/Controller uses Assessor's Parcel Numbers and specific Tax Code Accounts, to identify on the County's tax roll, properties assessed for special district benefit assessments.

Following approval of the Report, the City Council will by resolution, order the improvements to be made, if any, and confirm the levy and collection of assessments pursuant to the Act. The assessment rates and method of apportionment described in this Report as approved or modified by the City Council define the assessments to be applied to each parcel within the District and respective Zones for Fiscal Year ("FY") 2025/26. The assessments as approved will be submitted to the Placer County Auditor/Controller to be included on the FY 2025/26 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rates approved by the City Council.

B. COMPLIANCE WITH CURRENT LEGISLATION

All assessments described in this Report and approved by the City Council are prepared in accordance with the Act and are in compliance with the substantive and procedural requirements of the California State Constitution Articles XIIIC and XIIID ("Articles XIIIC and XIIID") and the provisions of the Proposition 218 Omnibus Implementation Act [Government Code Section 53750 and following] (the "Implementation Act"). Articles XIIIC and XIIID and the Implementation Act collectively are hereinafter referred to as "Proposition 218".

In compliance with the provisions of Proposition 218, property owner ballot proceedings have been conducted for all Zones within the District; such proceedings approved and confirmed the Maximum Assessments and the Inflationary Adjustment Factor as described in this Report.

The District and all Zones therein have been formed pursuant to the Act. Pursuant to the Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments, to review the Engineer's Annual Levy Report prior to approving the annual assessments to be levied on the County tax rolls.

C. DESCRIPTION OF DISTRICT BOUNDARIES

The District is located north of downtown Roseville between Interstate 80 and Washington Boulevard and generally encompasses the area within the North Central Roseville Specific Plan ("NCRSP") and two small residential developments in close proximity to the NCRSP near the corner of Diamond Oaks Road and Washington Boulevard. See Appendix A for District boundary map.

District Wide Zone This Zone includes all assessable property within the District with the exception of Zone F and Zone G.

Local Benefit Zone This Zone includes all single-family residential property within the District with the exception of Zone F and Zone G.

Zone F This Zone, which comprises the Diamond Oaks Unit No. 10 development, was created on January 8, 2003 through Resolution 03-2 and was first levied in FY 2003/04. Zone F was comprised of Assessor Parcel Number ("APN") 015-020-040 prior to being subdivided into 39 residential lots.

Zone G This Zone, which comprises the Diamond Oaks Unit No. 14 development, was created on May 28, 2003 through Resolution 03-220 and was first levied in FY 2003/04. Zone G was comprised of APNs 017-041-034 & 015-020-006 prior to being subdivided into 76 residential lots and 1 non-residential parcel.

D. IMPROVEMENTS AUTHORIZED BY THE 1972 ACT

As applicable or may be applicable to a proposed District, the Act defines improvements to mean one or any combination of the following:

- The installation or planting of landscaping.
- The installation or construction of statuary, fountains, and other ornamental structures and facilities.
- The installation or construction of public lighting facilities.
- The installation or construction of any facilities which are appurtenant to any of the foregoing or which are necessary or convenient for the maintenance or servicing thereof, including, but not limited to, grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities.
- The maintenance or servicing, or both, of any of the foregoing.
- The acquisition of any existing improvement otherwise authorized pursuant to this section.

Incidental expenses associated with the improvements including, but not limited to:

- The cost of preparation of the report, including plans, specifications, estimates, diagram, and assessment;
- The costs of printing, advertising, and the publishing, posting, and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;
- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
- Any expenses incidental to the issuance of bonds or notes pursuant to Section 22662.5.
- Costs associated with any elections held for the approval of a new or increased assessment.

The 1972 Act defines "Maintain" or "maintenance" to mean furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement, including:

- Repair, removal, or replacement of all or any part of any improvement.
- Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury.
- The removal of trimmings, rubbish, debris, and other solid waste.
- The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Furthermore, the 1972 Act specifies that where the cost of improvements (other than maintenance and operations) is greater than can be conveniently raised from a single annual assessment, an assessment to be levied and collected in annual installments. In that event, the governing body may choose to do any of the following:

- Provide for the accumulation of the moneys in an improvement fund until there are sufficient moneys to pay all or part of the cost of the improvements.
- Provide for a temporary advance to the improvement fund from any available and unencumbered funds of the local agency to pay all or part of the cost of the improvements and collect those advanced moneys from the annual installments collected through the assessments.
- Borrow an amount necessary to finance the estimated cost of the proposed improvements. The amount borrowed, including amounts for bonds issued to finance the estimated cost of the proposed improvements.

E. DESCRIPTION OF THE IMPROVEMENTS AND MAINTENANCE

The District provides and ensures the continued maintenance, servicing, administration and operation of various landscaping and lighting improvements, and associated appurtenances that benefit parcels within the District. Services provided include all necessary service, operations, administration, and maintenance required to keep the improvements in a healthy, vigorous, and satisfactory condition.

Specific improvements include all ground cover, turf, shrubs, trees, gardens, play areas and play equipment, picnic areas, bike paths, pedestrian trails, walls and fences, park maintenance facilities, irrigation and drainage systems, graffiti removal, and associated appurtenances. Improvements in each Zone include:

District Wide Zone This Zone provides for the maintenance of landscaping, fences, sound walls and other improvements within the arterial parkway right of ways, also described as scenic corridors, including but not limited to Roseville Parkway, Pleasant Grove Boulevard, Harding Boulevard and the east side of Washington Boulevard, pedestrian, and bike pathways.

Local Benefit Zone This Zone provides for the maintenance of landscaping and other improvements within the local street right of ways. This Zone is primarily a combination of the old Zone C and Zone D, which provided similar maintenance.

Zone F This Zone provides for the maintenance of parkway and perimeter landscaping and block wall adjacent to the development on the west side of Diamond Oaks Road; Parkway and perimeter landscaping, bike trails, block wall and wood fence adjacent to the development on the east side of Washington Boulevard; Open Space designated as Lot “B”, and; Landscaping within Lot “C”, “E” and “F” within the Diamond Oaks Unit No. 10 project.

Zone G This Zone provides for the maintenance of parkway and perimeter landscaping, bike path and masonry sound wall adjacent to the development on the south side of Pleasant Grove Boulevard; maintenance of parkway and perimeter landscaping, bike path and masonry sound wall adjacent to the development on the west side of Washington Boulevard from Pleasant Grove Boulevard to Emerald Oak Road; maintenance of the masonry sound wall on the western perimeter of the development; installation and maintenance of perimeter landscaping on the west side of the development located on Open Space Parcel C between

Emerald Oak Road and the masonry sound wall adjacent to the railroad right of way; and maintenance of Open Space, cobble swale (Lot “B”) and post and cable fencing for Lots “A”, “B”, and “C” within the Diamond Oaks Unit No. 14 project.

All assessable parcels identified as being within each Zone share in both the cost and the benefits of the improvements. The costs associated with the improvements are equitably spread among all benefiting parcels within each Zone. Only parcels that receive direct and special benefit from the improvements are assessed, and each parcel is assessed in proportion to the estimated benefit received. The funds collected from the assessments of each Zone are to be expended only for the services and operations within each respective Zone.

II. METHOD OF APPORTIONMENT

A. GENERAL

The Act permits the establishment of assessment districts by agencies for the purpose of providing certain public improvements which include the construction, maintenance and servicing of public lights, landscaping, and appurtenant facilities. The Act further requires that the cost of these improvements be levied according to benefit rather than assessed value:

> *"The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements."*

The formula used for calculating assessments in each Zone of the District therefore reflects the composition of the parcels, and the improvements and services provided, to fairly apportion the costs based on estimated benefit to each parcel.

B. SPECIAL BENEFIT ANALYSIS

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIIID addresses several key criteria for the levy of assessments, notably:

Article XIIID Section 2(d) defines District as follows:

"District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service;"

Article XIIID Section 2(i) defines Special Benefit as follows:

"Special benefit" means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute "special benefit."

Article XIIID Section 4(a) defines proportional special benefit assessments as follows:

"An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be

imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel."

This District was formed to establish and provide for the improvements that enhance the presentation of the surrounding properties and developments. These improvements will directly benefit the parcels to be assessed within the District. The assessments and method of apportionment is based on the premise that the assessments will be used to construct and install landscape and lighting improvements within the District as well as provide for the annual maintenance of those improvements, and the assessment revenues generated by District will be used solely for such purposes.

The City has initiated and conducted property owner protest ballot proceedings in accordance with the Act and Proposition 218 for all Zones within the District. Each of the proposed improvements; the associated costs and assessments have been carefully reviewed, identified, and allocated based on special benefit pursuant to the provisions of Article XIIID and the Act. All improvements associated with the Zones have been identified as necessary, required and/or desired for the orderly development of the properties to their full potential. As such, these improvements would be necessary and required of individual property owners for the development of such properties and the ongoing operation, servicing and maintenance of these improvements would be the financial obligation of those properties. Therefore, the improvements and the annual costs of ensuring the maintenance and operation of the improvements are of direct and special benefit to the properties.

The method of apportionment (method of assessment) is based on the premise that each assessed parcel within these Zones receives special benefit from the improvements. The desirability and security of properties is enhanced by well-maintained landscaping in close proximity to those properties.

The special benefits associated with all landscaping improvements are specifically:

- Enhanced desirability of properties through association with the improvements.
- Improved aesthetic appeal of properties providing a positive representation of the area and properties.
- Enhanced adaptation of the urban environment within the natural environment from adequate green space and landscaping.
- Environmental enhancement through improved erosion resistance, dust and debris control, and fire prevention.
- Increased sense of pride in ownership of property within the Zones resulting from well-maintained improvements associated with the properties.
- Enhanced quality of life through well-maintained green belts and landscaped areas.

- Reduced criminal activity and property-related crimes (especially vandalism) against properties in the Zones through well-maintained surroundings and amenities including abatement of graffiti.
- Enhanced environmental quality of the parcels by moderating temperatures, providing oxygenation, and attenuating noise.

All of the preceding special benefits allow the property to be developed for the enjoyment of the property owners and contribute to a specific enhancement and desirability of each of the assessed parcels within the Zones.

The improvements are for the special benefit, enhancement, and use of properties within the Zones. Although the improvements include public easements, rights-of-way, streets, and other amenities available or visible to the public at large, the construction and installation of these improvements are only necessary for the development of properties within the Zones and are not required nor necessarily desired by any properties or developments outside the Zone's boundaries. Therefore, any public access or use of the improvements by others is incidental and there is no measurable general benefit to properties outside the Zones or to the public at large. In making this determination, it should be noted that all parkway and perimeter landscaping within the City is both funded and maintained by a special district, individual property owners or through some type of association.

C. DESCRIPTION OF THE METHOD OF APPORTIONMENT

Pursuant to the Act, the costs of each Zone may be apportioned by any formula or method that fairly distributes the net amount to be assessed, among all assessable parcels within the Zone in proportion to the estimated special benefits to be received by each such parcel from the improvements. The special benefit formula used for each Zone should reflect the composition of the parcels, and the improvements and services provided, to fairly proportion the Zone's costs based on estimated special benefit to each parcel within the Zone. All assessable parcels within each Zone shall receive a direct special benefit from the services and improvements provided by the Zone.

Considering the composition of the parcels within the Zone, each parcel is assigned an Equivalent Dwelling Unit ("EDU"), which reflects each parcel's estimated special benefit from the improvements as compared to other parcels within the Zone. Because all assessable parcels within each Zone are considered to benefit from the Zone improvements on an EDU basis, the amounts to levy to each Zone are then spread to each assessable parcel within the Zone on an EDU method as shown in the table below. Acreage of common area parcels shall be apportioned to the remaining assessable parcels of a subdivision and/or parcel split(s) related to the creation of the common area parcel(s).

The following formulas are used to calculate the assessment for each parcel:

ASSIGNED EDU	PROPERTY CLASS
1.0 per unit	Single-Family Residential Parcels
0.6 per unit	Multi-Family Residential Parcels
7.0 per acre	Non-Residential Parcels

For each Zone, the Applied Assessment Rate per Equivalent Dwelling Unit for each parcel in the Zone is the result of dividing the total Balance to Levy for each Zone, by the sum of the Zone EDUs for the fiscal year. This Applied Assessment Rate is multiplied by each parcel's individual EDU to determine the parcel's levy amount. The assessment cannot be greater than the current maximum assessment rate, as adjusted for the inflation factor.

Total Balance to Levy / Total EDU = Rate per EDU

Parcel EDU x Rate per EDU = Parcel Levy Amount

D. INFLATIONARY ADJUSTMENT FACTOR

Any new or increase in assessments require certain noticing and meeting requirements by law. Prior to the passage of Proposition 218, legislative changes in the Ralph M. Brown Act (the "Brown Act") defined a new or increased assessment to exclude certain conditions. These conditions include any assessment that does not exceed an assessment formula or range of assessments previously adopted by the agency or approved by the voters in the area where the assessment is imposed. This definition and conditions were later confirmed through Senate Bill 919 (the implementing legislation for Proposition 218).

The purpose of establishing an assessment range formula is to provide for reasonable increases and inflationary adjustment to annual assessments without requiring costly noticing and mailing procedures, which could add to the District costs and assessments. As part of the District formation, balloting of property owners is required, pursuant to Proposition 218. The property owner ballots included an Assessment to be approved, as well as the approval of an assessment range formula.

The assessment range formula shall be applied to all future assessments within the District. Generally, if the proposed annual assessment (levy per unit or rate) for the current fiscal year is less than or equals to the "Maximum Assessment" (or "Adjusted Maximum Assessment"), then the proposed annual assessment is not considered an increased assessment. The Maximum Assessment is equal to the initial Assessment approved by property owners adjusted annually by the following criteria:

1. Beginning in the second fiscal year and each fiscal year thereafter, the Maximum Assessment will be calculated.
2. The new Adjusted Maximum Assessment for the year represents the prior year's approved Maximum Assessment increased by three percent (3.0%).

The Maximum Assessment is adjusted annually and is calculated independent of the District's annual budget and proposed annual assessment. Any proposed annual assessment less than or equal to this Maximum Assessment is not considered an increased assessment, even if the proposed assessment is greater than the assessment applied in the prior fiscal year.

The approved base year maximum assessment rates and annual inflationary adjustment factors for all Zones are shown in the table below:

Zone	Year of Approved Maximum Rate and Annual Inflator (Base Year)	Maximum Assessment Rate per EDU (Base Year)	Annual Inflationary Adjustment Factor
District-Wide Benefit Zone	FY 2004/05	$40.82	3.00%
Local Benefit Zone	FY 2004/05	$43.92	3.00%
Zone F	FY 2003/04	$481.35	3.00%
Zone G	FY 2003/04	$264.22	3.00%

BALANCE TO LEVY	**$570,321.19**	**$172,638.01**	**$30,866.94**	**$12,275.02**

Fund balance information of each Zone is reported in Section C on the following page. Total balance to levy for the district is $786,101.16.

B. FY 2025/26 ASSESSMENT RATES

DESCRIPTION	District-Wide Benefit Zone Fund 2010	Local Benefit Zone Fund 2011	ZONE F (Diamond Oaks No. 10) Fund 2012	ZONE G (Diamond Oaks No. 14) Fund 2013
FY 2025/26 ASSESSMENT DATA				
Total Assessable Parcels [1]	3,389	2,112	39	79
Total Assessable Single Family Units [1]	2,113	2,113	39	79
Total Assessable Multi-Family Units	2,348	0	0	0
Total Assessable Non-Residential Acres	569.8126	0	0	0
Total Equivalent Dwelling Units ("EDUs") [1]	7,510.4883	2,113	39	79
Applied Assessment Rates Per EDU [2]	**$75.9366**	**$81.7028**	**$791.46**	**$155.38**
Maximum Assessment Rates per EDU	$75.9372	$81.7041	$922.32	$506.27
Potential Maximum Assessment per Zone	**$570,325.44**	**$172,640.76**	**$35,970.33**	**$39,995.54**

(1) Since each single family residential parcel lies within both the District-Wide Benefit Zone and the Local Benefit Zone, the number of single family EDUs, units and parcels within these zones are not combined in the District totals.
(2) Actual assessment rates may differ slightly due to County rounding requirements.

D. DESCRIPTION OF BUDGET ITEMS

Description of the terms used in the preceding Budget, Assessment Rates and Fund Balance tables are listed below:

BUDGET:

DIRECT COSTS

Contract Maintenance – Landscaping – Includes all regularly scheduled contract labor, materials, supplies, and equipment required to properly maintain and ensure the satisfactory condition or maintenance of all landscaping improvements, irrigation, and related drainage systems, as well as maintenance of appurtenant facilities (the “improvements”).

Repair & Maintenance – Landscaping – Projected costs for repairs and/or maintenance of landscaping improvements. This would include work and materials not covered under contract maintenance.

Repair & Maintenance – Parks - Projected costs for repairs and/or maintenance of park improvements. This would include work and materials not covered under contract maintenance such as repair of damaged amenities due to vandalism, storms, etc.

Repair & Maintenance – Lighting – This line item includes repairs that are generally unforeseen and not normally included in the annual maintenance contract costs. If zero, this line item may not be shown in the budget.

Repair & Maintenance – Tree Work – This line item includes annual costs for tree maintenance not included in the annual contract maintenance portion of the budget. If zero, this line item may not be shown in the budget.

Utilities – The furnishing of water and electricity required for the operation and maintenance of the improvements.

Maintenance – Bike Trails – Costs to perform the necessary maintenance of the bike trails within the District. If zero, this line item may not be shown in the budget.

Maintenance – Open Space – Costs to perform the necessary maintenance of the open space areas within the District. If zero, this line item may not be shown in the budget.

Rehab Reserve Expenditures – Non-Routine Tree Work – Expected costs to maintain trees other than costs of annual repair and maintenance. If zero, this line item may not be shown in the budget.

Rehab Reserve Project Expenditures – Expected costs for installation, replacement, or planned upgrades of District improvements for the current year that were previously funded or accumulated in the Rehabilitation Reserve. The Rehabilitation Reserve is used to accumulate funds for costs associated with the future rehabilitation or replacement of District improvements that cannot be conveniently raised from a single year's assessment. If zero, this line item may not be shown in the budget.

ADMINISTRATION COSTS

City Administration – Estimated costs incurred by the City Finance Department and other Departments in preparing the annual budget for the Engineer's Report, together with other financial information required to determine the annual assessment. These costs would also include the preparation, posting and publishing of public notices required for City Council action relating to the District, as well as costs to perform legal review of documents.

Contract Administration – Park's Dept – Estimated Costs of Park and Recreation Department staff to coordinate and oversee the maintenance contracts and overall repair and maintenance of the District. This amount also includes the cost of the Department's estimates and analysis of certain budget items, estimated costs and useful lives of certain District Improvements.

County Auditor Fees – A fee of 1% of the total levy amount that is charged to the District by the County for placing assessments on property tax bills.

Consulting and Professional Services – Includes the costs and expenses of contracting with various professionals to provide legal, engineering and district administration services directly related to the District, including the calculation of the annual assessment amounts and the preparation of the Engineer's' Report.

Public Hearing Publishing Costs – Includes the out-of-pocket costs to publish public notices required for City Council action relating to the District.

Total Direct and Administration Costs – The total expected costs of the District.

BUDGET ADJUSTMENTS

Replenishment/(Use) of Operating Reserve – A “Replenishment” increases the levy in order to replenish the Operating Reserve. On the other hand, a “Use” of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the budget. Further information regarding the function of the Operating Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

Contribution for / (Use of) Rehab Reserve – A “Contribution” increases the levy in order to generate funding for the Rehabilitation Reserve. This reserve allows for the accumulation of funds for possible rehabilitation projects or replacements in future years. On the other hand, a “Use of” of the Rehabilitation Reserve provides current year funding of rehabilitation projects or replacements from available funds within the Rehabilitation Reserve. If zero, this line item may not be shown in the budget. Further information regarding the function of the Rehabilitation Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

Rounding Adjustment – The necessary rounding adjustment(s) due to limitations of the County property tax system that requires even penny levy amounts to be placed on the secured tax roll.

BALANCE TO LEVY – This is the total amount to be levied and collected in the District through assessments for the current fiscal year. The Balance to Levy represents the sum of the total District costs together with any applicable adjustments to the budget as described above.

ASSESSMENT RATES:

Total Assessable Single-Family Units – The total number of assessable single-family units within the District for the current fiscal year. Since each single-family residential parcel is in both the District-Wide Benefit Zone and the Local Benefit Zone, the single-family EDUs are only added once to arrive at the "Total Equivalent Dwelling Units"

Total Assessable Multi-Family Units – The total number of assessable multi-family units within the District for the current fiscal year.

Total Assessable Non-Residential Acres – The total assessable non-residential acres within the District for the current fiscal year.

Total Equivalent Dwelling Units ("EDUs") – Total assessable EDUs within the District for the current fiscal year.

Applied Assessment Rates per EDU – The assessment rates per EDU to be applied to the non-exempt parcels within the applicable Zone for the current fiscal year.

Maximum Assessment Rates per EDU – The maximum assessment rates per EDU for the parcels within the applicable Zone for the current fiscal year.

Potential Maximum Assessment Per Zone – The total amount that can be assessed against all parcels within each Zone for the current fiscal year based upon the expected number of parcels to be assessed.

FUND BALANCE INFORMATION:

OPERATING RESERVE

Beginning Operating Reserve Balance 7-1-2025 – The District's anticipated beginning balance of cash and receivables net of any unpaid prior year obligations. These beginning balances shall be used to fund the District's expenditures from July 1, 2025 to December 31, 2025, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's fiscal year and the receipt of the collections from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

Replenish from FY 2025/26 Levy – This amount is added to the FY 2025/26 levy in order to replenish the Operating Reserve. Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve balance shall be sufficiently funded to provide for expenditures from the period of July 1, 2025 (the beginning of the Fiscal Year) through December 31, 2025. If zero, this line item may not be shown in the budget.

Use for FY 2025/26 Expenses – The amount of the Operating Reserve to be used to fund FY 2025/26 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve Balance to an amount no greater than the expected District costs for the period of July 1, 2025 (the beginning of the Fiscal Year) through December 31, 2025. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Rehab Reserve – The amount of Operating Reserve monies to be transferred to or from the Rehabilitation Reserve. Periodically, funds

held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Operating Reserve Balance 6-30-2026 (est.) – This amount represents the anticipated Operating Reserve balance/(deficit) for each Zone as of June 30, 2026. The size of each Zone's Operating Reserve is limited by Streets and Highways Code 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance, service and incidental expenses from the first day of the fiscal year (July 1) to the date that the Agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each Zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

REHABILITATION RESERVE

Beginning Rehab Reserve Balance 7-1-2025 — The projected balance of funds in the Rehabilitation Reserve as of July 1, 2025. Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Collect from FY 2025/26 Levy — This amount is added to the levy to accumulate funding of future year rehabilitation projects, replacements, restorations, or upgrades of District improvements. If zero, this line item may not be shown in the budget.

Use for FY 2025/26 Rehab Projects — The amount of Rehabilitation Reserve monies expected to be transferred out of the Rehabilitation Reserve to fund the costs of installation, replacement, or planned upgrades of District improvements for the current year. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Operating Reserve — The amount of Rehabilitation Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Rehab Reserve Balance 6-30-2026 — The projected balance of funds in the Rehabilitation Reserve as of June 30, 2026. These funds shall be used to provide for future year rehabilitation projects, replacements, restorations, or upgrades of District improvements which cannot be conveniently raised from a single year's assessment. Should the District have no Rehabilitation Reserve or related activity, the Rehabilitation Reserve information may not be presented in the Report.

E. REHABILITATION RESERVE – CAPITAL IMPROVEMENT PLAN

Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

The Report provides a five-year Capital Improvement Plan ("CIP") which shows projected expenditures by Zone related to the rehabilitation, restoration and/or replacement of District improvements, and other allowable costs. The Current Fiscal Year CIP is shown in the preceding Budget Section A. The projected CIP costs for the remaining four years are shown in the table below.

District Wide Zone

Description	FY 2026-27	FY 2027-28	FY 2028-29	FY 2029-30	4 Year Total
Replace, repair, renovate and/or refurbish plants, landscape, irrigation & related mat'ls		$25,000	$35,101	$25,000	$85,101
Repair, replace and/or refurbish sound wall improvements	25,000		17,000		42,000
Irrigation controllers	10,000	10,000	10,000		30,000
Non-routine tree work	15,500	15,500	15,500	15,500	62,000
Total Projected Expenditures	**$50,500**	**$50,500**	**$77,601**	**$40,500**	**$219,101**

Local Benefit Zone

Description	FY 2026-27	FY 2027-28	FY 2028-29	FY 2029-30	4 Year Total

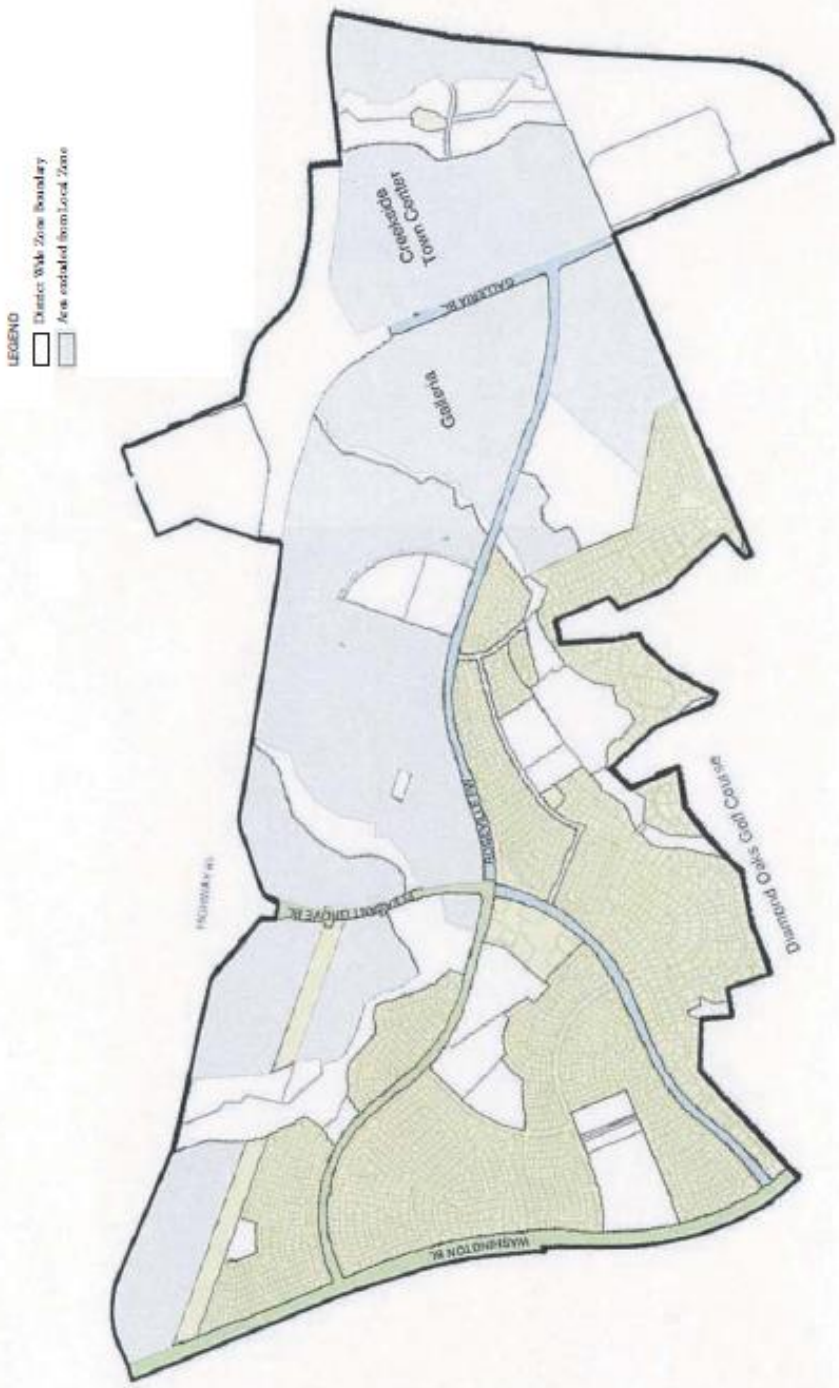
Zone G

Description	FY 2026-27	FY 2027-28	FY 2028-29	FY 2029-30	4 Year Total
Replace, repair, renovate and/or refurbish plants, landscape, irrigation and related mat'ls	$7,500	$7,500	$7,500	$10,000	$32,500
Repair, replace and/or refurbish sound wall improvements			16,000		16,000
Non-routine tree work	1,300	1,300	1,300	1,300	5,200
Total Projected Expenditures	**$8,800**	**$8,800**	**$24,800**	**$11,300**	**$53,700**



Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements.

APPENDIX A – DISTRICT BOUNDARY MAP

The boundary map for the District has previously been submitted to the Clerk of the City in the format required under the Act and is, by reference, hereby made part of this Report. These District Boundary Maps are available for inspection at the office of the City Clerk during normal business hours.

For general reference purposes, a rendering of the District's Boundaries is presented herein.

APPENDIX B — FY 2025/26 ASSESSMENT ROLL

Parcel identification, for each lot or parcel within the District, shall be the parcel as shown on the Placer County Assessor's map for the year in which this Report is prepared.

Due to the size of the Assessment Roll, a listing of parcels to be assessed within this District, along with the proposed assessment amounts, may be submitted to the City Clerk, under a separate cover, and by reference is made part of this Report.

Non-assessable lots or parcels may include areas of public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas and rights-of-way, including public greenbelts and parkways; utility rights-of-way; small parcels vacated by the County, bifurcated lots, and other property that cannot be developed, excepting common area parcels. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempt from assessment.

At the conclusion of the public hearing for the District and the proposed assessments, approval of the Report (as submitted or as modified) confirms the method of apportionment and the assessment rate to be levied against each eligible parcel and thereby constitutes the approved levy and collection of assessments for FY 2025/26. The listing of parcels and the amount of assessment to be levied shall be submitted to the County Auditor/Controller and included on the FY 2025/26 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved in this Report. Therefore, if a single parcel has changed to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

RESOLUTION NO. 25-118

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, INITIATING PROCEEDINGS FOR THE ANNUAL LEVY OF ASSESSMENTS FOR THE NORTHWEST ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2025/2026, PURSUANT TO THE PROVISIONS OF PART 2 OF DIVISION 15 OF THE CALIFORNIA STREETS AND HIGHWAYS CODE

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the Northwest Roseville Specific Plan Landscaping and Lighting District and annexed territory therein (hereafter referred to as the "District") pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the "Act"), that provides for the levy and collection of assessments by the County of Placer for the City of Roseville to pay for the maintenance and services of street lighting, landscaping, and all appurtenant facilities and operations related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter "Engineer") for the purpose of assisting with the establishment of the assessments, the annexation of territory, and to prepare and file an Engineer's Annual Levy Report (hereinafter referred to as the "Engineer's Report") with the City Clerk in accordance with the Act, and in accordance with the California Constitution, Articles XIIIC and XIIID;

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE NORTHWEST ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 Engineer's Report: The City Council hereby orders the Engineer to prepare and file with the City Clerk the Engineer's Report concerning the levy of assessments for the District in accordance with Chapter 3, Section 22622 of the Act.

Section 2 Proposed improvements and any substantial changes in existing improvements: The District improvements include: the maintenance and operation of and the furnishing of services, materials and/or improvements for landscape, lighting, open space, natural and preserve areas, including turf, ground cover, shrubs and trees, irrigation systems, drainage systems, public pedestrian paths, bike trails, entry monuments, fencing, walls, signage, lighting systems, and other public improvements within the street right-of-way areas and all appurtenant facilities related thereto as further described in the Engineer's Report. The Engineer's Report also describes all new improvements or substantial changes in existing improvements.

RESOLUTION NO. 25-119

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, DECLARING ITS INTENTION TO LEVY ANNUAL ASSESSMENTS FOR THE NORTHWEST ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2025/2026

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the Northwest Roseville Specific Plan Landscaping and Lighting District (hereafter referred to as the "District"), and initiated proceedings for Fiscal Year 2025/2026, pursuant to the provisions of the *Landscaping and Lighting Act of 1972*, *Part 2 of Division 15 of the Streets and Highways Code of California*, *beginning with Section 22500* (hereafter referred to as the "Act") that provides for the levy and collection of assessments by the County of Placer for the City of Roseville to pay for the maintenance, operation and servicing of all improvements and facilities related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services for the purpose of assisting with the Annual Levy of the District, and to prepare and file a report (hereinafter referred to as the "Engineer's Report") with the City Clerk in accordance with the Act; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE NORTHWEST ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, PURSUANT TO *CHAPTER 3, SECTION 22624* OF THE ACT, AS FOLLOWS:

Section 1 Intention: The City Council hereby declares that it is its intention to seek the Annual Levy of the District pursuant to the Act, over and including the land within the District boundary, and to levy and collect assessments on all such land to pay for the annual costs of the improvements.

Section 2 Proposed improvements and any substantial changes in existing improvements: The District improvements include the maintenance and operation of and the furnishing of services, materials or improvements for landscape, lighting, open space, natural and preserve areas, including turf, ground cover, shrubs and trees, irrigation systems, drainage systems, public pedestrian paths, bike trails, entry monuments, fencing, walls, signage, lighting systems, and other public improvements within the street right-of-way areas and all appurtenant facilities related thereto as further described in the Engineer's Report. The Engineer's Report also describes all new improvements or substantial changes in existing improvements.

Section 3 Boundaries and Designation: The boundaries of the District are described as the boundaries previously defined in the formation documents of the District and any annexations thereto. The District generally includes the parcels within the area known as the Northwest Roseville Specific Plan. The District is known and designated as

"Northwest Roseville Specific Plan Landscaping and Lighting District"

Section 4 Proposed Assessment Amounts: The proposed assessments are outlined in the Engineer's Report. District Assessments are calculated in accordance with the method of apportionment established for the District and do not exceed the assessment rates.

Section 5 Public Hearing(s): The City Council hereby declares its intention to conduct a Public Hearing annually concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22626* of the Act.

Section 6 Notice: The City Clerk shall give notice of the time and place of the Public Hearing by causing this Resolution to be published once in the local newspaper not less than ten (10) days before the date of the hearing and by posting a copy of this Resolution on the official bulletin board customarily used by the City Council for the posting of notices.

Section 7 Time and Place of Public Hearing: Notice is hereby given that a Public Hearing on these matters will be held by the City Council on **Wednesday, May 21, 2025 at 6:00 p.m.**, or as soon thereafter as feasible in the regular meeting chambers located at 311 Vernon Street, Roseville, California.

RESOLUTION NO. 25-120

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR PRELIMINARY APPROVAL OF THE ENGINEER'S LEVY REPORT FOR THE NORTHWEST ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2025/2026

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, the City Council has, by previous Resolutions, ordered the preparation of an Engineer's Levy Report (hereafter referred to as the "Engineer's Report") for the district known and designated as the Northwest Roseville Specific Plan Landscaping and Lighting District (hereafter referred to as the "District"), pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California*, *beginning with Section 22500* (hereinafter referred to as the "Act"); and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter "Engineer"), for the purpose of assisting with the establishment of the assessments and to prepare and file an Engineer's Report with the City Clerk in accordance with the Act, and in accordance with the requirements of the California Constitution, Articles XIIIC and XIIID; and,

WHEREAS, there has now been presented to this City Council the Engineer's Report as required by *Chapter 1, Article 4, Section 22566* of said Act; and,

WHEREAS, this City Council has carefully examined and reviewed the Engineer's Report as presented, and is preliminarily satisfied with the District, each and all of the budget items and documents as set forth therein, and is satisfied that the assessments, on a preliminary basis, have been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed within each Zone, as set forth in said Engineer's Report; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE NORTHWEST ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 That the above recitals are all true and correct.

Section 2 That the Engineer's Report, as presented, consists of the following:

a. A Description of Improvements
b. The Annual Budget (Costs and Expenses of Maintenance, Services, Operations and District Administration)
c. The Assessment Roll containing the Fiscal Year 2025/2026 Levy for each Assessor Parcel within the District

Section 3 The Engineer's Report is hereby approved on a preliminary basis, and ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection.

Section 4 That the City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation of the Engineer's Report.

APPENDIX B — FY 2025/26 ASSESSMENT ROLL 19

I. OVERVIEW

A. INTRODUCTION

The City of Roseville ("City") annually levies and collects special assessments in order to provide and maintain the improvements within the Northwest Roseville Specific Plan Area, known as Northwest Roseville Specific Plan Landscaping and Lighting District ("District") within the City. The District was formed and is levied annual assessments pursuant to *the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code* (the "1972 Act" or the "Act").

This Engineer's Levy Report ("Report") describes the District, any new annexations, changes to the District, and the proposed assessments for the period of July 1, 2025 through June 30, 2026. The assessments are based on historical and estimated costs to maintain the improvements that provide a direct and special benefit to properties within the District. The District consists of two (2) benefit zones ("Zones"). The improvements that benefit properties within each Zone and the costs of those improvements are identified and budgeted separately. Each parcel is assessed proportionately for the estimated costs of the parcel's respective Zone.

The word "parcel," for the purposes of this Report, refers to an individual property assigned its own Assessor's Parcel Number by the Placer County Assessor's Office. The Placer County Auditor/Controller ("County Auditor/Controller") uses Assessor's Parcel Numbers and specific Tax Code Accounts, to identify on the County's tax roll, properties assessed for special district benefit assessments.

Following consideration of public comments at a public hearing, and a final review of the Report, the City Council may order amendments to the Report or confirm the Report as submitted. Following approval of the Report, the City Council will by resolution, order the improvements to be made, if any, and confirm the levy and collection of assessments pursuant to the Act. The assessment rates and method of apportionment described in this Report as approved or modified by the City Council define the assessments to be applied to each parcel within the District and respective Zones for Fiscal Year ("FY") 2025/26. The assessments as approved will be submitted to the Placer County Auditor/Controller to be included on the FY 2025/26 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved by the City Council.

B. COMPLIANCE WITH CURRENT LEGISLATION

All assessments described in this Report and approved by the City Council are prepared in accordance with the 1972 Act and are in compliance with the provisions of the *California Constitution Article XIIID* (Proposition 218). Pursuant to the *California Constitution Article XIIID ("Article XIIID") Section 5*, certain existing assessments are exempt from the substantive and procedural requirements of *Article XIIID Section 4* and property owner balloting for the assessments is not required until such time that the assessments are increased. Specifically, the City determined that all improvements and the annual assessments established for the original District were part of the conditions of property development and approved by the original property owner (developer). As such, pursuant to *Article XIIID Section 5(b),* the property owners approved these existing District assessments at the time the assessments were created (originally imposed pursuant to a 100% landowner petition). The assessments applied to the District's parcels at the time of passage of Proposition 2018 of $100 to each single-family residential parcel within Zone A and $147.20 to each single-family residential parcel within Zone B continue to be exempt from the procedural requirements *Article XIIID Section 4*.

The District and all Zones therein have been formed pursuant to the *1972 Act.* Pursuant to the 1972 Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments and to review the Report prior to approving the annual assessments to be levied on the County tax rolls. The assessments described in this Report have been prepared in accordance with the 1972 Act.

In November 2004, the City initiated and conducted property owner protest ballot proceedings, in accordance with the 1972 Act and Article XIIID, to annex into Zone A, and approve the maximum assessment of $100 per single family residential parcel. At the conclusion of the Public Hearing, the City determined that a majority protest did not exist. The City then approved the Engineer's Report, through the adoption of Resolution No. 04-507, which annexed the Dunmore Junction territory to Zone A. Dunmore Junction was first assessed by the District in FY 2005/06.

In April 2005, the City initiated and conducted property owner protest ballot proceedings, in accordance with the 1972 Act and Article XIIID, to annex into Zones B, and approve the maximum assessment of $147.20 per single family residential parcel. At the conclusion of the Public Hearing, the City determined that a majority protest did not exist. The City then approved the Engineer's Report, through the adoption of Resolution No. 05-165, which annexed the Legacy subdivision territory to Zone B. The Legacy subdivision was first assessed by the District in FY 2005/06.

C. DESCRIPTION OF DISTRICT BOUNDARIES

The Northwest Roseville Specific Plan Landscaping and Lighting District lies west of the existing urban area of the City of Roseville. The District is generally

bounded by Baseline Road to the north, Fiddyment Road to the west and Washington Boulevard to the east. The City annexed in Dunmore Junction, which is generally located on the east side of Porter Drive, south of Junction Boulevard and north of Lawton Avenue. The City also annexed in Legacy Subdivision, which is generally located on the northwest corner of Washington Boulevard and Junction Boulevard. For general reference purposes, renderings of the District's Boundaries are presented in Appendix A of the Report.

D. IMPROVEMENTS AUTHORIZED BY THE 1972 ACT

As applicable or may be applicable to a proposed District, the 1972 Act defines improvements to mean one or any combination of the following:

- The installation or planting of landscaping.
- The installation or construction of statuary, fountains, and other ornamental structures and facilities.
- The installation or construction of public lighting facilities.
- The installation or construction of any facilities which are appurtenant to any of the foregoing, or which are necessary or convenient for the maintenance or servicing thereof, including, but not limited to, grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities.
- The maintenance or servicing, or both, of any of the foregoing.
- The acquisition of any existing improvement otherwise authorized pursuant to this section.

Incidental expenses associated with the improvements including, but not limited to:

- The cost of preparation of the report, including plans, specifications, estimates, diagram, and assessment;
- The costs of printing, advertising, and the publishing, posting, and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;
- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
- Any expenses incidental to the issuance of bonds or notes pursuant to Section 22662.5.
- Costs associated with any elections held for the approval of a new or increased assessment.

The 1972 Act defines "Maintain" or "maintenance" to mean furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement, including:

- Repair, removal, or replacement of all or any part of any improvement.
- Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury.
- The removal of trimmings, rubbish, debris, and other solid waste.
- The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Furthermore, the 1972 Act specifies that where the cost of improvements (other than maintenance and operations) is greater than can be conveniently raised from a single annual assessment, an assessment to be levied and collected in annual installments. In that event, the governing body may choose to do any of the following:

- Provide for the accumulation of the moneys in an improvement fund until there are sufficient moneys to pay all or part of the cost of the improvements.
- Provide for a temporary advance to the improvement fund from any available and unencumbered funds of the local agency to pay all or part of the cost of the improvements and collect those advanced moneys from the annual installments collected through the assessments.
- Borrow an amount necessary to finance the estimated cost of the proposed improvements. The amount borrowed, including amounts for bonds issued to finance the estimated cost of the proposed improvements.

E. DESCRIPTION OF IMPROVEMENTS AND SERVICES

Zone A

Zone A of the District, by special benefit assessments, is to provide funding for the maintenance of the following improvements: landscaped street medians and landscaped corridors adjacent to property within the District including but not limited to, plantings, sound walls, and project identification signs; the maintenance of the vernal pool preserves identified in the Northwest Roseville Specific Plan; the installation and maintenance of bike trails within the Northwest Roseville Specific Plan Area; and the installation of park improvements and/or the payment of debt service related to the installation of bike trails and/or park improvements within the Northwest Roseville Specific Plan Area.

Zone B

Zone B of the District, by special benefit assessments, is to provide funding for the following:

- The maintenance of the landscaped street buffers or medians, certain natural areas within the subdivision and landscape corridors adjacent to the property within the Zone (including, but not limited to, planting, screen walls, project identification signs, and drainage and wetlands areas within the

property).

- The perpetual maintenance of the landscape strips adjacent to the Sierra Crossing subdivision contiguous to Foothills Boulevard and Booth Road, including but not limited to maintenance of the planting, screen walls, and project identification signs.

- The maintenance of the natural border adjoining and contiguous to the westerly border of Sierra Crossing.

- The maintenance of the wetland preserve area.

- The on-going maintenance of the landscape strips adjacent to the Legacy subdivision contiguous to Junction Boulevard, Washington Boulevard and Sawtell Road, including but not limited to maintenance of the planting, screen walls, and project identification signs.

- The maintenance of the natural border adjoining and contiguous to the westerly border of the Legacy subdivision.

II. METHOD OF APPORTIONMENT

A. GENERAL

The 1972 Act permits the establishment of assessment districts by agencies for the purpose of providing certain public improvements, which include the construction, maintenance, and servicing of public lights, landscaping, and appurtenant facilities. The 1972 Act further requires that the cost of these improvements be levied according to benefit rather than assessed value:

"The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements."

The formula used for calculating assessments reflects the composition of the parcels, and the improvements and services provided, to fairly apportion the costs based on estimated benefit to each parcel.

B. DESCRIPTION OF METHOD OF APPORTIONMENT

Pursuant to the Act, the costs of each Zone may be apportioned by any formula or method that fairly distributes the net amount to be assessed, among all assessable parcels in proportion to the estimated special benefits to be received by each such parcel from the improvements. The special benefit formula used for any special benefit assessment should reflect the composition of the parcels, and the improvements and services provided, to fairly apportion the costs based on estimated special benefit to each parcel. All assessable parcels in each Zone receive a direct special benefit from the services and improvements provided by the District.

Each parcel within this District has been assigned an Equivalent Benefit Unit (EBU), which reflects each parcel's estimated special benefit from the improvements as compared to other parcels within each Zone of the District. The levy amount is spread evenly to each assessable parcel in the District, on a per benefit unit (per parcel) method.

For each Zone, the total eligible special benefit expenses ("Balance to Levy"), is divided by the total EBUs of all parcels. The result of this calculation establishes an assessment rate per EBU ("Levy per EBU" or "Assessment Rate") to be applied to each Zone.

The following formulas shall be applied to each Zone to calculate the assessment for each parcel:

Zone A

Total number of residential lots based on final filed maps, divided into the total annual estimated costs of Zone A.

Zone B

Total number of residential lots based on final filed maps, divided into the total annual estimated costs of Zone B.

The Maximum Annual Assessment is not to exceed $100.00 per parcel for Zone A and $147.20 per parcel for Zone B.

C. PROPOSITION 218 BENEFIT ANALYSIS

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIIID addresses several key criteria for the levy of assessments regarding the Dunmore Junction subdivision Legacy subdivision annexations to the District, notably:

Article XIIID Section 2d defines District as follows:

"District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service;"

Article XIIID Section 2i defines Special Benefit as follows:

"Special benefit" means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute "special benefit."

Article XIIID Section 4a defines proportional special benefit assessments as follows:

"An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel."

Each of the proposed improvements, the associated costs and assessments have been carefully reviewed, identified, and allocated based

on special benefit pursuant to the provisions of the Constitution and 1972 Act. All improvements associated with this District have been identified as necessary, required and/or desired for the orderly development of the properties within the District to their full potential, consistent with the proposed development plans and applicable portions of the City General Plan and the Northwest Roseville Specific Plan. As such, the improvements for which each property shall be assessed would be necessary and required of individual property owners for the development of such properties and the ongoing operation, servicing and maintenance of these improvements would be the financial obligation of those properties. Therefore, the improvements and the annual costs of ensuring the maintenance and operation of the improvements are of direct and special benefit to the properties.

The method of apportionment (method of assessment) is based on the premise that each assessed parcel within the District receives benefit from the improvements. Well-maintained landscaping and recreational facilities in close proximity to those properties enhance the desirability of those properties.

The special benefits associated with the landscape improvements and associated appurtenants are specifically:

- Enhanced desirability of properties through association with the improvements.
- Improved aesthetic appeal of properties providing a positive representation of the area and properties.
- Enhanced adaptation of the urban environment within the natural environment from adequate green space and landscaping.
- Environmental enhancement through improved erosion resistance, dust and debris control, and fire prevention.
- Increased sense of pride in ownership of property within the District resulting from well-maintained improvements associated with the properties.
- Enhanced quality of life through well-maintained green belts, landscaped areas, and recreational facilities.
- Reduced criminal activity and property-related crimes (especially vandalism) against properties in the District through well-maintained surroundings and amenities including abatement of graffiti.
- Enhanced environmental quality of the parcels by moderating temperatures, providing oxygenation, and attenuating noise.

All of the preceding special benefits allow the property to be developed for the enjoyment of the property owners and contribute to a specific enhancement and desirability of each of the assessed parcels within the District.

The improvements are for the special benefit, enhancement, and use of properties within the District and the Northwest Roseville Specific Plan Area. Although the improvements include public easements, rights-of-way and other amenities available or visible to the public at large, it has been determined that the additional improvements installed in connection with this development and those installed as part of the overall Northwest Roseville Specific Plan, are only necessary for the development of properties within the specific plan area and were not required nor necessarily desired by any properties or developments outside the Northwest Roseville Specific Plan Area. Therefore, this District being part of that plan, receives similar and proportional special benefits from both the improvements installed in connection with developing properties in this District as well as existing and future shared amenities within the District. Any public access or use of the improvements by others is incidental and there is no measurable general benefit to properties outside the specific plan area or to the public at large.

Ending Rehab Reserve Balance 6-30-2026 (est.)	**$54,126.39**	**$0.00**

D. DESCRIPTION OF BUDGET ITEMS

BUDGET:

DIRECT COSTS

Contract Maintenance - Landscaping - Includes all regularly scheduled contract labor, materials, supplies, and equipment required to properly maintain and ensure the satisfactory condition or maintenance of all landscaping corridors, street medians, entryways, irrigation, and related drainage systems as well as maintenance of appurtenant facilities (the “improvements”).

Repair & Maintenance – Landscaping – Projected costs for repairs and/or maintenance of landscaping improvements. This would include work and materials not covered under contract maintenance.

Repair & Maintenance – Parks - Projected costs for repairs and/or maintenance of park improvements. This would include work and materials not covered under

contract maintenance such as repair of damaged amenities due to vandalism, storms, etc.

Repair & Maintenance – Tree Work - This line item includes annual costs for tree maintenance not included in the annual contract maintenance portion of the budget. If zero, this line item may not be shown in the budget.

Utilities - The furnishing of water and electricity required for the operation and maintenance of the improvements.

Utilities Telecom – connectivity services required for the operation of certain improvements.

Stormwater Management / Drainage - This line item includes costs to properly maintain certain drainage and / or wetlands areas within the District. If zero, this line item may not be shown in the budget.

Rehab Reserve Expenditures – Non-Routine Tree Work – Expected costs to maintain trees other than costs of annual repair and maintenance. If zero, this line item may not be shown in the budget.

Rehab Reserve Project Expenditures – Expected costs for installation, replacement, or planned upgrades of District improvements for the current year that were previously funded or accumulated in the Rehabilitation Reserve. The Rehabilitation Reserve is used to accumulate funds for costs associated with the future rehabilitation or replacement of District improvements that cannot be conveniently raised from a single year's assessment. If zero, this line item may not be shown in the budget.

ADMINISTRATION COSTS

City Administration – Estimated costs incurred by the City Finance Department and other Departments in preparing the annual budget for the Engineer's Report, together with other financial information required to determine the annual assessment. These costs would also include the preparation, posting and publishing of public notices required for City Council action relating to the District, as well as costs to perform legal review of documents.

Contract Administration – Park's Dept – Estimated Costs of Park and Recreation Department staff to coordinate and oversee the maintenance contracts and overall repair and maintenance of the District. This amount also includes the cost of the Department's estimates and analysis of certain budget items, estimated costs and useful lives of certain District Improvements.

County Auditor Fees - A fee of 1% of the total levy amount that is charged to the District by the County for placing assessments on property tax bills.

Consulting and Professional Services – Includes the costs and expenses of contracting with various professionals to provide legal, engineering and district administration services directly related to the District, including the calculation of the annual assessment amounts, the preparation of the Engineer's' Report and incidental expenses of consultant.

Public Hearing Publishing Costs –Includes the out-of-pocket costs to publish public notices required for City Council action relating to the District.

Total Direct and Administration Costs – The total expected costs of the District.

BUDGET ADJUSTMENTS

Replenishment/(Use) of Operating Reserve – A "Replenishment" increases the levy in order to replenish the Operating Reserve. On the other hand, a "Use" of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the budget. Further information regarding the function of the Operating Reserve is provided under "FUND BALANCE INFORMATION" in the following pages of this Section.

Contribution for /(Use of) Rehab Reserve — A "Contribution" increases the levy in order to generate funding for the Rehabilitation Reserve. This reserve allows for the accumulation of funds for possible rehabilitation projects or replacements in future years. On the other hand, a "Use of" of the Rehabilitation Reserve provides current year funding of rehabilitation projects or replacements from available funds within the Rehabilitation Reserve. If zero, this line item may not be shown in the budget. Further information regarding the function of the Rehabilitation Reserve is provided under "FUND BALANCE INFORMATION" in the following pages of this Section.

Rounding Adjustment – The necessary rounding adjustment(s) due to limitations of the County property tax system that requires even penny levy amounts to be placed on the secured tax roll.

BALANCE TO LEVY - This is the total amount to be levied and collected through assessments for the current fiscal year for each zone. The Balance to Levy represents the sum of the total District costs together with any applicable adjustments to the budget as described above.

ASSESSMENT RATES:

Total Assessable Parcels - The total number of expected parcels to be assessed in each of the District's Zones.

Total Assessable EBUs - The total number of expected Equivalent Benefit Units in each of the District's Zones.

Applied Assessment Rates per EBU - The assessment rates to be applied to the parcels lying within the respective Zone of the District for the fiscal year shown.

Maximum Assessment Rates per EBU - The maximum assessment rates for the parcels lying within the respective Zone of the District for the fiscal year shown.

Potential Maximum Assessment Per Zone – The total amount that can be assessed against all parcels within each Zone for the current fiscal year based upon the expected number of EBUs to be assessed.

FUND BALANCE INFORMATION:

OPERATING RESERVE

Beginning Operating Reserve Balance 7-1-2025 (est.) - The anticipated beginning balance of cash and receivables net of any unpaid prior year obligations for each Zone. These beginning balances shall be used to fund each Zone's expenditures from July 1, 2025 to December 31, 2025, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's fiscal year and the receipt of the collections from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

Replenish from FY 2025/26 Levy – This amount is added to the FY 2025/26 levy in order to replenish the Operating Reserve. Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve balance shall be sufficiently funded to provide for expenditures from the period of July 1, 2025 (the beginning of the Fiscal Year) through December 31, 2025. If zero, this line item may not be shown in the budget.

Use for FY 2025/26 Expenses – The amount of the Operating Reserve to be used to fund FY 2025/26 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve Balance to an amount no greater than the expected District costs for the period of July 1, 2025 (the beginning of the Fiscal Year) through December 31, 2025. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Rehab Reserve — The amount of Operating Reserve monies to be transferred to or from the Rehabilitation Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the

improvements. If zero, this line item may not be shown in the budget.

Ending Operating Reserve Balance 6-30-2026 (est.) - This amount represents the anticipated Operating Reserve balance/(deficit) for each Zone as of June 30, 2026. The size of each Zone's Operating Reserve is limited by Streets and Highways Code 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance, service and incidental expenses from the first day of the fiscal year (July 1) to the date that the Agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each Zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

REHABILITATION RESERVE

Beginning Rehab Reserve Balance 7-1-2025 (est.) — The projected balance of funds in the Rehabilitation Reserve as of July 1, 2025. Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Collect from FY 2025/26 Levy — This amount is added to the FY 2025/26 levy to accumulate funding of future year rehabilitation projects, replacements, restorations, or upgrades of District improvements. If zero, this line item may not be shown in the budget.

Use for FY 2025/26 Rehab Projects – The amount of Rehabilitation Reserve monies expected to be transferred out of the Rehabilitation Reserve to fund the costs of installation, replacement, or planned upgrades of District improvements for the current year. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Operating Reserve — The amount of Rehabilitation Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

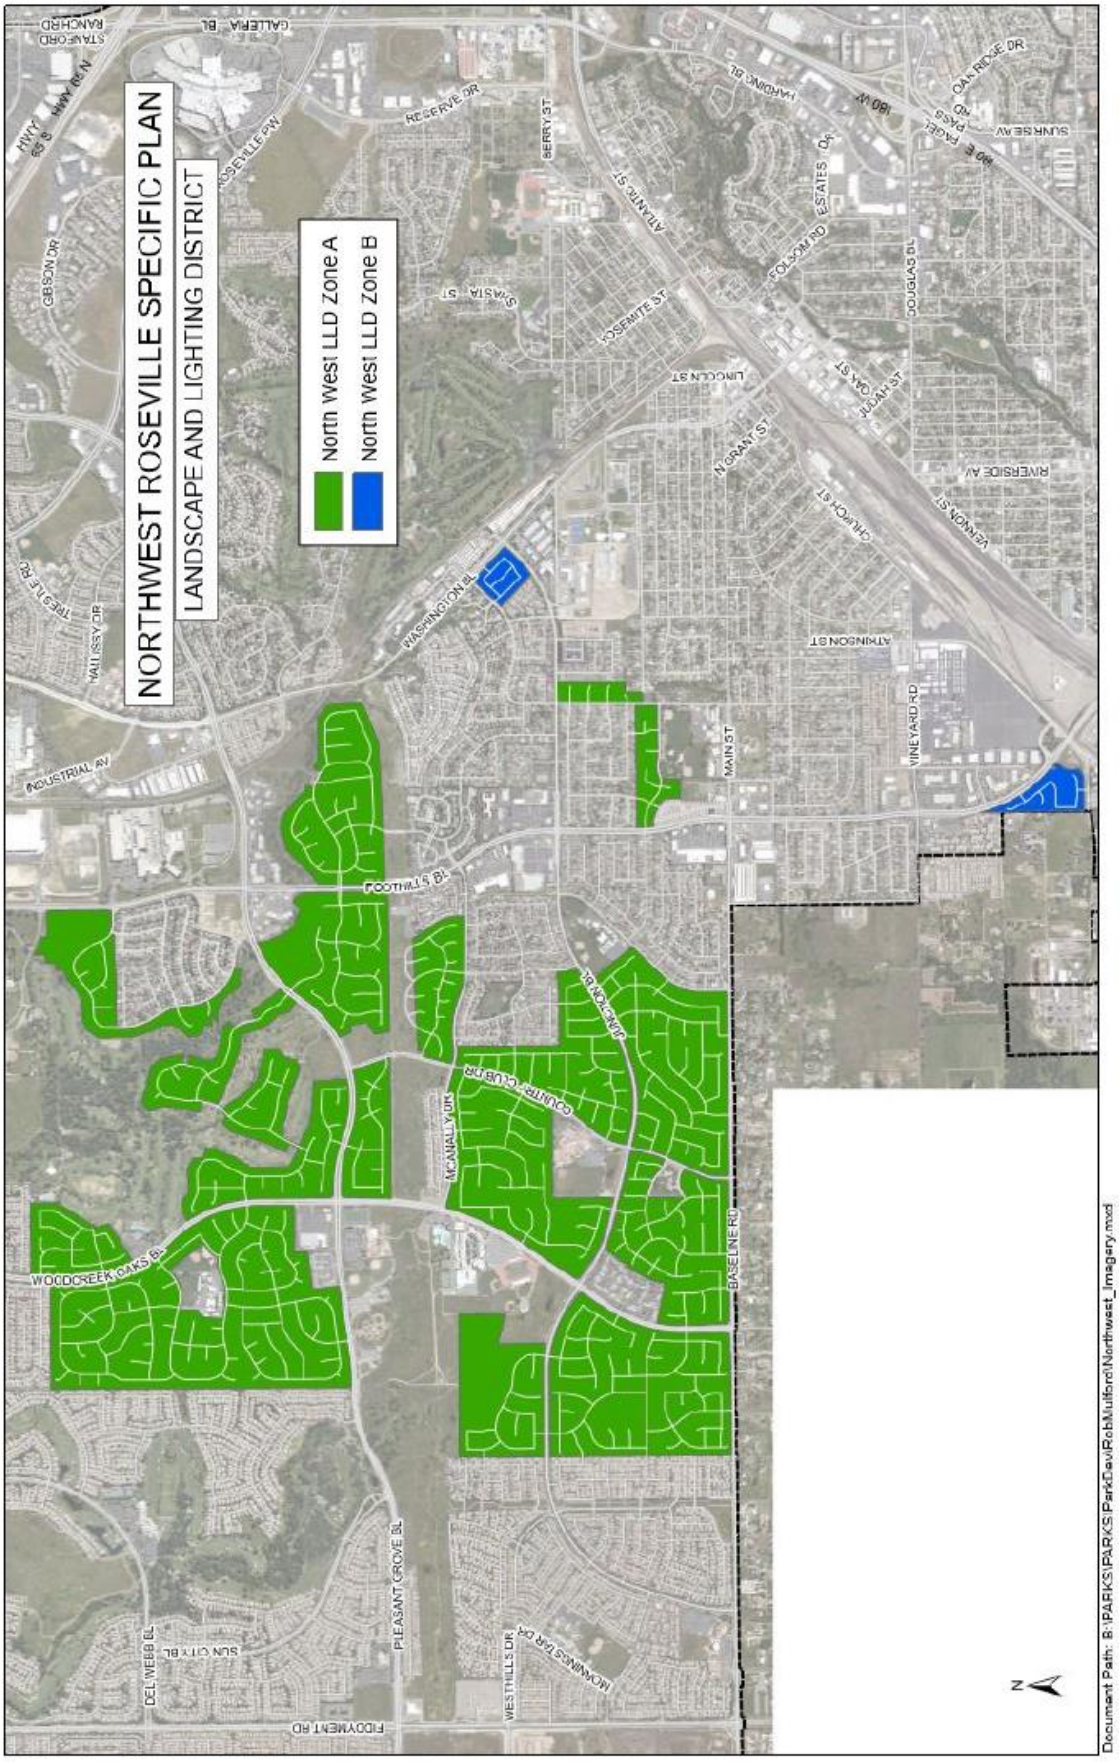
Ending Rehab Reserve Balance 6-30-2026 (est.) - The projected balance of funds in the Rehabilitation Reserve as of June 30, 2026. These funds shall be used to provide for future year rehabilitation projects, replacements, restorations, or upgrades of District improvements which cannot be conveniently raised from a single year's assessment.

Should the District have no Rehabilitation Reserve balances or related activity, no Rehabilitation Reserve information shall be presented in the Report.

E. REHABILITATION RESERVE – CAPITAL IMPROVEMENT PLAN

Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

The Report provides a five-year Capital Improvement Plan ("CIP") which shows projected expenditures by Zone related to the rehabilitation, restoration and/or replacement of District improvements, and other allowable costs. The Current Fiscal Year CIP is shown in the preceding Budget Section A. The projected CIP costs for the remaining four years are shown in the table below.



Zone A

Description	FY 2026-27	FY 2027-28	FY 2028-29	FY 2029-30	4 Year Total
Irrigation controller	$10,000	$10,000	$10,000		$30,000
Non-routine tree work	10,000	10,000	4,194		24,194
Total Projected Expenditures	**$20,000**	**$20,000**	**$14,194**	**$0**	**$54,194**

APPENDIX A – DISTRICT BOUNDARY MAP

The boundary map of the District and Zones has previously been submitted to the Clerk of the City in the format required under the Act and are, by reference, hereby made part of this Report. The boundary maps are available for inspection at the office of the City Clerk during normal business hours.

For general reference purposes, a rendering of the District's Boundaries is represented herein.

APPENDIX B — FY 2025/26 ASSESSMENT ROLL

Parcel identification, for each lot or parcel within the District, shall be the parcel as shown on the Placer County Assessor's map for the year in which this Report is prepared.

Due to the size of the Assessment Roll, a listing of parcels to be assessed within this District, along with the proposed assessment amounts, shall be submitted to the City Clerk, under separate cover, and by reference is made part of this Report.

Non-assessable lots or parcels may include areas of public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas and rights-of-way, including public greenbelts and parkways; utility rights-of-way; common areas; landlocked parcels, small parcels vacated by the County, bifurcated lots, and any other property that cannot be developed. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempt from assessment.

At the conclusion of the public hearing for the District and the proposed assessments, approval of the Report (as submitted or as modified) confirms the method of apportionment and the assessment rate to be levied against each eligible parcel and thereby constitutes the approved levy and collection of assessments for FY 2025/26. The listing of parcels and the amount of assessment to be levied shall be submitted to the County Auditor/Controller and included on the FY 2025/26 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved in this Report. Therefore, if a single parcel has changed to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.
