- a. the Applicant understands that the applicable statutes pertaining to civil rights will include section 601 of the Civil Rights Act of 1964 (42 U.S.C. § 2000d); section 504 of the Rehabilitation Act of 1973 (29 U.S.C. § 794); section 901 of the Education Amendments of 1972 (20 U.S.C. § 1681); and section 303 of the Age Discrimination Act of 1975 (42 U.S.C. § 6102);
- b. the Applicant understands that the applicable statutes pertaining to nondiscrimination may include section 809(c) of Title I of the Omnibus Crime Control and Safe Streets Act of 1968 (34 U.S.C. § 10228(c)); section

1407(e) of the Victims of Crime Act of 1984 (34 U.S.C. § 20110(e)); section 299A(b) of the Juvenile Justice and Delinquency Prevention Act of 2002 (34 U.S.C. § 11182(b)); and that the grant condition set out at section 40002(b)(13) of the Violence Against Women Act (34 U.S.C. § 12291(b)(13)), which will apply to all awards made by the Office on Violence Against Women, also may apply to an award made otherwise;

c. the Applicant understands that it must require any subrecipient to comply with all such applicable statutes (and associated regulations); and

d. on behalf of the Applicant, I make the specific assurances set out in 28 C.F.R. §§ 42.105 and 42.204. The Applicant also understands that (in addition to any applicable program-specific regulations and to applicable federal regulations that pertain to civil rights and nondiscrimination) the federal regulations applicable to the award (if any) made by the Department based on the application may include, but are not limited to, 2 C.F.R. Part 2800 (the DOJ "Part 200 Uniform Requirements") and 28 C.F.R. Parts 22 (confidentiality - research and statistical information), 23 (criminal intelligence systems), 38 (regarding faith-based or religious organizations participating in federal financial assistance programs), and 46 (human subjects protection).

10

Mandatory Disclosure: Recipients and subrecipients must timely disclose in writing to the Federal awarding agency or pass-through entity, as applicable, all federal criminal law violations involving fraud, bribery, or gratuity that may potentially affect the awarded federal funding. Recipients that receive an award over \$500,000 must also report certain civil, criminal, or administrative proceedings in SAM and are required to comply with the Term and Condition for Recipient Integrity and Performance Matters as set out in 2 C.F.R. Part 200, Appendix XII to Part 200. Failure to make required disclosures can result in any of the remedies, including suspension and debarment, described in 2 C.F.R. § 200.339. 2 C.F.R. § 200.113.

11

Enhancement of Contractor Protection from Reprisal for Disclosure of Certain Information: Recipients and subrecipients agree not to discharge, demote, or otherwise discriminate against an employee as reprisal for the employee disclosing information that he or she reasonably believes is evidence of gross mismanagement of a federal contract or award, a gross waste of federal funds, an abuse of authority relating to a federal contract or award, a substantial and specific danger to public health or safety, or a violation of law, rule, or regulation related to a Federal contract (including the competition for or negotiation of a contract) or award. Recipients and subrecipients also agree to provide to their employees in writing (in the predominant native language of the workforce) of the rights and remedies provided in 41 U.S.C. § 4712. Please see appendices in the Award Owner's Manual for a full text of the statute.

12

False Statements: False statements or claims made in connection with COPS Office awards may result in fines, imprisonment, debarment from participating in federal awards or contracts, and/or any other remedy available by law. 31 U.S.C. § 3729-3733.

13

System for Award Management (SAM) and Universal Identifier Requirements: The recipient agrees to comply with the following requirements of 2 C.F.R. Part 25, Appendix A to Part 25 – Award Term:

I. System for Award Management and Universal Identifier Requirements

A. Requirement for System for Award Management

Unless you are exempted from this requirement under 2 CFR 25.110, you as the recipient must maintain current information in the SAM. This includes information on your immediate and highest level owner and subsidiaries, as well as on all of your predecessors that have been awarded a Federal contract or Federal financial assistance within the last three years, if applicable, until you submit the final financial report required under this Federal award or receive the final payment, whichever is later. This requires that you review and update the information at least annually after the initial registration, and more frequently if required by changes in your information or another Federal award term.

B. Requirement for Unique Entity Identifier

If you are authorized to make subawards under this Federal award, you:

1. Must notify potential subrecipients that no entity (see definition in paragraph C of this award term) may receive a subaward from you until the entity has provided its Unique Entity Identifier to you.
2. May not make a subaward to an entity unless the entity has provided its Unique Entity Identifier to you. Subrecipients are not required to obtain an active SAM registration, but must obtain a Unique Entity Identifier.

C. Definitions

For purposes of this term:

1. System for Award Management (SAM) means the Federal repository into which a recipient must provide information required for the conduct of business as a recipient. Additional information about registration procedures may be found at the SAM internet site (currently at <https://www.sam.gov>).
2. Unique Entity Identifier means the identifier assigned by SAM to uniquely identify business entities.
3. Entity includes non-Federal entities as defined at 2 CFR 200.1 and also includes all of the following, for purposes of this part:
 - a. A foreign organization;
 - b. A foreign public entity;
 - c. A domestic for-profit organization; and
 - d. A Federal agency.
4. Subaward has the meaning given in 2 CFR 200.1.
5. Subrecipient has the meaning given in 2 CFR 200.1.

14

Reporting Subawards and Executive Compensation

The recipient agrees to comply with the following requirements of 2 C.F.R. Part 170, Appendix A to Part 170 – Award Term:

- I. Reporting Subawards and Executive Compensation
 - a. Reporting of first-tier subawards.

Applicability. Unless you are exempt as provided in paragraph d. of this award term, you must report each action that equals or exceeds \$30,000 in Federal funds for a subaward to a non-Federal entity or Federal agency (see definitions in paragraph e. of this award term).

2. Where and when to report.

- i. The non-Federal entity or Federal agency must report each obligating action described in paragraph a.1. of this award term to <http://www.fsrs.gov>.
- ii. For subaward information, report no later than the end of the month following the month in which the obligation was made. (For example, if the obligation was made on November 7, 2010, the obligation must be reported by no later than December 31, 2010.)

3. What to report. You must report the information about each obligating action that the submission instructions posted at <http://www.fsrs.gov> specify.

b. Reporting total compensation of recipient executives for non-Federal entities.

1. Applicability and what to report. You must report total compensation for each of your five most highly compensated executives for the preceding completed fiscal year, if—

i. The total Federal funding authorized to date under this Federal award equals or exceeds \$30,000 as defined in 2 CFR 170.320;

ii. in the preceding fiscal year, you received—

(A) 80 percent or more of your annual gross revenues from Federal procurement contracts (and subcontracts) and Federal financial assistance subject to the Transparency Act, as defined at 2 CFR 170.320 (and subawards), and

(B) \$25,000,000 or more in annual gross revenues from Federal procurement contracts (and subcontracts) and Federal financial assistance subject to the Transparency Act, as defined at 2 CFR 170.320 (and subawards); and,

iii. The public does not have access to information about the compensation of the executives through periodic reports filed under section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(a), 78o(d)) or section 6104 of the Internal Revenue Code of 1986. (To determine if the public has access to the compensation information, see the U.S. Security and Exchange Commission total compensation filings at <http://www.sec.gov/answers/execomp.htm>.)

2. Where and when to report. You must report executive total compensation described in paragraph b.1. of this award term:

i. As part of your registration profile at <https://www.sam.gov>.

ii. By the end of the month following the month in which this award is made, and annually thereafter.

c. Reporting of Total Compensation of Subrecipient Executives.

1. Applicability and what to report. Unless you are exempt as provided in paragraph d. of this award term, for each first-tier non-Federal entity subrecipient under this award, you shall report the names and total compensation of each of the subrecipient's five most highly compensated executives for the subrecipient's preceding completed fiscal year, if—

i. in the subrecipient's preceding fiscal year, the subrecipient received—

(A) 80 percent or more of its annual gross revenues from Federal procurement contracts (and subcontracts) and Federal financial assistance subject to the Transparency Act, as defined at 2 CFR 170.320 (and subawards) and,

(B) \$25,000,000 or more in annual gross revenues from Federal procurement contracts (and subcontracts), and Federal financial assistance subject to the Transparency Act (and subawards); and

ii. The public does not have access to information about the compensation of the executives through periodic reports filed under section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(a), 78o(d)) or section 6104 of the Internal Revenue Code of 1986. (To determine if the public has access to the compensation information, see the U.S. Security and Exchange Commission total compensation filings at <http://www.sec.gov/answers/execomp.htm>.)

2. Where and when to report. You must report subrecipient executive total compensation described in paragraph c.1. of this award term:

i. To the recipient.

ii. By the end of the month following the month during which you make the subaward. For example, if a subaward is obligated on any date during the month of October of a given year (i.e., between October 1 and 31), you must report any required compensation information of the subrecipient by November 30 of that year.

d. Exemptions.

If, in the previous tax year, you had gross income, from all sources, under \$300,000, you are exempt from the requirements to report:

i. Subawards, and

ii. The total compensation of the five most highly compensated executives of any subrecipient.

e. Definitions. For purposes of this award term:

1. Federal Agency means a Federal agency as defined at 5 U.S.C. 551(1) and further clarified by 5 U.S.C. 552(f).

2. Non-Federal entity means all of the following, as defined in 2 CFR part 25:

i. A Governmental organization, which is a State, local government, or Indian tribe;

ii. A foreign public entity;

iii. A domestic or foreign nonprofit organization; and,

iv. A domestic or foreign for-profit organization

3. Executive means officers, managing partners, or any other employees in management positions.

4. Subaward:

i. This term means a legal instrument to provide support for the performance of any portion of the substantive project or program for which you received this award and that you as the recipient award to an eligible subrecipient.

ii. The term does not include your procurement of property and services needed to carry out the project or program (for further explanation, see 2 CFR 200.331).

iii. A subaward may be provided through any legal agreement, including an agreement that you or a subrecipient considers a contract.

5. Subrecipient means a non-Federal entity or Federal agency that:

i. Receives a subaward from you (the recipient) under this award; and

ii. Is accountable to you for the use of the Federal funds provided by the subaward.

6. Total compensation means the cash and noncash dollar value earned by the executive during the recipient's or subrecipient's preceding fiscal year and includes the following (for more information see 17 CFR 229.402(c)(2)).

15

Equal Employment Opportunity Plan (EEOP): All recipients of funding from the COPS Office must comply with the federal regulations pertaining to the development and implementation of an Equal Employment Opportunity Plan. 28 C.F.R. Part 42 subpart E.

16

Reports/Performance Goals: To assist the COPS Office in monitoring and tracking the performance of your award, your agency will be responsible for submitting semi-annual programmatic performance reports that describe project activities during the reporting period and quarterly Federal Financial Reports using Standard Form 425 (SF-425). 2 C.F.R. §§ 200.328 - 200.329. The performance report is used to track your agency's progress toward implementing community policing strategies and to collect data to gauge the effectiveness of increasing your agency's community policing capacity through COPS Office funding. The

Federal Financial Report is used to track the expenditures of the recipient's award funds on a cumulative basis throughout the life of the award.

17

Recipient Integrity and Performance Matters: For awards over \$500,000, the recipient agrees to comply with the following requirements of 2 C.F.R. Part 200, Appendix XII to Part 200 – Award Term and Condition for Recipient Integrity and Performance Matters:

A. Reporting of Matters Related to Recipient Integrity and Performance

1. General Reporting Requirement

If the total value of your currently active grants, cooperative agreements, and procurement contracts from all Federal awarding agencies exceeds \$10,000,000 for any period of time during the period of performance of this Federal award, then you as the recipient during that period of time must maintain the currency of information reported to the System for Award Management (SAM) that is made available in the designated integrity and performance system (currently the Federal Awardee Performance and Integrity Information System (FAPIS)) about civil, criminal, or administrative proceedings described in paragraph 2 of this award term and condition. This is a statutory requirement under section 872 of Public Law 110-417, as amended (41 U.S.C. 2313). As required by section 3010 of Public Law 111-212, all information posted in the designated integrity and performance system on or after April 15, 2011, except past performance reviews required for Federal procurement contracts, will be publicly available.

2. Proceedings About Which You Must Report

Submit the information required about each proceeding that:

a. Is in connection with the award or performance of a grant, cooperative agreement, or procurement contract from the Federal Government;

b. Reached its final disposition during the most recent five-year period; and

c. Is one of the following:

(1) A criminal proceeding that resulted in a conviction, as defined in paragraph 5 of this award term and condition;

(2) A civil proceeding that resulted in a finding of fault and liability and payment of a monetary fine, penalty, reimbursement, restitution, or damages of \$5,000 or more;

(3) An administrative proceeding, as defined in paragraph 5. of this award term and condition, that resulted in a finding of fault and liability and your payment of either a monetary fine or penalty of \$5,000 or more or reimbursement, restitution, or damages in excess of \$100,000; or

(4) Any other criminal, civil, or administrative proceeding if:

(i) It could have led to an outcome described in paragraph 2.c.(1), (2), or (3) of this award term and condition;

(ii) It had a different disposition arrived at by consent or compromise with an acknowledgment of fault on your part; and

(iii) The requirement in this award term and condition to disclose information about the proceeding does not conflict with applicable laws and regulations.

3. Reporting Procedures

Enter in the SAM Entity Management area the information that SAM requires about each proceeding described in paragraph 2 of this award term and condition. You do not need to submit the information a second time under assistance awards that you received if you already provided the information through SAM because you were required to do so under Federal procurement contracts that you were awarded.

4. Reporting Frequency

During any period of time when you are subject to the requirement in paragraph 1 of this award term and condition, you must report proceedings information through SAM for the most recent five year period, either

to report new information about any proceeding(s) that you have not reported previously or affirm that there is no new information to report. Recipients that have Federal contract, grant, and cooperative agreement awards with a cumulative total value greater than \$10,000,000 must disclose semiannually any information about the criminal, civil, and administrative proceedings.

5. Definitions

For purposes of this award term and condition:

a. Administrative proceeding means a non-judicial process that is adjudicatory in nature in order to make a determination of fault or liability (e.g., Securities and Exchange Commission Administrative proceedings, Civilian Board of Contract Appeals proceedings, and Armed Services Board of Contract Appeals proceedings). This includes proceedings at the Federal and State level but only in connection with performance of a Federal contract or grant. It does not include audits, site visits, corrective plans, or inspection of deliverables.

b. Conviction, for purposes of this award term and condition, means a judgment or conviction of a criminal offense by any court of competent jurisdiction, whether entered upon a verdict or a plea, and includes a conviction entered upon a plea of nolo contendere.

c. Total value of currently active grants, cooperative agreements, and procurement contracts includes—

(1) Only the Federal share of the funding under any Federal award with a recipient cost share or match; and

(2) The value of all expected funding increments under a Federal award and options, even if not yet exercised.

18

Debarment and Suspension: The recipient agrees not to award federal funds under this program to any party which is debarred or suspended from participation in federal assistance programs. 2 C.F.R. Part 180 (Government-wide Nonprocurement Debarment and Suspension) and 2 C.F.R. Part 2867 (DOJ Nonprocurement Debarment and Suspension).

19

Employment Eligibility: The recipient agrees to complete and keep on file, as appropriate, the Department of Homeland Security, U.S. Citizenship and Immigration Services (USCIS) Employment Eligibility Verification Form (I-9). This form is to be used by recipients of federal funds to verify that persons are eligible to work in the United States. Immigration Reform and Control Act of 1986 (IRCA), Public Law 99-603.

20

Conflict of Interest: Recipients and subrecipients must disclose in writing to the COPS Office or pass-through entity, as applicable, any potential conflict of interest affecting the awarded federal funding in 2 C.F.R. § 200.112.

21

Additional High-Risk Recipient Requirements: The recipient agrees to comply with any additional requirements that may be imposed during the award performance period if the awarding agency determines that the recipient is a high-risk recipient. 2 C.F.R. § 200.208.

22

Prohibition on Certain Telecommunications and Video Surveillance Services or Equipment: Recipient agrees that it, and its subrecipients, will not use award funds to extend, renew, or enter into any contract to procure or obtain any covered telecommunication and video surveillance services or equipment as described in 2 CFR §200.216. Covered services and equipment include telecommunications or video surveillance services or equipment produced or provided by Huawei Technologies Company or ZTE Corporation (or any

subsidiary or affiliate of such entities); Hytera Communications Corporation, Hangzhou Hikvision Digital Technology Company, or Dahua Technology Company (or any subsidiary or affiliate of such entities); or an entity that the Secretary of Defense, in consultation with the Director of the National Intelligence or the Director of the Federal Bureau of Investigation, reasonably believes to be an entity owned or controlled by, or otherwise connected to, the government of China. The use of award funds on covered telecommunications or video surveillance services or equipment are unallowable.

2. C.F.R. § § 200.216 & 471. See also Section 889 of the John S. McCain National Defense Authorization Act of Fiscal Year 2019, Public Law 115-232.

23

Travel Costs: Travel costs for transportation, lodging and subsistence, and related items are allowable with prior approval from the COPS Office. Payment for allowable travel costs will be in accordance with 2 C.F.R. § 200.475.

24

The Paperwork Reduction Act Clearance and Privacy Act Review: Recipient agrees, if required, to submit all surveys, interview protocols, and other information collections to the COPS Office for submission to the Office of Management and Budget (OMB) for clearance under the Paperwork Reduction Act (PRA). Before submission to OMB, all information collections that request personally identifiable information must be reviewed by the COPS Office to ensure compliance with the Privacy Act. The Privacy Act compliance review and the PRA clearance process may take several months to complete. 44 U.S.C. §§ 3501-3520 and 5 U.S.C. § 552a.

25

Supplementing, not Supplanting: State, local, and tribal government recipients must use award funds to supplement, and not supplant, state, local, or Bureau of Indian Affairs (BIA) funds that are already committed or otherwise would have been committed for award purposes (hiring, training, purchases, and/or activities) during the award period. In other words, state, local, and tribal government recipients may not use COPS Office funds to supplant (replace) state, local, or BIA funds that would have been dedicated to the COPS Office-funded item(s) in the absence of the COPS Office award. 34 U.S.C. § 10384(a).

26

Sole Source Justification: Recipients who have been awarded funding for the procurement of an item (or group of items) or service in excess of \$250,000 and who plan to seek approval for use of a noncompetitive procurement process must provide a written sole source justification to the COPS Office for approval prior to obligating, expending, or drawing down award funds for that item or service. 2 C.F.R. § 200.325(b)(2).

27

Evaluations: The COPS Office may conduct monitoring or sponsor national evaluations of its award programs. The recipient agrees to cooperate with the monitors and evaluators. 34 U.S.C. § 10385(b).

28

News Media: The recipient agrees to comply with the COPS Office policy on contact with the news media. The policy establishes the COPS Office Communications Division as the principal point of contact for the news media for issues relevant to the COPS Office or parameters of this award. The recipient agrees to refer all media inquiries on these topics directly to the COPS Office Communications Division at 202-514-9079.

29

Modifications: Award modifications are evaluated on a case-by-case basis in accordance with 2 C.F.R. §

200.308(f). For federal awards in excess of \$250,000, any modification request involving the reallocation of funding between budget categories that exceed or are expected to exceed 10 percent (10%) of the total approved budget requires prior written approval by the COPS Office. Regardless of the federal award amount or budget modification percentage, any reallocation of funding is limited to approved budget categories. In addition, any budget modification that changes the scope of the project requires prior written approval by the COPS Office.

30

Public Release Information: The recipient agrees to submit one copy of all reports and proposed publications resulting from this award ninety (90) days prior to public release. Any publications (written, curricula, visual, sound, or websites) or computer programs, whether or not published at government expense, shall contain the following statement:

"This project was supported, in whole or in part, by federal award number [YYYY-XX-XXXX] awarded to [Entity] by the U.S. Department of Justice, Office of Community Oriented Policing Services. The opinions contained herein are those of the author(s) or contributor(s) and do not necessarily represent the official position or policies of the U.S. Department of Justice. References to specific individuals, agencies, companies, products, or services should not be considered an endorsement by the author(s), contributor(s), or the U.S. Department of Justice. Rather, the references are illustrations to supplement discussion of the issues.

The Internet references cited in this publication were valid as of the date of publication. Given that URLs and websites are in constant flux, neither the author(s) nor the COPS Office can vouch for their current validity."

31

Human Subjects Research: The recipient agrees to comply with the provisions of the U.S. Department of Justice's common rule regarding Protection of Human Subjects, 28 C.F.R. Part 46, prior to the expenditure of Federal funds to perform such activities, if applicable. The recipient also agrees to comply with 28 C.F.R. Part 22 regarding the safeguarding of individually identifiable information collected from research participants.

32

Copyright: If applicable, the recipient may copyright any work that is subject to copyright and was developed, or for which ownership was acquired, under this award in accordance with 2 C.F.R. § 200.315(b). The COPS Office reserves a royalty-free, nonexclusive and irrevocable license to reproduce, publish, or otherwise use the work, in whole or in part (including create derivative works), for Federal Government purposes, and to authorize others to do so. The COPS Office also reserves the right, at its discretion, not to publish deliverables and other materials developed under this award as a U.S. Department of Justice resource.

Products and deliverables developed with award funds and published as a U.S. Department of Justice resource will contain the following copyright notice:

"This resource was developed under a federal award and may be subject to copyright. The U.S. Department of Justice reserves a royalty-free, nonexclusive, and irrevocable license to reproduce, publish, or otherwise use the work for Federal Government purposes and to authorize others to do so. This resource may be freely distributed and used for noncommercial and educational purposes only."

33

Computer Network Requirement: The recipient understands and agrees that no award funds may be used to maintain or establish a computer network unless such network blocks the viewing, downloading, and exchanging of pornography. Nothing in this requirement limits the use of funds necessary for any federal, state, tribal, or local law enforcement agency or any other entity carrying out criminal investigations, prosecution, or adjudication activities. Consolidated Appropriations Act, 2022, Public Law 117-103, Division B, Title V, Section 527.

34

Allowable Costs: The funding under this award is for the payment of approved costs for program-specific purposes. The allowable costs approved for your agency's award are limited to those listed in your agency's award package. In accordance with 2 C.F.R. § 200.400(g), the recipient must forgo any profit or management fee. Your agency may not use award funds for any costs not identified as allowable in the award package.

35

Extensions: Recipients may request an extension of the award period to receive additional time to implement their award program. Such extensions do not provide additional funding. Only those recipients that can provide a reasonable justification for delays will be granted no-cost extensions. Extension requests must be received prior to the end date of the award. 2 C.F.R. §§ 200.308(e)(2) and 200.309.

36

Domestic preferences for procurements: Recipient agrees that it, and its subrecipients, to the greatest extent practicable, will provide a preference for the purchase, acquisition, or use of goods, products, and materials produced in, and services offered in, the United States. 2. C.F.R. § 200.322 and Executive Order 14005, Ensuring the Future is Made in All of America by All of America's Workers, January 25, 2021.

37

Conditional Budget Clearance: The recipient understands that the budget for this award is pending review and approval. Until approved, the recipient agrees not to obligate, expend or draw down funds until the COPS Office has approved the budget and an Award Condition Modification (ACM) has been issued to remove this award condition. Recipients will not be reimbursed for any obligations or expenditures that are not approved.

☐ *I have read and understand the information presented in this section of the Federal Award Instrument.*

Award Acceptance

Declaration and Certification to the U.S. Department of Justice as to Acceptance

By checking the declaration and certification box below, I--

A. Declare to the U.S. Department of Justice (DOJ), under penalty of perjury, that I have authority to make this declaration and certification on behalf of the applicant.

B. Certify to DOJ, under penalty of perjury, on behalf of myself and the applicant, to the best of my knowledge and belief, that the following are true as of the date of this award acceptance: (1) I have conducted or there was conducted (including by applicant's legal counsel as appropriate and made available to me) a diligent review of all terms and conditions of, and all supporting materials submitted in connection with, this award, including any assurances and certifications (including anything submitted in connection therewith by a person on behalf of the applicant before, after, or at the time of the application submission and any materials that accompany this

acceptance and certification); and (2) I have the legal authority to accept this award on behalf of the applicant.

C. Accept this award on behalf of the applicant.

D. Declare the following to DOJ, under penalty of perjury, on behalf of myself and the applicant: (1) I understand that, in taking (or not taking) any action pursuant to this declaration and certification, DOJ will rely upon this declaration and certification as a material representation; and (2) I understand that any materially false, fictitious, or fraudulent information or statement in this declaration and certification (or concealment or omission of a material fact as to either) may be the subject of criminal prosecution (including under 18 U.S.C. §§ 1001 and/or 1621, and/or 34 U.S.C. §§ 10271-10273), and also may subject me and the applicant to civil penalties and administrative remedies under the federal False Claims Act (including under 31 U.S.C. §§ 3729-3730 and/or §§ 3801-3812) or otherwise.

Justification for Budget Adjustment:

Staff recommends that the City Council establish a budget for a grant award from the U.S. Department of Justice, Office Of Community Oriented Policing Services (COPS) to fund the purchase of a Virtual Reality system. It is the goal of the Roseville Police Department to create, enhance, and sustain a comprehensive de-escalation training program by obtaining a Virtual Reality system for use in force options, tactical communication, duty to intervene and de-escalation skills training. This budget adjustment increases the revenue and expenditure budgets for project No.700046 by the total grant award of \$150,000.

Meeting Date: 1/18/2023

Item #: 7.26.

RECOMMENDATION TO COUNCIL

Staff recommends that the City Council adopt an ordinance approving a budget adjustment associated with funding from the Homeland Security Grant Program.

BACKGROUND

Congress, through the Federal Department of Homeland Security, periodically allocates funds for local security and preparedness needs. Sometimes the allocations are based on population, and sometimes they are based on identified local risks. The funds are distributed first to the states, and the states distribute them to counties. In each county an Approval Authority, comprised of the public health officer, the sheriff, a city police chief, a county fire agency representative and a city fire agency representative, prioritizes needs and allocates funds for specific items. Placer County's Office of Emergency Services (OES) administers the grants, files claims for reimbursement from the federal government, and then distributes the reimbursements to local agencies. In many instances the County OES gives the City a very short window of time to make the necessary purchases with the approved funds, as some funding is left over from previous grant years and needs to be expended immediately.

The Police Department was given approval to purchase a portable X-ray system, dual band radios, radio antennas, riot protective uniforms, protective pads and footwear.

FISCAL IMPACT

The recommended budget adjustment will add a total of \$140,259 to the Police Department's budget in the City's Grants Fund. The City will be reimbursed for the purchases by Federal Homeland Security Funds administered by Placer County OES. There will be no net fiscal impact on the City.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in

a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. A budget adjustment meets the above criteria and is not subject to CEQA. No additional environmental review is required.

RECOMMENDATION TO COUNCIL

Staff recommends City Council:

1. Adopt a resolution authorizing the City Manager to execute an Agreement for Sale of Conservation Credits from Riparian Ranch, LLC in the amount of \$152,000 as mitigation for impacts to riparian and salmonid habitat.
2. Adopt an ordinance to approve a budget adjustment in the amount of \$1,500,000.
3. Approve the Agreement for Acquisition of Real Property and Escrow Instructions for the purchase of real property from the following property owners:
 - SFC Windscape Investors, L.P. in the amount of \$1,800; and
 - Jacqueline Rice in the amount of \$16,000; and
 - Emily Baldwin and Matthew Baldwin in the amount of \$45,400; and
 - Benjamin Haugen and Melissa Haugen in the amount of \$36,300; and
 - Jerry Lee, Elise Lee, Lisa Marie Lee, and DeVrae Lee in the amount of \$82,600; and
 - Jack Hoffman and Cheryl Hoffman in the amount of \$12,500; and
 - Joey Stetson and Lisa Stetson in the amount of \$30,000; and
 - Charles Eckstrom IV and Jennifer Eckstrom in the amount of \$13,800; and
 - Dale McAfee and Brenda McAfee in the amount of \$325,000; and
 - David Schmidt and Janet Schmidt in the amount of \$424,500
4. Adopt resolutions authorizing the City Manager to execute the agreements and any other related escrow documents on behalf of the City of Roseville.

BACKGROUND

The Dry Creek Greenway East trail project is a proposed paved multi-use trail along Dry, Cirby, and Linda Creeks from Darling Way/Riverside Avenue to the City limits at S. Cirby Way/Old Auburn Road. The project is identified as a proposed Class I bikeway in the City of Roseville

General Plan and Bicycle Master Plan.

Phase 1 of the project will result in two (2) miles of Class I trail from the existing Saugstad Park Trail at Darling Way to the existing Maidu Park Trail at Rocky Ridge Drive.

The project has been designed to minimize effects on biological resources. However, the project will have an impact to the riparian habitat along segments of the Dry Creek corridor. As a result, the City obtained a permit from the National Marine Fisheries Service (NMFS) for the construction of the project. To compensate for the permanent loss of riparian habitat, the permit requires the purchase of 0.078 acres of riparian floodplain forest/salmonid habitat non shaded riverine aquatic (Non SRA) restoration conservation credits and 0.868 riparian floodplain forest/salmonid (SRA) conservation credits at an approved Mitigation Bank. The cost of the required credits is \$152,000.

In addition, the City obtained the services of Paragon Partners to negotiate the acquisition agreements on the City's behalf with SFC Windscape Investors, L.P, Ms. Rice, the Baldwins, the Haugens, the Lees, the Hoffmans, the Stetsons, the Eckstroms, the McAfees and the Schmidts. Pattison and Associates prepared the appraisal reports that determined the "Fair Market Value" for the acquisitions.

The required acquisitions from each property are as follows:

- SFC Windscape Investors, L.P: 351 s.f. of temporary construction easement in the amount of \$1,800
- Rice: 1,807 s.f. of fee acquisition, 1,815 s.f. of ingress/egress/maintenance easement and 895 s.f. of slope easement in the amount of \$16,000
- Baldwin: 4,229 s.f. of fee acquisition and 2,444 s.f. of ingress/egress/maintenance easement in the amount of \$45,400
- Haugen: 2,387 s.f. of fee acquisition and 2,098 s.f. of ingress/egress/maintenance easement in the amount of \$36,300
- Lee: 17,314 s.f. of pedestrian and bicycle access easement and 669 s.f. of slope easement in the amount of \$82,600
- Hoffman: 1,298 s.f. of fee acquisition and 1,414 s.f. of ingress/egress/maintenance easement in the amount of \$12,500
- Stetson: 2,776 s.f. of fee acquisition and 2,838 s.f. of ingress/egress/maintenance easement in the amount of \$30,000
- Eckstrom: 105 s.f. of fee acquisition and 1,401 s.f. of ingress/egress/maintenance easement in the amount of \$13,800
- McAfee: 10,245 s.f. of fee acquisition in the amount of \$325,000
- Schmidt: 17,922 s.f. of fee acquisition in the amount of \$424,500

These property acquisitions are necessary for construction of the trail. Staff has worked with the design consultant, acquisition team, and the property owners to minimize the trail impact on the remaining parcels. Project construction is planned to begin in Summer of 2023.

Public Outreach:

Since 2008, the Dry Creek Greenway East Project has been driven by robust public participation and community input. There have been multiple community workshops/open houses, stakeholder representative group meetings, online surveys, project email, and social media updates. Staff will continue to engage with the community as the project moves forward.

FISCAL IMPACT

The budget adjustment totaling \$1,500,000 from the Local Transportation Fund (LTF) will provide funds for mitigation credit purchases, professional services, and right-of-way acquisition. The Dry Creek Greenway East Trail Project is fully funded by federal, state and local sources: Solutions for Congested Corridors (SCCP), Active Transportation Program (ATP), Congestion Mitigation and Air Quality (CMAQ), and Local Transportation (LTF) Funds. No General Fund resources will be used for the project.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA Guidelines §15060(c)(3) and §1537; therefore no additional environmental review is required for the requested budget adjustment, or purchase of mitigation credits. The right of way acquisitions required for the project were previously evaluated in the Dry Creek Greenway East Trail Project EIR, certified March 20, 2019 (SCH No. 2014032087). Because the right of way acquisitions are consistent with the project evaluated in the EIR, no additional CEQA action is required.

APPROVING AN AGREEMENT FOR SALE OF CONSERVATION CREDITS FREMONT LANDING CONSERVATION BANK, BY AND BETWEEN RIPARIAN RANCH, LLC AND THE CITY OF ROSEVILLE AND, AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE

WHEREAS, an Agreement for Sale of Conservation Credits Fremont Landing Conservation Bank, National Marine Fisheries Service (NMRS) File No. WCR-2019-00608, by and between Riparian Ranch, LLC and the City of Roseville, has been reviewed by the City Council; and

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Roseville that said agreement is hereby approved and that the City Manager is authorized to execute it on behalf of the City of Roseville.

PASSED AND ADOPTED by the Council of the City of Roseville this ____ day of _____, 2023, by the following vote on roll call:

**AGREEMENT FOR SALE OF CONSERVATION CREDITS
FREMONT LANDING CONSERVATION BANK**

NMFS File No. WCR-2019-00608

This Agreement is made and entered into this _____ day of _____, 2023 by and between RIPARIAN RANCH, LLC, a California limited liability company (“Bank Owner”) and the CITY OF ROSEVILLE, a municipal corporation (“Project Proponent”) as follows:

RECITALS

A. The Bank Owner has entitlements to the Fremont Landing Conservation Bank (“Bank”) located in Yolo County California; and

B. The Bank has been authorized by the National Marine Fisheries Service (“NMFS”) to operate as a conservation bank with conservation credits available for sale; and

C. Project Proponent is seeking to implement the project described on Exhibit “A” attached hereto (“Project”), which would unavoidably and adversely impact habitat thereon, and seeks to compensate for the loss of habitat by purchasing conservation credits from Bank Owner; and

D. Project Proponent has been authorized by NMFS Biological Opinion File No. WCR-2019-00608 to purchase 0.078 acre of non-SRA credits and 0.868 acre of SRA credits to compensate for impacts to California Central Valley (“CCV”) steelhead associated with the Project; and

E. Project Proponent desires to purchase from Bank Owner and Bank Owner desires to sell to Project Proponent 0.95 acre of conservation credits, comprised of 0.08 riparian floodplain forest/salmonid habitat restoration (non-SRA riparian) conservation credits and 0.87 riparian floodplain forest/salmonid/SRA habitat restoration (SRA) conservation credits at Bank.

NOW, THEREFORE, THE PARTIES AGREE AS FOLLOWS:

1. Bank Owner hereby agrees to sell to Project Proponent and Project Proponent hereby agrees to purchase from Bank Owner 0.95 acre of conservation credits, comprised of 0.08 riparian floodplain forest/salmonid habitat restoration (non-SRA riparian) conservation credits and 0.87 riparian floodplain forest/salmonid/SRA habitat restoration (SRA) conservation credits (collectively, the “Conservation Credits”) for the purchase price of \$152,000.00 (“Purchase Price”), in accordance with the terms hereof. The Purchase Price for the Conservation Credits shall be paid by wire transfer of funds or by check payable to “**Riparian Ranch, LLC.**” Upon receipt of the Purchase Price, Bank Owner will deliver to Project Proponent an executed Bill of Sale in the form attached hereto as Exhibit “B.”

2. The sale and transfer herein is not intended as a sale or transfer to Project Proponent of a security, license, lease, easement, or possessory or non-possessory interest in real property, nor the granting of any interest of the foregoing.

3. Project Proponent shall have no obligation whatsoever by reason of the purchase of the Conservation Credits, to support, pay for, monitor, report on, sustain, continue in perpetuity, or otherwise be obligated or liable for the success or continued expense or maintenance in perpetuity of the Conservation Credits sold, or the Bank. As required by law, Bank Owner shall monitor and make reports to the appropriate agency or agencies on the status of any Conservation Credits sold to Project Proponent. Bank Owner shall be fully and completely responsible for satisfying any and all conditions placed on the Bank or the Conservation Credits, by all state or federal jurisdictional agencies. Bank Owner hereby shall indemnify Project Proponent of and from all such liabilities and obligations.

4. The Conservation Credits sold and transferred to Project Proponent shall be nontransferable and non-assignable, and shall not be used as conservation mitigation for any other Project or purpose, except as set forth herein.

5. Project Proponent must deliver the Purchase Price to Bank Owner within 30 days of the date of this Agreement. After the 30-day period this Agreement be considered null and void and Bank Owner shall have no further obligations hereunder.

6. Upon purchase of the Conservation Credits specified above, Bank Owner shall complete the payment receipt form attached hereto as Exhibit "C," and shall submit the completed payment receipt to NMFS.

IN WITNESS WHEREOF, the parties have executed this Agreement the day and year first above written.

BANK OWNER

RIPARIAN RANCH, LLC, a California limited liability company

By:

Its: Manager

PROJECT PROPONENT

CITY OF ROSEVILLE, a municipal corporation

By: _____
Name: Dominick Casey
Its: City Manager

Exhibit “A”

**DESCRIPTION OF PROJECT
TO BE
MITIGATED**

The proposed Project is for the construction of a 4.25-mile multi-use trail from the existing Saugstad/Royer Park trail to the City of Roseville limits just past the Old Auburn Road/South Cirby Way intersection, in the City of Roseville, Placer County, California. The credits purchased under this Agreement are for the Project in its entirety.

The trail would follow creek corridors along portions of Dry Creek, Cirby Creek, and Linda Creek (the creeks) and require up to eight new or modified bridges for stream crossings. The proposed trail would be 10-feet wide, paved, with two-foot shoulders (decomposed granite and aggregate base) on each side for a total width of 14 feet. This would be widened in areas where additional shoulder or trail width is needed for safety or comfort, in these instances shoulder width could be increased to between 5 and 10 feet on one or both sides of the trail.

Exhibit “B”

**BILL OF SALE
Contract #FRCB-23-____
NMFS File No. WCR-2019-00608**

In consideration of \$152,000.00, receipt of which is hereby acknowledged, RIPARIAN RANCH, LLC, a California limited liability company (“Bank Owner”) does hereby bargain, sell and transfer to the CITY OF ROSEVILLE, a municipal corporation (“Project Proponent”), 0.95 acre of conservation credits, comprised of 0.08 riparian floodplain forest/salmonid habitat restoration (non-SRA riparian) conservation credits and 0.87 riparian floodplain forest/salmonid/SRA habitat restoration (SRA) conservation credits for the Dry Creek Greenway Trail Project in the Fremont Landing Conservation Bank in Yolo County California, developed and approved under the authority of the National Marine Fisheries Service.

Bank Owner represents and warrants that it has good title to the credits, has good right to sell the same, and that they are free and clear of all claims, liens, or encumbrances.

**AGREEMENT FOR ACQUISITION OF REAL PROPERTY
(ESCROW INSTRUCTIONS)**

THIS AGREEMENT is entered into this _____ day of _____, 2022 by and between the CITY OF ROSEVILLE, a Municipal Corporation (hereinafter called "Buyer"), and SFC Windscape Investors, L.P., a California limited partnership, (hereinafter called "Seller") for acquisition by Buyer of one Temporary Construction Easement over real property hereinafter set forth.

IT IS HEREBY MUTUALLY AGREED BETWEEN THE PARTIES AS FOLLOWS:

1. **AGREEMENT TO SELL AND PURCHASE.** Seller agrees to sell to Buyer, and Buyer agrees to purchase from Seller, upon the terms and for the consideration set forth in this agreement, the following interest(s) in property, all situated in the City of Roseville, County of Placer, State of California:

A. Temporary Construction Easement (Attached as Attachment 1)

The legal description of the interest is identified in the referenced attachment(s), which are hereby incorporated by reference.

2. **PURCHASE PRICE.** The total purchase price, payable in cash through escrow, shall be the sum of:

ONE THOUSAND EIGHT HUNDRED AND 00/100 DOLLARS
(\$1,800.00)

The total purchase price includes: acquisition value of the property interests identified in Section 1.

3. **CONVEYANCE OF TITLE.** Seller agrees to convey the easement by Easement Deed. Seller agrees to convey to Buyer marketable easement free and clear of all recorded and unrecorded liens, encumbrances, assessments, easements, leases, and taxes EXCEPT:

- A. All taxes for the current fiscal year prorated as per Section 6 hereinafter.
- B. Quasi-public utility, public alley, public street easements, and rights of way of record.
- C. Preliminary Title Report to be provided by Placer Title Company and approved in Escrow.

4. **POSSESSION.** It is agreed and confirmed by the parties hereto that notwithstanding other provisions in this contract, the right of possession and use of the subject property by Buyer, including the right to remove and dispose of improvements, shall commence on the date the amount of funds as specified in Section 2 herein are deposited into the escrow controlling this transaction. The amount shown in Section 2 herein includes, but is not limited to, full payment for such possession and use, including damages, if any, from said date.

5. TITLE INSURANCE POLICY. Escrow Agent shall, following recording of deed to Buyer, provide Buyer with CLTA Standard Coverage Policy of Title Insurance in the amount of \$1,800.00 issued by Placer Title Company showing the title to the property vested in Buyer, subject only to the exceptions set forth in Section 3 and the printed exceptions and stipulations in said policy. Buyer agrees to pay the premium charged therefore.

6. ESCROW. Buyer agrees to open an escrow in accordance with this Agreement at Placer Title Company, 1508 Eureka Road, Suite 150 Roseville, CA 95661 (916) 782-3711. This Agreement constitutes the joint escrow instructions of Buyer and Seller, and Escrow Agent (Tracy Murphy) to whom these instructions are delivered is hereby empowered to act under this Agreement. The parties hereto agree to do all acts necessary to close this escrow in the shortest possible time.

Seller agrees to deposit with Escrow Agent prior to the Close of Escrow original, fully executed and acknowledged deed prepared by Escrow Agent and any other customary agreements, consents, or documents reasonably necessary to effectuate the purchase of the subject property. Buyer agrees to deposit the purchase price and **certificate of acceptance** upon demand of Escrow Agent.

Insurance policies for fire or casualty are not to be transferred, and Seller will cancel its own policies after close of escrow.

All funds received in this escrow shall be deposited with other escrow funds in a general escrow account(s) and may be transferred to any other such escrow trust account in any State or National Bank doing business in the State of California. All disbursements shall be made either by check or wire transfer from such account.

ESCROW AGENT IS AUTHORIZED AND IS INSTRUCTED TO COMPLY WITH THE FOLLOWING TAX ADJUSTMENT PROCEDURE:

- A. Pay and charge Seller for any unpaid delinquent taxes and/or penalties and interest thereon, and for any delinquent or non-delinquent assessments or bonds against the property;
- B. In the event this escrow closes between July 1 and November 1, and current tax information is not available from title insurer, Escrow Agent is instructed to withhold from Seller's proceeds an amount equal to 120% of the prorated amount due based upon the previous fiscal year's second half tax bill. At such time that the tax information is available, Escrow Agent shall make a check payable to the County Tax Collector for Seller's prorated portion of taxes and forward the same to the Buyer and shall refund any difference to the Seller. In the event the amount withheld is not sufficient to pay Seller's prorated portion of taxes due, the Seller herein agrees to immediately pay the difference;

In the event said tax information is available, Seller's taxes shall be prorated in accordance with Paragraph "C" below.

- C. From the date that tax information is available, as per Paragraph "B" hereinabove, up to and including June 30th, Seller's current taxes, if unpaid, shall be prorated to date of close of escrow on the basis of a 365 day year in accordance with Tax Collector's

proration requirements, together with penalties and interest, if said current taxes are unpaid after December 10 and/or April 10. At close of escrow, a check payable to the County Tax Collector for Seller's prorata portion of taxes shall be forwarded to Buyer with closing statement;

- D. Any taxes which have been paid by Seller, prior to opening of this escrow, shall not be prorated between Buyer and Seller, but Seller shall have the sole right, after close of escrow, to apply to the County Tax Collector of said county for a refund. This refund would apply to the period after Buyer's acquisition, pursuant to Revenue and Taxation Code Section 5096.7.

ESCROW AGENT IS AUTHORIZED TO, AND SHALL:

- E. Pay and charge Seller, upon Seller's written approval, for any amount necessary to place title in the condition necessary to satisfy Section 3 of this Agreement, excluding any penalty for prepayment to any lienholder in compliance with Section 1265.240 of the Code of Civil Procedure ("Eminent Domain Law");
- F. Pay and charge Buyer for any escrow fees, charges, and costs payable under Section 6 of this Agreement;
- G. Disburse funds and deliver deed when conditions of this escrow have been fulfilled by Buyer and Seller.

The term "close of escrow", if and where written in these instructions, shall mean the date that all necessary instruments of conveyance are recorded in the office of the County Recorder. Recordation of instruments delivered through this escrow is authorized if necessary or proper in the issuance of said policy of title insurance.

All time limits within which any matter herein specified is to be performed may be extended by mutual agreement of the parties hereto. Any amendment of, or supplement to, any instructions must be in writing.

TIME IS OF THE ESSENCE IN THESE INSTRUCTIONS AND ESCROW IS TO CLOSE AS SOON AS POSSIBLE. The parties hereto agree to perform all acts reasonably necessary to close this escrow within one hundred twenty (120) days following the opening of escrow.

Responsibility for Escrow Agent under this Agreement is expressly limited to Sections 1, 2, 3, 4, 5, 6, 7, 9, 10, 11, and 17 and to its liability under any policy of title insurance issued in regard to this transaction.

7. **ESCROW FEES, CHARGES AND COSTS.** Buyer agrees to pay all Buyer's and Seller's usual fees, charges, and costs which arise in this escrow.

8. **RENTAL AND OCCUPANCY BY SELLER.** Seller warrants that there are no oral or written leases on all or any portion of property.

9. PERMISSION TO ENTER ON PREMISES. Seller hereby grants to Buyer, or its authorized agents, permission to enter upon the Property at all reasonable times prior to close of escrow for the purpose of making necessary or appropriate inspections. It is understood that Buyer and its contractors will indemnify Seller and hold them harmless from any and all liability for bodily injury, death and property damage arising out of or in any way connected with such inspections, and reimburse Seller for all costs, expenses and loss, including attorney's fees, incurred by them in consequence of any claims, demands and causes of action which may be made or brought against them arising out of such inspections. Buyer shall provide the Seller a forty-eight (48) hour written notice before entering the property. However, Buyer shall have no obligation to indemnify Seller for any loss, liability, or damage caused by the negligence of the Seller, or any of Seller's employees, agents, or authorized users, including, but not limited to, tenants, invitees or permittees.

10. COUNTERPARTS. This Agreement may be executed in counterparts, each of which so executed shall, irrespective of the date of its execution and delivery, be deemed an original, and all such counterparts together shall constitute one and the same instrument.

11. CLOSING STATEMENT. Seller instructs Escrow Agent to release a copy of Seller's statement to Buyer, whose address is 311 Vernon St, Roseville, CA 95678; purpose being to ascertain if any reimbursements are due Seller.

12. LOSS OR DAMAGE TO IMPROVEMENTS. Loss or damage to the real property or any improvements thereon, by fire or other casualty, occurring prior to the recordation of the deed shall be at the risk of Seller. In the event that loss or damage to the real property or any improvements thereon, by fire or other casualty, occurs prior to the recordation of the deed, Buyer may elect to require that the Seller pay to Buyer the proceeds of any insurance which may become payable to Seller by reason thereof, or to permit such proceeds to be used for the restoration of the damage done, or to reduce the total price by an amount equal to the diminution in value of said property by reason of such loss or damage or the amount of insurance payable to Seller, whichever is greater.

13. EMINENT DOMAIN DISMISSAL. Seller and Buyer acknowledge that this transaction is a negotiated settlement in lieu of condemnation, and Seller hereby agrees and consents to the dismissal or abandonment of any eminent domain action in the Superior Court of the State of California in and for the County of Placer, wherein the herein described property is included and also waives any and all claims to any money on deposit in said action and further waives all attorney's fees, costs, disbursements, and expenses incurred in connection therewith. If, prior to the close of the execution of this transaction, Seller is served with a Summons and Complaint in Eminent Domain in which Seller is a named defendant, upon the closing of this transaction, Seller agrees and consents to Buyer taking a Default in said action.

14. WARRANTIES, REPRESENTATIONS, AND COVENANTS OF SELLER. Seller hereby warrants, represents, and/or covenants to Buyer that:

- A. To the best of Seller's knowledge, there are no actions, suits, material claims, legal proceedings, or any other proceedings affecting the property or any portion thereof, at law, or in equity before any court or governmental agency, domestic or foreign.
- B. To the best of Seller's knowledge, there are no encroachments onto the property by

improvements on any adjoining property, nor do any buildings or improvements encroach on other properties.

- C. Until the closing, Seller shall maintain the property in good condition and state of repair and maintenance, and shall perform all of its obligations under any service contracts or other contracts affecting the property.
- D. Until the closing, Seller shall not do anything which would impair Seller's title to any of the property.
- E. To the best of Seller's knowledge, neither the execution of this Agreement nor the performance of the obligations herein will conflict with, or breach any of the provisions of any bond, note, evidence of indebtedness, contract, lease, or other agreement or instrument to which Seller's property may be bound.
- F. Until the closing, Seller shall, upon learning of any fact or condition which would cause any of the warranties and representations in this Section 14 (Warranties, Representations, and Covenants of Seller) not to be true as of closing, immediately give written notice of such fact or condition to Buyer.

15. **HAZARDOUS WASTE.** Neither Seller nor, to the best of Seller's knowledge, any previous owner, tenant, occupant, or user of the Property used, generated, released, discharged, stored, or disposed of any hazardous waste, toxic substances, or related materials ("Hazardous Materials") on, under, in, or about the Property, or transported any Hazardous Materials to or from the Property. Seller shall not cause or permit the presence, use, generation, release, discharge, storage, or disposal of any Hazardous Materials on, under, in, or about, or the transportation of any Hazardous Materials to or from, the Property. The term "Hazardous Material" shall mean any substance, material, or waste which is or becomes regulated by any local governmental authority, the State of California, or the United States Government, including, but not limited to, any material or substance which is (i) defined as a "hazardous waste", "extremely hazardous waste", or "restricted hazardous waste" under Section 25115, 25117 or 25122.7, or listed pursuant to Section 25140 of the California Health and Safety Code, Division 20, Chapter 6.5 (Hazardous Waste Control Law), (ii) defined as "hazardous substance" under Section 25316 of the California Health and Safety Code, Division 20, Chapter 6.8 (Carpenter-Presley-Tanner Hazardous Substance Account Act), (iii) defined as a "hazardous material", "hazardous substance", or "hazardous waste" under Section 25501 of the California Health and Safety Code, Division 20, Chapter 6.95 (Hazardous Materials Release Response Plans and Inventory), (iv) defined as a "hazardous substance" under Section 25281 of the California Health and Safety Code, Division 20, Chapter 6.7 (Underground Storage of Hazardous Substances), (v) petroleum, (vi) asbestos, (vii) polychlorinated biphenyls, (viii) listed under Article 9 or defined as "hazardous" or "extremely hazardous" pursuant to Article 11 of Title 22 of the California Administrative Code, Division 4, Chapter 20, (ix) designated as a "hazardous substances" pursuant to Section 311 of the Clean Water Act, (33 U.S.C. S1317), (x) defined as a "hazardous waste" pursuant to Section 1004 of the Resource Conservation and Recovery Act, 42 U.S.C. S6901 et seq. (42 U.S.C. S6903) or (xi) defined as a "hazardous substances" pursuant to Section 101 of the Comprehensive Environmental Response, Compensation, as amended by Liability Act, 42. U.S.C. S9601 et seq. (42 U.S.C. S9601).

16. **COMPLIANCE WITH ENVIRONMENTAL LAWS.** To the best of Seller's knowledge the

Property complies with all applicable laws and governmental regulations including, without limitation, all applicable federal, state, and local laws pertaining to air and water quality, hazardous waste, waste disposal, and other environmental matters, including, but not limited to, the Clean Water, Clean Air, Federal Water Pollution Control, Solid Waste Disposal, Resource Conservation Recovery and Comprehensive Environmental Response Compensation and Liability Acts, and the California Environment Quality Act, and the rules, regulations, and ordinances of the city within which the subject property is located, the California Department of Health Services, the Regional Water Quality Control Board, the State Water Resources Control Board, the Environmental Protection Agency, and all applicable federal, state, and local agencies and bureaus.

17. INDEMNITY. Seller agrees to indemnify, defend and hold Buyer harmless from and against any claim, action, suit, proceeding, loss, cost, damage, liability, deficiency, fine, penalty, punitive damage, or expense (including, without limitation, attorneys' fees), resulting from, arising out of, or based upon (i) the presence, release, use, generation, discharge, storage, or disposal of any Hazardous Material on, under, in or about, or the transportation of any such materials to or from, the Property, or (ii) the violation, or alleged violation, of any statute, ordinance, order, rule, regulation, permit, judgment, or license relating to the use, generation, release, discharge, storage, disposal, or transportation of Hazardous Materials on, under, in, or about, to or from, the Property. This indemnity shall include, without limitation, any damage, liability, fine, penalty, punitive damage, cost, or expense arising from or out of any claim, action, suit or proceeding for personal injury (including sickness, disease, or death, tangible or intangible property damage, compensation for lost wages, business income, profits or other economic loss, damage to the natural resource or the environment, nuisance, pollution, contamination, leak, spill, release, or other adverse effect on the environment). This indemnity extends only to liability created prior to or up to the date this escrow shall close. Seller shall not be responsible for acts or omissions to act post close of this escrow.

18. CONTINGENCY. It is understood and agreed between the parties hereto that the completion of this transaction, and the escrow created hereby, is contingent upon the specific acceptance and approval from the Buyer herein.

19. WAIVER OF CLAIMS. Seller acknowledges that the acquisition of the property by Buyer is for a public purpose, and therefore, the property is otherwise subject to taking by the power of eminent domain. Seller acknowledges that this transaction is a negotiated settlement in lieu of condemnation and agrees that the purchase price to be paid herein shall constitute full and fair compensation and consideration for any and all claims that Seller may have against Buyer by reason of the acquisition, improvement, possession, use and/or occupancy of the property, and Seller hereby waives any and all claims, including, but not limited to, claims for attorney's fees, pre-condemnation damages, severance damages, business goodwill, relocation assistance, or any other claim.

20. GENERAL PROVISIONS. The terms and conditions, covenants, and agreements set forth herein shall apply to and bind the heirs, executors, administrators, assigns and successors of the parties hereto.

This Agreement and each provision contained herein may be waived, amended, supplemented, or eliminated only by mutual written agreement of the parties.

If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the

Agreement as a whole.

This Agreement contains the entire agreement between both parties, neither party relies upon any warranty or representation not contained in this Agreement.

IN WITNESS WHEREOF, the City of Roseville, a Municipal Corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the ____ day of _____, 20__, and Seller has caused this Agreement to be executed.

**AGREEMENT FOR ACQUISITION OF REAL PROPERTY
(ESCROW INSTRUCTIONS)**

THIS AGREEMENT is entered into this 19 day of NOVEMBER, 2022 by and between the CITY OF ROSEVILLE, a Municipal Corporation (hereinafter called "Buyer"), and Jacqueline Rice, a single woman, (hereinafter called "Seller") for acquisition by Buyer of one Partial Property Acquisition in fee, one Slope Easement and one Ingress/Egress and Maintenance Easement over real property hereinafter set forth.

IT IS HEREBY MUTUALLY AGREED BETWEEN THE PARTIES AS FOLLOWS:

1. **AGREEMENT TO SELL AND PURCHASE.** Seller agrees to sell to Buyer, and Buyer agrees to purchase from Seller, upon the terms and for the consideration set forth in this agreement, the following interest(s) in property, all situated in the City of Roseville, County of Placer, State of California:

- A. Partial Property Acquisition in fee (Attached as Attachment 1);
- B. Slope Easement (Attached as Attachment 2) and
- C. Non-Exclusive Ingress/Egress and Maintenance Easement (Attached as Attachment 3)

The legal description of each interest is identified in the referenced attachment(s), which are hereby incorporated by reference.

2. **PURCHASE PRICE.** The total purchase price, payable in cash through escrow, shall be the sum of:

SIXTEEN THOUSAND AND 00/100 DOLLARS
(\$16,000.00)

The total purchase price includes: acquisition value of the property interests identified in Section 1.

3. **CONVEYANCE OF TITLE.** Seller agrees to convey the fee interest by Grant Deed and the easements by Easement Deeds. Seller agrees to convey to Buyer marketable fee title and easements free and clear of all recorded and unrecorded liens, encumbrances, assessments, easements, leases, and taxes EXCEPT:

- A. All taxes for the current fiscal year prorated as per Section 6 hereinafter.
- B. Quasi-public utility, public alley, public street easements, and rights of way of record.
- C. Preliminary Title Report to be provided by Placer Title Company and approved in Escrow.

4. **POSSESSION.** It is agreed and confirmed by the parties hereto that notwithstanding other provisions in this contract, the right of possession and use of the subject property by Buyer, including the right to remove and dispose of improvements, shall commence on the date the amount of funds as

specified in Section 2 herein are deposited into the escrow controlling this transaction. The amount shown in Section 2 herein includes, but is not limited to, full payment for such possession and use, including damages, if any, from said date.

5. TITLE INSURANCE POLICY. Escrow Agent shall, following recording of deeds to Buyer, provide Buyer with CLTA Standard Coverage Policy of Title Insurance in the amount of \$16,000.00 issued by Placer Title Company showing the title to the property vested in Buyer, subject only to the exceptions set forth in Section 3 and the printed exceptions and stipulations in said policy. Buyer agrees to pay the premium charged therefore.

6. ESCROW. Buyer agrees to open an escrow in accordance with this Agreement at Placer Title Company, 1508 Eureka Road, Suite 150 Roseville, CA 95661 (916) 782-3711. This Agreement constitutes the joint escrow instructions of Buyer and Seller, and Escrow Agent (Tracy Murphy) to whom these instructions are delivered is hereby empowered to act under this Agreement. The parties hereto agree to do all acts necessary to close this escrow in the shortest possible time.

Seller agrees to deposit with Escrow Agent prior to the Close of Escrow original, fully executed and acknowledged deeds prepared by Escrow Agent and any other customary agreements, consents, or documents reasonably necessary to effectuate the purchase of the subject property. Buyer agrees to deposit the purchase price and certificate of acceptance upon demand of Escrow Agent.

Insurance policies for fire or casualty are not to be transferred, and Seller will cancel its own policies after close of escrow.

All funds received in this escrow shall be deposited with other escrow funds in a general escrow account(s) and may be transferred to any other such escrow trust account in any State or National Bank doing business in the State of California. All disbursements shall be made either by check or wire transfer from such account.

ESCROW AGENT IS AUTHORIZED AND IS INSTRUCTED TO COMPLY WITH THE FOLLOWING TAX ADJUSTMENT PROCEDURE:

- A. Pay and charge Seller for any unpaid delinquent taxes and/or penalties and interest thereon, and for any delinquent or non-delinquent assessments or bonds against the property;
- B. In the event this escrow closes between July 1 and November 1, and current tax information is not available from title insurer, Escrow Agent is instructed to withhold from Seller's proceeds an amount equal to 120% of the prorated amount due based upon the previous fiscal year's second half tax bill. At such time that the tax information is available, Escrow Agent shall make a check payable to the County Tax Collector for Seller's prorated portion of taxes and forward the same to the Buyer and shall refund any difference to the Seller. In the event the amount withheld is not sufficient to pay Seller's prorated portion of taxes due, the Seller herein agrees to immediately pay the difference;

In the event said tax information is available, Seller's taxes shall be prorated in accordance with Paragraph "C" below.

- C. From the date that tax information is available, as per Paragraph "B" hereinabove, up to and including June 30th, Seller's current taxes, if unpaid, shall be prorated to date of close of escrow on the basis of a 365 day year in accordance with Tax Collector's proration requirements, together with penalties and interest, if said current taxes are unpaid after December 10 and/or April 10. At close of escrow, a check payable to the County Tax Collector for Seller's prorata portion of taxes shall be forwarded to Buyer with closing statement;
- D. Any taxes which have been paid by Seller, prior to opening of this escrow, shall not be prorated between Buyer and Seller, but Seller shall have the sole right, after close of escrow, to apply to the County Tax Collector of said county for a refund. This refund would apply to the period after Buyer's acquisition, pursuant to Revenue and Taxation Code Section 5096.7.

ESCROW AGENT IS AUTHORIZED TO, AND SHALL:

- E. Pay and charge Seller, upon Seller's written approval, for any amount necessary to place title in the condition necessary to satisfy Section 3 of this Agreement, excluding any penalty for prepayment to any lienholder in compliance with Section 1265.240 of the Code of Civil Procedure ("Eminent Domain Law");
- F. Pay and charge Buyer for any escrow fees, charges, and costs payable under Section 6 of this Agreement;
- G. Disburse funds and deliver deeds when conditions of this escrow have been fulfilled by Buyer and Seller.

The term "close of escrow", if and where written in these instructions, shall mean the date that all necessary instruments of conveyance are recorded in the office of the County Recorder. Recordation of instruments delivered through this escrow is authorized if necessary or proper in the issuance of said policy of title insurance.

All time limits within which any matter herein specified is to be performed may be extended by mutual agreement of the parties hereto. Any amendment of, or supplement to, any instructions must be in writing.

TIME IS OF THE ESSENCE IN THESE INSTRUCTIONS AND ESCROW IS TO CLOSE AS SOON AS POSSIBLE. The parties hereto agree to perform all acts reasonably necessary to close this escrow within one hundred twenty (120) days following the opening of escrow.

Responsibility for Escrow Agent under this Agreement is expressly limited to Sections 1, 2, 3, 4, 5, 6, 7, 10, 11, 12, and 18 and to its liability under any policy of title insurance issued in regard to this transaction.

7. ESCROW FEES, CHARGES AND COSTS. Buyer agrees to pay all Buyer's and Seller's usual fees, charges, and costs which arise in this escrow.

8. FENCING. Buyer agrees to pay the Seller additional compensation for the fence and gate which reflects an increase in pricing for when the fence and gate is installed.

9. RENTAL AND OCCUPANCY BY SELLER. Seller warrants that there are no oral or written leases on all or any portion of property.

10. PERMISSION TO ENTER ON PREMISES. Seller hereby grants to Buyer, or its authorized agents, permission to enter upon the Property at all reasonable times prior to close of escrow for the purpose of making necessary or appropriate inspections. It is understood that Buyer and its contractors will indemnify Seller and hold them harmless from any and all liability for bodily injury, death and property damage arising out of or in any way connected with such inspections, and reimburse Seller for all costs, expenses and loss, including attorney's fees, incurred by them in consequence of any claims, demands and causes of action which may be made or brought against them arising out of such inspections. Buyer shall provide the Seller a forty-eight (48) written notice before entering the property. However, Buyer shall have no obligation to indemnify Seller for any loss, liability, or damage caused by the negligence of the Seller, or any of Seller's employees, agents, or authorized users, including, but not limited to, tenants, invitees or permittees.

11. COUNTERPARTS. This Agreement may be executed in counterparts, each of which so executed shall, irrespective of the date of its execution and delivery, be deemed an original, and all such counterparts together shall constitute one and the same instrument.

12. CLOSING STATEMENT. Seller instructs Escrow Agent to release a copy of Seller's statement to Buyer, whose address is 311 Vernon St, Roseville, CA 95678; purpose being to ascertain if any reimbursements are due Seller.

13. LOSS OR DAMAGE TO IMPROVEMENTS. Loss or damage to the real property or any improvements thereon, by fire or other casualty, occurring prior to the recordation of the deeds shall be at the risk of Seller. In the event that loss or damage to the real property or any improvements thereon, by fire or other casualty, occurs prior to the recordation of the deeds, Buyer may elect to require that the Seller pay to Buyer the proceeds of any insurance which may become payable to Seller by reason thereof, or to permit such proceeds to be used for the restoration of the damage done, or to reduce the total price by an amount equal to the diminution in value of said property by reason of such loss or damage or the amount of insurance payable to Seller, whichever is greater.

14. EMINENT DOMAIN DISMISSAL. Seller and Buyer acknowledge that this transaction is a negotiated settlement in lieu of condemnation, and Seller hereby agrees and consents to the dismissal or abandonment of any eminent domain action in the Superior Court of the State of California in and for the County of Placer, wherein the herein described property is included and also waives any and all claims to any money on deposit in said action and further waives all attorney's fees, costs, disbursements, and expenses incurred in connection therewith. If, prior to the close of the execution of this transaction, Seller is served with a Summons and Complaint in Eminent Domain in which Seller is a named defendant, upon the closing of this transaction, Seller agrees and consents to Buyer taking a Default in said action.

15. WARRANTIES, REPRESENTATIONS, AND COVENANTS OF SELLER. Seller hereby warrants, represents, and/or covenants to Buyer that:

- A. To the best of Seller's knowledge, there are no actions, suits, material claims, legal proceedings, or any other proceedings affecting the property or any portion thereof, at law, or in equity before any court or governmental agency, domestic or foreign.
- B. To the best of Seller's knowledge, there are no encroachments onto the property by improvements on any adjoining property, nor do any buildings or improvements encroach on other properties.
- C. Until the closing, Seller shall maintain the property in good condition and state of repair and maintenance, and shall perform all of its obligations under any service contracts or other contracts affecting the property.
- D. Until the closing, Seller shall not do anything which would impair Seller's title to any of the property.
- E. To the best of Seller's knowledge, neither the execution of this Agreement nor the performance of the obligations herein will conflict with, or breach any of the provisions of any bond, note, evidence of indebtedness, contract, lease, or other agreement or instrument to which Seller's property may be bound.
- F. Until the closing, Seller shall, upon learning of any fact or condition which would cause any of the warranties and representations in this Section 14 (Warranties, Representations, and Covenants of Seller) not to be true as of closing, immediately give written notice of such fact or condition to Buyer.

16. HAZARDOUS WASTE. Neither Seller nor, to the best of Seller's knowledge, any previous owner, tenant, occupant, or user of the Property used, generated, released, discharged, stored, or disposed of any hazardous waste, toxic substances, or related materials ("Hazardous Materials") on, under, in, or about the Property, or transported any Hazardous Materials to or from the Property. Seller shall not cause or permit the presence, use, generation, release, discharge, storage, or disposal of any Hazardous Materials on, under, in, or about, or the transportation of any Hazardous Materials to or from, the Property. The term "Hazardous Material" shall mean any substance, material, or waste which is or becomes regulated by any local governmental authority, the State of California, or the United States Government, including, but not limited to, any material or substance which is (i) defined as a "hazardous waste", "extremely hazardous waste", or "restricted hazardous waste" under Section 25115, 25117 or 25122.7, or listed pursuant to Section 25140 of the California Health and Safety Code, Division 20, Chapter 6.5 (Hazardous Waste Control Law), (ii) defined as "hazardous substance" under Section 25316 of the California Health and Safety Code, Division 20, Chapter 6.8 (Carpenter-Presley-Tanner Hazardous Substance Account Act), (iii) defined as a "hazardous material", "hazardous substance", or "hazardous waste" under Section 25501 of the California Health and Safety Code, Division 20, Chapter 6.95 (Hazardous Materials Release Response Plans and Inventory), (iv) defined as a "hazardous substance" under Section 25281 of the California Health and Safety Code, Division 20, Chapter 6.7 (Underground Storage of Hazardous Substances), (v) petroleum, (vi) asbestos, (vii) polychlorinated biphenyls, (viii) listed under Article 9 or defined as "hazardous" or "extremely hazardous" pursuant to Article 11 of Title 22 of the California Administrative Code, Division 4, Chapter 20, (ix) designated as a "hazardous substances" pursuant to Section 311 of the Clean Water Act, (33

U.S.C. S1317), (x) defined as a "hazardous waste" pursuant to Section 1004 of the Resource Conservation and Recovery Act, 42 U.S.C. S6901 et seq. (42 U.S.C. S6903) or (xi) defined as a "hazardous substances" pursuant to Section 101 of the Comprehensive Environmental Response, Compensation, as amended by Liability Act, 42. U.S.C. S9601 et seq. (42 U.S.C. S9601).

17. COMPLIANCE WITH ENVIRONMENTAL LAWS. To the best of Seller's knowledge the Property complies with all applicable laws and governmental regulations including, without limitation, all applicable federal, state, and local laws pertaining to air and water quality, hazardous waste, waste disposal, and other environmental matters, including, but not limited to, the Clean Water, Clean Air, Federal Water Pollution Control, Solid Waste Disposal, Resource Conservation Recovery and Comprehensive Environmental Response Compensation and Liability Acts, and the California Environment Quality Act, and the rules, regulations, and ordinances of the city within which the subject property is located, the California Department of Health Services, the Regional Water Quality Control Board, the State Water Resources Control Board, the Environmental Protection Agency, and all applicable federal, state, and local agencies and bureaus.

18. INDEMNITY. Seller agrees to indemnify, defend and hold Buyer harmless from and against any claim, action, suit, proceeding, loss, cost, damage, liability, deficiency, fine, penalty, punitive damage, or expense (including, without limitation, attorneys' fees), resulting from, arising out of, or based upon (i) the presence, release, use, generation, discharge, storage, or disposal of any Hazardous Material on, under, in or about, or the transportation of any such materials to or from, the Property, or (ii) the violation, or alleged violation, of any statute, ordinance, order, rule, regulation, permit, judgment, or license relating to the use, generation, release, discharge, storage, disposal, or transportation of Hazardous Materials on, under, in, or about, to or from, the Property. This indemnity shall include, without limitation, any damage, liability, fine, penalty, punitive damage, cost, or expense arising from or out of any claim, action, suit or proceeding for personal injury (including sickness, disease, or death, tangible or intangible property damage, compensation for lost wages, business income, profits or other economic loss, damage to the natural resource or the environment, nuisance, pollution, contamination, leak, spill, release, or other adverse effect on the environment). This indemnity extends only to liability created prior to or up to the date this escrow shall close. Seller shall not be responsible for acts or omissions to act post close of this escrow.

19. CONTINGENCY. It is understood and agreed between the parties hereto that the completion of this transaction, and the escrow created hereby, is contingent upon the specific acceptance and approval from the Buyer herein.

20. WAIVER OF CLAIMS. Seller acknowledges that the acquisition of the property by Buyer is for a public purpose, and therefore, the property is otherwise subject to taking by the power of eminent domain. Seller acknowledges that this transaction is a negotiated settlement in lieu of condemnation and agrees that the purchase price to be paid herein shall constitute full and fair compensation and consideration for any and all claims that Seller may have against Buyer by reason of the acquisition, improvement, possession, use and/or occupancy of the property, and Seller hereby waives any and all claims, including, but not limited to, claims for attorney's fees, pre-condemnation damages, severance damages, business goodwill, relocation assistance, or any other claim.

21. GENERAL PROVISIONS. The terms and conditions, covenants, and agreements set forth herein shall apply to and bind the heirs, executors, administrators, assigns and successors of the parties

hereto.

This Agreement and each provision contained herein may be waived, amended, supplemented, or eliminated only by mutual written agreement of the parties.

If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

This Agreement contains the entire agreement between both parties, neither party relies upon any warranty or representation not contained in this Agreement.

IN WITNESS WHEREOF, the City of Roseville, a Municipal Corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the ____ day of _____, 20__, and Seller has caused this Agreement to be executed.

SLOPE EASEMENT

Assessor's Parcel No: 469-070-009

FOR VALUABLE CONSIDERATION, receipt of which is hereby acknowledged, **Jacqueline Rice, a single woman ("Grantor")** hereby grants to the, **City of Roseville, a Municipal Corporation ("Grantee")** its successors and assigns an exclusive easement to construct, maintain, inspect, repair, reconstruct, replant, and use that certain real property in the City of Roseville, County of Placer, State of California, described in Exhibit A and shown on and delineated on Exhibit B, both of which are attached hereto and by this reference made a part hereof.

The use of said strip of land shall be for slope purposes in order to accommodate the change in grade along the perimeter of the property located off of Rocky Ridge Drive, together with the right to use adjacent portions of the larger parcel, as reasonably necessary, for the initial construction of said slope.

No other easement or easements shall be granted on, under or over said strip of land without previous written consent by Grantee, which consent shall not be unreasonably withheld. Grantee shall have the right to assign any portions, or all of the rights granted under the Slope Easement area. No building, fences, walls or other permanent structures of any kind, and no deep-rooted tree, deep rooted shrubs or other plants or vegetation shall be installed, constructed, erected, placed, planted or maintained in the Slope Easement area without prior written consent of Grantee. Grantee shall have the right to mark the location of the easement in a manner which will not interfere with property owner's reasonable and lawful use of the Slope Easement area.

**AGREEMENT FOR ACQUISITION OF REAL PROPERTY
(ESCROW INSTRUCTIONS)**

THIS AGREEMENT is entered into this _____ day of _____, 2022 by and between the CITY OF ROSEVILLE, a Municipal Corporation (hereinafter called "Buyer"), and Emily Ann Baldwin and Matthew Blair Baldwin, wife and husband as joint tenants, (hereinafter called "Seller") for acquisition by Buyer of one Partial Property Acquisition in fee and one Ingress/Egress and Maintenance Easement over real property hereinafter set forth.

IT IS HEREBY MUTUALLY AGREED BETWEEN THE PARTIES AS FOLLOWS:

1. **AGREEMENT TO SELL AND PURCHASE.** Seller agrees to sell to Buyer, and Buyer agrees to purchase from Seller, upon the terms and for the consideration set forth in this agreement, the following interest(s) in property, all situated in the City of Roseville, County of Placer, State of California:

- A. Partial Property Acquisition in fee (Attached as Attachment 1); and
- B. Non-Exclusive Ingress/Egress and Maintenance Easement (Attached as Attachment 2)

The legal description of each interest is identified in the referenced attachment(s), which are hereby incorporated by reference.

2. **PURCHASE PRICE.** The total purchase price, payable in cash through escrow, shall be the sum of:

FORTY FIVE THOUSAND FOUR HUNDRED AND 00/100 DOLLARS
(\$45,400.00)

The total purchase price includes: acquisition value of the property interests identified in Section 1.

3. **CONVEYANCE OF TITLE.** Seller agrees to convey the fee interest by Grant Deed and the easement by Easement Deed. Seller agrees to convey to Buyer marketable fee title and easements free and clear of all recorded and unrecorded liens, encumbrances, assessments, easements, leases, and taxes EXCEPT:

- A. All taxes for the current fiscal year prorated as per Section 6 hereinafter.
- B. Quasi-public utility, public alley, public street easements, and rights of way of record.
- C. Preliminary Title Report to be provided by Placer Title Company and approved in Escrow.

4. **POSSESSION.** It is agreed and confirmed by the parties hereto that notwithstanding other provisions in this contract, the right of possession and use of the subject property by Buyer, including the right to remove and dispose of improvements, shall commence on the date the amount of funds as specified in Section 2 herein are deposited into the escrow controlling this transaction. The amount

shown in Section 2 herein includes, but is not limited to, full payment for such possession and use, including damages, if any, from said date.

5. TITLE INSURANCE POLICY. Escrow Agent shall, following recording of deeds to Buyer, provide Buyer with CLTA Standard Coverage Policy of Title Insurance in the amount of \$45,400.00 issued by Placer Title Company showing the title to the property vested in Buyer, subject only to the exceptions set forth in Section 3 and the printed exceptions and stipulations in said policy. Buyer agrees to pay the premium charged therefore.

6. ESCROW. Buyer agrees to open an escrow in accordance with this Agreement at Placer Title Company, 1508 Eureka Road, Suite 150 Roseville, CA 95661 (916) 782-3711. This Agreement constitutes the joint escrow instructions of Buyer and Seller, and Escrow Agent (Tracy Murphy) to whom these instructions are delivered is hereby empowered to act under this Agreement. The parties hereto agree to do all acts necessary to close this escrow in the shortest possible time.

Seller agrees to deposit with Escrow Agent prior to the Close of Escrow original, fully executed and acknowledged deeds prepared by Escrow Agent and any other customary agreements, consents, or documents reasonably necessary to effectuate the purchase of the subject property. Buyer agrees to deposit the purchase price and **certificate of acceptance** upon demand of Escrow Agent.

Insurance policies for fire or casualty are not to be transferred, and Seller will cancel its own policies after close of escrow.

All funds received in this escrow shall be deposited with other escrow funds in a general escrow account(s) and may be transferred to any other such escrow trust account in any State or National Bank doing business in the State of California. All disbursements shall be made either by check or wire transfer from such account.

ESCROW AGENT IS AUTHORIZED AND IS INSTRUCTED TO COMPLY WITH THE FOLLOWING TAX ADJUSTMENT PROCEDURE:

- A. Pay and charge Seller for any unpaid delinquent taxes and/or penalties and interest thereon, and for any delinquent or non-delinquent assessments or bonds against the property;
- B. In the event this escrow closes between July 1 and November 1, and current tax information is not available from title insurer, Escrow Agent is instructed to withhold from Seller's proceeds an amount equal to 120% of the prorated amount due based upon the previous fiscal year's second half tax bill. At such time that the tax information is available, Escrow Agent shall make a check payable to the County Tax Collector for Seller's prorated portion of taxes and forward the same to the Buyer and shall refund any difference to the Seller. In the event the amount withheld is not sufficient to pay Seller's prorated portion of taxes due, the Seller herein agrees to immediately pay the difference;

In the event said tax information is available, Seller's taxes shall be prorated in accordance with Paragraph "C" below.

- C. From the date that tax information is available, as per Paragraph "B" hereinabove, up to and including June 30th, Seller's current taxes, if unpaid, shall be prorated to date of close of escrow on the basis of a 365 day year in accordance with Tax Collector's proration requirements, together with penalties and interest, if said current taxes are unpaid after December 10 and/or April 10. At close of escrow, a check payable to the County Tax Collector for Seller's prorata portion of taxes shall be forwarded to Buyer with closing statement;
- D. Any taxes which have been paid by Seller, prior to opening of this escrow, shall not be prorated between Buyer and Seller, but Seller shall have the sole right, after close of escrow, to apply to the County Tax Collector of said county for a refund. This refund would apply to the period after Buyer's acquisition, pursuant to Revenue and Taxation Code Section 5096.7.

ESCROW AGENT IS AUTHORIZED TO, AND SHALL:

- E. Pay and charge Seller, upon Seller's written approval, for any amount necessary to place title in the condition necessary to satisfy Section 3 of this Agreement, excluding any penalty for prepayment to any lienholder in compliance with Section 1265.240 of the Code of Civil Procedure ("Eminent Domain Law");
- F. Pay and charge Buyer for any escrow fees, charges, and costs payable under Section 6 of this Agreement;
- G. Disburse funds and deliver deeds when conditions of this escrow have been fulfilled by Buyer and Seller.

The term "close of escrow", if and where written in these instructions, shall mean the date that all necessary instruments of conveyance are recorded in the office of the County Recorder. Recordation of instruments delivered through this escrow is authorized if necessary or proper in the issuance of said policy of title insurance.

All time limits within which any matter herein specified is to be performed may be extended by mutual agreement of the parties hereto. Any amendment of, or supplement to, any instructions must be in writing.

TIME IS OF THE ESSENCE IN THESE INSTRUCTIONS AND ESCROW IS TO CLOSE AS SOON AS POSSIBLE. The parties hereto agree to perform all acts reasonably necessary to close this escrow within one hundred twenty (120) days following the opening of escrow.

Responsibility for Escrow Agent under this Agreement is expressly limited to Sections 1, 2, 3, 4, 5, 6, 7, 10, 11, 12, and 18 and to its liability under any policy of title insurance issued in regard to this transaction.

7. ESCROW FEES, CHARGES AND COSTS. Buyer agrees to pay all Buyer's and Seller's usual fees, charges, and costs which arise in this escrow.

8. FENCING. During construction, Buyer agrees that if any damage occurs to, or relocation is required of the fence located on the property that is due to the ongoing construction, the Buyer will restore the fence to its original condition, or relocate the fence as necessary.

9. RENTAL AND OCCUPANCY BY SELLER. Seller warrants that there are no oral or written leases on all or any portion of property.

10. PERMISSION TO ENTER ON PREMISES. Seller hereby grants to Buyer, or its authorized agents, permission to enter upon the Property at all reasonable times prior to close of escrow for the purpose of making necessary or appropriate inspections. It is understood that Buyer and its contractors will indemnify Seller and hold them harmless from any and all liability for bodily injury, death and property damage arising out of or in any way connected with such inspections, and reimburse Seller for all costs, expenses and loss, including attorney's fees, incurred by them in consequence of any claims, demands and causes of action which may be made or brought against them arising out of such inspections. Buyer shall provide the Seller a forty-eight (48) written notice before entering the property. However, Buyer shall have no obligation to indemnify Seller for any loss, liability, or damage caused by the negligence of the Seller, or any of Seller's employees, agents, or authorized users, including, but not limited to, tenants, invitees or permittees.

11. COUNTERPARTS. This Agreement may be executed in counterparts, each of which so executed shall, irrespective of the date of its execution and delivery, be deemed an original, and all such counterparts together shall constitute one and the same instrument.

12. CLOSING STATEMENT. Seller instructs Escrow Agent to release a copy of Seller's statement to Buyer, whose address is 311 Vernon St, Roseville, CA 95678; purpose being to ascertain if any reimbursements are due Seller.

13. LOSS OR DAMAGE TO IMPROVEMENTS. Loss or damage to the real property or any improvements thereon, by fire or other casualty, occurring prior to the recordation of the deeds shall be at the risk of Seller. In the event that loss or damage to the real property or any improvements thereon, by fire or other casualty, occurs prior to the recordation of the deeds, Buyer may elect to require that the Seller pay to Buyer the proceeds of any insurance which may become payable to Seller by reason thereof, or to permit such proceeds to be used for the restoration of the damage done, or to reduce the total price by an amount equal to the diminution in value of said property by reason of such loss or damage or the amount of insurance payable to Seller, whichever is greater.

14. EMINENT DOMAIN DISMISSAL. Seller and Buyer acknowledge that this transaction is a negotiated settlement in lieu of condemnation, and Seller hereby agrees and consents to the dismissal or abandonment of any eminent domain action in the Superior Court of the State of California in and for the County of Placer, wherein the herein described property is included and also waives any and all claims to any money on deposit in said action and further waives all attorney's fees, costs, disbursements, and expenses incurred in connection therewith. If, prior to the close of the execution of this transaction, Seller is served with a Summons and Complaint in Eminent Domain in which Seller is a named defendant, upon the closing of this transaction, Seller agrees and consents to Buyer taking a Default in said action.

15. WARRANTIES, REPRESENTATIONS, AND COVENANTS OF SELLER. Seller hereby

warrants, represents, and/or covenants to Buyer that:

- A. To the best of Seller's knowledge, there are no actions, suits, material claims, legal proceedings, or any other proceedings affecting the property or any portion thereof, at law, or in equity before any court or governmental agency, domestic or foreign.
- B. To the best of Seller's knowledge, there are no encroachments onto the property by improvements on any adjoining property, nor do any buildings or improvements encroach on other properties.
- C. Until the closing, Seller shall maintain the property in good condition and state of repair and maintenance, and shall perform all of its obligations under any service contracts or other contracts affecting the property.
- D. Until the closing, Seller shall not do anything which would impair Seller's title to any of the property.
- E. To the best of Seller's knowledge, neither the execution of this Agreement nor the performance of the obligations herein will conflict with, or breach any of the provisions of any bond, note, evidence of indebtedness, contract, lease, or other agreement or instrument to which Seller's property may be bound.
- F. Until the closing, Seller shall, upon learning of any fact or condition which would cause any of the warranties and representations in this Section 14 (Warranties, Representations, and Covenants of Seller) not to be true as of closing, immediately give written notice of such fact or condition to Buyer.

16. HAZARDOUS WASTE. Neither Seller nor, to the best of Seller's knowledge, any previous owner, tenant, occupant, or user of the Property used, generated, released, discharged, stored, or disposed of any hazardous waste, toxic substances, or related materials ("Hazardous Materials") on, under, in, or about the Property, or transported any Hazardous Materials to or from the Property. Seller shall not cause or permit the presence, use, generation, release, discharge, storage, or disposal of any Hazardous Materials on, under, in, or about, or the transportation of any Hazardous Materials to or from, the Property. The term "Hazardous Material" shall mean any substance, material, or waste which is or becomes regulated by any local governmental authority, the State of California, or the United States Government, including, but not limited to, any material or substance which is (i) defined as a "hazardous waste", "extremely hazardous waste", or "restricted hazardous waste" under Section 25115, 25117 or 25122.7, or listed pursuant to Section 25140 of the California Health and Safety Code, Division 20, Chapter 6.5 (Hazardous Waste Control Law), (ii) defined as "hazardous substance" under Section 25316 of the California Health and Safety Code, Division 20, Chapter 6.8 (Carpenter-Presley-Tanner Hazardous Substance Account Act), (iii) defined as a "hazardous material", "hazardous substance", or "hazardous waste" under Section 25501 of the California Health and Safety Code, Division 20, Chapter 6.95 (Hazardous Materials Release Response Plans and Inventory), (iv) defined as a "hazardous substance" under Section 25281 of the California Health and Safety Code, Division 20, Chapter 6.7 (Underground Storage of Hazardous Substances), (v) petroleum, (vi) asbestos, (vii) polychlorinated biphenyls, (viii) listed under Article 9 or defined as "hazardous" or "extremely hazardous" pursuant to Article 11 of Title 22 of the California Administrative Code, Division 4, Chapter

20, (ix) designated as a "hazardous substances" pursuant to Section 311 of the Clean Water Act, (33 U.S.C. S1317), (x) defined as a "hazardous waste" pursuant to Section 1004 of the Resource Conservation and Recovery Act, 42 U.S.C. S6901 et seq. (42 U.S.C. S6903) or (xi) defined as a "hazardous substances" pursuant to Section 101 of the Comprehensive Environmental Response, Compensation, as amended by Liability Act, 42. U.S.C. S9601 et seq. (42 U.S.C. S9601).

17. COMPLIANCE WITH ENVIRONMENTAL LAWS. To the best of Seller's knowledge the Property complies with all applicable laws and governmental regulations including, without limitation, all applicable federal, state, and local laws pertaining to air and water quality, hazardous waste, waste disposal, and other environmental matters, including, but not limited to, the Clean Water, Clean Air, Federal Water Pollution Control, Solid Waste Disposal, Resource Conservation Recovery and Comprehensive Environmental Response Compensation and Liability Acts, and the California Environment Quality Act, and the rules, regulations, and ordinances of the city within which the subject property is located, the California Department of Health Services, the Regional Water Quality Control Board, the State Water Resources Control Board, the Environmental Protection Agency, and all applicable federal, state, and local agencies and bureaus.

18. INDEMNITY. Seller agrees to indemnify, defend and hold Buyer harmless from and against any claim, action, suit, proceeding, loss, cost, damage, liability, deficiency, fine, penalty, punitive damage, or expense (including, without limitation, attorneys' fees), resulting from, arising out of, or based upon (i) the presence, release, use, generation, discharge, storage, or disposal of any Hazardous Material on, under, in or about, or the transportation of any such materials to or from, the Property, or (ii) the violation, or alleged violation, of any statute, ordinance, order, rule, regulation, permit, judgment, or license relating to the use, generation, release, discharge, storage, disposal, or transportation of Hazardous Materials on, under, in, or about, to or from, the Property. This indemnity shall include, without limitation, any damage, liability, fine, penalty, punitive damage, cost, or expense arising from or out of any claim, action, suit or proceeding for personal injury (including sickness, disease, or death, tangible or intangible property damage, compensation for lost wages, business income, profits or other economic loss, damage to the natural resource or the environment, nuisance, pollution, contamination, leak, spill, release, or other adverse effect on the environment). This indemnity extends only to liability created prior to or up to the date this escrow shall close. Seller shall not be responsible for acts or omissions to act post close of this escrow.

19. CONTINGENCY. It is understood and agreed between the parties hereto that the completion of this transaction, and the escrow created hereby, is contingent upon the specific acceptance and approval from the Buyer herein.

20. WAIVER OF CLAIMS. Seller acknowledges that the acquisition of the property by Buyer is for a public purpose, and therefore, the property is otherwise subject to taking by the power of eminent domain. Seller acknowledges that this transaction is a negotiated settlement in lieu of condemnation and agrees that the purchase price to be paid herein shall constitute full and fair compensation and consideration for any and all claims that Seller may have against Buyer by reason of the acquisition, improvement, possession, use and/or occupancy of the property, and Seller hereby waives any and all claims, including, but not limited to, claims for attorney's fees, pre-condemnation damages, severance damages, business goodwill, relocation assistance, or any other claim.

21. GENERAL PROVISIONS. The terms and conditions, covenants, and agreements set forth

herein shall apply to and bind the heirs, executors, administrators, assigns and successors of the parties hereto.

This Agreement and each provision contained herein may be waived, amended, supplemented, or eliminated only by mutual written agreement of the parties.

If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

This Agreement contains the entire agreement between both parties, neither party relies upon any warranty or representation not contained in this Agreement.

IN WITNESS WHEREOF, the City of Roseville, a Municipal Corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the ____ day of _____, 20__, and Seller has caused this Agreement to be executed.

RESOLUTION NO. 23-031

APPROVING AN AGREEMENT FOR ACQUISITION OF REAL PROPERTY AND
ESCROW INSTRUCTIONS, BY AND BETWEEN THE CITY OF ROSEVILLE AND
BENJAMIN HAUGEN AND MELISSA HAUGEN, AND AUTHORIZING THE CITY
MANAGER TO EXECUTE IT AND ALL RELATED ESCROW DOCUMENTS ON BEHALF
OF THE CITY OF ROSEVILLE

WHEREAS, an agreement for acquisition of real property and escrow instructions for the purchase of a portion of the property located at 1303 Mallard Lane (APN No. 469-070-005) in Roseville, CA, by and between the City of Roseville and Benjamin Haugen and Melissa Haugen, has been reviewed by the City Council; and

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Roseville that said agreement is hereby approved and that the City Manager is authorized to execute it and all related escrow documents on behalf of the City of Roseville; and

PASSED AND ADOPTED by the Council of the City of Roseville this ____ day of _____, 2023, by the following vote on roll call:

AYES COUNCILMEMBERS:

NOES COUNCILMEMBERS:

ABSENT COUNCILMEMBERS:

MAYOR

ATTEST:

City Clerk

PARCEL NO.: 469-070-005
TITLE REPORT NO.: P-512264
PROJECT: ROSEVILLE DRY CREEK GREENWAY EAST PROJECT

**AGREEMENT FOR ACQUISITION OF REAL PROPERTY
(ESCROW INSTRUCTIONS)**

THIS AGREEMENT is entered into this _____ day of _____, 2022 by and between the CITY OF ROSEVILLE, a Municipal Corporation (hereinafter called "Buyer"), and Benjamin Haugen and Melissa Haugen, husband and wife as joint tenants, (hereinafter called "Seller") for acquisition by Buyer of one Partial Property Acquisition in fee and one Ingress/Egress and Maintenance Easement over real property hereinafter set forth.

IT IS HEREBY MUTUALLY AGREED BETWEEN THE PARTIES AS FOLLOWS:

1. **AGREEMENT TO SELL AND PURCHASE.** Seller agrees to sell to Buyer, and Buyer agrees to purchase from Seller, upon the terms and for the consideration set forth in this agreement, the following interest(s) in property, all situated in the City of Roseville, County of Placer, State of California:

- A. Partial Property Acquisition in fee (Attached as Attachment 1); and
- B. Non-Exclusive Ingress/Egress and Maintenance Easement (Attached as Attachment 2)

The legal description of each interest is identified in the referenced attachment(s), which are hereby incorporated by reference.

2. **PURCHASE PRICE.** The total purchase price, payable in cash through escrow, shall be the sum of:

THRITY SIX THOUSAND THREE HUNDRED AND 00/100 DOLLARS
(\$36,300.00)

The total purchase price includes: acquisition value of the property interests identified in Section 1.

3. **CONVEYANCE OF TITLE.** Seller agrees to convey the fee interest by Grant Deed and the easement by Easement Deed. Seller agrees to convey to Buyer marketable fee title and easements free and clear of all recorded and unrecorded liens, encumbrances, assessments, easements, leases, and taxes EXCEPT:

- A. All taxes for the current fiscal year prorated as per Section 6 hereinafter.
- B. Quasi-public utility, public alley, public street easements, and rights of way of record.
- C. Preliminary Title Report to be provided by Placer Title Company and approved in Escrow.

4. **POSSESSION.** It is agreed and confirmed by the parties hereto that notwithstanding other provisions in this contract, the right of possession and use of the subject property by Buyer, including the right to remove and dispose of improvements, shall commence on the date the amount of funds as specified in Section 2 herein are deposited into the escrow controlling this transaction. The amount

shown in Section 2 herein includes, but is not limited to, full payment for such possession and use, including damages, if any, from said date.

5. TITLE INSURANCE POLICY. Escrow Agent shall, following recording of deeds to Buyer, provide Buyer with CLTA Standard Coverage Policy of Title Insurance in the amount of \$36,300.00 issued by Placer Title Company showing the title to the property vested in Buyer, subject only to the exceptions set forth in Section 3 and the printed exceptions and stipulations in said policy. Buyer agrees to pay the premium charged therefore.

6. ESCROW. Buyer agrees to open an escrow in accordance with this Agreement at Placer Title Company, 1508 Eureka Road, Suite 150 Roseville, CA 95661 (916) 782-3711. This Agreement constitutes the joint escrow instructions of Buyer and Seller, and Escrow Agent (Tracy Murphy) to whom these instructions are delivered is hereby empowered to act under this Agreement. The parties hereto agree to do all acts necessary to close this escrow in the shortest possible time.

Seller agrees to deposit with Escrow Agent prior to the Close of Escrow original, fully executed and acknowledged deeds prepared by Escrow Agent and any other customary agreements, consents, or documents reasonably necessary to effectuate the purchase of the subject property. Buyer agrees to deposit the purchase price and **certificate of acceptance** upon demand of Escrow Agent.

Insurance policies for fire or casualty are not to be transferred, and Seller will cancel its own policies after close of escrow.

All funds received in this escrow shall be deposited with other escrow funds in a general escrow account(s) and may be transferred to any other such escrow trust account in any State or National Bank doing business in the State of California. All disbursements shall be made either by check or wire transfer from such account.

ESCROW AGENT IS AUTHORIZED AND IS INSTRUCTED TO COMPLY WITH THE FOLLOWING TAX ADJUSTMENT PROCEDURE:

- A. Pay and charge Seller for any unpaid delinquent taxes and/or penalties and interest thereon, and for any delinquent or non-delinquent assessments or bonds against the property;
- B. In the event this escrow closes between July 1 and November 1, and current tax information is not available from title insurer, Escrow Agent is instructed to withhold from Seller's proceeds an amount equal to 120% of the prorated amount due based upon the previous fiscal year's second half tax bill. At such time that the tax information is available, Escrow Agent shall make a check payable to the County Tax Collector for Seller's prorated portion of taxes and forward the same to the Buyer and shall refund any difference to the Seller. In the event the amount withheld is not sufficient to pay Seller's prorated portion of taxes due, the Seller herein agrees to immediately pay the difference;

In the event said tax information is available, Seller's taxes shall be prorated in accordance with Paragraph "C" below.

- C. From the date that tax information is available, as per Paragraph "B" hereinabove, up to and including June 30th, Seller's current taxes, if unpaid, shall be prorated to date of close of escrow on the basis of a 365 day year in accordance with Tax Collector's proration requirements, together with penalties and interest, if said current taxes are unpaid after December 10 and/or April 10. At close of escrow, a check payable to the County Tax Collector for Seller's prorata portion of taxes shall be forwarded to Buyer with closing statement;
- D. Any taxes which have been paid by Seller, prior to opening of this escrow, shall not be prorated between Buyer and Seller, but Seller shall have the sole right, after close of escrow, to apply to the County Tax Collector of said county for a refund. This refund would apply to the period after Buyer's acquisition, pursuant to Revenue and Taxation Code Section 5096.7.

ESCROW AGENT IS AUTHORIZED TO, AND SHALL:

- E. Pay and charge Seller, upon Seller's written approval, for any amount necessary to place title in the condition necessary to satisfy Section 3 of this Agreement, excluding any penalty for prepayment to any lienholder in compliance with Section 1265.240 of the Code of Civil Procedure ("Eminent Domain Law");
- F. Pay and charge Buyer for any escrow fees, charges, and costs payable under Section 6 of this Agreement;
- G. Disburse funds and deliver deeds when conditions of this escrow have been fulfilled by Buyer and Seller.

The term "close of escrow", if and where written in these instructions, shall mean the date that all necessary instruments of conveyance are recorded in the office of the County Recorder. Recordation of instruments delivered through this escrow is authorized if necessary or proper in the issuance of said policy of title insurance.

All time limits within which any matter herein specified is to be performed may be extended by mutual agreement of the parties hereto. Any amendment of, or supplement to, any instructions must be in writing.

TIME IS OF THE ESSENCE IN THESE INSTRUCTIONS AND ESCROW IS TO CLOSE AS SOON AS POSSIBLE. The parties hereto agree to perform all acts reasonably necessary to close this escrow within one hundred twenty (120) days following the opening of escrow.

Responsibility for Escrow Agent under this Agreement is expressly limited to Sections 1, 2, 3, 4, 5, 6, 7, 10, 11, 12, and 18 and to its liability under any policy of title insurance issued in regard to this transaction.

7. ESCROW FEES, CHARGES AND COSTS. Buyer agrees to pay all Buyer's and Seller's usual fees, charges, and costs which arise in this escrow.

8. FENCING. During construction, Buyer agrees that if any damage occurs to, or relocation is required of the fence located on the property that is due to the ongoing construction, the Buyer will restore the fence to its original condition, or relocate the fence as necessary.
9. RENTAL AND OCCUPANCY BY SELLER. Seller warrants that there are no oral or written leases on all or any portion of property.
10. PERMISSION TO ENTER ON PREMISES. Seller hereby grants to Buyer, or its authorized agents, permission to enter upon the Property at all reasonable times prior to close of escrow for the purpose of making necessary or appropriate inspections. It is understood that Buyer and its contractors will indemnify Seller and hold them harmless from any and all liability for bodily injury, death and property damage arising out of or in any way connected with such inspections, and reimburse Seller for all costs, expenses and loss, including attorney's fees, incurred by them in consequence of any claims, demands and causes of action which may be made or brought against them arising out of such inspections. Buyer shall provide the Seller a forty-eight (48) written notice before entering the property. However, Buyer shall have no obligation to indemnify Seller for any loss, liability, or damage caused by the negligence of the Seller, or any of Seller's employees, agents, or authorized users, including, but not limited to, tenants, invitees or permittees.
11. COUNTERPARTS. This Agreement may be executed in counterparts, each of which so executed shall, irrespective of the date of its execution and delivery, be deemed an original, and all such counterparts together shall constitute one and the same instrument.
12. CLOSING STATEMENT. Seller instructs Escrow Agent to release a copy of Seller's statement to Buyer, whose address is 311 Vernon St, Roseville, CA 95678; purpose being to ascertain if any reimbursements are due Seller.
13. LOSS OR DAMAGE TO IMPROVEMENTS. Loss or damage to the real property or any improvements thereon, by fire or other casualty, occurring prior to the recordation of the deeds shall be at the risk of Seller. In the event that loss or damage to the real property or any improvements thereon, by fire or other casualty, occurs prior to the recordation of the deeds, Buyer may elect to require that the Seller pay to Buyer the proceeds of any insurance which may become payable to Seller by reason thereof, or to permit such proceeds to be used for the restoration of the damage done, or to reduce the total price by an amount equal to the diminution in value of said property by reason of such loss or damage or the amount of insurance payable to Seller, whichever is greater.
14. EMINENT DOMAIN DISMISSAL. Seller and Buyer acknowledge that this transaction is a negotiated settlement in lieu of condemnation, and Seller hereby agrees and consents to the dismissal or abandonment of any eminent domain action in the Superior Court of the State of California in and for the County of Placer, wherein the herein described property is included and also waives any and all claims to any money on deposit in said action and further waives all attorney's fees, costs, disbursements, and expenses incurred in connection therewith. If, prior to the close of the execution of this transaction, Seller is served with a Summons and Complaint in Eminent Domain in which Seller is a named defendant, upon the closing of this transaction, Seller agrees and consents to Buyer taking a Default in said action.
15. WARRANTIES, REPRESENTATIONS, AND COVENANTS OF SELLER. Seller hereby warrants, represents, and/or covenants to Buyer that:

- A. To the best of Seller's knowledge, there are no actions, suits, material claims, legal proceedings, or any other proceedings affecting the property or any portion thereof, at law, or in equity before any court or governmental agency, domestic or foreign.
- B. To the best of Seller's knowledge, there are no encroachments onto the property by improvements on any adjoining property, nor do any buildings or improvements encroach on other properties.
- C. Until the closing, Seller shall maintain the property in good condition and state of repair and maintenance, and shall perform all of its obligations under any service contracts or other contracts affecting the property.
- D. Until the closing, Seller shall not do anything which would impair Seller's title to any of the property.
- E. To the best of Seller's knowledge, neither the execution of this Agreement nor the performance of the obligations herein will conflict with, or breach any of the provisions of any bond, note, evidence of indebtedness, contract, lease, or other agreement or instrument to which Seller's property may be bound.
- F. Until the closing, Seller shall, upon learning of any fact or condition which would cause any of the warranties and representations in this Section 14 (Warranties, Representations, and Covenants of Seller) not to be true as of closing, immediately give written notice of such fact or condition to Buyer.

16. HAZARDOUS WASTE. Neither Seller nor, to the best of Seller's knowledge, any previous owner, tenant, occupant, or user of the Property used, generated, released, discharged, stored, or disposed of any hazardous waste, toxic substances, or related materials ("Hazardous Materials") on, under, in, or about the Property, or transported any Hazardous Materials to or from the Property. Seller shall not cause or permit the presence, use, generation, release, discharge, storage, or disposal of any Hazardous Materials on, under, in, or about, or the transportation of any Hazardous Materials to or from, the Property. The term "Hazardous Material" shall mean any substance, material, or waste which is or becomes regulated by any local governmental authority, the State of California, or the United States Government, including, but not limited to, any material or substance which is (i) defined as a "hazardous waste", "extremely hazardous waste", or "restricted hazardous waste" under Section 25115, 25117 or 25122.7, or listed pursuant to Section 25140 of the California Health and Safety Code, Division 20, Chapter 6.5 (Hazardous Waste Control Law), (ii) defined as "hazardous substance" under Section 25316 of the California Health and Safety Code, Division 20, Chapter 6.8 (Carpenter-Presley-Tanner Hazardous Substance Account Act), (iii) defined as a "hazardous material", "hazardous substance", or "hazardous waste" under Section 25501 of the California Health and Safety Code, Division 20, Chapter 6.95 (Hazardous Materials Release Response Plans and Inventory), (iv) defined as a "hazardous substance" under Section 25281 of the California Health and Safety Code, Division 20, Chapter 6.7 (Underground Storage of Hazardous Substances), (v) petroleum, (vi) asbestos, (vii) polychlorinated biphenyls, (viii) listed under Article 9 or defined as "hazardous" or "extremely hazardous" pursuant to Article 11 of Title 22 of the California Administrative Code, Division 4, Chapter 20, (ix) designated as a "hazardous substances" pursuant to Section 311 of the Clean Water Act, (33

U.S.C. S1317), (x) defined as a "hazardous waste" pursuant to Section 1004 of the Resource Conservation and Recovery Act, 42 U.S.C. S6901 et seq. (42 U.S.C. S6903) or (xi) defined as a "hazardous substances" pursuant to Section 101 of the Comprehensive Environmental Response, Compensation, as amended by Liability Act, 42. U.S.C. S9601 et seq. (42 U.S.C. S9601).

17. COMPLIANCE WITH ENVIRONMENTAL LAWS. To the best of Seller's knowledge the Property complies with all applicable laws and governmental regulations including, without limitation, all applicable federal, state, and local laws pertaining to air and water quality, hazardous waste, waste disposal, and other environmental matters, including, but not limited to, the Clean Water, Clean Air, Federal Water Pollution Control, Solid Waste Disposal, Resource Conservation Recovery and Comprehensive Environmental Response Compensation and Liability Acts, and the California Environment Quality Act, and the rules, regulations, and ordinances of the city within which the subject property is located, the California Department of Health Services, the Regional Water Quality Control Board, the State Water Resources Control Board, the Environmental Protection Agency, and all applicable federal, state, and local agencies and bureaus.

18. INDEMNITY. Seller agrees to indemnify, defend and hold Buyer harmless from and against any claim, action, suit, proceeding, loss, cost, damage, liability, deficiency, fine, penalty, punitive damage, or expense (including, without limitation, attorneys' fees), resulting from, arising out of, or based upon (i) the presence, release, use, generation, discharge, storage, or disposal of any Hazardous Material on, under, in or about, or the transportation of any such materials to or from, the Property, or (ii) the violation, or alleged violation, of any statute, ordinance, order, rule, regulation, permit, judgment, or license relating to the use, generation, release, discharge, storage, disposal, or transportation of Hazardous Materials on, under, in, or about, to or from, the Property. This indemnity shall include, without limitation, any damage, liability, fine, penalty, punitive damage, cost, or expense arising from or out of any claim, action, suit or proceeding for personal injury (including sickness, disease, or death, tangible or intangible property damage, compensation for lost wages, business income, profits or other economic loss, damage to the natural resource or the environment, nuisance, pollution, contamination, leak, spill, release, or other adverse effect on the environment). This indemnity extends only to liability created prior to or up to the date this escrow shall close. Seller shall not be responsible for acts or omissions to act post close of this escrow.

19. CONTINGENCY. It is understood and agreed between the parties hereto that the completion of this transaction, and the escrow created hereby, is contingent upon the specific acceptance and approval from the Buyer herein.

20. WAIVER OF CLAIMS. Seller acknowledges that the acquisition of the property by Buyer is for a public purpose, and therefore, the property is otherwise subject to taking by the power of eminent domain. Seller acknowledges that this transaction is a negotiated settlement in lieu of condemnation and agrees that the purchase price to be paid herein shall constitute full and fair compensation and consideration for any and all claims that Seller may have against Buyer by reason of the acquisition, improvement, possession, use and/or occupancy of the property, and Seller hereby waives any and all claims, including, but not limited to, claims for attorney's fees, pre-condemnation damages, severance damages, business goodwill, relocation assistance, or any other claim.

21. GENERAL PROVISIONS. The terms and conditions, covenants, and agreements set forth herein shall apply to and bind the heirs, executors, administrators, assigns and successors of the parties

hereto.

This Agreement and each provision contained herein may be waived, amended, supplemented, or eliminated only by mutual written agreement of the parties.

If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

This Agreement contains the entire agreement between both parties, neither party relies upon any warranty or representation not contained in this Agreement.

IN WITNESS WHEREOF, the City of Roseville, a Municipal Corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the ____ day of _____, 20__, and Seller has caused this Agreement to be executed.

RESOLUTION NO. 23-032

APPROVING AN AGREEMENT FOR ACQUISITION OF REAL PROPERTY AND ESCROW INSTRUCTIONS, BY AND BETWEEN THE CITY OF ROSEVILLE AND JERRY LEE, ELISE LEE, LISA MARIE PRINCESS LEE, AND DEVRAE S. LEE, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT AND ALL RELATED ESCROW DOCUMENTS ON BEHALF OF THE CITY OF ROSEVILLE

WHEREAS, an agreement for acquisition of real property and escrow instructions for the purchase of a portion of the property located at 700 Elisa Way (APN No. 471-010-010) in Roseville, CA, by and between the City of Roseville and Jerry Lee, Elise Lee, Lisa Marie Princess Lee, and DeVrae S. Lee, has been reviewed by the City Council; and

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Roseville that said agreement is hereby approved and that the City Manager is authorized to execute it and all related escrow documents on behalf of the City of Roseville; and

PASSED AND ADOPTED by the Council of the City of Roseville this ____ day of _____, 2023, by the following vote on roll call:

AYES COUNCILMEMBERS:

NOES COUNCILMEMBERS:

ABSENT COUNCILMEMBERS:

MAYOR

ATTEST:

City Clerk

PARCEL NO.: 471-010-010

TITLE REPORT NO.: P-504950

PROJECT: ROSEVILLE DRY CREEK GREENWAY EAST PROJECT

**AGREEMENT FOR ACQUISITION OF REAL PROPERTY
(ESCROW INSTRUCTIONS)**

THIS AGREEMENT is entered into this _____ day of _____, 2022 by and between the CITY OF ROSEVILLE, a Municipal Corporation (hereinafter called "Buyer"), and Jerry Lee, a single man; Elise Lee, a married woman as her sole and separate property as to a Life Estate; the remainder interest therein to Lisa Marie Princess Lee and DeVrae S. Lee, equally as their interests appear of record, (hereinafter called "Seller") for acquisition by Buyer of one Slope Easement and one Pedestrian and Bicycle Access Easement over real property hereinafter set forth.

IT IS HEREBY MUTUALLY AGREED BETWEEN THE PARTIES AS FOLLOWS:

1. **AGREEMENT TO SELL AND PURCHASE.** Seller agrees to sell to Buyer, and Buyer agrees to purchase from Seller, upon the terms and for the consideration set forth in this agreement, the following interest(s) in property, all situated in the City of Roseville, County of Placer, State of California:

- A. Slope Easement (Attached as Attachment 1) and
- B. Pedestrian and Bicycle Access Easement (Attached as Attachment 2)

The legal description of each interest is identified in the referenced attachment(s), which are hereby incorporated by reference.

2. **PURCHASE PRICE.** The total purchase price, payable in cash through escrow, shall be the sum of:

EIGHTY-TWO THOUSAND SIX HUNDRED AND 00/100 DOLLARS

(\$82,600.00)

The total purchase price includes: acquisition value of the property interests identified in Section 1.

3. **CONVEYANCE OF TITLE.** Seller agrees to convey the easements by Easement Deeds. Seller agrees to convey to Buyer marketable easements free and clear of all recorded and unrecorded liens, encumbrances, assessments, easements, leases, and taxes EXCEPT:

- A. All taxes for the current fiscal year prorated as per Section 6 hereinafter.
- B. Quasi-public utility, public alley, public street easements, and rights of way of record.
- C. Preliminary Title Report to be provided by Placer Title Company and approved in Escrow.

4. **POSSESSION.** It is agreed and confirmed by the parties hereto that notwithstanding other provisions in this contract, the right of possession and use of the subject property by Buyer, including the right to remove and dispose of improvements, shall commence on the date the amount of funds as specified in Section 2 herein are deposited into the escrow controlling this transaction. The amount

shown in Section 2 herein includes, but is not limited to, full payment for such possession and use, including damages, if any, from said date.

5. TITLE INSURANCE POLICY. Escrow Agent shall, following recording of deeds to Buyer, provide Buyer with CLTA Standard Coverage Policy of Title Insurance in the amount of \$82,600.00 issued by Placer Title Company showing the title to the property vested in Buyer, subject only to the exceptions set forth in Section 3 and the printed exceptions and stipulations in said policy. Buyer agrees to pay the premium charged therefore.

6. ESCROW. Buyer agrees to open an escrow in accordance with this Agreement at Placer Title Company, 1508 Eureka Road, Suite 150 Roseville, CA 95661 (916) 782-3711. This Agreement constitutes the joint escrow instructions of Buyer and Seller, and Escrow Agent (Tracy Murphy) to whom these instructions are delivered is hereby empowered to act under this Agreement. The parties hereto agree to do all acts necessary to close this escrow in the shortest possible time.

Seller agrees to deposit with Escrow Agent prior to the Close of Escrow original, fully executed and acknowledged deeds prepared by Escrow Agent and any other customary agreements, consents, or documents reasonably necessary to effectuate the purchase of the subject property. Buyer agrees to deposit the purchase price and certificate of acceptance upon demand of Escrow Agent.

Insurance policies for fire or casualty are not to be transferred, and Seller will cancel its own policies after close of escrow.

All funds received in this escrow shall be deposited with other escrow funds in a general escrow account(s) and may be transferred to any other such escrow trust account in any State or National Bank doing business in the State of California. All disbursements shall be made either by check or wire transfer from such account.

ESCROW AGENT IS AUTHORIZED AND IS INSTRUCTED TO COMPLY WITH THE FOLLOWING TAX ADJUSTMENT PROCEDURE:

- A. Pay and charge Seller for any unpaid delinquent taxes and/or penalties and interest thereon, and for any delinquent or non-delinquent assessments or bonds against the property;
- B. In the event this escrow closes between July 1 and November 1, and current tax information is not available from title insurer, Escrow Agent is instructed to withhold from Seller's proceeds an amount equal to 120% of the prorated amount due based upon the previous fiscal year's second half tax bill. At such time that the tax information is available, Escrow Agent shall make a check payable to the County Tax Collector for Seller's prorated portion of taxes and forward the same to the Buyer and shall refund any difference to the Seller. In the event the amount withheld is not sufficient to pay Seller's prorated portion of taxes due, the Seller herein agrees to immediately pay the difference; In the event said tax information is available, Seller's taxes shall be prorated in accordance with Paragraph "C" below.
- C. From the date that tax information is available, as per Paragraph "B" hereinabove, up to and including June 30th, Seller's current taxes, if unpaid, shall be prorated to date of close of escrow on the basis of a 365 day year in accordance with Tax Collector's proration requirements, together with penalties and interest, if said current taxes are unpaid after December 10 and/or April 10. At close of escrow, a check payable to the

County Tax Collector for Seller's prorata portion of taxes shall be forwarded to Buyer with closing statement;

- D. Any taxes which have been paid by Seller, prior to opening of this escrow, shall not be prorated between Buyer and Seller, but Seller shall have the sole right, after close of escrow, to apply to the County Tax Collector of said county for a refund. This refund would apply to the period after Buyer's acquisition, pursuant to Revenue and Taxation Code Section 5096.7.

ESCROW AGENT IS AUTHORIZED TO, AND SHALL:

- E. Pay and charge Seller, upon Seller's written approval, for any amount necessary to place title in the condition necessary to satisfy Section 3 of this Agreement, excluding any penalty for prepayment to any lienholder in compliance with Section 1265.240 of the Code of Civil Procedure ("Eminent Domain Law");
- F. Pay and charge Buyer for any escrow fees, charges, and costs payable under Section 6 of this Agreement;
- G. Disburse funds and deliver deeds when conditions of this escrow have been fulfilled by Buyer and Seller.

The term "close of escrow", if and where written in these instructions, shall mean the date that all necessary instruments of conveyance are recorded in the office of the County Recorder. Recordation of instruments delivered through this escrow is authorized if necessary or proper in the issuance of said policy of title insurance.

All time limits within which any matter herein specified is to be performed may be extended by mutual agreement of the parties hereto. Any amendment of, or supplement to, any instructions must be in writing.

TIME IS OF THE ESSENCE IN THESE INSTRUCTIONS AND ESCROW IS TO CLOSE AS SOON AS POSSIBLE. The parties hereto agree to perform all acts reasonably necessary to close this escrow within one hundred twenty (120) days following the opening of escrow.

Responsibility for Escrow Agent under this Agreement is expressly limited to Sections 1, 2, 3, 4, 5, 6, 7, 9, 10, 11, and 17 and to its liability under any policy of title insurance issued in regard to this transaction.

7. ESCROW FEES, CHARGES AND COSTS. Buyer agrees to pay all Buyer's and Seller's usual fees, charges, and costs which arise in this escrow.

8. RENTAL AND OCCUPANCY BY SELLER. Seller warrants that there are no oral or written leases on all or any portion of property.

9. PERMISSION TO ENTER ON PREMISES. Seller hereby grants to Buyer, or its authorized agents, permission to enter upon the Property at all reasonable times prior to close of escrow for the purpose of making necessary or appropriate inspections. It is understood that Buyer and its contractors

will indemnify Seller and hold them harmless from any and all liability for bodily injury, death and property damage arising out of or in any way connected with such inspections, and reimburse Seller for all costs, expenses and loss, including attorney's fees, incurred by them in consequence of any claims, demands and causes of action which may be made or brought against them arising out of such inspections. Buyer shall provide the Seller a forty-eight (48) hours written notice before entering the property. However, Buyer shall have no obligation to indemnify Seller for any loss, liability, or damage caused by the negligence of the Seller, or any of Seller's employees, agents, or authorized users, including, but not limited to, tenants, invitees or permittees.

10. COUNTERPARTS. This Agreement may be executed in counterparts, each of which so executed shall, irrespective of the date of its execution and delivery, be deemed an original, and all such counterparts together shall constitute one and the same instrument.

11. CLOSING STATEMENT. Seller instructs Escrow Agent to release a copy of Seller's statement to Buyer, whose address is 311 Vernon St, Roseville, CA 95678; purpose being to ascertain if any reimbursements are due Seller.

12. LOSS OR DAMAGE TO IMPROVEMENTS. Loss or damage to the real property or any improvements thereon, by fire or other casualty, occurring prior to the recordation of the deeds shall be at the risk of Seller. In the event that loss or damage to the real property or any improvements thereon, by fire or other casualty, occurs prior to the recordation of the deeds, Buyer may elect to require that the Seller pay to Buyer the proceeds of any insurance which may become payable to Seller by reason thereof, or to permit such proceeds to be used for the restoration of the damage done, or to reduce the total price by an amount equal to the diminution in value of said property by reason of such loss or damage or the amount of insurance payable to Seller, whichever is greater.

13. EMINENT DOMAIN DISMISSAL. Seller and Buyer acknowledge that this transaction is a negotiated settlement in lieu of condemnation, and Seller hereby agrees and consents to the dismissal or abandonment of any eminent domain action in the Superior Court of the State of California in and for the County of Placer, wherein the herein described property is included and also waives any and all claims to any money on deposit in said action and further waives all attorney's fees, costs, disbursements, and expenses incurred in connection therewith. If, prior to the close of the execution of this transaction, Seller is served with a Summons and Complaint in Eminent Domain in which Seller is a named defendant, upon the closing of this transaction, Seller agrees and consents to Buyer taking a Default in said action.

14. WARRANTIES, REPRESENTATIONS, AND COVENANTS OF SELLER. Seller hereby warrants, represents, and/or covenants to Buyer that:

- A. To the best of Seller's knowledge, there are no actions, suits, material claims, legal proceedings, or any other proceedings affecting the property or any portion thereof, at law, or in equity before any court or governmental agency, domestic or foreign.
- B. To the best of Seller's knowledge, there are no encroachments onto the property by improvements on any adjoining property, nor do any buildings or improvements encroach on other properties.

- C. Until the closing, Seller shall maintain the property in good condition and state of repair and maintenance, and shall perform all of its obligations under any service contracts or other contracts affecting the property.
- D. Until the closing, Seller shall not do anything which would impair Seller's title to any of the property.
- E. To the best of Seller's knowledge, neither the execution of this Agreement nor the performance of the obligations herein will conflict with, or breach any of the provisions of any bond, note, evidence of indebtedness, contract, lease, or other agreement or instrument to which Seller's property may be bound.
- F. Until the closing, Seller shall, upon learning of any fact or condition which would cause any of the warranties and representations in this Section 14 (Warranties, Representations, and Covenants of Seller) not to be true as of closing, immediately give written notice of such fact or condition to Buyer.

15. **HAZARDOUS WASTE.** Neither Seller nor, to the best of Seller's knowledge, any previous owner, tenant, occupant, or user of the Property used, generated, released, discharged, stored, or disposed of any hazardous waste, toxic substances, or related materials ("Hazardous Materials") on, under, in, or about the Property, or transported any Hazardous Materials to or from the Property. Seller shall not cause or permit the presence, use, generation, release, discharge, storage, or disposal of any Hazardous Materials on, under, in, or about, or the transportation of any Hazardous Materials to or from, the Property. The term "Hazardous Material" shall mean any substance, material, or waste which is or becomes regulated by any local governmental authority, the State of California, or the United States Government, including, but not limited to, any material or substance which is (i) defined as a "hazardous waste", "extremely hazardous waste", or "restricted hazardous waste" under Section 25115, 25117 or 25122.7, or listed pursuant to Section 25140 of the California Health and Safety Code, Division 20, Chapter 6.5 (Hazardous Waste Control Law), (ii) defined as "hazardous substance" under Section 25316 of the California Health and Safety Code, Division 20, Chapter 6.8 (Carpenter-Presley-Tanner Hazardous Substance Account Act), (iii) defined as a "hazardous material", "hazardous substance", or "hazardous waste" under Section 25501 of the California Health and Safety Code, Division 20, Chapter 6.95 (Hazardous Materials Release Response Plans and Inventory), (iv) defined as a "hazardous substance" under Section 25281 of the California Health and Safety Code, Division 20, Chapter 6.7 (Underground Storage of Hazardous Substances), (v) petroleum, (vi) asbestos, (vii) polychlorinated biphenyls, (viii) listed under Article 9 or defined as "hazardous" or "extremely hazardous" pursuant to Article 11 of Title 22 of the California Administrative Code, Division 4, Chapter 20, (ix) designated as a "hazardous substances" pursuant to Section 311 of the Clean Water Act, (33 U.S.C. S1317), (x) defined as a "hazardous waste" pursuant to Section 1004 of the Resource Conservation and Recovery Act, 42 U.S.C. S6901 et seq. (42 U.S.C. S6903) or (xi) defined as a "hazardous substances" pursuant to Section 101 of the Comprehensive Environmental Response, Compensation, as amended by Liability Act, 42. U.S.C. S9601 et seq. (42 U.S.C. S9601).

16. **COMPLIANCE WITH ENVIRONMENTAL LAWS.** To the best of Seller's knowledge the Property complies with all applicable laws and governmental regulations including, without limitation, all applicable federal, state, and local laws pertaining to air and water quality, hazardous waste, waste disposal, and other environmental matters, including, but not limited to, the Clean Water, Clean Air,

Federal Water Pollution Control, Solid Waste Disposal, Resource Conservation Recovery and Comprehensive Environmental Response Compensation and Liability Acts, and the California Environment Quality Act, and the rules, regulations, and ordinances of the city within which the subject property is located, the California Department of Health Services, the Regional Water Quality Control Board, the State Water Resources Control Board, the Environmental Protection Agency, and all applicable federal, state, and local agencies and bureaus.

17. INDEMNITY. Seller agrees to indemnify, defend and hold Buyer harmless from and against any claim, action, suit, proceeding, loss, cost, damage, liability, deficiency, fine, penalty, punitive damage, or expense (including, without limitation, attorneys' fees), resulting from, arising out of, or based upon (i) the presence, release, use, generation, discharge, storage, or disposal of any Hazardous Material on, under, in or about, or the transportation of any such materials to or from, the Property, or (ii) the violation, or alleged violation, of any statute, ordinance, order, rule, regulation, permit, judgment, or license relating to the use, generation, release, discharge, storage, disposal, or transportation of Hazardous Materials on, under, in, or about, to or from, the Property. This indemnity shall include, without limitation, any damage, liability, fine, penalty, punitive damage, cost, or expense arising from or out of any claim, action, suit or proceeding for personal injury (including sickness, disease, or death, tangible or intangible property damage, compensation for lost wages, business income, profits or other economic loss, damage to the natural resource or the environment, nuisance, pollution, contamination, leak, spill, release, or other adverse effect on the environment). This indemnity extends only to liability created prior to or up to the date this escrow shall close. Seller shall not be responsible for acts or omissions to act post close of this escrow.

18. CONTINGENCY. It is understood and agreed between the parties hereto that the completion of this transaction, and the escrow created hereby, is contingent upon the specific acceptance and approval from the Buyer herein.

19. WAIVER OF CLAIMS. Seller acknowledges that the acquisition of the property by Buyer is for a public purpose, and therefore, the property is otherwise subject to taking by the power of eminent domain. Seller acknowledges that this transaction is a negotiated settlement in lieu of condemnation and agrees that the purchase price to be paid herein shall constitute full and fair compensation and consideration for any and all claims that Seller may have against Buyer by reason of the acquisition, improvement, possession, use and/or occupancy of the property, and Seller hereby waives any and all claims, including, but not limited to, claims for attorney's fees, pre-condemnation damages, severance damages, business goodwill, relocation assistance, or any other claim.

20. GENERAL PROVISIONS. The terms and conditions, covenants, and agreements set forth herein shall apply to and bind the heirs, executors, administrators, assigns and successors of the parties hereto.

This Agreement and each provision contained herein may be waived, amended, supplemented, or eliminated only by mutual written agreement of the parties.

If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

This Agreement contains the entire agreement between both parties, neither party relies upon any warranty or representation not contained in this Agreement.

IN WITNESS WHEREOF, the City of Roseville, a Municipal Corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the ____ day of _____, 20__, and Seller has caused this Agreement to be executed.

INSTRUCTIONS FOR COMPLETING THIS FORM

This form complies with current California statutes regarding notary wording and, if needed, should be completed and attached to the document. Acknowledgements from other states may be completed for documents being sent to that state so long as the wording does not require the California notary to violate California notary law.

- State and County information must be the State and County where the document signer(s) personally appeared before the notary public for acknowledgment.
- Date of notarization must be the date that the signer(s) personally appeared which must also be the same date the acknowledgment is completed.
- The notary public must print his or her name as it appears within his or her commission followed by a comma and then your title (notary public).
- Print the name(s) of document signer(s) who personally appear at the time of notarization.
- Indicate the correct singular or plural forms by crossing off incorrect forms (i.e. he/she/they, is /are) or circling the correct forms. Failure to correctly indicate this information may lead to rejection of document recording.
- The notary seal impression must be clear and photographically reproducible. Impression must not cover text or lines. If seal impression smudges, re-seal if a sufficient area permits, otherwise complete a different acknowledgment form.
- Signature of the notary public must match the signature on file with the office of the county clerk.
 - Additional information is not required but could help to ensure this acknowledgment is not misused or attached to a different document.
 - Indicate title or type of attached document, number of pages and date.
 - Indicate the capacity claimed by the signer. If the claimed capacity is a corporate officer, indicate the title (i.e. CEO, CFO, Secretary).
- Securely attach this document to the signed document with a staple.

SLOPE EASEMENT

Assessor's Parcel No: 471-010-010

FOR VALUABLE CONSIDERATION, receipt of which is hereby acknowledged, Jerry Lee, a single man; Elise Lee, a married woman as her sole and separate property as to a Life Estate; the remainder interest therein to Lisa Marie Princess Lee and DeVrae S. Lee, equally as their interests appear of record ("Grantor") hereby grants to the, City of Roseville, a Municipal Corporation ("Grantee") its successors and assigns an exclusive easement to construct, maintain, inspect, repair, reconstruct, replant, and use that certain real property in the City of Roseville, County of Placer, State of California, described in Exhibit A and shown on and delineated on Exhibit B, both of which are attached hereto and by this reference made a part hereof.

The use of said strip of land shall be for slope purposes in order to accommodate the change in grade along the perimeter of the property located off of Marlin Drive, together with the right to use adjacent portions of the larger parcel, as reasonably necessary, for the initial construction of said slope.

No other easement or easements shall be granted on, under or over said strip of land without previous written consent by Grantee, which consent shall not be unreasonably withheld. Grantee shall have the right to assign any portions, or all of the rights granted under the Slope Easement area. (No building, walls or other permanent structures of any kind, and no deep-rooted tree, deep rooted shrubs or other plants or vegetation shall be installed, constructed, erected, placed, planted or maintained in the Slope Easement area without prior written consent of Grantee. Grantee shall have the right to mark the location of the easement in a manner which will not interfere with property owner's reasonable and lawful use of the Slope Easement area.

EXHIBIT "A"
SLOPE EASEMENT
LEGAL DESCRIPTION

A portion of that real property situate in the City of Roseville, County of Placer, State of California, in Section 11, Township 10 North, Range 6 East, Mount Diablo Meridian, being the lands of Jerry Lee, as said lands are described in that certain document recorded April 26, 1976 in Volume 1720, at Page 249, and Elise Lee, Lisa Marie Princess Lee and Devrae S. Lee, as said lands are described in that certain document recorded August 12, 1985 in Book 2849, at Page 197, both of Official Records, Placer County Records, said real property being described as follows:

BEGINNING at a point in the general southerly line of said lands, from which point the most easterly terminus of that certain course described in said deeds as having a bearing and distance of "South 89°23'10" West 400.00 feet", the bearing of said course being South 88°57'21" West for the purpose of this description, bears South 88°57'21" East 100.01 feet; thence leaving said general southerly line North 77°57'11" East 102.15 feet to a point on the easterly line of said lands; thence along said easterly line South 00°16'19" East 7.23 feet to a point thereon, said point also being the northerly corner of Parcel 1-A, as said parcel is described in that certain document recorded August 16, 1995 as Instrument No. 95-042317, Official Records, Placer County Records, said point being the beginning of a non-tangent curve, concave southerly, having a radius of 426.24 feet, to which beginning a radial line bears North 12°35'06" West; thence along the northerly line of said parcel, westerly along said curve, through a central angle of 06°28'03", an arc distance of 48.11 feet (said curve being subtended by a chord which bears South 74°10'52" West 48.09 feet) to the westerly corner of said parcel, said corner also being a point on said general southerly line; thence leaving said northwesterly line, along said general southerly line South 88°57'21" West 53.68 feet to the **POINT OF BEGINNING**.

Containing 669 square feet, more or less.

The bearings and distances used in the above description are based on the California Coordinate System of 1983, CCS83, Zone 2 (2010.00 Epoch). Multiply grid distances shown by 1.00006881 to obtain ground level distances.

The above-described real property is identified as "Slope Easement Area" on the plat labeled "Exhibit B" attached hereto and made a part hereof.

End of Description

EXHIBIT "B"

NOTES:

INSTRUCTIONS FOR COMPLETING THIS FORM

This form complies with current California statutes regarding notary wording and, if needed, should be completed and attached to the document. Acknowledgements from other states may be completed for documents being sent to that state so long as the wording does not require the California notary to violate California notary law.

- State and County information must be the State and County where the document signer(s) personally appeared before the notary public for acknowledgment.
- Date of notarization must be the date that the signer(s) personally appeared which must also be the same date the acknowledgment is completed.
- The notary public must print his or her name as it appears within his or her commission followed by a comma and then your title (notary public).
- Print the name(s) of document signer(s) who personally appear at the time of notarization.
- Indicate the correct singular or plural forms by crossing off incorrect forms (i.e. he/she/they, is /are) or circling the correct forms. Failure to correctly indicate this information may lead to rejection of document recording.
- The notary seal impression must be clear and photographically reproducible. Impression must not cover text or lines. If seal impression smudges, re-seal if a sufficient area permits, otherwise complete a different acknowledgment form.
- Signature of the notary public must match the signature on file with the office of the county clerk.
 - Additional information is not required but could help to ensure this acknowledgment is not misused or attached to a different document.
 - Indicate title or type of attached document, number of pages and date.
 - Indicate the capacity claimed by the signer. If the claimed capacity is a corporate officer, indicate the title (i.e. CEO, CFO, Secretary).
- Securely attach this document to the signed document with a staple.

ACKNOWLEDGMENT

A notary public or other officer completing this certificate verifies only the identity of the individual who signed the document to which this certificate is attached, and not the truthfulness, accuracy, or validity of that document.

ABSENT COUNCILMEMBERS:

MAYOR

ATTEST:

City Clerk

PARCEL NO.: 469-070-004
TITLE REPORT NO.: P-512252
PROJECT: ROSEVILLE DRY CREEK GREENWAY EAST PROJECT

**AGREEMENT FOR ACQUISITION OF REAL PROPERTY
(ESCROW INSTRUCTIONS)**

THIS AGREEMENT is entered into this _____ day of _____, 2022 by and between the CITY OF ROSEVILLE, a municipal corporation (hereinafter called "Buyer"), and Jack E. Hoffman and Cheryl A. Hoffman, Trustees or their successors in trust under the Hoffman Family Revocable Living Trust dated June 17, 2008 and any amendments thereto, (hereinafter called "Seller") for acquisition by Buyer of one Partial Property Acquisition in fee and one Ingress/Egress and Maintenance Easement over real property hereinafter set forth.

IT IS HEREBY MUTUALLY AGREED BETWEEN THE PARTIES AS FOLLOWS:

1. **AGREEMENT TO SELL AND PURCHASE.** Seller agrees to sell to Buyer, and Buyer agrees to purchase from Seller, upon the terms and for the consideration set forth in this agreement, the following interest(s) in property, all situated in the City of Roseville, County of Placer, State of California:

- A. Partial Property Acquisition in fee (Attached as Attachment 1); and
- B. Non-Exclusive Ingress/Egress and Maintenance Easement (Attached as Attachment 2)

The legal description of each interest is identified in the referenced attachment(s), which are hereby incorporated by reference.

2. **PURCHASE PRICE.** The total purchase price, payable in cash through escrow, shall be the sum of:

TWELVE THOUSAND FIVE HUNDRED AND 00/100 DOLLARS
(\$12,500.00)

The total purchase price includes: acquisition value of the property interests identified in Section 1.

3. **CONVEYANCE OF TITLE.** Seller agrees to convey the fee interest by Grant Deed and the easement by Easement Deed. Seller agrees to convey to Buyer marketable fee title and easements free and clear of all recorded and unrecorded liens, encumbrances, assessments, easements, leases, and taxes EXCEPT:

- A. All taxes for the current fiscal year prorated as per Section 6 hereinafter.
- B. Quasi-public utility, public alley, public street easements, and rights of way of record.
- C. Preliminary Title Report to be provided by Placer Title Company and approved in Escrow.

4. **POSSESSION.** It is agreed and confirmed by the parties hereto that notwithstanding other provisions in this contract, the right of possession and use of the subject property by Buyer, including the right to remove and dispose of improvements, shall commence on the date the amount of funds as specified in Section 2 herein are deposited into the escrow controlling this transaction. The amount shown in Section 2 herein includes, but is not limited to, full payment for such possession and use,

including damages, if any, from said date.

5. TITLE INSURANCE POLICY. Escrow Agent shall, following recording of deeds to Buyer, provide Buyer with CLTA Standard Coverage Policy of Title Insurance in the amount of \$12,500.00 issued by Placer Title Company showing the title to the property vested in Buyer, subject only to the exceptions set forth in Section 3 and the printed exceptions and stipulations in said policy. Buyer agrees to pay the premium charged therefore.

6. ESCROW. Buyer agrees to open an escrow in accordance with this Agreement at Placer Title Company, 1508 Eureka Road, Suite 150 Roseville, CA 95661 (916) 782-3711. This Agreement constitutes the joint escrow instructions of Buyer and Seller, and Escrow Agent (Tracy Murphy) to whom these instructions are delivered is hereby empowered to act under this Agreement. The parties hereto agree to do all acts necessary to close this escrow in the shortest possible time.

Seller agrees to deposit with Escrow Agent prior to the Close of Escrow original, fully executed and acknowledged deeds prepared by Escrow Agent and any other customary agreements, consents, or documents reasonably necessary to effectuate the purchase of the subject property. Buyer agrees to deposit the purchase price and certificate of acceptance upon demand of Escrow Agent.

Insurance policies for fire or casualty are not to be transferred, and Seller will cancel its own policies after close of escrow.

All funds received in this escrow shall be deposited with other escrow funds in a general escrow account(s) and may be transferred to any other such escrow trust account in any State or National Bank doing business in the State of California. All disbursements shall be made either by check or wire transfer from such account.

ESCROW AGENT IS AUTHORIZED AND IS INSTRUCTED TO COMPLY WITH THE FOLLOWING TAX ADJUSTMENT PROCEDURE:

- A. Pay and charge Seller for any unpaid delinquent taxes and/or penalties and interest thereon, and for any delinquent or non-delinquent assessments or bonds against the property;
- B. In the event this escrow closes between July 1 and November 1, and current tax information is not available from title insurer, Escrow Agent is instructed to withhold from Seller's proceeds an amount equal to 120% of the prorated amount due based upon the previous fiscal year's second half tax bill. At such time that the tax information is available, Escrow Agent shall make a check payable to the County Tax Collector for Seller's prorated portion of taxes and forward the same to the Buyer and shall refund any difference to the Seller. In the event the amount withheld is not sufficient to pay Seller's prorated portion of taxes due, the Seller herein agrees to immediately pay the difference;

In the event said tax information is available, Seller's taxes shall be prorated in accordance with Paragraph "C" below.

- C. From the date that tax information is available, as per Paragraph "B" hereinabove, up to

and including June 30th, Seller's current taxes, if unpaid, shall be prorated to date of close of escrow on the basis of a 365 day year in accordance with Tax Collector's proration requirements, together with penalties and interest, if said current taxes are unpaid after December 10 and/or April 10. At close of escrow, a check payable to the County Tax Collector for Seller's prorata portion of taxes shall be forwarded to Buyer with closing statement;

- D. Any taxes which have been paid by Seller, prior to opening of this escrow, shall not be prorated between Buyer and Seller, but Seller shall have the sole right, after close of escrow, to apply to the County Tax Collector of said county for a refund. This refund would apply to the period after Buyer's acquisition, pursuant to Revenue and Taxation Code Section 5096.7.

ESCROW AGENT IS AUTHORIZED TO, AND SHALL:

- E. Pay and charge Seller, upon Seller's written approval, for any amount necessary to place title in the condition necessary to satisfy Section 3 of this Agreement, excluding any penalty for prepayment to any lienholder in compliance with Section 1265.240 of the Code of Civil Procedure ("Eminent Domain Law");
- F. Pay and charge Buyer for any escrow fees, charges, and costs payable under Section 6 of this Agreement;
- G. Disburse funds and deliver deeds when conditions of this escrow have been fulfilled by Buyer and Seller.

The term "close of escrow", if and where written in these instructions, shall mean the date that all necessary instruments of conveyance are recorded in the office of the County Recorder. Recordation of instruments delivered through this escrow is authorized if necessary or proper in the issuance of said policy of title insurance.

All time limits within which any matter herein specified is to be performed may be extended by mutual agreement of the parties hereto. Any amendment of, or supplement to, any instructions must be in writing.

TIME IS OF THE ESSENCE IN THESE INSTRUCTIONS AND ESCROW IS TO CLOSE AS SOON AS POSSIBLE. The parties hereto agree to perform all acts reasonably necessary to close this escrow within one hundred twenty (120) days following the opening of escrow.

Responsibility for Escrow Agent under this Agreement is expressly limited to Sections 1, 2, 3, 4, 5, 6, 7, 10, 11, 12, and 18 and to its liability under any policy of title insurance issued in regard to this transaction.

7. ESCROW FEES, CHARGES AND COSTS. Buyer agrees to pay all Buyer's and Seller's usual fees, charges, and costs which arise in this escrow.

8. FENCING. During construction, Buyer agrees to remove and replace the fence and gate on the property to match the existing fence and gate (including paint). Buyer is responsible for the removal and

disposal of the old fence material. The fence and gate shall be installed on the Seller's property in the location specified by the Seller. After the fence and gate are installed, the Seller will be responsible for the on-going maintenance and repair of the fence and gate. Buyer shall provide a two (2) week written notice to Seller before the removal and replacement of the fence and gate. Buyer will not leave the area without fencing.

9. RENTAL AND OCCUPANCY BY SELLER. Seller warrants that there are no oral or written leases on all or any portion of property.

10. PERMISSION TO ENTER ON PREMISES. Seller hereby grants to Buyer, or its authorized agents, permission to enter upon the Property at all reasonable times prior to close of escrow for the purpose of making necessary or appropriate inspections. It is understood that Buyer and its contractors will indemnify Seller and hold them harmless from any and all liability for bodily injury, death and property damage arising out of or in any way connected with such inspections, and reimburse Seller for all costs, expenses and loss, including attorney's fees, incurred by them in consequence of any claims, demands and causes of action which may be made or brought against them arising out of such inspections. Buyer shall provide the Seller a forty-eight (48) hour written notice before entering the property. However, Buyer shall have no obligation to indemnify Seller for any loss, liability, or damage caused by the negligence of the Seller, or any of Seller's employees, agents, or authorized users, including, but not limited to, tenants, invitees or permittees.

11. COUNTERPARTS. This Agreement may be executed in counterparts, each of which so executed shall, irrespective of the date of its execution and delivery, be deemed an original, and all such counterparts together shall constitute one and the same instrument.

12. CLOSING STATEMENT. Seller instructs Escrow Agent to release a copy of Seller's statement to Buyer, whose address is 311 Vernon St, Roseville, CA 95678; purpose being to ascertain if any reimbursements are due Seller.

13. LOSS OR DAMAGE TO IMPROVEMENTS. Loss or damage to the real property or any improvements thereon, by fire or other casualty, occurring prior to the recordation of the deeds shall be at the risk of Seller. In the event that loss or damage to the real property or any improvements thereon, by fire or other casualty, occurs prior to the recordation of the deeds, Buyer may elect to require that the Seller pay to Buyer the proceeds of any insurance which may become payable to Seller by reason thereof, or to permit such proceeds to be used for the restoration of the damage done, or to reduce the total price by an amount equal to the diminution in value of said property by reason of such loss or damage or the amount of insurance payable to Seller, whichever is greater.

14. EMINENT DOMAIN DISMISSAL. Seller and Buyer acknowledge that this transaction is a negotiated settlement in lieu of condemnation, and Seller hereby agrees and consents to the dismissal or abandonment of any eminent domain action in the Superior Court of the State of California in and for the County of Placer, wherein the herein described property is included and also waives any and all claims to any money on deposit in said action and further waives all attorney's fees, costs, disbursements, and expenses incurred in connection therewith. If, prior to the close of the execution of this transaction, Seller is served with a Summons and Complaint in Eminent Domain in which Seller is a named defendant, upon the closing of this transaction, Seller agrees and consents to Buyer taking a Default in said action.

15. WARRANTIES, REPRESENTATIONS, AND COVENANTS OF SELLER. Seller hereby warrants, represents, and/or covenants to Buyer that:

- A. To the best of Seller's knowledge, there are no actions, suits, material claims, legal proceedings, or any other proceedings affecting the property or any portion thereof, at law, or in equity before any court or governmental agency, domestic or foreign.
- B. To the best of Seller's knowledge, there are no encroachments onto the property by improvements on any adjoining property, nor do any buildings or improvements encroach on other properties.
- C. Until the closing, Seller shall maintain the property in good condition and state of repair and maintenance, and shall perform all of its obligations under any service contracts or other contracts affecting the property.
- D. Until the closing, Seller shall not do anything which would impair Seller's title to any of the property.
- E. To the best of Seller's knowledge, neither the execution of this Agreement nor the performance of the obligations herein will conflict with, or breach any of the provisions of any bond, note, evidence of indebtedness, contract, lease, or other agreement or instrument to which Seller's property may be bound.
- F. Until the closing, Seller shall, upon learning of any fact or condition which would cause any of the warranties and representations in this Section 14 (Warranties, Representations, and Covenants of Seller) not to be true as of closing, immediately give written notice of such fact or condition to Buyer.

16. HAZARDOUS WASTE. Neither Seller nor, to the best of Seller's knowledge, any previous owner, tenant, occupant, or user of the Property used, generated, released, discharged, stored, or disposed of any hazardous waste, toxic substances, or related materials ("Hazardous Materials") on, under, in, or about the Property, or transported any Hazardous Materials to or from the Property. Seller shall not cause or permit the presence, use, generation, release, discharge, storage, or disposal of any Hazardous Materials on, under, in, or about, or the transportation of any Hazardous Materials to or from, the Property. The term "Hazardous Material" shall mean any substance, material, or waste which is or becomes regulated by any local governmental authority, the State of California, or the United States Government, including, but not limited to, any material or substance which is (i) defined as a "hazardous waste", "extremely hazardous waste", or "restricted hazardous waste" under Section 25115, 25117 or 25122.7, or listed pursuant to Section 25140 of the California Health and Safety Code, Division 20, Chapter 6.5 (Hazardous Waste Control Law), (ii) defined as "hazardous substance" under Section 25316 of the California Health and Safety Code, Division 20, Chapter 6.8 (Carpenter-Presley-Tanner Hazardous Substance Account Act), (iii) defined as a "hazardous material", "hazardous substance", or "hazardous waste" under Section 25501 of the California Health and Safety Code, Division 20, Chapter 6.95 (Hazardous Materials Release Response Plans and Inventory), (iv) defined as a "hazardous substance" under Section 25281 of the California Health and Safety Code, Division 20, Chapter 6.7 (Underground Storage of Hazardous Substances), (v) petroleum, (vi) asbestos, (vii) polychlorinated biphenyls, (viii) listed under Article 9 or defined as "hazardous" or "extremely hazardous" pursuant to Article 11 of Title 22 of the California Administrative Code, Division 4, Chapter

20, (ix) designated as a "hazardous substances" pursuant to Section 311 of the Clean Water Act, (33 U.S.C. S1317), (x) defined as a "hazardous waste" pursuant to Section 1004 of the Resource Conservation and Recovery Act, 42 U.S.C. S6901 et seq. (42 U.S.C. S6903) or (xi) defined as a "hazardous substances" pursuant to Section 101 of the Comprehensive Environmental Response, Compensation, as amended by Liability Act, 42. U.S.C. S9601 et seq. (42 U.S.C. S9601).

17. COMPLIANCE WITH ENVIRONMENTAL LAWS. To the best of Seller's knowledge the Property complies with all applicable laws and governmental regulations including, without limitation, all applicable federal, state, and local laws pertaining to air and water quality, hazardous waste, waste disposal, and other environmental matters, including, but not limited to, the Clean Water, Clean Air, Federal Water Pollution Control, Solid Waste Disposal, Resource Conservation Recovery and Comprehensive Environmental Response Compensation and Liability Acts, and the California Environment Quality Act, and the rules, regulations, and ordinances of the city within which the subject property is located, the California Department of Health Services, the Regional Water Quality Control Board, the State Water Resources Control Board, the Environmental Protection Agency, and all applicable federal, state, and local agencies and bureaus.

18. INDEMNITY. Seller agrees to indemnify, defend and hold Buyer harmless from and against any claim, action, suit, proceeding, loss, cost, damage, liability, deficiency, fine, penalty, punitive damage, or expense (including, without limitation, attorneys' fees), resulting from, arising out of, or based upon (i) the presence, release, use, generation, discharge, storage, or disposal of any Hazardous Material on, under, in or about, or the transportation of any such materials to or from, the Property, or (ii) the violation, or alleged violation, of any statute, ordinance, order, rule, regulation, permit, judgment, or license relating to the use, generation, release, discharge, storage, disposal, or transportation of Hazardous Materials on, under, in, or about, to or from, the Property. This indemnity shall include, without limitation, any damage, liability, fine, penalty, punitive damage, cost, or expense arising from or out of any claim, action, suit or proceeding for personal injury (including sickness, disease, or death, tangible or intangible property damage, compensation for lost wages, business income, profits or other economic loss, damage to the natural resource or the environment, nuisance, pollution, contamination, leak, spill, release, or other adverse effect on the environment). This indemnity extends only to liability created prior to or up to the date this escrow shall close. Seller shall not be responsible for acts or omissions to act post close of this escrow.

19. CONTINGENCY. It is understood and agreed between the parties hereto that the completion of this transaction, and the escrow created hereby, is contingent upon the specific acceptance and approval from the Buyer herein.

20. WAIVER OF CLAIMS. Seller acknowledges that the acquisition of the property by Buyer is for a public purpose, and therefore, the property is otherwise subject to taking by the power of eminent domain. Seller acknowledges that this transaction is a negotiated settlement in lieu of condemnation and agrees that the purchase price to be paid herein shall constitute full and fair compensation and consideration for any and all claims that Seller may have against Buyer by reason of the acquisition, improvement, possession, use and/or occupancy of the property, and Seller hereby waives any and all claims, including, but not limited to, claims for attorney's fees, pre-condemnation damages, severance damages, business goodwill, relocation assistance, or any other claim.

21. GENERAL PROVISIONS. The terms and conditions, covenants, and agreements set forth

herein shall apply to and bind the heirs, executors, administrators, assigns and successors of the parties hereto.

This Agreement and each provision contained herein may be waived, amended, supplemented, or eliminated only by mutual written agreement of the parties.

If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

This Agreement contains the entire agreement between both parties, neither party relies upon any warranty or representation not contained in this Agreement.

IN WITNESS WHEREOF, the City of Roseville, a Municipal Corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the ____ day of _____, 20____, and Seller has caused this Agreement to be executed.

TITLE REPORT NO.: P-512272

PROJECT: ROSEVILLE DRY CREEK GREENWAY EAST PROJECT

**AGREEMENT FOR ACQUISITION OF REAL PROPERTY
(ESCROW INSTRUCTIONS)**

THIS AGREEMENT is entered into this _____ day of _____, 2022 by and between the CITY OF ROSEVILLE, a Municipal Corporation (hereinafter called "Buyer"), and Joey L. Stetson and Lisa A. Stetson, husband and wife as joint tenants, (hereinafter called "Seller") for acquisition by Buyer of one Partial Property Acquisition in fee and one Ingress/Egress and Maintenance Easement over real property hereinafter set forth.

IT IS HEREBY MUTUALLY AGREED BETWEEN THE PARTIES AS FOLLOWS:

1. **AGREEMENT TO SELL AND PURCHASE.** Seller agrees to sell to Buyer, and Buyer agrees to purchase from Seller, upon the terms and for the consideration set forth in this agreement, the following interest(s) in property, all situated in the City of Roseville, County of Placer, State of California:

- A. Partial Property Acquisition in fee (Attached as Attachment 1); and
- B. Non-Exclusive Ingress/Egress and Maintenance Easement (Attached as Attachment 2)

The legal description of each interest is identified in the referenced attachment(s), which are hereby incorporated by reference.

2. **PURCHASE PRICE.** The total purchase price, payable in cash through escrow, shall be the sum of:

THIRTY THOUSAND AND 00/100 DOLLARS
(\$30,000.00)

The total purchase price includes: acquisition value of the property interests identified in Section 1.

3. **CONVEYANCE OF TITLE.** Seller agrees to convey the fee interest by Grant Deed and the easement by Easement Deed. Seller agrees to convey to Buyer marketable fee title and easements free and clear of all recorded and unrecorded liens, encumbrances, assessments, easements, leases, and taxes EXCEPT:

- A. All taxes for the current fiscal year prorated as per Section 6 hereinafter.
- B. Quasi-public utility, public alley, public street easements, and rights of way of record.
- C. Preliminary Title Report to be provided by Placer Title Company and approved in Escrow.

4. **POSSESSION.** It is agreed and confirmed by the parties hereto that notwithstanding other provisions in this contract, the right of possession and use of the subject property by Buyer, including the right to remove and dispose of improvements, shall commence on the date the amount of funds as specified in Section 2 herein are deposited into the escrow controlling this transaction. The amount

shown in Section 2 herein includes, but is not limited to, full payment for such possession and use, including damages, if any, from said date.

5. TITLE INSURANCE POLICY. Escrow Agent shall, following recording of deeds to Buyer, provide Buyer with CLTA Standard Coverage Policy of Title Insurance in the amount of \$30,000.00 issued by Placer Title Company showing the title to the property vested in Buyer, subject only to the exceptions set forth in Section 3 and the printed exceptions and stipulations in said policy. Buyer agrees to pay the premium charged therefore.

6. ESCROW. Buyer agrees to open an escrow in accordance with this Agreement at Placer Title Company, 1508 Eureka Road, Suite 150 Roseville, CA 95661 (916) 782-3711. This Agreement constitutes the joint escrow instructions of Buyer and Seller, and Escrow Agent (Tracy Murphy) to whom these instructions are delivered is hereby empowered to act under this Agreement. The parties hereto agree to do all acts necessary to close this escrow in the shortest possible time.

Seller agrees to deposit with Escrow Agent prior to the Close of Escrow original, fully executed and acknowledged deeds prepared by Escrow Agent and any other customary agreements, consents, or documents reasonably necessary to effectuate the purchase of the subject property. Buyer agrees to deposit the purchase price and **certificate of acceptance** upon demand of Escrow Agent.

Insurance policies for fire or casualty are not to be transferred, and Seller will cancel its own policies after close of escrow.

All funds received in this escrow shall be deposited with other escrow funds in a general escrow account(s) and may be transferred to any other such escrow trust account in any State or National Bank doing business in the State of California. All disbursements shall be made either by check or wire transfer from such account.

ESCROW AGENT IS AUTHORIZED AND IS INSTRUCTED TO COMPLY WITH THE FOLLOWING TAX ADJUSTMENT PROCEDURE:

- A. Pay and charge Seller for any unpaid delinquent taxes and/or penalties and interest thereon, and for any delinquent or non-delinquent assessments or bonds against the property;
- B. In the event this escrow closes between July 1 and November 1, and current tax information is not available from title insurer, Escrow Agent is instructed to withhold from Seller's proceeds an amount equal to 120% of the prorated amount due based upon the previous fiscal year's second half tax bill. At such time that the tax information is available, Escrow Agent shall make a check payable to the County Tax Collector for Seller's prorated portion of taxes and forward the same to the Buyer and shall refund any difference to the Seller. In the event the amount withheld is not sufficient to pay Seller's prorated portion of taxes due, the Seller herein agrees to immediately pay the difference;

In the event said tax information is available, Seller's taxes shall be prorated in accordance with Paragraph "C" below.

- C. From the date that tax information is available, as per Paragraph "B" hereinabove, up to and including June 30th, Seller's current taxes, if unpaid, shall be prorated to date of close of escrow on the basis of a 365 day year in accordance with Tax Collector's proration requirements, together with penalties and interest, if said current taxes are unpaid after December 10 and/or April 10. At close of escrow, a check payable to the County Tax Collector for Seller's prorata portion of taxes shall be forwarded to Buyer with closing statement;
- D. Any taxes which have been paid by Seller, prior to opening of this escrow, shall not be prorated between Buyer and Seller, but Seller shall have the sole right, after close of escrow, to apply to the County Tax Collector of said county for a refund. This refund would apply to the period after Buyer's acquisition, pursuant to Revenue and Taxation Code Section 5096.7.

ESCROW AGENT IS AUTHORIZED TO, AND SHALL:

- E. Pay and charge Seller, upon Seller's written approval, for any amount necessary to place title in the condition necessary to satisfy Section 3 of this Agreement, excluding any penalty for prepayment to any lienholder in compliance with Section 1265.240 of the Code of Civil Procedure ("Eminent Domain Law");
- F. Pay and charge Buyer for any escrow fees, charges, and costs payable under Section 6 of this Agreement;
- G. Disburse funds and deliver deeds when conditions of this escrow have been fulfilled by Buyer and Seller.

The term "close of escrow", if and where written in these instructions, shall mean the date that all necessary instruments of conveyance are recorded in the office of the County Recorder. Recordation of instruments delivered through this escrow is authorized if necessary or proper in the issuance of said policy of title insurance.

All time limits within which any matter herein specified is to be performed may be extended by mutual agreement of the parties hereto. Any amendment of, or supplement to, any instructions must be in writing.

TIME IS OF THE ESSENCE IN THESE INSTRUCTIONS AND ESCROW IS TO CLOSE AS SOON AS POSSIBLE. The parties hereto agree to perform all acts reasonably necessary to close this escrow within one hundred twenty (120) days following the opening of escrow.

Responsibility for Escrow Agent under this Agreement is expressly limited to Sections 1, 2, 3, 4, 5, 6, 7, 10, 11, 12, and 18 and to its liability under any policy of title insurance issued in regard to this transaction.

7. ESCROW FEES, CHARGES AND COSTS. Buyer agrees to pay all Buyer's and Seller's usual fees, charges, and costs which arise in this escrow.

8. FENCING. During construction, Buyer agrees that if any damage occurs to, or relocation is required of the fence located on the property that is due to the ongoing construction, the Buyer will restore the fence to its original condition, or relocate the fence as necessary.

9. RENTAL AND OCCUPANCY BY SELLER. Seller warrants that there are no oral or written leases on all or any portion of property.

10. PERMISSION TO ENTER ON PREMISES. Seller hereby grants to Buyer, or its authorized agents, permission to enter upon the Property at all reasonable times prior to close of escrow for the purpose of making necessary or appropriate inspections. It is understood that Buyer and its contractors will indemnify Seller and hold them harmless from any and all liability for bodily injury, death and property damage arising out of or in any way connected with such inspections, and reimburse Seller for all costs, expenses and loss, including attorney's fees, incurred by them in consequence of any claims, demands and causes of action which may be made or brought against them arising out of such inspections. Buyer shall provide the Seller a forty-eight (48) written notice before entering the property. However, Buyer shall have no obligation to indemnify Seller for any loss, liability, or damage caused by the negligence of the Seller, or any of Seller's employees, agents, or authorized users, including, but not limited to, tenants, invitees or permittees.

11. COUNTERPARTS. This Agreement may be executed in counterparts, each of which so executed shall, irrespective of the date of its execution and delivery, be deemed an original, and all such counterparts together shall constitute one and the same instrument.

12. CLOSING STATEMENT. Seller instructs Escrow Agent to release a copy of Seller's statement to Buyer, whose address is 311 Vernon St, Roseville, CA 95678; purpose being to ascertain if any reimbursements are due Seller.

13. LOSS OR DAMAGE TO IMPROVEMENTS. Loss or damage to the real property or any improvements thereon, by fire or other casualty, occurring prior to the recordation of the deeds shall be at the risk of Seller. In the event that loss or damage to the real property or any improvements thereon, by fire or other casualty, occurs prior to the recordation of the deeds, Buyer may elect to require that the Seller pay to Buyer the proceeds of any insurance which may become payable to Seller by reason thereof, or to permit such proceeds to be used for the restoration of the damage done, or to reduce the total price by an amount equal to the diminution in value of said property by reason of such loss or damage or the amount of insurance payable to Seller, whichever is greater.

14. EMINENT DOMAIN DISMISSAL. Seller and Buyer acknowledge that this transaction is a negotiated settlement in lieu of condemnation, and Seller hereby agrees and consents to the dismissal or abandonment of any eminent domain action in the Superior Court of the State of California in and for the County of Placer, wherein the herein described property is included and also waives any and all claims to any money on deposit in said action and further waives all attorney's fees, costs, disbursements, and expenses incurred in connection therewith. If, prior to the close of the execution of this transaction, Seller is served with a Summons and Complaint in Eminent Domain in which Seller is a named defendant, upon the closing of this transaction, Seller agrees and consents to Buyer taking a Default in said action.

15. WARRANTIES, REPRESENTATIONS, AND COVENANTS OF SELLER. Seller hereby

warrants, represents, and/or covenants to Buyer that:

- A. To the best of Seller's knowledge, there are no actions, suits, material claims, legal proceedings, or any other proceedings affecting the property or any portion thereof, at law, or in equity before any court or governmental agency, domestic or foreign.
- B. To the best of Seller's knowledge, there are no encroachments onto the property by improvements on any adjoining property, nor do any buildings or improvements encroach on other properties.
- C. Until the closing, Seller shall maintain the property in good condition and state of repair and maintenance, and shall perform all of its obligations under any service contracts or other contracts affecting the property.
- D. Until the closing, Seller shall not do anything which would impair Seller's title to any of the property.
- E. To the best of Seller's knowledge, neither the execution of this Agreement nor the performance of the obligations herein will conflict with, or breach any of the provisions of any bond, note, evidence of indebtedness, contract, lease, or other agreement or instrument to which Seller's property may be bound.
- F. Until the closing, Seller shall, upon learning of any fact or condition which would cause any of the warranties and representations in this Section 14 (Warranties, Representations, and Covenants of Seller) not to be true as of closing, immediately give written notice of such fact or condition to Buyer.

16. HAZARDOUS WASTE. Neither Seller nor, to the best of Seller's knowledge, any previous owner, tenant, occupant, or user of the Property used, generated, released, discharged, stored, or disposed of any hazardous waste, toxic substances, or related materials ("Hazardous Materials") on, under, in, or about the Property, or transported any Hazardous Materials to or from the Property. Seller shall not cause or permit the presence, use, generation, release, discharge, storage, or disposal of any Hazardous Materials on, under, in, or about, or the transportation of any Hazardous Materials to or from, the Property. The term "Hazardous Material" shall mean any substance, material, or waste which is or becomes regulated by any local governmental authority, the State of California, or the United States Government, including, but not limited to, any material or substance which is (i) defined as a "hazardous waste", "extremely hazardous waste", or "restricted hazardous waste" under Section 25115, 25117 or 25122.7, or listed pursuant to Section 25140 of the California Health and Safety Code, Division 20, Chapter 6.5 (Hazardous Waste Control Law), (ii) defined as "hazardous substance" under Section 25316 of the California Health and Safety Code, Division 20, Chapter 6.8 (Carpenter-Presley-Tanner Hazardous Substance Account Act), (iii) defined as a "hazardous material", "hazardous substance", or "hazardous waste" under Section 25501 of the California Health and Safety Code, Division 20, Chapter 6.95 (Hazardous Materials Release Response Plans and Inventory), (iv) defined as a "hazardous substance" under Section 25281 of the California Health and Safety Code, Division 20, Chapter 6.7 (Underground Storage of Hazardous Substances), (v) petroleum, (vi) asbestos, (vii) polychlorinated biphenyls, (viii) listed under Article 9 or defined as "hazardous" or "extremely hazardous" pursuant to Article 11 of Title 22 of the California Administrative Code, Division 4, Chapter

20, (ix) designated as a "hazardous substances" pursuant to Section 311 of the Clean Water Act, (33 U.S.C. S1317), (x) defined as a "hazardous waste" pursuant to Section 1004 of the Resource Conservation and Recovery Act, 42 U.S.C. S6901 et seq. (42 U.S.C. S6903) or (xi) defined as a "hazardous substances" pursuant to Section 101 of the Comprehensive Environmental Response, Compensation, as amended by Liability Act, 42. U.S.C. S9601 et seq. (42 U.S.C. S9601).

17. COMPLIANCE WITH ENVIRONMENTAL LAWS. To the best of Seller's knowledge the Property complies with all applicable laws and governmental regulations including, without limitation, all applicable federal, state, and local laws pertaining to air and water quality, hazardous waste, waste disposal, and other environmental matters, including, but not limited to, the Clean Water, Clean Air, Federal Water Pollution Control, Solid Waste Disposal, Resource Conservation Recovery and Comprehensive Environmental Response Compensation and Liability Acts, and the California Environment Quality Act, and the rules, regulations, and ordinances of the city within which the subject property is located, the California Department of Health Services, the Regional Water Quality Control Board, the State Water Resources Control Board, the Environmental Protection Agency, and all applicable federal, state, and local agencies and bureaus.

18. INDEMNITY. Seller agrees to indemnify, defend and hold Buyer harmless from and against any claim, action, suit, proceeding, loss, cost, damage, liability, deficiency, fine, penalty, punitive damage, or expense (including, without limitation, attorneys' fees), resulting from, arising out of, or based upon (i) the presence, release, use, generation, discharge, storage, or disposal of any Hazardous Material on, under, in or about, or the transportation of any such materials to or from, the Property, or (ii) the violation, or alleged violation, of any statute, ordinance, order, rule, regulation, permit, judgment, or license relating to the use, generation, release, discharge, storage, disposal, or transportation of Hazardous Materials on, under, in, or about, to or from, the Property. This indemnity shall include, without limitation, any damage, liability, fine, penalty, punitive damage, cost, or expense arising from or out of any claim, action, suit or proceeding for personal injury (including sickness, disease, or death, tangible or intangible property damage, compensation for lost wages, business income, profits or other economic loss, damage to the natural resource or the environment, nuisance, pollution, contamination, leak, spill, release, or other adverse effect on the environment). This indemnity extends only to liability created prior to or up to the date this escrow shall close. Seller shall not be responsible for acts or omissions to act post close of this escrow.

19. CONTINGENCY. It is understood and agreed between the parties hereto that the completion of this transaction, and the escrow created hereby, is contingent upon the specific acceptance and approval from the Buyer herein.

20. WAIVER OF CLAIMS. Seller acknowledges that the acquisition of the property by Buyer is for a public purpose, and therefore, the property is otherwise subject to taking by the power of eminent domain. Seller acknowledges that this transaction is a negotiated settlement in lieu of condemnation and agrees that the purchase price to be paid herein shall constitute full and fair compensation and consideration for any and all claims that Seller may have against Buyer by reason of the acquisition, improvement, possession, use and/or occupancy of the property, and Seller hereby waives any and all claims, including, but not limited to, claims for attorney's fees, pre-condemnation damages, severance damages, business goodwill, relocation assistance, or any other claim.

21. GENERAL PROVISIONS. The terms and conditions, covenants, and agreements set forth

herein shall apply to and bind the heirs, executors, administrators, assigns and successors of the parties hereto.

This Agreement and each provision contained herein may be waived, amended, supplemented, or eliminated only by mutual written agreement of the parties.

If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

This Agreement contains the entire agreement between both parties, neither party relies upon any warranty or representation not contained in this Agreement.

IN WITNESS WHEREOF, the City of Roseville, a Municipal Corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the ____ day of _____, 20____, and Seller has caused this Agreement to be executed.

**AGREEMENT FOR ACQUISITION OF REAL PROPERTY
(ESCROW INSTRUCTIONS)**

THIS AGREEMENT is entered into this _____ day of _____, 2022 by and between the CITY OF ROSEVILLE, a Municipal Corporation (hereinafter called "Buyer"), and Charles Thomas Eckstrom IV and Jennifer Eckstrom, husband and wife as joint tenants, (hereinafter called "Seller") for acquisition by Buyer of one Partial Property Acquisition in fee and one Ingress/Egress and Maintenance Easement over real property hereinafter set forth.

IT IS HEREBY MUTUALLY AGREED BETWEEN THE PARTIES AS FOLLOWS:

1. **AGREEMENT TO SELL AND PURCHASE.** Seller agrees to sell to Buyer, and Buyer agrees to purchase from Seller, upon the terms and for the consideration set forth in this agreement, the following interest(s) in property, all situated in the City of Roseville, County of Placer, State of California:

- A. Partial Property Acquisition in fee (Attached as Attachment 1); and
- B. Non-Exclusive Ingress/Egress and Maintenance Easement (Attached as Attachment 2)

The legal description of each interest is identified in the referenced attachment(s), which are hereby incorporated by reference.

2. **PURCHASE PRICE.** The total purchase price, payable in cash through escrow, shall be the sum of:

THIRTEEN THOUSAND EIGHT HUNDRED AND 00/100 DOLLARS
(\$13,800.00)

The total purchase price includes: acquisition value of the property interests identified in Section 1.

3. **CONVEYANCE OF TITLE.** Seller agrees to convey the fee interest by Grant Deed and the easement by Easement Deed. Seller agrees to convey to Buyer marketable fee title and easements free and clear of all recorded and unrecorded liens, encumbrances, assessments, easements, leases, and taxes EXCEPT:

- A. All taxes for the current fiscal year prorated as per Section 6 hereinafter.
- B. Quasi-public utility, public alley, public street easements, and rights of way of record.
- C. Preliminary Title Report to be provided by Placer Title Company and approved in Escrow.

4. **POSSESSION.** It is agreed and confirmed by the parties hereto that notwithstanding other provisions in this contract, the right of possession and use of the subject property by Buyer, including the right to remove and dispose of improvements, shall commence on the date the amount of funds as specified in Section 2 herein are deposited into the escrow controlling this transaction. The amount

shown in Section 2 herein includes, but is not limited to, full payment for such possession and use, including damages, if any, from said date.

5. TITLE INSURANCE POLICY. Escrow Agent shall, following recording of deeds to Buyer, provide Buyer with CLTA Standard Coverage Policy of Title Insurance in the amount of \$13,800.00 issued by Placer Title Company showing the title to the property vested in Buyer, subject only to the exceptions set forth in Section 3 and the printed exceptions and stipulations in said policy. Buyer agrees to pay the premium charged therefore.

6. ESCROW. Buyer agrees to open an escrow in accordance with this Agreement at Placer Title Company, 1508 Eureka Road, Suite 150 Roseville, CA 95661 (916) 782-3711. This Agreement constitutes the joint escrow instructions of Buyer and Seller, and Escrow Agent (Tracy Murphy) to whom these instructions are delivered is hereby empowered to act under this Agreement. The parties hereto agree to do all acts necessary to close this escrow in the shortest possible time.

Seller agrees to deposit with Escrow Agent prior to the Close of Escrow original, fully executed and acknowledged deeds prepared by Escrow Agent and any other customary agreements, consents, or documents reasonably necessary to effectuate the purchase of the subject property. Buyer agrees to deposit the purchase price and **certificate of acceptance** upon demand of Escrow Agent.

Insurance policies for fire or casualty are not to be transferred, and Seller will cancel its own policies after close of escrow.

All funds received in this escrow shall be deposited with other escrow funds in a general escrow account(s) and may be transferred to any other such escrow trust account in any State or National Bank doing business in the State of California. All disbursements shall be made either by check or wire transfer from such account.

ESCROW AGENT IS AUTHORIZED AND IS INSTRUCTED TO COMPLY WITH THE FOLLOWING TAX ADJUSTMENT PROCEDURE:

- A. Pay and charge Seller for any unpaid delinquent taxes and/or penalties and interest thereon, and for any delinquent or non-delinquent assessments or bonds against the property;
- B. In the event this escrow closes between July 1 and November 1, and current tax information is not available from title insurer, Escrow Agent is instructed to withhold from Seller's proceeds an amount equal to 120% of the prorated amount due based upon the previous fiscal year's second half tax bill. At such time that the tax information is available, Escrow Agent shall make a check payable to the County Tax Collector for Seller's prorated portion of taxes and forward the same to the Buyer and shall refund any difference to the Seller. In the event the amount withheld is not sufficient to pay Seller's prorated portion of taxes due, the Seller herein agrees to immediately pay the difference;

In the event said tax information is available, Seller's taxes shall be prorated in accordance with Paragraph "C" below.

- C. From the date that tax information is available, as per Paragraph "B" hereinabove, up to and including June 30th, Seller's current taxes, if unpaid, shall be prorated to date of close of escrow on the basis of a 365 day year in accordance with Tax Collector's proration requirements, together with penalties and interest, if said current taxes are unpaid after December 10 and/or April 10. At close of escrow, a check payable to the County Tax Collector for Seller's prorata portion of taxes shall be forwarded to Buyer with closing statement;
- D. Any taxes which have been paid by Seller, prior to opening of this escrow, shall not be prorated between Buyer and Seller, but Seller shall have the sole right, after close of escrow, to apply to the County Tax Collector of said county for a refund. This refund would apply to the period after Buyer's acquisition, pursuant to Revenue and Taxation Code Section 5096.7.

ESCROW AGENT IS AUTHORIZED TO, AND SHALL:

- E. Pay and charge Seller, upon Seller's written approval, for any amount necessary to place title in the condition necessary to satisfy Section 3 of this Agreement, excluding any penalty for prepayment to any lienholder in compliance with Section 1265.240 of the Code of Civil Procedure ("Eminent Domain Law");
- F. Pay and charge Buyer for any escrow fees, charges, and costs payable under Section 6 of this Agreement;
- G. Disburse funds and deliver deeds when conditions of this escrow have been fulfilled by Buyer and Seller.

The term "close of escrow", if and where written in these instructions, shall mean the date that all necessary instruments of conveyance are recorded in the office of the County Recorder. Recordation of instruments delivered through this escrow is authorized if necessary or proper in the issuance of said policy of title insurance.

All time limits within which any matter herein specified is to be performed may be extended by mutual agreement of the parties hereto. Any amendment of, or supplement to, any instructions must be in writing.

TIME IS OF THE ESSENCE IN THESE INSTRUCTIONS AND ESCROW IS TO CLOSE AS SOON AS POSSIBLE. The parties hereto agree to perform all acts reasonably necessary to close this escrow within one hundred twenty (120) days following the opening of escrow.

Responsibility for Escrow Agent under this Agreement is expressly limited to Sections 1, 2, 3, 4, 5, 6, 7, 10, 11, 12, and 18 and to its liability under any policy of title insurance issued in regard to this transaction.

7. **ESCROW FEES, CHARGES AND COSTS.** Buyer agrees to pay all Buyer's and Seller's usual fees, charges, and costs which arise in this escrow.

8. FENCING. During construction, Buyer agrees that if any damage occurs to, or relocation is required of the fence located on the property that is due to the ongoing construction, the Buyer will restore the fence to its original condition, or relocate the fence as necessary.

9. RENTAL AND OCCUPANCY BY SELLER. Seller warrants that there are no oral or written leases on all or any portion of property.

10. PERMISSION TO ENTER ON PREMISES. Seller hereby grants to Buyer, or its authorized agents, permission to enter upon the Property at all reasonable times prior to close of escrow for the purpose of making necessary or appropriate inspections. It is understood that Buyer and its contractors will indemnify Seller and hold them harmless from any and all liability for bodily injury, death and property damage arising out of or in any way connected with such inspections, and reimburse Seller for all costs, expenses and loss, including attorney's fees, incurred by them in consequence of any claims, demands and causes of action which may be made or brought against them arising out of such inspections. Buyer shall provide the Seller a forty-eight (48) hours written notice before entering the property. However, Buyer shall have no obligation to indemnify Seller for any loss, liability, or damage caused by the negligence of the Seller, or any of Seller's employees, agents, or authorized users, including, but not limited to, tenants, invitees or permittees.

11. COUNTERPARTS. This Agreement may be executed in counterparts, each of which so executed shall, irrespective of the date of its execution and delivery, be deemed an original, and all such counterparts together shall constitute one and the same instrument.

12. CLOSING STATEMENT. Seller instructs Escrow Agent to release a copy of Seller's statement to Buyer, whose address is 311 Vernon St, Roseville, CA 95678; purpose being to ascertain if any reimbursements are due Seller.

13. LOSS OR DAMAGE TO IMPROVEMENTS. Loss or damage to the real property or any improvements thereon, by fire or other casualty, occurring prior to the recordation of the deeds shall be at the risk of Seller. In the event that loss or damage to the real property or any improvements thereon, by fire or other casualty, occurs prior to the recordation of the deeds, Buyer may elect to require that the Seller pay to Buyer the proceeds of any insurance which may become payable to Seller by reason thereof, or to permit such proceeds to be used for the restoration of the damage done, or to reduce the total price by an amount equal to the diminution in value of said property by reason of such loss or damage or the amount of insurance payable to Seller, whichever is greater.

14. EMINENT DOMAIN DISMISSAL. Seller and Buyer acknowledge that this transaction is a negotiated settlement in lieu of condemnation, and Seller hereby agrees and consents to the dismissal or abandonment of any eminent domain action in the Superior Court of the State of California in and for the County of Placer, wherein the herein described property is included and also waives any and all claims to any money on deposit in said action and further waives all attorney's fees, costs, disbursements, and expenses incurred in connection therewith. If, prior to the close of the execution of this transaction, Seller is served with a Summons and Complaint in Eminent Domain in which Seller is a named defendant, upon the closing of this transaction, Seller agrees and consents to Buyer taking a Default in said action.

15. WARRANTIES, REPRESENTATIONS, AND COVENANTS OF SELLER. Seller hereby

warrants, represents, and/or covenants to Buyer that:

- A. To the best of Seller's knowledge, there are no actions, suits, material claims, legal proceedings, or any other proceedings affecting the property or any portion thereof, at law, or in equity before any court or governmental agency, domestic or foreign.
- B. To the best of Seller's knowledge, there are no encroachments onto the property by improvements on any adjoining property, nor do any buildings or improvements encroach on other properties.
- C. Until the closing, Seller shall maintain the property in good condition and state of repair and maintenance, and shall perform all of its obligations under any service contracts or other contracts affecting the property.
- D. Until the closing, Seller shall not do anything which would impair Seller's title to any of the property.
- E. To the best of Seller's knowledge, neither the execution of this Agreement nor the performance of the obligations herein will conflict with, or breach any of the provisions of any bond, note, evidence of indebtedness, contract, lease, or other agreement or instrument to which Seller's property may be bound.
- F. Until the closing, Seller shall, upon learning of any fact or condition which would cause any of the warranties and representations in this Section 14 (Warranties, Representations, and Covenants of Seller) not to be true as of closing, immediately give written notice of such fact or condition to Buyer.

16. **HAZARDOUS WASTE.** Neither Seller nor, to the best of Seller's knowledge, any previous owner, tenant, occupant, or user of the Property used, generated, released, discharged, stored, or disposed of any hazardous waste, toxic substances, or related materials ("Hazardous Materials") on, under, in, or about the Property, or transported any Hazardous Materials to or from the Property. Seller shall not cause or permit the presence, use, generation, release, discharge, storage, or disposal of any Hazardous Materials on, under, in, or about, or the transportation of any Hazardous Materials to or from, the Property. The term "Hazardous Material" shall mean any substance, material, or waste which is or becomes regulated by any local governmental authority, the State of California, or the United States Government, including, but not limited to, any material or substance which is (i) defined as a "hazardous waste", "extremely hazardous waste", or "restricted hazardous waste" under Section 25115, 25117 or 25122.7, or listed pursuant to Section 25140 of the California Health and Safety Code, Division 20, Chapter 6.5 (Hazardous Waste Control Law), (ii) defined as "hazardous substance" under Section 25316 of the California Health and Safety Code, Division 20, Chapter 6.8 (Carpenter-Presley-Tanner Hazardous Substance Account Act), (iii) defined as a "hazardous material", "hazardous substance", or "hazardous waste" under Section 25501 of the California Health and Safety Code, Division 20, Chapter 6.95 (Hazardous Materials Release Response Plans and Inventory), (iv) defined as a "hazardous substance" under Section 25281 of the California Health and Safety Code, Division 20, Chapter 6.7 (Underground Storage of Hazardous Substances), (v) petroleum, (vi) asbestos, (vii) polychlorinated biphenyls, (viii) listed under Article 9 or defined as "hazardous" or "extremely hazardous" pursuant to Article 11 of Title 22 of the California Administrative Code, Division 4, Chapter

20, (ix) designated as a "hazardous substances" pursuant to Section 311 of the Clean Water Act, (33 U.S.C. S1317), (x) defined as a "hazardous waste" pursuant to Section 1004 of the Resource Conservation and Recovery Act, 42 U.S.C. S6901 et seq. (42 U.S.C. S6903) or (xi) defined as a "hazardous substances" pursuant to Section 101 of the Comprehensive Environmental Response, Compensation, as amended by Liability Act, 42. U.S.C. S9601 et seq. (42 U.S.C. S9601).

17. COMPLIANCE WITH ENVIRONMENTAL LAWS. To the best of Seller's knowledge the Property complies with all applicable laws and governmental regulations including, without limitation, all applicable federal, state, and local laws pertaining to air and water quality, hazardous waste, waste disposal, and other environmental matters, including, but not limited to, the Clean Water, Clean Air, Federal Water Pollution Control, Solid Waste Disposal, Resource Conservation Recovery and Comprehensive Environmental Response Compensation and Liability Acts, and the California Environment Quality Act, and the rules, regulations, and ordinances of the city within which the subject property is located, the California Department of Health Services, the Regional Water Quality Control Board, the State Water Resources Control Board, the Environmental Protection Agency, and all applicable federal, state, and local agencies and bureaus.

18. INDEMNITY. Seller agrees to indemnify, defend and hold Buyer harmless from and against any claim, action, suit, proceeding, loss, cost, damage, liability, deficiency, fine, penalty, punitive damage, or expense (including, without limitation, attorneys' fees), resulting from, arising out of, or based upon (i) the presence, release, use, generation, discharge, storage, or disposal of any Hazardous Material on, under, in or about, or the transportation of any such materials to or from, the Property, or (ii) the violation, or alleged violation, of any statute, ordinance, order, rule, regulation, permit, judgment, or license relating to the use, generation, release, discharge, storage, disposal, or transportation of Hazardous Materials on, under, in, or about, to or from, the Property. This indemnity shall include, without limitation, any damage, liability, fine, penalty, punitive damage, cost, or expense arising from or out of any claim, action, suit or proceeding for personal injury (including sickness, disease, or death, tangible or intangible property damage, compensation for lost wages, business income, profits or other economic loss, damage to the natural resource or the environment, nuisance, pollution, contamination, leak, spill, release, or other adverse effect on the environment). This indemnity extends only to liability created prior to or up to the date this escrow shall close. Seller shall not be responsible for acts or omissions to act post close of this escrow.

19. CONTINGENCY. It is understood and agreed between the parties hereto that the completion of this transaction, and the escrow created hereby, is contingent upon the specific acceptance and approval from the Buyer herein.

20. WAIVER OF CLAIMS. Seller acknowledges that the acquisition of the property by Buyer is for a public purpose, and therefore, the property is otherwise subject to taking by the power of eminent domain. Seller acknowledges that this transaction is a negotiated settlement in lieu of condemnation and agrees that the purchase price to be paid herein shall constitute full and fair compensation and consideration for any and all claims that Seller may have against Buyer by reason of the acquisition, improvement, possession, use and/or occupancy of the property, and Seller hereby waives any and all claims, including, but not limited to, claims for attorney's fees, pre-condemnation damages, severance damages, business goodwill, relocation assistance, or any other claim.

21. GENERAL PROVISIONS. The terms and conditions, covenants, and agreements set forth

herein shall apply to and bind the heirs, executors, administrators, assigns and successors of the parties hereto.

This Agreement and each provision contained herein may be waived, amended, supplemented, or eliminated only by mutual written agreement of the parties.

If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

This Agreement contains the entire agreement between both parties, neither party relies upon any warranty or representation not contained in this Agreement.

IN WITNESS WHEREOF, the City of Roseville, a Municipal Corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the ____ day of _____, 20__, and Seller has caused this Agreement to be executed.

**AGREEMENT FOR ACQUISITION OF REAL PROPERTY
(ESCROW INSTRUCTIONS)**

THIS AGREEMENT is entered into this _____ day of _____, 2022 by and between the CITY OF ROSEVILLE, a Municipal Corporation (hereinafter called "Buyer"), and Dale P. McAfee and Brenda McAfee, husband and wife as joint tenants, (hereinafter called "Seller") for acquisition by Buyer of one Partial Property Acquisition in fee over real property hereinafter set forth.

IT IS HEREBY MUTUALLY AGREED BETWEEN THE PARTIES AS FOLLOWS:

1. **AGREEMENT TO SELL AND PURCHASE.** Seller agrees to sell to Buyer, and Buyer agrees to purchase from Seller, upon the terms and for the consideration set forth in this agreement, the following interest(s) in property, all situated in the City of Roseville, County of Placer, State of California:

A. Partial Property Acquisition in fee (Attached as Attachment 1)

The legal description of each interest is identified in the referenced attachment(s), which are hereby incorporated by reference.

2. **PURCHASE PRICE.** The total purchase price, payable in cash through escrow, shall be the sum of:

THREE HUNDRED TWENTY FIVE THOUSAND AND 00/100 DOLLARS
(\$325,000.00)

The total purchase price includes: acquisition value of the property interests identified in Section 1.

3. **CONVEYANCE OF TITLE.** Seller agrees to convey the fee interest by Grant Deed. Seller agrees to convey to Buyer marketable fee title free and clear of all recorded and unrecorded liens, encumbrances, assessments, easements, leases, and taxes EXCEPT:

- A. All taxes for the current fiscal year prorated as per Section 6 hereinafter.
- B. Quasi-public utility, public alley, public street easements, and rights of way of record.
- C. Preliminary Title Report to be provided by Placer Title Company and approved in Escrow.

4. **POSSESSION.** It is agreed and confirmed by the parties hereto that notwithstanding other provisions in this contract, the right of possession and use of the subject property by Buyer, including the right to remove and dispose of improvements, shall commence on the date the amount of funds as specified in Section 2 herein are deposited into the escrow controlling this transaction. The amount shown in Section 2 herein includes, but is not limited to, full payment for such possession and use, including damages, if any, from said date.

5. **TITLE INSURANCE POLICY.** Escrow Agent shall, following recording of deed to Buyer,

provide Buyer with CLTA Standard Coverage Policy of Title Insurance in the amount of \$325,000.00 issued by Placer Title Company showing the title to the property vested in Buyer, subject only to the exceptions set forth in Section 3 and the printed exceptions and stipulations in said policy. Buyer agrees to pay the premium charged therefore.

6. ESCROW. Buyer agrees to open an escrow in accordance with this Agreement at Placer Title Company, 1508 Eureka Road, Suite 150 Roseville, CA 95661 (916) 782-3711. This Agreement constitutes the joint escrow instructions of Buyer and Seller, and Escrow Agent (Tracy Murphy) to whom these instructions are delivered is hereby empowered to act under this Agreement. The parties hereto agree to do all acts necessary to close this escrow in the shortest possible time.

Seller agrees to deposit with Escrow Agent prior to the Close of Escrow original, fully executed and acknowledged deed prepared by Escrow Agent and any other customary agreements, consents, or documents reasonably necessary to effectuate the purchase of the subject property. Buyer agrees to deposit the purchase price and ~~certificate of acceptance~~ upon demand of Escrow Agent.

Insurance policies for fire or casualty are not to be transferred, and Seller will cancel its own policies after close of escrow.

All funds received in this escrow shall be deposited with other escrow funds in a general escrow account(s) and may be transferred to any other such escrow trust account in any State or National Bank doing business in the State of California. All disbursements shall be made either by check or wire transfer from such account.

ESCROW AGENT IS AUTHORIZED AND IS INSTRUCTED TO COMPLY WITH THE FOLLOWING TAX ADJUSTMENT PROCEDURE:

- A. Pay and charge Seller for any unpaid delinquent taxes and/or penalties and interest thereon, and for any delinquent or non-delinquent assessments or bonds against the property;
- B. In the event this escrow closes between July 1 and November 1, and current tax information is not available from title insurer, Escrow Agent is instructed to withhold from Seller's proceeds an amount equal to 120% of the prorated amount due based upon the previous fiscal year's second half tax bill. At such time that the tax information is available, Escrow Agent shall make a check payable to the County Tax Collector for Seller's prorated portion of taxes and forward the same to the Buyer and shall refund any difference to the Seller. In the event the amount withheld is not sufficient to pay Seller's prorated portion of taxes due, the Seller herein agrees to immediately pay the difference;

In the event said tax information is available, Seller's taxes shall be prorated in accordance with Paragraph "C" below.

- C. From the date that tax information is available, as per Paragraph "B" hereinabove, up to and including June 30th, Seller's current taxes, if unpaid, shall be prorated to date of close of escrow on the basis of a 365 day year in accordance with Tax Collector's proration requirements, together with penalties and interest, if said current taxes are

unpaid after December 10 and/or April 10. At close of escrow, a check payable to the County Tax Collector for Seller's prorata portion of taxes shall be forwarded to Buyer with closing statement;

- D. Any taxes which have been paid by Seller, prior to opening of this escrow, shall not be prorated between Buyer and Seller, but Seller shall have the sole right, after close of escrow, to apply to the County Tax Collector of said county for a refund. This refund would apply to the period after Buyer's acquisition, pursuant to Revenue and Taxation Code Section 5096.7.

ESCROW AGENT IS AUTHORIZED TO, AND SHALL:

- E. Pay and charge Seller, upon Seller's written approval, for any amount necessary to place title in the condition necessary to satisfy Section 3 of this Agreement, excluding any penalty for prepayment to any lienholder in compliance with Section 1265.240 of the Code of Civil Procedure ("Eminent Domain Law");
- F. Pay and charge Buyer for any escrow fees, charges, and costs payable under Section 6 of this Agreement;
- G. Disburse funds and deliver deed when conditions of this escrow have been fulfilled by Buyer and Seller.

The term "close of escrow", if and where written in these instructions, shall mean the date that all necessary instruments of conveyance are recorded in the office of the County Recorder. Recordation of instruments delivered through this escrow is authorized if necessary or proper in the issuance of said policy of title insurance.

All time limits within which any matter herein specified is to be performed may be extended by mutual agreement of the parties hereto. Any amendment of, or supplement to, any instructions must be in writing.

TIME IS OF THE ESSENCE IN THESE INSTRUCTIONS AND ESCROW IS TO CLOSE AS SOON AS POSSIBLE. The parties hereto agree to perform all acts reasonably necessary to close this escrow within one hundred twenty (120) days following the opening of escrow.

Responsibility for Escrow Agent under this Agreement is expressly limited to Sections 1, 2, 3, 4, 5, 6, 7, 10, 11, 12, and 18 and to its liability under any policy of title insurance issued in regard to this transaction.

7. ESCROW FEES, CHARGES AND COSTS. Buyer agrees to pay all Buyer's and Seller's usual fees, charges, and costs which arise in this escrow.

8. PARKING AREA. Per the attached parking agreement (Attachment 2), Buyer agrees to allow the Seller, its employees and tenants to use the City owned property (APN: 472-200-030) for the purposes of employee vehicle parking. Buyer will develop the property into a parking lot adjacent to 643 Riverside Avenue property. Buyer will develop the parking area according to their specifications.

Buyer will install the post and cables outlining the parking area. Buyer agrees to construct the parking area before the construction work related to the trail. After installation, the Seller will be responsible for the on-going maintenance and care of the parking area.

9. RENTAL AND OCCUPANCY BY SELLER. Seller warrants that there are no oral or written leases on all or any portion of property.

10. PERMISSION TO ENTER ON PREMISES. Seller hereby grants to Buyer, or its authorized agents, permission to enter upon the Property at all reasonable times prior to close of escrow for the purpose of making necessary or appropriate inspections. It is understood that Buyer and its contractors will indemnify Seller and hold them harmless from any and all liability for bodily injury, death and property damage arising out of or in any way connected with such inspections, and reimburse Seller for all costs, expenses and loss, including attorney's fees, incurred by them in consequence of any claims, demands and causes of action which may be made or brought against them arising out of such inspections. Buyer shall provide the Seller a forty-eight (48) hour written notice before entering the property. However, Buyer shall have no obligation to indemnify Seller for any loss, liability, or damage caused by the negligence of the Seller, or any of Seller's employees, agents, or authorized users, including, but not limited to, tenants, invitees or permittees.

11. COUNTERPARTS. This Agreement may be executed in counterparts, each of which so executed shall, irrespective of the date of its execution and delivery, be deemed an original, and all such counterparts together shall constitute one and the same instrument.

12. CLOSING STATEMENT. Seller instructs Escrow Agent to release a copy of Seller's statement to Buyer, whose address is 311 Vernon St, Roseville, CA 95678; purpose being to ascertain if any reimbursements are due Seller.

13. LOSS OR DAMAGE TO IMPROVEMENTS. Loss or damage to the real property or any improvements thereon, by fire or other casualty, occurring prior to the recordation of the deed shall be at the risk of Seller. In the event that loss or damage to the real property or any improvements thereon, by fire or other casualty, occurs prior to the recordation of the deed, Buyer may elect to require that the Seller pay to Buyer the proceeds of any insurance which may become payable to Seller by reason thereof, or to permit such proceeds to be used for the restoration of the damage done, or to reduce the total price by an amount equal to the diminution in value of said property by reason of such loss or damage or the amount of insurance payable to Seller, whichever is greater.

14. EMINENT DOMAIN DISMISSAL. Seller and Buyer acknowledge that this transaction is a negotiated settlement in lieu of condemnation, and Seller hereby agrees and consents to the dismissal or abandonment of any eminent domain action in the Superior Court of the State of California in and for the County of Placer, wherein the herein described property is included and also waives any and all claims to any money on deposit in said action and further waives all attorney's fees, costs, disbursements, and expenses incurred in connection therewith. If, prior to the close of the execution of this transaction, Seller is served with a Summons and Complaint in Eminent Domain in which Seller is a named defendant, upon the closing of this transaction, Seller agrees and consents to Buyer taking a Default in said action.

15. WARRANTIES, REPRESENTATIONS, AND COVENANTS OF SELLER. Seller hereby

warrants, represents, and/or covenants to Buyer that:

- A. To the best of Seller's knowledge, there are no actions, suits, material claims, legal proceedings, or any other proceedings affecting the property or any portion thereof, at law, or in equity before any court or governmental agency, domestic or foreign.
- B. To the best of Seller's knowledge, there are no encroachments onto the property by improvements on any adjoining property, nor do any buildings or improvements encroach on other properties.
- C. Until the closing, Seller shall maintain the property in good condition and state of repair and maintenance, and shall perform all of its obligations under any service contracts or other contracts affecting the property.
- D. Until the closing, Seller shall not do anything which would impair Seller's title to any of the property.
- E. To the best of Seller's knowledge, neither the execution of this Agreement nor the performance of the obligations herein will conflict with, or breach any of the provisions of any bond, note, evidence of indebtedness, contract, lease, or other agreement or instrument to which Seller's property may be bound.
- F. Until the closing, Seller shall, upon learning of any fact or condition which would cause any of the warranties and representations in this Section 14 (Warranties, Representations, and Covenants of Seller) not to be true as of closing, immediately give written notice of such fact or condition to Buyer.

16. HAZARDOUS WASTE. Neither Seller nor, to the best of Seller's knowledge, any previous owner, tenant, occupant, or user of the Property used, generated, released, discharged, stored, or disposed of any hazardous waste, toxic substances, or related materials ("Hazardous Materials") on, under, in, or about the Property, or transported any Hazardous Materials to or from the Property. Seller shall not cause or permit the presence, use, generation, release, discharge, storage, or disposal of any Hazardous Materials on, under, in, or about, or the transportation of any Hazardous Materials to or from, the Property. The term "Hazardous Material" shall mean any substance, material, or waste which is or becomes regulated by any local governmental authority, the State of California, or the United States Government, including, but not limited to, any material or substance which is (i) defined as a "hazardous waste", "extremely hazardous waste", or "restricted hazardous waste" under Section 25115, 25117 or 25122.7, or listed pursuant to Section 25140 of the California Health and Safety Code, Division 20, Chapter 6.5 (Hazardous Waste Control Law), (ii) defined as "hazardous substance" under Section 25316 of the California Health and Safety Code, Division 20, Chapter 6.8 (Carpenter-Presley-Tanner Hazardous Substance Account Act), (iii) defined as a "hazardous material", "hazardous substance", or "hazardous waste" under Section 25501 of the California Health and Safety Code, Division 20, Chapter 6.95 (Hazardous Materials Release Response Plans and Inventory), (iv) defined as a "hazardous substance" under Section 25281 of the California Health and Safety Code, Division 20, Chapter 6.7 (Underground Storage of Hazardous Substances), (v) petroleum, (vi) asbestos, (vii) polychlorinated biphenyls, (viii) listed under Article 9 or defined as "hazardous" or "extremely hazardous" pursuant to Article 11 of Title 22 of the California Administrative Code, Division 4, Chapter

20, (ix) designated as a "hazardous substances" pursuant to Section 311 of the Clean Water Act, (33 U.S.C. S1317), (x) defined as a "hazardous waste" pursuant to Section 1004 of the Resource Conservation and Recovery Act, 42 U.S.C. S6901 et seq. (42 U.S.C. S6903) or (xi) defined as a "hazardous substances" pursuant to Section 101 of the Comprehensive Environmental Response, Compensation, as amended by Liability Act, 42. U.S.C. S9601 et seq. (42 U.S.C. S9601).

17. COMPLIANCE WITH ENVIRONMENTAL LAWS. To the best of Seller's knowledge the Property complies with all applicable laws and governmental regulations including, without limitation, all applicable federal, state, and local laws pertaining to air and water quality, hazardous waste, waste disposal, and other environmental matters, including, but not limited to, the Clean Water, Clean Air, Federal Water Pollution Control, Solid Waste Disposal, Resource Conservation Recovery and Comprehensive Environmental Response Compensation and Liability Acts, and the California Environment Quality Act, and the rules, regulations, and ordinances of the city within which the subject property is located, the California Department of Health Services, the Regional Water Quality Control Board, the State Water Resources Control Board, the Environmental Protection Agency, and all applicable federal, state, and local agencies and bureaus.

18. INDEMNITY. Seller agrees to indemnify, defend and hold Buyer harmless from and against any claim, action, suit, proceeding, loss, cost, damage, liability, deficiency, fine, penalty, punitive damage, or expense (including, without limitation, attorneys' fees), resulting from, arising out of, or based upon (i) the presence, release, use, generation, discharge, storage, or disposal of any Hazardous Material on, under, in or about, or the transportation of any such materials to or from, the Property, or (ii) the violation, or alleged violation, of any statute, ordinance, order, rule, regulation, permit, judgment, or license relating to the use, generation, release, discharge, storage, disposal, or transportation of Hazardous Materials on, under, in, or about, to or from, the Property. This indemnity shall include, without limitation, any damage, liability, fine, penalty, punitive damage, cost, or expense arising from or out of any claim, action, suit or proceeding for personal injury (including sickness, disease, or death, tangible or intangible property damage, compensation for lost wages, business income, profits or other economic loss, damage to the natural resource or the environment, nuisance, pollution, contamination, leak, spill, release, or other adverse effect on the environment). This indemnity extends only to liability created prior to or up to the date this escrow shall close. Seller shall not be responsible for acts or omissions to act post close of this escrow.

19. CONTINGENCY. It is understood and agreed between the parties hereto that the completion of this transaction, and the escrow created hereby, is contingent upon the specific acceptance and approval from the Buyer herein.

20. WAIVER OF CLAIMS. Seller acknowledges that the acquisition of the property by Buyer is for a public purpose, and therefore, the property is otherwise subject to taking by the power of eminent domain. Seller acknowledges that this transaction is a negotiated settlement in lieu of condemnation and agrees that the purchase price to be paid herein shall constitute full and fair compensation and consideration for any and all claims that Seller may have against Buyer by reason of the acquisition, improvement, possession, use and/or occupancy of the property, and Seller hereby waives any and all claims, including, but not limited to, claims for attorney's fees, pre-condemnation damages, severance damages, business goodwill, relocation assistance, or any other claim.

21. GENERAL PROVISIONS. The terms and conditions, covenants, and agreements set forth

hereto.

This Agreement and each provision contained herein may be waived, amended, supplemented, or eliminated only by mutual written agreement of the parties.

If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

This Agreement contains the entire agreement between both parties, neither party relies upon any warranty or representation not contained in this Agreement.

IN WITNESS WHEREOF, the City of Roseville, a Municipal Corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the ____ day of _____, 20____, and Seller has caused this Agreement to be executed.

ATTACHMENT 2
CITY OF ROSEVILLE
PARKING AGREEMENT

This Agreement is entered into this _____ day of _____ 20____, ("Effective Date") by and between the City of Roseville, a Municipal Corporation (the "Owner") and Dale P. McAfee and Brenda McAfee, husband and wife as joint tenants ("McAfee").

WHEREAS, the Owner owns the subject property located at 645 Riverside Avenue, Roseville, CA 95678 and identified as APN: 472-200-030, as shown on Exhibit "A" attached hereto and incorporated herein by this reference (the "Subject Property"); and

WHEREAS, McAfee, together with its employees and tenants, desire to use the Subject Property for the purposes of employee vehicle parking, and Owner will allow McAfee to use the Subject Property for said purpose;

NOW, THEREFORE, in consideration of the promises, covenants, terms and conditions herein stated, and for other consideration, the receipt and sufficiency of which the parties hereby acknowledge, Owner and McAfee, agree as follows:

1. The Owner hereby grants McAfee, the right to park their personal cars on 645 Riverside Avenue, Roseville, CA 95678, starting at the close of escrow or until this Agreement is recorded. No truck tractor parking is permitted on the Subject Property.
2. The parking rights granted pursuant to this Agreement are conditioned on the following:
 - a. The parking area is approximately 61 ft. x 95 ft. and approximately 5,808 square feet in size.
 - b. McAfee must remove all vegetation from the Subject Property and continually keep the Subject Property free of weeds and vegetation.
 - c. No truck tractor parking is permitted on the Subject Property.
 - d. McAfee is responsible for the on-going maintenance and care of the parking area.
 - e. Prior to the commencement of those rights set forth in Section 1 of this Agreement, McAfee will provide evidence of proof of liability insurance naming the Owner as an additional insured, in the amounts shown in Item 8.
3. McAfee shall comply with all applicable governmental laws, ordinances, rules, and/or regulations in exercising the privileges granted herein, including hours of work permitted by the Owner.
4. This Agreement is subject to all valid rights existing in the Subject Property as of the effective date of this Agreement. Owner reserves all rights to grant others the privilege to use the Subject Property and the parties specifically agree that this Agreement does not grant McAfee any exclusive interest in the Subject Property whatsoever.
5. This Agreement is made with express permission of the FEMA Regional Administrator and is subject to that certain Grant Deed by and between Grantee Jeffrey R. Stowers and Grantee Owner, dated November 18, 2018 and recorded as Document No. 2018-0007184 with the Placer County Recorder (the "Grant Deed"). McAfee agrees to be bound by all applicable restrictions as stated in Exhibit B to the Grant Deed (FEMA Hazardous Mitigation Assistance Program Terms and Conditions), as shown on Exhibit "B" attached hereto and incorporated herein by this reference.

6. This Agreement may be transferred or assigned only with the prior written approval of the FEMA Regional Administrator. Owner will agree to seek written approval from the FEMA Regional Administrator. The property interests contained herein shall revert to Owner in the event that McAfee loses its eligible status under the transfer provisions contained in Exhibit "B."
7. This Agreement may be amended, relocated, terminated, or abandoned in full by written Agreement between the Owner and McAfee.
8. To the full extent authorized by law, McAfee shall indemnify, defend, and hold the Owner, and its officers, directors, agents and employees, harmless from and against any claims, loss, costs, legal action, suits, liability, or expense on account of personal injury to any persons or damage, destruction, or loss of property, occasioned by or resulting from McAfee's use of the rights granted under this Agreement. In this regard, McAfee represents that it has obtained General Liability and Property Damage Insurance in an amount of at least \$2,000,000.00 covering General Liability and \$1,000,000.00 covering Property Damage. Both insurance policies shall name the Owner as an additional insured. This Section shall survive any termination of the Agreement.
9. Any notice to be given or any document to be delivered by any party to any other herein, shall be delivered in person or mailed by certified mail and addressed to the Owner or McAfee at the following addresses:

If to the Owner: City of Roseville, a Municipal Corporation
 311 Vernon Street
 Roseville, CA 95678
 Attn: Jason Shykowski, Public Works Director

If to McAfee: Dale P. McAfee and Brenda McAfee
 3200 Cobalt Court
 Rocklin, CA 95677
 Attn: Dale P. McAfee
10. Should there be any breach under this Agreement, it is agreed that the prevailing party shall be entitled to all costs and reasonable attorney's fees as a result of any action or proceeding under this Agreement.
11. Owner and McAfee agree that this Agreement shall be binding upon, and inure to the benefit of, their successors in interest.
12. This Agreement may be signed in counterparts, each of which so executed shall irrespective of the date of its execution and delivery be deemed an original, and all such counterparts together shall constitute one and the same instrument. Facsimile signatures shall have the same force and effect as original signatures.

IN WITNESS HEREOF, the Owner and McAfee have executed this Agreement as of the date first written above.

EXHIBIT B

Exhibit "B" FEMA Hazardous Mitigation Assistance Program Terms and Conditions

In reference to the property ("Property") conveyed by the Grant Deed described herein, between Tailpipes Smog Test Centers, Inc. participating in the federally-assisted acquisition project ("the Grantor") and the City of Roseville, ("the Grantee"), its successors and assigns hereby agree to the following terms and conditions:

WHEREAS, the Robert T. Stafford Disaster Relief and Emergency Assistance Act, ("The Stafford Act"), 42 U.S.C. § 5121 et seq., identifies the use of pre-disaster mitigation grants under § 5133, Pre-Disaster Mitigation, to assist States and local governments in implementing cost-effective hazard mitigation measures to reduce injuries, loss of life, and damage and destruction of property;

WHEREAS, the mitigation grant program provides a process for a local government, through the State, to apply for federal funds for mitigation assistance to acquire interests in property, including the purchase of structures in the floodplain, to demolish and/or remove the structures, and to maintain the use of the Property as open space in perpetuity.

WHEREAS, the Property is located in the City of Roseville and the City of Roseville participates in the National Flood Insurance Program and is in good standing with NFIP as of the date of the Grant Deed;

WHEREAS, the City of Roseville, acting by and through the City of Roseville City Council, has applied for and been awarded federal funds pursuant to an agreement with the State of California dated March 23, 2017 ("State-Local Agreement"), and herein incorporated by reference, making it a mitigation grant program subgrantee; and

WHEREAS, the terms of the mitigation grant program statutory authorities, Federal program requirements consistent with 44 C.F.R. Part 80, the Grant Agreement, and the State-local Agreement require that the Grantee agree to conditions that restrict the use of the land to open space in perpetuity in order to protect and preserve natural floodplain values.

Now, therefore, the grant is made subject to the following terms and conditions:

1. Terms. Pursuant to the terms of the Pre-Disaster Mitigation program statutory authorities, Federal program requirements consistent with 44 C.F.R. Part 80, the Grant Agreement, and the State-local Agreement, the following conditions and restrictions shall apply in perpetuity to the Property described in the Grant Deed and acquired by the Grantee pursuant to FEMA program requirements concerning the acquisition of property for open space:

a. Compatible uses. The Property shall be dedicated and maintained in perpetuity as open space for the conservation of natural floodplain functions. Such uses may include: parks for outdoor recreational activities; wetlands management; nature reserves; cultivation; grazing; camping (except where adequate warning time is not available to allow evacuation);

unimproved, unpaved parking lots; buffer zones; and other uses consistent with FEMA guidance for open space acquisition, Hazard Mitigation Assistance, Requirements for Property Acquisition and Relocation for Open Space.

b. Structures. No new structures or improvements shall be erected on the Property other than:

i. A public facility that is open on all sides and functionally related to a designated open space or recreational use;

ii. A public rest room; or

iii. A structure that is compatible with open space and conserves the natural function of the floodplain, including the uses described in Paragraph 1.a., above, and approved by the FEMA Administrator in writing before construction of the structure begins.

Any improvements on the Property shall be in accordance with proper floodplain management policies and practices. Structures built on the Property according to paragraph b. of this section shall be flood proofed or elevated to at least the base flood level plus 1 foot of freeboard, or greater, if required by FEMA, or if required by any State, Tribal, or local ordinance, and in accordance with criteria established by the FEMA Administrator.

c. Disaster Assistance and Flood Insurance. No Federal entity or source may provide disaster assistance for any purpose with respect to the Property, nor may any application for such assistance be made to any Federal entity or source. The Property is not eligible for coverage under the NFIP for damage to structures on the property occurring after the date of the property settlement, except for pre-existing structures being relocated off the property as a result of the project.

d. Transfer. The Grantee, including successors in interest, shall convey any interest in the Property only if the FEMA Regional Administrator, through the State, gives prior written approval of the transferee in accordance with this paragraph.

i. The request by the Grantee, through the State, to the FEMA Regional Administrator must include a signed statement from the proposed transferee that it acknowledges and agrees to be bound by the terms of this section, and documentation of its status as a qualified conservation organization if applicable.

ii. The Grantee may convey a property interest only to a public entity or to a qualified conservation organization. However, the Grantee may convey an easement or lease to a private individual or entity for purposes compatible with the uses described in paragraph (a), of this section, with the prior approval of the FEMA Regional Administrator, and so long as the conveyance does not include authority to control and enforce the terms and conditions of this section.

iii. If title to the Property is transferred to a public entity other than one with a conservation mission, it must be conveyed subject to a conservation easement that shall be

recorded with the deed and shall incorporate all terms and conditions set forth in this section, including the easement holder's responsibility to enforce the easement. This shall be accomplished by one of the following means:

a) The Grantee shall convey, in accordance with this paragraph, a conservation easement to an entity other than the title holder, which shall be recorded with the deed, or

b) At the time of title transfer, the Grantee shall retain such conservation easement, and record it with the deed.

iv. Conveyance of any property interest must reference and incorporate the original deed restrictions providing notice of the conditions in this section and must incorporate a provision for the property interest to revert to the State, Tribe, or local government in the event that the transferee ceases to exist or loses its eligible status under this section.

2. Inspection. FEMA, its representatives and assigns including the state or tribe shall have the right to enter upon the Property, at reasonable times and with reasonable notice, for the purpose of inspecting the Property to ensure compliance with the terms of this part, the Property conveyance and of the grant award.

3. Monitoring and Reporting. Every three years on February 1, the Grantee (mitigation grant program subgrantee), in coordination with any current successor in interest, shall submit through the State to the FEMA Regional Administrator a report certifying that the Grantee has inspected the Property within the month preceding the report, and that the Property continues to be maintained consistent with the provisions of 44 C.F.R. Part 80, the property conveyance, and the grant award.

4. Enforcement. The Grantee (mitigation grant program subgrantee), the State, FEMA, and their respective representatives, successors and assigns, are responsible for taking measures to bring the Property back into compliance if the Property is not maintained according to the terms of 44 C.F.R. Part 80, the property conveyance, and the grant award. The relative rights and responsibilities of FEMA, the State, the Grantee, and subsequent holders of the property interest at the time of enforcement, shall include the following:

a. The State will notify the Grantee and any current holder of the property interest in writing and advise them that they have 60 days to correct the violation.

i. If the Grantee or any current holder of the property interest fails to demonstrate a good faith effort to come into compliance with the terms of the grant within the 60-day period, the State shall enforce the terms of the grant by taking any measures it deems appropriate, including but not limited to bringing an action at law or in equity in a court of competent jurisdiction.

ii. FEMA, its representatives, and assignees may enforce the terms of the grant by taking any measures it deems appropriate, including but not limited to 1 or more of the following:

a) Withholding FEMA mitigation awards or assistance from the State or Tribe, and Grantee; and current holder of the property interest.

b) Requiring transfer of title. The Grantee or the current holder of the property interest shall bear the costs of bringing the Property back into compliance with the terms of the grant; or

c) Bringing an action at law or in equity in a court of competent jurisdiction against any or all of the following parties: the State, the Tribe, the local community, and their respective successors.

5. Amendment. This agreement may be amended upon signatures of FEMA, the state, and the Grantee only to the extent that such amendment does not affect the fundamental and statutory purposes underlying the agreement.

6. Severability. Should any provision of this grant or the application thereof to any person or circumstance be found to be invalid or unenforceable, the rest and remainder of the provisions of this grant and their application shall not be affected and shall remain valid and enforceable.

RESOLUTION NO. 23-037

APPROVING AN AGREEMENT FOR ACQUISITION OF REAL PROPERTY AND ESCROW INSTRUCTIONS, BY AND BETWEEN THE CITY OF ROSEVILLE AND DAVID EDWIN SCHMIDT AND JANET LYNN SCHMIDT, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT AND ALL RELATED ESCROW DOCUMENTS ON BEHALF OF THE CITY OF ROSEVILLE

WHEREAS, an agreement for acquisition of real property and escrow instructions for the purchase of a portion of the properties located at 625 Riverside Avenue and Darling Way (APN Nos. 472-180-013 and 472-180-014) in Roseville, CA, by and between the City of Roseville and David Edwin Schmidt and Janet Lynn Schmidt, has been reviewed by the City Council; and

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Roseville that said agreement is hereby approved and that the City Manager is authorized to execute it and all related escrow documents on behalf of the City of Roseville; and

PASSED AND ADOPTED by the Council of the City of Roseville this ____ day of _____, 2023, by the following vote on roll call:

PORTION OF PARCEL NOS.: 472-180-013 and 472-180-014
TITLE REPORT NO.: P-500247 AND P-500255
PROJECT: ROSEVILLE DRY CREEK GREENWAY EAST PROJECT

**AGREEMENT FOR ACQUISITION OF REAL PROPERTY
(ESCROW INSTRUCTIONS)**

THIS AGREEMENT is entered into this 21st day of December, 2022 by and between the CITY OF ROSEVILLE, a Municipal Corporation (hereinafter called "Buyer"), and David Edwin Schmidt and Janet Lynn Schmidt, Trustees of the David Edwin and Janet Lynn Schmidt Living Trust dated March 8, 2016, (hereinafter called "Seller") for acquisition by Buyer of one Partial Property Acquisition in fee over real property hereinafter set forth.

IT IS HEREBY MUTUALLY AGREED BETWEEN THE PARTIES AS FOLLOWS:

1. **AGREEMENT TO SELL AND PURCHASE.** Seller agrees to sell to Buyer, and Buyer agrees to purchase from Seller, upon the terms and for the consideration set forth in this agreement, the following interest(s) in property, all situated in the City of Roseville, County of Placer, State of California:

A. Partial Property Acquisition in fee (Attached as Attachment 1)

The legal description of each interest is identified in the referenced attachment(s), which are hereby incorporated by reference.

2. **PURCHASE PRICE.** The total purchase price, payable in cash through escrow, shall be the sum of:

FOUR HUNDRED TWENTY FOUR THOUSAND FIVE HUNDRED AND 00/100 DOLLARS
(\$424,500.00)

The total purchase price includes: acquisition value of the property interests identified in Section 1.

3. **CONVEYANCE OF TITLE.** Seller agrees to convey the fee interest by Grant Deed. Seller agrees to convey to Buyer marketable fee title free and clear of all recorded and unrecorded liens, encumbrances, assessments, easements, leases, and taxes EXCEPT:

- A. All taxes for the current fiscal year prorated as per Section 5 hereinafter.
- B. Quasi-public utility, public alley, public street easements, and rights of way of record.
- C. Preliminary Title Report to be provided by Placer Title Company and approved in Escrow.

4. **POSSESSION.** It is agreed and confirmed by the parties hereto that notwithstanding other provisions in this contract, the right of possession and use of the subject property by Buyer, including the right to remove and dispose of improvements, shall commence on the date the amount of funds as specified in Section 2 herein are deposited into the escrow controlling this transaction. Buyer will not perform any construction work until the close of escrow. The amount shown in Section 2 herein includes, but is not limited to, full payment for such possession and use, including damages, if any, from said date.

5. TITLE INSURANCE POLICY. Escrow Agent shall, following recording of deed to Buyer, provide Buyer with CLTA Standard Coverage Policy of Title Insurance in the amount of \$424,500.00, issued by Placer Title Company showing the title to the property vested in Buyer, subject only to the exceptions set forth in Section 3 and the printed exceptions and stipulations in said policy. Buyer agrees to pay the premium charged therefore.

6. ESCROW. Buyer agrees to open an escrow in accordance with this Agreement at Placer Title Company, 1508 Eureka Road, Suite 150 Roseville, CA 95661 (916) 782-3711. This Agreement constitutes the joint escrow instructions of Buyer and Seller, and Escrow Agent (Tracy Murphy) to whom these instructions are delivered is hereby empowered to act under this Agreement. The parties hereto agree to do all acts necessary to close this escrow in the shortest possible time.

Buyer acknowledges that no survey has been provided of the property. During escrow, Seller intend to survey the property. Buyer and Seller agree that the sale price is contingent on the measurements provided by the Seller surveyor not to exceed a 2% variance in area. If the measurements exceed a 2% difference, the Seller request the opportunity to have the values adjusted in escrow, at the current rate utilized to calculate the sales price.

Seller agrees to deposit with Escrow Agent prior to the Close of Escrow original, fully executed and acknowledged deed prepared by Escrow Agent and any other customary agreements, consents, or documents reasonably necessary to effectuate the purchase of the subject property. Buyer agrees to deposit the purchase price and **certificate of acceptance** upon demand of Escrow Agent.

Insurance policies for fire or casualty are not to be transferred, and Seller will cancel its own policies after close of escrow.

All funds received in this escrow shall be deposited with other escrow funds in a general escrow account(s) and may be transferred to any other such escrow trust account in any State or National Bank doing business in the State of California. All disbursements shall be made either by check or wire transfer from such account.

ESCROW AGENT IS AUTHORIZED AND IS INSTRUCTED TO COMPLY WITH THE FOLLOWING TAX ADJUSTMENT PROCEDURE:

- A. Pay and charge Seller for any unpaid delinquent taxes and/or penalties and interest thereon, and for any delinquent or non-delinquent assessments or bonds against the property;
- B. In the event this escrow closes between July 1 and November 1, and current tax information is not available from title insurer, Escrow Agent is instructed to withhold from Seller's proceeds an amount equal to 120% of the prorated amount due based upon the previous fiscal year's second half tax bill. At such time that the tax information is available, Escrow Agent shall make a check payable to the County Tax Collector for Seller's prorated portion of taxes and forward the same to the Buyer and shall refund any difference to the Seller. In the event the amount withheld is not sufficient to pay Seller's prorated portion of taxes due, the Seller herein agrees to immediately pay the difference;

In the event said tax information is available, Seller's taxes shall be prorated in accordance with Paragraph "C" below.

- C. From the date that tax information is available, as per Paragraph "B" hereinabove, up to and including June 30th, Seller's current taxes, if unpaid, shall be prorated to date of close of escrow on the basis of a 365 day year in accordance with Tax Collector's proration requirements, together with penalties and interest, if said current taxes are unpaid after December 10 and/or April 10. At close of escrow, a check payable to the County Tax Collector for Seller's prorata portion of taxes shall be forwarded to Buyer with closing statement;
- D. Any taxes which have been paid by Seller, prior to opening of this escrow, shall not be prorated between Buyer and Seller, but Seller shall have the sole right, after close of escrow, to apply to the County Tax Collector of said county for a refund. This refund would apply to the period after Buyer's acquisition, pursuant to Revenue and Taxation Code Section 5096.7.

ESCROW AGENT IS AUTHORIZED TO, AND SHALL:

- E. Pay and charge Seller, upon Seller's written approval, for any amount necessary to place title in the condition necessary to satisfy Section 3 of this Agreement, excluding any penalty for prepayment to any lienholder in compliance with Section 1265.240 of the Code of Civil Procedure ("Eminent Domain Law");
- F. Pay and charge Buyer for any escrow fees, charges, and costs payable under Section 6 of this Agreement;
- G. Disburse funds and deliver deed when conditions of this escrow have been fulfilled by Buyer and Seller.

The term "close of escrow", if and where written in these instructions, shall mean the date that all necessary instruments of conveyance are recorded in the office of the County Recorder. Recordation of instruments delivered through this escrow is authorized if necessary or proper in the issuance of said policy of title insurance.

All time limits within which any matter herein specified is to be performed may be extended by mutual agreement of the parties hereto. Any amendment of, or supplement to, any instructions must be in writing.

TIME IS OF THE ESSENCE IN THESE INSTRUCTIONS AND ESCROW IS TO CLOSE AS SOON AS POSSIBLE. The parties hereto agree to perform all acts reasonably necessary to close this escrow within one hundred twenty (120) days following the opening of escrow.

Responsibility for Escrow Agent under this Agreement is expressly limited to Sections 1, 2, 3, 4, 5, 6, 7, 9, 10, 11, and 17 and to its liability under any policy of title insurance issued in regard to this transaction.

- 7. ESCROW FEES, CHARGES AND COSTS. Buyer agrees to pay all Buyer's and Seller's usual fees, charges, and costs which arise in this escrow.

8. RENTAL AND OCCUPANCY BY SELLER. Seller warrants that there are no oral or written leases on all or any portion of property.

9. PERMISSION TO ENTER ON PREMISES. Seller hereby grants to Buyer, or its authorized agents, permission to enter upon the Property at all reasonable times prior to close of escrow solely for the purpose of making necessary or appropriate inspections. Buyer shall provide the Seller a forty- eight (48) hour written notice before entering the property. It is understood that Buyer and its contractors will indemnify Seller and hold them harmless from any and all liability for bodily injury, death and property damage arising out of or in any way connected with such inspections, and reimburse Seller for all costs, expenses and loss, including attorney's fees, incurred by them in consequence of any claims, demands and causes of action which may be made or brought against them arising out of such inspections. However, Buyer shall have no obligation to indemnify Seller for any loss, liability, or damage caused by the negligence of the Seller, or any of Seller's employees, agents, or authorized users, including, but not limited to, tenants, invitees or permittees.

10. COUNTERPARTS. This Agreement may be executed in counterparts, each of which so executed shall, irrespective of the date of its execution and delivery, be deemed an original, and all such counterparts together shall constitute one and the same instrument.

11. CLOSING STATEMENT. Seller instructs Escrow Agent to release a copy of Seller's statement to Buyer, whose address is 311 Vernon St, Roseville, CA 95678; purpose being to ascertain if any reimbursements are due Seller.

12. LOSS OR DAMAGE TO IMPROVEMENTS. Loss or damage to the real property or any improvements thereon, by fire or other casualty, occurring prior to the recordation of the deed shall be at the risk of Seller. In the event that loss or damage to the real property or any improvements thereon, by fire or other casualty, occurs prior to the recordation of the deed, Buyer may elect to require that the Seller pay to Buyer the proceeds of any insurance which may become payable to Seller by reason thereof, or to permit such proceeds to be used for the restoration of the damage done, or to reduce the total price by an amount equal to the diminution in value of said property by reason of such loss or damage or the amount of insurance payable to Seller, whichever is greater.

13. EMINENT DOMAIN DISMISSAL. Seller and Buyer acknowledge that this transaction is a negotiated settlement in lieu of condemnation, and Seller hereby agrees and consents to the dismissal or abandonment of any eminent domain action in the Superior Court of the State of California in and for the County of Placer, wherein the herein described property is included and also waives any and all claims to any money on deposit in said action and further waives all attorney's fees, costs, disbursements, and expenses incurred in connection therewith.

14. WARRANTIES, REPRESENTATIONS, AND COVENANTS OF SELLER. Seller hereby warrants, represents, and/or covenants to Buyer that:

- A. To the best of Seller's knowledge, there are no actions, suits, material claims, legal proceedings, or any other proceedings affecting the property or any portion thereof, at law, or in equity before any court or governmental agency, domestic or foreign.

- B. To the best of Seller's knowledge, there are no encroachments onto the property by improvements on any adjoining property, nor do any buildings or improvements encroach on other properties.
- C. Until the closing, Seller shall maintain the property in good condition and state of repair and maintenance, and shall perform all of its obligations under any service contracts or other contracts affecting the property.
- D. Until the closing, Seller shall not do anything which would impair Seller's title to any of the property.
- E. To the best of Seller's knowledge, neither the execution of this Agreement nor the performance of the obligations herein will conflict with, or breach any of the provisions of any bond, note, evidence of indebtedness, contract, lease, or other agreement or instrument to which Seller's property may be bound.
- F. Until the closing, Seller shall, upon learning of any fact or condition which would cause any of the warranties and representations in this Section 14 (Warranties, Representations, and Covenants of Seller) not to be true as of closing, immediately give written notice of such fact or condition to Buyer.

15. HAZARDOUS WASTE. Neither Seller nor, to the best of Seller's knowledge, any previous owner, tenant, occupant, or user of the Property used, generated, released, discharged, stored, or disposed of any hazardous waste, toxic substances, or related materials ("Hazardous Materials") on, under, in, or about the Property, or transported any Hazardous Materials to or from the Property. Seller shall not cause or permit the presence, use, generation, release, discharge, storage, or disposal of any Hazardous Materials on, under, in, or about, or the transportation of any Hazardous Materials to or from, the Property. The term "Hazardous Material" shall mean any substance, material, or waste which is or becomes regulated by any local governmental authority, the State of California, or the United States Government, including, but not limited to, any material or substance which is (i) defined as a "hazardous waste", "extremely hazardous waste", or "restricted hazardous waste" under Section 25115, 25117 or 25122.7, or listed pursuant to Section 25140 of the California Health and Safety Code, Division 20, Chapter 6.5 (Hazardous Waste Control Law), (ii) defined as "hazardous substance" under Section 25316 of the California Health and Safety Code, Division 20, Chapter 6.8 (Carpenter-Presley-Tanner Hazardous Substance Account Act), (iii) defined as a "hazardous material", "hazardous substance", or "hazardous waste" under Section 25501 of the California Health and Safety Code, Division 20, Chapter 6.95 (Hazardous Materials Release Response Plans and Inventory), (iv) defined as a "hazardous substance" under Section 25281 of the California Health and Safety Code, Division 20, Chapter 6.7 (Underground Storage of Hazardous Substances), (v) petroleum, (vi) asbestos, (vii) polychlorinated biphenyls, (viii) listed under Article 9 or defined as "hazardous" or "extremely hazardous" pursuant to Article 11 of Title 22 of the California Administrative Code, Division 4, Chapter 20, (ix) designated as a "hazardous substances" pursuant to Section 311 of the Clean Water Act, (33 U.S.C. S1317), (x) defined as a "hazardous waste" pursuant to Section 1004 of the Resource Conservation and Recovery Act, 42 U.S.C. S6901 et seq. (42 U.S.C. S6903) or (xi) defined as a "hazardous substances" pursuant to Section 101 of the Comprehensive Environmental Response, Compensation, as amended by Liability Act, 42. U.S.C. S9601 et seq. (42 U.S.C. S9601).

16. COMPLIANCE WITH ENVIRONMENTAL LAWS. To the best of Seller's knowledge the Property complies with all applicable laws and governmental regulations including, without limitation, all applicable federal, state, and local laws pertaining to air and water quality, hazardous waste, waste disposal, and other environmental matters, including, but not limited to, the Clean Water, Clean Air, Federal Water Pollution Control, Solid Waste Disposal, Resource Conservation Recovery and Comprehensive Environmental Response Compensation and Liability Acts, and the California Environment Quality Act, and the rules, regulations, and ordinances of the city within which the subject property is located, the California Department of Health Services, the Regional Water Quality Control Board, the State Water Resources Control Board, the Environmental Protection Agency, and all applicable federal, state, and local agencies and bureaus.

17. INDEMNITY. Seller agrees to indemnify, defend and hold Buyer harmless from and against any claim, action, suit, proceeding, loss, cost, damage, liability, deficiency, fine, penalty, punitive damage, or expense (including, without limitation, attorneys' fees), resulting from, arising out of, or based upon (i) the presence, release, use, generation, discharge, storage, or disposal of any Hazardous Material on, under, in or about, or the transportation of any such materials to or from, the Property, or (ii) the violation, or alleged violation, of any statute, ordinance, order, rule, regulation, permit, judgment, or license relating to the use, generation, release, discharge, storage, disposal, or transportation of Hazardous Materials on, under, in, or about, to or from, the Property. This indemnity shall include, without limitation, any damage, liability, fine, penalty, punitive damage, cost, or expense arising from or out of any claim, action, suit or proceeding for personal injury (including sickness, disease, or death, tangible or intangible property damage, compensation for lost wages, business income, profits or other economic loss, damage to the natural resource or the environment, nuisance, pollution, contamination, leak, spill, release, or other adverse effect on the environment). This indemnity extends only to liability created prior to or up to the date this escrow shall close. Seller shall not be responsible for acts or omissions to act post close of this escrow.

18. CONTINGENCY. It is understood and agreed between the parties hereto that the completion of this transaction, and the escrow created hereby, is contingent upon the specific acceptance and approval from the Buyer herein.

19. WAIVER OF CLAIMS. Seller acknowledges that the acquisition of the property by Buyer is for a public purpose, and therefore, the property is otherwise subject to taking by the power of eminent domain. Seller acknowledges that this transaction is a negotiated settlement in lieu of condemnation and agrees that the purchase price to be paid herein shall constitute full and fair compensation and consideration for any and all claims that Seller may have against Buyer by reason of the acquisition, improvement, possession, use and/or occupancy of the property, and Seller hereby waives any and all claims, including, but not limited to, claims for attorney's fees, pre-condemnation damages, severance damages, business goodwill, relocation assistance, or any other claim.

20. GENERAL PROVISIONS. The terms and conditions, covenants, and agreements set forth herein shall apply to and bind the heirs, executors, administrators, assigns and successors of the parties hereto.

This Agreement and each provision contained herein may be waived, amended, supplemented, or eliminated only by mutual written agreement of the parties.

If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable,

such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

This Agreement contains the entire agreement between both parties, neither party relies upon any warranty or representation not contained in this Agreement.

IN WITNESS WHEREOF, the City of Roseville, a Municipal Corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the ____ day of _____, 20__, and Seller has caused this Agreement to be executed.

COUNCIL COMMUNICATION

CC #: 2505

File #: 0203-01 & 0214 & 0201-01

Title: Fleet Truck Purchases - Grant Award, Purchase Orders, and Budget Adjustment

Contact: Brandy LeBeau 916-774-5531 blebeau@roseville.ca.us

Meeting Date: 1/18/2023

Item #: 7.28.

RECOMMENDATION TO COUNCIL

Staff recommends that the City Council adopt a resolution to accept the grant awards from the Placer County Air Pollution Control District in the amount of \$163,215, approve the grant agreements and authorize the City Manager or his Designee to execute the required documents on behalf of the City. Additionally, staff recommends that City Council adopt an ordinance to approve a budget adjustment in the amount of \$163,215.

Sourcewell

Staff recommends City Council approve purchase orders to Dobbs Heavy Duty Holdings LLC dba Western Truck Center for four (4) Autocar CNG trucks with three (3) New Way Sidewinder and one (1) New Way RotoPac automated side-loading bodies utilizing Sourcewell contract# 060920-ATC for the Autocar chassis and Sourcewell contract# 091219-NWY for the New Way bodies as replacements for Fleet ID 15-420, 15-449, 15-450 and 16-370 approved in the FY2022-23 Fleet Replacement budget. The total cost, including options and sales tax, is \$1,839,575.

Sourcewell

Staff recommends City Council approve a purchase order to Altec Industries, Inc. for three (3) Altec AT40G articulating telescoping aerial devices utilizing Sourcewell contract# 110421-ALT as replacements for Fleet ID 13-480, 14-402, and 13-347 approved in the FY2022-23 Electric Fund budget. The total cost, including options and sales tax, is \$661,107.

Sole Source

Staff recommends City Council approve a sole source purchase order to Global Rental Co Inc., a subsidiary of Altec Industries, Inc., for one (1) rent-to-own 2022 Altec AT40G articulating telescoping aerial device as a new fleet addition approved in the FY2022-23 Electric Fund budget. The total cost, including options and sales tax, is \$126,970.

BACKGROUND

Clean Air Grant Program – Carl Moyer Memorial Air Quality Attainment Program

The Placer County Air Pollution Control District's Clean Air Grant Program provides monetary

grants to public agencies to clean up their heavy-duty engines beyond that required by law or regulation through repowering, replacing, or retrofitting their engine, vehicles, or equipment.

In May of 2022, the Fleet Services Division submitted a grant application to the Placer County Air Pollution Control District's Clean Air Grant program for on-road heavy-duty fleet modernization. In October of 2022, the Placer County Air Pollution Control District awarded Fleet Services a total of \$163,215 to purchase two solid waste Compressed Natural Gas (CNG) trucks. This aligns with the City's strategy to utilize CNG to save money on fuel, increase operational efficiencies, reduce low criteria pollutant emissions, lower greenhouse gas emissions, and provide quieter operation. The City's capital improvement project at the Pleasant Grove Wastewater Treatment Plant diverts organic waste and provides methane mitigation, and can be used to fuel the City's ultra-low NOx fleet of refuse trucks.

Sourcewell

The Environmental Utilities Waste Services division is purchasing four (4) Autocar CNG trucks with New Way Sidewinder and RotoPac automated side-loading bodies to replace Fleet ID 15-420, 15-449, 15-450 and 16-370. These trucks are used to collect residential and green waste up to five times per week.

Sourcewell

The Electric Construction and Maintenance division is purchasing three (3) Altec AT40G articulating telescoping aerial devices as replacements for Fleet ID 13-480, 14-402, and 13-347. These trucks are first responder vehicles used by the Troubleshooting division. The vehicles are utilized seven days a week and respond to all power outages and incidents related to the electrical distribution system.

Sole Source

The Electric Construction and Maintenance division is purchasing one (1) rent to own 2022 Altec AT40G articulating telescoping aerial device as a new fleet addition. A sole source is needed to purchase the Altec AT40G since Altec is the exclusive factory-authorized manufacturer and distributor of Altec bodies, parts, and services. This truck is a first responder vehicle used by the Troubleshooting division. The vehicle is utilized seven days a week and responds to all power outages and incidents related to the electrical distribution system.

Vehicle replacements are based on the Fleet Scoring System, which considers factors such as age, mileage, reliability, prior maintenance and repair costs, and current condition. Below are the vehicle replacement scores. A score of 23 or more indicates the vehicle is eligible for replacement.

Vehicle ID	Replacement Score	Vehicle Condition
15-420	30	Meets City replacement criteria
15-449	35	Meets City replacement criteria
15-450	34	Meets City replacement criteria
16-370	29	Meets City replacement criteria
13-480	26	Meets City replacement criteria
14-402	25	Meets City replacement criteria
13-347	25	Meets City replacement criteria

FISCAL IMPACT

The recommended budget adjustment will appropriate \$163,215 towards replacing and purchasing two compressed natural gas (CNG) solid waste collection vehicles, Fleet ID 12-455 and 15-420. The budget adjustment will have no net impact on the City's General Fund.

Sourcewell

The total cost for four (4) Autocar CNG trucks with New Way Sidewinder and RotoPac automated side-loading bodies, including options and sales tax, \$1,839,575. Funding is included in the FY2022-23 Fleet Replacement Fund budget.

Sourcewell

The total cost for three (3) Altec AT40G articulating telescoping aerial devices, including options and sales tax, is \$661,107. Funding is included in the FY2022-23 Electric Fund budget.

Sole Source

The total cost for one (1) rent-to-own 2022 Altec AT40G articulating telescoping aerial devices, including options and sales tax, is \$126,970. Funding is included in the FY2022-23 Electric Fund budget.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Acceptance of a grant award, approval of a budget adjustment and the purchase of vehicles meet the above criteria and are not subject to CEQA. No additional environmental review is required.

CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal A – Remain fiscally responsible in a changing world.

Goal E – Deliver exceptional city services.

Respectfully Submitted,

Brandy LeBeau, Fleet Manager

Jason Shykowski, Public Works Director

Dominick Casey, City Manager

GRANT AGREEMENT

PCAPCD Contract Year: FY 22-23

Contract Number: SCN105543

Board Resolution: 22-22

Grant Description: Waste Truck 12-455 Replacement

This AGREEMENT is between the Placer County Air Pollution Control District (hereinafter “PCAPCD”) and City of Roseville (Public Works - Fleet Services), (hereinafter “GRANTEE”).

The parties agree as follows:

1. Services

- a) GRANTEE agrees, during the term of this AGREEMENT, to perform the contracting services set forth below and in Exhibit A – Scope of Services (hereinafter “PROJECT”).
- b) GRANTEE shall be obligated to devote as much time, attention, skill, and effort as may be reasonably required to perform the PROJECT services, in a professional and timely manner, consistent with the elements of the PROJECT.

2. Contract Period

- a) The term of this contract shall begin on the last date signed by the parties below and conclude on or before the end dates listed in Exhibit B – Contract Term and Payment for Services Rendered, unless terminated or amended.
- b) This contract may be canceled by either party upon serving thirty (30) days’ notice in writing to the other party.

3. Payment

- a) PCAPCD agrees to pay for the services covered by this AGREEMENT pursuant to the payment terms set forth below and in Exhibit B – Contract Term and Payment for Services Rendered.
- b) The amount paid to the GRANTEE shall constitute full payment for all services set forth herein. GRANTEE shall not be reimbursed for any additional expenses incurred beyond the maximum approved sum.

- c) GRANTEE shall bill PCAPCD upon completion of the PROJECT and after all of the conditions for funding outlined in this AGREEMENT are met. If the PROJECT funded under this AGREEMENT is performed in phases or over a period of time, then requests can be made by the GRANTEE for partial payment. Partial requests for payments must receive prior authorization by PCAPCD. GRANTEE agrees to provide a detailed invoice to PCAPCD with copies of purchase orders, signed contracts, or receipts referencing the contract number. PCAPCD retains the right to require proof of services performed or costs incurred prior to any payment under this AGREEMENT.
- d) Notwithstanding any other terms of this AGREEMENT, no payments shall be made to GRANTEE until PCAPCD is satisfied that work of such value has been rendered pursuant to this AGREEMENT.

4. Notices

- a) Any notice or demand desired or required to be given hereunder shall be in writing and deemed given when personally delivered, sent via email with confirmed receipt, or deposited in the mail, postage prepaid, sent certified or registered and addressed to the parties as follows:

PCAPCD:

Placer County Air Pollution Control District
Attn: Air Pollution Control Officer (APCO)
110 Maple Street
Auburn, CA 95603
Email: ecwhite@placer.ca.gov

GRANTEE:

City of Roseville (Public Works - Fleet Services)
Attn: Dominick Casey
311 Vernon Street
Roseville, CA 95678
Email: dcasey@roseville.ca.us

- b) Any notice so delivered personally shall be deemed to be received on the date of delivery, any notice so delivered via email with confirmed receipt shall be deemed to be received on the date of receipt confirmation, and any notice mailed shall be deemed to be received five (5) days after the date on which it was mailed.

5. Obligations of PCAPCD

- a) PCAPCD agrees to pay GRANTEE an amount not to exceed the requirements set forth in Exhibit B – Contract Term and Payment for Services Rendered, in accordance with the requirements listed in Exhibit A – Scope of Services.
- b) PCAPCD shall not reimburse GRANTEE for any expenses incurred by GRANTEE in the performance of PROJECT described in Exhibit A unless such reimbursement is specifically authorized in the Payment Schedule. GRANTEE shall not be reimbursed for any additional expenses incurred beyond the maximum amount.

- c) Except for the payment obligations set forth above, PCAPCD shall have no other obligations or responsibilities to GRANTEE under this AGREEMENT.

6. Obligations of GRANTEE

- a) GRANTEE has or will obtain all additional funding set forth in Exhibit B of this AGREEMENT.
- b) GRANTEE has or will obtain all required licenses, permits, fees, and other legal authorizations from all applicable Federal, State, and local jurisdictions necessary to commence and properly complete, in a professional manner, the PROJECT described in Exhibit A and will produce said documents if requested by PCAPCD.
- c) Labor, equipment, material, supply costs and other charges will be in conformance with the requirements of Exhibit A.
- d) No component of the monies to be paid by PCAPCD to GRANTEE shall be used for grant administration or any interest costs.
- e) GRANTEE shall provide proof of PROJECT completion and verification of costs as set forth in Exhibit A and Section 3 above.

7. Hold Harmless/Indemnity

- a) The GRANTEE hereby agrees to protect, defend, indemnify, and hold PCAPCD free and harmless from any and all losses, claims, liens, demands, and causes of action of every kind and character including, but not limited to, the amounts of judgments, penalties, interest, court costs, legal fees, and all other expenses incurred by PCAPCD arising in favor of any party, including claims, liens, debts, personal injuries, death, or damages to property (including employees or property of PCAPCD) and without limitation by enumeration, all other claims or demands of every character occurring or in any way incident to, in connection with or arising directly or indirectly out of, the contract or agreement. GRANTEE agrees to investigate, handle, respond to, provide defense for, and defend any such claims, demand, or suit at the sole expense of the GRANTEE. GRANTEE also agrees to bear all other costs and expenses related thereto, even if the claim or claims alleged are groundless, false, or fraudulent. This provision is not intended to create any cause of action in favor of any third party against GRANTEE or PCAPCD or to enlarge in any way the GRANTEE's liability but is intended solely to provide for indemnification of PCAPCD from liability for damages or injuries to third persons or property arising from GRANTEE's performance pursuant to this contract or agreement.
- b) As used above, the term PCAPCD means PCAPCD or its officers, agents, employees, and volunteers.

8. Insurance Requirements

- a) It is recognized that GRANTEE is self-insured, and as such provides coverage for General Liability and Worker's Compensation.

- b) GRANTEE shall file with PCAPCD, concurrently herewith, Certificates of Insurance. All certificates are to be received and approved by PCAPCD before work commences. However, failure to obtain the required documents prior to the work beginning shall not waive the GRANTEE's obligation to provide them. PCAPCD reserves the right to require complete, certified copies of all required insurance policies, required by these specifications, at any time.
- c) GRANTEE shall maintain the following insurance coverage in full force and effect during the term of this contract:

WORKER'S COMPENSATION AND EMPLOYERS LIABILITY INSURANCE

If GRANTEE represents that they have no employees, and does not hire SUBCONTRACTORS with employees, then they are not required to have Workers Compensation coverage.

Worker's Compensation Insurance shall be provided as required by any applicable law or regulation. Employer's liability insurance shall be provided in amounts not less than one million dollars (\$1,000,000) each accident for bodily injury by accident, one million dollars (\$1,000,000) policy limit for bodily injury by disease, and one million dollars (\$1,000,000) each employee for bodily injury by disease.

If there is an exposure of injury to GRANTEE'S employees under the U.S. Longshoremen's and Harbor Worker's Compensation Act, the Jones Act, or under laws, regulations, or statutes applicable to maritime employees, coverage shall be included for such injuries or claims.

GRANTEE shall require all SUBCONTRACTORS to maintain adequate Workers' Compensation insurance. Certificates of Workers' Compensation shall be filed with PCAPCD upon demand.

GENERAL LIABILITY INSURANCE

A. Comprehensive General Liability or Commercial General Liability insurance covering all operations by or on behalf of GRANTEE, providing insurance for bodily injury liability and property damage liability for the limits of liability indicated below and including coverage for:

→ Contractual liability insuring the obligations assumed by GRANTEE in this Agreement.

B. One of the following forms is required:

1. Comprehensive General Liability;
2. Commercial General Liability (Occurrence); or
3. Commercial General Liability (Claims Made).

C. If GRANTEE carries a Comprehensive General Liability policy, the limits of liability shall not be less than a Combined Single Limit for bodily injury damage, and Personal Injury Liability of:

- One million dollars (\$1,000,000) each occurrence
- One million dollars (\$1,000,000) aggregate

D. If GRANTEE carries a Commercial General Liability (Occurrence) policy:

1. The limits of liability shall not be less than:
 - One million dollars (\$1,000,000) each occurrence (combined single limit for bodily injury and property damage)
 - One million dollars (\$1,000,000) for Products-Completed Operation
 - One million dollars (\$1,000,000) General Aggregate
2. If the policy does not have an endorsement providing that the General Aggregate Limit applies separately, or if defense costs are included in the aggregate limits, then the required aggregate limit is two million dollars (\$2,000,000).

E. Special Claims Made Policy Form Provisions:

1. The limits of liability shall not be less than:
 - One million dollars (\$1,000,000) each occurrence (combined single limit for bodily injury and property damage)
 - One million dollars (\$1,000,000) aggregate for Products Completed Operations
 - One million dollars (\$1,000,000) General Aggregate
2. The insurance coverage provided by GRANTEE shall contain contract in order to provide insurance coverage for the hold harmless provisions herein if the policy is a claims-made policy.

9. Facilities, Equipment and Other Materials

Except as set forth herein, GRANTEE shall, at its sole cost and expense, furnish all facilities, equipment, and other materials which may be required for furnishing services pursuant to this AGREEMENT. PCAPCD shall furnish GRANTEE only those facilities, equipment, and other materials, and shall perform only those obligations as listed herein.

10. Non-Discrimination

GRANTEE shall not discriminate in its employment practices because of race, religious creed, color, national origin, ancestry, disability, medical condition, marital status, sex, sexual preference, or in contravention of any other protected classification or practice identified in the California Fair Employment and Housing Act; Government Code section 12900 et seq.

11. Records and Documents

- a) GRANTEE shall maintain at all times complete, detailed records with regard to work performed under this AGREEMENT, in a form acceptable to PCAPCD, and PCAPCD shall have the right to inspect such records at any reasonable time.
- b) GRANTEE agrees to return to PCAPCD, upon termination of this AGREEMENT, all documents, drawings, photographs, and other written or graphic material, however produced, received from PCAPCD and used by GRANTEE in the performance of its services. All work papers, drawings, internal memoranda, graphics, photographs, and any written or graphic material, however produced, prepared by GRANTEE in connection with its performance of services hereunder shall be, and shall remain after termination of this AGREEMENT, the property of PCAPCD and may be used by PCAPCD for any purpose whatsoever. PCAPCD agrees that any future use of documents produced by the GRANTEE under the terms of this contract shall be at the sole discretion of PCAPCD and GRANTEE shall bear no liability for the decisions on whether and how to use such documents.

12. Independent Status

- a) GRANTEE shall perform this contract as an independent contractor and not as an employee of PCAPCD. GRANTEE acknowledges that GRANTEE is not entitled to any of PCAPCD's fringe benefits, including without limitation; paid holidays, life insurance, sick leave, or travel or any other expenses in connection with services performed hereunder. No part of the compensation payable to GRANTEE hereunder shall be deducted or withheld for payment of Federal or State income or other employment related taxes. It shall be the responsibility of GRANTEE to provide all coverage necessary for GRANTEE's own benefit and not as an employee of PCAPCD.
- b) Except as PCAPCD may specify in writing, GRANTEE shall have no authority, express or implied, to act on behalf of PCAPCD in any capacity whatsoever as an agent. GRANTEE shall have no authority, express or implied, pursuant to this AGREEMENT to bind PCAPCD to any obligation whatsoever.

13. Warranties

GRANTEE warrants that its services are performed, with the usual thoroughness and competence; in accordance with the standard for professional services at the time those services are rendered.

14. Licenses, Permits, Etc

GRANTEE represents and warrants to PCAPCD that it has or will obtain before initiation of the PROJECT, all licenses, permits, qualifications, and approvals of whatever nature, which are legally required for GRANTEE to practice its profession. GRANTEE represents and warrants to PCAPCD that GRANTEE shall, at its sole cost and expense, keep in effect or obtain at all times during the term of this AGREEMENT, any licenses, permits, and approvals which are legally required for GRANTEE to practice its profession at the time the services are performed.

15. Assignment or Transfer

GRANTEE may assign any of its rights, burdens, duties, or obligations under this AGREEMENT only upon the prior written consent of PCAPCD. Approval will be at the sole discretion of PCAPCD.

16. Modification of Agreement

This AGREEMENT cannot be changed or supplemented orally, and may be modified or superseded only by written instrument executed by all parties.

17. Waiver

One or more waivers by one party of any major or minor breach or default of any provision, term, condition, or covenant of this AGREEMENT shall not operate as a waiver of any subsequent breach or default.

18. Entirety of AGREEMENT

This AGREEMENT constitutes the entire AGREEMENT and understanding between the parties. There are no oral understandings, terms, or conditions, and no party has relied upon any representation, express or implied, not contained in this AGREEMENT. Any prior understandings, terms, or conditions are deemed merged into this AGREEMENT. This AGREEMENT is intended as the complete and exclusive statement of the parties' Agreement pursuant to Code of Civil Procedure section 1856.

19. Jurisdiction

This AGREEMENT, and the right and obligations of the parties, shall be governed by and construed in accordance with the laws of the State of California. If any action is instituted to enforce or interpret this AGREEMENT, venue shall only be in the appropriate state or federal court having venue over matters arising in Placer County, California, provided that nothing in this AGREEMENT shall constitute a waiver of immunity to suit by PCAPCD.

20. Exhibits

All exhibits referred to herein and attached hereto are fully incorporated by this reference.

21. Electronic Signatures

An Electronic Signature refers to any representation in electronic form used to express intent, including a typed name placed in a signatory area, a digitized image or copy of a handwritten signature, a scanned signature on a PDF document, a biometric mark, a sound, or a digital signature. An Electronic Signature provides who signed, what was signed, captures intent and consent. If parties agree to a transaction by electronic means and are required by law to provide, send, or deliver information in writing, the requirement is satisfied if the information is

provided, sent, or delivered in an electronic record, which the recipient can retain at the time of receipt.

By the action of applying an Electronic Signature to this AGREEMENT, parties to the AGREEMENT are certifying their willingness to use electronic signatures and records delivered via electronic means. A signed copy of this AGREEMENT, or any other related ancillary agreement or amendment, transmitted by facsimile, email, electronic signature application, or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signature.

The parties so agree.

**EXHIBIT A
SCOPE OF SERVICES**

Grant Description: Waste Truck 12-455 Replacement

Project Contact Information (subject to change):

GRANTEE:

Brandy LeBeau
(916) 774-5531
blebeau@roseville.ca.us

PCAPCD:

Lauren Moore
(530) 745-2376
lmoore@placer.ca.gov

Project Scope:

Purchase a 2023 or newer Autocar ACX front loader, or equivalent, with a GVWR of 60,000 pounds and a 2023 or newer model year Cummins Heavy Heavy Duty CNG engine with a maximum rated horsepower of 320, to be certified to an emission standard of 0.01 g/bhp-hr for PM and 0.02 g/bhp-hr for NOx. (Replacement Vehicle); and dismantle a 2012 ACX Autocar Xpeditor (VIN: 5VCACL8FXCH213990) with a 2011, 345 horsepower engine (serial number: 73339928) (Replaced Vehicle).

The Replacement Vehicle funded under this AGREEMENT shall perform the same operations as the Replaced Vehicle and shall operate 100 percent within Placer County, for the duration of the project implementation period.

Sections I through III below must be completed prior to the Project Completion End Date as outlined in Exhibit B of this AGREEMENT.

- I. Prior to funding and prior to the GRANTEE taking delivery of the Replacement Vehicle, the GRANTEE shall meet the following conditions:
 - A. Purchase Replacement Vehicle described above. If after contract execution GRANTEE chooses to purchase a vehicle that is different than the originally proposed Replacement Vehicle, then GRANTEE shall make a request to PCAPCD, in writing, to seek approval of the change(s) as soon as possible. The vehicle modification shall: 1) not increase emissions from the originally proposed Replacement Vehicle, 2) shall continue to perform the same functions as the Replaced Vehicle, and 3) shall not increase the awarded grant amount.
 1. The modification in the Replacement Vehicle to be purchased shall only occur with PCAPCD approval. An approval/denial letter shall be emailed to the GRANTEE after PCAPCD has reviewed the request and has made a final determination.
 2. If the request to modify the originally proposed Replacement Vehicle results in an increase in emissions from its original evaluation, then PCAPCD shall reduce the awarded grant amount in order to maintain the same level of cost effectiveness. Such

a change will require PCAPCD approval and a contractual amendment signed by both the GRANTEE and PCAPCD.

3. Modified Replacement Vehicle must meet Carl Moyer Program Guidelines.

B. The following warranty requirements apply:

1. Except for school buses, hybrids, and zero-emission vehicles, GRANTEES must purchase a major component engine warranty for the replacement new or used vehicle or repowered engine. The warranty must cover parts and labor. If the purchase of a new or used Replacement Vehicle is in accordance with currently required warranty periods or warranty requirements for newer engine model years as specified in the Heavy-Duty Low NOx Omnibus Regulation, then separate supplemental warranty is not required. However, it is recommended that the highest grade warranty be purchased in order to avoid expensive repairs in the future.
2. Electric vehicles, hybrid vehicles, and conversion systems must have a minimum warranty period of 3 years or 50,000 miles. The warranty must cover the engine (if applicable) or motor, drivetrain, battery or energy storage, and parts and labor (including any part on the converted vehicle or engine that is damaged by the hybrid conversion system).
3. For zero emission school buses, the vendor warranty must provide protection for a minimum of 60 months or 75,000 miles, whichever comes first, and provide full warranty coverage of, at a minimum, zero-emission or all-electric motor, drive train, batteries/energy storage system(s), parts and labor. Warranties must be fully transferrable to subsequent school bus purchasers for the full warranty coverage period. Warranties must cover the following for the full warranty period (unless otherwise denoted):
 - a. Extended Motor, Drivetrain (including Battery), and Zero-Emission Components: Provide warranty coverage against defects in material and workmanship for the motor, transmission, rear axle, and electric or zero-emission system components including the battery. Gaskets and seals are not required to be included under the warranty coverage.
 - b. Frame Rails, Cross Members, and Cab: For new school buses, coverage extends to structural cracks in the frame caused by defects in material workmanship and against corrosion perforation of the cab. For school bus conversions, the all-electric school bus vendor is only responsible for damage or corrosion tied to, or resulting from, their workmanship on, or handling of, these parts.
 - c. Battery Degradation Warranty: Provide warranty coverage against battery degradation below 80 percent of capacity.

C. GRANTEE shall deliver the Replaced Vehicle under this AGREEMENT to the dealership where the Replacement Vehicle will be purchased.

D. The Replacement Vehicle shall not be delivered to the GRANTEE, from the dealership, until the following conditions have been completed:

1. GRANTEE (or its representative) shall provide to PCAPCD:
 - a. Copies of invoices relative to the purchase of the vehicle funded through this AGREEMENT;

- b. Proof and terms of financing, including lender and amount financed (if applicable);
 - c. Warranty and its terms;
 - d. Copy of the registration (of the Replacement Vehicle);
 - e. Copy of the signed vehicle title (of the Replaced Vehicle);
 - f. Proof of vehicle insurance;
 - g. Certification from the dealer that the Replaced Vehicle will be delivered to a PCAPCD approved dismantler within 60 days of receipt of the Replaced Vehicle. The certification must include the make, model, year, VIN, engine make, engine serial number, the date the vehicle is expected to be delivered to the dismantler, and the dismantler's location;
 - h. Documentation showing that the Replaced Vehicle is roadworthy. Have a Roadworthiness/Pre-Dismantle inspection conducted by PCAPCD or provide documentation showing that the Replaced Vehicle delivered to the dealer is as described in the application, in similar condition as found in the pre-inspection, roadworthy, in operational condition, and not stripped of parts (except for non-emission related body components or parts essential to vocation that will be installed on the Replacement Vehicle). This includes documentation showing that the Replaced Vehicle has passed a CHP BIT inspection in the past 90 days or conduct an equivalent vehicle inspection and sign as appropriate. If documentation is provided by a dealership, PCAPCD reserves the right to audit the dealership's record of inspection.
 - i. Certification from the GRANTEE that all funding sources that they have applied for or received for the PROJECT have been disclosed, and that the GRANTEE will notify PCAPCD of additional sources of funding received for the total cost of the PROJECT, including any sources that become available after contract execution, prior to PROJECT funding. GRANTEE is prohibited from receiving grants and other funds that exceed the total project amount.
 - j. Original invoice to PCAPCD, for the amount of requested grant funds for reimbursement. Note that the invoice cannot be paid until requirements in Section II below are met. PCAPCD may require GRANTEE to re-submit the invoice if payment requirements have not been met in the current PCAPCD fiscal year (7/1 through 6/30).
 - k. The Replacement Vehicle must have an engine with a horsepower rating not to exceed 125% horsepower of the Replaced Vehicle. Any engine with a horsepower above this range must be pre-approved by PCAPCD prior to purchase, whenever possible.
2. Have a post inspection conducted by PCAPCD (or its representative) of the Replacement Vehicle. The GRANTEE (or its representative) shall be responsible for scheduling the appointment with PCAPCD.
 3. A determination by PCAPCD that the Replacement Vehicle and all associated documentation have satisfied the requirements for funding and authorization for the vehicle to be delivered to the GRANTEE.

4. Display on the Replacement Vehicle that partial funding was made available from PCAPCD. Any graphics used for this purpose need to be approved in advance by PCAPCD staff.

II. Prior to funding:

- A. The Replaced Vehicle must be delivered to a PCAPCD approved dismantler (or other PCAPCD approved entity) for destruction within 60 days of GRANTEE's receipt of the Replacement Vehicle funded under this AGREEMENT.
- B. The dismantler (or other representative) shall provide a copy of DMV's "Non-Repairable Vehicle Certificate" using an "Application for Salvage Certificate or Non-Repairable Vehicle Certificate" (REG 488C), or a Notice of Acquisition/Report of Vehicle To Be Dismantled (REG 42) ensuring the VIN can never be registered again in California. Within 90 calendar days of the dismantle inspection date, the dismantler must provide verification to PCAPCD that the Replaced Vehicle has been registered with DMV as non-revivable with a type transaction code (TTC) L10 or C26 on the DMV Reconciliation transaction receipt or other DMV documentation that satisfies this requirement.
- C. GRANTEE to provide a copy of CHP 292, when applicable.

III. Prior to the close of the Project Completion End Date, GRANTEE shall ensure the following:

- A. The Replaced Vehicle has been dismantled per the conditions outlined in this Exhibit and the 2017 Carl Moyer Guidelines.
- B. Within 60 days of the dismantler receiving the Replaced Vehicle, the dismantler must dismantle the vehicle. Dismantle is defined by:
 1. Both frame rails must be completely severed between the front and rear axles.
 2. A hole must be put in the engine block with a diameter of at least three inches at the narrowest point. The hole must be irregularly shaped (i.e. no symmetrical squares or circles). A section of the oil pan flange must be removed as part of the hole or have a line cut through it that connects to the hole.
 3. If the vehicle is to be scrapped, the dismantler must completely sever the frame rails of the old vehicle to ensure that the vehicle will not be used again.
 4. Upon request of GRANTEE, PCAPCD may approve an alternative disposition for the old engine/vehicle.
- C. Either the dismantler (if authorized by PCAPCD) or PCAPCD staff shall conduct a dismantle inspection to verify destruction of the Replaced Vehicle within 10 days of destruction, in accordance with the 2017 Carl Moyer Program Guidelines.
- D. The Replaced Vehicle may not be sold/given to another person in which the intent is to part it out into individual pieces and then be sold to another party.
- E. Provide proof of the automobile insurance coverage to PCAPCD. Automobile insurance, as required by law, shall not lapse and shall be maintained throughout the term of this AGREEMENT.

IV. Reporting and Recordkeeping Requirements during the PROJECT Implementation Period (The PROJECT Implementation Period refers to the timeframe between the Replacement Vehicle's approved Post-Inspection Date and the Contract End Date):

- A. Record annual miles of the Replacement Vehicle throughout the term of this AGREEMENT. If the vehicle operates in areas outside of Placer County, identify/estimate the mileage within Placer County.
- B. GRANTEE shall provide PCAPCD Annual Monitoring Reports as described in Exhibit C. The first annual monitoring report shall be submitted no later than 13 months after PROJECT post-inspection and continuing annually thereafter throughout the Project Implementation Period of this AGREEMENT. At a minimum, noncompliance with the reporting requirements will require an on-site inspection(s). At the sole discretion of PCAPCD, ten (10) percent of the awarded grant amount, as outlined in Exhibit B, will be withheld pending the submittal and approval of the first Annual Monitoring Report as outlined in Exhibit C – Monitoring Report Format.
- C. GRANTEE shall maintain and retain usage and other records associated with the PROJECT for at least three years after the end of the contract term.
- D. Pursuant to Sections 8 of this AGREEMENT, GRANTEE shall provide proof of insurance prior to performing work on this PROJECT, and throughout the term of this contract.
- E. Throughout the term of the AGREEMENT, provide copies of the current automobile insurance of the Replacement Vehicle funded under this AGREEMENT, on an annual basis, to PCAPCD.

V. General Conditions:

- A. GRANTEE shall notify PCAPCD in writing if installation and/or implementation of this PROJECT will deviate from the scope of work as outlined in the GRANTEE's Grant Application or this AGREEMENT at any time during the term of this AGREEMENT. GRANTEE shall notify the APCO within 15 days of recognizing such deviation. If funding has not yet been disbursed at the time of recognizing such deviation, then the GRANTEE shall notify the APCO at least 30 days in advance of any request for payment. The APCO has the sole discretion to approve, deny, or adjust funding amount as outlined in Exhibit B of this AGREEMENT, based on the extent of the deviation.
- B. GRANTEE shall maintain the Replacement Vehicle according to the manufacturer's specifications for the term of the AGREEMENT and shall not tamper with the engine in a way as to void the warranty or to cause the engine to operate in a manner not intended or originally designed.
- C. GRANTEE shall allow PCAPCD or their designee to conduct an inspection or audit of the PROJECT being funded under this AGREEMENT, including the engine, equipment and associated records, during the contract term. At the time of execution of this AGREEMENT, GRANTEE's signature shall be a certification that its fleet, engine(s), and vehicles are in compliance with all applicable federal, State, and local air quality rules and regulations and shall continue to maintain, for the term of the AGREEMENT, compliance with all applicable federal, State, and local air quality rules and regulations for the full contract term.
- D. When determining compliance with mobile source regulatory requirements, the Replacement Vehicle shall be included when defining fleet size, when applicable.

- E. Throughout the term of this AGREEMENT, the PROJECT cannot be used to generate credits or compliance extensions, and must be excluded when determining regulatory compliance, when applicable.
- F. GRANTEES that receive co-funding for the PROJECT funded under this AGREEMENT must meet all criteria associated with each funding source used to fund the PROJECT.
- G. GRANTEES that are not a public entity must provide at least 15 percent of the PROJECT's Moyer eligible costs from non-public sources.
- H. In addition to the terms of this AGREEMENT, GRANTEE shall adhere to all applicable requirements outlined in the applicable California Air Resources Board Guidelines. If there is a conflict between the terms of this contract and California Air Resources Board's guidelines, the California Air Resources Board's Guidelines shall prevail.
- I. By executing this AGREEMENT, GRANTEE understands and agrees to operate the Replacement Vehicle, and/or engine according to the terms herein and to cooperate with PCAPCD in implementation, monitoring, enforcement, and other efforts to assure the emission benefits are real, quantifiable, surplus, and enforceable.

VI. Repercussions for Nonperformance:

- A. If for any reason, after PROJECT funding, the Replacement Vehicle funded under this AGREEMENT does not perform according to what was submitted in the GRANTEE's application, or in conjunction with the application, or if the conditions of this AGREEMENT are not met, PCAPCD may require reimbursement of grant funds.
- B. PCAPCD has the authority to pursue any remedies available under the law for noncompliance with Moyer Program requirements and nonperformance of terms outlined in this AGREEMENT, in an effort to ensure emission reductions are obtained.

EXHIBIT B
CONTRACT TERM AND PAYMENT FOR SERVICES RENDERED

Grant Description: Waste Truck 12-455 Replacement

Contract Schedule (to occur on or before the following dates)

Start Date:	last date signed by the parties
Project Completion End Date:	10/15/2023
Project Implementation Period:	7 years
Contract End Date:	10/15/2030

Budget

Amount Awarded by PCAPCD:	\$38,814.32
Estimated Co-Funding (including in-kind):	\$448,940.39
Estimated Total PROJECT Amount:	\$487,754.71

If the Total PROJECT Amount is less than what is listed above, then the GRANTEE may be required to provide an equivalent percentage of Co-Funding based on the reduced Total PROJECT Amount. The Amount Awarded by PCAPCD, as listed above, shall be adjusted accordingly.

Payment

PCAPCD will provide up to \$38,814.32 (Thirty-Eight Thousand Eight Hundred Fourteen and 32/100 Dollars) in funding to purchase the Replacement Vehicle, in accordance with the requirements listed in this AGREEMENT. Payment(s) shall be made to the GRANTEE within thirty (30) days after the billing is received and approved by PCAPCD.

At the sole discretion of PCAPCD, ten (10) percent of the awarded grant amount, as outlined in this exhibit, will be withheld pending the submittal and approval of the first Annual Monitoring Report as outlined in Exhibit C – Monitoring Report Format.

A completed federal W-9 form and California 590 form must be submitted prior to payment. An IRS Form 1099 will be issued for incentive funds received under this AGREEMENT, if applicable. It is the GRANTEE's responsibility to determine tax liability associated with receiving grant incentive funds.

Invoices

Invoices shall be submitted to PCAPCD in an original format and include the contract number. Along with submitting an invoice for reimbursement, provide copies of all paid receipts and proof of in-kind support (when applicable), and evidence of financing, associated with the PROJECT funded under this AGREEMENT.

EXHIBIT C
MONITORING REPORT FORMAT

Grant Description: Waste Truck 12-455 Replacement

The first annual monitoring report shall be submitted no later than 13 months after PROJECT post-inspection and continuing annually thereafter throughout the PROJECT Implementation Time Frame of this AGREEMENT. The report can be emailed, mailed, or delivered in person to PCAPCD.

The report shall include the following:

1. GRANTEE's name, address, and telephone number.
2. Reference Contract Number.
3. Vehicle make, model, and VIN.
4. Previous year's annual mileage and percentage of time the Replacement Vehicle operated in Placer County.
5. Odometer reading at time of report.
6. Copy of current vehicle registration and proof of automobile insurance.

Note: After the monitoring report is submitted to PCAPCD, staff may conduct a performance evaluation on the PROJECT.

GRANT AGREEMENT

PCAPCD Contract Year: FY 22-23

Contract Number: SCN105544

Board Resolution: 22-22

Grant Description: Waste Truck 15-450 Replacement

This AGREEMENT is between the Placer County Air Pollution Control District (hereinafter “PCAPCD”) and City of Roseville (Public Works - Fleet Services), (hereinafter “GRANTEE”).

The parties agree as follows:

1. Services

- a) GRANTEE agrees, during the term of this AGREEMENT, to perform the contracting services set forth below and in Exhibit A – Scope of Services (hereinafter “PROJECT”).
- b) GRANTEE shall be obligated to devote as much time, attention, skill, and effort as may be reasonably required to perform the PROJECT services, in a professional and timely manner, consistent with the elements of the PROJECT.

2. Contract Period

- a) The term of this contract shall begin on the last date signed by the parties below and conclude on or before the end dates listed in Exhibit B – Contract Term and Payment for Services Rendered, unless terminated or amended.
- b) This contract may be canceled by either party upon serving thirty (30) days’ notice in writing to the other party.

3. Payment

- a) PCAPCD agrees to pay for the services covered by this AGREEMENT pursuant to the payment terms set forth below and in Exhibit B – Contract Term and Payment for Services Rendered.
- b) The amount paid to the GRANTEE shall constitute full payment for all services set forth herein. GRANTEE shall not be reimbursed for any additional expenses incurred beyond the maximum approved sum.

- c) GRANTEE shall bill PCAPCD upon completion of the PROJECT and after all of the conditions for funding outlined in this AGREEMENT are met. If the PROJECT funded under this AGREEMENT is performed in phases or over a period of time, then requests can be made by the GRANTEE for partial payment. Partial requests for payments must receive prior authorization by PCAPCD. GRANTEE agrees to provide a detailed invoice to PCAPCD with copies of purchase orders, signed contracts, or receipts referencing the contract number. PCAPCD retains the right to require proof of services performed or costs incurred prior to any payment under this AGREEMENT.
- d) Notwithstanding any other terms of this AGREEMENT, no payments shall be made to GRANTEE until PCAPCD is satisfied that work of such value has been rendered pursuant to this AGREEMENT.

4. Notices

- a) Any notice or demand desired or required to be given hereunder shall be in writing and deemed given when personally delivered, sent via email with confirmed receipt, or deposited in the mail, postage prepaid, sent certified or registered and addressed to the parties as follows:

PCAPCD:

Placer County Air Pollution Control District
Attn: Air Pollution Control Officer (APCO)
110 Maple Street
Auburn, CA 95603
Email: ecwhite@placer.ca.gov

GRANTEE:

City of Roseville (Public Works - Fleet Services)
Attn: Dominick Casey
311 Vernon Street
Roseville, CA 95678
Email: dcasey@roseville.ca.us

- b) Any notice so delivered personally shall be deemed to be received on the date of delivery, any notice so delivered via email with confirmed receipt shall be deemed to be received on the date of receipt confirmation, and any notice mailed shall be deemed to be received five (5) days after the date on which it was mailed.

5. Obligations of PCAPCD

- a) PCAPCD agrees to pay GRANTEE an amount not to exceed the requirements set forth in Exhibit B – Contract Term and Payment for Services Rendered, in accordance with the requirements listed in Exhibit A – Scope of Services.
- b) PCAPCD shall not reimburse GRANTEE for any expenses incurred by GRANTEE in the performance of PROJECT described in Exhibit A unless such reimbursement is specifically authorized in the Payment Schedule. GRANTEE shall not be reimbursed for any additional expenses incurred beyond the maximum amount.

- c) Except for the payment obligations set forth above, PCAPCD shall have no other obligations or responsibilities to GRANTEE under this AGREEMENT.

6. Obligations of GRANTEE

- a) GRANTEE has or will obtain all additional funding set forth in Exhibit B of this AGREEMENT.
- b) GRANTEE has or will obtain all required licenses, permits, fees, and other legal authorizations from all applicable Federal, State, and local jurisdictions necessary to commence and properly complete, in a professional manner, the PROJECT described in Exhibit A and will produce said documents if requested by PCAPCD.
- c) Labor, equipment, material, supply costs and other charges will be in conformance with the requirements of Exhibit A.
- d) No component of the monies to be paid by PCAPCD to GRANTEE shall be used for grant administration or any interest costs.
- e) GRANTEE shall provide proof of PROJECT completion and verification of costs as set forth in Exhibit A and Section 3 above.

7. Hold Harmless/Indemnity

- a) The GRANTEE hereby agrees to protect, defend, indemnify, and hold PCAPCD free and harmless from any and all losses, claims, liens, demands, and causes of action of every kind and character including, but not limited to, the amounts of judgments, penalties, interest, court costs, legal fees, and all other expenses incurred by PCAPCD arising in favor of any party, including claims, liens, debts, personal injuries, death, or damages to property (including employees or property of PCAPCD) and without limitation by enumeration, all other claims or demands of every character occurring or in any way incident to, in connection with or arising directly or indirectly out of, the contract or agreement. GRANTEE agrees to investigate, handle, respond to, provide defense for, and defend any such claims, demand, or suit at the sole expense of the GRANTEE. GRANTEE also agrees to bear all other costs and expenses related thereto, even if the claim or claims alleged are groundless, false, or fraudulent. This provision is not intended to create any cause of action in favor of any third party against GRANTEE or PCAPCD or to enlarge in any way the GRANTEE's liability but is intended solely to provide for indemnification of PCAPCD from liability for damages or injuries to third persons or property arising from GRANTEE's performance pursuant to this contract or agreement.
- b) As used above, the term PCAPCD means PCAPCD or its officers, agents, employees, and volunteers.

8. Insurance Requirements

- a) It is recognized that GRANTEE is self-insured, and as such provides coverage for General Liability and Worker's Compensation.

- b) GRANTEE shall file with PCAPCD, concurrently herewith, Certificates of Insurance. All certificates are to be received and approved by PCAPCD before work commences. However, failure to obtain the required documents prior to the work beginning shall not waive the GRANTEE's obligation to provide them. PCAPCD reserves the right to require complete, certified copies of all required insurance policies, required by these specifications, at any time.
- c) GRANTEE shall maintain the following insurance coverage in full force and effect during the term of this contract:

WORKER'S COMPENSATION AND EMPLOYERS LIABILITY INSURANCE

If GRANTEE represents that they have no employees, and does not hire SUBCONTRACTORS with employees, then they are not required to have Workers Compensation coverage.

Worker's Compensation Insurance shall be provided as required by any applicable law or regulation. Employer's liability insurance shall be provided in amounts not less than one million dollars (\$1,000,000) each accident for bodily injury by accident, one million dollars (\$1,000,000) policy limit for bodily injury by disease, and one million dollars (\$1,000,000) each employee for bodily injury by disease.

If there is an exposure of injury to GRANTEE'S employees under the U.S. Longshoremen's and Harbor Worker's Compensation Act, the Jones Act, or under laws, regulations, or statutes applicable to maritime employees, coverage shall be included for such injuries or claims.

GRANTEE shall require all SUBCONTRACTORS to maintain adequate Workers' Compensation insurance. Certificates of Workers' Compensation shall be filed with PCAPCD upon demand.

GENERAL LIABILITY INSURANCE

- A. Comprehensive General Liability or Commercial General Liability insurance covering all operations by or on behalf of GRANTEE, providing insurance for bodily injury liability and property damage liability for the limits of liability indicated below and including coverage for:

→ Contractual liability insuring the obligations assumed by GRANTEE in this Agreement.

- B. One of the following forms is required:

- 1. Comprehensive General Liability;
- 2. Commercial General Liability (Occurrence); or
- 3. Commercial General Liability (Claims Made).

C. If GRANTEE carries a Comprehensive General Liability policy, the limits of liability shall not be less than a Combined Single Limit for bodily injury damage, and Personal Injury Liability of:

- One million dollars (\$1,000,000) each occurrence
- One million dollars (\$1,000,000) aggregate

D. If GRANTEE carries a Commercial General Liability (Occurrence) policy:

1. The limits of liability shall not be less than:
 - One million dollars (\$1,000,000) each occurrence (combined single limit for bodily injury and property damage)
 - One million dollars (\$1,000,000) for Products-Completed Operation
 - One million dollars (\$1,000,000) General Aggregate
2. If the policy does not have an endorsement providing that the General Aggregate Limit applies separately, or if defense costs are included in the aggregate limits, then the required aggregate limit is two million dollars (\$2,000,000).

E. Special Claims Made Policy Form Provisions:

1. The limits of liability shall not be less than:
 - One million dollars (\$1,000,000) each occurrence (combined single limit for bodily injury and property damage)
 - One million dollars (\$1,000,000) aggregate for Products Completed Operations
 - One million dollars (\$1,000,000) General Aggregate
2. The insurance coverage provided by GRANTEE shall contain contract in order to provide insurance coverage for the hold harmless provisions herein if the policy is a claims-made policy.

9. Facilities, Equipment and Other Materials

Except as set forth herein, GRANTEE shall, at its sole cost and expense, furnish all facilities, equipment, and other materials which may be required for furnishing services pursuant to this AGREEMENT. PCAPCD shall furnish GRANTEE only those facilities, equipment, and other materials, and shall perform only those obligations as listed herein.

10. Non-Discrimination

GRANTEE shall not discriminate in its employment practices because of race, religious creed, color, national origin, ancestry, disability, medical condition, marital status, sex, sexual preference, or in contravention of any other protected classification or practice identified in the California Fair Employment and Housing Act; Government Code section 12900 et seq.

11. Records and Documents

- a) GRANTEE shall maintain at all times complete, detailed records with regard to work performed under this AGREEMENT, in a form acceptable to PCAPCD, and PCAPCD shall have the right to inspect such records at any reasonable time.
- b) GRANTEE agrees to return to PCAPCD, upon termination of this AGREEMENT, all documents, drawings, photographs, and other written or graphic material, however produced, received from PCAPCD and used by GRANTEE in the performance of its services. All work papers, drawings, internal memoranda, graphics, photographs, and any written or graphic material, however produced, prepared by GRANTEE in connection with its performance of services hereunder shall be, and shall remain after termination of this AGREEMENT, the property of PCAPCD and may be used by PCAPCD for any purpose whatsoever. PCAPCD agrees that any future use of documents produced by the GRANTEE under the terms of this contract shall be at the sole discretion of PCAPCD and GRANTEE shall bear no liability for the decisions on whether and how to use such documents.

12. Independent Status

- a) GRANTEE shall perform this contract as an independent contractor and not as an employee of PCAPCD. GRANTEE acknowledges that GRANTEE is not entitled to any of PCAPCD's fringe benefits, including without limitation; paid holidays, life insurance, sick leave, or travel or any other expenses in connection with services performed hereunder. No part of the compensation payable to GRANTEE hereunder shall be deducted or withheld for payment of Federal or State income or other employment related taxes. It shall be the responsibility of GRANTEE to provide all coverage necessary for GRANTEE's own benefit and not as an employee of PCAPCD.
- b) Except as PCAPCD may specify in writing, GRANTEE shall have no authority, express or implied, to act on behalf of PCAPCD in any capacity whatsoever as an agent. GRANTEE shall have no authority, express or implied, pursuant to this AGREEMENT to bind PCAPCD to any obligation whatsoever.

13. Warranties

GRANTEE warrants that its services are performed, with the usual thoroughness and competence; in accordance with the standard for professional services at the time those services are rendered.

14. Licenses, Permits, Etc

GRANTEE represents and warrants to PCAPCD that it has or will obtain before initiation of the PROJECT, all licenses, permits, qualifications, and approvals of whatever nature, which are legally required for GRANTEE to practice its profession. GRANTEE represents and warrants to PCAPCD that GRANTEE shall, at its sole cost and expense, keep in effect or obtain at all times during the term of this AGREEMENT, any licenses, permits, and approvals which are legally required for GRANTEE to practice its profession at the time the services are performed.

15. Assignment or Transfer

GRANTEE may assign any of its rights, burdens, duties, or obligations under this AGREEMENT only upon the prior written consent of PCAPCD. Approval will be at the sole discretion of PCAPCD.

16. Modification of Agreement

This AGREEMENT cannot be changed or supplemented orally, and may be modified or superseded only by written instrument executed by all parties.

17. Waiver

One or more waivers by one party of any major or minor breach or default of any provision, term, condition, or covenant of this AGREEMENT shall not operate as a waiver of any subsequent breach or default.

18. Entirety of AGREEMENT

This AGREEMENT constitutes the entire AGREEMENT and understanding between the parties. There are no oral understandings, terms, or conditions, and no party has relied upon any representation, express or implied, not contained in this AGREEMENT. Any prior understandings, terms, or conditions are deemed merged into this AGREEMENT. This AGREEMENT is intended as the complete and exclusive statement of the parties' Agreement pursuant to Code of Civil Procedure section 1856.

19. Jurisdiction

This AGREEMENT, and the right and obligations of the parties, shall be governed by and construed in accordance with the laws of the State of California. If any action is instituted to enforce or interpret this AGREEMENT, venue shall only be in the appropriate state or federal court having venue over matters arising in Placer County, California, provided that nothing in this AGREEMENT shall constitute a waiver of immunity to suit by PCAPCD.

20. Exhibits

All exhibits referred to herein and attached hereto are fully incorporated by this reference.

21. Electronic Signatures

An Electronic Signature refers to any representation in electronic form used to express intent, including a typed name placed in a signatory area, a digitized image or copy of a handwritten signature, a scanned signature on a PDF document, a biometric mark, a sound, or a digital signature. An Electronic Signature provides who signed, what was signed, captures intent and consent. If parties agree to a transaction by electronic means and are required by law to provide, send, or deliver information in writing, the requirement is satisfied if the information is

provided, sent, or delivered in an electronic record, which the recipient can retain at the time of receipt.

By the action of applying an Electronic Signature to this AGREEMENT, parties to the AGREEMENT are certifying their willingness to use electronic signatures and records delivered via electronic means. A signed copy of this AGREEMENT, or any other related ancillary agreement or amendment, transmitted by facsimile, email, electronic signature application, or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signature.

The parties so agree.

**EXHIBIT A
SCOPE OF SERVICES**

Grant Description: Waste Truck 15-450 Replacement

Project Contact Information (subject to change):

GRANTEE:

Brandy LeBeau
(916) 774-5531
blebeau@roseville.ca.us

PCAPCD:

Lauren Moore
(530) 745-2376
lmoore@placer.ca.gov

Project Scope:

Purchase a 2023 or newer Autocar Side Loader, or equivalent, with a GVWR of 60,000 pounds and a 2023 or newer model year Cummins Heavy Heavy Duty CNG engine with a maximum rated horsepower of 360, to be certified to an emission standard of 0.01 g/bhp-hr for PM and 0.02 g/bhp-hr for NOx. (Replacement Vehicle); and dismantle a 2014 Autocar ACX (VIN: 5VCACRF7FH218690) with a 2014, 370 horsepower engine (serial number: 73730965) (Replaced Vehicle).

The Replacement Vehicle funded under this AGREEMENT shall perform the same operations as the Replaced Vehicle and shall operate 100 percent within Placer County, for the duration of the project implementation period.

Sections I through III below must be completed prior to the Project Completion End Date as outlined in Exhibit B of this AGREEMENT.

- I. Prior to funding and prior to the GRANTEE taking delivery of the Replacement Vehicle, the GRANTEE shall meet the following conditions:
 - A. Purchase Replacement Vehicle described above. If after contract execution GRANTEE chooses to purchase a vehicle that is different than the originally proposed Replacement Vehicle, then GRANTEE shall make a request to PCAPCD, in writing, to seek approval of the change(s) as soon as possible. The vehicle modification shall: 1) not increase emissions from the originally proposed Replacement Vehicle, 2) shall continue to perform the same functions as the Replaced Vehicle, and 3) shall not increase the awarded grant amount.
 1. The modification in the Replacement Vehicle to be purchased shall only occur with PCAPCD approval. An approval/denial letter shall be emailed to the GRANTEE after PCAPCD has reviewed the request and has made a final determination.
 2. If the request to modify the originally proposed Replacement Vehicle results in an increase in emissions from its original evaluation, then PCAPCD shall reduce the awarded grant amount in order to maintain the same level of cost effectiveness. Such

a change will require PCAPCD approval and a contractual amendment signed by both the GRANTEE and PCAPCD.

3. Modified Replacement Vehicle must meet Carl Moyer Program Guidelines.

B. The following warranty requirements apply:

1. Except for school buses, hybrids, and zero-emission vehicles, GRANTEES must purchase a major component engine warranty for the replacement new or used vehicle or repowered engine. The warranty must cover parts and labor. If the purchase of a new or used Replacement Vehicle is in accordance with currently required warranty periods or warranty requirements for newer engine model years as specified in the Heavy-Duty Low NOx Omnibus Regulation, then separate supplemental warranty is not required. However, it is recommended that the highest grade warranty be purchased in order to avoid expensive repairs in the future.
2. Electric vehicles, hybrid vehicles, and conversion systems must have a minimum warranty period of 3 years or 50,000 miles. The warranty must cover the engine (if applicable) or motor, drivetrain, battery or energy storage, and parts and labor (including any part on the converted vehicle or engine that is damaged by the hybrid conversion system).
3. For zero emission school buses, the vendor warranty must provide protection for a minimum of 60 months or 75,000 miles, whichever comes first, and provide full warranty coverage of, at a minimum, zero-emission or all-electric motor, drive train, batteries/energy storage system(s), parts and labor. Warranties must be fully transferrable to subsequent school bus purchasers for the full warranty coverage period. Warranties must cover the following for the full warranty period (unless otherwise denoted):
 - a. Extended Motor, Drivetrain (including Battery), and Zero-Emission Components: Provide warranty coverage against defects in material and workmanship for the motor, transmission, rear axle, and electric or zero-emission system components including the battery. Gaskets and seals are not required to be included under the warranty coverage.
 - b. Frame Rails, Cross Members, and Cab: For new school buses, coverage extends to structural cracks in the frame caused by defects in material workmanship and against corrosion perforation of the cab. For school bus conversions, the all-electric school bus vendor is only responsible for damage or corrosion tied to, or resulting from, their workmanship on, or handling of, these parts.
 - c. Battery Degradation Warranty: Provide warranty coverage against battery degradation below 80 percent of capacity.

C. GRANTEE shall deliver the Replaced Vehicle under this AGREEMENT to the dealership where the Replacement Vehicle will be purchased.

D. The Replacement Vehicle shall not be delivered to the GRANTEE, from the dealership, until the following conditions have been completed:

1. GRANTEE (or its representative) shall provide to PCAPCD:
 - a. Copies of invoices relative to the purchase of the vehicle funded through this AGREEMENT;

- b. Proof and terms of financing, including lender and amount financed (if applicable);
 - c. Warranty and its terms;
 - d. Copy of the registration (of the Replacement Vehicle);
 - e. Copy of the signed vehicle title (of the Replaced Vehicle);
 - f. Proof of vehicle insurance;
 - g. Certification from the dealer that the Replaced Vehicle will be delivered to a PCAPCD approved dismantler within 60 days of receipt of the Replaced Vehicle. The certification must include the make, model, year, VIN, engine make, engine serial number, the date the vehicle is expected to be delivered to the dismantler, and the dismantler's location;
 - h. Documentation showing that the Replaced Vehicle is roadworthy. Have a Roadworthiness/Pre-Dismantle inspection conducted by PCAPCD or provide documentation showing that the Replaced Vehicle delivered to the dealer is as described in the application, in similar condition as found in the pre-inspection, roadworthy, in operational condition, and not stripped of parts (except for non-emission related body components or parts essential to vocation that will be installed on the Replacement Vehicle). This includes documentation showing that the Replaced Vehicle has passed a CHP BIT inspection in the past 90 days or conduct an equivalent vehicle inspection and sign as appropriate. If documentation is provided by a dealership, PCAPCD reserves the right to audit the dealership's record of inspection.
 - i. Certification from the GRANTEE that all funding sources that they have applied for or received for the PROJECT have been disclosed, and that the GRANTEE will notify PCAPCD of additional sources of funding received for the total cost of the PROJECT, including any sources that become available after contract execution, prior to PROJECT funding. GRANTEE is prohibited from receiving grants and other funds that exceed the total project amount.
 - j. Original invoice to PCAPCD, for the amount of requested grant funds for reimbursement. Note that the invoice cannot be paid until requirements in Section II below are met. PCAPCD may require GRANTEE to re-submit the invoice if payment requirements have not been met in the current PCAPCD fiscal year (7/1 through 6/30).
 - k. The Replacement Vehicle must have an engine with a horsepower rating not to exceed 125% horsepower of the Replaced Vehicle. Any engine with a horsepower above this range must be pre-approved by PCAPCD prior to purchase, whenever possible.
2. Have a post inspection conducted by PCAPCD (or its representative) of the Replacement Vehicle. The GRANTEE (or its representative) shall be responsible for scheduling the appointment with PCAPCD.
 3. A determination by PCAPCD that the Replacement Vehicle and all associated documentation have satisfied the requirements for funding and authorization for the vehicle to be delivered to the GRANTEE.

4. Display on the Replacement Vehicle that partial funding was made available from PCAPCD. Any graphics used for this purpose need to be approved in advance by PCAPCD staff.

II. Prior to funding:

- A. The Replaced Vehicle must be delivered to a PCAPCD approved dismantler (or other PCAPCD approved entity) for destruction within 60 days of GRANTEE's receipt of the Replacement Vehicle funded under this AGREEMENT.
- B. The dismantler (or other representative) shall provide a copy of DMV's "Non-Repairable Vehicle Certificate" using an "Application for Salvage Certificate or Non-Repairable Vehicle Certificate" (REG 488C), or a Notice of Acquisition/Report of Vehicle To Be Dismantled (REG 42) ensuring the VIN can never be registered again in California. Within 90 calendar days of the dismantle inspection date, the dismantler must provide verification to PCAPCD that the Replaced Vehicle has been registered with DMV as non-revivable with a type transaction code (TTC) L10 or C26 on the DMV Reconciliation transaction receipt or other DMV documentation that satisfies this requirement.
- C. GRANTEE to provide a copy of CHP 292, when applicable.

III. Prior to the close of the Project Completion End Date, GRANTEE shall ensure the following:

- A. The Replaced Vehicle has been dismantled per the conditions outlined in this Exhibit and the 2017 Carl Moyer Guidelines.
- B. Within 60 days of the dismantler receiving the Replaced Vehicle, the dismantler must dismantle the vehicle. Dismantle is defined by:
 1. Both frame rails must be completely severed between the front and rear axles.
 2. A hole must be put in the engine block with a diameter of at least three inches at the narrowest point. The hole must be irregularly shaped (i.e. no symmetrical squares or circles). A section of the oil pan flange must be removed as part of the hole or have a line cut through it that connects to the hole.
 3. If the vehicle is to be scrapped, the dismantler must completely sever the frame rails of the old vehicle to ensure that the vehicle will not be used again.
 4. Upon request of GRANTEE, PCAPCD may approve an alternative disposition for the old engine/vehicle.
- C. Either the dismantler (if authorized by PCAPCD) or PCAPCD staff shall conduct a dismantle inspection to verify destruction of the Replaced Vehicle within 10 days of destruction, in accordance with the 2017 Carl Moyer Program Guidelines.
- D. The Replaced Vehicle may not be sold/given to another person in which the intent is to part it out into individual pieces and then be sold to another party.
- E. Provide proof of the automobile insurance coverage to PCAPCD. Automobile insurance, as required by law, shall not lapse and shall be maintained throughout the term of this AGREEMENT.

IV. Reporting and Recordkeeping Requirements during the PROJECT Implementation Period (The PROJECT Implementation Period refers to the timeframe between the Replacement Vehicle's approved Post-Inspection Date and the Contract End Date):

- A. Record annual miles of the Replacement Vehicle throughout the term of this AGREEMENT. If the vehicle operates in areas outside of Placer County, identify/estimate the mileage within Placer County.
- B. GRANTEE shall provide PCAPCD Annual Monitoring Reports as described in Exhibit C. The first annual monitoring report shall be submitted no later than 13 months after PROJECT post-inspection and continuing annually thereafter throughout the Project Implementation Period of this AGREEMENT. At a minimum, noncompliance with the reporting requirements will require an on-site inspection(s). At the sole discretion of PCAPCD, ten (10) percent of the awarded grant amount, as outlined in Exhibit B, will be withheld pending the submittal and approval of the first Annual Monitoring Report as outlined in Exhibit C – Monitoring Report Format.
- C. GRANTEE shall maintain and retain usage and other records associated with the PROJECT for at least three years after the end of the contract term.
- D. Pursuant to Sections 8 of this AGREEMENT, GRANTEE shall provide proof of insurance prior to performing work on this PROJECT, and throughout the term of this contract.
- E. Throughout the term of the AGREEMENT, provide copies of the current automobile insurance of the Replacement Vehicle funded under this AGREEMENT, on an annual basis, to PCAPCD.

V. General Conditions:

- A. GRANTEE shall notify PCAPCD in writing if installation and/or implementation of this PROJECT will deviate from the scope of work as outlined in the GRANTEE's Grant Application or this AGREEMENT at any time during the term of this AGREEMENT. GRANTEE shall notify the APCO within 15 days of recognizing such deviation. If funding has not yet been disbursed at the time of recognizing such deviation, then the GRANTEE shall notify the APCO at least 30 days in advance of any request for payment. The APCO has the sole discretion to approve, deny, or adjust funding amount as outlined in Exhibit B of this AGREEMENT, based on the extent of the deviation.
- B. GRANTEE shall maintain the Replacement Vehicle according to the manufacturer's specifications for the term of the AGREEMENT and shall not tamper with the engine in a way as to void the warranty or to cause the engine to operate in a manner not intended or originally designed.
- C. GRANTEE shall allow PCAPCD or their designee to conduct an inspection or audit of the PROJECT being funded under this AGREEMENT, including the engine, equipment and associated records, during the contract term. At the time of execution of this AGREEMENT, GRANTEE's signature shall be a certification that its fleet, engine(s), and vehicles are in compliance with all applicable federal, State, and local air quality rules and regulations and shall continue to maintain, for the term of the AGREEMENT, compliance with all applicable federal, State, and local air quality rules and regulations for the full contract term.
- D. When determining compliance with mobile source regulatory requirements, the Replacement Vehicle shall be included when defining fleet size, when applicable.

- E. Throughout the term of this AGREEMENT, the PROJECT cannot be used to generate credits or compliance extensions, and must be excluded when determining regulatory compliance, when applicable.
- F. GRANTEES that receive co-funding for the PROJECT funded under this AGREEMENT must meet all criteria associated with each funding source used to fund the PROJECT.
- G. GRANTEES that are not a public entity must provide at least 15 percent of the PROJECT's Moyer eligible costs from non-public sources.
- H. In addition to the terms of this AGREEMENT, GRANTEE shall adhere to all applicable requirements outlined in the applicable California Air Resources Board Guidelines. If there is a conflict between the terms of this contract and California Air Resources Board's guidelines, the California Air Resources Board's Guidelines shall prevail.
- I. By executing this AGREEMENT, GRANTEE understands and agrees to operate the Replacement Vehicle, and/or engine according to the terms herein and to cooperate with PCAPCD in implementation, monitoring, enforcement, and other efforts to assure the emission benefits are real, quantifiable, surplus, and enforceable.

VI. Repercussions for Nonperformance:

- A. If for any reason, after PROJECT funding, the Replacement Vehicle funded under this AGREEMENT does not perform according to what was submitted in the GRANTEE's application, or in conjunction with the application, or if the conditions of this AGREEMENT are not met, PCAPCD may require reimbursement of grant funds.
- B. PCAPCD has the authority to pursue any remedies available under the law for noncompliance with Moyer Program requirements and nonperformance of terms outlined in this AGREEMENT, in an effort to ensure emission reductions are obtained.

EXHIBIT B
CONTRACT TERM AND PAYMENT FOR SERVICES RENDERED

Grant Description: Waste Truck 15-450 Replacement

Contract Schedule (to occur on or before the following dates)

Start Date:	last date signed by the parties
Project Completion End Date:	10/15/2023
Project Implementation Period:	7 years
Contract End Date:	10/15/2030

Budget

Amount Awarded by PCAPCD:	\$124,400.77
Estimated Co-Funding (including in-kind):	\$268,857.19
Estimated Total PROJECT Amount:	\$393,257.96

If the Total PROJECT Amount is less than what is listed above, then the GRANTEE may be required to provide an equivalent percentage of Co-Funding based on the reduced Total PROJECT Amount. The Amount Awarded by PCAPCD, as listed above, shall be adjusted accordingly.

Payment

PCAPCD will provide up to \$124,400.77 (One Hundred Twenty-Four Thousand Four Hundred and 77/100 Dollars) in funding to purchase the Replacement Vehicle, in accordance with the requirements listed in this AGREEMENT. Payment(s) shall be made to the GRANTEE within thirty (30) days after the billing is received and approved by PCAPCD.

At the sole discretion of PCAPCD, ten (10) percent of the awarded grant amount, as outlined in this exhibit, will be withheld pending the submittal and approval of the first Annual Monitoring Report as outlined in Exhibit C – Monitoring Report Format.

A completed federal W-9 form and California 590 form must be submitted prior to payment. An IRS Form 1099 will be issued for incentive funds received under this AGREEMENT, if applicable. It is the GRANTEE's responsibility to determine tax liability associated with receiving grant incentive funds.

Invoices

Invoices shall be submitted to PCAPCD in an original format and include the contract number. Along with submitting an invoice for reimbursement, provide copies of all paid receipts and proof of in-kind support (when applicable), and evidence of financing, associated with the PROJECT funded under this AGREEMENT.

EXHIBIT C
MONITORING REPORT FORMAT

Grant Description: Waste Truck 15-450 Replacement

The first annual monitoring report shall be submitted no later than 13 months after PROJECT post-inspection and continuing annually thereafter throughout the PROJECT Implementation Time Frame of this AGREEMENT. The report can be emailed, mailed, or delivered in person to PCAPCD.

The report shall include the following:

1. GRANTEE's name, address, and telephone number.
2. Reference Contract Number.
3. Vehicle make, model, and VIN.
4. Previous year's annual mileage and percentage of time the Replacement Vehicle operated in Placer County.
5. Odometer reading at time of report.
6. Copy of current vehicle registration and proof of automobile insurance.

Note: After the monitoring report is submitted to PCAPCD, staff may conduct a performance evaluation on the PROJECT.

ORDINANCE NO. 6604

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE
AUTHORIZING CERTAIN AMENDMENTS TO THE FISCAL YEAR 2022-23
BUDGET AND DECLARING THIS ORDINANCE TO BE IMMEDIATELY
EFFECTIVE AS AN APPROPRIATION MEASURE

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. The City of Roseville Annual Budget, Fiscal Year 2022-23, is hereby amended as listed on the attached budget adjustment for grant funds received from the Placer County Air Pollution Control District – Clean Air Grant Program.

SECTION 2. This ordinance is hereby declared to be an appropriation measure, immediately effective pursuant to the provisions of Section 5.03 of the Charter.

SECTION 3. The City Clerk is hereby authorized and directed to post a true copy of the foregoing ordinance in each of three (3) conspicuous locations in the City and she shall immediately after such posting enter in the ordinance book, under the record of the ordinance, a certificate under her hand stating the time and place of such publication by posting.

Justification for Budget Adjustment:

This budget adjustment is needed to establish 700042 - Clean Air Grant Program - On-Road Heavy-Duty Fleet Modernization project.

Placer County Air Pollution Control District has awarded the City \$163,215 towards the purchase of two (2) solid waste trucks through the Clean Air Grant Program/Carl Moyer Memorial Air Quality Attainment Program. The grant award will be utilized to replace two older diesel engine trucks with compressed natural gas (CNG) trucks to reduce emission pollutants and align with the City's CNG station investment. The remaining cost of the trucks is included in the FY2022-23 Fleet Replacement Budget.

Ordinance 6601

Ordinance 6602

Ordinance 6603

ORDINANCE NO. 6599

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE
AMENDING ZONING ORDINANCE NO. 5428 OF THE CITY OF ROSEVILLE
CHANGING THE ZONING OF CERTAIN REAL PROPERTY LOCATED
WITHIN THE CITY OF ROSEVILLE

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. The Council of the City of Roseville has reviewed the findings of the Planning Commission recommending approval of the rezone specified herein, and makes the following findings pursuant to Section 19.86.050 of the Zoning Ordinance:

1. The rezone is in conformance with the public interest, health, safety, or welfare of the City; and
2. The rezone is consistent with the objectives, policies, programs, and land use designations of the City of Roseville General Plan.

SECTION 2. Section 19.06.020 of the Zoning Ordinance of the City of Roseville, Ordinance No. 5428, is amended to change the zoning of that portion of certain real property within the City of Roseville located in the Atlantic Street Corridor Specific Plan shown and so designated in Exhibit “D,” attached and incorporated herein by reference, and also that properties so designated on Exhibit “D” are given Special Area – Atlantic Street (/SA-AT) overlay designation, which establishes modified general district regulations, approval procedures, and other regulations, by reference to the regulations contained within Roseville Municipal Code Section 19.33.

SECTION 3. This ordinance shall be effective at the expiration of thirty (30) days from the date of adoption.

SECTION 4. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication byposting.

2. The rezone is consistent with the objectives, policies, programs, and land use designations of the City of Roseville General Plan.

SECTION 2. Section 19.06.020 of the Zoning Ordinance of the City of Roseville, Ordinance No. 5428, is amended to change the zoning of that portion of certain real property within the City of Roseville located in the Douglas-Harding Corridor Specific Plan shown and so designated in Exhibit “F,” attached and incorporated herein by reference, and also that properties so designated on Exhibit “F” are given Special Area – Douglas-Harding (/SA-AT) overlay designation, which establishes modified general district regulations, approval procedures, and other regulations, by reference to the regulations contained within Roseville Municipal Code Section 19.33.

SECTION 3. This ordinance shall be effective at the expiration of thirty (30) days from the date of adoption.

SECTION 4. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication byposting.

ORDINANCE NO. 6601

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE
AMENDING ZONING ORDINANCE NO. 5428 OF THE CITY OF ROSEVILLE
CHANGING THE ZONING OF CERTAIN REAL PROPERTY LOCATED
WITHIN THE CITY OF ROSEVILLE

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. The Council of the City of Roseville has reviewed the findings of the Planning Commission recommending approval of the rezone specified herein, and makes the following findings pursuant to Section 19.86.050 of the Zoning Ordinance:

1. The rezone is in conformance with the public interest, health, safety, or welfare of the City; and
2. The rezone is consistent with the objectives, policies, programs, and land use designations of the City of Roseville General Plan.

SECTION 2. Section 19.06.020 of the Zoning Ordinance of the City of Roseville, Ordinance No. 5428, is amended to change the zoning of that portion of certain real property within the City of Roseville located in the Douglas-Sunrise Corridor Specific Plan shown and so designated in Exhibit “H,” attached and incorporated herein by reference, is hereby rezoned as shown and also that properties so designated on Exhibit “H” are given Special Area – Douglas-Sunrise (/SA-AT) overlay designation, which establishes modified general district regulations, approval procedures, and other regulations, by reference to the regulations contained within Roseville Municipal Code Section 19.33.

SECTION 3. This ordinance shall be effective at the expiration of thirty (30) days from the date of adoption.

SECTION 4. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication byposting.

ORDINANCE NO. 6603

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE AMENDING SECTION 19.18.030 OF CHAPTER 19.18, AMENDING SECTION 19.24.020 OF CHAPTER 19.24, AMENDING SECTION 19.26.030 OF CHAPTER 19.26, AMENDING SECTION 19.78.020 OF CHAPTER 19.78, AND ADDING CHAPTER 19.33 OF TITLE 19 OF THE ROSEVILLE MUNICIPAL CODE REGARDING ZONING

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. Section 19.18.030 of Chapter 19.18 of Title 19 of the Roseville Municipal Code is hereby amended to read as follows:

19.18.030 Special area (SA) district.

A. Purpose. The SA, special area district is an overlay district which allows modification of the underlying general district regulations (including both permitted use types and development standards) by reference to regulations adopted either in a specific plan, which applies to the property so classified, or in the ordinance rezoning the property so classified.

B. Application of Special Area District. The City Council, in approving a zoning reclassification may combine the SA, special area district with any residential, commercial, industrial or urban reserve district. In combining the SA, special area district, the City Council may: delete principally permitted or conditionally permitted uses, may designate conditionally permitted uses as principally permitted uses, or require conditionally use permits for principally permitted uses. Provided, however, in all cases in which the SA, special area district is utilized, the permitted and conditionally permitted uses shall be consistent with any applicable specific plan.

C. Development Standards. Where property is zoned SA, special area district, development standards provided in the applicable adopted specific plan or the ordinance reclassifying the property shall supersede development standards contained in this title for the underlying zone district. If a standard is not addressed within the applicable specific plan or the ordinance reclassifying the property, it shall be governed by the standards established by the underlying zone district.

D. Designation on the Zoning Map. A SA, special area district shall be established with approval of a Zoning Ordinance amendment as specified in Chapter 19.86, and shall be designated on the Zoning Map with the underlying zone district by the symbol “/SA” followed by the ordinance number. The ordinance number shall refer to the ordinance which adopted the SA district. If a SA is within a specific plan, no ordinance number need be specified; provided, however, a reference to that specific plan is identified as follows: -SE (Southeast Roseville Specific Plan); -NE (Northeast Roseville Specific Plan); -NW (Northwest Roseville Specific Plan); -NC (North Central Roseville Specific Plan); -DW (Del Webb Specific Plan), -NR (North Roseville Specific Plan), -HR (Highland Reserve Specific Plan), -SR (Stoneridge Specific Plan), -WR (West Roseville Specific Plan), -RG (Riverside Gateway Specific Plan), -DT (Downtown

Specific Plan), -AT (Atlantic Street Corridor Specific Plan), -DH (Douglas-Harding Corridor Specific Plan), and -DS (Douglas-Sunrise Corridor Specific Plan).

SECTION 2. Section 19.24.020 of Chapter 19.24 of Title 19 of the Roseville Municipal Code is hereby amended to read as follows:

19.24.020 Nonconforming uses and structures.

A. Applicability. These regulations shall apply to all nonconforming uses, structures and parcels lawfully constructed or created in compliance with this Code and state law, or if within the Atlantic Street Corridor, Douglas-Harding Corridor, or Douglas-Sunrise Corridor Specific Plans, shall be regulated pursuant to Section 19.33.040.

B. Nonconforming Use. A nonconforming use may be continued, provided that no such use shall be enlarged or increased, nor extended to occupy a greater area than that which it lawfully occupied before becoming a nonconforming use except as otherwise allowed in this chapter or as follows:

- 1. Residential Use in a Commercial, Industrial or PD Zone.** The nonconforming use of a residential building in a nonresidential district may continue to be used as a residence subject to the residential zone development standards requirements of Section 19.10.030(A) (R1 district), until such time as the building is condemned, removed, or converted.
- 2. Nonresidential Use in a Residential Zone.** No expansion or modification of a nonresidential use in a residential zone shall be permitted.
- 3. Expansion of a Nonconforming Use in a Commercial, Industrial or PD Zone.** A nonconforming use, except for a residential use, in a commercial, industrial or PD zone may be expanded or modified provided that a Conditional Use Permit is first secured.
- 4. Substitution of Nonconforming Use.** Except as otherwise prohibited in subsection (C)(2), a nonconforming use may be substituted with a different nonconforming use provided it has the same, or a less intensive, use classification, only upon approval of a Conditional Use Permit. Such a new nonconforming use shall occupy the same area that is occupied by the existing nonconforming use.

C. Nonconforming Structure. A nonconforming structure may be used and maintained except as otherwise specified in this chapter or as follows:

- 1. Residential Buildings.**
 - a. Enlargement, extension, reconstruction, or structural alteration of a building designed as a dwelling, that is nonconforming only as to height and setback regulations is permitted if such additions or improvements conform to all other applicable provisions of this title, and the new construction does not expand the nonconformity.
 - b. Enlargement, extension, reconstruction, or structural alteration of a building designed as a dwelling in a nonresidential district is permitted if such additions or

improvements conform to all provisions of the district and the new construction does not expand the nonconformity.

2. Nonresidential Buildings. Enlargement, extension, reconstruction, or structural alteration of a building designed for nonresidential purposes that is nonconforming only as to height and setback regulations is permitted if such additions or improvements conform to all other applicable provisions of this title and the new construction does not expand the nonconformity.

a. Enlargement, extension, reconstruction, or structural alteration of a building designed for nonresidential purposes in a residential zone is not permitted.

D. Nonconforming Off-Street Parking. Reconstruction or structural alteration of a building with nonconforming parking or loading facilities, is permitted provided there is no expansion of use requiring additional parking as required by Section 19.26.030. The existing nonconforming parking and loading for the building may remain unchanged.

E. Damaged and Destroyed Nonconforming Buildings.

1. Damaged Building. A nonconforming building which is damaged by fire or calamity destroying 50 percent or less of its value, as determined by the chief building inspector, may be reconstructed, provided the structure shall not increase the degree of nonconformity.

2. Destroyed Building.

a. Building with a Nonconforming Use. The reconstruction of a building which is damaged by fire or calamity in excess of 50 percent of its value, as determined by the chief building inspector, which at the time was devoted to a nonconforming use, may be reconstructed only upon approval of a Conditional Use Permit. The nonconforming use shall not occupy a larger area of the reconstructed building than was occupied prior to its destruction. The reconstruction of the building shall be completed within 12 months of the date of damage or within the time frame specified in the Conditional Use Permit. No portion of the building as reconstructed, shall be located within the floodway overlay zone.

b. Nonconforming Building. The reconstruction of a building which is damaged by fire or calamity in excess of 50 percent of its value, as determined by the chief building inspector, which at the time was a nonconforming building, may be reconstructed only upon approval of a variance. The nonconforming building may be enlarged provided that any enlargement does not increase the nonconformity. The reconstruction of the building shall occur within 12 months after the date of damage. No portion of the building as reconstructed, shall be located within the floodway overlay zone.

F. Loss of Nonconforming Status. Except as provided in subsection (B)(1) of this section or where a shorter time period is specified by this title, a nonconforming use of a parcel or a nonconforming use of a conforming building which is discontinued for a period of six months shall be deemed abandoned. Without further action by the City, further use of the parcel or structure shall comply with all the regulations of the zone district in which the parcel or structure is located, and all other applicable provisions of this title.

SECTION 3. Section 19.26.030 of Chapter 19.26 of Title 19 of the Roseville Municipal Code is hereby amended to read as follows:

19.26.030 Parking space requirements by use type.

The number of off-street parking spaces required for the land uses identified by Article II (Zoning Districts and Permitted Uses) shall be as provided by this section, except where parking requirements are established by Article IV (Special Area and Specific Use Requirements) for a particular use.

A. Number of Spaces Required. The number of off-street parking spaces required for new uses shall be based upon the use type, listed below.

1. Terms Used in Tables. The following terms are used throughout the tables and are defined below:

“Square feet” means the total gross building/tenant space area;

“Use area” means the total of gross building/tenant space area plus the gross area of any outdoor/storage/activity.

2. Civic use types shall provide off-street parking spaces as follows:

CIVIC USE TYPES	NUMBER OF PARKING SPACES REQUIRED
Community Assembly	
Places of Worship	1 per 3 fixed seats or 1:50 sq. ft. for non-fixed seats in the assembly area, plus 1 per classroom
Club, Lodges, Meeting Halls	1 per 3 fixed seats or 1:50 sq. ft. for non-fixed seats in the assembly area
Public Community Facilities	As determined as part of the design review approval
Community Services	As determined as part of the design review approval
Essential Services	None
Hospital Services	
General Hospital Services	1 per doctor, plus 1 per 3 employees for the largest shift, plus 1 per 3 beds
Psychiatric Hospital Services	1 per doctor, plus 1 per 3 employees for the largest shift, plus 1 per 3 beds
Intensive Public Facilities	As determined as part of the design review approval
Libraries and Museums, Private	1 per 400 sq. ft.
Public Parking Services	As determined as part of the design review approval

CIVIC USE TYPES	NUMBER OF PARKING SPACES REQUIRED
Schools	
College and Universities	As determined as part of the design review approval
Public/Private Elementary, Middle and Junior High	2 per classroom, plus 60 lineal feet of loading area for every 100 students
High Schools	1 per classroom, plus 1 per every 4 students, plus 60 lineal feet of loading area for every 200 students
Social Services	
Emergency Shelter	1 per staff member, plus 1 per every 10 shelter residents
Food Distribution	1 per employee, plus 1 per every 500 sq. ft. of floor area
Food Service Facility	1 per employee, plus 1 per every 4 seats within facility

3. Residential use types shall provide off-street parking spaces as follows:

RESIDENTIAL USE TYPES	NUMBER OF PARKING SPACES REQUIRED
Accessory Dwelling Units	
Studios	None
1+ Bedrooms	1 per dwelling. For exceptions, see Chapter <u>19.60</u> (Accessory Dwelling Units)
Caretaker/Employee Housing	2 per dwelling
Community Care Facility, Small	2 per dwelling
Community Care Facility, Large	2 per dwelling plus 0.5 per sleeping room (a maximum of 2 spaces may be located within the front setback)
Dwelling	
Multi-Family	
Studio	1.5 per unit, plus guest parking (see below)
1 Bedroom	1.5 per unit, plus guest parking (see below)
2+ Bedrooms	2 per unit, plus guest parking (see below)
Senior Citizen Apartments	1 per unit, plus guest parking (see below)
Guest Parking	Projects with 10 or more dwelling units shall provide 1 additional space for each 10 dwelling units or portion thereof
Single-Family and Two-Family	2 per dwelling
Family Day Care Home, Small	2 per dwelling plus 1 space for loading
Family Day Care Home, Large	2 per dwelling plus 1 space per employee not residing in the home, plus loading areas as required by Section <u>19.46.020(B)</u>
Mobile Home Park	2 per dwelling unit plus 1 guest space for each 10 dwelling units or

	portion thereof
Rooming and Boarding Houses	2 per dwelling plus 0.5 per sleeping room (a maximum of 2 spaces may be located within the front setback)

4. Commercial use types shall provide off-street parking spaces as follows, but no fewer than four spaces for each separate commercial use or tenant:

COMMERCIAL USE TYPES	NUMBER OF PARKING SPACES REQUIRED
Adult Business Establishments	1 per 300 sq. ft.
Animal Sales and Service	
Grooming and Pet Stores	1 per 300 sq. ft.
Kennels	Minimum 10 spaces
Veterinary Clinic	1 per 150 sq. ft.
Veterinary Hospital	1 per 150 sq. ft.

Automotive and Equipment	
Automotive Rentals	1 per 300 sq. ft. of office plus 1 per 1,000 sq. ft. of fleet or vehicle storage area
Automotive Repairs	1 per 400 sq. ft. plus 1 per bay plus 1 for every company vehicle
Automotive Sales	1 per 1,000 sq. ft. of indoor and outdoor display area
Car Wash and Detailing	
Full Service	10 spaces or 3 times internal washing capacity, whichever is greater; additional parking required for drying or vacuum areas and 100 lineal feet for stacking
Self-Service	4 spaces; additional parking required for drying or vacuum areas and 20 lineal feet in front of each bay for stacking
Automatic Car Wash Service	1 space per drying and vacuum areas plus 100 linear feet in front of car wash for stacking
Commercial Parking	As determined as part of the design review approval
Equipment Rental and Sales	1 per 300 sq. ft. of office plus 1 per 1,000 sq. ft. of outdoor display area
Gasoline Sales	
With Neighborhood Commercial Sales	1 per 300 sq. ft. of commercial sales area with a 5 space minimum

COMMERCIAL USE TYPES	NUMBER OF PARKING SPACES REQUIRED
Without Neighborhood Commercial Sales	5 spaces
With Repair	1 per 300 sq. ft. of commercial sales area with a 5 space minimum plus 2 spaces per service bay
Impound Yards	1 per 250 sq. ft. of office plus 1 for every company vehicle
Storage of Operable Vehicles	1 per 250 sq. ft. of office plus 1 for every company vehicle
Banks and Financial Institutions	1 per 250 sq. ft. plus 1 additional space per ATM machine which may be a reserved space at the discretion of the property owner or landlord
Bars and Drinking Places	1 per 50 sq. ft.
Broadcasting and Recording Studios	As determined as part of the design review approval
Building Material Stores	1 per 300 sq. ft. of building area plus 1 per 1,000 sq. ft. of outdoor display/storage area
Business Support Services	1 per 300 sq. ft.
Commercial Recreation	
Amusement Center	1 per 200 sq. ft.
Indoor Entertainment	
Theater	1 per 3.5 fixed seats or 1 per 50 sq. ft. for non-fixed seating or as determined as part of the design review approval
Indoor Sports and Recreation	
Billiard and Pool Hall	2 per table plus additional spaces as required for other uses in the facility (e.g., restaurant)
Bowling Center	5 per lane plus additional spaces as required for other uses in the facility (e.g. restaurant)
Handball, Tennis, Racquet Ball Facilities	2 per court plus additional spaces as required for other uses in the facility (e.g., restaurant)
Health Clubs and Athletic Clubs	1 per 150 sq. ft. of weight room, pool and spa area plus 1 per 50 sq. ft. of aerobics or martial arts area plus 1 per tanning or massage room plus additional spaces as required for other uses in the facility, excluding area for locker and dressing rooms
Indoor Sport Arenas (such as soccer, volleyball)	50 per field or sports court plus 1 per 3 fixed seats for spectator area plus additional spaces as required for other uses at the facility (e.g., retail)

COMMERCIAL USE TYPES	NUMBER OF PARKING SPACES REQUIRED
Skating/Ice Rinks	1 per 175 sq. ft.
Outdoor Entertainment	As determined as part of the design review approval
Outdoor Sports and Recreation	
Amusement Parks	As determined as part of the design review approval
Driving Range	1.5 per tee plus additional spaces as required for other uses at the facility (e.g., golf course)
Golf Course	6 per hole plus additional spaces as required for other uses at the facility (e.g., driving range, restaurant, pro shop)
Handball, Tennis, Racquet Ball Facilities	2 per court plus additional spaces as required for other uses at the facility (e.g., restaurant)
Miniature Golf Course	2 per hole plus additional spaces as required for other uses at the facility (e.g., restaurant)
Swimming Pools	1 per 100 sq. ft. of pool area
Residential Recreation Facilities	As specified for the sum of all of the uses within the facility by utilizing the parking requirement for each use as outlined throughout this chapter
Large Amusement Complexes	As determined as part of the design review approval
Community Care Facilities	0.75 per unit
Day Care Centers	1 per employee plus 1 per company vehicle plus a loading space for every 8 persons at the facility. The number of persons permitted at the facility is determined as a part of the licensing by the state or county
Eating and Drinking Establishments	
Fast Food with Drive Through	1 per 100 sq. ft.
Convenience	1 per 100 sq. ft.
Full Service	1 per 100 sq. ft.
Enclosed Outdoor Seating See Chapter <u>19.52</u>	1 per 100 sq. ft.
Food and Beverage Retail Sales	1 per 300 sq. ft.
Funeral and Interment Services	1 per 3 fixed seats or 1 per 50 sq. ft. of assembly area

COMMERCIAL USE TYPES	NUMBER OF PARKING SPACES REQUIRED
Lodging Services	1 per room plus additional spaces as required for other uses in the facility
Long Term Care Facilities	1 per 3 employees for largest shift, plus 1 per 3 beds
Maintenance and Repair of Appliances	1 per 300 sq. ft.
Medical Services	
General	1 per 150 sq. ft.
Low Traffic Generating	1 per 200 sq. ft.
Medical Campus/MOB	1 per 200 sq. ft.
Neighborhood Commercial	1 per 300 sq. ft.
Nightclubs	1 space per 2 occupants based on maximum occupancy load of the building as calculated by the <u>California Building Code</u> plus bus space as determined as part of the Conditional Use Permit
Nursery, Retail	1 per 300 sq. ft. plus 1 per 1,000 sq. ft. of outdoor display/storage area
Offices, Professional	1 per 250 sq. ft. of net leasable square footage as determined with approval of the initial building shell. Where a more intensive office use, as determined by the Planning Manager (i.e., call and telemarketing centers), is proposed the required parking shall be determined as part of the Design Review Permit approval, or via a zoning clearance pursuant to the provisions of Section <u>19.26.030(B)</u> .
Personal Services	1 per 300 sq. ft.
Retail Sales and Services	
Furniture, Large Appliance, Floor Covering	1 per 400 sq. ft.
General Retail	1 per 300 sq. ft.
Shopping Centers (minimum of 4 commercial establishments, designed or planned in a coordinated fashion, utilizing such elements as common access and parking)	Designed and planned at 1 per 200 sq. ft. As tenant spaces are leased, each tenant shall utilize the parking requirement for that use as outlined in this chapter
Specialized Education and Training	
Vocational Schools and	1 per 50 sq. ft. of instructional area plus 1 per 250 sq. ft. of office

COMMERCIAL USE TYPES	NUMBER OF PARKING SPACES REQUIRED
Specialty Schools	area
Storage, Personal Storage Facilities	4 spaces plus 2 spaces for the manager's quarters

5. Industrial use types shall provide off-street parking spaces as follows, but no fewer than four spaces for each separate industrial use or tenant:

INDUSTRIAL USE TYPES	NUMBER OF PARKING SPACES REQUIRED
Day Care Centers, Secondary	None, see parking requirements for applicable industrial use type
Equipment and Material Storage Yards	1 per 300 sq. ft. plus 1 per 10,000 sq. ft. of yard area
General Industrial	1 per 1,000 sq. ft. Where other uses exceed 10% of the gross floor area (e.g., office, warehouse, etc.) the parking requirement shall be the combined total for each use as outlined in this chapter or as otherwise determined by design review approval
Hazardous Materials Handling	1 per 1,000 sq. ft. Where other uses exceed 10% of the gross floor area (e.g., office, warehouse, etc.) the parking requirement shall be the combined total for each use as outlined in this chapter or as otherwise determined by design review approval
Light Manufacturing	1 per 1,000 sq. ft. Where other uses exceed 10% of the gross floor area (e.g., office, warehouse, etc.) the parking requirement shall be the combined total for each use as outlined in this chapter or as otherwise determined by design review approval
Recycling, Scrap and Dismantling	
Enclosed	1 per 250 sq. ft. of office area, plus 1 per 10,000 sq. ft. of yard area
Unenclosed	
Research Services	1 per 3,000 sq. ft., plus 1 per company vehicle
Specialized Industrial	As determined as part of the design review approval
Wholesale and Distribution	
Light	1 per 1,000 sq. ft.
Heavy	Where other uses exceed 10% of the gross floor area (e.g., office, warehouse, etc.) the parking requirement shall be the combined total for each use as outlined in this chapter or as otherwise determined by design review approval

6. Transportation and communication use types shall provide off-street parking spaces as follows:

TRANSPORTATION AND COMMUNICATION USE TYPES	NUMBER OF PARKING SPACES REQUIRED
Antennas and Communications Facilities	
Developed Lot	None, see parking requirements for applicable use type
Undeveloped Lot	1 per full-time employee
Bus Depots	As required by Chapter <u>19.36</u>
Heliports	As determined as part of the design review approval
Intermodal Facilities	As determined as part of the design review approval

B. Special Parking Requirements. The number of parking spaces required for uses not specifically listed in subsection A shall be determined by the Planning Manager based on common functional, product or compatibility characteristics and activities, as provided for in Section 19.08.050 (Classification of uses not specifically listed).

1. Uses Not Listed. The number of parking spaces required for uses not specifically listed in subsection A shall be determined by the Planning Manager based on common functional, product or compatibility characteristics and activities, as provided for in Section 19.08.050 (Classification of uses not specifically listed).

2. New Buildings or Development Projects Without Known Tenants. If the type of tenants that will occupy a non-residential building are not known at the time of the development entitlement or building permit approval, the amount of parking to be provided shall be:

The minimum number of parking spaces required by subsection A for any land use allowed on the site by the applicable zoning, provided that the Planning Manager determines the proposed building as designed can reasonably accommodate such use, and provided further a zoning clearance certification is obtained to authorize the use.

3. Mixed Use Projects. Where a project contains more than one major use classification (such as a residential and a commercial use), the amount of parking to be provided shall be the total of that required for each use, except as otherwise provided by subsection C (adjustment to number of required parking spaces).

4. Tenant Spaces with Multiple Functions. When a tenant has several functions, such as sales and office, the amount of parking to be provided for the tenant shall be calculated as specified by subsection A for the primary use, using the gross floor area of the tenant space.

5. Tenant Spaces with Accessory Storage. When a tenant has enclosed accessory storage in excess of 2,000 square feet, the required parking for that portion of the tenant space dedicated to storage shall be calculated as specified by subsection (A)(5) for warehousing which is one parking space per 1,000 square feet of warehousing. The required parking for the remainder of the tenant space shall be calculated as specified in subsection A using the primary use.

6. Changes in Use. When an existing use is enlarged, increased or intensified, or a new use having greater parking requirements than the previous use is proposed, the required number of parking spaces for the new use or existing, enlarged, increased or intensified use shall be calculated as specified by subsection A.

7. Rounding Off. When the required number of parking spaces is other than a whole number, the total number of spaces shall be rounded to the nearest whole number (0.49 and below round down, 0.50 and above round up).

8. Commercial Centers. Commercial centers and building complexes shall provide parking which is the sum of all users within the commercial center or building complex as specified in subsection A, regardless of whether or not the parking is provided on a single or multiple parcels. Where parking is provided on multiple parcels, reciprocal parking and access agreements shall be recorded to provide equal use and access to parking for all users within the commercial center or building complex.

9. Professional Office Uses. Professional office projects shall calculate parking based on the net leasable square footage of the proposed office building(s). Net square footage shall be 90 percent of the total square footage of the proposed building(s). The net square footage shall be determined at original building shell approval and subsequent tenant improvements shall not be granted any additional reduction for net square footage.

C. Adjustment to Number of Required Parking Spaces. The number of parking spaces required by subsection A may be reduced as follows:

1. Specific Plan Provisions. Provisions may be made in a specific plan to allow reductions in the number of required parking spaces based upon special provisions, such as providing golf cart or electric car parking where special provisions are made for golf carts or electric cars.

2. Parking Reductions for Shared Parking. If an applicant believes the number of parking spaces required for their building complex as specified in subsection A (which is the sum of all the users within the building complex) is not applicable because the hours of operation of different tenants/uses within the building complex will effectively allow for dual use of the parking spaces then the applicant may request an Administrative Permit, or if within the Atlantic Street Corridor, Douglas-Harding Corridor, or Douglas-Sunrise Corridor Specific Plans may process the request as part of a Design Review Permit, pursuant to Section 19.33.070. The Approving Authority shall be the Planning Manager.

The applicant shall have the burden of proof for requesting a reduction in the total number of required off-street parking spaces, and documentation shall be submitted substantiating this request. Shared parking reductions shall only be approved by the Approving Authority if:

- a. A sufficient number of spaces are provided to meet the greatest parking demand of the participating uses;
- b. Satisfactory evidence is provided describing the nature of the uses and the times when the uses operate so as to demonstrate the lack of potential conflict between them;
- c. Overflow parking will not impact any adjacent use; and
- d. Additional documents, covenants, deed restrictions, or other agreements as may be deemed necessary by the Planning Manager are executed to assure that the required parking spaces provided are maintained and uses with similar hours and parking requirements as those uses sharing the parking facilities remain for the life of the project.

3. Parking Reductions for an Individual Use. If an applicant for a proposed use believes the number of parking spaces required for their use as specified in subsection A is not applicable because their use functions differently than the generic use type and associated parking standards established in this title, then the applicant may request an Administrative Permit, or if within the Atlantic Street Corridor, Douglas-Harding Corridor, or Douglas-Sunrise Corridor Specific Plans may process the request as part of a Design Review Permit, pursuant to Section 19.33.070. The Approving Authority shall be the Planning Manager. The applicant shall have the burden of proof for requesting a reduction in the total number of required off-street parking spaces, and documentation shall be submitted substantiating the request. Such documentation may include, but is not limited to: a parking study of another facility of the same use which is similar in size and operation, calculating the required parking spaces with field data of peak parking usage. Reduced parking shall only be approved by the Approving Authority if:

- a. Satisfactory evidence is provided describing the nature of the use, the operation and data from other facilities or similar facilities so as to demonstrate that the required parking standards are excessive and the proposed parking standards are appropriate; and
- b. Overflow parking will not impact any adjacent use.

4. Parking Reductions for Eating and Drinking Establishments. The Approving Authority for any application for a parking reduction by an eating and drinking establishment as defined in Section 19.08.090(L) **shall be the Planning Commission.**

D. Downtown/Old Town Parking Requirements. All principally permitted uses within the historic district (HD) and central business district (CBD) zone districts, with the exception of community assembly, colleges and universities, and new uses requiring and discretionary permit shall be permitted in the HD and CBD zone districts without the need to provide additional off-street parking.

Community assembly, college and university uses and new uses which require a discretionary permit, shall comply with the parking standards specified in subsection A, or request approval of a parking reduction or variance from the parking standards.

SECTION 4. Section 19.78.020 of Chapter 19.78 of Title 19 of the Roseville Municipal Code is hereby amended to read as follows:

19.78.020 Required public hearings, authorized Approving Authority and public notice.

Type “A.” The public hearing may be waived. Notice of an intent to approve a development entitlement shall be mailed at least 10 days prior to an action to the applicant, the property owner, the owners, as shown on the most recent secured assessor’s roll, of property within 300 feet of the property involved in the application, and all persons who have requested notice, pursuant to Section 19.78.050 of this title. Should a public hearing be requested as a result of the notice, or as otherwise permitted by this title, the Approving Authority shall be as identified in Section 19.74.010 and notice of the public hearing shall be as identified in Type “B”.

Type “B.” Public hearing is required. Notice of the hearing shall be mailed at least 10 days prior to the public hearing to the applicant, the property owner, the owners, as shown on the most recent secured assessor’s roll, of property within 300 feet of the property involved in the application, and each local agency expected to provide water, sewer, streets, roads, schools or other essential facilities or services to the site. Notice shall also be provided to all persons who have requested notice, pursuant to Section 19.78.050 of this title. The radius list for notice of a permit application for an adult establishment shall be expanded as required by Section 19.32.030 of this title. The radius list for notice of a permit application for a nightclub use shall be expanded as required by Section 19.49.040 of this title.

10 days prior to the public hearing, notice shall also be provided by at least one of the following methods:

1. Publication in a newspaper of general circulation within the City; or
2. Posting in at least three public places within the City and posting the application site.

Type “C.” The public hearing may be waived. Notice of intent to approve a development entitlement shall be posted on the subject site, by the property owner, at least 10 days prior to an action to the applicant and/or the property owner(s). Should a public hearing be requested as a result of the notice, or as otherwise permitted by this title, the Approving Authority shall be as identified in Section 19.74.010 and notice of the public hearing shall be as identified in Type “B”.

Type “D.” No public hearing required and no public notice is required.

SECTION 5. Chapter 19.33 of Title 19 of the Roseville Municipal Code is hereby added to read as follows:

**CHAPTER 19.33
COMMERCIAL CORRIDOR SPECIFIC PLANS**

19.33.010 Purpose.

The Commercial Corridor Specific Plans include the Atlantic Street Corridor Specific Plan, the Douglas-Harding Corridor Specific Plan, and the Douglas-Sunrise Corridor Specific Plan (“Corridor Plans”). This special area district includes the establishment of procedures to implement the policies and development standards of the Corridor Plans and is the primary document used to guide development processes and permitted uses within the Corridor Plans. The special area district establishes permitted and conditionally permitted uses for various zone districts, standards for non-conforming uses and buildings, development standards and parking standards, and entitlement processes that vary from the processes established within Title 19 Article V of the Roseville Municipal Code.

19.33.020 District boundaries.

A. Atlantic Street Corridor Specific Plan. Consists of approximately 73 acres of land and is generally bounded by Atlantic Street to the north, Shearer Street or the Dry Creek Open Space to the south, Interstate 80 to the east, and Folsom Road to the west.

B. Douglas-Harding Corridor Specific Plan. Consists of approximately 152 acres of land and is generally bounded by Lead Hill Road to the north, Douglas Boulevard to the south, Interstate 80 to the east, and Park Drive to the west.

C. Douglas-Sunrise Corridor Specific Plan. Consists of approximately 251 acres of land and is generally bounded by Lead Hill Road to the north, Coloma Road to the south, Rocky Ridge Drive to the east, and Interstate 80 to the west.

19.33.030 Permitted uses.

A. General. Land uses within the Corridor Plans are implemented through application of zone districts. In recognition of the goals of the Corridor Plans this special area district

(“District”) applies to all Multifamily Residential (R3), Business Professional (BP), Neighborhood Commercial (NC), Community Commercial (CC), and General Commercial (GC) zone districts within the Specific Plan boundaries within the Corridor Plans. The District standards do not apply to any zone districts not listed in the tables below, such as the Single-Family (R1), Small-Lot (RS), or Two-Family (R2) Residential zone districts. The District customizes the permitted uses of general zone districts to reflect the unique nature and community character goals of the Specific Plan.

B. Permitted Use Types. Use tables are provided for each of the three Corridor Plans. The tables specify permitted uses, conditionally permitted uses, administratively permitted uses, and prohibited uses for certain zoning designations within the Specific Plan. Principally permitted uses (P) indicate that the use is allowed in the specified zone. Conditionally and administratively permitted uses require the granting of a Conditional Use Permit (CUP) or Administrative Permit (A), respectively, as provided in Chapter 19.72 and 19.74 of the Roseville Municipal Code. Prohibited uses (-) are not allowed in the specified zone district. Use type classifications are defined in Chapter 19.08 of the Roseville Municipal Code. This District relies on the classification system and definitions established in the Roseville Municipal Code.

A zone district which is not listed within the tables below is regulated in accordance with Article II of Title 19. A use which is listed within the permitted use tables of Article II of Title 19, but is not listed below is generally prohibited. Where a use is not specifically listed in either Article II of Title 19 or the tables below, the Planning Manager may determine whether the use is generally consistent or of the same general character as one or more listed uses to determine whether the use is permitted. Existing buildings, structures, and uses permitted within the Specific Plan area as of the effective date of this chapter shall continue to be permitted and exempt from the requirements of this chapter as legal nonconforming.

Notes:

- (1) Additional requirements are contained in Chapter 19.38.
- (2) Additional requirements are contained in Chapter 19.40.
- (3) Additional requirements are contained in Chapter 19.39.
- (4) Additional requirements are contained in Chapter 19.55.
- (5) Accessory dwelling/junior accessory dwelling units are only permitted within areas zoned to allow single-family, two-family or multi-family residential use and must be located on a lot that contains an existing or proposed single-family, two-family or multi-family dwelling unit as defined in Sections 19.08.080(F)(1) and (F)(2) (Residential Use Types). See Chapter 19.60 for additional accessory dwelling/junior accessory dwelling unit regulations.
- (6) Multifamily residential is principally permitted without a Conditional Use Permit in the GC zone where residential uses already existed on a site prior to adoption of this Specific Plan.

- (7) Transitional housing and supportive housing are residential uses types and are permitted (P) where residential uses are permitted (P) or conditionally permitted (CUP).
- (8) Single-family and two-family uses are permitted at minimum densities of 23 units/acre, but otherwise require a Conditional Use Permit, except that any parcel in a residential zone district may be developed with two single-family homes.
- (9) See Chapter 19.46 for large family day care home regulations.
- (10) A long-term care facility which serves six (6) or fewer persons shall be considered a residential use of the property.
- (11) Low Barrier Navigation Centers are exempt from a Design Review Permit.
- (12) Short-Term Rentals are only permitted in a single-family dwelling unit. See Chapter 4.25 for additional Short-Term Rental requirements.
- (13) A Conditional Use Permit is required for auto body and equipment repair uses which are within 300 feet of a residential zone (R1, R2, RS, or R3) or a single-family or multifamily home, and if located outside of this buffer are principally permitted.
- (14) A conditional use permit is required for fast food with drive through establishments or gasoline sales establishments contiguous to: (a) properties with a residential zoning designation; (b) parcels designated as a public utilities easement or landscape easement which are contiguous to a property having a residential zoning designation; and (c) any other parcel of land upon which a building cannot be developed and which separates the subject parcel by less than 100 feet which is contiguous to a property having a residential zoning designation. A conditional use permit is not required for these uses if the subject parcel is separated from properties with a residential zoning designation by a public roadway.
- (15) Additional requirements are contained in Chapter 19.49.
- (16) Additional requirements are contained in Chapter 19.36.
- (17) Additional requirements are contained in Chapter 19.34.

- (10) Low Barrier Navigation Centers are exempt from a Design Review Permit.
- (11) Short-Term Rentals are only permitted in a single-family dwelling unit. See Chapter 4.25 for additional Short-Term Rental requirements.
- (12) A conditional use permit is required for fast food with drive through establishments or gasoline sales establishments contiguous to: (a) properties with a residential zoning designation; (b) parcels designated as a public utilities easement or landscape easement which are contiguous to a property having a residential zoning designation; and (c) any other parcel of land upon which a building cannot be developed and which separates the subject parcel by less than 100 feet which is contiguous to a property having a residential zoning designation. A conditional use permit is not required for these uses if the subject parcel is separated from properties with a residential zoning designation by a public roadway.
- (13) Additional requirements are contained in Chapter 19.49.
- (14) Additional requirements are contained in Chapter 19.36.
- (15) Additional requirements are contained in Chapter 19.34.

C. Uses and Zone Districts Not Listed. A use which is listed within the Roseville Municipal Code, but is not listed in the tables in this chapter is generally prohibited. Where a use is not specifically listed in either the tables in this chapter or within the other sections of Title 19 of the Roseville Municipal Code, the Planning Manager may determine whether the use is generally consistent or of the same general character as one or more listed uses to determine whether the use is permitted. For parcels within the Single-Family (R1), Small-Lot (RS), or Two-Family (R2) Residential zone district, refer to the list of allowable uses in Section 19.10.020 of the Zoning Ordinance. For parcels within the Industrial (M2) zone district, refer to the list of allowable uses in Section 19.14.020 of the Zoning Ordinance. For parcels within the Floodway (FW) and Floodway Fringe (FF) zone district, refer to Section 19.18.040 of the Zoning Ordinance.

D. Legal Nonconforming Uses. Existing buildings, structures, and uses permitted within the Corridor Plan boundaries as of the effective date of this chapter shall continue to be permitted and exempt from the requirements of this chapter as legal nonconforming. Uses which would require a Conditional Use Permit or Administrative Permit, but which were previously permitted prior to adoption of this District shall be deemed to have obtained the required Conditional Use Permit or Administrative Permit.

19.33.040 Nonconforming use regulations.

A. General. The Corridor Plans include many properties where the existing use of the land is nonconforming, which means the use is not permitted within the underlying zone. In order to facilitate greater investment in and improvement of older nonconforming buildings and properties, this District provides for some degree of expansion of use. The following section supersedes Roseville Municipal Code Section 19.24.020, Nonconforming Uses and Structures, for those properties located in the Corridor Plans.

B. Nonconforming Uses and Structures. A nonconforming use may be continued, and may only be enlarged or increased, or extended to occupy a greater area than that which it lawfully occupied before becoming a nonconforming use, as follows below. For the purposes of this section, expansion includes enlargement, extension, reconstruction, or structural alteration of a building or site.

1. Nonresidential Uses and Buildings Contiguous to Residential Uses. The use or buildings shall not be expanded closer to contiguous residential uses, except for landscaping. The use or buildings shall not be operationally changed or expanded in a manner which will subject contiguous residential uses to increased noise, odor, or other nuisance conditions. Expansions or enlargements of a use which meet these criteria are permitted with an Administrative Permit, provided they conform to the Specific Plan Design Guidelines. For the purposes of this section, “contiguous to residential uses” is defined to mean where the property is contiguous to (a) properties with a residential zoning designation, (b) parcels designated as a public utilities easement or landscape easement which are contiguous to a property having a residential zoning designation, or (c) any other parcel of land upon which a building cannot be developed and which separates the subject parcel by less than 100 feet which is contiguous to a property having a residential zoning designation.

2. Nonresidential Uses and Buildings not Contiguous to Residential Uses. A nonconforming use may be expanded or modified with approval of an Administrative Permit, provided the project conforms to the Specific Plan Design Guidelines.

3. Residential Uses and Buildings. The nonconforming use of a residential building in a zoning district where such use is not permitted may continue subject to the residential zone development standards requirements of Section 19.10.030(A) (R1 district), until such time as the building is condemned, removed, or converted. Subject to building permit requirements, enlargement, extension, reconstruction, or structural alteration of a building designed as a dwelling is permitted if such additions or improvements conform to all applicable provisions of this title, and the new construction does not expand the nonconformity.

4. Substitution of Nonconforming Use. A nonconforming use may be substituted with a different nonconforming use provided it has the same or a less intensive use classification, only upon approval of an Administrative Permit. Such a new nonconforming use shall be subject to the nonconforming use requirements listed above for residential and nonresidential uses, as applicable. For the purposes of this section, the intensity of a use classification shall be determined by the Planning Manager based on trip generation; parking demand; and nuisance conditions such as lighting, noise, or odor generation.

19.33.050 Multifamily residential (R3) development standards.

STANDARD	REQUIREMENT
Area, interior lot	6,000 sq ft
Area, corner lot	7,500 sq ft
Width, interior	60 ft
Width, corner	75 ft
Maximum number of primary dwellings	As provided by General Plan, and a minimum of 3 dwellings
Maximum number of accessory/junior accessory dwelling units per lot	Up to 2 dwellings
Setbacks and Lot Coverage	As provided by the Specific Plan Design Guidelines
Height limits	Maximum of 45 feet or as provided by the Specific Plan Design Guidelines

19.33.060 Off-Street parking standards.

A. Parking Standards. The below off-street parking standards shall apply to projects within the Douglas-Sunrise Corridor Specific Plan and to projects east of Folsom Road in the Douglas-Harding Corridor Specific Plan.

USE TYPE	STANDARD
----------	----------

Non-Residential Uses	Pursuant to Municipal Code Chapter 19.26 ¹
Mixed Uses	Sum of non-residential and residential requirements ¹
Residential < 25 units per acre	Pursuant to Municipal Code Chapter 19.26
Residential ≥ 25 units per acre	Zero to one bedroom – 1 space per unit Two to three bedrooms – 1.5 spaces per unit Four or more bedrooms – 2 spaces per unit AND one guest parking space for every 10 units (rounded up)

Notes:

(1) A Parking Reduction may be requested as part of design review pursuant to the Entitlements and Permit Requirements section of this District.

19.33.070 Entitlements and permit requirements.

A. General. These procedures simplify and streamline the development review process and remove barriers to reinvestment, particularly for high density housing and commercial reinvestment. These procedures are also applicable to project consistent with the Atlantic Street Corridor Policy 2.2 or Douglas-Harding Corridor Specific Plan Policy 1.5 regarding preservation and reuse.

B. Façade Improvements and Minor Alterations. Façade improvements and other minor alterations consistent with the provisions of the Specific Plan Design Guidelines will be approved through the Minor Design Review Permit process. Façade improvements include color changes and/or the introduction of new exterior building materials, doors, or windows; wall murals; the addition of exterior ornamentation such as awnings and lighting; or other exterior alterations or exterior remodels to existing buildings or structures. Other minor alterations include changes which are in substantial conformance with the existing site development and/or previously approved permit and do not create the need for new parking or affect existing parking or access designs.

C. Minor Additions and Minor Site Improvements – Non-Residential. An addition to existing structures that is no greater than 15% of the total existing building footprint on the site is considered minor, for the purposes of this section. Minor site improvements include changes to landscaping, lighting, utilities, parking, access, or circulation which do not require supporting technical studies such as a short-term traffic study, water supply assessment, or similar, subject to the discretion of the Planning Manager. Minor additions and site improvements will be approved through the Minor Design Review Permit process. At the discretion of the Planning Manager, this process may also be used for projects incorporating preservation or adaptive reuse, if applicable, as defined and described by the Atlantic Street Corridor or Douglas-Harding Corridor Specific Plan.

This streamlined process may only be used one time during the duration of the Specific Plans; subsequent additions will be subject to the City’s standard Design Review Permit or Design Review Permit Modification process. To qualify for the streamlined process, additions, site improvements, and associated renovations to existing structures will be required to enhance the opportunity of the building and existing onsite improvements to meet the criteria of the Design Guidelines (e.g., sidewalk widening) and must conform to design guidelines and standards.

D. Additions and New Construction – High Density Residential. Design Review Permits for High Density Residential projects (including vertical mixed-use projects) with a minimum density of 25 units per acre which are consistent with the provisions of the Specific Plan Design Guidelines will be processed consistent with Roseville Municipal Code Section 19.78.020 “Type A” projects, provided they conform to the applicable development standards and design guidelines. Projects which do not conform are not eligible for this process. If the property has existing site improvements, the project will be required to enhance the opportunity of the existing improvements on the site to meet the criteria of the Specific Plan Design Guidelines (e.g., sidewalk widening). Note that projects providing a minimum of 20% of the units for extremely low, very low, or low-income households are eligible to use the City’s ministerial Objective Design Standards process.

E. Parking Reduction. If an applicant believes the number of required parking spaces is not applicable, they may request a parking reduction pursuant to Roseville Municipal Code Section 19.26.030. However, where a parking reduction is requested as part of a Design Review Permit application for development or redevelopment pursuant to this District, the parking reduction will not require a separate Administrative Permit; the request shall be part of the Design Review entitlement.

SECTION 6. This ordinance shall be effective at the expiration of thirty (30) days from the date of adoption.

SECTION 7. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

Title: Appointments - City Council Auxiliary Positions
Contact: Carmen Avalos 916-774-5269 cavalos@roseville.ca.us

Meeting Date: 1/18/2023
Item #: 7.30.

RECOMMENDATION TO COUNCIL

Recommend City Council approve the appointment of city councilmembers to auxiliary positions, as designated on the attachment to this Council report.

BACKGROUND

Membership on auxiliary agencies, boards, commissions, committees, and joint power authorities within Roseville and the Placer County and Sacramento County region is an essential function of City of Roseville elected officials. Meetings, workshops and forums are held throughout the region to discuss and act on issues of common interest seeking shared solutions. Regional cooperation and representation results in successful partnerships.

FISCAL IMPACT

Not applicable.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378.

The appointments of City Council auxiliary positions meet the above criteria and are not subject to CEQA. No additional environmental review is required.

CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal E - Deliver exceptional city services

Title: Appointment of Youth Board Member and Youth Commissioners

Contact: Katrina Six 916-774-5267 kmsix@roseville.ca.us

Meeting Date: 1/18/2023

Item #: 7.31.

RECOMMENDATION TO COUNCIL

Appoint Iniyazh Hariharan as the Grants Advisory Commission Youth Commissioner to a term ending December 31, 2023.

Appoint Sofia Moreno as the Library Board Youth Member to a term ending December 31, 2023.

Appoint Amre Abunmarkhieh as the Parks and Recreation Commission Youth Commissioner to a term ending December 31, 2023.

Appoint Tannishtha Mondal as the Transportation Commission Youth Commissioner to a term ending December 31, 2023.

BACKGROUND

The Municipal Code allows for the opportunity for high school students to serve a one-year term on the Grants Advisory Commission, Library Board, Parks and Recreation Commission, and Transportation Commission. The terms of Youth Commissioners are one year and expire every year on December 31.

Recruitment of Youth Commissioners was conducted by the City Clerk's Department in October. The opportunity to serve as a Youth Commissioner was advertised on the City website and with the Press Tribune. Counselors and administrators at the City's high schools were also notified of the City's recruitment efforts.

Review of the applications and interviews of the applicants were completed by the Boards and Commissions in November. Staff is now requesting City Council approve the recommended appointments.

FISCAL IMPACT

Not applicable.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. The appointment of members to boards or commissions does not include the potential for a significant environmental effect, and therefore is not subject to CEQA.

CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal B - Support community engagement and advocacy

File #: 0709-03

Title: 2022 Prohousing Incentive Program Application
Contact: Trisha Isom 916-746-1239 tisom@roseville.ca.us
Sara Thornton 916-774-5295 srthornton@roseville.ca.us

Meeting Date: 1/18/2023
Item #: 8.1.

RECOMMENDATION TO COUNCIL

Staff recommends that the City Council adopt a resolution authorizing the City Manager or his designee to execute the necessary application, standard agreement and relevant documents for the Prohousing Incentive Pilot grant program from the California Housing and Community Development Department.

BACKGROUND

The Prohousing Designation Program was established by the State of California Housing and Community Development Department (HCD) in 2019 to help meet California's housing goals. The Prohousing Designation is given to cities that have sufficiently removed barriers to housing. The designation makes affordable housing projects more competitive for state and federal funding and could help accelerate the timeline for future projects.

On December 15, 2022, the State approved the City of Roseville's Prohousing Designation Application and released a new funding opportunity called the Prohousing Incentive Pilot Program (PIP). The new funding program was designed to encourage cities and counties to obtain the Prohousing Designation and only those who have received the designation by HCD are eligible for new grant funding. HCD will award PIP funding based on each jurisdiction's population size and Prohousing Designation Program score. The 2022 round of program funding provides awards to use towards planning and implementation activities related to housing and community development.

The City of Roseville application requests the maximum award amount for a total of \$1,610,000. If awarded, the Housing Division intends to use these grant funds to apply for matching funds for the 2023 Local Housing Trust Fund Notice of Funding Availability (NOFA) and leverage them to release a NOFA for a total of \$3,220,000 towards affordable development.

Staff requests Council authorization to complete and submit an application for PIP funds (Attachment 1 - Draft PIP application). Application materials must be submitted no later than

March 15, 2023; but HCD is encouraging early applications. If the City is successful, all funds will be used to finance future affordable rental housing developments in Roseville.

FISCAL IMPACT

PIP funding is provided as a state grant to the City. These grants are used to offset potential costs to the General Fund, while serving the low-income community and supporting the development of affordable housing. The recommended action does not impact the City's General Fund.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Approval of a resolution to apply for state funding meets the above criteria and is not subject to CEQA. No additional environmental review is required.

Description

Resolution 23-011

Prohousing Incentive Pilot Program Application

RESOLUTION NO. 23-011

AUTHORIZING APPLICATION FOR, AND RECEIPT OF,
PROHOUSING INCENTIVE PILOT PROGRAM FUNDS

WHEREAS, pursuant to Health and Safety Code 50470 et seq, the Department of Housing and Community Development (“Department”) is authorized to issue Guidelines as part of an incentive program (hereinafter referred to by the Department as the Prohousing Incentive Pilot Program or “PIP”); and

WHEREAS, the City Council of the City of Roseville desires to submit a PIP grant application package (“Application”), on the forms provided by the Department, for approval of grant funding for eligible activities toward planning and implementation activities related to housing and community development as a result of meeting eligibility criteria including but not limited to Prohousing Designation; and

WHEREAS, the Department has issued Guidelines and Application on December 15, 2022 in the amount of \$25,705,545.65 for PIP.

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Roseville (“Applicant”) resolves as follows:

SECTION 1. The City Manager is hereby authorized and directed to submit an Application to the Department in response to the NOFA, and to apply for the PIP grant funds in a total amount not to exceed \$1,610,000; and

SECTION 2. In connection with the PIP grant, if the Application is approved by the Department, the City Manager of the City of Roseville is authorized and directed to enter into, execute, and deliver on behalf of the Applicant, a State of California Agreement (Standard Agreement) for the amount of \$1,610,000, and any and all other documents required or deemed necessary or appropriate to evidence and secure the PIP grant, the Applicant’s obligations related thereto, and all amendments thereto; and

SECTION 3. The Applicant shall be subject to the terms and conditions as specified in the Guidelines, and the Standard Agreement provided by the Department after approval. The Application and any and all accompanying documents are incorporated in full as part of the Standard Agreement. Any and all activities funded, information provided, and timelines represented in the Application will be enforceable through the fully executed Standard Agreement. Pursuant to the Guidelines and in conjunction with the terms of the Standard Agreement, the Applicant hereby agrees to use the funds for eligible uses and allowable expenditures in the manner presented and specifically identified in the approved Application.

Prohousing Incentive Pilot (PIP) Program Application Instructions

The applicant is applying to the Department of Housing and Community Development (Department) for a grant authorized under the provisions pursuant to Health and Safety Code Section 50470(2)(C)(i). The PIP Program is designed to encourage cities and counties to achieve Prohousing Designation. Please refer to the PIP Program Guidelines and 2022 Notice of Funding Availability (NOFA) for detailed information on eligible uses and awards. If you have questions regarding this application or the PIP Program, email prohousingincentive@hcd.ca.gov.

If approved for funding, the PIP application is incorporated as part of your Standard Agreement with the Department. To be considered for funding, all sections of this application, including attachments if required, must be complete and accurate.

Threshold Requirements

In order to be considered for funding, all applicants must submit a complete, signed application to prohousingincentive@hcd.ca.gov by March 15, 2023. Pursuant to Section 202 of the PIP Guidelines, all applicants must meet the following threshold requirements to be eligible for funding:

X	An adopted housing element in substantial compliance, as determined by the Department, pursuant to Housing Element Law (Article 10.6 of Gov. Code) in accordance with Government Code section 65585, subdivision (h).
X	Housing Element Annual Progress Report submittal pursuant to Government Code Section 65400 for the current or prior year, as applicable.
X	Prohousing Designation: An awarded or completed Prohousing Designation Application with an authorizing resolution must be submitted prior to or in conjunction with the Applicant's PIP Application. PIP Awards cannot be made until a Prohousing Designation is awarded.
X	A complete application as determined by the Department.
X	An authorizing resolution authorizing submittal of the application to the Program that materially comports with the Program's requirements and is legally sufficient as determined in the Department's reasonable discretion, including an authorized representative. See Attachment B of the PIP Guidelines for required resolution format.
X	Compliance with state and federal housing laws as determined by the sole discretion of HCD.

Demonstration of meeting threshold criteria shall be determined by the Department in its sole and absolute discretion. No documentation of meeting threshold requirements is required in the application unless requested by the Department.

Eligible Uses

Eligible Applicants must use award funds towards any planning or implementation activities related to housing and community development including, but not limited to, any eligible uses pursuant to Health and Safety Code section 50470(b)(2)(D), as described below. Please indicate which of the following the applicant will use award funds toward:

	(i) The predevelopment, development, acquisition, rehabilitation, and preservation of multifamily, residential live-work, rental housing that is affordable to extremely low, very low, low-, and moderate-income households, including necessary operating subsidies.
	(ii) Affordable rental and ownership housing that meets the needs of a growing workforce earning up to 120 percent of area median income, or 150 percent of area median income in high-cost areas.
X	(iii) Matching portions of funds placed into local or regional housing trust funds.
	(iv) Matching portions of funds available through the Low and Moderate Income Housing Asset Fund pursuant to subdivision (d) of Section 34176 of the Health and Safety Code.
	(v) Capitalized reserves for services connected to the creation of new permanent supportive housing, including, but not limited to, developments funded through the Veterans Housing and Homelessness Prevention Bond Act of 2014.
	(vi) Assisting persons who are experiencing or at risk of homelessness, including providing rapid rehousing, rental assistance, navigation centers, emergency shelters, and the new construction, rehabilitation, and preservation of permanent and transitional housing.
	(vii) Accessibility modifications.
	(viii) Efforts to acquire and rehabilitate foreclosed or vacant homes.
	(ix) Homeownership opportunities, including, but not limited to, downpayment assistance.
	(x) Fiscal incentives or matching funds to local agencies that approve new housing for extremely low, very low, low-, and moderate-income households.

Summary of Proposed Activities

Proposed Activity	Eligible Use Category	Description of Proposed Activity	Approximate Timing of Proposed Activity	Amount of Funds Requested
Matching Funds for LHTF	iii	Use as matching funds and release NOFA for affordable housing development	2023-2026	\$1,610,000

Title: Council Discretionary Funds - Downtown Roseville Partnership

Contact: Cary Camilleri 916-746-1350 cacamilleri@roseville.ca.us
Carmen Avalos 916-774-5269 cavalos@roseville.ca.us

Meeting Date: 1/18/2023

Item #: 9.1.

RECOMMENDATION TO COUNCIL

Recommend City Council consider a request for \$2,000 from Council Discretionary Funds for Downtown Roseville Partnership for the 61st Annual Sylvia Besana Holiday Parade event on Saturday November 19th, 2022.

BACKGROUND

The Citizens' Benefit Fund was established in 1993 with the net proceeds from the sale of the Roseville Hospital. The City Council may, after receiving the recommendation of the Roseville Grants Advisory Commission, annually appropriate up to 90 percent of the annual earnings of the Citizens' Benefit Fund for the purpose of improving the quality of life for the citizens of the City of Roseville. The City Council, without the recommendation of the Roseville Grants Advisory Commission, may annually appropriate a minor amount up to \$15,000 of the annual earnings for the purpose of improving the quality of life in Roseville.

FISCAL IMPACT

There is no fiscal impact to the City's General Fund. Annually, the Assistant City Manager/Chief Financial Officer allocates \$15,000 of the annual earnings on the Citizens' Benefit Fund per section 4.06.040 in the Municipal Code and includes it in the annual budget along with the Citizens' Benefit Fund resources available for appropriation each year. These earnings are restricted for the purpose of improving the quality of life for Roseville residents and appropriated by the City Council. The balance remaining in the Council's Discretionary Funds for FY2022-23 is \$16,321.83.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines

§15060(c)(3) and §15378. The award of funds meets the above criteria and is not subject to CEQA. No additional environmental review is required.

CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Description

Downtown Roseville Partnership Discretionary Funds request

October 10, 2022

Krista Bernasconi, Mayor
City of Roseville
311 Vernon Street
Roseville, CA 95678

Dear Mayor Bernasconi and City Council:

The Downtown Roseville Partnership is proud to host the 61st Annual Sylvia Besana Holiday Parade. This family-friendly holiday event will be held on Saturday, November 19th with the vendor booths opening at 9:00 AM and the parade beginning at 10:30 AM. There will be fun events for all ages both before and after the parade, including Santa, food and craft booths and some new surprises this year!

The event in 2021 drew over 4,000 parade watchers, 60 parade units, and dozens of volunteers! This year we expect even more than that to come to spend time with their family and friends, watch the parade, and then spend time in the Downtown Roseville area.

The parade presents an opportunity to drive business and interest in our Downtown area as well as create additional revenue for our City through sales and increased business. The Downtown Roseville Partnership requests a \$2000 sponsorship for the 61st Annual Sylvia Besana Holiday Parade from the City Council discretionary funds.

The Downtown Roseville Partnership is a non-profit with a 501(c)6 status, and, as such, is not eligible for grant applications through the City of Roseville. The Council has generously allotted funds to the Parade for the last few years through the Discretionary Funds program.

The goal of the Partnership is to keep the participation costs for parade applicants as low as possible so they rely on sponsors from outside to assist with costs. The parade sponsorship program has grown during the last few years and the hope is to eventually rely entirely on community and business sponsorships to fund the parade to allow maximum participation.

These funds will go to the general operations of the Holiday Parade. This includes, but is not limited to, the expense to close the streets, the staffing it takes to organize the parade, additional restrooms for our attendees, insurance policies to cover the event and the attendees, and other parade expenses. The total cost for the Parade, dependent on number of participants, may reach \$12,000. These funds will be used to off-set those costs.

We are proud to say that since the event has been taken over by the Downtown Roseville Partnership in 2017, Parade float/unit numbers have risen 20%, vendor booth numbers have risen almost 200%, and sponsorships from outside businesses have doubled!

We would greatly appreciate the Council's granting this sponsorship request. If you have additional questions please feel free to contact me at info@sylviabesanaparade.org or by phone at 916-910-5769.

Respectfully,

Stephanie Hill, Parade Director

Title: Development Impact Fee Reports for Fiscal Year Ended June 30, 2022

Contact: Jeannine Thrash 916-774-5473 jthrash@roseville.ca.us
Dennis Kauffman 916-774-5313 dkauffman@roseville.ca.us

Meeting Date: 1/18/2023

Item #: 9.2.

RECOMMENDATION TO COUNCIL

Accept the following informational Development Impact Fee Reports prepared for the fiscal year ended June 30, 2022.

BACKGROUND

California, state legislation sets certain legal and procedural parameters for the charging of development impact fees ("DIF's"). This legislation was passed as AB1600 by the State Legislature and is now codified as California Government Code Sections (GC§) 66000 through 66008 ("Mitigation Fee Act"). GC§ 66006 (b) states the following requirements as pertains to the DIFs: For each separate account or fund established, the local agency shall, within 180 days after the last day of each fiscal year, make available to the public the following information for the fiscal year:

1. A brief description of the type of fee in the account or fund.
2. The amount of the fee.
3. The beginning and ending balance of the account or fund.
4. The amount of the fees collected and interest earned.
5. An identification of each public improvement on which fees were expended.
6. An identification of an approximate date by which the construction of the public improvement will commence if the local agency determines that sufficient funds have been collected to complete financing on an incomplete public improvement and the public improvement remains incomplete.
7. A description of each interfund transfer or loan made from the account or fund, including the public improvement on which the transferred or loaned fees will be expended, and in the case of an interfund loan, the date on which the loan will be repaid, and the rate of interest that the account or fund will receive on the loan.
8. The amount of refunds made (as pursuant to GC § 66001(e)) due to sufficient funds being collected to complete financing on incomplete public improvements, and the amount of reallocation of funds made (as pursuant to GC § 66001(f)) due to administrative costs of refunding unexpended revenues exceeding the amount to be refunded.

The attached Development Impact Fee Reports are for informational purposes. They are also posted on the City's website.

FISCAL IMPACT

There is no impact to the City's General Fund.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. The Development Impact Fee Reports meet the above criteria and are not subject to CEQA. No additional environmental review is required.

Reporting Requirements for Development Impact Fees

In California, State legislation sets certain legal and procedural parameters for the charging of development impact fees ("DIFs"). This legislation was passed as AB1600 by the California Legislature and is now codified as California Government Code Sections (GC §) 66000 through 66008 ("Mitigation Fee Act"). This State law went into effect on January 1, 1989.

GC § 66006(b) states the following requirements as pertains to DIFs:

For each separate account or fund established, the local agency shall, within 180 days after the last day of each fiscal year, make available to the public the following information for the fiscal year:

- (A) A brief description of the type of fee in the account or fund.
- (B) The amount of the fee.
- (C) The beginning and ending balance of the account or fund.
- (D) The amount of the fees collected and interest earned.
- (E) An identification of each public improvement on which fees were expended and the amount of expenditures on each improvement including the total percentage of the cost of the public improvement that was funded with fees.
- (F) An identification of an approximate date by which the construction of the public improvement will commence if the local agency determines that sufficient funds have been collected to complete financing on an incomplete public improvement and the public improvement remains incomplete.
- (G) A description of each interfund transfer or loan made from the account or fund, including the public improvement on which the transferred or loaned fees will be expended, and, in the case of an interfund loan, the date on which the loan will be repaid, and the rate of interest that the account or fund will receive on the loan.
- (H) The amount of refunds made (as pursuant to GC § 66001(e)) due to sufficient funds being collected to complete financing on incomplete public improvements, and the amount of reallocation of funds made (as pursuant to GC § 66001(f)) due to administrative costs of refunding unexpended revenues exceeding the amount to be refunded.

GC § 65865(e) also requires that in any development agreement entered into on or after January 1, 2004, the City shall comply with GC § 66006 with respect to any fee it receives or cost it recovers.

Description of Development Impact Fees

Drainage Fees

The Drainage Fee is established pursuant to Roseville Municipal Code Chapters 4.48 and 4.49. Drainage fees are required for all new construction that occurs within the Dry Creek Watershed mitigation zone or the Pleasant Grove/Curry Creek Watershed mitigation zones. These mitigation zones are further broken down into sub-zones or sub-areas for which fees vary.

New development, and the expansion of existing development, within the City imposes a burden on the creeks and drainage infrastructure within the Dry Creek watershed and the Pleasant Grove and Curry Creek watershed by adding additional impervious surface, thereby adding more runoff, and by changing discharge rates. Some of the worst burdens imposed by development are on properties located within the Dry Creek watershed and Pleasant Grove and Curry Creek watershed downstream from the City, where additional run-off poses a threat of severe flooding and is a danger to life and property.

The drainage fees have been calculated so as to pay for those facilities listed in the capital improvement program. The fee is to be collected for public improvements and facilities for which an account has been established and funds appropriated, and for which a proposed construction schedule has been adopted.

Public Facilities Fee

The Public Facilities Fee is established pursuant to Roseville Municipal Code Chapter 4.52. New development and the expansion of existing development within the City imposes burdens on existing public facilities and creates a need for additional public facilities. Such burdens may vary by the type of land use. The Public Facilities Fee is applied to new development and expansion of existing development to ensure adequate levels of public services and facilities are maintained. This fee spreads the costs of public facilities to development which creates the need for such public facilities, without generating any surplus to the general fund.

Sewer Connection Fees

Sewer connection fees are established pursuant to Roseville Municipal Code Chapter 14.16. Additional fees may be applicable to properties within sewer special benefit assessment areas.

- *Local Sewer Connection Fee* - The local sewer connection fee is charged for each sewer unit required within the Roseville City limits connected to the City-owned public sewer.

Water Connection Fee

Water connection fees are established pursuant to Roseville Municipal Code Chapter 14.08 and are applicable to all new water service connections within the City limits. This fee ensures the sharing of the costs associated with maintenance and expansion of the City's raw water supply, water treatment, storage, and distribution facilities by those who receive the benefits thereof.

Traffic Mitigation Fees

In 1988 the City of Roseville adopted a city-wide Traffic Mitigation Fee Program, requiring new development within the City to pay traffic impact fees. The fees collected through this program, in addition to other funding sources, allows the City to construct transportation improvements identified in its Capital Improvement Program (CIP). The fee program assesses fair-share costs to each jurisdiction based on their impact on the individual roadways from new development.

City / County Traffic Mitigation Fee - The City of Roseville and Placer County entered into a joint fee program for the purpose of funding improvements on Baseline Road and Walerga Road. The fee program assesses fair-share costs to other jurisdictions based on their impact on the individual improvements from new development. The fees associated with this fee program were originally collected by Roseville and Placer County. Fees collected by Roseville were remitted to Placer County quarterly to be held in one account. Effective July 2013, Fiddymont Road was removed from the program and individual agencies became responsible for holding the fees they *collect in two separate accounts, one with Roseville and one with Placer County.*

Downtown Specific Plan In-Lieu Parking Fee

This fee is established pursuant to Roseville Municipal Code Chapter 19.31. Within the designated Commercial Mixed Use, Old Town and Central Business districts, a parking requirement serving nonresidential uses and residential uses, where a minimum of one space per unit is provided on-site for the residential units, may be met by a cash in-lieu payment to the City prior to issuance of a building permit, or a certificate of occupancy if no building permit is required. The fee is dedicated for use to offset the cost of public off-street parking within the Downtown Specific Plan area in the form of garages or public parking lots.

Park Fees- (Although Park fees were adopted pre- AB1600, they are still being included in this report.)

Park fees are authorized pursuant to Roseville Municipal Code Chapters 4.37 and 4.38. There are two different types of park fees applicable to all residential projects. The City-wide Park Fee funds park and recreation facilities intended to serve the entire community, and the Neighborhood and Community Park Fees fund park and recreation facilities intended to serve neighborhood areas. Park fees may vary based on fees and credits that a parcel may be subject to. City-wide Park Credits are granted to all parcels within specific plan areas that have entered into a Development Agreement with the City. Certain parcels may be subject to additional City-wide credits. These additional credits are typically granted for park property dedication above City standards, or other park obligations that were paid for by the original land developers.

Electric Backbone Impact Fee

The Electric Backbone Impact Fee applies to all new customers served by the City's Electric Department and any customer requesting a special service or capacity increase. Fees are based upon a per lot/unit charge and collected upon issuance of the building permit fees. Fees are authorized pursuant to Roseville Municipal Code Chapter 4.54.

Solid Waste Impact Fee

The Solid Waste Impact Fee applies to all new single-family and duplex units. This fee is paid to the Solid Waste Division of the Environmental Utilities Department to set-up solid waste service. Typically, this fee is paid by the developer during the time of construction so that service will be available upon move-in by the homeowner. Fees are authorized pursuant to Roseville Municipal Code Chapter 9.12.

Development Agreement Fees Imposed Since 2004 (GC §65865(e))

- *Sierra Vista Specific Plan Mitigation Fee Program* –
 - *City Park Land Fee* - This fee provides funding for the SVSP land that is intended to be dedicated for a City park. This fee component does not cover neighborhood parks.
 - *Improvements Fee* - This fee is to provide funding for Sierra Vista landowners to be reimbursed for the design and completion of the SVSP improvements and to provide funding for open space and right-of-way dedications (e.g., school, fire station).
 - *Administration* - Establishment of the fee is for the purpose of equitably sharing the costs and burdens of administration of the SVSP Fee program throughout the specific plan with each landowner.
- *Watt Avenue and Vista Grande Boulevard Extension Traffic Mitigation Fee* – This fee provides fair share funding for extensions of Watt Avenue between the Regional University Specific Plan and future Placer Parkway and “Road B” west of the Sierra Vista Specific Plan boundary to Baseline Road. This fee remains in effect until a city-wide funding mechanism is adopted in cooperation with Placer County.
- *Water Meter Retrofit / Conservation Program* – This fee is established pursuant to Roseville Municipal Code Chapter 14.08 for the maintenance and testing of water meters and installation of Encoder Receiver Transmitter (ERT) devices.
- *Traffic Signal Coordination Fee* – This fee provides funding for the West Roseville Traffic Signal Interconnect project.
- *Bike Trail Fee* – This fee funds construction of Class 1 bike trails through new development areas.
- *City-Wide Park In-Lieu Fee* – This fee is paid as an alternative to dedication of City-wide park land, as specified in individual development agreements.
- *Fire Tax Equivalent Fee* – This fee applies to new growth areas and replaces the Fire Service Facilities Tax that expired in 2009. This fee provides funding for capital fire facilities and related equipment required to serve new growth areas.
- *Public Benefit Fee (AKA Community Benefit Fee)* – This fee applies to new residential growth areas and properties rezoned from non-residential to residential land uses. This fee ensures that new residential growth areas will benefit current and future residents of Roseville through investment in various public infrastructure projects and activities.
- *Air Quality Mitigation Fee (applies to West Roseville Specific Plan)* – This fee provides funding to the Placer County Air Pollution Control District to mitigate impacts to air quality resulting from new residential development.

- *Transit Shuttle Service Fee (applies to West Roseville Specific Plan)* – This fee provides funding for a shuttle service between the West Roseville Specific Plan area and the I80/Watt Avenue light rail station.
- *Downtown Benefit Fee* – Offsets the fiscal impacts associated with the unit increase within the applicable the Specific Plan.
- *Westpark Drive off-site road fee* – Developer's fee will fund the construction cost of Westpark Drive north of the Pleasant Grove Wastewater Treatment Plant.
- *Blue Oaks Boulevard Off-Site Road Fee* – Developer's pro-rata share of the cost obligation dedicated to segments 3 and 4 of the Blue Oaks Boulevard off-site improvements.

Water Connection Fees Project Descriptions

Groundwater management plan (Project# 400012) - Implement and maintain an SB 1938 compliant Groundwater Management Plan required to maintain future California state grant funding eligibility and implement elements of the Groundwater Management Plan with other agencies.

West side tank/pump Stn Proj (Project# 400014) - Design and construct a six million gallon water storage tank, pump station, and chemical addition facility at the City's 5.1 acre site located in the West Roseville Specific Plan. The work will include site master planning to accommodate two six million gallon tanks and satellite facility for Water Distribution operations.

Advanced Metering Infrastructure Project (Project# 400099) - An Advanced Metering Infrastructure (AMI) system is required to offer better meter data to customers. AMI would introduce two-way communication for meters allowing remote reads and greater interaction between the utility and its customers. An AMI system also provides customers a detailed view of their water usage, enabling them to make changes to increase their water efficiency. Finally, an AMI system provides better system reliability by bringing enhanced demand management and capital efficiencies. This project progresses from a business case through a third-party implementation and finishes with the installed and operating AMI system.

Groundwater Well Property (Project#500059) - This project will set aside funding for property acquisition for new groundwater wells. The City has established a target of seven new wells by 2025 per the Groundwater Strategic Plan. The purchase of the properties will occur throughout the project period.

Integrated Resources Plan (Project#500018) - The goal of this planning is to develop a cohesive and implementable Integrated Resource Plan (IRP) for providing reliable and low-cost utility services to City's residents and businesses. The project also includes the development of a recommended water supply and resources portfolio to 2050.

Cooperative Potable Water Transmission Infrastructure (Project# 500147) - This project provides funding for planning, design, and construction of additional potable water conveyance infrastructure to support reliable water supply delivery to the City of Roseville customers. The project is anticipated to be a joint partnership effort between the City and the Placer County Water Agency (PCWA).

Aquifer Storage and Recovery Well –Design (Project# 500155) -This project designs and constructs a potable water well with aquifer storage and recovery facilities based on recommendations from the Groundwater Strategic Plan.

Aquifer Storage Recovery- Monitoring Wells (Project# 500156) - This project provides funding to construct groundwater monitoring wells based on recommendations from the Groundwater Strategic Plan.

Aquifer Storage and Recovery Wells 9 Westbrook and 18 Solaire (Project# 500157) -This project provides funding for the construction of potable water wells with aquifer storage and recovery facilities based on recommendations from the Groundwater Strategic Plan.

								\$42,177,436		

Traffic Mitigation Fee Project Descriptions

Cirby Way and Roseville Rd (Project# 400001) - This project will smooth out the "S" curve on Roseville Road.

Washington and Andora Widening (Project#400015) - This project provides funding for widening Washington Blvd from two lanes to four lanes from Sawtell to Diamond Oaks, including widening the Andora Underpass beneath the UPRR tracks. Phase one of the project is currently under construction.

Blue Oaks Pleasnt Grove CMS (Project# 400057) - This project began as a CIP to add Changeable Message Signs (CMS) to Blue Oaks Blvd and Pleasant Grove Blvd. The Blue Oaks CMS was ultimately constructed as a mitigation measure for another project, and the Pleasant Grove CMS was finalized and constructed with another signal projects (500171). Any minimal charges in this CIP would be 100% TMF in association with beginning those two CMS projects.

Roller Compacted Concrete Plt (Project# 400097) - This project reconstructed several streets using Roller Compacted Concrete rather than asphalt. The roads included Washington Blvd from Pleasant Grove to Mountain Park Drive, Atkinson Street between Church and Denio Loop, Denio Loop, Hickory Street, between church and Oakland Ave. Additional work included widening of Washington Blvd to accommodate an additional lane for southbound traffic.

City Traffic Model Update (Project# 400189) - This project funds the ongoing model, land use and project updates for the Citywide Traffic Model.

Atl Eureka I80 WB Onramp (Project# 400199) - This CIP was started so that the City could borrow TMF dollars to fund the PA/ED portion of a SPRTA project. The PA/ED portion cost approximately \$600k and the motivation to do it as a TMF-loaned CIP (urgent) was that Caltrans designed and constructed the improvements and saved the SPRTA program approximately \$9M, but was only able to do so if PA/ED was advanced by the City. All dollars spent on this CIP were (or will be) reimbursed back to the TMF fund by SPRTA.

Downtown Pedestrian Safety CV Pilot (Project# 500051) - This project added ped-actuated flashing signs at uncontrolled crosswalks in downtown with CV technology to warn CV-equipped vehicles of the presence of a pedestrian.

Roseville Parkway Extension (Project# 500078) - This project will design and construct the portion of Roseville Parkway between Washington & Foothills, including the bridge over UPRR and Industrial.

Pleasant Grove Boulevard Widening Project (Project#500115) - This project provides funding to widen Pleasant Grove Boulevard from two lanes to three lanes in each direction into the center median, from Foothills Boulevard west to Woodcreek Oaks Boulevard. Construction is anticipated to begin in FY2022-23 and extend through FY2024-25.

Westbrook Bl Payson Ave-Octave Ave Intersection imp and Pleasant Grove CM (Project# 500171) - This project constructed a new traffic signal at Westbrook and Octave/Payson, and the CMS on PG Blvd.

Neighborhood and Community Park Fees Project Descriptions

Park Site 56 Gibson Park (Project# 400004) - This is a citywide park site at Roseville Parkway and Gibson Drive. It will be developed as a sports courts complex. The current plan shows 12 lighted pickle ball courts, 10 lighted tennis courts and 3 lighted basketball courts. Phase 1 (3-6 pickle ball courts) is currently out to bid.

NC 57 Neighborhood Park (Project# 400067) - This is a small neighborhood park site off of Antelope Creek Drive. A fenced off-leash dog park is being developed at this site. Improvements at the park site includes an existing bike trail.

RG Phillips Park (F-52) (Project# 400156) - Design and construct 8.9 acre neighborhood park in West Roseville.

John L. Sullivan Park (WB-51) (Project# 500008) - This is a neighborhood park located at Solaire and Summerhill Drives in the Westbrook area of the City. Improvements to this park includes a shaded picnic area, a children's play area, a foose ball table, corn hole games, a practice disc golf goal, a looped pathway and open turf.

Fiddymment Ranch Open Space Parcel F84 Trail (Project# 500025) - Through a reimbursement agreement with the developer, design and construct a 1/3-mile long extension of the Pleasant Grove Creek Trail within WRSP Parcel F-84 and between Fiddymment Road and Blue Oaks Boulevard to a connection with Regional Park Parcel F-54. This project is funded solely through the WRSP Bike Trail Fee Program and will not require General Funds.

Riego Creek Park F-51 (Project# 500040) - This project provides funding for the construction of an 11.8 acre school site park. The project is currently in the public outreach phase, and amenities have not been determined. However, those being considered include baseball and softball fields, restrooms, a covered children's play area, and a large group picnic area.

W-50C Neighborhood Park (Project# 500042) - This project funds the design and construction of a 1.5-acre neighborhood park at Garland at Telluride. Amenities include a shaded picnic area, a children's play area, a half-court for basketball, bocce ball courts, a tricycle track, and walkways.

John Byouk Park - JM-50 (Project# 500100) - This project provides funding for the construction of a 7.73-acre school park site. The project is currently in the public outreach phase, and amenities have not been determined. However, those being considered include baseball and soccer fields, restrooms, a children's play area, and a large group picnic area.

W-50D Neighborhood Park (Project# 500101) - This project provides funding for the construction of a 1.2-acre neighborhood park site located in West Roseville, phase 4 of Garland at Campanella. The project is currently in the public outreach phase, and amenities have not been determined. However, those being considered include a children's play area and a picnic area.

Solaire Park – WB-50 (Project# 500102) - This project provides funding for the design and construction of a 9.6-acre school park in the Sierra Vista Specific Plan area. The park amenities include a ballfield, off-street parking, children's play area, shaded picnic and looped pathways. The construction is anticipated to begin in Spring/Summer 2022.

SVSP JMC Ph 1 and Ph 2 Bike Trails (Project# 500216) - This project is for 1/3 mile multi-use trail construction beginning at Fiddymont Road and heading west through Sierra Vista Specific Plan per the approved Development Agreement with John Mourier Construction, Inc.

Fiddymont Ranch Phase 4 Trail (Project# 500222) - This project has several trail segments: a 3,120' segment of trail will link the WRSP paseo/trail system at Hayden Parkway to the future Creekview Specific Plan trail system; a 360' segment of trail adjoining WRSP Parcel F-13, with a connection from the existing trail at Chico Drive to the future Placer Parkway; a 1,250' segment along the south edge of Cumberland Drive from Bev Bos Park to a bridge crossing of Pleasant Grove Creek; and a 560' segment will connect to an existing sewer maintenance road south of WRSP Parcel F-8D which will facilitate a bicycle/pedestrian connection to Hayden Parkway.

JM-51 Neighborhood Park (Project# 500289) - This project provides funding for a 2.62-acre neighborhood park. Typical features of a neighborhood park include a children's play area, a shaded picnic area, looped pathways, among other features. This project is forecasted to begin in FY2024-25.

JM-52 Neighborhood Park (Project# 500290) - This project provides funding for a 2.62-acre neighborhood park. Typical features of a neighborhood park include a children's play area, a shaded picnic area, looped pathways, among other features. This project is forecasted to begin in FY2024-25.

City-wide Park Fee - (Although Park fees were adopted pre-AB1600, they are still being included in this report.)

*Transfer in for capital: \$614,351 Transfer out: \$380,031 for loan principal payment to Fleet Replacement Fund 4005-Loan Purpose: The purpose of this loan is to provide funding for the Harry Crabb Park project. The Citywide Park Fund will repay the loan from moneys it receives from the Roseville Finance Authority (RFA) 2017A savings (Interest rate FY22: 1.37%); Loan matures 6/30/26.										

City-wide Park Fee Project Descriptions

Park Site 56 Gibson Park (Project# 400004) – This project provides funding to construct a 12.5 acre city-wide park focused on sports, including lighted basketball, tennis, and pickle ball courts.

Harry Crabb Park (Project# 400007) - Current phase is for the planning and construction of park amenities, which includes two baseball fields, a soccer field, a splash pad water feature, a group picnic area, a basketball court, two tennis courts, two pickle ball courts, two bocce ball courts, a restroom and expansion of an off-street parking lot.

WRSP Community Center & Pistachio Regional Park (F-56) (Project# 400019) - Design and construct phase I of this Citywide park. Phase I consists of 2 softball fields, 1 baseball field, parking lot and potentially a restroom.

Sports Park Complex (Project# 400068) - Sports complex at Blue Oaks Blvd/Phillip Road/Hayden Parkway. Current phase is for the planning of amenities, which may include multiple lighted synthetic long fields, restrooms, storage facilities, children's playground area(s), shaded picnic area(s), and pedestrian pathway through landscaped area. Scope is dependent on funding availability.

Denio Family Park (Parcel F-54) (Project# 400118) – Design and construction of park.

Central Park-Phase III (Project# 500076) - Improvements to Central Park.

Maidu Fitness Pods (Project#700027) – This project provides funding to add fitness pods at Maidu Regional Park.

Public/Community Benefit Fee Project Description

East Radio Site Relocation (Project# 400126) - The City's current east radio site has many limitations including emergency power, coverage, capacity and a risky building lease status. These limitations increase the level of risk to provide clear and reliable communications in East Roseville. This CIP is designed to relocate the site to a location that will provide for sustainable high levels of communication services.

Westpark Drive Extension (Project# 500071) - This project provides funding for the construction of Westpark Drive extension up to Blue Oaks Boulevard via reimbursement agreements with developers.

Land Purchase for Sports Park Complex (Project# 500221) – Purchase of land for Sports Park Complex site.

Attachment 1:
Fee Ordinances, Resolutions and
Development Agreements

Drainage Fees:

Pleasant Grove/Curry Creek Watershed Drainage Mitigation Fee

Ordinance No. 5933

Dry Creek Watershed Drainage Mitigation Fee

Ordinance No. 2617

ORDINANCE NO. 5933

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE AMENDING SECTIONS
4.48.020, 4.48.050, 4.48.070 AND 4.48.140 OF CHAPTER 4.48 OF TITLE 4 OF THE
ROSEVILLE MUNICIPAL CODE REGARDING PLEASANT GROVE/CURRY CREEK
WATERSHED DRAINAGE MITIGATION FEE

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. Section 4.48.020 of Chapter 4.48 of Title 4 of the Roseville Municipal Code is hereby amended to read as follows:

4.48.020 Definitions.

The following words are defined for purposes of this chapter as follows:

A. “Building permit” means the permit issued or required by the city for construction of any structure pursuant to and as defined by the building code.

B. “Capital improvement program” means that list of proposed drainage facilities, improvements, or infrastructure totaling \$23,576,744.69 (in 2017 dollars) included in the study.

C. “Department” means the department of development services.

D. “Director” means the director of the department.

E. “Facilities” means those public drainage facilities or infrastructure shown and included on the capital improvement program.

F. “Fee” or “drainage mitigation fee” means the fee established by this chapter. The fee shall be collected prior to the approval of any building permit. The fee shall be used solely to finance the facilities.

G. “Improvement plan” means a site plan of property proposed for development showing all required improvements that must be approved by the city prior to the issuance of a building permit for the property.

H. “Study” means the reports entitled “Pleasant Grove/Curry Creek Watershed Mitigation Fee Report Amended Hydrology Project Report for Fee Revisions” dated May 2017 by Civil Engineering Solutions, Inc. The study is on file in the offices of the director and the city clerk.

I. “Drainage mitigation fund” means that special interest-bearing fund established pursuant to Section 4.49.030.

SECTION 2. Section 4.48.050 of Chapter 4.48 of Title 4 of the Roseville Municipal Code is here amended to read as follows:

4.48.050 Watershed and soil boundaries.

The boundaries of the Pleasant Grove and Curry Creek watershed are established as shown on Exhibit PG-2 within the Study entitled “PGWMF Land Use Areas Contributing to Impact” dated March 2017 which is on file in the office of the city clerk and the director and is incorporated herein by this reference.

SECTION 3. Section 4.48.070 of Chapter 4.48 of Title 4 of the Roseville Municipal Code is hereby amended to read as follows:

4.48.070 Drainage mitigation fee.

The fee within the Pleasant Grove and Curry Creek watersheds shall be:

Land Use Category	Fees
Low Density Residential (LDR): less than 7 units/acre	\$494.93/unit
Medium Density Residential (MDR): 7 to 12.9 units/acre	\$494.93/unit
High Density Residential (HDR): 13 units/acre or higher	\$408.23/unit
Neighborhood Commercial (NC)	\$6,423.12/acre
Community Commercial (CC)	\$6,423.12/acre
Regional Commercial (RC)	\$6,423.12/acre
Business Professional (BP)	\$6,423.12/acre
Light Industrial (LI)	\$6,423.12/acre
General Industrial (IND)	\$6,423.12/acre

SECTION 4. Section 4.48.140 of Chapter 4.48 of Title 4 of the Roseville Municipal Code is hereby amended to read as follows:

4.48.140 Inflationary adjustments.

The Construction Cost Index (CCI) inflationary fee adjustment shall become effective July 1, 2013. The fee established by this chapter shall be adjusted annually July 1st beginning on July 1, 2018 by a percentage equal to the adjustment rate for the prior year for construction costs as determined by the director in the preceding June. The director's determination shall be based upon averaging the Construction Cost Index (CCI) for 20 cities and for San Francisco, as published in the Engineering News Record publication for the preceding 12 months ending in May. The resultant fee shall be rounded to the nearest dollar figure.

SECTION 5. This ordinance shall be effective at the expiration of thirty (30) days from the date of adoption.

SECTION 6. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

PASSED AND ADOPTED by the Council of the City of Roseville this 7th day of February, 2018, by the following vote on roll call:

ORDINANCE NO. 2617

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE
ADDING CHAPTER 4.49 TO TITLE 4 OF THE ROSEVILLE
MUNICIPAL CODE, RELATING TO THE DRY CREEK
WATERSHED DRAINAGE MITIGATION FEE

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1: Chapter 4.49 is hereby added to Title 4 of the Roseville Municipal Code to read as follows:

CHAPTER 4.49

DRY CREEK WATERSHED DRAINAGE MITIGATION FEE

4.49.010 Purpose.

The City Council finds and declares that the purpose of this chapter is as follows:

A. The General Plan of the City requires that the city be provided, in a time frame related to its development, with an adequate level of drainage infrastructure so as to not adversely impact other areas.

B. New development, and the expansion of existing development, within the City imposes a burden on the creeks and drainage infrastructure within the Dry Creek watershed by adding additional impervious surface, thereby adding more runoff and changing discharge rates. This creates a need for new drainage infrastructure and improvements. Such burdens may vary by the type of land use and location within the City. Some of the worst impacts imposed by development are on properties located within the Dry Creek watershed downstream from the City, where additional runoff poses a threat to severe flooding and is a danger to life and property.

C. Analysis of the land use expected at buildout of the City pursuant to the General Plan and Specific Plans make it possible to estimate the amount of additional runoff generated by different types of land use, to analyze the drainage infrastructure or facilities necessary to mitigate that runoff, and to determine which land uses will require which portions of such infrastructure. It is therefore possible to charge a fee, based on land use and location, which equitably shares the burden of providing drainage infrastructure or facilities within the Dry Creek watershed among those who will create the need for them. It is the intent of this chapter to create such a fee without generating any surplus to the general fund. It is the further purpose of the chapter to implement the General Plan and Specific Plans by assuring that adequate public facilities are financed and provided to serve the City.

D. The Fee established by this chapter has been calculated in the manner set forth in the Study so as to pay for those Facilities listed in the Capital Improvement Program.

E. The Fee established by this chapter is in addition to any other fees or charges required by law as a condition of development.

F. The Fee established by this chapter is to be collected for public improvements and facilities for which an account has been established and funds appropriated, and for which a proposed construction schedule has been adopted.

G. That the failure to impose conditions and regulations of this chapter relating to payment of the Fee on building permits would jeopardize both residents of the community and those outside the community within the Dry Creek watershed, in that it would permit construction to proceed without adequate drainage infrastructure or means of financing said infrastructure.

H. The requirement of this chapter to pay the Fee is necessary in order to assure compliance with the applicable Zoning Ordinance, Specific Plans, and General Plan requirements for the infrastructure funded by this chapter.

I. That for a period of greater than 10 days prior to adoption of this chapter, data has been available to the public and to developers and their representatives indicating the cost or estimated cost of all the infrastructure to be funded, the revenue sources anticipated, and the means of sharing these costs.

J. That the City Council has considered the effect of the Fee imposed by this chapter with respect to the housing needs of the City as a whole and of the region, particularly as required by the Housing Element of the General Plan, and the City Council finds that this chapter does not unduly adversely affect the City's ability to provide such needs.

K. That the establishment of the Fee is for the purpose of obtaining funds for capital projects, necessary to maintain service required by the General Plan within existing service areas and existing portions of the City which are developed or for which land use has already been granted.

4.49.020 Definitions.

The following words are defined for purposes of this chapter as follows:

A. "Building Permit" means the permit issued or required by the City for construction of any structure pursuant to and as defined by the Building Code.

B. "Capital Improvement Program" means that list of proposed drainage facilities, improvements, or infrastructure totaling \$5,248,700 (in 1991 dollars, Roseville projects only) included in the Study.

C. "Department" means the Department of Public Works.

D. "Director" means the Director of the Department.

E. "Facilities" means those public drainage facilities or infrastructure shown and included on the Capital Improvement Program.

F. "Fee" or "Drainage Mitigation Fee" means the Fee established by this chapter. The Fee shall be collected prior to the approval of any building permit. The Fee shall be used solely to finance the Facilities.

G. "Improvement Plan" means a site plan of property proposed for development showing all required improvements that must be approved by the City prior to the issuance of a Building Permit for the property.

H. "Study" means both the report entitled "Dry Creek Watershed Flood Control Plan" dated April 1992 by James M. Montgomery Consulting Engineers, and the report of the Director entitled "Adoption of Interim Dry Creek Watershed Flood Control Plan and Drainage Mitigation Fee" dated June 4, 1992, taken together. The Study is on file in the Offices of the Director and the City Clerk.

I. "Dry Creek Drainage Mitigation Fund" means that special interest-bearing fund established pursuant to Section 4.49.030.

4.49.030 Establishment and Administration of Dry Creek Drainage Mitigation Fund.

The Finance Director is hereby directed to establish a special interest-bearing fund entitled the Dry Creek Drainage Mitigation Fund. All Fees collected pursuant to this chapter shall be deposited in the Dry Creek Drainage Mitigation Fund and expended solely to finance the Facilities.

4.49.040 Payment of Drainage Mitigation Fee.

Except as otherwise provided by this chapter, the Fee imposed pursuant to this chapter shall be paid at or prior to the issuance of any Building Permit within the Dry Creek Watershed. Calculation of the Fee shall be determined in accordance with the Study and this chapter depending upon where within the City development occurs, the type of development, and the extent of development.

4.49.045 Payment of Drainage Mitigation Fee Where Building Permits are not Issued by the City.

Where Building Permits are issued by an individual or agency other than the City, the Fee imposed pursuant to this chapter shall be paid at or prior to a request for electric, water, or sewer service, whichever is first. The fee shall be calculated in the same manner as any other Fee imposed pursuant to this chapter.

4.49.050 Watershed and Subarea Boundaries.

The boundaries of the Dry Creek Watershed and its subareas are hereby established as shown on that certain map entitled Dry Creek Watershed Subarea Map which is on file in the Office of the City Clerk and the Director and is incorporated herein by reference.

4.49.060 [Reserved]

4.49.070 Drainage Mitigation fee -- Main Stem.

The Fee in that portion of the Dry Creek Watershed which is in the Main Stem subarea shall be:

<u>Land Use Category</u>	<u>Amount of Fee</u>
Commercial, Industrial, or other	\$1,125.00/acre
High-density Residential (More than 4.0 units per acre)	\$94.00/unit
Low-density Residential (4.0 or less units per acre)	\$148.00/unit

4.49.080 Drainage Mitigation fee -- Antelope Creek.

The Fee in that portion of the Dry Creek Watershed which is in the Antelope Creek subarea shall be:

<u>Land Use Category</u>	<u>Amount of Fee</u>
Commercial, Industrial, or other	\$1,350.00/acre
High-density Residential (More than 4.0 units per acre)	\$113.00/unit
Low-density Residential (4.0 or less units per acre)	\$274.00/unit

4.49.090 Drainage Mitigation fee -- Miner's Ravine.

The Fee in that portion of the Dry Creek Watershed which is in the Miner's Ravine subarea shall be:

<u>Land Use Category</u>	<u>Amount of Fee</u>
Commercial, Industrial, or other	\$1,699.00/acre
High-density Residential (More than 4.0 units per acre)	\$142.00/unit
Low-density Residential (4.0 or less units per acre)	\$508.00/unit

4.49.100 Drainage Mitigation fee -- Strap Ravine.

The Fee in that portion of the Dry Creek Watershed which is in the Strap Ravine subarea shall be:

<u>Land Use Category</u>	<u>Amount of Fee</u>
Commercial, Industrial, or other	\$1,277.00/acre
High-density Residential (More than 4.0 units per acre)	\$106.00/unit
Low-density Residential (4.0 or less units per acre)	\$215.00/unit

4.49.110 Drainage Mitigation fee -- Linda Creek North.

The Fee in that portion of the Dry Creek Watershed which is in the Linda Creek North subarea shall be:

<u>Land Use Category</u>	<u>Amount of Fee</u>
Commercial, Industrial, or other	\$1,215.00/acre
High-density Residential (More than 4.0 units per acre)	N/A

Low-density Residential (4.0 or less units per acre)	\$163.00/unit
---	---------------

4.49.120 Drainage Mitigation fee -- Linda Creek South.

The Fee in that portion of the Dry Creek Watershed which is in the Linda Creek South subarea shall be:

<u>Land Use Category</u>	<u>Amount of Fee</u>
Commercial, Industrial, or other	\$1,371.00/acre
High-density Residential (More than 4.0 units per acre)	\$114.00/unit

Low-density Residential (4.0 or less units per acre)	\$194.00/unit
---	---------------

4.49.130 Drainage Mitigation fee -- Secret Ravine.

The Fee in that portion of the Dry Creek Watershed which is in the Secret Ravine subarea shall be:

<u>Land Use Category</u>	<u>Amount of Fee</u>
Commercial, Industrial, or other	\$1,427.00/acre
High-density Residential (More than 4.0 units per acre)	\$119.00/unit

Low-density Residential (4.0 or less units per acre)	\$311.00/unit
---	---------------

4.49.140 Reserved.

4.49.150 Existing Development.

No Fee pursuant to this chapter shall be charged for already existing development or for projects which rebuild or remodel without increasing the impervious area, except as provided in this section.

Where any development or project expands or remodels, it shall be charged the appropriate Fee as provided by Sections 4.49.050 through 4.49.140; provided, however, that the Fee shall be calculated only as to that portion of the development or project which is expanded or remodeled.

4.49.160 Fee Adjustments.

A. A developer of any project subject to the Fee established by this chapter may apply to the Director for a reduction or adjustment to the Fee based on the absence of any reasonable relationship or nexus between the impacts of the project and either the amount of the Fee or the Facilities to be financed by the Fee. The application shall be made in writing and filed with the Director not later than twenty (20) calendar days after notification of the amount of the Fee. The application shall state in detail the factual basis for the claim of reduction or adjustment and the amount of the proposed reduction or adjustment. The Director shall consider the application and render his decision in writing not later than forty-five (45) calendar days after the filing of the Fee adjustment request. Any person aggrieved by the decision of the Director may, within twenty (20) calendar days thereafter, appeal the decision in writing to the City Council by filing an appeal with the City Clerk. The City Council shall consider such appeals within forty-five (45) calendar days after filing. The decision of the City Council shall be final. No Building Permit shall be considered final or complete for purposes of the Permit Streamlining Act (Government Code Section 65920, et seq.), or any other purpose, until a final decision pursuant to this section has been made.

B. Notwithstanding the provisions of Subsection A, a project proponent or applicant may pay the Fee "under protest" and receive a Building Permit. Provided, however, that the application for reduction or adjustment shall thereafter be filed within ten (10) calendar days or any objection shall be deemed waived. If a reduction or adjustment is received after payment pursuant to this subsection is made, a refund to the applicant shall be made of that amount by which the Fee is reduced or adjusted.

C. The project proponent or applicant applying for a reduction or adjustment shall have the burden of proof, by a preponderance of the evidence, that a reasonable relationship or nexus is lacking between the Fee, or the Facilities to be financed by the Fee, and the particular project.

D. In the event of any reduction or adjustment in the Fee granted pursuant to this section, any later change in the use, zoning, or land use designation for the property involved shall subject the then owner to payment of the then applicable Fee for new uses, zoning, or land use designation, whether or not a Building Permit is required.

4.49.170 Inflationary Adjustments.

The Fee established by this chapter shall automatically be adjusted on January 1 of each calendar year by a percentage equal to the inflation rate for the prior year for construction costs as determined by the Director on December 1 of each calendar year. The Director's determination shall be based on the

Engineering News Record, Construction Cost Index for the calendar year as of December 1.

Further the Director shall, during the first meeting in February of every odd-numbered year beginning in 1993, report to the City Council as to the inflation of land costs in the area where the Facilities are intended to be constructed. The council shall at that time adjust the Fee for such inflation.

4.49.180 Adoption in Compliance.

When monies in the Dry Creek Drainage Mitigation Fund are disbursed for use, the Fees shall be used to finance the Facilities. To the extent sufficient Fees are available, all Facilities financed by the Fees shall be constructed or acquired in accordance with the priorities established in the Capital Improvement Program.

4.49.190 Chapter is Severable.

If any provision of this chapter or the application thereof to any person or circumstance held invalid, such invalidity shall not affect the other provisions of this chapter which can be given effect without the invalid provision or its application, and to this end the provisions of this chapter are severable.

SECTION 2. This ordinance shall be effective at the expiration of sixty (60) days from the date of adoption.

SECTION 3. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

PASSED AND ADOPTED by the Council of the City of Roseville this 1st day of July, 1992, by the following vote on roll call:

Ordinance No. 6290

ORDINANCE NO. 6290

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE AMENDING SECTIONS 4.52.050, 4.52.060, 4.52.070, 4.52.080 and 4.52.090, OF CHAPTER 4.52 OF TITLE 4 OF THE ROSEVILLE MUNICIPAL CODE REGARDING PUBLIC FACILITIES FEES

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. Section 4.52.050 of Chapter 4.52 of Title 4 of the Roseville Municipal Code is hereby amended to read as follows:

4.52.050 Public facilities fee—Residential.

Effective January 4, 2021, the fee for residential development shall be:

Low density residential (LDR) shall be \$3,528.00 per dwelling unit;

Medium density residential (MDR) shall be \$3,266.00 per dwelling unit;

Single-family age-restricted shall be \$2,352.00 per dwelling unit.

SECTION 2. Section 4.52.060 of Chapter 4.52 of Title 4 of the Roseville Municipal Code is hereby amended to read as follows:

4.52.060 Public facilities fee—Commercial and unspecified development.

Effective January 4, 2021, the fee for commercial or unspecified development shall be \$0.66 per square foot of structure.

SECTION 3. Section 4.52.070 of Chapter 4.52 of Title 4 of the Roseville Municipal Code is hereby amended to read as follows:

4.52.070 Public facilities fee—Industrial.

Effective January 4, 2021, the fee for light industrial development shall be \$0.44 per square foot of structure and for general industrial the fee shall be \$0.27 per square foot of structure.

SECTION 4. Section 4.52.080 of Chapter 4.52 of Title 4 of the Roseville Municipal Code is hereby amended to read as follows:

4.52.080 Public facilities fee—Business/professional.

Effective January 4, 2021, the fee for business/professional and central business district development shall be \$0.89 per square foot of structure.

SECTION 5. Section 4.52.090 of Chapter 4.52 of Title 4 of the Roseville Municipal Code is hereby amended to read as follows:

4.52.090 Public facilities fee—Multifamily-HDR and HDR-age restricted.

Effective January 4, 2021, the fee for multifamily development shall be \$2,352.00 per dwelling unit. Effective January 4, 2021, the fee for multifamily age restricted development shall be \$1,959.00 per dwelling unit.

SECTION 6. This ordinance shall be effective at the expiration of thirty (30) days from the date of adoption.

SECTION 7. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

Ordinance No. 6100

ORDINANCE NO. 6100

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE AMENDING SECTION 9.12.100 OF CHAPTER 9.12 OF TITLE 9, AMENDING SECTIONS 14.08.025, 14.08.090, 14.08.091, AND 14.08.100 OF CHAPTER 14.08 OF TITLE 14, DELETING SECTION 14.08.091 OF CHAPTER 14.08 OF TITLE 14, AND AMENDING SECTIONS 14.16.060, 14.16.080, 14.16.200 AND 14.16.201 OF CHAPTER 4.16 OF TITLE 14 OF THE ROSEVILLE MUNICIPAL CODE REGARDING GARBAGE, WATER AND WASTEWATER RATES AND SERVICES

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. Section 9.12.100 of Chapter 9.12 of Title 9 of the Roseville Municipal Code is hereby amended to read as follows:

9.12.100 Charges for collection.

A. Residential.

1. Each and every householder or tenant occupying any dwelling, house, or residence, shall pay to the city, or its authorized agent, a fixed minimum charge as set forth in this section as a refuse fee. Such fixed minimum is based upon service of one call per week, irrespective of whether there is any refuse to remove from any premises.

2. Ninety-Gallon Automated Container Service. For each premises assigned city-owned 90-gallon containers (one for household garbage and one for yard clippings and green waste) and serviced by automated collection, all garbage, and green waste for collection must be contained within the 90-gallon container(s) with the lid closed and must fall freely from container when dumped. Each such premises shall be provided weekly collection for trash; green waste will be collected every other week.

3. Refuse service may be discontinued upon request for a period of no less than two months when a dwelling, house, or residence will be unoccupied. The minimum time of discontinuing service will be two months. A service charge equal to two months' refuse charge will be charged to the utility user for the removal and redelivery of the assigned automated container when service has been temporarily discontinued. This service charge will be paid at the time service is discontinued. Upon occupancy of a dwelling, house or residence, the utility user must contact the city to restart service and will be charged an associated restart fee. If the occupant of a dwelling, house, or residence does not contact the city to restart service, the city may bill back to the discontinuance of service all monthly charges.

4. For collection of additional containers beyond those covered by the fixed minimum charges established in this chapter, the collection charge shall be that identified in this section.

5. An additional or special pickup may be requested beyond the minimum service required by this chapter. Each such additional or special pickup shall be subject to a fixed fee.

6. Rates for Residential Collection. Effective July 5, 2019, and July 1, 2020, the residential rates on billings shall be as follows:

Residential Refuse Service	Effective 7/5/2019	Effective 7/1/2020
Fixed refuse monthly charge (one trash container and one green waste container as identified in Section 9.12.100(A)(2))	\$25.57	\$26.85
Additional empty of a 60- or 90-gallon refuse container	\$16.72	\$17.55
Each additional green waste container	\$9.28	\$9.75
Each additional 90-gallon refuse container	\$17.48	\$18.36
Additional empty of a green waste container	\$12.29	\$12.90
Refuse 60- or 90-gallon replacement charge	\$74.69	\$78.42
Fixed fee for the return of a confiscated green waste container due to contamination	\$119.41	\$125.38
Temporary removal of a residential service	\$51.12	\$53.68
Move in box pick-up	\$90.39	\$94.91
Temporary dumpster delivery and removal and per yard charge (6 yards only)	\$125.30	\$131.56

Residential Special Services	Effective 7/5/2019	Effective 7/1/2020
Restart Service (per occurrence)	\$25.00	\$26.25
Green/Waste Contamination Fee (per occurrence)	\$25.00	\$26.25
Overloaded Cart (per occurrence)	\$10.00	\$10.50
Return Trip Charge Same day (per occurrence)	\$10.00	\$10.50
Return Trip Charge Off day (per occurrence)	\$25.00	\$26.25
Cart Exchange (in excess of 1x/12 months)	\$25.00	\$26.25

B. Commercial.

1. A landlord, property owner, or property manager or management company of each and every store, shop, apartment, house, rooming house, factory or other nonresidential use that has a commercial dumpster shall pay to the city, or its authorized agent, a fixed minimum charge as set forth by the city council as a refuse fee. Such fixed minimum is based upon service of one call per week, irrespective of whether there is any refuse to remove from any premises.

A landlord, property owner, property manager or management company with multiple tenants who must share a commercial dumpster shall be responsible for the refuse utility bill of the tenants.

2. Commercial Dumpster, Roll-On, and Additional Services. The environmental utilities director may approve the placing of garbage or rubbish in containers other than 30-gallon cans or 90-gallon automated cans (such as dumpsters or roll-on containers) as provided in Section 9.12.060. The fixed fee and additional service charges are established by subsections (A)(6) and (B)(7). In such cases, the environmental utilities director shall cause a study of the service to be made, and charges will be established based on the cost of performing the service. Such charge shall include all costs to the city, including, but not limited to, labor, equipment operation, maintenance and depreciation, administrative overhead, recycling, landfill closure and landfill operation costs. Standard commercial charges for basic hand-pickup dumpsters and roll-on containers may be established by the environmental utilities director subject to the approval of the city council.

An additional or special pick up may be requested beyond the minimum service required by this chapter. Each such additional or special pick up shall be subject to a fixed fee.

Temporary commercial services must be charged to a City of Roseville customer utility account. A "garbage only" account may be requested for temporary services. See Chapter 14.04 Utility Customer Billing, Accounting and Collections for information about establishing a new account.

Timeframe for temporary customer service. Temporary dumpsters for commercial use must be serviced weekly and removed within a 90 day period. It is the customer's responsibility to schedule services. If a temporary dumpster is not emptied within seven consecutive days of its delivery or last collection, the account shall be assessed a weekly rental fee per Section 9.12.100(B7): Rates for Commercial Collection.

3. Commercial customers that fall into the following categories are required by state law to subscribe to organics recycling services.

a. On and after April 1, 2016, a business that generates eight cubic yards or more of organic waste per week shall arrange for recycling services specifically for organic waste.

b. On and after January 1, 2017, a business that generates four cubic yards or more of organic waste per week shall arrange for recycling services specifically for organic waste.

c. On and after January 1, 2019, a business that generates four cubic yards or more of commercial solid waste, as defined in Section 42649.1, per week, shall arrange for recycling services specifically for organic waste.

4. On or after January 1, 2020, if the department determines that statewide disposal of organic waste has not been reduced to 50 percent of the level of disposal during 2014, a business that generates two cubic yards or more per week of commercial solid waste shall arrange for the organic waste recycling services specified in subsection (B)(3), unless the department determines that this requirement will not result in significant additional reductions of organics disposal.

5. Multifamily dwellings will not be required to recycle food waste, but will need to provide proof to the city that other organics such as green waste are being recycled or diverted from the landfill in an appropriate manner. The city can also provide green waste services, if necessary.

The city will be the primary collector of all organic waste materials, unless a business had services in place before September 28, 2014, the date AB 1826 was approved. Any business with a collection contract before this date can continue with providers until the contract expires. Once the contract expires the business will default to city service.

6. An additional or special pickup may be requested beyond the minimum service required by this chapter. Each such additional or special pickup shall be subject to a fixed fee.

7. Rates for Commercial Collection. Effective July 5, 2019, and July 1, 2020, the commercial rates on billings shall be as follows:

Frontloader and Rearloader Commercial Services*	Effective 7/5/2019	Effective 7/1/2020
Frontloader and rearloader commercial dumpster and sidewalk can per yard charge *Plus premium for rearloader services (more detail below)	\$10.49	\$11.01
Frontloader and rearloader compactor per yard charge	\$18.90	\$19.85
Frontloader cardboard dumpster and compactor per yard charge	\$13.93	\$14.63

Commercial Special Services	Effective 7/5/2019	Effective 7/1/2020
Rear Loader Service Premium (this will be an additional charge equivalent to an associated percentage of the monthly base rate)	25%	25%
Recyclable Material Contamination Fee (per occurrence)	\$25.00	\$26.25
Green/Waste Contamination Fee (per occurrence)	\$25.00	\$26.25
Overloaded Container (per occurrence)	\$25.00	\$26.25
Lock Service – Admin Set up (per occurrence)	\$15.00	\$15.75
Lock Service – Lock Cost (per occurrence)	\$15.00	\$15.75
Lock Service – Per Month	\$10.00	\$10.50
Push/Pull Charges (per container month)	\$15.00	\$15.75
Extra Pickup Charge (of monthly rate per pickup + return trip charge)	25%	25%
Exchange Cart (per cart)	\$25.00	\$26.25
Exchange Bin (per occurrence)	\$75.00	\$78.75
Return Trip Charge Same day (per occurrence)	\$10.00	\$10.50
Return Trip Charge Off day (per occurrence)	\$25.00	\$26.25

Additional Commercial Service Rates	Effective 7/5/2019	Effective 7/1/2020
Roll-Off Return Charge (per occurrence)	\$30.00	\$31.50
Relocation Charge/Trip Charge(per event – includes roll-off return charge)	\$50.00	\$52.50

Roll-Off Commercial Open Top and Compactor Services*	Effective 7/5/2019	Effective 7/1/2020
Minimum charge per haul (base rate) without tonnage* All sizes	\$312.43	\$328.05
Roll-off 100% recycling bin	\$171.08	\$179.63

* Tonnage charges (tipping fees) vary by material type, and are determined by the Western Placer Waste Management Authority. With city department head approval, some entities may pay tonnage charges directly to Western Placer Waste Management Authority.

Temporary Frontloader, Rearloader and Roll-Off Charges*	Effective 7/5/2019	Effective 7/1/2020
Frontloader and rearloader temporary dumpster delivery and removal charge	\$62.38	\$65.50
Frontloader and rearloader temporary dumpster per yard charge (plus trip fee for extra pickups)	\$10.49	\$11.01
Frontloader and rearloader temporary dumpster rental fee per week	\$59.38	\$62.35
Roll-off temporary dumpster minimum charge per haul (base rate)	\$312.43	\$328.05
Tonnage (per ton charge)*		
Roll-off temporary dumpster rental fee per week	\$107.82	\$113.22
Roll-Off temporary 100% recycling bin	\$171.08	\$179.63

* Tonnage charges (tipping fees) vary by material type, and are determined by the Western Placer Waste Management Authority.

Additional Commercial Service Rates*	Effective 7/5/2019	Effective 7/1/2020
Standby service charge per occurrence (in 15 minute increments)	\$60.00	\$63.00
Solid Waste Minimum Charge	\$28.68	\$30.11
Emergency after hours call out service charge per occurrence	\$161.46	\$169.53
Fixed monthly minimum commercial charge	\$28.68	\$30.11
60- or 90-gallon automated container monthly charge	\$25.57	\$26.85
Commercial bin assistance charge per occurrence	\$45.17	\$47.43
Fixed fee for additional pick-up of a city owned 60- or 90-gallon automated container	\$16.72	\$17.55
Compactor cleaning	Minimum 2.5 hours labor cost	
Compactor lock replacement	0.5 hours of labor cost plus \$8.00 lock replacement	

* The amounts billed to commercial customers will vary with the types of service and the number of pickups in a billing period.

** Green waste containers available only in limited areas.

A. Shared Compactor Rates. Shared compactor rates are applicable to the City of Roseville downtown specific plan area. Exact rates are determined on a site-specific basis based on the following criteria:

	Cost per 1,000 square feet of building area or per dwelling unit	Cost per 1,000 square feet of building area or per dwelling unit	
	Effective 7/5/2019	Effective 7/1/2020	
Below are the square footage rates for shared compactors. If a customer's site-specific charge does not exceed the fixed minimum charge, they will be subject to the monthly fixed minimum charge.			

Monthly Minimum (Fixed)	\$28.68	\$30.11	
Tier 1: Cost per 1,000 square feet of building area or per dwelling unit	\$5.99	\$6.28	Tier 1 includes business types that are determined low use by the environmental utilities director. Typical examples of low use are retail and office establishments and small apartment units.
Tier 2: Cost per 1,000 square feet of building area	\$24.16	\$25.37	Tier 2 includes business types that are determined medium use by the environmental utilities director. Typical examples of medium use are relatively smaller establishments such as bars and grills, coffee shops and delis; selling or serving food but not considered a full-service restaurant.
Tier 3: Cost per 1,000 square feet of building area	\$51.04	\$53.59	Tier 3 includes business types that are determined high use by the environmental utilities director. A typical example of high use is full-service restaurants, restaurant/bakeries, and similar establishments. Full-service restaurants are defined as primarily dine-in establishments with established menus, and a minimum of two meals per day (e.g., lunch and dinner).

B. Shared Compactor Organic Tiers. Organics tiers are applicable to some shared compactor units depending on compactor tier and usage type. Exact rates are determined on a site-specific basis based on the following criteria:

Commercial Shared Compactor Organic Tiers	Effective 7/5/2019	Effective 7/1/2020
Tier 1	\$0.00	\$0.00
Tier 2	\$81.93	\$86.03
Tier 3	\$163.81	\$172.00

C. Rates for Commercial Organic Waste Collection. Effective July 5, 2019 and July 1, 2020, the commercial organic waste collection rates on billings shall be as follows:

Organic Waste Collection Rates	Minimum Monthly Charge (Effective 7/5/2019)	Minimum Monthly Charge (Effective 7/1/2020)
0-2 yards	\$81.93	\$86.03
0-4 yards	\$163.81	\$172.00
5 yards	\$204.77	\$215.01
6 yards	\$245.69	\$257.97
7 yards	\$286.77	\$301.10
8 yards	\$327.62	\$344.00
9 yards	\$368.53	\$386.96
10 yards	\$409.49	\$429.96
11 yards	\$450.57	\$473.09
12 yards	\$491.37	\$515.94
Extra pickup for one yard bin or cart equivalent	\$61.45	\$64.52
Extra pickup for two yard bin or cart equivalent	\$81.93	\$86.03

SECTION 2. Section 14.08.025 of Chapter 14.08 of Title 14 of the Roseville Municipal Code is hereby amended to read as follows:

14.08.025 Water connection fees.

A. In order that appropriate provision be made for sharing the costs of the maintenance and expansion of the raw water supply, water treatment, storage, and distribution facilities of the city by those who receive the benefits thereof, there are established connection fees to such facilities, which fees shall be imposed in addition to the service connection costs charged pursuant to Section 14.08.020. Such additional water connection fees include a “standard connection fee” and an “irrigation connection fee.” The fees shall be set so that they are equal to, but not greater than, the cost of service.

B. The water connection fees shall be based upon the applicable “dwelling unit equivalent” (“DUE”) and density assignment. The fee for one DUE shall be \$9,363.00 (per LDR unit), \$5,618.00 (per MDR unit), \$3,636.00 (per HDR unit) and \$9,363.00 (per Non Residential unit) on July 1, 2018.

C. The connection fee amount set forth above shall be adjusted annually on July 1st of each year by three percent or by a percentage equal to the inflation rate for the prior year for construction costs as determined by the environmental utilities director in the preceding June, whichever is greater. The director’s determination of the percentage equal to the inflation rate for the prior year for construction costs shall be based upon the Engineering News Record, Construction Cost Index for the prior 12 months ending in May. The environmental utilities director shall report the amount of the adjustment in percentage terms and the dollar amount due per DUE to the city council annually at the first regular meeting of the council following the adjustment of the fee.

D. Except as otherwise provided, all water connection fees established by this chapter shall be payable upon issuance of a building permit. Connection fees will be determined using the amount in effect on the date of building permit issuance.

SECTION 3. Section 14.08.090 of Chapter 14.08 of Title 14 of the Roseville Municipal Code is hereby amended to read as follows:

14.08.090 Service charges for metered service.

There shall be due and payable the following monthly charges, upon submission of the bill by the city to the owner of the property supplied with service, for all treated water measured by meters for residential, commercial, industrial and manufacturing or other purposes:

A. Monthly Quantity Rates. Effective July 5, 2019 and July 1, 2020, the monthly quantity rates on billings shall be as follows:

	Effective 7/5/2019	Effective 7/1/2020
Potable water usage (per 100 cubic feet)	\$1.30	\$1.34
Recycled water usage (per 100 cubic feet)	\$0.65	\$0.67

*

B. Monthly Service Charges. Effective July 5, 2019 and July 1, 2020, the monthly service charges on billings shall be as follows:

Meter Size (inches)	Peak Flow Rate (gallons per minute)	Effective 7/5/2019	Effective 7/1/2020
Up to 3/4	30	\$27.26	\$28.08
1	50	\$42.07	\$43.34
1-1/2	100	\$79.09	\$81.47
2	160	\$123.51	\$127.22
3	350	\$264.20	\$272.13
4	630	\$471.52	\$485.67
6	1300	\$967.61	\$996.64
8	2800	\$2,078.26	\$2,140.61
10	4200	\$3,114.89	\$3,208.31

C. The total amount due and payable shall be the sum of the monthly service charge plus the quantity rate. The monthly service charge is due and payable regardless of whether water has been consumed. The service charge shall be the greater of the charge based on the meter size or flow rate, with the following exceptions:

1. No service charge shall be made for fire service that has backflow prevention with detector check devices approved by the environmental utilities director.

2. No service charge shall be made for recycled water utility back-up systems that are required for reliability only and have backflow prevention and metering approved by the environmental utilities director. This exclusion does not extend to systems that are regularly required as part of normal operation. The recycled water operation shall be responsible for water volumetric charges for these services and any costs associated with meter maintenance.

D. For purposes of charging for treated water measured by meters:

1. A residential account is defined as a single metered water service which serves three or less dwelling units.

2. A nonresidential account is defined as a single metered water service which serves more than three dwelling units, or serves commercial, industrial, manufacturing, irrigation or other nonresidential land uses.

E. For single-family residential services that require automatic fire protection systems pursuant to Section 16.16.120, the increased meter size will not be assessed an additional charge associated with the fire protection system requirement. Service charges shall be based on the required service size as determined by the Uniform Plumbing Code without consideration for any fire protection system required by Section 16.16.120.

SECTION 4. Section 14.08.091 of Chapter 14.08 of Title 14 of the Roseville Municipal Code is hereby deleted in its entirety:

14.08.091 Service charge outside city water service area.

SECTION 5. Section 14.08.100 of Chapter 14.08 of Title 14 of the Roseville Municipal Code is hereby amended to read as follows:

14.08.100 Flat water rates.

The following service charges shall apply to flat rate consumers that the environmental utilities director determines are not cost effective to assign metered rates. The environmental utilities director shall conduct a water use study for consumers whom he or she determines may not be reasonably metered, and the director shall assign such consumers to an appropriate service rate level as set forth in this section. Water service rates for flat rate residential consumers shall be due and payable on a monthly basis according to the appropriate grouping set out in this section.

Effective July 5, 2019, and July 1, 2020, the flat rates on billings shall be as follows:

Nonmetered or Flat Service Charges	Effective 7/5/2019	Effective 7/1/2020
Single-family lots under 4,900 square feet; each mobile home unit not within a park maintaining its own distribution system and service; each dwelling unit of duplexes, triplexes, fourplexes, unmetered apartments and other multiple living units; other detached living units; and offices and stores with less than peak use of 250 gallons per day	\$37.38	\$38.51
Single-family lots 4,901 to 8,900 square feet	\$42.13	\$43.40
Single-family lots 8,901 to 12,000 square feet	\$45.79	\$47.17
Single-family lots 12,001 to 15,000 square feet	\$49.36	\$50.85
Single-family lots existing before July 1, 1977, which are in excess of 15,000 square feet	\$54.36	\$58.16
Mobile home parks, per living unit	34.47	35.51
All those single-family lots over 15,000 square feet, created on or after July 1, 1977, shall be metered pursuant to Section 14.08.105		

SECTION 6. Section 14.16.060 of Chapter 14.16 of Title 14 of the Roseville Municipal Code is hereby amended to read as follows:

14.16.060 Local sewer connection fee.

- A. A local sewer connection fee shall be charged in accordance with Section 14.16.010 for each connection to the city-owned public sewer.
- B. The local sewer connection fee shall be \$363.00 per sewer unit.
- C. The Construction Cost Index (CCI) inflationary fee adjustment shall become effective July 1, 2013. The fee established by this chapter shall be adjusted annually July 1st beginning on July 1, 2013 by a percentage equal to the adjustment rate for the prior year for construction costs as determined by the director in the preceding June. The director's determination shall be based upon averaging the Construction Cost Index (CCI) for 20 cities and for San Francisco, as published in the Engineering News Record publication for the preceding 12 months ending in May. The resultant fee shall be rounded to the nearest dollar figure.

SECTION 7. Section 14.16.080 of Chapter 14.16 of Title 14 of the Roseville Municipal Code is hereby amended to read as follows:

14.16.080 Regional sewer connection fee.

A. A regional sewer connection fee shall be charged in accordance with Section 14.16.010 for each sewer unit connected to the city-owned public sewer.

B. The regional sewer connection fee shall be \$7,854.00.

C. The fee established by this chapter shall be adjusted annually on July 1st by a percentage equal to the adjustment rate for the prior year for construction costs as determined by the director in the preceding June. The director's determination shall be based upon averaging the Construction Cost Index (CCI) for 20 cities and for San Francisco, as published in the Engineering News Record publication for the preceding 12 months ending in May. The resultant fee shall be rounded to the nearest dollar figure.

SECTION 8. Section 14.16.200 of Chapter 14.16 of Title 14 of the Roseville Municipal Code is hereby amended to read as follows:

14.16.200 Monthly unit sewer service charge established.

Except as otherwise provided in this chapter, a monthly unit sewer service charge shall be paid by each user connected to the city-owned public sewer. The monthly unit sewer service charge on billings shall be:

A. The monthly sewer charge shall be \$40.55 per sewer unit, effective on billings as of July 5, 2019, and \$42.18 per sewer unit, effective on billings as of July 1, 2020.

B. The monthly sewer service charges for those located outside of the city limits shall be 10 percent higher than the monthly sewer charges for those located inside city limits.

SECTION 9. Section 14.16.201 of Chapter 14.16 of Title 14 of the Roseville Municipal Code is hereby amended to read as follows:

14.16.201 Sacramento Regional County Sanitation District monthly unit sewer service charge established.

Except as otherwise provided in this chapter, a monthly unit sewer service charge shall be paid by each user connected to the Sacramento Regional County District's sewer system and located within Roseville city limits. Effective July 5, 2019, the monthly sewer charge shall be \$40.55 per sewer unit. Effective July 1, 2020, the monthly sewer charge shall be \$42.18.

SECTION 10. This ordinance shall be effective at the expiration of thirty (30) days from the date of adoption or on July 5, 2019, whichever occurs later.

SECTION 11. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance

to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

PASSED AND ADOPTED by the Council of the City of Roseville, this 15th day of May, 2019, by the following vote on roll call:

Traffic Mitigation Fee

Ordinance 2856

City/County Traffic Mitigation Fee

Ordinance No. 5203

ORDINANCE NO. 2856

ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE
AMENDING SECTIONS 4.44.010, 4.44.020 AND 4.44.120;
REPEALING SECTIONS 4.44.050, 4.44.060, 4.44.070,
4.44.080, 4.44.090 AND 4.44.100; AND REENACTING SECTIONS 4.44.050
AND 4.44.060 OF CHAPTER 4.44 OF TITLE 4 OF THE ROSEVILLE MUNICIPAL
CODE RELATING TO TRAFFIC MITIGATION FEE

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. Sections 4.44.010, 4.44.020, and 4.44.120 of Chapter 4.44 of Title 4 of the Roseville Municipal Code are hereby amended to read as follows:

4.44.010 Purpose.

The City Council finds and declares that the purpose of this chapter is as follows:

A. The General Plan of the City requires that the City be provided, in a time frame related to its development, with an adequate level of traffic and circulation infrastructure so as to maintain "Level of Service C," except where specified otherwise by the City Council in accordance with policies in the General Plan.

B. New development, and the expansion of existing development, within the city imposes a burden on the existing traffic and circulation infrastructure by adding additional traffic and by creating a need for new traffic and circulation infrastructure. Such burdens may vary by type of land use and by the location of the land use within the City.

C. Analysis of the land use expected at certain levels of development of the City pursuant to the General Plan makes it possible to estimate the number of trips generated by different types of land uses, to analyze the traffic and circulation infrastructure or facilities necessary to support those trips, and to determine which land uses will utilize which portions of such infrastructure. It is therefore possible to construct a fee, based on trip generation, which equitably spreads the burden of traffic and circulation infrastructure or facilities to those who will create the need for them and utilize them. It is the intent of this chapter to create such a fee, spreading costs of traffic and circulation infrastructure to those who create the need for such infrastructure, without generating any surplus to the General Fund. It is the further purpose of this chapter to implement the General Plan by assuring that adequate public facilities are financed and provided to serve the City.

D. The fee established by this chapter has been calculated in the manner set forth in the study so as to pay for those facilities listed in the capital improvement program.

E. The fee established by this chapter is in addition to any other fees or charges required by law as a condition of development.

F. The fee established by this chapter is to be collected for public improvements and facilities for which an account has been established and funds appropriated, and for which a proposed construction schedule has been adopted.

G. That the failure to impose the conditions and regulations of this chapter relating to payment of the fee on building permits would jeopardize residents of the community, in that it would permit construction to proceed without adequate infrastructure or means of financing said infrastructure.

H. The requirement of this chapter to pay the fee is necessary in order to assure compliance with the applicable zoning ordinance and general plan requirements for the infrastructure funded by this chapter.

I. That for a period of greater than ten (10) days prior to adoption of this chapter, data has been available to the public and to developers and their representatives indicating the cost or estimated cost of all the infrastructure to be funded, the revenue sources anticipated and the means of spreading these costs.

J. That the City Council has considered the effect of the fee imposed by this chapter with respect to the housing needs of the city as a whole and of the region, particularly as required by the housing element of the general plan, and the city council finds that this chapter does not unduly adversely affect the city's ability to provide for such needs.

K. That the establishment of the fee is for the purpose of obtaining funds for capital projects, necessary to maintain service required by the general plan within existing service areas and existing portions of the City which are developed or for which land use has already been granted.

4.44.020 Definitions.

The following words are defined for purposes of this chapter as follows:

A. "Building Permit" means the permit issued or required by the City for the construction of any structure pursuant to and as defined by the Building Code.

B. "Capital Improvement Program" means that list of traffic and circulation facilities, improvements, or infrastructure for year 200 consistent with that identified in the General Plan and listed in the document entitled "Technical Report for Update of the City of Roseville's Traffic Mitigation Fee," dated January 3, 1995. Said Capital Improvement Program is on file in the Office of the Director and the City Clerk.

C. "Department" means the Department of Public Works/City Engineer.

D. "Director" means the Director of the Department.

E. "Dwelling Unit Equivalents" or "D.U.E.'s" means the number of single family dwellings to which a particular type of development or use is equivalent in terms of expected or estimated p.m. peak hour traffic impact.

F. "Dwelling Unit Equivalent Rates or D.U.E. rates" means multiplication factors used to convert a particular type of development or use to Dwelling Unit Equivalents. D.U.E. rates shall be expressed as the number of D.U.E.'s per unit of a particular use.

G. "Facilities" means those public traffic and circulation facilities, improvements or infrastructure shown and included on the Capital Improvement Program.

H. "Improvement Plan" means a site plan of property proposed for development showing all required improvements that must be approved by the City prior to the issuance of a Building Permit for the property.

I. "Fee" or "Traffic Mitigation Fee" means the Fee established by this Chapter 4.44. The Fee shall be collected prior to the approval and issuance of any Building Permit, or as provided otherwise in this chapter. The Fee shall be used solely to finance the Capital Improvement Program.

J. "Traffic Mitigation Fund" means that special interest-bearing fund established pursuant to Section 4.44.030.

K. "Study" means that certain document entitled "Technical Report for Update of the City of Roseville's Traffic Mitigation Fee," dated January 3, 1995. The Study is on file in the Offices of the Director and City Clerk.

L. "Infill Area: means that portion of the City not within the Northeast, Northcentral, Northwest, or Southeast Roseville Specific Plan Areas, nor within the Del Webb Specific Plan Area or the North Industrial Area.

4.44.120 Existing Development.

No fee shall be charged for already existing development or for projects which rebuild or remodel without increasing the trips generated, except as provided in this section.

A. Where the development or project changes to a different land use, it shall be charged the appropriate fee as provided by Sections 4.44.050 and 4.44.060, less any amount previously paid pursuant to this chapter.

B. Where the development or project expands or remodels the same land use, it shall be charged the appropriate fee as provided by Sections 4.44.050 and 4.44.060; provided, however, that the fee shall be calculated only as to that portion of the development or project which is expanded or remodeled. Where the fee is calculated based upon the number of dwelling units, no fee shall be charged unless at least one additional dwelling unit is added.

SECTION 2. Sections 4.44.050, 4.44.060, and 4.44.070, 4.44.080, 4.44.090 and 4.44.100 of Chapter 4.44 of Title 4 of the Roseville Municipal Code are hereby repealed.

SECTION 3. Sections 4.44.050 and 4.44.060 of Chapter 4.44 of Title 4 of the Roseville Municipal Code are hereby reenacted to read as follows:

4.44.050 Traffic Mitigation Fee per Dwelling Unit Equivalent by Area.

The Traffic Mitigation fee for the various areas within the City, as defined in the general plan, shall be:

Area	Amount of Fee
Southeast Roseville Specific Plan Area	\$2,247 per D.U.E.
Northeast Roseville Specific Plan Area	\$1,200 per D.U.E.
North Central Roseville Specific Plan Area	\$3,046 per D.U.E.
Northwest Roseville Specific Plan Area	\$2,636 per D.U.E.
North Industrial Plan Area	\$3,058 per D.U.E.
Infill Areas	\$2,751 per D.U.E.
Del Webb Specific Plan Area	\$2,088 per D.U.E.

4.44.060 Determination of D.U.E. Rates and Total Fees.

The Director shall determine D.U.E. rates for any development, project or building for which a building permit is issued. D.U.E. rates shall be based on the actual use proposed and shall consider trip generation and any other information deemed pertinent by the Director. The rates shall be determined using generally accepted engineering practice and the best available information. The total fee charged shall be determined by the director and calculated by multiplying the D.U.E. rate for the particular use by the number of units or size of the development, project or building.

Section 4: This ordinance shall be effective at the expiration of sixty (60) days from the date of adoption.

Section 5: The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the city, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

PASSED AND ADOPTED by the Council of the City of Roseville this
1st day of February, 1995, by the following vote on roll

CITY CLERK

ORDINANCE NO. 5203

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE AMENDING
SECTIONS 4.45.020, 4.45.030 AND 4.45.050 OF CHAPTER 4.45 OF TITLE 4 OF THE
ROSEVILLE MUNICIPAL CODE REGARDING TRAFFIC MITIGATION FEE

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. Sections 4.45.020, 4.45.030 and 4.45.050 of Chapter 4.45 of Title 4 of the Roseville Municipal Code is hereby amended to read as follows:

4.45.020 Definitions.

The following words are defined for purposes of this chapter as follows:

- A. "Building permit" means the permit issued or required by the city for the construction of any structure pursuant to and as defined by the building code.
- B. "Covered improvements" means those traffic and circulation facilities, improvements, or infrastructure listed in that document entitled "2013 City/County Traffic Impact Fee Program Update" prepared by Fehr & Peers Transportation Consultants and dated March 15, 2013. Said covered improvements list is on file in the office of the director and the city clerk.
- C. "Department" means the department of development services.
- D. "Director" means the director of the department.
- E. "Dwelling Unit Equivalents" or "D.U.E.'s" means the number of single family dwellings to which a particular type of development or use is equivalent in terms of expected or estimated p.m. peak hour traffic impact.
- F. "Dwelling unit equivalent rates or D.U.E. rates" means multiplication factors used to convert a particular type of development or use to dwelling unit equivalents. D.U.E. rates shall be expressed as the number of D.U.E.'s per unit of a particular use.
- G. "Facilities" means those public traffic and circulation facilities, improvements or infrastructure shown and included on the covered improvements list.
- H. "Improvement plan" means a site plan of property proposed for development showing all required improvements that must be approved by the city prior to the issuance of a building permit for the property.
- I. "Fee" or "traffic mitigation fee" means the fee established by this Chapter 4.45. The fee shall be collected prior to the approval and issuance of any building permit, or as provided otherwise in this chapter. The fee shall be used solely to finance the covered improvements.
- J. "Traffic mitigation fund" means that special interest-bearing fund established pursuant to Section 4.45.030.

K. "Study" means that certain document entitled "2013 City/County Traffic Impact Fee Program Update," dated March 15, 2013. The study is on file in the offices of the director and city clerk.

L. "Infill area" means that portion of the city not within the Northeast, North Central, Northwest, Highland Reserve North, North Roseville, Stoneridge, Southeast, West Roseville, Del Webb, Creekview, or Sierra Vista specific plan areas, nor within the North Industrial Area.

4.45.030 Establishment and administration of traffic mitigation fund.

The finance director is directed to establish a special interest-bearing fund entitled the Baseline/Walerga traffic mitigation fund. All fees collected pursuant to this chapter shall be deposited in the Baseline/Walerga traffic mitigation fund and expended solely to finance the facilities.

4.45.050 Traffic mitigation fee per dwelling unit equivalent by area.

The net traffic mitigation fee for the various areas within the city, as defined in the general plan, shall be:

Area	Amount of Fee (per D.U.E.)
Southeast Roseville Specific Plan Area	\$57.00
Northeast Roseville Specific Plan Area	\$57.00
North Central Roseville Specific Plan Area	\$343.00
Northwest Roseville Specific Plan Area	\$343.00
North Industrial Plan Area	\$343.00
Infill Areas	\$57.00
Del Webb Specific Plan Area	\$343.00
Highland Reserve North Specific Plan Area	\$343.00

North Roseville Specific Plan Area	\$343.00
Stoneridge Specific Plan Area	\$57.00
West Roseville Specific Plan Area	\$770.00
Sierra Vista Specific Plan Area	\$1,350.00
Creekview Specific Plan Area	\$616.00

SECTION 2. This ordinance shall be effective at the expiration of thirty (30) days from the date of adoption.

SECTION 3. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

PASSED AND ADOPTED by the Council of the City of Roseville this 19th day of June, 2013, by the following vote on roll call:

Downtown Specific Plan In-Lieu Parking Fee

Resolution No. 09-124

Ordinance No. 5428

Downtown Code 3.0-Regulatory Incentives

RESOLUTION NO. 09-124

ADOPTING A PARKING IN LIEU FEE
FOR THE DOWNTOWN SPECIFIC PLAN

WHEREAS, as part of the Downtown Specific Plan, the City desires to implement a parking in lieu fee; and

WHEREAS, the initial parking in lieu fee will be \$8,000 per parking space and will be automatically adjusted on July 1st of each calendar year by a percentage equal to the inflation rate for the prior year for construction costs as determined by the Planning and Redevelopment Director in the preceding June; and

WHEREAS, the Director's determination shall be based upon the Engineering News Record, Construction Cost Index for the prior 12 months ending in June;

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Roseville that the parking in lieu fee and the annual adjustment based on the Construction Cost Index is hereby approved.

PASSED AND ADOPTED by the Council of the City of Roseville this 1st day of April, 2009 by the following vote on roll call:

AYES COUNCILMEMBERS: Allard, Gray, Garcia, Roccucci, Garbolino

ORDINANCE NO. 4728

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE ADDING SECTION 17.04.235 OF CHAPTER 17.04; DELETING SECTION 17.04.490 OF CHAPTER 17.04; AND AMENDING SECTIONS 17.06.180 AND 17.06.310 OF CHAPTER 17.06 OF TITLE 17; AND AMENDING SECTIONS 19.08.030, 19.08.080 AND 19.08.090 OF CHAPTER 19.08; 19.10.045 OF CHAPTER 19.10; 19.12.010, 19.12.020 AND 19.12.030 OF CHAPTER 19.12; 19.18.030 OF CHAPTER 19.18; 19.49.030 OF CHAPTER 19.49; 19.74.010 OF CHAPTER 19.74; AND ADDING CHAPTER 19.31 OF TITLE 19 OF THE ROSEVILLE MUNICIPAL CODE REGARDING ZONING

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. Section 17.04.235 of Chapter 17.04 of Title 17 of the Roseville Municipal Code is hereby added to read as follows:

17.04.235 Downtown specific plan area.

"Downtown specific plan area" means a 176 acre area encompassing historic old town, Vernon Street, and Royer and Saugstad Parks. This area is further defined in the Downtown Specific Plan.

SECTION 2. Section 17.04.490 of Chapter 17.04 of Title 17 of the Roseville Municipal Code is hereby deleted in its entirety.

SECTION 3. Sections 17.06.180 and 17.06.310 of Chapter 17.06 of Title 17 of the Roseville Municipal Code are hereby amended to read as follows:

17.06.180 Projecting signs in the Riverside Gateway Specific Plan area.

- A. Number. In addition to other signs permitted by this Title, establishments located in the Riverside Gateway Specific Plan area, in a building immediately adjacent to the public sidewalk, will be permitted one (1) projecting sign.
- B. Location.
 - 1. A projecting sign may extend over the sidewalk a maximum of six (6) feet, subject to an encroachment permit whenever the sidewalk is open to the public or part of the public right of way;
 - 2. A projecting sign may not extend onto or over the street;
 - 3. A projecting sign shall have a minimum vertical clearance of eight (8) feet from the sidewalk to the bottom of the sign;
 - 4. A projecting sign may not extend above the roof line; and
 - 5. The sign shall be located on the Riverside Avenue side even if the building entrance is located on a side street.
- C. Area. The area of a projecting sign shall be included in calculating the permitted area for wall signs.

- D. Encroachment Permit. A permanent encroachment permit which includes insurance certificates and/or bonds pursuant to Roseville Municipal Code Chapter 13.28 shall be required for all signs projecting over the public right-of-way.

Article 3. Downtown Specific Plan Area.

17.06.310 Downtown Specific Plan Signs.

Uses located in the Downtown Specific Plan area are permitted signage that is consistent with, and enhances the historic character of that area. The Downtown Code, adopted in Chapter 19.31 of the Roseville Municipal Code, sets forth the criteria, design guidelines and standards for signs located in the Downtown Specific Plan area.

SECTION 4. Sections 19.08.030(C), 19.08.080(D), (H), (I), (J), (K) and (L), and 19.08.090(E), (L), (O) and (V) of Chapter 19.08 Title 19 of the Roseville Municipal Code are hereby amended to read as follows:

Section 19.08.030(C) - Listing of Use Classifications

C. Residential Use Types

Caretaker/Employee Housing
Community Care Facility, Small
Community Care Facility, Large
Dwelling
 Multi-Family
 Single Family
 Two-Family
Efficiency Units
Family Day Care Homes, Small
Family Day Care Homes, Large
Live/Work
Mobile Home Park
Rooming and Boarding Houses
Second Dwelling Unit
Single Room Occupant

Section 19.08.080(D), (H), (I), (J), (K) and (L) - Residential Use Types

- D. Efficiency units, includes a room or group of internally connected rooms that have independent sleeping, cooking, eating and sanitation facilities, which constitutes an independent housekeeping unit, occupied by or intended for one household on a long-term basis.
- H. Live/Work, includes units that are occupied by business operators who live in the same structure that contains commercial activity. The units function primarily as a workspace with incidental residential accommodations.
- I. **Mobile Home Park**, includes any site that is planned and improved to accommodate two or more mobile homes used for residential purposes, or on which two or more mobile home lots are rented, leased, or held out for rent or lease, or were formerly held out for rent or lease and later converted to a subdivision, cooperative,

condominium, or other form of resident ownership, to accommodate mobile homes used for residential purposes. (Also see Chapter 19.48.)

- J. **Rooming and Boarding Houses**, includes the renting of individual bedrooms within a dwelling by a property owner or other manager in residence to three or more people, whether or not meals are provided; or a single-family dwelling occupied by six (6) or more unrelated people, living together as a single housekeeping unit; by prearrangement for definite periods, with compensation.
- K. **Second Dwelling Unit**, a dwelling unit, attached or detached, with permanent provisions for independent living, sleeping, eating, cooking and sanitation within the unit and includes a separate entrance from the primary unit. (Also see Chapter 19.60.)
- L. **Single Room Occupant**, lodging establishments providing a room(s) which does not include a kitchen or bathroom. These establishments include a communal bathroom and may have a communal kitchen and/or living area. This is not a temporary or transitional housing type and is typically found on the second story above a retail use.

Section 19.08.090(E), (L), (O), (V) - Commercial Use Types

- E. **Bars and Drinking Places**, includes establishments within a building where alcoholic beverages are sold for on-site consumption, that are not part of a restaurant. Includes bars, taverns, pubs, brew pubs, wine bars and similar establishments where any food service is subordinate to the sale of alcoholic beverages. Dance floors are not permitted.
- L. **Eating and Drinking Establishments**, includes establishments primarily engaged in the sale of prepared food and beverages for on-premise consumption, but excludes those uses classified under the "Bars and Drinking Places" and "Nightclubs." Music, live or recorded, may be allowed provided that any such music and floor space for dancing is accessory and incidental to the sale of prepared food and beverages (i.e. jukeboxes, open microphone, mariachi, etc.). Fixed seating or chairs are provided for the seating of each patron or customer at all times. Eating and Drinking Establishment use types include:
 - 1. **Fast Food with Drive Through**, includes establishments primarily engaged in the preparation and retail sale of food and beverages at a walk up counter and at a drive through window, and may include seating.
 - 2. **Convenience**, includes establishments primarily engaged in the preparation and retail sale of food and beverages, at a walk up counter and which does not include a drive through or provide for ordering at the tables, if any. Typical uses include pizza parlors, ice cream parlors, and sandwich shops.
 - 3. **Full Service**, includes establishments primarily engaged in the preparation and retail sale of food and beverages, where food is ordered and served at a table, and which may include sales of alcoholic beverages as an accessory or secondary service. Typical uses include full service restaurants.
- O. **Lodging Services**, includes establishments primarily engaged in the provision of commercial lodging on a less than monthly basis to the general public. Lodging Services includes incidental food, drink, and other sales and services intended for the convenience of guests. Typical uses include hotels, motels, and bed-and-breakfasts.
- V. **Offices, Professional**, includes professional or government offices including:
 - Accounting, auditing and bookkeeping services;
 - Advertising agencies;
 - Architectural, engineering, interior design, and surveying services;
 - Attorneys;

- Call and telemarketing centers;
- Computer software designers;
- Court reporting services;
- Data processing and computer services;
- Detective agencies and similar services;
- Secretarial and word processing services;
- Government offices including agency and administrative office facilities;
- Insurance agencies;
- Management, public relations and consulting services;
- Real estate agencies; and
- Writers, photographers and artists offices outside the home.

SECTION 5: Section 19.10.045(A) of Chapter 19.10 of Title 19 of the Roseville Municipal Code is hereby amended to read as follows:

Section 19.10.045(A) - Design Review Required for Compact Residential Development

- A. Applicability.** Design review shall be required for Compact Residential Development projects that qualify under either of the following:
1. Attached or detached single-family housing units on property with a General Plan land use designation of Medium Density Residential or higher (seven dwelling units per acre or higher, as depicted on the General Plan Land Use Map) (except for properties within the Downtown Specific Plan area), or
 2. Residential projects of any density on a parcel or parcels zoned Small Lot Residential (RS) where modifications to the RS Supplemental Design Standards are requested.

SECTION 6: Section 19.12.010(I), 19.12.020 and 19.12.030(B) of Chapter 19.12 of Title 19 of the Roseville Municipal Code is hereby amended to read as follows:

Section 19.12.010(I) - Purpose

- I. Old Town Historic (HD) District.** The Old Town Historic district is intended to be applied to the original commercial core of Roseville to acknowledge its historic and architectural significance. The HD zoning district is intended to ensure that new land uses and development within the district further the rehabilitation, revitalization, and preservation of the architectural, aesthetic, historic and economic health of the district. Each parcel within the Historic District shall be subject to the specific Historic District design guidelines contained within the Downtown Code which has been adopted in Chapter 19.31 of the Roseville Municipal Code..

Section 19.12.020 - Permitted Use Types

Primary uses are permitted in commercial zones subject to the requirements of this Title as designated below:

- A.** Principally permitted use, designated as "P";
- B.** Conditionally permitted use, designated as "CUP"; and
- C.** Administratively permitted use, designated as "A".

Permitted uses within the CBD and HD zones are contained within the Downtown Code.

Section 19.12.030(B) - Commercial Zone General Development Standards

- A. General.** Permitted uses and structures shall comply with the City's adopted Community Design Guidelines, applicable Specific Plans, approved Design Review Permit and any other applicable requirements of this Title.
- B. Maximum Height.** Notwithstanding the requirements referred to in A, maximum height limits in the Commercial zoning districts are as follows unless otherwise modified by an approved Design Review Permit or Specific Plan:

Zoning District	Height Limit
Business Professional (BP)	50'
Neighborhood Commercial (NC)	35'
Community Commercial (CC)	50'
General Commercial (GC)	50'
Highway Commercial (HC)	50'
Regional Commercial (RC)	50'
Central Business District (CBD)	50'
Commercial Mixed Use (CMU)	50'
Historic District (HD)	50'

SECTION 7: Section 19.18.030(D) of Chapter 19.18 of Title 19 of the Roseville Municipal Code is hereby amended to read as follows:

Section 19.18.030(D) - Special Area (SA) District

- D. Designation on the Zoning Map.** A SA, Special Area district shall be established with approval of a Zoning Ordinance Amendment as specified in Chapter 19.86, and shall be designated on the Zoning Map with the underlying zone district by the symbol "/SA," followed by the ordinance number. The ordinance number shall refer to the ordinance which adopted the SA district. If a SA is within a Specific Plan, no ordinance number need be specified provided however, a reference to that Specific Plan is identified as follows: -SE (Southeast Roseville Specific Plan); -NE (Northeast Roseville Specific Plan); -NW (Northwest Roseville Specific Plan); -NC (North Central Roseville Specific

Plan); -DW (Del Webb Specific Plan), -NR (North Roseville Specific Plan), -HR (Highland Reserve Specific Plan), -SR (Stoneridge Specific Plan), -WR (West Roseville Specific Plan), RG (Riverside Gateway), and DT (Downtown Specific Plan).

SECTION 8: Section 19.49.030 of Chapter 19.49 of Title 19 of the Roseville Municipal Code is hereby amended to read as follows:

Section 19.49.030 - General Standards

The following requirement applies to nightclubs where permitted within any zone district (except for nightclubs located within the Downtown Specific Plan area):

- A. Nightclubs are prohibited to be located within 500 feet of a residential zone district as measured from the residential zone district boundary to the structure where the nightclub use is proposed.

SECTION 9: Section 19.74.010(C) of Chapter 19.74 of Title 19 of the Roseville Municipal Code is hereby amended to read as follows:

Section 19.74.010(C)(2)(a) - Permit Requirements

C. 2. Approving Authority:

a. Administrative Process.

- I.** The Planning Director may approve, conditionally approve or deny a Minor Design Review Permit provided the improvement complies with the following:
 - 1) There has been no previous Design Review Permit for the building/site;
 - 2) The improvement is limited to facade improvements;
 - 3) The improvement consists of a color change;
 - 4) The improvement consists of a modification to or the introduction of a new exterior building material; or
 - 5) The project is within the Downtown Specific Plan area and is consistent with the design guidelines and regulations outlined within the Downtown Code.
- II.** The Planning Director may approve, conditionally approve or deny a Minor Design Review Permit pursuant to the Administrative Permit procedures, except those identified as required by this Title, to be reviewed by the Design Committee or Planning Commission. Design Review Permits approved by the Planning Director shall be in substantial conformance with adopted Specific Plan.

If in the opinion of the Planning Director, a project is not in substantial conformance with applicable, adopted design guidelines, prior conditions of approval, or if the Planning Director determines that, because of location, size or design that the public hearing should not be waived, the Planning Director shall refer the project for public hearing by the Design

Committee or the Planning Commission. The Director shall determine whether the project is to be heard by the Design Committee or the Planning Commission.

The Planning Director may approve:

- 1) Design Review Permit extensions and modifications, including changes in project phasing.
- 2) Design Review Permits for projects within a master or specific plan area where the applicable plan provides for an administrative process.
- 3) Within specific plan areas, subsequent Design Review Permits following Design Committee approval of the first Design Review Permit as provided for in Sub Section b. 2) of this Section.
- 4) Within infill areas, subsequent Design Review Permits following Planning Commission approval of the first Design Review permit as provided in Sub Section c2) of this Section.

SECTION 10: Chapter 19.32 heading is hereby amended to read as follows:

CHAPTER 19.32 – LOCATION AND AMORTIZATION OF ADULT ORIENTED BUSINESSES

19.32.010 – Purpose

19.32.020 – Definitions

19.32.030 – Minimum Proximity Requirements

19.32.040 – Amortization of Nonconforming Adult-Oriented Business Uses

19.32.050 – Extension of Time for Termination of Nonconforming Use

SECTION 11: Chapter 19.31 of Title 19 of the Roseville Municipal Code is hereby added to read as follows:

**Chapter 19.31
DOWNTOWN SPECIFIC PLAN DOWNTOWN CODE**

Sections:

- | | |
|-----------|--------------------------|
| 19.31.010 | Purpose. |
| 19.31.020 | Definition. |
| 19.31.030 | Downtown Code - Adopted. |
| 19.31.040 | Conflicts. |
| 19.31.050 | Violations. |
- 19.31.010 Purpose.**

The purpose of the Downtown Specific Plan Downtown Code is to direct public and private development consistent with the community vision for the Downtown Specific Plan area. Redevelopment within the older areas of the City of Roseville presents unique development challenges. The Downtown Specific Plan Downtown Code is therefore a comprehensive document for the Downtown Specific Plan area that provides detailed performance criteria and development standards that are intended to facilitate development while recognizing the area's

unique character. Key elements addressed in the Downtown Specific Plan Downtown Code include:

- A. Permitted and conditionally permitted uses for various zone districts.
- B. Prescriptive development standards including setbacks, height requirements, parking standards, and floor area ratios.
- C. Development guidelines addressing buffers and adjacency issues, landscaping, entry monumentation, and public realm improvements.
- D. Entitlement processes that vary from applications throughout the remainder of the City of Roseville.
- E. Downtown sign regulations.
- F. Details that define the character of the Downtown Specific Plan area.
- G. Downtown Specific Plan area incentives.
- H. Parcel specific considerations.

The Downtown Specific Plan Downtown Code is consistent with the City of Roseville's goals, policies and applicable regulations and is intended to be the primary resource for development review within the Downtown Specific Plan area.

19.31.020 Definition.

"Downtown Specific Plan area" means a 176 acre area encompassing historic old town, Vernon Street, and Royer and Saugstad Parks. This area is further defined in the Downtown Specific Plan.

19.31.030 Downtown Code - Adopted.

The Downtown Specific Plan Downtown Code, as amended by the City Council from time to time, is hereby adopted and is incorporated into this Chapter by reference as though it were fully set forth herein. A copy of the Downtown Specific Plan Downtown Code is available for use and examination by the public in the City of Roseville's Planning Department and the City Clerk's Office, and can be found on the City of Roseville's web site.

19.31.040 Conflicts.

In the event of any conflict between the provisions of the Downtown Specific Plan Downtown Code and the provisions of the Roseville Municipal Code, the provisions of the Downtown Specific Plan Downtown Code shall prevail. However, with regard to topics that the Downtown Specific Plan Downtown Code does not address, the provisions of the Roseville Municipal Code shall prevail.

19.31.050 Violations.

A violation of the requirements of the Downtown Specific Plan Downtown Code is punishable as an infraction.

SECTION 12. This ordinance shall be effective at the expiration of thirty (30) days from the date of adoption.

SECTION 13. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

PASSED AND ADOPTED by the Council of the City of Roseville this 15th day of April, 2009, by the following vote on roll call:

3.6 Regulatory Incentives

3.5 Fee Incentives

3.5.1 Park Dedication Strategy

Based on the number of new residential units within the Plan Area, the park dedication acreage is approximately 29 acres. An important goal of the Specific Plan is to encourage the development of residential units to promote activity and potential consumers on a constant basis. Based on this desire, the plan exempts future residential units from having to dedicate land or pay an in-lieu fee.

Assuming that land values are approximately \$20 per square foot, on average, exempting residential projects from park dedication would amount to a savings of approximately \$19,800 per residential unit. Based on 1,020 new dwelling units, this is a savings benefit of nearly \$20 million in park land acquisition and dedication costs.

Park fees will still be collected in order to fund park improvements, but these fees will be specifically allocated to improvements in the Downtown. Approximately \$1,949,220 in new city-wide park fees, and \$1,042,440 in neighborhood park fees will be generated and specifically allocated to Downtown park improvements.

3.5.2 Parking In lieu Fee

To create a “Park-Once” philosophy within the Downtown, the **Downtown Code** establishes a parking in lieu fee program. With the adoption of the **Downtown Code**, the City Council has approved a parking in lieu fee that allows non-residential uses to meet their parking demand through the public realm parking provided within the Plan Area.

The initial fee shall be determined by the City Council and updated once yearly, based on the construction cost to the City and adjustments to the Construction Cost Index. Future yearly updates will be set by the Director. The fee is intended to be an incentive and will not necessarily recoup the cost of developing parking within the Downtown. The fee is to be paid to satisfy parking requirements in-lieu of providing any or all spaces on-site and shall be further discounted according to Table 3.5.1.

Parking In lieu Fee

Table 3.5.1

Required Parking Spaces	Fee for Parking Space
First Stall	10% of the in-lieu fee
Second Stall	25% of the in-lieu fee
Third Stall	50% of the in-lieu fee
Fourth Stall	75% of the in-lieu fee
Fifth Stall and beyond	100% of the in-lieu fee

Other provisions associated with the payment of the parking in-lieu fee program include:

- 1) Prior to issuance of a building permit, the developer shall enter into a parking in-lieu fee agreement to be reviewed and approved by the Director.
- 2) Before approving payment of a fee for in-lieu of providing off-street parking, the Director shall find:
 - a. That there is adequate capacity within the existing or planned public parking resources to accommodate the requested parking in-lieu off-site, and
 - b. The project benefiting from this approval is furthering the goals and policies of the Downtown Specific Plan and the General Plan relative to uses, revitalization, pedestrian amenities and design.
- 3) Funds collected by the city from in-lieu payment shall be deposited in a special fund and used only by the City to acquire and/or develop on-street or off-street parking and related facilities which are determined to alleviate the need for parking spaces in the Specific Plan Area.
- 4) Such parking will be available to the public and shall be developed per the provisions of the Downtown Specific Plan.
- 5) Funds paid to the City for in-lieu of parking shall not be refundable, except as otherwise provided by State law.
- 6) All in-lieu of parking fees shall be paid prior to the issuance of certificate of occupancy. In the case of multi-tenant buildings, the fees shall be calculated based on, and paid prior to, the issuance of certificate of occupancy for each individual tenant space.

3.6 Process Incentives

3.6.1 Review Process

Chapter 9 of the Specific Plan establishes the various approval processes that are being established in order to streamline the development process. As part of the fiscal analysis associated with the Visioning for Downtown, reducing the timeframes associated with processing projects was a key strategy identified to implement a successful revitalization effort. The following outlines the various modifications to the City's current review process that are meant to streamline the development process.

Park Fees:

Neighborhood and Community Park Fees

Ordinances No. 2178, 2969 and 3033

Citywide Park Fee

Ordinance No. 2424

ORDINANCE NO. 2178

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE
ADDING CHAPTER 4.37 TO TITLE 4 OF THE ROSEVILLE
MUNICIPAL CODE, RELATING TO THE NEIGHBORHOOD AND COMMUNITY
PARK FEE
(URGENCY ORDINANCE)

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1: Chapter 4.37 is hereby added to Title 4 of the
Roseville Municipal Code to read as follows:

CHAPTER 4.37

NEIGHBORHOOD AND COMMUNITY PARK FEE

4.37.010 Purpose.

The City Council finds and declares that the purpose of this chapter is as follows:

A. The General Plan of the City requires that the City be provided, in a time frame related to its development, with an adequate level of neighborhood and community park and recreation facilities so as to maintain 4 acres of developed neighborhood and community parks per 1,000 population.

B. New development, and the expansion of existing development, within the City imposes a burden on the existing park and recreation facilities by adding additional population and by creating a need for new neighborhood and community parks and recreation facilities. The cost of such facilities may vary by the location of the new development within the City.

C. Analysis of the land use expected at buildout of the City pursuant to the General Plan makes it possible to estimate the number of dwelling units to be generated, and the population generated by those dwelling units. It is also possible to determine which dwelling units will utilize which portions of such park and recreation infrastructure. It is therefore possible to construct a fee, based on dwelling unit generation, which equitably spreads the burden of neighborhood and community park and recreation facilities to those who will create the need for them and utilize them. It is the intent of this chapter to create such a fee, spreading costs of neighborhood and community park and recreation facilities to those who create the need for such facilities, without generating any surplus to the general fund. It is the further purpose of this chapter to implement the General Plan by assuring that adequate neighborhood and community park and recreation facilities are financed and provided to serve the City.

D. The Fee established by this chapter has been calculated in the manner set forth in the Study so as to pay for those Facilities listed in the Capital Improvement Program.

E. The Fee established by this chapter is in addition to any other fees or charges, or taxes, required by law as a condition of development, including, but not limited to, the Residential Construction Tax levied by Chapter 4.36 or any

CITY OF ROSEVILLE
BY _____

subsequent fee established for City-wide park and recreation facilities.

F. The Fee established by this chapter is to be collected for public improvements and facilities for which an account has been established and funds appropriated, and for which a proposed construction schedule has been adopted.

G. That the failure to impose the conditions and regulations of this chapter relating to payment of the Fee on building permits would jeopardize residents of the community, in that it would permit construction to proceed without adequate infrastructure or means of financing said infrastructure.

H. The requirement of this chapter to pay the Fee is necessary in order to assure compliance with the applicable Zoning Ordinance and General Plan requirements for the infrastructure funded by this chapter.

I. That for a period of greater than 10 days prior to adoption of this chapter, data has been available to the public and to developers and their representatives indicating the cost or estimated cost of all the infrastructure to be funded, the revenue sources anticipated and the means of spreading these costs.

J. That the City Council has considered the effect of the Fee imposed by this chapter with respect to the housing needs of the City as a whole and of the region, particularly as required by the Housing Element of the General Plan, and the City Council finds that this chapter does not unduly adversely affect the City's ability to provide for such needs.

K. That the establishment of the Fee is for the purpose of obtaining funds for capital projects, necessary to maintain service required by the General Plan within existing service areas and existing portions of the City which are developed or for which land use has already been granted.

16.37.020 Definitions.

The following words are defined for purposes of this chapter as follows:

A. "Building Permit" means the permit issued or required by the City for the construction of any dwelling unit pursuant to and as defined by the Building Code.

B. "Capital Improvement Program" means that list of proposed neighborhood and community park and recreation facilities, improvements, or infrastructure totaling \$8,434,276 (in 1988 dollars) prepared by the Department and attached to the Study as Exhibit "A".

C. "Department" means the Department of Parks and Recreation.

D. "Director" means the Director of the Department.

E. "Facilities" means those public neighborhood and community park and recreation facilities, land, improvements, or infrastructure shown and included on the Capital Improvement Program.

F. "Fee" or "Neighborhood and Community Park Fee" means the Fee established by this Chapter 4.37. The Fee shall be collected prior to the approval of any Building Permit. The Fee shall be used solely to finance the Facilities.

G. "Neighborhood and Community Park Funds" means those special interest-bearing funds established pursuant to Section 4.37.030.

H. "Study" means the study entitled "Proposed Park Fees for Specific Plan Areas" dated December 14, 1988 by the Director. The Study is on file in the Offices of the Director and the City Clerk. The Study includes a discussion of the Fee in the Infill and North Industrial Areas.

I. "Infill Area" means that portion of the City not within the Northeast, Northcentral, Northwest, or Southeast Roseville Specific Plan Areas, nor within the North Industrial Area.

J. "Dwelling Unit" means a building or part of a building designed for occupancy as a residence by one family.

K. "Single Family Dwelling" means a building designed for occupancy as a residence by one family, including without limitation, mobile homes.

L. "Multiple Family Dwelling" means a building designed for occupancy as a residence by two or more families, living independently of each other. Provided, that multiple family dwelling also includes forms of congregate living, including, without limitation, senior citizen homes, retirement homes, or boarding homes.

4.37.030 Establishment and Administration of Neighborhood and Community Park Funds.

The Finance Director is hereby directed to establish special interest-bearing funds entitled the Neighborhood and Community Park Funds. One such fund shall be established for each Specific Plan Area. In addition, one such fund shall be established for both the North Industrial Area and the Infill Area. All Fees collected pursuant to this chapter shall be deposited in the Neighborhood and Community Park Fund for the area from which it was collected and shall be expended solely to finance the Facilities planned for that area.

4.37.040 Payment of Neighborhood and Community Park Fee.

Except as otherwise provided by this chapter, the Fee imposed pursuant to this chapter shall be paid at or prior to the issuance of any Building Permit for a dwelling unit. Calculation of the Fee shall be determined in accordance with the Study and this chapter depending upon the location of the City in which development occurs, the type of development, and the extent of development.

4.37.050 Neighborhood and Community Park Fee -- Southeast Roseville Specific Plan Area.

The Fee in the Southeast Roseville Specific Plan Area shall be:

<u>Land Use Category</u>	<u>Amount of Fee</u>
Residential, Single Family Dwelling	\$265.00 per dwelling unit
Residential, Multiple Family Dwelling	\$198.00 per dwelling unit

4.37.060 Neighborhood and Community Park Fee -- Northeast Roseville Specific Plan Area.

The Fee in the Northeast Roseville Specific Plan Area shall be:

<u>Land Use Category</u>	<u>Amount of Fee</u>
Residential, Single Family Dwelling	\$293.00 per dwelling unit
Residential, Multiple Family Dwelling	\$216.00 per dwelling unit

4.37.070 Neighborhood and Community Park Fee -- Northcentral Roseville Specific Plan Area. [reserved]

4.37.080 Neighborhood and Community Park Fee -- Northwest Roseville Specific Plan Area.

The Fee in the Northwest Roseville Specific Plan Area shall be:

<u>Land Use Category</u>	<u>Amount of Fee</u>
Residential, Single Family Dwelling	\$124.00 per dwelling unit
Residential, Multiple Family Dwelling	\$104.00 per dwelling unit

4.37.090 [Reserved]

4.37.100 Neighborhood and Community Park Fee -- North Industrial and Infill Areas.

The Fee in the North Industrial and Infill Areas shall be:

<u>Land Use Category</u>	<u>Amount of Fee</u>
Residential, Single Family Dwelling	\$240.00 per dwelling unit
Residential, Multiple Family Dwelling	\$165.00 per dwelling unit

4.37.110 [Reserved]

4.37.120 Existing Development.

No Fee shall be charged for already existing development or for projects which rebuild or remodel without increasing the number of dwelling units.

4.37.130 Fee Adjustments.

A. A developer of any project subject to the Fee established by this chapter may apply to the Director for a reduction or adjustment to the Fee based upon the absence of any reasonable relationship or nexus between the impacts of the project and either the amount of the Fee or the Facilities to be financed by the Fee. The application shall be made in writing and filed with the Director not later than twenty (20) calendar days after notification of the amount of the Fee. The application shall state in detail the factual basis for the claim of reduction or adjustment and the amount of the proposed reduction or adjustment. The Director shall consider the application and render his decision in writing not later than

forty-five (45) calendar days after the filing of the Fee adjustment request. Any person aggrieved by the decision of the Director may, within twenty (20) calendar days thereafter, appeal the decision in writing to the City Council by filing an appeal with the City Clerk. The City Council shall consider such appeals within forty-five (45) calendar days after filing. The decision of the City Council shall be final. No Building Permit shall be issued for the project until the final decision pursuant to this section has been made. No application for a project shall be considered final or complete for purposes of the Permit Streamlining Act (Government Code Section 65920, et seq.), or any other purpose, until a final decision pursuant to this section has been made.

B. Notwithstanding the provisions of Subsection A, a project proponent or applicant may pay the Fee "under protest" and receive a Building Permit. Provided, however, that the application for reduction or adjustment shall thereafter be filed within ten (10) calendar days or any objection shall be deemed waived. If a reduction or adjustment is received after payment pursuant this subsection is made, a refund to the applicant shall be made of that amount by which the Fee is reduced or adjusted.

C. The project proponent or applicant applying for a reduction or adjustment shall have the burden of proof, by a preponderance of the evidence, that a reasonable relationship or nexus is lacking between the Fee, or the Facilities to be financed by the Fee, and the particular project.

D. In the event of any reduction or adjustment in the Fee granted pursuant to this section, any later change in the use, zoning, or land use designation for the property involved shall subject the then owner to payment of the then applicable Fee for such new uses, zoning, or land use designation, whether or not a Building Permit is required.

4.37.140 Inflationary Adjustments.

The Fee established by this chapter shall automatically be adjusted on January 1 of each calendar year by a percentage equal to the inflation rate for the prior year for construction costs as determined by the Director on December 1 of each calendar year. The Director's determination shall be based upon the Engineering News Record, Construction Cost Index for the calendar year as of December 1.

4.37.150 Adoption in Compliance with Capital Improvement Plan.

When the monies in the Neighborhood and Community Park Funds are disbursed for use, the Fees shall be used to finance the Facilities. To the extent sufficient Fees are available, all Facilities financed by the Fees shall be constructed or acquired in accordance with the priorities established in the Capital Improvement Program.

4.37.160 Chapter is Severable.

If any provision of this chapter or the application thereof to any person or circumstances held invalid, such invalidity shall not affect the other provisions of this chapter which can be given effect without the invalid provisions or its application, and to this end the provisions of this chapter are severable.

SECTION 2. Ordinance is Severable.

If any provision of this ordinance or the application thereof to any person or circumstances held invalid, such invalidity shall not affect the other provisions of this ordinance which can be given effect without the invalid provisions or its application, and to this end the provisions of this ordinance are severable.

SECTION 3. City-wide Park Fee. The City Council hereby declares its intention to adopt a fee to recover the costs of providing city-wide park and recreation facilities required by the General Plan. No building permit for a dwelling unit shall be issued unless the applicant shall agree, in writing, to be subject to such a City-wide Park Fee up to the amount of \$735.00 if it is adopted within one hundred and twenty (120) days of the effective date of this ordinance.

SECTION 4. Urgency Ordinance. This ordinance is declared to be an urgency measure, immediately necessary for the public peace, health and safety. It shall take effect immediately upon its adoption. A statement of urgency is as follows:

The extraordinarily rapid pace of development within the City necessitates immediate imposition of fees to fund the infrastructure to serve that development. Delay in adoption or the effective date of this ordinance would result in hundreds of building permits being issued without those permits bearing their fair share of costs.

SECTION 5. Posting. The City Clerk is hereby authorized and directed to post a true copy of the foregoing ordinance in each of three (3) conspicuous locations within the City and she shall immediately after such posting enter in the Ordinance Book, under the record of the ordinance, a certificate under her hand stating the time and place of said publication by posting.

PASSED AND ADOPTED by the Council of the City of Roseville this 4th day of January, 1989, by the following vote on roll call:

AYES COUNCILMEMBERS: Tom Chambliss, Phil Ozenick, John M. Byouk,
Mel Hamel, Bill Santucci

This Ordinance amends the
Roseville Municipal Code. Case
fasten in codebook until
next update.

ORDINANCE NO. 2424

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE
AMENDING SECTIONS 4.38.020 AND 4.38.050 OF CHAPTER 4.38
OF TITLE 4 OF THE ROSEVILLE MUNICIPAL CODE, RELATING
TO CITY-WIDE PARK FEES

THE CITY OF ROSEVILLE ORDAINS:

Section 1: Sections 4.38.020 and 4.38.050 of Chapter 4.38
of Title 4 of the Roseville Municipal Code are hereby amended to
read as follows:

4.38.020 Definitions.

The following words are defined for purposes of this chapter
as follows:

A. "Building Permit" means the permit issued or required by
the City for the construction of any Dwelling Unit pursuant to
and as defined by the Building Code.

B. "Capital Improvement Program" means that list of
proposed City-wide park and recreation facilities, improvements,
or infrastructure totaling \$35,660,062 (in 1991 dollars) prepared
by the Department and attached to the Study as Exhibit "A".

C. "Department" means the Department of Parks and
Recreation.

D. "Director" means the Director of the Department.

E. "Facilities" means those city-wide park and recreation
facilities, land, improvements, or infrastructure shown and
included on the Capital Improvement Program.

F. "Fee" or "City-Wide Park Fee" means the Fee established
by this Chapter 4.38. The Fee shall be collected prior to the
approval of any Building Permit. The Fee shall be used solely to
finance the Facilities.

G. "City-Wide Park Fund" means the special interest-bearing
fund established pursuant to Section 4.38.030.

H. "Study" means both the study entitled "Proposed City-
wide Park Fees" dated March 3, 1989 and the study entitled
"Increase of the City-Wide Park Fee" dated March 14, 1991 by the
Director. The Study is on file in the Offices of the Director
and the City Clerk.

I. "Dwelling Unit" means a building or part of a building
designed for occupancy as a residence by one family.

J. "Single Family Dwelling" means a building designed for
occupancy as a residence by one family, including without
limitation, mobile homes.

K. "Multiple Family Dwelling" means a building designed for
occupancy as a residence by two or more families, living
independently of each other. Provided, that multiple family
dwelling also includes forms of congregate living, including,
without limitation, senior citizen homes, retirement homes, or
boarding homes.

L. "Credit" means a reduction in the Fee representing the pro-rata share of City-wide park lands already dedicated during approval or development of a development agreement for a specific plan.

4.38.050 Amount of City-Wide Park Fee.

The Fee shall be:

Land Use Category

Amount of Fee

Residential, Single Family Dwelling

\$1,195.50 per Dwelling
Unit

Residential, Multiple Family Dwelling

\$1,195.50 per Dwelling
Unit

SECTION 2. This ordinance shall be effective at the expiration of sixty (60) days from the date of adoption.

SECTION 3. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

PASSED AND ADOPTED by the Council of the City of Roseville this 15th day of May, 1991, by the following vote on roll call:

AYES COUNCILMEMBERS: Bill Santucci, Harry Crabb, Jr., John Byouk,
Mel Hamel, Pauline Roccucci

**Electric Backbone Impact
Fee Ordinance No. 6097**

ORDINANCE NO. 6097

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE AMENDING SECTIONS 4.54.020 AND 4.54.050 OF CHAPTER 4.54 OF TITLE 4 OF THE ROSEVILLE MUNICIPAL CODE REGARDING ELECTRIC BACKBONE MITIGATION FEE

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. Section 4.54.020 of Chapter 4.54 of Title 4 of the Roseville Municipal Code is hereby amended to read as follows:

4.54.020 Definitions.

The following words are defined for purposes of this chapter as follows:

- A. "Building permit" means the permit issued or required by the city for the construction of any structure pursuant to and as defined by the building code.
- B. "Capital improvement program" means that list of proposed electric system facilities, improvements, or infrastructure totaling \$28,650,000 referenced in the 2019 UFS Study.
- C. "Department" means the electric utility department.
- D. "Director" means the director of the department.
- E. "Facilities" mean those electric system facilities or infrastructure shown and included on the capital improvement program.
- F. "Improvement plan" means a site plan of property proposed for development showing all required improvements that must be approved by the city prior to the issuance of a building permit for the property.
- G. "Fee" or "electric backbone mitigation fee" or "backbone fee" means the fee established by this Chapter 4.54. The fee shall be collected prior to the approval of any building permit. The fee shall be used solely to finance the facilities. The fee as codified in this chapter has previously been imposed for the same purposes, pursuant to motion of the city council.
- H. "Study" or "System Study" means the 2019 UFS Consultant Study. The Study is on file in the office of the city clerk.

SECTION 2. Section 4.54.050 of Chapter 4.54 of Title 4 of the Roseville Municipal Code is hereby amended to read as follows:

4.54.050 Electric backbone mitigation fee.

The electric backbone mitigation fee shall be:

Type of Development	Amount of Fee
Apartments, condominiums, townhouses and mobile homes	\$360.95 per dwelling unit
Other residential units including single-family homes	\$496.31 per dwelling unit
General service (all other commercial/office/industrial)	\$90.24 per kVA

SECTION 3. This ordinance shall be effective at the expiration of sixty (60) days from the date of adoption.

SECTION 4. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

Solid Waste Impact Fee
Ordinance No. 6501

ORDINANCE NO. 6501

**ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE REPEALING AND
REPLACING CHAPTER 9.12 OF TITLE 9 OF THE ROSEVILLE MUNICIPAL CODE
REGARDING GARBAGE AND WASTE COLLECTION AND AMENDING CHAPTER 9.17
OF TITLE 9 OF THE ROSEVILLE MUNICIPAL CODE REGARDING REFUSE HAULING
AND RECYCLING, AND DECLARING THIS ORDINANCE TO BE EFFECTIVE
JUNE 1, 2022 AS AN URGENCY ORDINANCE**

THE CITY OF ROSEVILLE ORDAINS:

**SECTION 1. Chapter 9.12 of Title 9 of the Roseville Municipal Code is hereby repealed
and replaced in its entirety to read as follows:**

Chapter 9.12

WASTE COLLECTION

9.12.010 Definitions.

A. "Act" means the California Integrated Waste Management Act of 1989 (sometimes referred to as "AB 939"), including but not limited to, the Jobs and Recycling Act of 2011 (AB 341), SB 1016 (Chapter 343, Statutes of 2008), the Mandatory Commercial Organics Recycling Act of 2014 (AB 1826), and the Short-Lived Climate Pollutants Bill of 2016 (SB 1383), Public Resources Code § 40000 and following as it may be amended, and as implemented by the regulations of CalRecycle.

B. "California Code of Regulations" or "CCR" means the State of California Code of Regulations.

C. "Collection" means the operation of gathering together within the City and transporting to the point of disposal or processing of any Garbage, Recyclables, and Organic Waste.

D. "Commercial Business" or "Commercial" means a firm, partnership, proprietorship, joint-stock company, corporation, or association, whether for-profit or nonprofit, strip mall, industrial facility, or a multifamily residential dwelling, or as otherwise defined in 14 CCR Section 18982(a)(6). A Multi-Family Residential Dwelling that consists of fewer than five (5) units is not a Commercial Business for purposes of implementing this ordinance.

E. "Commercial Edible Food Generator" includes a Tier One or a Tier Two Commercial Edible Food Generator as defined in Sections 9.12.010(X) and 9.12.010(Y) of this Chapter.

F. "Container" means any bin, box, or cart used for the purpose of holding Garbage, Recyclables or Organic Waste for Collection.

G. "Representative" means an entity that the City contracts with or otherwise arranges to carry out any responsibilities of this Chapter, as authorized by 14 CCR Section 18981.2. A Representative may be a government agency, a private entity, or a combination of those entities.

H. "Edible Food" means food intended for human consumption, or as otherwise defined in 14 CCR Section 18982(a)(18). "Edible Food" is not Solid Waste if it is recovered and not discarded. Nothing in this Ordinance or in 14 CCR, Division 7, Chapter 12 requires or authorizes the recovery of Edible Food that does not meet the food safety requirements of the California Retail Food Code.

I. "Food Recovery" means actions to collect and distribute Edible Food that otherwise would be disposed.

J. "Food Recovery Organization" means an entity that engages in the collection or receipt of Edible Food from Commercial Edible Food Generators and distributes that Edible Food to the public for Food Recovery either directly or through other entities or as otherwise defined in 14 CCR Section 18982(a)(25), including, but not limited to:

1. A food bank as defined in Section 113783 of the Health and Safety Code;
2. A nonprofit charitable organization as defined in Section 113841 of the Health and Safety Code; and
3. A nonprofit charitable temporary food facility as defined in Section 113842 of the Health and Safety Code.

K. "Garbage" means all putrescible and nonputrescible solid, semisolid, and liquid wastes generated or accumulated through the normal activities of a premises. Garbage does not include Recyclables or Organic Waste that is Source Separated and set out for the purposes of Collection and recycling.

L. "Multi-Family Residential Dwelling" or "Multi-Family" means of, from, or pertaining to residential premises with five (5) or more dwelling units. Multi-Family premises do not include hotels, motels, or other transient occupancy facilities, which are considered Commercial Businesses.

M. "Organic Waste" means Solid Waste containing material originated from living organisms and their metabolic waste products, including but not limited to food waste, green waste, organic

textiles and carpets, lumber, wood, paper products, printing and writing paper, manure, biosolids, digestate, and sludges or as otherwise defined in the Act. Biosolids and digestate are as defined by the Act.

N. "Organic Waste Generator" means a person or entity that is responsible for the initial creation of Organic Waste, or as otherwise defined in 14 CCR Section 18982(a)(48).

O. "Person" means any institution, public or private corporation, governmental unit or jurisdiction, individual, company, firm, association, partnership or other entity.

P. "Prohibited Container Contaminants" means (1) discarded materials placed in the designated Organic Waste Container that are not identified as acceptable Source Separated Organic Waste for the City's designated Organic Waste Container; (2) discarded materials placed in the Garbage Container that are identified as acceptable Source Separated Organic Waste, which are to be separately collected in City's designated Organic Waste Container; and, (3) Excluded Waste, as described herein, placed in any container.

Q. "Recyclables" shall mean those materials that are separated from Solid Waste prior to disposal to be recycled consistent with the requirements of the Act. The City may adopt a schedule of materials suitable for recycling, as determined by resolution of the City Council, or as set forth in a collection agreement, which may be revised periodically.

R. "Residential Householder" shall mean any Person or Persons holding or occupying a residential premises in the City, whether or not the owner of the residential premises.

S. "Residential Owner" shall mean the owner of any residential premises within the City.

T. "Self-Hauler" means a Person, who hauls Solid Waste, Organic Waste or Recyclables pursuant to the conditions set forth in section 9.12.20 of this Chapter. Self-Hauler also includes a Person who back-hauls waste, or as otherwise defined in 14 CCR Section 18982(a)(66). Back-haul means generating and transporting Organic Waste to a destination owned and operated by the generator using the generator's own employees and equipment, or as otherwise defined in 14 CCR Section 18982(a)(66)(A).

U. "Single-Family" means of, from, or pertaining to any residential premises with fewer than five (5) units.

V. "Solid Waste" has the same meaning as defined in State Public Resources Code Section 40191, which defines Solid Waste as all putrescible and nonputrescible solid, semisolid, and liquid wastes, including Garbage, trash, refuse, paper, rubbish, ashes, industrial wastes, demolition and construction wastes, abandoned vehicles and parts thereof, discarded home and industrial appliances, dewatered, treated, or chemically fixed sewage sludge which is not hazardous waste, manure, vegetable or animal solid and semi-solid wastes, and other discarded solid and semisolid wastes, with the exception that Solid Waste does not include hazardous waste, as defined in the State Public Resources Code Section 40141, radioactive waste regulated pursuant to the State Radiation Control Law, or medical waste regulated pursuant to the State Medical Waste Management Act.

W. "Source Separated" means materials, including commingled Recyclables, that have been separated or kept separate from the Solid Waste stream, at the point of generation, for the purpose of additional sorting or processing those materials for recycling or reuse in order to return them to the economic mainstream in the form of raw material for new, reused, or

reconstituted products, which meet the quality standards necessary to be used in the marketplace, or as otherwise defined in 14 CCR Section 17402.5(b)(4). For the purposes of this Chapter, Source Separated shall include separation of materials by the generator, property owner, property owner's employee, property manager, or property manager's employee into different Containers for the purpose of Collection such that Source Separated materials are separated from Waste/Mixed Waste or other Solid Waste for the purposes of Collection and processing.

X. "Tier One Commercial Edible Food Generator" means a Commercial Edible Food Generator as defined by 14 CCR Section 18982(a)(73) as amended, and includes the following:

1. Supermarket.
2. Grocery Store with a total facility size equal to or greater than 10,000 sq. ft.
3. Food Service Provider.
4. Food Distributor.
5. Wholesale Food Vendor.

Y. "Tier Two Commercial Edible Food Generator" means a Commercial Edible Food Generator as defined by 14 CCR Section 18982(a)(74) as amended and includes the following:

1. Restaurant with 250 or more seats, or a total facility size equal to or greater than 5,000 sq. ft.
2. Hotel with an on-site food facility and 200 or more rooms.
3. Health facility with an on-site food facility and 100 or more beds.

4. Large venue as defined in 14 CCR Section 18982(a)(39).

5. Large event, as defined in 14 CCR Section 18982(a)(38).

6. A State agency with a cafeteria with 250 or more seats or total cafeteria facility size equal to or greater than 5,000 sq. ft.

9.12.020 Private collection prohibited—Exception.

A. The City, its duly authorized agents, servants or employees, shall have the exclusive right to gather and collect Garbage within the City and it is unlawful for any person, except as otherwise provided in this chapter, to collect or gather Garbage within the City. The City Council, however, is empowered to grant permission to any person to collect or gather Garbage.

This prohibition shall not, however, apply to Self-Haulers as provided below:

1. The collection, transportation and disposal of construction and demolition debris by a contractor, handyman, repair person or other similar service provider as an incidental part of the services provided to its customers rather than as a hauling service; provided, that, such Solid Waste is not collected or transported by a third party hired for the primary purpose of collecting and transporting said materials, and further provided that such services comply with any ordinances, policies and regulations of City relating to the collection of such materials.

2. The collection, transportation and disposal of yard waste, green waste and related Solid Waste by a gardener or landscaper as an incidental part of the gardening or landscaping services provided to its customers, rather than as a hauling service; provided, that, such Solid Waste is not collected or transported by a third party hired for the primary purpose of collecting and transporting said materials.

3. Any person or entity collecting “Recyclables,” as that term is defined in Section 9.12.010(Q), sold or donated to it by the person or entity that generated such Recyclables (the “generator”); provided, however, to the extent permitted by law, if the generator is required to pay monetary or nonmonetary consideration for the collection, transportation, transfer or processing of Recyclables, the fact that the generator receives a reduction or discount in price (or in other terms of the consideration the generator is required to pay) shall not be considered a sale or donation, and provided that such services comply with any ordinance, policies and regulations of the City relating to the collection of such materials.

9.12.030 Organic Waste Generator Requirements.

A. Single-Family Organic Waste Generators shall comply with the following requirements:

1. Subscribe to and maintain Organic Waste Collection services for all Organic Waste.

The City shall have the right to review the number and size of a generator’s Containers to evaluate adequacy of capacity provided for each type of Collection service for proper separation of materials and containment of materials. Single-Family Organic Waste Generators shall adjust service level for its Collection services as requested by the City. Generators may additionally manage their Organic Waste by preventing or reducing their Organic Waste, managing Organic Waste on site, and/or using a community composting site pursuant to 14 CCR Section 18984.9(c).

2. Participate in the City’s Organic Waste collection service(s) by placing Source Separated Organic Waste in the Container identified and designated for Source Separated Organic Waste and placing all other materials in the Container identified and designated for such materials.

3. Place Containers as follows:

a. **Residences Having Street Frontage Only.** Containers must be placed for collection at curbside in front of residence. The wheels of the Container will be placed in the gutter with the handle facing the residence. Containers will be at least six feet from any obstruction such as automobiles, trailers, motor homes, fences, lampposts, portable basketball hoops, mailboxes, or other automated containers. Containers are not to block pedestrian access.

b. **Residences with Alley Access.** Containers must be placed for collection on private property adjacent to the alley property line, with direct access from the alley. The base of the Container will be placed on a stable, level surface with the handle facing the residence. Containers will be at least six feet from any obstructions such as automobiles, trailers, motor homes, fences, portable basketball hoops, lampposts, mailboxes, or other automated containers.

c. **All Containers must be at curbside no later than the time as directed by the environmental utilities director or his or her designee.**

B. Generators that are Commercial Businesses, excluding Multi-Family Residential Dwellings shall comply with the following requirements:

1. **Subscribe to and maintain Organic Waste Collection services for all Organic Waste.** The City shall have the right to review the number and size of a generator's Containers to evaluate adequacy of capacity provided for each type of Collection service for proper separation of materials and containment of materials. Single-Family Organic Waste Generators shall adjust service level for its Collection services as requested by the City. Generators may additionally manage their Organic Waste by preventing or reducing their Organic Waste, managing Organic

Waste on site, and/or using a community composting site pursuant to 14 CCR Section 18984.9(c).

2. Participate in the City's Organic Waste collection service(s) by placing Source Separated Organic Waste in the Container identified and designated for Source Separated Organic Waste and placing all other materials in the Container identified and designated for such materials.

3. Supply and allow access to adequate number, size and location of collection Containers with labels or colors sufficient for employees, contractors, tenants, and customers, in compliance with the City's Collection service requirements.

4. Excluding Multi-Family Residential Dwellings, Commercial Businesses shall provide Containers for the Collection of Source Separated Organic Waste and Garbage in all indoor and outdoor areas where disposal Containers are provided for customers, for materials generated by that business. Furthermore, the Commercial Businesses shall place Containers in such place as shall be convenient to the City for removal of Organic Waste and Garbage. Storage of other equipment or material will not be allowed.

5. Excluding Multi-Family Residential Dwellings, Containers provided by Commercial Businesses shall have either:

a. A body or lid that conforms with the Container colors provided through the Collection service provided by the City, with either lids conforming to the color requirements or bodies conforming to the color requirements or both lids and bodies conforming to color requirements. A Commercial Business is not required to replace functional Containers, including Containers purchased prior to January 1, 2022, that do not comply with the requirements of the

subsection prior to the end of the useful life of those Containers, or prior to January 1, 2036, whichever comes first.

b. Container labels that include language or graphic images, or both, indicating the primary material accepted and the primary materials prohibited in that Container, or Containers with imprinted text or graphic images that indicate the primary materials accepted and primary materials prohibited in the Container.

C. Generators that are Commercial Businesses, excluding Multi-Family Residential Dwellings shall:

1. To the extent practical through education, training, inspection, and/or other measures, prohibit employees from placing materials in a Container not designated for those materials per the City's Collection service.

2. Periodically inspect all Containers for contamination and inform employees if Containers are contaminated and of the requirements to keep Prohibited Container Contaminants out of those Containers pursuant to the Act.

3. Annually provide information to employees, contractors, tenants, and customers about Organic Waste proper sorting and recovery requirements.

4. Nothing in this section prohibits a generator subject to these provisions from preventing or reducing waste generation or managing Organic Waste on site.

5. Commercial Businesses that are Tier One or Tier Two Commercial Edible Food Generators shall comply with Food Recovery requirements, pursuant to Section 9.12.110 of this Chapter.

9.12.040 Waivers.

A. The City, in its sole discretion, may issue waivers to qualifying Commercial Businesses for physical space limitations, and/or de minimis volume waivers for Commercial Generators.

B. Commercial Businesses requesting a physical space waiver shall:

1. Submit an application form specifying the type(s) of Collection services for which they are requesting a compliance waiver.
2. Provide documentation that the premises lacks adequate space for the required Containers including documentation from the contractor, licensed architect, or licensed engineer.
3. Provide written verification to the City that it is still eligible for physical space waiver every five years, if the City has approved application for a physical space waiver.

C. Commercial Businesses requesting a de minimis waiver shall:

1. Submit an application specifying the Collection services that they are requesting a waiver from.
2. Provide documentation that either:
 - a. The Commercial Business' total Solid Waste Collection service is two cubic yards or more per week and Organic Waste subject to Collection in the designated Containers comprises less than 20 gallons per week per applicable Container of the business' total waste; or
 - b. The Commercial Business' total Solid Waste Collection service is less than two cubic yards per week and Organic Waste subject to Collection in the designated Containers

comprises less than 10 gallons per week per applicable Container of the business' total waste.

- c. For the purposes of subsections (a) and (b) above, total Solid Waste shall be the sum of the weekly Garbage Collection Container volume, Recyclables Collection Container volume and Organic Waste Collection Container volume, measured in cubic yards.
3. Notify the City if circumstances change such that Commercial Business's Organic Waste exceeds the threshold required for waiver, in which case the waiver will be rescinded.
4. Provide written verification of eligibility for de minimis waiver every 5 years, if the City has approved a de minimis waiver.

9.12.050 Removal by owner or tenant.

Nothing contained in this chapter shall be construed as prohibiting the owner or tenant of any premises in the City from destroying or carrying away any Garbage in order to reduce the amount to be taken away by the City, or its duly authorized agents or employees, but not by means of any person who shall in any way receive the benefits of the use of any such Garbage for feed for poultry, hogs or other livestock, unless such person shall receive permission from the City council to carry away such garbage. Nothing contained in this section shall be construed as relieving any person from paying the regular garbage fees established for the City.

9.12.060 Removal weekly by City.

All Garbage accumulated at or on any premises within the City shall be removed by the City at regular intervals of once a week within the City limits, or more often at the request of any tenant, occupant or lessee, and delivered to the "authorized solid waste management facility."

9.12.070 Container requirements.

The environmental utilities director or his or her designee shall determine the size and specifications of all Containers used for the purposes of Collection under this Chapter.

9.12.080 Collection from certain floors prohibited.

The City shall not provide Collection for the purposes of this Chapter from above the first floor of any premises, nor from the basement of any premises.

9.12.090 Charges for Collection.

A. Residential.

1. Each and every householder or tenant occupying any dwelling, house, or residence, shall pay to the City, or its authorized agent, a fixed minimum charge as set forth in this section as a refuse rate. Such fixed minimum is based upon service of one call per week, irrespective of whether there is any refuse to remove from any premises.

2. Automated Container Service. Each premises shall be assigned City-owned Containers. Containers will be serviced by automated Collection. All Garbage and Source Separated Organic Waste for Collection must be contained within the Container(s) designated for such materials with the lid closed and must fall freely from Container when dumped. Each such premises shall be provided Collection regularly, as determined by the environmental utilities director or his or her designee.

3. For collection of additional containers beyond those covered by the fixed minimum rates established in this chapter, the collection charge shall be that identified in this section.

4. An additional or "extra" pickup may be requested beyond the minimum service required by this chapter. Each such additional or extra pickup shall be subject to a fixed fee. Return service for Containers placed out late may be requested. Each "out late" pickup shall be subject to a fixed fee.

5. Rates for Residential Collection. Effective July 1, 2021, and July 1, 2022, the residential rates on billings shall be as follows:

Residential Refuse Service	Effective 7/1/2021	Effective 7/1/2022
Fixed refuse monthly charge (one trash container and one green waste container as identified in Section 9.12.100(A)(2))	\$31.06	\$36.05
Each additional mixed waste Container	\$21.24	\$24.65
Each additional Source Separated Organic Waste container	\$11.28	\$13.10
Additional pickup of a mixed waste Container (also "out late" fee)	\$20.30	\$23.56
Additional pickup of a Source Separated Organic Waste Container (also "out late" fee)	\$14.92	\$17.32
Fixed fee for the return of a confiscated Source Separated Organic Waste Container due to contamination	\$145.00	\$168.27
Move in box pick-up	\$109.77	\$127.39
Temporary dumpster delivery and removal (6 yards only)	\$152.19	\$176.65
Source Separated Organic Waste contamination fee (applied to account after third notification)	\$30.36	\$35.24
Residential return trip fee (applied when service is requested but container is inaccessible)	\$30.36	\$35.24
Container exchange (customer requested in excess of 1x/12 months)	\$30.36	\$35.24

Residential Refuse Service	Effective 7/1/2021	Effective 7/1/2022
Container exchange (due to misuse—melted or damaged beyond reuse)	\$90.70	\$105.26

B. Commercial.

1. A landlord, property owner, property manager or management company of a Commercial Business that has a commercial dumpster shall pay to the City, or its authorized agent, a fixed charge as set forth by the city council as a refuse rate. Monthly charges will be applied to a single account per service. Such rates and fees are based upon a minimum service of one call per week, irrespective of whether there is any refuse to remove from any premises.

A landlord, property owner, property manager or management company with multiple tenants who must share a commercial dumpster shall be responsible for the refuse utility bill of the tenants.

2. Commercial Frontloader, Rearloader, Roll-Off, and Automated Container Services are provided by the City.

An additional or extra pick up may be requested beyond the minimum service required by this chapter. Each such additional or extra pick up shall be subject to a fixed fee.

Temporary Commercial Collection must be charged to a City of Roseville customer utility account. A "Garbage only" account may be requested for temporary services. See Chapter 14.04 "Utility Customer Billing, Accounting and Collections" for information about establishing a new account.

Timeframe for Temporary Customer Service. Temporary dumpsters for Commercial Business use must be serviced weekly and removed within a 90-day period. It is the customer's responsibility to schedule services. If a temporary dumpster is not emptied within seven consecutive days of its delivery or last Collection, the account shall be assessed a weekly rental fee per subsection (B)(7), Rates for Commercial Collection.

3. Multi-Family Residential Dwellings will need to provide proof to the City that Source Separated Organic Waste such as green waste are being recycled or diverted from the landfill in an appropriate manner, as determined by the environmental utilities director or his or her designee. The City can also provide green waste services, if necessary.

The City will collect all Source Separated Organic Waste, unless a Commercial Business had Collection services in place before September 28, 2014, the date AB 1826 was approved. Any Commercial Business with a collection contract in effect before this date can continue with providers until the contract expires. Once the contract expires the Commercial Business will default to City Collection service as provided for in this chapter.

4. An additional or special pickup may be requested beyond the minimum service required by this chapter. Each such additional or special pickup shall be subject to a fixed fee.

5. Rates for Commercial Collection. Effective July 1, 2021, and July 1, 2022, the commercial rates on billings shall be as follows:

Frontloader and Rearloader Commercial Services*	Effective 7/1/2021	Effective 7/1/2022
Waste service minimum monthly charge	\$34.83	\$40.42
Automated container commercial service (per Container, where available; Organic Waste service not available)	\$31.06	\$36.05

Frontloader and Rearloader Commercial Services*	Effective 7/1/2021	Effective 7/1/2022
Streetscape and LLD containers*	\$8.20	\$9.52
Hand pickup service* (up to three 30-gallon cans or six bags per week, where available)	\$34.83	\$40.42
Frontloader and rearloader* trash dumpster per yard charge	\$12.74	\$14.79
Frontloader and rearloader* trash compactor per yard charge	\$22.96	\$26.65
Frontloader cardboard dumpster and compactor per yard charge	\$3.91	\$4.54
Commercial bin assistance (per occurrence)	\$54.86	\$63.67
Recyclable material contamination fee (applied after third notification)	\$30.36	\$35.24
Lock delivery or replacement (per occurrence)	\$18.22	\$21.15
Lock service – (per Container, per month)	\$12.15	\$14.10
Push/pull charges (per Container, per month)	\$18.22	\$21.15
Extra pickup charge (percentage of monthly base rate plus return trip charge)	25%	25%
Exchange bin (for dirty bin in excess of 1x per 12 months)	\$91.08	\$105.70
Commercial return trip fee (applied when service is requested but Container is inaccessible; also used to calculate commercial extra pickups)	\$30.36	\$35.24
Emergency after-hours service fee (per service)	\$196.06	\$227.53
Commercial standby fee (per 15 minutes when asked by onsite customer to wait)	\$72.86	\$84.56

* A premium of 25% will be added to all rearloader services.

Roll-Off Commercial Open Top and Compactor Services	Effective 7/1/2021	Effective 7/1/2022
Minimum charge per haul (base rate) without tonnage* (all sizes and material)	\$379.39	\$440.28

Pleasant Grove Wastewater Treatment Plant sludge-hauling fee (per bin)	\$267.12	\$309.99
Roll-off tonnage fees (tipping fees)	Pass-through rates apply*	
Compactor cleaning service (hauling charges also apply)	\$512.68	\$594.96
Return trip fee (scheduled bin not ready for haul, customer requests return later on same day – per occurrence)	\$36.43	\$42.28
Roll-off relocation fee (no haul – per occurrence)	\$60.72	\$70.47

* Tonnage charges (tipping fees) vary by material type, and are determined by the Western Placer Waste Management Authority. With City department head approval, some entities may pay tonnage charges directly to Western Placer Waste Management Authority.

Temporary Frontloader and Roll-Off Fees	Effective 7/1/2021	Effective 7/1/2022
Frontloader and rearloader temporary dumpster delivery and removal fee	\$75.75	\$87.91
Frontloader and rearloader temporary dumpster per yard fee (plus trip fee for extra pickups)	\$12.74	\$14.79
Frontloader and rearloader temporary dumpster rental fee per week	\$72.11	\$83.69
Roll-off temporary dumpster hauling fee*	\$379.39	\$440.28
Roll-off temporary dumpster rental fee per week	\$130.94	\$151.96

* Tonnage charges (tipping fees) vary by material type, and are determined by the Western Placer Waste Management Authority. With City department head approval, some entities may pay tonnage charges directly to Western Placer Waste Management Authority.

C. Shared Compactor Rates. Shared compactor rates are applicable to the City of Roseville downtown specific plan area. Exact rates are determined on a site-specific basis based on the following criteria:

	Cost per 1,000 square feet of building area or per dwelling unit Effective 7/1/2021	Cost per 1,000 square feet of building area or per dwelling unit Effective 7/1/2022	
Below are the square footage rates for shared compactors. If a customer's site-specific charge does not exceed the fixed minimum charge, they will be subject to the monthly fixed minimum charge.			
Monthly Minimum (Fixed)	\$34.83	\$40.42	
Tier 1: Cost per 1,000 square feet of building area or per dwelling unit	\$7.28	\$8.45	Tier 1 includes business types that are determined low use by the environmental utilities director. Typical examples of low use are retail and office establishments and small apartment units.
Tier 2: Cost per 1,000 square feet of building area	\$29.34	\$34.05	Tier 2 includes business types that are determined medium use by the environmental utilities director. Typical examples of medium use are relatively smaller establishments such as bars and grills, coffee shops and delis; selling or serving food but not considered a full-service restaurant.
Tier 3: Cost per 1,000 square feet of building area	\$61.98	\$71.93	Tier 3 includes business types that are determined high use by the environmental utilities director. A typical example of high use is full-service restaurants, restaurant/bakeries, and similar establishments. Full-service restaurants are defined as primarily dine-in establishments with established menus, and a minimum of two meals per day (e.g., lunch and dinner).

D. Shared Compactor Organic Tiers. Organics tiers are applicable to some shared compactor units depending on compactor tier and usage type. Exact rates are determined on a site-specific basis based on the following criteria:

Commercial Shared Compactor Organic Tiers	Effective 7/1/2021	Effective 7/1/2022
Tier 1	\$0.00	\$0.00
Tier 2	\$99.50	\$115.47
Tier 3	\$198.92	\$230.85

E. Rates for Commercial Organic Waste Collection. Effective July 1, 2021 and July 1, 2022, the Commercial Organic Waste Collection rates on billings shall be as follows:

Organic Waste Collection Rates	Minimum Monthly Charge (Effective 7/1/2021)	Minimum Monthly Charge (Effective 7/1/2022)
0-2 yards	\$99.50	\$115.47
0-4 yards	\$198.92	\$230.85
5 yards	\$248.66	\$288.57
6 yards	\$298.34	\$346.22
7 yards	\$348.22	\$404.10
8 yards	\$397.83	\$461.68
9 yards	\$447.52	\$519.34
10 yards	\$497.24	\$577.04
11 yards	\$547.12	\$634.92
12 yards	\$596.68	\$692.44

Additional empty of organics container	\$74.62	\$86.60
Empty of contaminated organics container	\$99.50	\$115.47

9.12.100 Solid waste impact fee.

A. Solid Waste Impact Fee Established. Each Single Family Waste Generator and Commercial Waste Generator serviced by City-owned Containers Collection pursuant to this chapter shall pay a solid waste impact fee upon issuance of a building permit as described below. The fee is based on a "Study" (Solid Waste Impact Fee Model), which is attached to the council communication, dated February 15, 2006, entitled "Solid Waste Impact Fee." Containers shall be delivered upon issuance of a certificate of occupancy for the unit/development by the chief building inspector.

1. Noncommercial.

a. Single-family residential dwelling unit: \$410.00 per unit;

b. Multifamily residential dwelling unit: \$139.00 per unit.

2. Commercial/industrial development: \$0.34 per square foot.

B. Ownership. The City shall retain ownership of the Containers. Persons owning or renting property served by such Containers are responsible for the security of the Containers. In the event of fire, theft, or other disappearance of Container from the property a replacement Container will be obtained from the City upon payment of the fee established in subsection A of this section. Persons owning or renting property served by such Containers shall, upon vacating the premises, leave the primary Container for the next occupant in a secure location upon the

premises. Persons who have ordered an extra Container shall, upon vacating the premises, call the City to have the extra container removed. Persons owning or renting property served by such Containers are responsible for the appearance and cleanliness of the Container.

C. Replacement Containers. A replacement Container may be obtained upon payment of the fee established in subsection A of this section. Replacement of a Container no longer usable due to normal wear shall not be subject to a replacement fee.

9.12.110 Requirements for Commercial Edible Food Generators and Food Recovery Organizations.

A. Tier One Commercial Edible Food Generators must comply with the requirements of this Chapter 9.12 commencing January 1, 2022, and Tier Two Commercial Edible Food Generators must comply commencing January 1, 2024.

B. Large venue or large event operators not providing food services, but allowing for food to be provided by others, shall require food facilities operating at the large venue or large event to comply with the requirements of this Chapter, commencing January 1, 2024.

C. Commercial Edible Food Generators shall comply with the following requirements:

1. Arrange to recover the maximum amount of Edible Food that would otherwise be disposed.
2. Contract with or enter into a written agreement with Food Recovery Organizations or Food Recovery services for: (i) the collection of Edible Food for Food Recovery; or (ii) acceptance of the Edible Food that the Commercial Edible Food Generator self-hauls to the Food Recovery Organization for Food Recovery.

3. Shall not intentionally spoil Edible Food that is capable of being recovered by a Food Recovery Organization or a Food Recovery Service.
4. Allow the environmental utilities director or his or her designee to access the premises and review records to ensure compliance with this section as permitted by 14 CCR Section 18991.4.
5. Keep records that include the following information, or as otherwise specified in 14 CCR Section 18991.4, and as may be amended:
 - a. A list of each Food Recovery service or organization that collects or receives its Edible Food pursuant to a contract or written agreement established under 14 CCR Section 18991.3(b).
 - b. A copy of all contracts or written agreements established under 14 CCR Section 18991.3(b).
 - c. A record of the following information for each of those Food Recovery services or Food Recovery Organizations:
 - i. The name, address and contact information of the Food Recovery service or Food Recovery Organization.
 - ii. The types of food that will be collected by the Food Recovery service or Food Recovery Organization.
 - iii. The established frequency that food will be collected.

iv. The quantity of food, measured in pounds recovered per month, collected by a Food Recovery service or Food Recovery Organization for Food Recovery.

D. Commercial Edible Food Generators shall submit an annual report, within thirty (30) days upon request by the City, that includes the information required by subsection (C) above to the environmental utilities director or his or her designee commencing on January 1, 2022 for Tier One Commercial Edible Food Generators and commencing January 1, 2024 for the Tier Two Commercial Edible Food Generators. The environmental utilities director or his or her designee is authorized to increase the reporting frequency to require semi-annual or quarterly reporting for some or all of the information listed above.

E. Food Recovery Organizations collecting or receiving Edible Food directly from Commercial Edible Food Generators, via a contract or written agreement established under 14 CCR Section 18991.3(b), shall maintain the following records, or as otherwise specified by 14 CCR Section 18991.5(a)(2):

1. The name, address, and contact information for each Commercial Edible Food Generator from which the organization receives Edible Food.
2. The quantity in pounds of Edible Food received from each Commercial Edible Food Generator per month.

F. Nothing in this ordinance or in 14 CCR, Division 7, Chapter 12 requires or authorizes the recovery of Edible Food that does not meet the food safety requirements of the California Retail Food Code.

G. Nothing in this ordinance shall be construed to limit or conflict with the protections provided by the California Good Samaritan Food Donation Act of 2017, the Federal Good Samaritan Act, or share table and school food donation guidance pursuant to Senate Bill 557 of 2017.

9.12.120 Accumulations of Solid Waste, Organic Waste, or Garbage Prohibited.

It is unlawful for any person to permit Solid Waste, Organic Waste, or Garbage to accumulate upon the premises owned or occupied by such person.

9.12.130 Container Collection.

A. Each Container subject to this Chapter shall be placed on the curb or parkway or in the alley for Collection, not earlier than the evening preceding and not later than 7:00 a.m. on the day of regular collection. Those Containers shall be removed from the curbs, parkways or alleys within 12 hours after the refuse has been collected therefrom.

B. The Collection services provided under this Chapter is rendered to all properties within the limits of the City, and no service shall be rendered outside the corporate limits of the City.

9.12.140 Collector's responsibility.

No City employees shall remove or dispose of, for such employee's individual use or benefit, any of the contents of any vessel, tank or receptacle used for the Collection, removal or disposal of Solid Waste, Organic Waste, or Garbage.

9.12.150 Disposing of Excluded Waste prohibited.

No person shall place any wearing apparel, bedding or other refuse from homes or other places where highly infectious or contagious diseases have prevailed or any explosive substance, poison, hazardous chemical, offal, or fecal matter in any receptacle or bundle offered for

collection by the City collector. Hazardous medical waste, including, but not limited to sharps, shall be handled by a licensed medical waste hauler and shall not be disposed of in materials offered for collection by the City. All items and substances identified in this section shall be collectively referred to and incorporated herein as "Excluded Waste."

9.12.160 Exclusive use of Containers.

A. It is unlawful for any person to dump or place any material into, or to utilize, any Containers provided under this Chapter without consent of the owner or lessee of the Container whenever a notice has been placed on the Container advising of the existence of this section.

B. It is also unlawful for any person, without the consent of the owner or lessee of the Container, to enter into said Container, whether or not a notice has been placed on such Container, for the purpose of salvaging items therein or for the purpose of utilizing the Container to rest or sleep therein.

9.12.170 Enforcement.

A. In addition to those penalties and procedures provided for in this Chapter, a violation of any provision of this Chapter may be enforced by the issuance of an administrative citation as set forth in Chapter 2.50 of this code.

B. Violations of this Chapter shall be prosecuted as infractions, and penalties imposed for such violations shall not be less than the minimum penalty amounts prescribed under 14 CCR Section 18997.2, as may be amended from time to time.

SECTION 2. Chapter 9.17 of Title 9 of the Roseville Municipal Code is hereby amended to read as follows:

Chapter 9.17

REFUSE HAULING AND RECYCLING

9.17.000 Short title.

This chapter shall be referred to as the City of Roseville Refuse Hauling and Recycling Ordinance.

9.17.010 Findings.

The ~~city~~City Council finds and declares that:

A. The City of Roseville (~~city~~City) currently operates a refuse collection service which provides periodic refuse collection and solid waste disposal from all residences and businesses within the ~~city~~City.

B. Lower rates and greater local control result when periodic refuse collection is a municipal function. It is in the best interest of the citizens of the ~~city~~City that periodic refuse collection remains a municipal service, and that no franchises be granted for such services.

C. Historically, the ~~city~~City has not provided for collection of construction related refuse on an irregular or special basis. Debris from construction, renovation and demolition of buildings (hereinafter "C&D waste" as defined in Section 9.17.020) represents a large portion of the volume of waste being generated in the ~~city~~City, and much of C&D waste is suitable for

recycling and reuse. Allowing private collection of such refuse would not adversely affect the cityCity's regular, periodic refuse collection enterprise.

D. Under California law, as embodied in the California Integrated Waste Management Act (California Public Resources Code Section 40000 et seq.), the cityCity is required to prepare, adopt and implement waste source reduction and recycling elements to reach landfill diversion goals, and is required to make substantial reductions in the volume of waste materials going to landfills, under the threat of penalties. State law further provides that the cityCity may recover its costs associated with implementing such waste diversion programs.

E. Persons collecting or hauling refuse for the sole purpose of recycling such refuse provide an important service to residents of the cityCity by assisting the cityCity in diverting solid waste from the Western Regional Landfill.

F. Requiring disposal of refuse at the Western Placer Waste Management Authority Materials Recovery Facility (MRF) located in Placer County, which is owned, operated and maintained by the Western Placer Waste Management Authority, a regional governmental joint powers authority of which the cityCity is a constituent member, ensures the proper allocation of waste volumes and recycle credits to the cityCity for all waste generated in the cityCity and disposed of at the MRF.

G. In order for the cityCity to obtain credit under state law for such diversion, reports from recyclers are necessary to document the quantity of refuse which is being recycled.

9.17.020 Definitions.

For purposes of this chapter the following definitions apply:

“Building division” means the building division of the department of development services of the City of Roseville. The building division issues certificates of occupancy and permits for commercial and residential construction, renovation and/or demolition.

“Bulky waste” means household furniture, tree and brush limbs larger than two inches in diameter, tree stumps and intact dead trees.

“C&D waste” means discarded materials generally not considered water soluble, and nonhazardous in nature, including, but not limited to, steel, glass, brick, concrete, asphalt material, pipe, gypsum, wallboard, wood and lumber from the construction, renovation, demolition or destruction of a structure as part of a construction, renovation, demolition or landscaping project, and including rocks, soils, tree remains, green waste and bulky waste that normally results from land clearing, landscaping and development operations for a construction, renovation and/or demolition covered project located in the City of Roseville.

“City” means the City of Roseville, a municipal corporation.

“Construction, renovation and/or demolition” means all building, landscaping, remodeling, addition, removal, demolition or destruction of any facility or structure located in the ~~city~~ [City](#), or any portion thereof, including, but not limited to, any tenant improvements to an existing facility or structure and including the use or disposal of designated recyclable and reusable materials.

“Construction, renovation and/or demolition waste recycling plan” means a written plan, on a form prescribed by the director of environmental utilities or representative, and submitted by a covered project applicant for the purpose of compliance with this chapter, including [the](#)

requirement to divert a goal to achieve a minimum of sixty-five 50 percent (65%) by weight
diversion requirement.

“Covered project” means and includes any project located in the ~~city~~City which consists of one or more of the following:

1. Demolition of a building or structure;
2. Demolition of a portion of a building or structure where a demolition permit is required;
3. Construction, addition, renovation or alteration of a single residential, commercial, industrial, or institutional building or structure of greater than 2,000 square feet;
4. Construction of a single residential, commercial, industrial, or institutional building or structure of less than 2,000 square feet if more than one such building is being constructed as part of the same development project. Examples include, but are not limited to, single-family homes built within a subdivision and multiple structures built on a single parcel of land.

“Department” means the environmental utilities department of the City of Roseville, unless otherwise specified.

“Designated recyclable and reusable materials” mean:

1. Masonry building materials generally used in construction, including, but not limited to, asphalt, concrete, rock, stone and brick;

2. Wood materials including any and all dimensional lumber, fencing or construction wood that is not chemically treated, creosoted, CCA pressure treated, contaminated or painted;

3. Vegetative materials including trees, tree parts, shrubs, stumps, logs, brush or any other type of plants that are cleared from a site for construction, renovation and/or demolition or other use;

4. Metals including all metal scrap such as, but not limited to, pipes, siding, window frames, door frames and fences;

5. Roofing materials including wood shingles, as well as asphalt, stone and slate based roofing material;

6. Salvageable materials includes all salvageable materials and structures including, but not limited to wallboard, doors, windows, fixtures, toilets, sinks, bath tubs and appliances.

“Director” means the director of environmental utilities, or authorized representative.

“Divert” or “diversion” means the setting aside of refuse for the purpose of recycling. Divert and diversion, for the purposes of this chapter, is achieved only when refuse is taken to the Western Placer Waste Management Authority Materials Recovery Facility identified and defined herein, and the quantities are attributed to the ~~city~~City service area.

“Franchisee” means a person or entity holding a nonexclusive franchise hauler permit issued pursuant to this chapter.

“Garbage” means and includes, but is not specifically limited to, the following: all putrescible animal and vegetable wastes resulting from the handling, preparation, cooking and

consumption of food, or resulting from decay or storage of meat, fish, fowl, fruit, or vegetables. It also includes all household and kitchen waste, paper, rags, cans and bottles.

"Green waste" means all tree and plant trimmings, grass cuttings, plants, weeds, leaves, branches, and other similar materials other than bulky waste or garbage.

"Hazardous waste" means any waste that is defined as hazardous waste under Section 40141 of the California Public Resources Code, as amended from time to time.

"Monthly waste generation/disposal and diversion report" means the form approved by the department, as amended from time to time, for the monthly reporting of refuse hauled, disposed and/or diverted in accordance with the provisions of this chapter.

"Person" means any individual, firm, company, corporation or other organization acting as principal, agent or officer, servant or employee, for him or herself or any other individual, firm, company, corporation or other organization.

"Recyclable material" means material which has been retrieved or diverted from disposal or transformation for the purpose of recycling, composting or salvage.

This definition shall include, but not be limited to, corrugated cardboard, newspaper, phone books, junk mail, magazines, ferrous metals, nonferrous metals, recyclable glass (including redemption glass), mixed metals, nonrecyclable glass, aluminum (including redemption aluminum), and No. 1 (Polyethylene terephthalate – PET) and No. 2 (High density polyethylene – HDPE) plastics.

“Recycler” means a person who provides collection or removal of ~~recyclable material~~Recyclables from a customer’s site and/or who accepts ~~recyclable material~~Recyclables from the public for the sole purpose of recycling 100 percent of the refuse collected or removed.

“Refuse” means garbage, rubbish, C&D waste or all of these.

“Refuse hauler” means a person who provides the hauling of refuse from a site, for disposal and recycling, where the refuse hauler provides a container, drop box, garbage can or other receptacle for use by the customer which is either retrieved or emptied by the refuse hauler, or where the refuse hauler collects or removes refuse from a designated location on the customer’s site. Where the refuse is hauled solely for recycling rather than disposal, such person shall not be considered a refuse hauler.

“Rubbish” means and includes all waste (other than garbage, green waste, bulky waste, and C&D waste), including, without limiting the generality of, the following: paper, cardboard, bedding, rubber tires, rags, sawdust, sweepings, plaster, brick, window glass, cement, crockery, shells, metals, metal products, ashes, and all non-organic accumulations from garden and/or yard areas, not including C&D waste.

“Source separated” means material separated at the point of generation from mixed solid waste that contains less than:

1. Ten percent of total weight in contaminating solid waste that is not a recyclable commodity, such as paper, glass, metal or wood; and
2. Thirty percent of total weight in contaminating solid waste that is not an inert;
and

3. Shall include no more than one percent of total weight in putrescible solid waste as part of the contaminating solid waste.

For purposes of this definition of “source-separated” material, “inert” means solid waste and recyclables that are source-separated and do not contain hazardous waste (as defined in 22 CCR Section 66261.3 et seq., and as may be amended from time to time), or soluble pollutants at concentrations in excess of applicable water quality objectives, none of which solid waste, recyclables or soluble pollutants contain putrescible wastes, including concrete (that may have steel reinforcing bar embedded in the concrete), fully cured asphalt, glass, plastics, fiberglass, asphalt or fiberglass roofing shingles, brick, slag, ceramics, plaster, clay and clay products and any other materials determined by CalRecycle to constitute inerts; further including all materials determined by the State Water Resources Control Board to constitute inerts, such as treated industrial wastes, dewatered bentonite-based and drilling mud; but excluding gravel, rock, soil, sand and similar materials as they exist in their natural state, whether processed or not, that have never been used in connection with any structure, development, grading or other human purpose.

“Western Placer Waste Management Authority Materials Recovery Facility (MRF)” means the materials recovery facility located at 3195 Athens Avenue, Lincoln, California, which is owned, operated and maintained by the Western Placer Waste Management Authority, a regional governmental joint powers authority of which the ~~city~~City is a constituent member.

9.17.030 Franchise required—Franchise application fee.

It is unlawful for any person to operate as a refuse hauler, including a refuse hauler of C&D waste from covered projects referenced in Section 9.17.050, without first obtaining a franchise from the ~~city~~City in accordance with this chapter. The franchise, if granted, shall be

nonexclusive. Consistent with the provisions of this chapter, an application for a nonexclusive refuse hauling franchise shall be filed with the director. The application fee shall be in the amount as established by resolution adopted by the [cityCity](#) Council, as amended from time to time. Notwithstanding the provisions of this section, a person who operates solely as a recycler shall not be required to obtain a franchise for refuse hauling.

9.17.040 Franchise term and franchise fee.

A franchise for refuse hauling shall be for a term of two years. In addition to a franchise application fee, each franchise shall be required to pay a franchise fee of six dollars and eighty-eight cents to the [cityCity](#) for every ton of refuse collected and disposed of within the [cityCity](#). The franchise fee set forth in this section may be amended from time to time by resolution of the [cityCity](#) council. The franchise fee shall be assessed based on the monthly reports required in Section 9.17.060, and shall be paid monthly by the franchisee upon submission of the required report.

A franchise may be renewed for one or more additional periods aggregating not more than two years, upon the recommendation of the director. Any person holding a franchise for refuse hauling shall obtain, provide and continuously maintain a [cityCity](#) business license, and shall obtain, provide and continuously maintain insurance pursuant to [cityCity](#) insurance requirements as set forth in Section 9.17.090.

If franchise fees are not paid by the franchisee at the times required by this section, then in addition to the franchise fees, the franchisee shall pay a late payment charge in an amount

equal to two percent of the franchise fee that is due, plus interest equal to one and one-half percent per month of the entire balance due until paid in full.

9.17.050 ~~Hauling and recycling of C&D waste from covered projects~~ Diversion requirements.

A. A covered project shall divert from disposal not less than ~~50-~~sixty-five percent (65%) by weight of the C&D waste generated from the covered project. All C&D waste shall be disposed of at the MRF.

B. A covered project shall divert one hundred percent (100%) of rock, soil, tree remains, tree, and other vegetative matter debris shall be diverted from disposal to landfills through recycling, composting, reuse and/or other diversion programs.

9.17.060 Plan required prior to issuance of building or demolition permit.

~~AB.~~ No grading, building or demolition permit shall be issued by the building division for a covered project until the department has approved a Construction, Renovation and/or Demolition Waste Recycling Plan (the "Plan") for the covered project. The Plan shall be submitted to the department for approval, in a format prescribed by the director, as a component of the construction, building, renovation or demolition process. The pPlan shall contain a reasonably accurate estimate of the tonnage or other specified units of C&D waste expected to be generated by the covered project and shall identify the refuse haulers and/or recyclers to be used for the disposal of C&D waste.

BC. During the term of the covered project, the project applicant shall recycle or divert the required percentage of C&D waste, in accordance with the approved ~~construction,~~

~~renovation and/or demolition waste recycling plan~~Plan and any procedures established by the director, and shall keep complete and accurate records thereof, including the weight of the C&D waste diverted.

C.D. Failure to comply with the requirements of this section, including, but not limited to, the requirements of the ~~construction, renovation and/or demolition waste recycling plan~~approved Plan and/or the obligation to keep complete and accurate records, may be grounds for issuance of a “stop work” order in addition to other remedies provided in this chapter and under state law.

9.17.070 Compliance with diversion requirements.

A.E. Within 30 days following the completion of the demolition phase of a covered project, and within 30 days following the completion of the construction phase of a covered project, the project applicant shall, as a condition precedent to final inspection and to issuance of any certificate of occupancy or final approval, submit a recycling report to the department, to demonstrate completion of compliance with the requirements of this section.

B. The report provided pursuant to this section shall show the types and tons or other amount of materials recycled, supported by written documentation of the records of measurement from the MRF. Receipts and weight tags will be used to verify that which is reported. The building division will not issue a certificate of occupancy unless the director or his or her designee first determines that the ~~construction, renovation and/or demolition waste recycling plan has been fulfilled~~covered project complied with the Plan.

9.17.080~~060~~ Reports required.

A. On a monthly basis, a person holding a refuse hauling franchise shall complete a monthly waste generation/disposal and diversion report, and submit that report to the department before the 15th day of each month setting forth the total tons of refuse hauled from the ~~city~~City and the total tons of refuse disposed at the MRF all during the preceding month. The report shall show the types and tons or other amount of materials recycled, supported by written documentation of the records of measurement from the MRF. Receipts and weight tags will be used to verify that which is reported.

B. Unless otherwise specified, all reports required by this section shall be in a format determined by the director or his or her designee.

C. If the monthly report required under subsection A is not filed by the due date, the report shall be deemed delinquent, and the franchisee shall pay to the ~~city~~City a delinquent report charge in the amount of \$50.00. If the report remains delinquent for more than 30 days, the franchisee shall pay to the ~~city~~City a delinquent report charge in the amount of \$100.00. Such delinquent report charge shall be in addition to any franchise fees or other charges payable by the franchisee for the same period of time.

9.17.~~090~~70 Regulations.

The director shall provide regulations as to the size, construction, and numbering of roll-on or other disposal boxes used by franchisees and may establish other regulations relating to refuse hauling services. Refuse haulers, including a refuse hauler of C&D waste from covered projects referenced in Section 9.17.050, shall be required to obtain an encroachment permit pursuant to Chapter 13.28 prior to placing any disposal box or other material within the public right-of-way.

9.17.100~~080~~ Rates.

Rates for refuse collection services provided by nonexclusive franchisees shall not be regulated by the ~~city~~City.

9.17.110~~090~~ License, bonds and insurance.

In addition to a valid ~~city~~City business license, every person operating as a refuse hauler within the ~~city~~City shall maintain public liability insurance in the amount of \$1,000,000.00 per occurrence, \$2,000,000.00 aggregate; and automobile liability insurance in the amount of \$500,000.00 per occurrence and \$1,000,000.00 aggregate.

Failure to continuously maintain any of the foregoing is unlawful and grounds for revocation of the franchise.

9.17.120~~100~~ Periodic refuse collection prohibited.

It is unlawful for any person, whether or not holding a franchise as a refuse hauler, to provide refuse disposal services on a regular or periodic basis. Franchises shall be issued only for temporary refuse hauling prior to issuance of an occupancy permit or for the collection of C&D waste. Regular ongoing or periodic refuse collection shall be provided by the ~~city~~City.

9.17.130~~110~~ Proper disposal of refuse and recyclables required.

All refuse collected, removed and/or disposed of by a person holding a nonexclusive refuse hauling franchise or a recycler of C&D waste from a covered project must be delivered to the MRF.

All refuse collected, removed and/or disposed of by a person holding a nonexclusive refuse hauling franchise, a recycler of C&D waste from a covered project or any other recycler

must be handled so that none of the refuse and/or recyclables drops, falls or spills upon the ground or in any way constitutes a nuisance.

9.17.140-115 Nonexclusive franchisee-provided solid waste containers.

A. General. Containers used for storage of solid waste must be designed and constructed to be watertight and prevent the leakage of liquids. All containers shall be painted and must prominently display the current name and telephone number of the franchisee, refuse hauler or recycler. Containers that do not display the current name and telephone number of the franchisee, refuse hauler or recycler will be considered an abandoned container pursuant to Section ~~9.17.116~~ 9.17.150.

B. Cleaning, Painting and Maintenance. Franchisee, refuse hauler or recycler shall make reasonable efforts to replace, clean or repaint all containers as needed so as to present a clean appearance.

9.17.116-150 Abandoned containers.

A. For the purposes of this section, a refuse or ~~recyclable material~~ recyclables container shall be considered "abandoned" or an "abandoned container" under any of the following circumstances:

1. Upon the nonexclusive franchisee's failure to remove the container within the time period specified by the director upon termination or revocation of the nonexclusive franchise pursuant to Section 9.17.1620(C).

2. Upon the nonexclusive franchisee's failure to remove the container within 30 days after the expiration of the nonexclusive franchise granted to the franchisee.

3. Upon the nonexclusive franchisee's failure to dispose of the contents of the container within five days after the director issues a written notice to franchisee to dispose of the contents of the container.

4. If the containers, including trash compactors, are located on **cityCity** property and do not prominently display the current name and phone number of the nonexclusive franchisee, refuse hauler or recycler as required under Section 9.17.7.115140.

B. If the franchisee, refuse hauler or recycler abandons any container used to provide nonperiodic commercial debris collection services, the **cityCity** may remove the container and/or dispose of the contents of the container.

C. If the **cityCity** removes a container abandoned by franchisee, refuse hauler or recycler and/or disposes of the contents of any container abandoned by franchisee, refuse hauler or recycler, the **cityCity** may charge franchisee, refuse hauler or recycler for all **cityCity** costs incurred in such removal and disposal. Franchisee, refuse hauler or recycler shall reimburse the **cityCity** for such costs within 10 days after issuance of the **cityCity**'s invoice for such costs.

D. If a container is abandoned in accordance with this section, the **cityCity** may do any of the following:

1. Use **cityCity** resources to move the abandoned container(s) to the **cityCity**'s Corporation Yard, located at 2005 Hilltop Circle in Roseville, California.

2. Notify the franchisee, refuse hauler or recycler by certified letter that the container is being stored at the **cityCity**'s Corporation Yard.

3. Require that any and all costs associated with the relocation of the abandoned container(s) be borne by the franchisee, refuse hauler or recycler and paid in full to the ~~city~~City prior to the ~~city~~City's return of said containers.

4. Dispose of the abandoned containers as necessary if within 90 days after the ~~city~~City takes possession of the abandoned container, the franchisee, refuse hauler or recycler does not reclaim the container and/or pay all relocation costs in full to the ~~city~~City.

9.17.16~~20~~ Franchise revocation—Liability.

A. Violation of state or county laws, this chapter or other provisions of the Roseville Municipal Code relating to garbage, rubbish, refuse hauling and recycling, collection, the franchise ordinance granting the individual franchise, or the regulations promulgated by the director pursuant to this chapter, shall be grounds for revocation of the franchise.

B. In the event the nonexclusive franchise is revoked:

1. Franchisee shall have no right or authority to engage in solid waste collection, transportation or disposal operations in the ~~city~~City.

2. Franchisee shall remain liable to the ~~city~~City for any and all franchise fees that would otherwise be payable by franchisee, for any and all late payment charges and interest assessed pursuant to Section 9.17.040 of this chapter and for any and all delinquent report charges assessed pursuant to Section 9.17.0~~680~~ of this chapter.

3. Franchisee shall have a continuing obligation to submit to the ~~city~~City all reports required by Section 9.17.0~~680~~ of this chapter which relate to solid waste activities performed by franchisee up to and including the date of termination.

C. In the event the nonexclusive franchise is terminated or revoked by the director, franchisee shall remove all of franchisee's solid waste containers from all of franchisee's collection service locations and shall properly dispose of all solid waste in such containers. Any solid waste containers belonging to franchisee and not removed within 10 days of the revocation of the franchise shall be considered an abandoned container pursuant to Section 9.17.14650.

9.17.125170 Franchise revocation—Appeal.

A. Any person aggrieved by or dissatisfied with any decision or determination of the director relating to the revocation of a franchise may appeal such action first to the ~~city~~City Manager and then, if applicable, to the ~~city~~City Council by filing a written appeal with the appropriate fee within 10 days from the date of action by the director or the committee's/commission's action. If the 10th day falls upon a weekend or holiday, the appeal period shall be extended to the end of the next business day. All appeals shall be filed with the ~~city~~City Clerk's office. The decision of the ~~city~~City Council on an appeal is final.

B. The failure to file and prosecute all appeals available pursuant to the provisions provided herein shall be deemed a failure to exhaust administrative ~~remedies, and~~remedies and shall act as a complete bar to any legal proceeding challenging the subject decision or determination.

9.17.130180 Permit compliance.

Compliance with this chapter may be listed as a condition of approval of any project.

9.17.190140 Transfer or assignment of franchise prohibited.

A person holding a nonexclusive refuse hauling franchise shall not sell, lease, transfer, assign or otherwise dispose of, either in whole or in part, whether by forced sale, merger, consolidation, reorganization or otherwise, a refuse hauling franchise issued pursuant to this chapter without first obtaining the prior written consent of the director. Any such consent shall be subject to terms and conditions as may be prescribed by the director. This restriction includes the transfer of ownership of the franchise, or a majority of ownership or control of the franchise or a conveyance of a majority of the franchise's stock to a new controlling interest. A franchise shall become void upon the abandonment of the business as determined by the director.

9.17.~~150~~200 Recycling encouraged.

Nothing in this chapter shall limit the right of an individual to donate, sell or otherwise dispose of recyclables, provided that such disposal is in accordance with the provisions of this chapter.

9.17.~~160~~210 Violations.

A. Violation of any provision of this chapter or the regulations adopted pursuant to this chapter is unlawful, and may be charged as a misdemeanor or infraction in the discretion of the ~~city~~City Attorney.

B. Violation of any provisions of this chapter or the regulations adopted pursuant to this chapter is declared to be a public nuisance, which may be abated by appropriate civil action.

C. The remedies provided in this chapter are cumulative and are in addition to any other remedies provided by law.

9.17.~~220~~170 Severability.

If any provision, clause, sentence or paragraph of the ordinance codified in this chapter or the application thereof to any person or circumstances is held invalid, such invalidity shall not affect other provisions or applications of the ordinance codified in this chapter which can be given effect without the invalid provision or application, and to this end the provisions of the ordinance codified in this chapter are severable. The ~~city~~City Council hereby declares that it would have adopted the ordinance codified in this chapter irrespective of the invalidity of any particular portion thereof.

SECTION 3. This ordinance shall be effective June 1, 2022 as an urgency measure.

SECTION 4. Urgency Ordinance.

This ordinance is hereby declared to be an urgency measure, immediately necessary for the public peace, health and safety and shall take effect June 1, 2022. A statement of urgency is as follows:

It is necessary to amend Chapters 9.12 and 9.17 of Title 9 of the Roseville Municipal Code pursuant to this urgency ordinance to conform with the requirements of Senate Bill 1383 – Short-lived Climate Pollutants and CalRecycle’s Organics Regulations (CCR Title 14 Division 7, Chapter 12), to secure \$193,659 in CalRecycle grant funding under the SB 1383 Local Assistance Grant Program, and for the orderly and necessary continuance of operations of the City.

SECTION 5. Posting.

The City Clerk is hereby authorized and directed to post a true copy of the foregoing ordinance in each of three (3) conspicuous locations in the City and she shall immediately after such posting enter in the Ordinance Book under the record of the ordinance a certificate under her hand stating the time and place of said publication by posting.

PASSED AND ADOPTED by the Council of the City of Roseville this 1st day of June, 2022, by the following vote on roll call:

AYES COUNCILMEMBERS: Houdesheldt, Alvord, Roccucci, Mendonsa, Bernasconi

Water Meter Retrofit/Conservation Program

Ordinance No. 4001

ORDINANCE NO. 4001

ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE ADDING SECTION 14.04.100 OF CHAPTER 14.04, AND CHAPTER 14.07, AMENDING SECTIONS 14.08.020, 14.08.090, 14.08.091, 14.08.105, 14.08.106, 14.08.125, AND 14.08.126 OF CHAPTER 14.08, AND SECTION 14.16.100 OF CHAPTER 14.16 AND DELETING SECTION 14.08.110 OF CHAPTER 14.08 OF TITLE 14 RELATING TO WATER AND WASTEWATER ISSUES AND THE WATER METER RETROFIT PROGRAM

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. Section 14.04.100 of Chapter 14.04 of Title 14 of the Roseville Municipal Code is hereby added to read as follows:

Section 14.04.100 Billing for metered water services on multi-family parcels

As part of the meter retrofit program, billing for water services will be as follows:

- A. Multiple dwelling units on a single assessor parcel operating off of a single water service line.
 - 1. For a water service feeding three or less dwelling units, a monthly service charge based on the meter size will be established for each connection and residential metered water rates will be used to bill commodity charges.
 - 2. For a water service feeding more than three dwelling units, a monthly service charge based on meter size will be established and non-residential metered water rates will be used to bill commodity charges.
- B. Multiple water services serving a single dwelling unit, or multiple parcels maintained as a single residence.
 - 1. A monthly service charge based on the meter size will be established for each connection.
 - 2. Residential metered water rates will be used to bill commodity charges.
- C. Multiple units on multiple assessor parcels operating off of a single water service line.
 - 1. In the event a water service line serves two or more dwelling units on two or more parcels, the billing charges will be determined by the Environmental Utilities Director.
- D. Multiple privately owned units operating off of a common water system (such as, but not limited to, condominiums).
 - 1. Each owner unit will receive a flat-rate water bill. The flat rate will be calculated based on the amount due for the prior year's usage for the entire complex (not limited to a building or unit within the complex). The Environmental Utilities Director has the authority to calculate the rate each June using the prior twelve months of usage ending in April. The amount will be calculated as follows:
 - i. A monthly service charge based on the meter size for each connection.
 - ii. Non-residential water rates will be used to calculate commodity charges.

- iii. The monthly amount billed to each unit will be the total amount due for all meters and backflow maintenance and repair for the complex for the prior year, divided by the total number of units, divided by 12 months.
 - iv. If an owner (or owners) is/are delinquent, the unpaid balance will be collected through the use of all available legal means.
 - v. The water rates used will be the rates in effect on June 1st.
 - 2. The usage used to calculate the flat rate will include all usage to the complex including landscape irrigation, pools and common areas.
 - 3. The City will not adjust the rate to accommodate differences in dwelling size or occupancy.
 - 4. Each property owner, whether the dwelling is occupied or vacant, is required to maintain water service.
- E. Mobile home parks with a private on-site water system and metered as part of the retrofit program.
- 1. Each dwelling owner will receive a flat-rate water bill. The flat rate will be calculated based on the amount due for the park for the prior year's usage. The Environmental Utilities Director will calculate the rate each June using the prior twelve months of usage ending in April. The amount will be calculated as follows:
 - i. A monthly service charge based on the meter size for each connection.
 - ii. Non-residential water rates will be used to calculate commodity charges.
 - iii. The monthly amount billed to each unit will be the total amount due for all meters and backflow maintenance and repair for the park for the prior year, divided by the total number of mobile home pads, divided by 12 months.
 - iv. If a bill recipient is delinquent, the unpaid balance will be collected through the use of all available legal means.
 - v. The water rates used will be the rates in effect on June 1st.
 - 2. The usage used to calculate the flat rate will include all usage to the park including landscape irrigation, pools and common areas.
 - 3. The City will not adjust the rate to accommodate differences in dwelling size or occupancy.
 - 4. The dwelling owner, if the dwelling is vacant, is required to maintain water service. If the mobile home pad is not leased, the bill will be the responsibility of the owner of the mobile home park.
- F. Apartment complexes with a private on-site water system.
- 1. A monthly service charge based on the meter size will be established for each connection.
 - 2. Non-residential metered water rates will be used to bill commodity charges.
 - 3. The City will not provide individual water bills or allocate bills to individual occupants/users.

SECTION 2. Chapter 14.07 of Title 14 of the Roseville Municipal Code is hereby added to read as follows:

Chapter 14.07 Water Meter Retrofit Program

Section 14.07.010 Definitions

For the purposes of this chapter, the following are defined as:

- A. "Director" means the Environmental Utilities Director of the City.
- B. "Single-family parcel" means a single dwelling unit with one water service line and only one service connection point on a single assessor's parcel.
- C. "Multi-family parcel" means more than one dwelling unit operating off of one or more shared water service lines on a single assessor's parcel. (Excludes apartments, condominiums, and mobile home parks).
- D. "Apartment complex" means a complex where multiple dwelling units are located on a single parcel and dwelling units are not owned individually.
- E. "Condominium complex" means a complex where dwelling units are individually owned.
- F. "Private water system" means a water system where the service lines and related equipment are owned and maintained by the property owner.
- G. "Public water system" means a water system where the service lines and related equipment are owned and maintained by the City.
- H. "Master meter" means a meter that services more than one dwelling unit on a private water system.
- I. "Sub-metering" means breaking a master meter into components based on individual on-site meters.

Section 14.07.020 General meter retrofit installation provisions

- A. Installation of a water meter will be made at the separation of the public and private system within the public easement.
- B. City will install meter sized to meet anticipated demands based on owner direction.
- C. Meter installation work will be completed by the City of Roseville.
- D. The owner of the real property served by the City shall be charged with, and personally responsible for, all associated costs related to the installation of a water meter, or meters, on owned property and for any subsequent water meter surcharge.
- E. Each parcel shall have at least one metered service connection regardless of the number of dwelling units served.
- F. If owner chooses to abandon a water service line the City will disconnect it from the City's system.
- G. Sub-meters will not be utilized for billing by the City.

Section 14.07.030 Multi-family parcel meter installations

- A. Multiple units on a single assessor parcel operating off of a single water service line.
 - 1. A single meter will be installed on the existing water service line within the right of way (at existing curb stop).
 - 2. If requested by owner, the City can install additional meters at the property line within the public utility easement. Owner will be responsible for additional meter

installations. Full payment of meter installation cost is due upon installation. A ten-year repayment plan may be authorized by the Director, as provided in 14.07.050.

3. If multiple water services exist, the owner may combine the services to a single water service. The owner is responsible for combining the services and abandoning on site services where no meter will be installed.
4. If multiple surcharges are currently being billed, but fewer meter installations are actually installed, a refund (up to a maximum of 12 months) will be made for surcharges paid over and above the number of actual installations made.

B. Multiple water services serving a single dwelling unit, or multiple parcels owned by a single owner and maintained as a single residence.

1. Connections at each parcel will be verified by City.
2. The owner shall identify which connection(s) a meter will be installed on.
3. If multiple water services exist, the owner may combine the services to a single water service. The owner is responsible for combining the on-site services and abandoning on site services where no meter will be installed.
4. If multiple connections exist, the installation will be evaluated for cross connection control. Meter setters with dual check assemblies may be required, requiring the owner to install a thermal expansion relief to the system.
5. If property owner requests additional services, full payment of meter installation costs for these additional services is due upon installation. An alternate payment plan may be authorized by the Finance Director.

C. Multiple units on multiple assessor parcels operating off of a single water service line.

1. A single meter will be installed on the existing service line and additional meters, one for each parcel, will be installed at the property line within the public utility easement.
2. The property owner will be required to connect additional service lines and make whatever separation is required on site (including obtaining the proper building permit).
3. If separation is not completed, the owner of the property served through the adjacent parcel will be required to separate the on-site services upon any improvements to the property that would result in a water/sewer tenant improvement or upon sale of the property.
4. A ten-year repayment plan may be authorized by the Director, as provided in 14.07.050.

D. Multiple privately owned units operating off of a common (either public or private) water system (such as, but not limited to, condominiums).

1. One or more master meters will be installed at the separation between the public and private systems but within the existing public utilities easement.
2. Multiple points of connection will require multiple meter installations.
3. Cross connection surveys will be completed by City to determine the degree of hazard involved. Appropriate backflow prevention shall be installed by City with the meter improvements. This may require the owner to install a pressure relief feature on the water system.
4. A surcharge will be calculated based on the actual cost of metering and cross connection control. The total cost will be amortized over 10 years using the 5-

year average City pooled investment interest rate. The annual amount due will be divided on a per unit basis and billed to each unit owner monthly.

- E. Mobile home parks with a private on-site water system.
 - 1. One or more master meters will be installed at the separation between the public and private systems but within the existing public utilities easement.
 - 2. Multiple points of connection will require multiple meter installations.
 - 3. Cross connection surveys will be completed by City to determine the degree of hazard involved. Appropriate backflow prevention shall be installed by City with meter improvements. This may require the owner to install a pressure relief feature on the water system.
 - 4. Mobile home park owner is responsible for the cost of meter installation and system modification, if required.
 - 5. Payment terms for meter installation services will be arranged between the owner and the Finance Director.
- F. Apartment complexes with a private on-site water system.
 - 1. One or more master meters will be installed at the separation between the public and private systems but within the existing public utilities easement.
 - 2. Multiple points of connection will require multiple meter installations.
 - 3. Cross connection surveys will be completed by City to determine the degree of hazard involved. Appropriate backflow prevention shall be installed by City with meter improvements. This may require the owner to install a pressure relief feature on the water system.
 - 4. Mobile home park owner is responsible for the cost of meter installation and system modification, if required.
 - 5. Payment terms for meter installation services will be arranged between the owner and the Finance Director.

Section 14.07.050 Meter Retrofit Program.

- A. Surcharges for the meter retrofit program shall be imposed on each single-family and multi-family parcel based on the number of meters installed.
- B. The water meter surcharge and related water bill is the responsibility of the property owner.
- C. In order to account for the cost of retrofitting meters throughout the community, pursuant to federal mandate, the following rates are hereby imposed:
 - 1. Already metered: \$0.00/mo.
 - 2. Meter-ready: \$1.58/mo.
 - 3. Full meter retrofit: \$7.20/mo.
 - 4. Nonresidential customers: \$0.00/mo./DUE.
 - 5. Under certain circumstances, the surcharge will be based on actual cost of meter installation as identified within this chapter.
- D. For the purposes of this section "meter-ready" shall mean those services which have been made meter-ready by installation of a meter box and meter setter per city standards. Services made meter-ready by the city shall be charged according to the full meter retrofit rate.

E. For purposes of this section, "non-residential customers" shall be defined as commercial, industrial, manufacturing, or other non-residential land uses including residential complexes. Actual costs associated with meter installation will be due from these "non-residential customers" upon meter installation.

Section 14.07.060 Low-income meter retrofit surcharge reduction.

A. Effective July 1, 2001, any household with total income no greater than that specified by the U.S. Department of Housing and Urban Development as "very low income" may apply for a fifty percent reduction in the water meter retrofit surcharge as charged under the provisions of Section 14.08.106. Applications for a reduced surcharge shall be on forms supplied by the City. All information required to be given on such forms shall be supplied by the applicant on behalf of the household under penalty of perjury.

B. A reduced surcharge shall be granted a qualifying household which files applications with the Finance Director. A change of address terminates the reduction provided in this section, but a new application at a new address may be made and the reduced surcharge rate shall be allowed, if the requirements set out in this section are satisfied.

C. For the purposes of this section, a "qualifying household" is defined as any household which owns and currently resides at the address for which application is made, with a verifiable gross household income no greater than that specified by the U.S. Department of Housing and Urban Development as "Very Low Income" for Placer County.

D. The reduced surcharge will apply to future utility bills for the premises occupied by the applicant at the time of application. The reduction will not be applied retroactively.

E. The reduction provided in this section may be allowed in addition to the senior citizen rate reduction provided under Section 14.08.120.

Section 14.07.070 Prepayment of meter retrofit surcharge.

A. Effective with the inclusion of the meter retrofit surcharge on the monthly utility bill as provided in Section 14.08.106, the remaining meter retrofit surcharge due may be paid in full. The prepayment will be in accordance with a schedule discounting the monthly surcharge using a five and five tenths percent (5.5%) discount rate.

B. The prepayment will apply to the balance of the surcharge assigned to a premises. A change of address will not result in a credit for prior prepayment. If a surcharge has been assigned to the new premises, it will not be affected by a prepayment on a prior premises.

C. Prepayments may not be required as a result of sale or exchange of a residence.

D. Prepayments will be made to the utility billing office of the finance department.

SECTION 3: Sections 14.08.020, 14.08.090, 14.08.091, 14.08.105, 14.08.106, 14.08.110, 14.08.125 and 14.08.126 of Chapter 14.08 of Title 14 of the Roseville Municipal Code are hereby amended to read as follows:

Section 14.08.020 Service connections-Application-Costs.

A. The water division shall install service connections and lay service pipes up to the coterminous of the public easement or interest in land and the property of the applicant, except in

the case of improvements installed pursuant to the subdivision regulations, all of which improvements shall be the sole responsibility of the developer. Ordinarily, such service pipes shall terminate within two feet in back of a sidewalk. Where there is no sidewalk, the location of the terminal of the service pipes shall be determined by the Environmental Utilities Director based upon where a sidewalk would ordinarily be located. The responsibility of the city with respect to maintenance of such service connections and service pipes shall not extend, in any case, beyond the terminal of the service pipes or located of the water meter if one is installed.

B. The size of such service connections and pipes shall be determined by the applicant by reference to the Uniform Plumbing Code. The Environmental Utilities Director is not responsible for verifying the calculations and is not responsible for any pressure problems related to improperly sized services.

C. Prior to the installation of such service connections and pipes, the applicant shall pay to the city the estimated costs of installation.

D. The cost of installation shall be established by the Environmental Utilities Director or his designee, based upon the estimated costs of labor, materials, equipment costs and rentals, and administrative costs. Upon the completion of an installation and approving inspection of any connection, the director or his designee shall refund any amounts collected with the application which exceed the actual costs.

Section 14.08.090 Service charges for metered service

There shall be due and payable the following monthly charges, upon submission of the bill by the City to the owner of the property supplied with service, for all treated water measured by meters for residential, commercial, industrial and manufacturing or other purposes:

A. Monthly Quantity Rates.

		Inside City	Outside City
1.	Residential Accounts		
	First 1,200 cu. ft.	0.22 per 100 cu. ft.	.35 per 100 cu. ft.
	Next 3,800 cu. ft.	0.44 per 100 cu. ft.	.71 per 100 cu. ft.
	Over 5,000 cu. ft.	0.66 per 100 cu. ft.	1.05 per 100 cu. ft.
2.	Non-residential Accounts		
	All water use	0.44 per 100 cu. ft.	.71 per 100 cu. ft.

B. Monthly Service Charges.

Meter Size (Inches)	Peak Flow Rate (gallons per minute)	Inside City	Outside City
5/8	20	\$ 10.35	\$ 16.60
3/4	30	10.35	16.60
1	50	16.70	26.70
1-1/2	100	32.20	51.50
2	160	50.85	81.40
3	350	94.55	151.30
4	600	157.40	251.80
6	1250	312.30	499.70
8	1800	500.20	800.30
10	2900	718.60	1149.70
12	4300	1342.00	2147.20

C. The total amount due and payable shall be the sum of the monthly service charge plus the quantity rate. The monthly service charge is due and payable regardless of whether water has been consumed. The service charge shall be the greater of the charge based on the meter size or flow rate. No service charge shall be made for fire service that has backflow prevention with detector check devices approved by the Environmental Utilities Director.

D. For purposes of charging for treated water measured by meters:

1. A residential account is defined as a single metered water service which serves three or less dwelling units.
2. A nonresidential account is defined as a single metered water service which serves more than three dwelling units, or serves commercial, industrial, manufacturing, irrigation or other nonresidential land uses.

Section 14.08.091 Service charge outside city limits.

Charges for water service delivered outside the corporate limits of the city will be at a rate 60% higher than the customers residing within City of Roseville City limits.

Section 14.08.105 Installation of water meters-New Construction

A. New Construction. A water meter shall be required for all residential dwelling units for which a building permit was issued after January 1, 1992.

B. Installation and Location.

1. All water meters and metering equipment will be supplied and installed by the City upon the service premises at a location approved by the Environmental Utilities Director.
2. The following charges for water meter installation shall be made:
 - a. A seventy-five dollar (\$75.00) labor charge for installation shall be paid by the applicant for service prior to installation. The labor charge shall be increased by the Finance Director as labor costs increase, as reflected in the adoption of the City's salary ordinances.
 - b. A meter supply charge shall be paid by the applicant for service prior to installation. The meter supply charge shall be equal to the per meter amount of the most recent water meter bid awarded by the City.
 - c. In addition to the direct meter supply charge, additional charges any apply for meter appurtenances as required by the Environmental Utilities Director. This includes, but is not limited to, features required to make meter ready for remote reading.
 - d. A seventy-five dollar (\$75.00) water quantity charge per unit for water use during construction of residential units shall be paid by the applicant prior to meter installation. The water quantity charge shall be increased by the Environmental Utilities Director to reflect increases in water supply rates.
3. All water meters shall be safely accessible to authorized employees of the City at all times for inspection, testing and reading.
4. The City may require a customer to relocate a metering installation, at customer's expense, if any existing water meter location becomes inaccessible or for other operational needs.
5. Property owners of condominium and apartment complexes are liable for costs to install meters on their property upon receipt of bill for such services.

C. Rights of Access.

1. The City shall have the right of access to the customer's premises, at all reasonable hours for any purpose related to the furnishing of water service including, but not limited to meter reading, testing, inspection, construction, maintenance and repair of meter.
2. Service may be refused or disconnected if permanent safe accessibility is not provided by the customer.
3. Upon termination of service, the City shall have the right of access to the service premises to remove the water meter.

D. Customer Responsibilities.

It shall be the duty of each customer upon whose premises the city has installed a water meter to ensure that such meters are not damaged, destroyed or interfered with and, in the case of any defect in any such meter, to notify the city. The customer is also responsible for keeping the meter box clear and accessible for reading and maintenance by keeping landscape and other improvements from covering or encroaching over the meter box.

E. Metered Water Rate.

New services installed after January 1, 2002 will be placed on a metered water rate.

SECTION 4. Section 14.08.110 of Chapter 14.08 of Title 14 of the Roseville Municipal Code is hereby deleted.

SECTION 5. Sections 14.16.100.2 of Chapter 14.16 of Title 14 of the Roseville Municipal Code is hereby amended to read as follows:

Section 14.16.100.2 Low strength-low quantity commercial or industrial users.

A. For commercial or industrial users described in subsection A of Section 14.16.100.1, sewer units are as follows:

1. Special low-density use, one per five employees or fraction:
 - a. Parking garages,
 - b. Warehouses,
 - c. Storage facilities;
2. Low-density users, one-sixth per one thousand square feet:
 - a. Churches (without kitchen, meeting hall),
 - b. Low-usage retail stores:
 - Hardware stores
 - Appliance stores
 - Furniture stores
3. Medium-density users, one-third per one thousand square feet:
 - a. Theaters,
 - b. Offices,
 - c. Auditoriums, halls, lodges,
 - d. Retail stores,
 - e. Schools (without cafeterias or gymnasiums),
 - f. Banks, financial offices,
 - g. Bowling/entertainment centers (without kitchen);
4. High-density users, two-thirds per one thousand square feet:
 - a. Barber/beauty shops (with lavatories),
 - b. Bars,
 - c. Medical/dental offices,
 - d. Schools (with cafeterias or gymnasiums),
 - e. Service stations,
 - f. Sports/fitness centers;
5. Special commercial users:
 - a. Carwashes (per automatic washing stall), eight units,
 - b. Carwashes (per self-service stall), two units,
 - c. Laundromats, two-thirds per washer,
 - d. Markets (without disposal), two-thirds per one thousand square feet,
 - e. Markets (with disposal), two per one thousand square feet,
 - f. Restaurants, bakeries, cafes, two per one thousand square feet,
 - g. Mortuaries two per one thousand square feet,
 - h. Hospitals, one-half per licensed bed,
 - i. Resthome/convalescent hospital, one-third per licensed bed;
6. Other commercial or industrial users, based on study by the Environmental Utilities Director.

B. General Regulations:

1. Not less than one connection per building.
2. Special provisions can be made within each category where, in the judgment of the city Environmental Utilities Director, application of ordinance produces inequities or irregularities requiring revision.
3. Prescribed connection charges apply only to the particular uses listed; where multiple uses, within the meaning of the connection charge ordinance, are contained in the same structure, the city Environmental Utilities Director, at his discretion, will allocate the respective square footage or employment dedicated to each use, and will determine a composite collection charge composed of the respective collection charges for each such use.
4. Classification of shell buildings having no use when connecting to the sewage system shall be determined based on the judgment of the city Environmental Utilities Director based on building permit data, applicable zoning, and plans of the developer. Subsequent modifications to such buildings may result in reclassification and the assessment of additional incremental charges. No refunding of previously paid connection charges will be made where modifications are made to any structure which place it in a classification with a lower connection charge rates.

SECTION 6. This ordinance shall be effective at the expiration of thirty (30) days from the date of adoption.

SECTION 7. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

PASSED AND ADOPTED by the Council of the City of Roseville this 5th day of November, 2003, by the following vote on roll call:

AYES COUNCILMEMBERS: John Allard, Richard Roccucci, Jim Gray, Gina Garbolino, Rocky Rockholm

**Sierra Vista Specific Plan Infrastructure Fee
Ordinance No. 4932**

ORDINANCE NO. 4932

**ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE
ADDING CHAPTER 4.47 TO TITLE 4 OF THE ROSEVILLE MUNICIPAL CODE
RELATING TO THE SIERRA VISTA SPECIFIC PLAN MITIGATION FEE**

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. Chapter 4.47 of Title 4 of the Roseville Municipal Code is hereby added to read as follows:

Chapter 4.47

Sierra Vista Specific Plan Mitigation Fee

4.47.010	Purpose.
4.47.020	Definitions.
4.47.030	Establishment and Administration of SVSP Mitigation Fund.
4.47.040	Payment of SVSP Mitigation Fee.
4.47.050	Sierra Vista Plan Area and Owner Subarea Boundaries.
4.47.060	Residential Land Uses
4.47.070	SVSP Fee—CG Barbaccia Trust.
4.47.080	SVSP Fee—MILLC (Connely).
4.47.090	SVSP Fee—DF Properties.
4.47.100	SVSP Fee—Westpark Federico/MILLC.
4.47.110	SVSP Fee—MILLC (Bagley).
4.47.120	SVSP Fee—MILLC (Computer).
4.47.130	SVSP Fee—MILLC (Wealth).
4.47.140	SVSP Fee—Baseline P&R LLC.
4.47.150	SVSP Fee—Baybrook LP.
4.47.160	(Reserved.)
4.47.170	Existing development.
4.47.180	Fee challenges.
4.47.190	Annual Fee adjustments.
4.47.200	Adoption in compliance.
4.47.210	Chapter is severable.

Section 4.47.010 Purpose.

The City Council finds and declares that the purpose of this chapter is as follows:

- A. The General Plan of the City requires that new development within the City be provided, in a time frame related to its development, with an adequate level of public infrastructure so as to maintain adequate levels of public services and not adversely impact other areas.

- B. Development within newly approved specific plan areas of the City creates a need for additional public improvements to serve such specific plans. Such burdens may vary by the type of land use. Such burdens should be shared equitably between the areas of a specific plan approved for development.
- C. Analysis of the approved land uses within the Sierra Vista Specific Plan ("SVSP" or "Specific Plan") makes it possible to estimate the burden or need for various public improvements generated by different types of land uses. Analysis of the land use expected at buildout within the SVSP pursuant to the SVSP and the General Plan makes it possible to estimate the type and amount of public improvements and dedicated City park land necessary to support that additional land use. It is therefore possible to construct a fee, imposed on new development within the SVSP (excluding the portion thereof designated as Urban Reserve, for which no land use entitlements have been approved), which equitably spreads the burden of public improvements and park land dedication to development within the SVSP which creates the need for them. It is the intent of this chapter to create such a fee, spreading costs of public improvements and City Park Land dedication equitably to development within the SVSP which creates the need for such required public improvements and park land dedication, without generating any surplus to the general fund.
- D. The Fee established by this chapter has been calculated in the manner set forth in the Study, as hereinafter defined, so as to pay for those required public improvements and City park land dedication listed and identified in the Study and equitably allocate the costs and burdens thereof throughout the areas approved for development within the SVSP (excluding the portion thereof designated as Urban Reserve).
- E. The Fee established by this chapter is in addition to any other fees or charges required by law as a condition of development.
- F. The Fee established by this chapter is to be collected for public improvements, City park land dedication, and administration of the Fee, for which an account, with separate sub-accounts, has been established.
- G. That the failure to impose the conditions and regulations of this chapter relating to payment of the Fee on building permits (or small-lot final maps for single-family development, when applicable) would jeopardize the purpose of this Fee to equitably spread the costs and burdens of providing the required public improvements and City park land dedication throughout the Specific Plan, which will promote development of the Specific Plan as planned to the benefit of the future residents of the Specific Plan.
- H. The requirement of this chapter to pay the Fee for new development within the SVSP is necessary in order to assure compliance with the applicable zoning ordinance and general plan requirements for the public improvements and dedicated City park land funded by this chapter.

- I. That for a period of greater than 10 days prior to adoption of this chapter, data has been available to the public and to developers and their representatives indicating the cost or estimated cost of all the required public improvements and dedicated City park land to be funded, the revenue sources anticipated, and the means of spreading these costs.
- J. That the City Council has considered the effect of the Fee imposed by this chapter with respect to the housing needs of the City as a whole and of the region, particularly as required by the housing element of the General Plan, and the City Council finds that this chapter does not unduly adversely affect the City's ability to provide for such needs.
- K. That the establishment of the Fee is for the purpose of equitably sharing the costs and burdens of development throughout the Specific Plan, thereby promoting the financing of the capital projects necessary to provide and maintain the facilities required by the SVSP and the General Plan to serve the portion of the SVSP for which land use has been granted by the City.

Section 4.47.020 Definitions.

The following words are defined for purposes of this chapter as follows:

- A. "Administration" means the administration of this Fee by the City and/or its consultants in accordance with the Study and this chapter.
- B. "Administrator" means the administrator employed or retained by the City of Roseville for organizing, monitoring and administering this Fee.
- C. "Building permit" means the permit issued or required by the city for the construction of any structure pursuant to and as defined by the building code.
- D. "City Park Land" means the approximately 40-acre property within the Specific Plan to be dedicated to the City for a community park.
- E. "Fee" or "SVSP Fee" means the fee established by this Chapter 4.47. The Fee shall be collected prior to the approval of any building permit, or, if any Fee Reimbursements are then outstanding, prior to the approval of any Small-Lot Final Map for any single family residential development. The Fee shall be used solely to finance the Improvements and the City Park Land.
- F. "Fee Credit and Reimbursement Agreement" means an agreement between an SVSP developer and the City to provide Fee credits and/or Fee Reimbursements, to be funded solely by the Fee, in exchange for the construction of Improvements by the developer.
- G. "Fee Reimbursement" means a reimbursement to be paid to a developer from the Fee for financing the construction of Improvements pursuant to a Fee Credit and Reimbursement Agreement.

- H. "Improvements" means those public improvements or infrastructure shown and included in the Study, including ancillary appurtenances.
- I. "Public Facilities" means buildings or other improvements owned or to be owned by the City of Roseville, Placer County, school district, or other public entity or utility.
- J. "SVSP Mitigation Fund" means that special interest-bearing fund, including the sub-accounts thereof dedicated to fund the costs of Administration, City Park Land, and Improvement, established pursuant to Section 4.47.030.
- K. "Small-Lot Final Map" means a final subdivision map recorded in accordance with the Subdivision Map Act that creates lots upon which Building permits may be issued for the construction of single-family homes.
- L. "Study" means the "Sierra Vista Specific Plan Fee Program Nexus Study" prepared by Economic and Planning Systems, Inc., and dated March 2011, as may be updated from time to time by the City to support adjustments to the Fee. The Study and any fee update(s) are and shall be maintained on file in the office of the city clerk.

Section 4.47.030 Establishment and Administration of SVSP Mitigation Funds.

The finance director is directed to establish a special interest-bearing fund entitled the SVSP Mitigation Fund and to establish three (3) separate sub-accounts thereof to fund the costs of Administration, Improvements and City Park Land. All Fees collected pursuant to this chapter shall be deposited in the appropriate sub-accounts of the SVSP Mitigation Fund and expended solely to finance Administration, Improvements and City Park Land, as applicable.

Section 4.47.040 Payment of SVSP Mitigation Fee.

Except as otherwise provided by this chapter, the Fee imposed pursuant to this chapter shall be paid at or prior to the issuance of any building permit within the SVSP. If a Fee Reimbursement is then outstanding pursuant to a Fee Credit and Reimbursement Agreement when an owner seeks to record a Small-Lot Final Map for single-family development, the Fee imposed pursuant to this chapter shall be paid at or prior to the recordation of such Small-Lot Final Map, in accordance with the Study.

Calculation of the Fee shall be determined in accordance with the Study and this chapter depending upon where within the SVSP such development occurs, the type of development, and the extent of development. Descriptions of land use categories in this chapter, except as otherwise noted in the Study or the SVSP, are utilized in the same manner as in the General Plan. Portions of the Specific Plan planned for Public Facilities and for church use are exempt from the Fee.

Section 4.47.050 Sierra Vista Plan Area and Owner Subarea Boundaries.

The boundaries of the Sierra Vista Plan Area, excluding the portion thereof designated as Urban Reserve, and the Owner Subareas thereof responsible for payment of the Fee, are established as shown on that certain map entitled "Sierra Vista Specific Plan Owner Subarea Map," which is on file in the office of the city clerk and the Administrator and is incorporated herein by reference.

Section 4.47.060 Residential Land Uses

Consistent with the designations in the Specific Plan for the different types of residential uses within the Specific Plan, the abbreviations applied to the residential uses in the Fee Tables below mean the following: LDR: 0.5 to 6.9 units/acre; MDR: 7.0 to 12.9 units/acre; HDR: 13.0 or more units/acre; and MU: residential units within mixed use developments.

Section 4.47.070 SVSP Mitigation Fee — CG Barbaccia Trust.

The Fee in that portion of the SVSP which is in the CG Barbaccia Trust Owner Subarea shall be:

Land Use	Residential				Nonresidential		
	LDR	MDR	HDR	MU [1]	CC [1]	BP [1]	MU [1]
Net Fee Rates	<i>per unit</i>	<i>per unit</i>	<i>per unit</i>	<i>per unit</i>	<i>per sq. ft.</i>	<i>per sq. ft.</i>	<i>per sq. ft.</i>
City Park Land Fee	\$933	\$797	\$661	\$661	\$0.00	\$0.00	\$0.00
Infrastructure Fee	\$14,963	\$13,242	\$8,262	\$7,763	\$15.17	\$16.02	\$15.17
Administration Fee (Gross) @ 2%	\$276	\$243	\$150	\$155	\$0.30	\$0.32	\$0.30
Total SVSP Fee	\$16,172	\$14,282	\$8,073	\$8,579	\$15.47	\$16.34	\$15.47

^{*Fee_CGB*}

[1] Equals unadjusted gross infrastructure fee amount because this ownership entity does not currently have any of this type of land use within its area. Amounts would be adjusted if necessary because of land use changes.

Section 4.47.080 SVSP Mitigation Fee — MILLC (Connely).

The Fee in that portion of the SVSP which is in the MILLC (Connely) Owner Subarea shall be:

Land Use	Residential				Nonresidential		
	LDR	MDR	HDR [1]	MU [1]	CC	BP [1]	MU [1]
Net Fee Rates	<i>per unit</i>	<i>per unit</i>	<i>per unit</i>	<i>per unit</i>	<i>per sq. ft.</i>	<i>per sq. ft.</i>	<i>per sq. ft.</i>
City Park Land Fee	\$933	\$797	\$661	\$661	\$0.00	\$0.00	\$0.00
Infrastructure Fee	\$11,003	\$9,672	\$7,480	\$7,763	\$12.82	\$16.02	\$15.17
Administration Fee (Gross) @ 2%	\$276	\$243	\$150	\$155	\$0.30	\$0.32	\$0.30
Total SVSP Fee	\$12,212	\$10,712	\$8,291	\$8,579	\$13.12	\$16.34	\$15.47

^{*Fee_MF*}

[1] Equals unadjusted gross infrastructure fee amount because this ownership entity does not currently have any of this type of land use within its area. Amounts would be adjusted if necessary because of land use changes.

Section 4.47.090 SVSP Mitigation Fee — DF Properties.

The Fee in that portion of the SVSP which is in the DF Properties Owner Subarea shall be:

Land Use	Residential				Nonresidential		
	LDR	MDR	HDR [1]	MU [1]	CC	BP [1]	MU [1]
Net Fee Rates	<i>per unit</i>	<i>per unit</i>	<i>per unit</i>	<i>per unit</i>	<i>per sq. ft.</i>	<i>per sq. ft.</i>	<i>per sq. ft.</i>
City Park Land Fee	\$933	\$797	\$861	\$861	\$0.00	\$0.00	\$0.00
Infrastructure Fee	\$14,876	\$13,214	\$7,480	\$7,753	\$16.60	\$16.02	\$15.17
Administration Fee (Gross) @ 2%	\$276	\$243	\$150	\$155	\$0.30	\$0.32	\$0.30
Total SVSP Fee	\$16,085	\$14,254	\$8,291	\$8,579	\$16.90	\$16.34	\$15.47

Fee_DF

[1] Equals unadjusted gross infrastructure fee amount because this ownership entity does not currently have any of this type of land use within its area. Amounts would be adjusted if necessary because of land use changes.

Section 4.47.100 SVSP Mitigation Fee — Westpark Federico/MILLC.

The Fee in that portion of the SVSP which is in the Westpark Federico/MILLC Owner Subarea shall be:

Land Use	Residential				Nonresidential		
	LDR	MDR	HDR [1]	MU [1]	CC	BP [1]	MU [1]

Fee_BAY

[1] Equals unadjusted gross infrastructure fee amount because this ownership entity does not currently have any of this type of land use within its area. Amounts would be adjusted if necessary because of land use changes.

Section 4.47.160 (Reserved.)

Section 4.47.170 Existing development.

No Fee pursuant to this chapter shall be charged for already existing development or for projects which rebuild or remodel without increasing the number of residential units and/or square footage of non-residential development, except as provided in this section. Where any development or project expands or remodels, it shall be charged the appropriate Fee as provided by Sections 4.47.070 through 4.47.150; provided, however, that the Fee shall be calculated only as to that portion of the development or project which is expanded or remodeled.

Section 4.47.180 Fee challenges.

- A. In their development agreements with the City for the development of the SVSP, the owners requested that the City adopt and administer this Fee to be applied to all projects within the SVSP. When this Fee is adopted, and as and when the Fee is updated, any owner within the SVSP may apply to the Administrator for a reduction or adjustment to the Fee as applied to its Owner Subarea based on the absence of any reasonable relationship or nexus between the impacts of the owner's project and the amount of the Fee or based on any alleged errors in the calculation of the Fee consistent with the Study. The application shall be made in writing and filed with the Administrator not later than 20 calendar days after adoption of the Fee or any update or annual adjustment of the Fee by the City. The application shall state in detail the factual basis for the claim of reduction or adjustment and the amount of the proposed reduction or adjustment. The Administrator shall consider the application and render his decision in writing not later than 45 calendar days after the filing of the fee adjustment request. Any person aggrieved by the decision of the Administrator may, within 20 calendar days thereafter, appeal the decision in writing to the City Council by filing an appeal with the city clerk. The City

Council shall consider such appeals within 45 calendar days after filing. The decision of the City Council shall be final. No building permit shall be considered final or complete for purposes of the Permit Streamlining Act (Government Code Section 65920, et seq.), or any other purpose, until a final decision pursuant to this section has been made.

- B. Notwithstanding the provisions of subsection A, a project proponent or applicant with an application timely pending pursuant to subsection A may pay the Fee "under protest" and receive a building permit or approval to record a Small-Lot Final Map. If a reduction or adjustment is approved after payment pursuant to this subsection is made, a refund to the applicant shall be made of that amount by which the fee is reduced or adjusted.
- C. The project proponent or applicant applying for a reduction or adjustment shall have the burden of proof, by a preponderance of the evidence, that a reasonable relationship or nexus is lacking between the Fee and the project, or that the calculation of the Fee is incorrect and inconsistent with the Study and this chapter.
- D. In the event of any reduction or adjustment in the Fee granted pursuant to this section, any later change in the use, zoning, or land use designation for the property involved shall subject the then owner to payment of the then applicable fee for new uses, zoning, or land use designation, whether or not a building permit is required.

Section 4.47.190 Annual Fee adjustments.

The Fee established by this chapter shall be adjusted annually on July 1st in accordance with the provisions of the Study. Such adjustments may include percentage changes based on general changes in construction costs over the prior year and/or based on actual cost experiences and/or revised cost estimates for the Improvements, as determined by the Administrator. The Administrator's determination of general changes in annual construction costs may be based upon averaging the Construction Cost Index (CCI) for 20 cities and for San Francisco, as published in the Engineering News Record publication for the preceding 12 months ending in May. Adjustments to the portion of the Fee for the City Park Land (and for adjustments based on dedications of land for the Improvements) shall be based on re-appraisals and/or updated appraisals of land values. The resultant Fee shall be rounded to the nearest dollar figure.

Section 4.47.200 Adoption in compliance.

When monies in the SVSP Mitigation Fund are disbursed for use, the Fees shall be used to finance the acquisition of the City Park Land, the construction of the Improvements and the administration of the Fee Program. To the extent sufficient Fees are available, all Improvements financed by the Fees shall be constructed or acquired in accordance with the priorities established in the Study and any Fee Credit and Reimbursement Agreements.

Section 4.47.210 Chapter is severable.

If any provision of this chapter or the application thereof to any person or circumstance held invalid, such invalidity shall not affect the other provisions of this chapter which can be given effect without the invalid provision or its application, and to this end the provisions of this chapter are severable.

SECTION 2. This ordinance shall be effective at the expiration of thirty (30) days from the date of adoption.

SECTION 3. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

PASSED AND ADOPTED by the Council of the City of Roseville this 20th day of April, 2011, by the following vote on roll call:

AYES: COUNCILMEMBERS: Allard, Herman, Garcia, Rohan, Roccucci

NOES: COUNCILMEMBERS: None

Reporting Requirements for Development Impact Fees

In California, State legislation sets certain legal and procedural parameters for the charging of development impact fees ("DIFs"). This legislation was passed as AB1600 by the California Legislature and is now codified as California Government Code Sections (GC §) 66000 through 66008 ("Mitigation Fee Act"). This State law went into effect on January 1, 1989.

GC § 66006(b) states the following requirements as pertains to DIFs:

For each separate account or fund established, the local agency shall, within 180 days after the last day of each fiscal year, make available to the public the following information for the fiscal year:

- (A) A brief description of the type of fee in the account or fund.
- (B) The amount of the fee.
- (C) The beginning and ending balance of the account or fund.
- (D) The amount of the fees collected and interest earned.
- (E) An identification of each public improvement on which fees were expended and the amount of expenditures on each improvement including the total percentage of the cost of the public improvement that was funded with fees.
- (F) An identification of an approximate date by which the construction of the public improvement will commence if the local agency determines that sufficient funds have been collected to complete financing on an incomplete public improvement and the public improvement remains incomplete.
- (G) A description of each interfund transfer or loan made from the account or fund, including the public improvement on which the transferred or loaned fees will be expended, and, in the case of an interfund loan, the date on which the loan will be repaid, and the rate of interest that the account or fund will receive on the loan.
- (H) The amount of refunds made (as pursuant to GC § 66001(e)) due to sufficient funds being collected to complete financing on incomplete public improvements, and the amount of reallocation of funds made (as pursuant to GC § 66001(f)) due to administrative costs of refunding unexpended revenues exceeding the amount to be refunded.

GC § 65865(e) also requires that any development agreement entered into on or after January 1, 2004, the City shall comply with GC § 66006 with respect to any fee it receives or cost it recovers.

Description of Development Impact Fees

Sewer Connection Fees

Sewer connection fees are established pursuant to Municipal Code Chapter 14.16. Two sewer connection fees are collected when development occurs – a regional sewer connection fee and a local sewer connection fee. The local sewer connection fee is reported in the City of Roseville's Annual Development Impact Fee Report. Additional fees may be applicable to properties within sewer special benefit assessment areas.

- *Regional Sewer Connection Fees* - The regional sewer connection fee is charged for each sewer unit required within the Regional Treatment Plan Service Area connected to the city-owned public sewer. The service area includes the City of Roseville and portions of Placer County and South Placer Municipal Utility District.

Traffic Mitigation Fees

In 1988, the City of Roseville adopted a citywide Traffic Mitigation Fee Program, requiring new development within the City to pay traffic impact fees. The fees collected through this program, in addition to other funding sources, allows the City to construct transportation improvements identified in its Capital Improvement Program (CIP). The fee program assesses fair-share costs to other jurisdictions based on their impact on the individual roadways from new development.

This fee applies to all new development in the City. The developers in Specific Plan Areas have built, or will construct, more than the minimum amount of improvements from their funds and will receive a credit for those improvements. Additional fees collected by the City on behalf of regional fee programs:

- *Highway 65 Joint Powers Authority Fee Program* – The cities of Roseville and Rocklin, along with Placer County, formed a joint powers authority for the purpose of funding four interchanges on Highway 65. The interchanges include Stanford Ranch Road/Galleria Boulevard, Pleasant Grove Boulevard, Blue Oaks Boulevard and Sunset Boulevard. The fee program assesses fair-share costs to each jurisdiction based on their impact on the individual improvements from new development. City of Roseville serves as staff to the JPA and administers the fee program.

Fund Balance Summary

								\$113,222,296		

Regional Sewer Connection Project Fee Project Descriptions

Pleasant Grove UV (Project# 500165) - Due to changes in water quality and regulations, the current Pleasant Grove UV disinfection system is undersized for the projected rated capacity needed after the completion of the Pleasant Grove Expansion Project. This project expands the UV system capacity.

PGWWTP-Energy Recovery (Project# 500166) - Upon completion of the Pleasant Grove Expansion Project, the Pleasant Grove Wastewater Treatment Plant will produce bio-methane from the newly constructed digesters. Absent the Energy Recovery Project, the bio-methane would be burned in a flare, which is not environmentally sound. Once complete, bio-methane produced from the wastewater treatment plant will be conditioned for use in clean air refuse vehicles.

PGWWTP - Expansion 2020 (Project# 500167) - Expand wastewater treatment plant capacity. This project will add primary clarifiers, anaerobic digesters, and solids thickening equipment to the existing PGWWTP treatment process. This will increase the plant's treatment capacity from 9.5 to 12 million gallons per day and is expected to provide sufficient capacity to accommodate growth within the South Placer Wastewater Authority service area through 2035.

Dry Creek and Pleasant Grove WWTP Capacity Evaluation (Project# 500199) - This project is a field study to confirm the computer model capacity predictions contained in the WW System Evaluation project.

Regional Pump Station 26 and Force Main Capacity Improvement (Project# 500200) - This project will Increase available capacity in the Old Auburn Boulevard trunk sewer and associated lift stations.

Traffic Mitigation Fees										
Highway 65 Joint Powers Authority Fee Program										
Document Establishing Fee	Project	Fee Formula	Starting Balance	Fees Collected (Refunded)	Interest Earned	Interfund Transfer In/(Out)	Expenditures	Ending Balance as of June 30, 2022	Sufficient Funds to Complete Project?	% of CIP Funded by Fee
Resolution No. 90-312	Highway 65- Galleria/ Stanford	Joint Powers Agreement Oct, 15, 1990; Amended Aug. 18, 1992	\$480,169	1,273,929	1,947	-	(1,239,069)	\$516,976	No	100

The Highway 65 Joint Powers Authority Board approved a plan for funding the construction of various Highway 65 Interchange Projects that included the commitment of funds from the Authority along with funds from the Cities of Roseville and Rocklin and the County of Placer. The participants remitted funds to the Authority in advance of the construction. In addition, the City of Roseville constructed projects using City of Roseville funds. The projects were dedicated to the Authority through a reimbursement agreement. Pursuant to the agreement, the cities and the County will be reimbursed through future traffic mitigation fees collected by the Authority.

Traffic Mitigation Fee Project Descriptions

Highway 65-Galleria/Stanford (Project# 400060) –The proposed project would modify the SR 65 NB ramps at the Galleria Boulevard/Stanford Ranch Road interchange as well as reconfigure the lanes along Galleria Boulevard/Stanford Ranch Road. The project would construct the following:

- Dual left turn lanes onto the NB SR 65 slip on-ramp.
- Protected median left turn pockets at the NB and SB ramp intersections, eliminating the inside trap lanes.
- Right turn pocket for the SB approach along Stanford Ranch Road to the NB slip on-ramp.
- Widened NB SR 65 to NB Stanford Ranch Road slip off-ramp from one to two lanes at the ramp terminus. Off-ramp will include a signalized intersection at Stanford Ranch Road.
- Widened NB slip on-ramp to two metered general purpose lanes plus an HOV preferential lane.
- Modified terminus of the NB loop off-ramp to reduce speeds and enhance safety for all modes utilizing the facility.

Regional Sewer Connection Fees

Ordinance No. 6100

ORDINANCE NO. 6100

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE AMENDING SECTION 9.12.100 OF CHAPTER 9.12 OF TITLE 9, AMENDING SECTIONS 14.08.025, 14.08.090, 14.08.091, AND 14.08.100 OF CHAPTER 14.08 OF TITLE 14, DELETING SECTION 14.08.091 OF CHAPTER 14.08 OF TITLE 14, AND AMENDING SECTIONS 14.16.060, 14.16.080, 14.16.200 AND 14.16.201 OF CHAPTER 4.16 OF TITLE 14 OF THE ROSEVILLE MUNICIPAL CODE REGARDING GARBAGE, WATER AND WASTEWATER RATES AND SERVICES

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. Section 9.12.100 of Chapter 9.12 of Title 9 of the Roseville Municipal Code is hereby amended to read as follows:

9.12.100 Charges for collection.

A. Residential.

1. Each and every householder or tenant occupying any dwelling, house, or residence, shall pay to the city, or its authorized agent, a fixed minimum charge as set forth in this section as a refuse fee. Such fixed minimum is based upon service of one call per week, irrespective of whether there is any refuse to remove from any premises.

2. Ninety-Gallon Automated Container Service. For each premises assigned city-owned 90-gallon containers (one for household garbage and one for yard clippings and green waste) and serviced by automated collection, all garbage, and green waste for collection must be contained within the 90-gallon container(s) with the lid closed and must fall freely from container when dumped. Each such premises shall be provided weekly collection for trash; green waste will be collected every other week.

3. Refuse service may be discontinued upon request for a period of no less than two months when a dwelling, house, or residence will be unoccupied. The minimum time of discontinuing service will be two months. A service charge equal to two months' refuse charge will be charged to the utility user for the removal and redelivery of the assigned automated container when service has been temporarily discontinued. This service charge will be paid at the time service is discontinued. Upon occupancy of a dwelling, house or residence, the utility user must contact the city to restart service and will be charged an associated restart fee. If the occupant of a dwelling, house, or residence does not contact the city to restart service, the city may bill back to the discontinuance of service all monthly charges.

4. For collection of additional containers beyond those covered by the fixed minimum charges established in this chapter, the collection charge shall be that identified in this section.

5. An additional or special pickup may be requested beyond the minimum service required by this chapter. Each such additional or special pickup shall be subject to a fixed fee.

6. Rates for Residential Collection. Effective July 5, 2019, and July 1, 2020, the residential rates on billings shall be as follows:

Residential Refuse Service	Effective 7/5/2019	Effective 7/1/2020
Fixed refuse monthly charge (one trash container and one green waste container as identified in Section 9.12.100(A)(2))	\$25.57	\$26.85
Additional empty of a 60- or 90-gallon refuse container	\$16.72	\$17.55
Each additional green waste container	\$9.28	\$9.75
Each additional 90-gallon refuse container	\$17.48	\$18.36
Additional empty of a green waste container	\$12.29	\$12.90
Refuse 60- or 90-gallon replacement charge	\$74.69	\$78.42
Fixed fee for the return of a confiscated green waste container due to contamination	\$119.41	\$125.38
Temporary removal of a residential service	\$51.12	\$53.68
Move in box pick-up	\$90.39	\$94.91
Temporary dumpster delivery and removal and per yard charge (6 yards only)	\$125.30	\$131.56

Residential Special Services	Effective 7/5/2019	Effective 7/1/2020
Restart Service (per occurrence)	\$25.00	\$26.25
Green/Waste Contamination Fee (per occurrence)	\$25.00	\$26.25
Overloaded Cart (per occurrence)	\$10.00	\$10.50
Return Trip Charge Same day (per occurrence)	\$10.00	\$10.50
Return Trip Charge Off day (per occurrence)	\$25.00	\$26.25
Cart Exchange (in excess of 1x/12 months)	\$25.00	\$26.25

B. Commercial.

1. A landlord, property owner, or property manager or management company of each and every store, shop, apartment, house, rooming house, factory or other nonresidential use that has a commercial dumpster shall pay to the city, or its authorized agent, a fixed minimum charge as set forth by the city council as a refuse fee. Such fixed minimum is based upon service of one call per week, irrespective of whether there is any refuse to remove from any premises.

A landlord, property owner, property manager or management company with multiple tenants who must share a commercial dumpster shall be responsible for the refuse utility bill of the tenants.

2. Commercial Dumpster, Roll-On, and Additional Services. The environmental utilities director may approve the placing of garbage or rubbish in containers other than 30-gallon cans or 90-gallon automated cans (such as dumpsters or roll-on containers) as provided in Section 9.12.060. The fixed fee and additional service charges are established by subsections (A)(6) and (B)(7). In such cases, the environmental utilities director shall cause a study of the service to be made, and charges will be established based on the cost of performing the service. Such charge shall include all costs to the city, including, but not limited to, labor, equipment operation, maintenance and depreciation, administrative overhead, recycling, landfill closure and landfill operation costs. Standard commercial charges for basic hand-pickup dumpsters and roll-on containers may be established by the environmental utilities director subject to the approval of the city council.

An additional or special pick up may be requested beyond the minimum service required by this chapter. Each such additional or special pick up shall be subject to a fixed fee.

Temporary commercial services must be charged to a City of Roseville customer utility account. A "garbage only" account may be requested for temporary services. See Chapter 14.04 Utility Customer Billing, Accounting and Collections for information about establishing a new account.

Timeframe for temporary customer service. Temporary dumpsters for commercial use must be serviced weekly and removed within a 90 day period. It is the customer's responsibility to schedule services. If a temporary dumpster is not emptied within seven consecutive days of its delivery or last collection, the account shall be assessed a weekly rental fee per Section 9.12.100(B7): Rates for Commercial Collection.

3. Commercial customers that fall into the following categories are required by state law to subscribe to organics recycling services.

a. On and after April 1, 2016, a business that generates eight cubic yards or more of organic waste per week shall arrange for recycling services specifically for organic waste.

b. On and after January 1, 2017, a business that generates four cubic yards or more of organic waste per week shall arrange for recycling services specifically for organic waste.

c. On and after January 1, 2019, a business that generates four cubic yards or more of commercial solid waste, as defined in Section 42649.1, per week, shall arrange for recycling services specifically for organic waste.

4. On or after January 1, 2020, if the department determines that statewide disposal of organic waste has not been reduced to 50 percent of the level of disposal during 2014, a business that generates two cubic yards or more per week of commercial solid waste shall arrange for the organic waste recycling services specified in subsection (B)(3), unless the department determines that this requirement will not result in significant additional reductions of organics disposal.

5. Multifamily dwellings will not be required to recycle food waste, but will need to provide proof to the city that other organics such as green waste are being recycled or diverted from the landfill in an appropriate manner. The city can also provide green waste services, if necessary.

The city will be the primary collector of all organic waste materials, unless a business had services in place before September 28, 2014, the date AB 1826 was approved. Any business with a collection contract before this date can continue with providers until the contract expires. Once the contract expires the business will default to city service.

6. An additional or special pickup may be requested beyond the minimum service required by this chapter. Each such additional or special pickup shall be subject to a fixed fee.

7. Rates for Commercial Collection. Effective July 5, 2019, and July 1, 2020, the commercial rates on billings shall be as follows:

Frontloader and Rearloader Commercial Services*	Effective 7/5/2019	Effective 7/1/2020
Frontloader and rearloader commercial dumpster and sidewalk can per yard charge *Plus premium for rearloader services (more detail below)	\$10.49	\$11.01
Frontloader and rearloader compactor per yard charge	\$18.90	\$19.85
Frontloader cardboard dumpster and compactor per yard charge	\$13.93	\$14.63

Commercial Special Services	Effective 7/5/2019	Effective 7/1/2020
Rear Loader Service Premium (this will be an additional charge equivalent to an associated percentage of the monthly base rate)	25%	25%
Recyclable Material Contamination Fee (per occurrence)	\$25.00	\$26.25
Green/Waste Contamination Fee (per occurrence)	\$25.00	\$26.25
Overloaded Container (per occurrence)	\$25.00	\$26.25
Lock Service – Admin Set up (per occurrence)	\$15.00	\$15.75
Lock Service – Lock Cost (per occurrence)	\$15.00	\$15.75
Lock Service – Per Month	\$10.00	\$10.50
Push/Pull Charges (per container month)	\$15.00	\$15.75
Extra Pickup Charge (of monthly rate per pickup + return trip charge)	25%	25%
Exchange Cart (per cart)	\$25.00	\$26.25
Exchange Bin (per occurrence)	\$75.00	\$78.75
Return Trip Charge Same day (per occurrence)	\$10.00	\$10.50
Return Trip Charge Off day (per occurrence)	\$25.00	\$26.25

Additional Commercial Service Rates	Effective 7/5/2019	Effective 7/1/2020
Roll-Off Return Charge (per occurrence)	\$30.00	\$31.50
Relocation Charge/Trip Charge(per event – includes roll-off return charge)	\$50.00	\$52.50

Roll-Off Commercial Open Top and Compactor Services*	Effective 7/5/2019	Effective 7/1/2020
Minimum charge per haul (base rate) without tonnage* All sizes	\$312.43	\$328.05
Roll-off 100% recycling bin	\$171.08	\$179.63

* Tonnage charges (tipping fees) vary by material type, and are determined by the Western Placer Waste Management Authority. With city department head approval, some entities may pay tonnage charges directly to Western Placer Waste Management Authority.

Temporary Frontloader, Rearloader and Roll-Off Charges*	Effective 7/5/2019	Effective 7/1/2020
Frontloader and rearloader temporary dumpster delivery and removal charge	\$62.38	\$65.50
Frontloader and rearloader temporary dumpster per yard charge (plus trip fee for extra pickups)	\$10.49	\$11.01
Frontloader and rearloader temporary dumpster rental fee per week	\$59.38	\$62.35
Roll-off temporary dumpster minimum charge per haul (base rate)	\$312.43	\$328.05
Tonnage (per ton charge)*		
Roll-off temporary dumpster rental fee per week	\$107.82	\$113.22
Roll-Off temporary 100% recycling bin	\$171.08	\$179.63

* Tonnage charges (tipping fees) vary by material type, and are determined by the Western Placer Waste Management Authority.

Additional Commercial Service Rates*	Effective 7/5/2019	Effective 7/1/2020
Standby service charge per occurrence (in 15 minute increments)	\$60.00	\$63.00
Solid Waste Minimum Charge	\$28.68	\$30.11
Emergency after hours call out service charge per occurrence	\$161.46	\$169.53
Fixed monthly minimum commercial charge	\$28.68	\$30.11
60- or 90-gallon automated container monthly charge	\$25.57	\$26.85
Commercial bin assistance charge per occurrence	\$45.17	\$47.43
Fixed fee for additional pick-up of a city owned 60- or 90-gallon automated container	\$16.72	\$17.55
Compactor cleaning	Minimum 2.5 hours labor cost	
Compactor lock replacement	0.5 hours of labor cost plus \$8.00 lock replacement	

* The amounts billed to commercial customers will vary with the types of service and the number of pickups in a billing period.

** Green waste containers available only in limited areas.

A. **Shared Compactor Rates.** Shared compactor rates are applicable to the City of Roseville downtown specific plan area. Exact rates are determined on a site-specific basis based on the following criteria:

	Cost per 1,000 square feet of building area or per dwelling unit Effective 7/5/2019	Cost per 1,000 square feet of building area or per dwelling unit Effective 7/1/2020	
Below are the square footage rates for shared compactors. If a customer's site-specific charge does not exceed the fixed minimum charge, they will be subject to the monthly fixed minimum charge.			

Monthly Minimum (Fixed)	\$28.68	\$30.11	
Tier 1: Cost per 1,000 square feet of building area or per dwelling unit	\$5.99	\$6.28	Tier 1 includes business types that are determined low use by the environmental utilities director. Typical examples of low use are retail and office establishments and small apartment units.
Tier 2: Cost per 1,000 square feet of building area	\$24.16	\$25.37	Tier 2 includes business types that are determined medium use by the environmental utilities director. Typical examples of medium use are relatively smaller establishments such as bars and grills, coffee shops and delis; selling or serving food but not considered a full-service restaurant.
Tier 3: Cost per 1,000 square feet of building area	\$51.04	\$53.59	Tier 3 includes business types that are determined high use by the environmental utilities director. A typical example of high use is full-service restaurants, restaurant/bakeries, and similar establishments. Full-service restaurants are defined as primarily dine-in establishments with established menus, and a minimum of two meals per day (e.g., lunch and dinner).

B. Shared Compactor Organic Tiers. Organics tiers are applicable to some shared compactor units depending on compactor tier and usage type. Exact rates are determined on a site-specific basis based on the following criteria:

Commercial Shared Compactor Organic Tiers	Effective 7/5/2019	Effective 7/1/2020
Tier 1	\$0.00	\$0.00
Tier 2	\$81.93	\$86.03
Tier 3	\$163.81	\$172.00

C. Rates for Commercial Organic Waste Collection. Effective July 5, 2019 and July 1, 2020, the commercial organic waste collection rates on billings shall be as follows:

Organic Waste Collection Rates	Minimum Monthly Charge (Effective 7/5/2019)	Minimum Monthly Charge (Effective 7/1/2020)
0-2 yards	\$81.93	\$86.03
0-4 yards	\$163.81	\$172.00
5 yards	\$204.77	\$215.01
6 yards	\$245.69	\$257.97
7 yards	\$286.77	\$301.10
8 yards	\$327.62	\$344.00
9 yards	\$368.53	\$386.96
10 yards	\$409.49	\$429.96
11 yards	\$450.57	\$473.09
12 yards	\$491.37	\$515.94
Extra pickup for one yard bin or cart equivalent	\$61.45	\$64.52
Extra pickup for two yard bin or cart equivalent	\$81.93	\$86.03

SECTION 2. Section 14.08.025 of Chapter 14.08 of Title 14 of the Roseville Municipal Code is hereby amended to read as follows:

14.08.025 Water connection fees.

A. In order that appropriate provision be made for sharing the costs of the maintenance and expansion of the raw water supply, water treatment, storage, and distribution facilities of the city by those who receive the benefits thereof, there are established connection fees to such facilities, which fees shall be imposed in addition to the service connection costs charged pursuant to Section 14.08.020. Such additional water connection fees include a “standard connection fee” and an “irrigation connection fee.” The fees shall be set so that they are equal to, but not greater than, the cost of service.

B. The water connection fees shall be based upon the applicable “dwelling unit equivalent” (“DUE”) and density assignment. The fee for one DUE shall be \$9,363.00 (per LDR unit), \$5,618.00 (per MDR unit), \$3,636.00 (per HDR unit) and \$9,363.00 (per Non Residential unit) on July 1, 2018.

C. The connection fee amount set forth above shall be adjusted annually on July 1st of each year by three percent or by a percentage equal to the inflation rate for the prior year for construction costs as determined by the environmental utilities director in the preceding June, whichever is greater. The director’s determination of the percentage equal to the inflation rate for the prior year for construction costs shall be based upon the Engineering News Record, Construction Cost Index for the prior 12 months ending in May. The environmental utilities director shall report the amount of the adjustment in percentage terms and the dollar amount due per DUE to the city council annually at the first regular meeting of the council following the adjustment of the fee.

D. Except as otherwise provided, all water connection fees established by this chapter shall be payable upon issuance of a building permit. Connection fees will be determined using the amount in effect on the date of building permit issuance.

SECTION 3. Section 14.08.090 of Chapter 14.08 of Title 14 of the Roseville Municipal Code is hereby amended to read as follows:

14.08.090 Service charges for metered service.

There shall be due and payable the following monthly charges, upon submission of the bill by the city to the owner of the property supplied with service, for all treated water measured by meters for residential, commercial, industrial and manufacturing or other purposes:

A. Monthly Quantity Rates. Effective July 5, 2019 and July 1, 2020, the monthly quantity rates on billings shall be as follows:

	Effective 7/5/2019	Effective 7/1/2020
Potable water usage (per 100 cubic feet)	\$1.30	\$1.34
Recycled water usage (per 100 cubic feet)	\$0.65	\$0.67

*

B. Monthly Service Charges. Effective July 5, 2019 and July 1, 2020, the monthly service charges on billings shall be as follows:

Meter Size (inches)	Peak Flow Rate (gallons per minute)	Effective 7/5/2019	Effective 7/1/2020
Up to 3/4	30	\$27.26	\$28.08
1	50	\$42.07	\$43.34
1-1/2	100	\$79.09	\$81.47
2	160	\$123.51	\$127.22
3	350	\$264.20	\$272.13
4	630	\$471.52	\$485.67
6	1300	\$967.61	\$996.64
8	2800	\$2,078.26	\$2,140.61
10	4200	\$3,114.89	\$3,208.31

C. The total amount due and payable shall be the sum of the monthly service charge plus the quantity rate. The monthly service charge is due and payable regardless of whether water has been consumed. The service charge shall be the greater of the charge based on the meter size or flow rate, with the following exceptions:

1. No service charge shall be made for fire service that has backflow prevention with detector check devices approved by the environmental utilities director.

2. No service charge shall be made for recycled water utility back-up systems that are required for reliability only and have backflow prevention and metering approved by the environmental utilities director. This exclusion does not extend to systems that are regularly required as part of normal operation. The recycled water operation shall be responsible for water volumetric charges for these services and any costs associated with meter maintenance.

D. For purposes of charging for treated water measured by meters:

1. A residential account is defined as a single metered water service which serves three or less dwelling units.

2. A nonresidential account is defined as a single metered water service which serves more than three dwelling units, or serves commercial, industrial, manufacturing, irrigation or other nonresidential land uses.

E. For single-family residential services that require automatic fire protection systems pursuant to Section 16.16.120, the increased meter size will not be assessed an additional charge associated with the fire protection system requirement. Service charges shall be based on the required service size as determined by the Uniform Plumbing Code without consideration for any fire protection system required by Section 16.16.120.

SECTION 4. Section 14.08.091 of Chapter 14.08 of Title 14 of the Roseville Municipal Code is hereby deleted in its entirety:

14.08.091 Service charge outside city water service area.

SECTION 5. Section 14.08.100 of Chapter 14.08 of Title 14 of the Roseville Municipal Code is hereby amended to read as follows:

14.08.100 Flat water rates.

The following service charges shall apply to flat rate consumers that the environmental utilities director determines are not cost effective to assign metered rates. The environmental utilities director shall conduct a water use study for consumers whom he or she determines may not be reasonably metered, and the director shall assign such consumers to an appropriate service rate level as set forth in this section. Water service rates for flat rate residential consumers shall be due and payable on a monthly basis according to the appropriate grouping set out in this section.

Effective July 5, 2019, and July 1, 2020, the flat rates on billings shall be as follows:

Nonmetered or Flat Service Charges	Effective 7/5/2019	Effective 7/1/2020
Single-family lots under 4,900 square feet; each mobile home unit not within a park maintaining its own distribution system and service; each dwelling unit of duplexes, triplexes, fourplexes, unmetered apartments and other multiple living units; other detached living units; and offices and stores with less than peak use of 250 gallons per day	\$37.38	\$38.51
Single-family lots 4,901 to 8,900 square feet	\$42.13	\$43.40
Single-family lots 8,901 to 12,000 square feet	\$45.79	\$47.17
Single-family lots 12,001 to 15,000 square feet	\$49.36	\$50.85
Single-family lots existing before July 1, 1977, which are in excess of 15,000 square feet	\$54.36	\$58.16
Mobile home parks, per living unit	34.47	35.51
All those single-family lots over 15,000 square feet, created on or after July 1, 1977, shall be metered pursuant to Section 14.08.105		

SECTION 6. Section 14.16.060 of Chapter 14.16 of Title 14 of the Roseville Municipal Code is hereby amended to read as follows:

14.16.060 Local sewer connection fee.

- A. A local sewer connection fee shall be charged in accordance with Section 14.16.010 for each connection to the city-owned public sewer.
- B. The local sewer connection fee shall be \$363.00 per sewer unit.
- C. The Construction Cost Index (CCI) inflationary fee adjustment shall become effective July 1, 2013. The fee established by this chapter shall be adjusted annually July 1st beginning on July 1, 2013 by a percentage equal to the adjustment rate for the prior year for construction costs as determined by the director in the preceding June. The director's determination shall be based upon averaging the Construction Cost Index (CCI) for 20 cities and for San Francisco, as published in the Engineering News Record publication for the preceding 12 months ending in May. The resultant fee shall be rounded to the nearest dollar figure.

SECTION 7. Section 14.16.080 of Chapter 14.16 of Title 14 of the Roseville Municipal Code is hereby amended to read as follows:

14.16.080 Regional sewer connection fee.

A. A regional sewer connection fee shall be charged in accordance with Section 14.16.010 for each sewer unit connected to the city-owned public sewer.

B. The regional sewer connection fee shall be \$7,854.00.

C. The fee established by this chapter shall be adjusted annually on July 1st by a percentage equal to the adjustment rate for the prior year for construction costs as determined by the director in the preceding June. The director's determination shall be based upon averaging the Construction Cost Index (CCI) for 20 cities and for San Francisco, as published in the Engineering News Record publication for the preceding 12 months ending in May. The resultant fee shall be rounded to the nearest dollar figure.

SECTION 8. Section 14.16.200 of Chapter 14.16 of Title 14 of the Roseville Municipal Code is hereby amended to read as follows:

14.16.200 Monthly unit sewer service charge established.

Except as otherwise provided in this chapter, a monthly unit sewer service charge shall be paid by each user connected to the city-owned public sewer. The monthly unit sewer service charge on billings shall be:

A. The monthly sewer charge shall be \$40.55 per sewer unit, effective on billings as of July 5, 2019, and \$42.18 per sewer unit, effective on billings as of July 1, 2020.

B. The monthly sewer service charges for those located outside of the city limits shall be 10 percent higher than the monthly sewer charges for those located inside city limits.

SECTION 9. Section 14.16.201 of Chapter 14.16 of Title 14 of the Roseville Municipal Code is hereby amended to read as follows:

14.16.201 Sacramento Regional County Sanitation District monthly unit sewer service charge established.

Except as otherwise provided in this chapter, a monthly unit sewer service charge shall be paid by each user connected to the Sacramento Regional County District's sewer system and located within Roseville city limits. Effective July 5, 2019, the monthly sewer charge shall be \$40.55 per sewer unit. Effective July 1, 2020, the monthly sewer charge shall be \$42.18.

SECTION 10. This ordinance shall be effective at the expiration of thirty (30) days from the date of adoption or on July 5, 2019, whichever occurs later.

SECTION 11. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance

to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

PASSED AND ADOPTED by the Council of the City of Roseville, this 15th day of May, 2019, by the following vote on roll call:

Joint Powers Agreement

October 15, 1990

As Amended August 18, 1992

9169

JOINT POWERS AGREEMENT FOR THE FINANCING AND
CONSTRUCTION OF INTERCHANGES ON STATE HIGHWAY 65
CITY OF ROCKLIN CITY OF ROSEVILLE
COUNTY OF PLACER

This Agreement is entered into as of October 15, 1990 by and between the County of Placer, a political subdivision of the State ("County"), and the City of Rocklin and the City of Roseville, municipal corporations organized and existing under the laws of the State of California ("Cities").

RECITALS

1. The County and Cities have the common powers to acquire real property and, with the consent and cooperation of the California State Department of Transportation, to finance and construct freeway interchanges.

2. The County and Cities have determined that the public interest will be served by the joint exercise of these powers through this Agreement and the creation of a joint powers authority to plan for, finance, and construct four interchanges on State Highway 65 to serve their respective jurisdictions and spheres of influence.

AGREEMENT

3. Authority and Purpose.

This Agreement is made pursuant to Chapter 5 of Division 7 of the Title 1 of the California Government Code (commencing with section 6500) (the "Law") relative to the joint exercise of powers common to the County and Cities. The purpose of this Agreement is to provide for the planning, financing, and construction of four interchanges to State Highway 65 located in the jurisdictions of the County and Cities through the creation of a joint powers authority. The four interchanges and their approximate location are shown on Exhibit A attached to this Agreement and incorporated herein.

4. Creation of Authority and Jurisdiction.

There is hereby created the "Bizz Johnson" Highway Interchange Joint Powers Authority ("Authority") a public entity separate from the County and Cities, whose

FILED

NOV 5 1991

CITY OF ROSEVILLE
BY ma

jurisdiction is as shown and described in Exhibit B, attached hereto and by this reference incorporated herein.

5. Term and Termination.

This Agreement shall be effective as of that date first stated above. It shall remain in effect until the purpose stated in paragraph 3 is fully accomplished and all bonds or other instruments of indebtedness issued by the Authority, if any, have been paid, or until terminated by the unanimous agreement of the respective governing bodies of the County and Cities in accordance with the law.

6. Powers

The Authority shall have all powers necessary or reasonably convenient to carry out the purpose stated in paragraph 3, including but not limited to the following:

A. Administration:

- 1) to secure administrative office space and furnishings;
- 2) to contract for or employ administrative, technical, and support staff;
- 3) to acquire, operate, maintain, and dispose of materials, supplies, equipment and insurance of all types to effect or facilitate achievement of the Authority's purpose;
- 4) all powers incidental to the foregoing.

B. Interchange Construction:

- 1) To develop a plan or formula for determining the timing and sequence of construction of the four interchanges;
- 2) to contract for or employ staff to conduct studies and surveys; to prepare reports; to prepare plans, specifications, and other bid documents; to administer construction contracts; and to coordinate the construction projects with all affected governmental agencies;
- 3) to lease, acquire or dispose of real property by negotiation, dedication, or eminent domain;

4) to lease, acquire, operate, maintain and dispose of materials, supplies, and equipment of all types to effect the construction of the four interchanges;

5) to construct or cause to be constructed the four interchanges and all related or appurtenant structures;

6) all powers incidental to the foregoing.

C. Financing:

1) to accept, hold, invest (pursuant to section 6509.5 of the Law), manage, and expend monies for administrative purposes and for construction of the interchanges;

2) to levy fees and taxes, enter into lease-purchase agreements, and to issue bonds and incur other forms of indebtedness as provided in sections 6547.1, 6547.5, and 6547.6 of the Law to fund the construction of the interchanges and all related costs, including all administrative costs;

3) to form a special assessment district under the Improvement Act of 1911, the Municipal Improvement Act of 1913, the Improvement Bond Act of 1915, or any other authority that exists now or in the future;

4) to form a special tax district under the Mello-Ross Community Facilities District Act or any other authority that may exists now or in the future;

5) to negotiate and enter into reimbursement agreements when monies to construct one or more interchanges are advanced;

6) to develop and adopt an interchange construction financing plan that may include a mechanism for borrowing funds collected for one interchange to fund another;

7) all powers incidental to the foregoing.

7. Duties.

The Authority shall have the duty to do the following within the times specified or, if no time is specified, within a reasonable time:

A. to retain legal counsel for all Authority business, including litigation;

B. to secure liability and errors and omission insurance;

C. to develop and adopt, within 12 months of the date of this Agreement, a plan or formula for determining the timing and sequence of construction of the four interchanges, and an interchange construction financing plan. The plan or formula for determining the timing and sequence of construction shall provide that the Harding Boulevard interchange shall be the first to be constructed. The construction financing plan shall acknowledge the payment of any fees transferred to the Authority under paragraph 8.D.6) and any reimbursement obligations relating thereto, and shall incorporate the relevant terms and conditions of any agreement entered into by the County or either member City with a landowner under which funds were advanced for the construction of one or more of the four interchanges, or a waiver of protest rights was made.

8. Administration.

A. Governing Board -- Membership. The Authority shall be administered by a board of directors ("Board") consisting of three directors and three alternates. One director and one alternate shall be current members of the County's Board of Supervisors; one director and one alternate shall be current members of the Rocklin City Council; and one director and one alternate shall be current members of the Roseville City Council. Each director and each alternate shall be appointed by the Board of Supervisors or the City Council of which he or she is a member and shall serve at the pleasure of the appointing body. Alternates shall serve as directors in the absence of the director representing the same jurisdiction as the alternate.

B. Meetings.

1) Regular Meetings. The Board shall by resolution establish the number of regular

meetings to be held each year and the date, hour, and location at which such regular meetings shall be held; provided, however, that the resolution shall provide for at least one (1) regular meeting quarterly.

2) Special Meetings. Special meetings of the Board may be called in accordance with the provisions of section 54956 of the California Government Code.

3) Conduct of Meetings. All meetings of the Board shall be held in accordance with Chapter 9 of Part 1 of Division 2 of Title 5 of the California Government Code (commencing with 54950) (California Open Meeting Law).

4) Minutes. The Secretary of the Authority shall cause minutes of all meetings of the Board to be kept and shall, as soon as possible after each meeting, cause a copy of the minutes to be forwarded to each member of the Board and to the County and Cities.

5) Quorum. Two (2) directors of the Board shall constitute a quorum for the transaction of business, except that less than a quorum may adjourn from time to time. Except as provided in paragraph 9, actions of the Board shall require the affirmative vote of a majority of the entire Board.

C. Procedures.

1) The Board shall elect a Chair from among its membership to preside at meetings and shall select a Secretary who may, but need not, be a member of the Board.

2) The Board may adopt by resolution rules of procedure not inconsistent with the provisions of this Agreement to govern the conduct of its meetings.

3) Members of the Board of Directors shall comply with Title 9 of the California Government Code (commencing with 81000) (Political Reform Act of 1974).

D. Fiscal Matters.

1) Treasurer and Auditor.

a) Except as provided in b) below, the treasurer and auditor of County are designated the treasurer and auditor of the Authority with the powers, duties, and responsibilities specified in section 6505 and 6505.5 of the Law.

b) In lieu of the designations in a), above, the Board may appoint one or more of its employees to either or both of the positions of treasurer or auditor as provided in section 6505.6 of the Law. Such appointment shall supersede the designation made in a), above. The persons or persons appointed by the Board under this paragraph shall have the powers, duties and responsibilities specified in sections 6505 and 6505.5 of the Law.

2) Custodian of Property. The treasurer and auditor of the Authority shall be the public officers who have charge of, handle, and have access to the Authority's property and shall file with the Authority an official bond in the amount fixed by the County and Cities.

3) Accounts and Reports. The Board shall establish and maintain such funds and accounts as may be required by good accounting practice. The books and records of the Authority shall be open to inspection at all reasonable times to the County and Cities and their respective representatives. The Authority, within 120 days after the close of each fiscal year, shall give a complete written report of all financial activities for such fiscal year to the County and Cities. The accounts shall be prepared and maintained by the treasurer and auditor of the Authority. The written reports shall be prepared by an independent certified public accountant employed by the Authority.

4) Budgets. The Board shall adopt a budget no later than 90 days after the effective date of this Agreement and no later than June 30 of each year thereafter.

5) Contributions. Within 90 days of the effective date of this Agreement the County and Cities shall contribute to the Authority start-up funds in the amounts determined by the Board. The Board may request additional amounts to be contributed in the future from the County and the Cities which amounts shall be allocated proportionately among the County and Cities based on the traffic trip ends contained in the report entitled "Final Report Interagency Plan for the Financing of Highway 65 Interchange Improvements" dated July 1, 1988 and prepared by Ralph Andersen & Associates or based on another allocation method adopted by the Board. The Board may provide for the reimbursement of all funds contributed by the County and Cities under this Agreement from funds collected for the interchange construction projects.

6) Assignment and Transfer of Funds. Within 90 days of the effective date of this Agreement, the County and each member City shall assign or otherwise transfer to the Authority its rights and obligations relating to the financing and construction of one or more of the four interchanges in connection with the payment of any fee or under any agreement with a landowner under which funds were advanced for the construction of one or more of the four interchanges or a waiver of protest rights was made. The County and each member City shall, concurrent with the assignment or other method of transfer, transfer to the Authority any funds received from a landowner.

9. Voting.

Notwithstanding paragraph 8.B.5), the following actions require three votes of the Board, with each director or alternate voting in accordance with the direction given by his or her appointing body:

- A. To acquire real property by eminent domain;
- B. To levy a tax;
- C. To order formation of an assessment or special tax district;
- D. To authorize the sale of bonds;
- E. To award contracts in excess of \$1,000,000.00;

F. To approve the annual budget.

G. To make a financial commitment with a term of more than one year;

H. To establish limits of liability and errors and omissions insurance;

I. To adopt or amend the plan or formula for determining the timing and sequence of construction of the four interchanges, or to approve construction that is at variance with the approved plan or formula;

J. To determine the amount of the initial contributions of start-up funds, and to adopt or to amend the method of allocating contribution obligations under paragraph 8.D.5).

10. Exercise of Powers.

The powers and duties described in this Agreement shall be exercised and carried out subject only to such restrictions upon the manner of exercising such powers or carrying out such duties as are imposed upon the City of Roseville in the exercise of similar powers or in carrying out similar duties as provided in section 6509 of the law.

11. Debts and Liabilities.

The debts, liabilities and obligations of the Authority shall not constitute a debt, liability or responsibility of the County or the Cities, either jointly or individually.

12. Liberal Construction.

The provisions of the Agreement, and in particular the provisions of paragraphs 6, 7 and 8, shall be liberally construed as necessary or reasonably convenient to achieve the purposes of the Authority.

13. Disposition of Property.

Prior to termination under paragraph 5 the Authority shall dispose of all of its property in a manner determined by the Authority to be most beneficial to the parties hereto. The proceeds of such disposal and any other surplus money shall be distributed to the parties in the same proportion as their original contribution.

14. Severability.

Should any part, term, or provisions of this Agreement be decided by the courts to be illegal or in conflict with any law of the State of California, or otherwise be rendered unenforceable or ineffectual, the validity of the remaining portions or provisions shall not be affected thereby.

15. Successor and Assignment.

This agreement shall be binding upon and shall inure to the benefit of the successors of the parties. No party may assign any right or obligation hereunder without the consent of the others.

16. Amendments.

This Agreement may be amended only by the unanimous agreement of the County and Cities.

The parties have executed and attested this Agreement as of the date first above written.

RESOLUTION NO. 90-312

RESOLUTION OF THE COUNCIL OF THE CITY OF ROSEVILLE
APPROVING A JOINT POWERS AGREEMENT WITH THE CITY OF
ROCKLIN AND COUNTY OF PLACER FORMING THE BIZZ JOHNSON
HIGHWAY INTERCHANGE JOINT POWERS AUTHORITY, AND
AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF
OF THE CITY OF ROSEVILLE

WHEREAS, a joint powers agreement between the Cities of Roseville and Rocklin and the County of Placer ("the JPA") for the purpose of forming the Bizz Johnson Highway Interchange Joint Powers Authority ("the Authority") has been prepared and reviewed by the City Council, and

WHEREAS, the City Council has previously approved and authorized the City Manager to execute said JPA in October, 1989 and said JPA has now been executed by the other public agencies who will be members of the Authority, and

WHEREAS, the City Council now desires to re-approve the said JPA, thereby signifying its continued support and approval of the Authority,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Roseville that the said JPA forming the Bizz Johnson Highway Interchange Joint Powers Authority is hereby approved and that the City Manager is authorized to execute it on behalf of the City of Roseville.

BE IT HEREBY RESOLVED by the Board of Supervisors, County of
Placer, State of California, that this Board approves and
directs the Chairman to sign the attached Joint Powers Authority
(JPA) Agreement for Funding and Construction of Interchanges
Along State Highway 65.

FIRST AMENDMENT TO JOINT POWERS AGREEMENT
FOR THE FINANCING AND CONSTRUCTION OF
INTERCHANGES ON STATE HIGHWAY 65
 CITY OF ROCKLIN CITY OF ROSEVILLE
 COUNTY OF PLACER

This First Amendment to the Joint Powers Agreement for the Financing and Construction of Interchanges on State Highway 65 ("Joint Powers Agreement"), dated October 15, 1990, by and between the County of Placer, a political subdivision of the State ("County"), and the City of Rocklin and the City of Roseville, municipal corporations organized and existing under the laws in the State of California ("Cities"), is entered into as of August 18, 1992.

RECITALS

WHEREAS, County and Cities desire to amend the Joint Powers Agreement; and

WHEREAS, County and Cities have determined that the jurisdiction of the Joint Powers Authority should be larger than initially agreed by the County and Cities, the County and Cities desire to revise and amend the area of jurisdiction, to include all of the city limits of Roseville, and Rocklin and parts of Placer County shown and described on Exhibit B, to the original Joint Powers Agreement for the financing and construction of interchanges on State Highway 65.

WITNESSETH: NOW, THEREFORE, County and Cities do mutually agree as follows;

Section 1: Exhibit B to the Joint Powers Agreement for the Financing and Construction of Interchanges on State Highway 65, dated October 15, 1990, is hereby deleted in its entirety and substituted with a new Exhibit B, which is attached hereto and, by this reference, incorporated herein.

Section 2: All remaining provisions of the Joint Powers Agreement shall remain the same and in full force and effect.

IN WITNESSETH WHEREOF, the parties have entered into this agreement as of the date and year above provided.

COUNCIL COMMUNICATION

CC #: 2483

File #: 0201 & 0201-01

Title: Fiscal Year 2021-22 Year-End Report and FY2022-23 Budget Adjustment

Contact: Scott Pettingell 916-774-1306 spettingell@roseville.ca.us

Meeting Date: 1/18/2023

Item #: 9.3.

RECOMMENDATION TO COUNCIL

Staff recommends City Council receive a report and presentation regarding the year-end results for fiscal year (FY) 2021-22 and adopt an ordinance to approve the attached FY2022-23 budget adjustment.

BACKGROUND

FY2021-22 Year-End Results

This communication includes a year-end version of the quarterly report (attached) with information regarding the City's operational financial performance from July 1, 2021 through June 30, 2022 (FY2021-22) for (1) the General Fund, (2) the enterprise operating funds, and (3) revenues in select other funds. It also includes an explanation of significant variances. A summary of the information is provided as follows:

General Fund

The City ended FY2021-22 with a \$31.5 million surplus consisting of approximately \$28.7 million in operating revenues received over budget, \$2.9 million in expenditure savings primarily due to salary savings from vacant positions. An overview of the FY2021-22 General Fund year-end results is summarized below, including the recommended appropriations.

FY2021-22 Year-End General Fund Results		Variance (\$)
Sales Tax - Bradley-Burns		\$ 11,251,000
Sales Tax - Measure B		7,201,000
Property Taxes		2,908,000
Other Revenues		7,320,000
Operating Revenues		28,680,000
Operating Expenditures		2,858,000

Total General Fund Year-End Results	\$ 31,538,000
--	----------------------

Recommended Appropriations	Budget (\$)
Roseville Sports Complex Project	\$ 15,000,000
Transfer to General Fund Capital Reserve Fund	4,486,500
Transfer to Pension Trust Fund	4,486,500
Blue Oaks Widening Project	4,000,000
Backfill General Fund Contingency - LMAs	750,000
Police Department Mobile Data Computers	700,000
Sports Field Fencing Project	565,000
Transfer to Development Services Stabilization Reserve Fund	518,000
Maidu Soccer Field Parking Lot Project	450,000
General Plan Update Project	279,000
Multimodal Safety Improvement Project	180,000
Royer Park Playground Project	123,000
Total	\$ 31,538,000
Remaining General Fund Year-End Results	\$ -

The primary factors contributing to the positive results are conservative budgeting of sales and property tax revenues due to the pandemic and salary savings due to vacant positions. The positive results in the “Other Revenue” category are primarily due to stronger than anticipated Transient Occupancy Tax (TOT) (\$1.9 million), Property Transfer Tax (\$1.2 million) and departmental revenues.

Staff recommends appropriating the \$31.5 million General Fund surplus on items aligned with the City Council Strategic Plan. In addition, the recommendations align with the original intent of the Measure B Sales and Use Tax measure. Approximately \$26.5 million of the funding is recommended for specific projects, and the remaining \$9 million is recommended to be split between the General fund Capital Reserve Fund and the Pension Trust Fund. The recommended appropriations are detailed below:

Roseville Sports Complex Project (\$15 Million) – Staff recommends appropriating an additional \$15 million toward the Roseville Sports Complex Project, bringing the total budget to approximately \$44 million. There is currently a total of \$29 million appropriated in the project consisting of resources from the General Fund, Strategic Improvement Fund, Citywide Park Fund, and Public Facilities Fund. This Sports Complex will be a lighted ten-field complex for soccer, rugby, lacrosse, flag football, and other sports. This facility will be a premier complex intended to accommodate local sports groups and attract regional, state-wide, and national tournaments, thus supporting the City Council’s strategic plan goal to advance sports tourism opportunities, including destination-type amenities

Transfer to General Fund Capital Reserve Fund (\$4.5 million) – As part of the

FY2022-23 budget, the City Council established a \$10 million General Fund reserve for capital requirements. Approximately \$4.6 million of these funds were loaned to the Fire Station 8 project, leaving a current balance of \$5.4 million for new traffic signals and other capital projects. Staff recommends transferring an additional \$4.5 million to this reserve from FY2021-22 General Fund surplus for priority capital projects, bringing the total funds available to \$9.8 million.

Transfer to Pension Trust Fund (\$4.5 million) – The FY2022-23 budget included a transfer of \$8 million from the General Fund to a new Pension Trust Fund. This trust was established to help manage future increases in required pension contributions during periods of economic downturns. Staff recommends appropriating an additional \$4.5 million to this fund for a total of \$12.5 million.

Blue Oaks Widening Project (\$4 Million) – Staff recommends appropriating \$4 million in surplus funds to complete the design and environmental phases associated with widening Blue Oaks Boulevard. The Blue Oaks widening project will widen Blue Oaks to eight continuous lanes, four in each direction, from Woodcreek Oaks Boulevard to Washington Boulevard, and includes a new bridge adjacent to the existing bridge over Union Pacific Railroad and Industrial Avenue.

Backfill of General Fund Contingency (\$750,000) – The General Fund cost of the labor market adjustments approved by the City Council in December was \$750,000 above initial estimates. The General Fund Contingency will be used to cover this overage. Staff recommends using \$750,000 of the General Fund surplus to replenish the contingency to address any unanticipated requirements during the remainder of the fiscal year.

Police Department Mobile Data Computers (\$700,000) – The Police Department's Mobile Data Computers (MDCs) are due for replacement in the Spring of 2024. MDCs are mounted in Police vehicles and are used for officer dispatching, mapping and related situational awareness information, law enforcement records searches, and writing case reports. Staff recommends appropriating \$700,000 of the General Fund surplus to replace the MDCs, allowing for adequate time for procurement and installation.

Sports Field Fencing Project (\$565,000) – Placer Valley Tourism granted the City \$250,000 to build fencing around the Maidu Soccer Complex. Staff recommends matching this grant with \$565,000 of General Fund resources to fence two ballfields at both Harry Crab and Central Parks, bringing the total project cost to \$815,000. These fences will protect the recent investment into converting turf at Maidu Soccer Complex to hybrid Bermuda, minimize misuse and allow for staff to shut down the fields when maintenance is required.

Transfer to Development Services Stabilization Reserve (DSSR) Fund (\$518,000) – The City maintains a DSSR to bridge gaps between budgeted and actual development revenues during periods of significant decline. The target goal for this reserve fund is six months of estimated building, planning, and engineering revenues (\$2.56 million). The current balance in the fund is approximately \$2.05 million. Staff recommends transferring \$518,000 of development services revenues in excess of budget to the reserve to achieve the six-month funding goal.

Maidu Soccer Field Parking Lot Project (\$450,000) – Staff recommends appropriating \$450,000 to convert an existing gravel parking lot at the Maidu Soccer Complex to paved asphalt. The Maidu fields were recently renovated to hybrid Bermuda, making this tournament-level playing surface highly desirable, attracting additional tournaments from out-of-town participants. The renovation of the gravel parking lot will be an enhanced feature to support the use of the soccer fields.

Multimodal Safety Improvement Project (\$180,000) – Staff recommends the City Council appropriate \$180,000 of General Fund surplus to the Vernon Atlantic Multimodal Safety Improvement Project to establish funding to complete the design and environmental phases of the project. The Vernon Atlantic Multimodal Safety Improvement Project will construct a raised median along Vernon/Atlantic Streets between Jefferson Street and Branstetter Street through the S-curve. The landscaped median will reduce travel lanes, eliminate left turn movements, and more safely direct traffic into and out of the Downtown area. Additional improvements include the installation of a high visibility crosswalk with a rectangular rapid flashing beacon at Jefferson Street; auxiliary signage, striping, and roadway resurfacing; and relocation of the Vernon Street monument sign to increase pedestrian visibility. The project's estimated total cost is \$1.5 million and is anticipated to be funded by Local Transportation Funds, safety grant funds, Highway User Tax Funds, and the General Fund.

This project will be constructed instead of the previously approved Vernon Roundabout Project. Staff evaluated the costs and benefits of both projects and determined that both meet the City's safety goals but construction of a roundabout is significantly costlier than the alternative project (greater than \$5 million). The concepts for the Vernon Atlantic Multimodal Safety Improvement Project were developed with the assistance of a consultant and in conjunction with input from the nearby neighborhoods and the Downtown Merchants Association. The cost savings (while providing the same safety benefits) makes the alternative project more grant-competitive, potentially further lessening the impact on City funds. A recommendation to cancel the Vernon Roundabout Project and return the remaining project funds (Highway Users Tax) to the fund balance will come before the Council at a later date.

General Plan Update Project (\$279,000) – In FY2016-17, the City Council approved a \$1 million loan from the Contributions from Developers Fund to the General Fund to pay for a General Plan update. In conjunction, the City implemented a General Plan Update Fee to repay this loan and save funds for future updates. The final loan payment is scheduled for this fiscal year. Following the intent of this fee, all revenues received in excess of the original loan will fund a new multi-year operating project for the next General Plan Update. The total amount of revenues received in excess of loan payments made to date is \$279,000, and staff recommends that the City Council authorize appropriation of these funds to the new project.

Royer Park Playground Project (\$123,000) – The City Council appropriated \$300,000 to replace the aging play structure at Royer Park, creating a destination playground that complements the new improvements connecting the City's downtown with the park. Staff recommends that the City Council appropriate an additional \$123,000 to the project for additional shade structures and Americans with

Disabilities Act paths within the play area. This adjustment will bring the total project cost to \$423,000.

Enterprise Operating Funds

The Electric, Environmental Utilities, Transit, and Transportation Funds all exceeded their revenue estimates and ended the year under budget. The Youth Development Fund ended the year \$1.3 million below revenue estimates but offset the shortfall with \$1.6 million in expenditure savings.

Other Funds

Revenues in the Fire Facilities, Public Facilities, and the Strategic Improvement Funds exceeded estimates by \$978,000, \$3.1 million, and \$679,000 million, respectively. This is due to the sustained increase in development activity throughout the City during FY2021-22.

FISCAL IMPACT

The year-end financial report attached to this Council Communication is for informational purposes only. This Council Communication also includes a recommendation to (1) approve a budget adjustment to appropriate the \$31.5 General Fund year-end surplus on items aligned with the City Council Strategic Plan and the Measure B Sales and Use Tax measure and (2) appropriate \$250,000 in grant funds from Placer Valley Tourism for the Sports Field Fencing Project. The General Fund has adequate available resources to fund the recommended budget adjustment.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. The budget adjustment meets the above criteria and is not subject to CEQA. No additional environmental review is required.

Description

FY2021-22 Fourth Quarter Report

Ordinance 6595

Budget Adjustment

Fourth Quarter Report Fiscal Year 2021-22

Fourth Quarter Report Fiscal Year 2021-22

Overview

This financial report provides an overview of the City's financial position through the fourth quarter of the fiscal year (FY) 2021-22 (July 1, 2021, through June 30, 2022) for:

- (1) the General Fund,
- (2) the major enterprise operating funds, and
- (3) revenues in other selected funds.

Overview

Throughout FY2021-22, the City continued to feel the impacts of the COVID-19 pandemic and its ensuing economic disruptions, including increasing costs of equipment/fuel/supplies/materials, supply chain issues causing delays in receiving equipment/supplies/materials, challenges in filling vacant positions because of increased attrition and reduced number of applicants, and reduced attendance to City programs/services.

As detailed in this report, the City's major tax revenues, including sales tax and hotel tax, have recovered from the impacts of the pandemic; however, the pandemic continued to affect the revenue and expenses of some City programs, including Adventure Club, transit, and recreation programs.

An overview of the FY2021-22 General Fund year-end results is summarized below (rounded to the nearest thousand dollars), including the recommended appropriations.

FY2021-22 Year-End General Fund Results		Variance (\$)
Sales Tax - Bradley-Burns		\$ 11,251,000
Sales Tax - Measure B		7,201,000
Property Taxes		2,908,000
Other Revenues		7,320,000
Operating Revenues		28,680,000
Operating Expenditures		2,858,000
Total General Fund Year-End Results		\$ 31,538,000

Recommended Appropriations	Budget (\$)
Roseville Sports Complex Project	\$ 15,000,000
Transfer to General Fund Capital Reserve Fund	4,486,500
Transfer to Pension Trust Fund	4,486,500
Blue Oaks Widening Project	4,000,000
Backfill General Fund Contingency - LMAs	750,000
Police Department Mobile Data Computers	700,000
Sports Field Fencing Project	565,000
Transfer to Development Services Stabilization Reserve Fund	518,000
Maidu Soccer Field Parking Lot Project	450,000
General Plan Update Project	279,000
Multimodal Safety Improvement Project	180,000
Royer Park Playground Project	123,000
Total	\$ 31,538,000
Remaining General Fund Year-End Results	\$ -

The General Fund ended FY2021-22 with a \$31.5 million surplus consisting of approximately \$28.7 million in operating revenues received over budget, \$2.9 million in expenditure savings primarily associated with materials/services/supply and salary savings from vacant positions. The primary factors contributing to the positive results are stronger than anticipated sales and property tax revenues and salary savings due to vacant positions. Savings in the Parks, Recreation & Libraries (PR&L) Department offset a \$377,000 revenue shortfall in PR&L program revenues caused by the pandemic impacting programming in the first two quarters of the fiscal year. The positive results in the other revenue category are primarily due to stronger than anticipated Hotel Tax, Transient Occupancy Tax (TOT) (\$1.9 million), Building Permit (\$1.2 million), First Responder Fee (\$1.3 million), and Property Transfer Tax (\$1.2 million) revenues.

Staff recommends appropriating the \$31.5 million General Fund surplus on initiatives aligned with the City Council Strategic Plan. In addition, the proposed initiatives align with the original intent of the Measure B Sales and Use Tax measure. Approximately \$26.5 million of the funding is recommended for specific initiatives, and the remaining \$9 million is recommended to be split between the General Fund Capital Reserve Fund and the Pension Trust Fund.

General Fund: Operating Revenues

The following table includes cumulative General Fund operating revenue through the fourth quarter and a revenue budget to actual comparison for FY2021-22.

Revenue Type	Budget to Cumulative Revenue Comparison (July 1 – June 30)			
	Amended Budget	Cumulative Revenues	Variance	% of Budget
Sales and Use Tax - Bradley Burns	\$ 59,371,253	\$ 70,621,977	\$ 11,250,724	119%
Sales and Use Tax - Measure B	21,127,000	28,328,053	7,201,053	134%
Sales and Use Tax - State Aid for Public Safety	1,327,300	1,622,075	294,775	122%
Property Tax	57,867,840	60,776,155	2,908,315	105%
Transient Occupancy Tax (TOT)	2,600,000	4,475,343	1,875,343	172%
Parks, Recreation & Libraries Programs	3,765,768	3,301,223	(464,545)	88%
Building Permits	2,920,836	4,123,020	1,202,184	141%
Plan Check Fees	2,606,322	2,653,857	47,535	102%
Engineering Inspection Fees	558,000	483,621	(74,379)	87%
Grants	239,535	226,749	(12,786)	95%
Other Revenues	13,118,564	17,622,850	4,504,286	134%
Transfers	14,454,364	13,858,339	(596,025)	96%
Total	\$ 179,956,782	\$ 208,093,262	\$ 28,136,480	116%

General Fund operating revenues ended the year 16 percent or \$28.1 million above estimates in FY2021-22. The following is an explanation of the notable variances:

- Sales Tax - Bradley Burns and Measure B** - The City's Bradley Burns and Measure B Sales Tax revenues ended the year at \$70.6 and \$28.3 million, respectively. Bradley Burns Sales Tax revenues exceeded budget estimates by 19 percent (\$11.2 million), and Measure B Sales Tax revenues exceeded estimates by 34 percent (\$7.2 million). Similar to FY2020-21, these positive results were primarily due to two factors. First, the FY2021-22 budget was developed in the spring of 2021 when there was still a lot of uncertainty related to the pandemic and its impact on the economy. Second, sales tax revenue growth was stronger than anticipated, locally and across the state, primarily driven by inflation and strong economic activity in the general retail, food products, transportation, construction sectors, and internet sales (reported in the County Pool category below). The graphs below show Bradley Burns and Measure B Sales and Use Tax revenues over the last three fiscal years and by business category.

The City's sales tax consultant has prepared a summarized sales tax report of business activity through the June 2022 quarter (or second quarter of calendar year 2022). The report provides a list of the top 25 sales tax remitters, a summary of cash receipts, and sales tax data by economic category. A copy of the report is attached.

- **Property Tax - Secured, Unsecured and Supplemental**

The City's property tax revenues (included in the Property Tax category in the charts above) exceeded estimates by \$2.9 million (\$60.8 million received compared to the budget of \$57.9 million), and continued not to be significantly impacted by the pandemic. Based on a property's assessed value as of January 1 of each year, property tax revenues continued to increase based on ongoing development activity and rising assessed property values. The graph shows property tax revenues over the last three years.

- **Hotel Tax** - The City's Transient Occupancy Tax (TOT) revenues, also known as the hotel tax, exceeded estimates by approximately \$1.9 million (\$4.5 million received compared to the \$2.6 million budget). Staff budgeted a conservative amount of TOT in FY2021-22 due to the economic uncertainty of the pandemic at the time. TOT revenues have fully recovered from the impacts of the pandemic.
- **Parks, Recreation & Libraries (PR&L) Programs** – PR&L program revenues ended the year at 88 percent of budget or approximately \$460,000 below estimates. FY2021-22 was a rebuilding year, with COVID-19 pandemic impacts affecting the first and second quarters. Revenue trended below estimates throughout the year but PRL continued to see improvements in program participation - programs and events are back, sports teams are on the fields, and parks and trails are busy. The PR&L Department offset this revenue shortfall with expenditure savings from materials, services, supplies and vacant positions.
- **Building Permits, Plan Check Fees, Engineering Inspection Fees** - Building permit revenues ended the fiscal year higher than budget by 41 percent due to sustained increases in the City's development activity. Engineering inspection fees ended the fourth quarter lower than budget at 87 percent but are offset by a corresponding increment in secondary labor cost recovery due to workload shifting toward more full-cost recovery projects.

- **Other Revenues** - Other revenues include reimbursements from the State, development reimbursement activity, property transfer tax, business license tax, rental payments, animal licensing, passport processing, permit, franchise, and other fees. As of the end of the fourth quarter, revenues in this category exceeded estimates by \$4.5 million. The positive results in the other revenue category are primarily due to stronger than anticipated First Responder Fee (\$1.3 million), Property Transfer Tax (\$1.2 million), and Workers Compensation Refund (\$1.2 million) revenues.
- **Transfers** - Transfers ended the year approximately \$600,000 under budget. This variance is due to a planned transfer in from the Contributions from Developers Fund to cover an anticipated deficit in the Golf Fund. Golf Fund revenues were much stronger than anticipated in FY2021-22; therefore, this transfer was unnecessary.

General Fund: Operating Expenditures

The following table includes cumulative fourth quarter expenditure comparisons for General Fund departments for FY2021-22.

Department	Budget to Cumulative Expenditure Comparison (July 1 – June 30)			
	Amended Budget	Cumulative Expenditures	Variance	% of Budget
Police	\$ 51,228,045	\$ 51,075,901	\$ 152,144	100%
Fire	43,007,167	42,857,070	150,097	100%
Parks, Recreation & Libraries	28,446,896	27,199,344	1,247,552	96%
General Government*	11,126,206	10,032,845	1,091,361	90%
Development Services	10,352,617	9,294,583	1,058,034	90%

Total	\$ 189,245,865	\$186,387,779	\$ 2,856,086	

⁽¹⁾ General Government includes the following departments: City Council, City Manager's Office, City Attorney's Office, City Clerk, Finance, Public Affairs and Communications, and Human Resources.

General Fund expenditures ended the year at 98 percent of the estimated budget, totaling \$2.8 million in cost savings after considering unspent encumbrances re-appropriated into the FY2022-23 budget. The cost savings in General Fund departments is primarily due to vacant positions in the Parks, Recreation & Libraries, Development Services, Public Works, and other General Fund departments and lower than expected materials, services and supplies expenses..

Both Police and Fire departments ended the year on budget. Parks, Recreation & Libraries expenditures ended the year at 96 percent of the budget due to cost controls in materials, services, supplies, and temporary and full-time position vacancies. As mentioned earlier in this report, these savings offset the \$460,000 revenue shortage in parks and recreation programming. General Government departments ended the year approximately 10 percent under budget, primarily due to vacancy savings. Development Services expenditures ended the year at 90 percent of the budget, primarily due to higher than anticipated reimbursements from full cost recovery development projects and reduced training and travel costs because many events were canceled in the last year due to the pandemic. Salary savings in the Public Works Department account for the 2 percent variance from the budget through the end of the fiscal year. The Economic Development Department ended the year \$30,000 under budget (96 percent of the budget). Annexation payments were higher than budgeted, resulting in a \$0.4 million overage, due to the timing associated with receiving and making these payments. Savings in the other operating departments covered this overage.

Enterprise Funds: Operating Revenues and Expenditures

Revenues

Electric operating revenues ended the year \$18.4 million higher than budget primarily due to increased retail sales totaling \$9.6 million, of which \$2.7 million is associated with warmer than average

	Budget to Cumulative Revenue Comparison (July 1 – June 30)			
	Amended Budget	Cumulative Revenues	Variance	% of Budget
Electric Operations	\$ 157,844,817	\$ 176,222,391	\$ 18,377,574	112%
Water Operations	38,914,237	40,420,986	1,506,749	104%
Wastewater Operations	48,668,113	48,848,782	180,669	100%
Waste Services Operations	34,252,968	39,740,899	5,487,931	116%
Transit	7,037,973	6,451,716	(586,257)	92%
Transportation	1,925,389	1,749,769	(175,620)	91%
Youth Development	10,580,654	9,309,326	(1,271,328)	88%

temperatures, \$5.1 million for hydroelectric surcharges, and \$1.8 million from rate increases. Electric also collected \$1.5 million in unbudgeted wholesale revenue and a \$0.5 million reimbursement from California Arrearage Payment Program (CAPP) not included in the budget.

The remaining \$6.8 million in electric operating revenues include \$4.4 million from unplanned flat fee charges and reimbursement from the California Department Generation of Water Resources (CDWR) and \$800,000 provided from SMUD for mutual aid support, \$1.2 million in customer and permit fees and \$600,000 in other revenues. These increases in operating revenues were offset by \$0.2 million less in Low Carbon Allowance and Credit Proceeds revenue.

Due to new development and increased usage, Water and Waste Services Operations revenues ended the year higher than anticipated by four and 16 percent. Wastewater operating revenues ended the year on budget. Net positive results in all three Environmental Utilities will be set aside in FY2022-23 to fund rehabilitation projects, fleet electrification, and a future utility operations center.

The demand for commuter services has slowly increased over the past year, with almost \$400,000 collected in passenger fares, which is about 40 percent of pre-pandemic levels. Transit operating revenues continued to experience the effects of reduced services and losses in passenger fares due to low ridership resulting from COVID-19 through the fourth quarter of FY2021-22 compared to pre-pandemic levels. Overall, Transit revenues ended the year at approximately \$600,000 under estimates. This shortfall is primarily due to state and federal reimbursements, which reflect lower-than-anticipated contract and fuel expenditures associated with transit ridership reductions.

Similar to Transit, Transportation revenues ended the year \$200,000 below estimates, primarily related to Local Transportation Fund reimbursements. These reimbursements were lower than anticipated due to vacancies and materials, services, and supply savings.

Revenues in the Youth Development Fund ended the fiscal year at 88 percent of budget. Budgeted revenues included \$3.5 million in American Rescue Plan Act (ARPA) funds to mitigate COVID impacts. The revenue shortfall was offset by \$1.6 million in expenditure savings. While enrollment slowly rebounded, the primary factor affecting the department's ability to fully meet the budget revenue target is related to part-time staffing challenges. Participant/staff ratios are a requirement of childcare licensing, which means fewer staff results in fewer participants allowed in the program. The department is implementing ongoing efforts to recruit and retain part-time employees.

Expenditures

Electric's Operating expenses ended the year \$2.8 million lower than budget. As costs of goods sold increased during the fiscal year due to stronger than expected customer energy demand (primarily due to

	Budget to Cumulative Expenditure Comparison (July 1 – June 30)			
	Amended Budget	Cumulative Expenditures	Variance	% of Budget
Electric Operations	\$ 136,872,260	\$ 134,058,176	\$ 2,814,084	98%
Water Operations	34,886,586	29,758,674	5,127,912	85%
Wastewater Operations	48,370,406	42,707,478	5,662,928	88%
Waste Services Operations	34,440,350	30,479,712	3,960,638	89%
Transit	7,086,554	6,462,009	624,545	91%
Transportation	1,945,843	1,524,159	421,684	78%
Youth Development	8,104,298	6,535,174	1,569,124	81%

unexpected hot weather) and the significant climb in power and gas prices, the Electric Department requested a \$5.2 million budget increase to cover overages of which only \$4.2 were consumed ending with a positive variance of \$1.1 million. Savings from maintenance costs, contract services, small equipment and supplies, and training expenses resulted in a positive variance of \$2.9 million. These savings were offset by an unbudgeted \$0.5 expenditure related to the California Arreage Payment Program (CAPP). Project related delays resulted in a \$2.4 million shortfall in planned labor reimbursements. Vacancy savings in Electric Operations totaled \$1.5 million. Lastly, an additional \$0.2 million in rebate program savings were realized due to fewer commercial efficiency projects and residential energy program participation.

Spending in the Environmental Utilities came in lower than budgeted due to delayed mandates related to the disposal of organic materials (SB1383), vacant positions and COVID-related limitations on operational plans, including travel and training and unused emergency contingency funds.

Transit expenditures ended the year \$0.6 million under budget due to operational adjustments related to transit ridership reductions reflected in lower contracts and fuel costs, as well as the costs for a light-duty vehicle not received before year-end and a bus shelter replacement that was not completed. Cost savings of \$0.4 million in the Transportation Fund are related to vacancies and lower than estimated material, services and supplies expenses.

Youth Development Fund expenditures ended the fiscal year at 81 percent of budget due to the measures taken to reduce operational costs to mitigate the impact of decreased enrollment. These savings offset a portion of the shortfall in operating revenues.

Other Revenue

The table presented shows revenues in the Fire Facilities, Public Facilities, and Strategic Improvement Funds

	Budget to Cumulative Revenue Comparison (July 1 – June 30)				
	FY2020-21 Actual	Amended Budget	Cumulative Revenues	Variance	% of Budget
Fire Facilities	\$ 2,563,366	\$ 1,549,601	\$ 2,527,505	\$ 977,904	163%
Public Facilities	6,651,517	3,583,637	6,678,121	3,094,484	186%
Strategic Improvement	9,574,821	4,602,041	5,281,317	679,276	115%

(SIF) through the fourth quarter of FY2020-21 and FY2021-22. The revenue estimates for these three funds are generally based on a multi-year trend analysis of forecasted single-family, multi-family, and commercial development, as well as prior-year revenue collections. The sustained increase in development activity throughout the City during FY2021-22 has caused revenues in these funds to exceed budget estimates (Fire Facilities – 63 percent, Public Facilities – 86 percent, and SIF – 15%). The SIF revenue is significantly lower than the prior year because the prior year also included proceeds from sales of surplus property.

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE
AUTHORIZING CERTAIN AMENDMENTS TO THE FISCAL YEAR 2022-23
BUDGET AND DECLARING THIS ORDINANCE TO BE IMMEDIATELY
EFFECTIVE AS AN APPROPRIATION MEASURE

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. The City of Roseville Annual Budget, Fiscal Year 2022-23, is hereby amended by transferring an additional appropriation to and from the activities indicated on the Year-End Budget Adjustments, as listed on the attached list.

SECTION 2. This ordinance is hereby declared to be an appropriation measure, immediately effective pursuant to the provisions of Section 5.03 of the Charter.

SECTION 3. The City Clerk is hereby authorized and directed to post a true copy of the foregoing ordinance in each of three (3) conspicuous locations in the City and she shall immediately after such posting enter in the ordinance book, under the record of the ordinance, a certificate under her hand stating the time and place of such publication by posting.

Justification for Budget Adjustment:

The recommended budget adjustment includes an appropriation of \$31.5 million in General Funds for the Roseville Sports Complex (\$15 million), Capital Reserve (\$4.5 million), Pension Reserve Trust (\$4.5 million), Blue Oaks Widening (\$4 million), General Fund contingency replenishment (\$750,000), Police Department Mobile Data Computers (\$700,000), Sports Field Fencing (\$565,000), Development Services Stabilization Reserve (DSSR) (\$518,000), Maidu Soccer Field Parking Lot (\$450,000), General Plan Update (\$279,000), Vernon Atlantic Multimodal Safety Improvement Project (\$180,000), Royer Park Playground (\$123,000). There are adequate resources available in the General Fund to fund the recommended appropriations. This budget adjustment also includes an appropriation of \$250,000 from Placer Valley Tourism Grant for the Sports Field Fencing Project.

COUNCIL COMMUNICATION

CC #: 2485
File #: 0800-03

Title: Advanced Metering Infrastructure - Roseville Municipal Code Amendment and User and Regulatory Fee Amendment
Contact: Joanna Cucchi 916-746-1609 jcucchi@roseville.ca.us

Meeting Date: 1/18/2023
Item #: 10.1.

RECOMMENDATION TO COUNCIL

Staff recommends that the City Council take the following actions:

1. Adopt a resolution approving the Advanced Metering Infrastructure (AMI) advanced meter opt-out fee and amending the 2022-2023 Master Schedule of User and Regulatory Fees to include the AMI advanced meter opt-out fee; and
2. Introduce for first reading an ordinance amending Chapter 14.24 of the Roseville Municipal Code to incorporate Section 14.24.053 adopting a monthly rate for opt-out customers.

BACKGROUND

The City of Roseville will begin to modernize our electric metering system which will provide a new industry standard meter to utility customers. These new meters wirelessly send readings and information and will become the standard meter for Roseville Electric Utility. Single-family residential customers, with the exception of net-energy metered customers, can chose to opt out of the new meter.

This action would amend the Master Schedule of User and Regulatory Fees to include a one-time fee of \$119 for customers choosing to opt out of the new meters. This fee covers the purchase cost and installation of a non-communicating meter. In addition, the proposal will amend the Municipal Code to include a monthly rate of \$15 that will be charged on the customer's utility bill. The \$15 monthly rate will be used to recover the additional costs of meter reading and bill processing for opt-out customers. This is a voluntary opt-out program and the proposed fee and rate are calculated to recover the utility's cost to provide these additional services to opt-out customers.

In order to provide relief for our income qualified customers who wish to participate in the opt-out program, the one-time fee and monthly rate will be reduced by fifty-percent (50%). For customers who participate in the low income rate reduction, senior citizen rate reduction, or medical support rate reduction programs, the one-time fee will be \$59.50 and monthly rate will be \$7.50. The

Electric Department's public benefits program will cover the remainder of the costs to low income customers.

FISCAL IMPACT

The proposed opt-out program is estimated to collect approximately \$70,000 annually and will recover the costs associated with implementing the program. The discounted opt-out for low income rate participants will be funded through the utility's public benefits program, which includes funding required to be set aside for these types of programs, in the Electric Fund.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) only applies to projects which have the potential to cause a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA. (CEQA Guidelines §15061(b)(3)).

Description

Resolution 23-015

Master Fee Schedule Electric fees

Opt-out ordinance-Municipal Code Amendment

RESOLUTION NO. 23-015

ADOPTING AN AMENDED SCHEDULE OF USER AND REGULATORY FEES

WHEREAS, user and regulatory fees are established by the City Council; and

WHEREAS, on April 20, 2022, the City Council adopted an updated schedule of fees for use in Fiscal Year 2022-23; and

WHEREAS, the City of Roseville will begin to modernize our electric metering system which will provide a new industry standard meter to utility customers; and

WHEREAS, these new meters wirelessly send readings and information and will become the standard meter for Roseville Electric Utility; and

WHEREAS, this will require an amendment to the Master Schedule of User and Regulatory Fees to include a one-time fee of \$119 for customers choosing to opt-out of the new meters to cover the purchase cost and installation of a non-communicating meter; and

WHEREAS, the proposal will also amend the Municipal Code to include a monthly rate of \$15 that will be charged on the customer's utility bill to recover the additional costs of meter reading and bill processing for opt-out customers.

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Roseville that the amended Schedule of User and Regulatory Fees is hereby adopted; and

BE IT FURTHER RESOLVED that these fees are incorporated into the City's current master Schedule of User and Regulatory Fees.

** Note regarding annual inflationary adjustment: For items billed at actual cost or items billed at average labor and material rates, the underlying hourly billing rates should inflate annually by the change in hourly labor rates and/or indirect cost rate multipliers.*

* All meter upgrade costs must be paid prior to receiving interconnection approval to operate the PV system.

[a] Customer is required to supply a dedicated working phone line and monitoring for the duration of the PBI payment term. See the construction standards for phone line requirements.

[b] The initial and first resubmittal plan review and the initial and first resubmittal field inspections are included in the basic Meter Upgrade Charge.

ORDINANCE NO. ____

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE ADDING
SECTION 14.24.053 TO CHAPTER 14.24 OF TITLE 14 OF THE ROSEVILLE
MUNICIPAL CODE REGARDING ELECTRICAL ENERGY

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. Section 14.24.053 of Chapter 14.24 of Title 14 of the Roseville Municipal Code is hereby added to read as follows:

14.24.053 Residential smart meter opt out.

- A. Purpose: The residential smart meter opt out rate is intended to provide an alternative metering option for single family residential customers who do not want a smart meter installed on their premise. Roseville Electric will install a non-communicating meter for opt-out customers that will be manually read monthly.
- B. Customers choosing to opt out of the smart meter program will be charged a one-time fee as adopted in the City of Roseville fee book and a monthly charge established below to recover the costs of manual meter reading and processing of their electric usage.

C. Effective with the smart meter program implementation, customers choosing to opt out of the program will be charged \$15 per meter per month. For customers who participate in the senior citizen rate reduction, low-income rate reduction, and medical support rate reduction programs, the monthly opt-out rate will be \$7.50 per meter.

D. Eligibility: in order to qualify to opt out of the smart meter program, the following conditions apply:

1. Single family residences, which may include townhomes and condominiums that are individually metered, as well as duplexes and half-plexes, are eligible.
2. Customers with a net metering rate (NM-1) are not eligible.
3. Customers who have a history of meter tampering or unauthorized use of energy are not eligible.
4. Customer opt out does not transfer to new service addresses. The customer will be required to opt-out and pay the one-time fee for each premise.
5. Customers can opt-in at any time after opt-out. However, opt-out will no longer be available for that customer at their current residence. There are no costs associated with opt-in.

SECTION 2. This ordinance shall be effective at the expiration of thirty (30) days from the date of adoption.

SECTION 3. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

File #: 0400-04-18 & 0400-08

Title: North Industrial Plan Area Parcel 56 (2200 Freedom Way) Blue Oaks Commerce Center – Major Project Permit Stage 1 Modification and Major Project Permit Stage 2 Appeal

Contact: Escarlet Mar 916-774-5247 emar@roseville.ca.us

Meeting Date: 1/18/2023

Item #: 10.2.

RECOMMENDATION TO COUNCIL

Based on the September 22, 2022 Planning Commission hearing, staff recommends the City Council deny the appeal of the Planning Commission's approval of entitlements related to the Blue Oaks Commerce Center project and take the following actions:

1. Consider the Addendum to the Blue Oaks Commerce Center Initial Study and Mitigated Negative Declaration; and
2. Adopt a resolution denying the appeal from the September 22, 2022 approval by the Planning Commission; adopting the two (2) findings of fact and approving the Major Project Permit Stage 1 Modification subject to ten (10) conditions of approval; and adopting the two (2) findings of fact and approving the Major Project Permit Stage 2 subject to ninety-three (93) conditions of approval.

BACKGROUND

This Council Communication provides a summary of the project, the Planning Commission hearing and the appeal. A detailed project background and evaluation is provided in the Planning Commission staff report, included as Attachment 1. This project was originally listed on the Council's December 7, 2022 agenda and after additional correspondence was received from the appellant on December 6 and 7, the applicant requested a continuance of the project to address this correspondence. The Council voted to continue the project to January 18, 2023.

The project site is located at 2200, 2301, and 2201 Freedom Way, at the southwest corner of Blue Oaks Boulevard and Fidelity Way. The project has a zoning designation of General Industrial (M2) and a land use designation of General Industrial (IND) and is located on Parcel 56 of the North Industrial Planning Area (NIPA). The project site is bordered by Blue Oaks Boulevard to the north, a developed office building and an undeveloped parcel to the east, developed industrial uses to the south and Industrial Avenue and a railroad corridor to the west.

Project Description

The applicant requests approval of an MPP Stage 1 Modification to change the approved site plan by increasing the square footage of the industrial buildings on the site by approximately 50,000 square feet. The modification will also reorient the layout of the project site and reduce the overall number of industrial buildings. Furthermore, the project includes an MPP Stage 2 to evaluate the architecture and landscape plans of the four (4) new industrial buildings and associated site improvements. The future tenants of the buildings are unknown at this time, but it is anticipated that uses will include warehousing, light manufacturing, and/or distribution with office space. A detailed description and evaluation of the project is included in the Planning Commission staff report (see Attachment 1). The project site plan is included as Exhibit B.

Summary of Planning Commission Meeting

The project was heard by the Planning Commission on September 22, 2022. The Commission asked questions relating to the high volume of traffic along Blue Oaks Boulevard and whether any future CIP improvements are proposed on Blue Oaks, near the project site. Staff responded that the traffic associated with the proposed project is consistent with the citywide traffic model and that the widening of the Blue Oaks bridge is identified as a future CIP project. No public comments were provided during the hearing.

The Planning Commission considered the item and voted to approve the Major Project Permit Stage 1 Modification subject to ten (10) conditions of approval and the Major Project Permit Stage 2 subject to ninety-three (93) conditions of approval. The motion passed with a vote of 6 ayes, 0 nays, and 1 absent.

Appeal

On September 30, 2022, the City received a notice of appeal of the Planning Commission's decision from the Lozeau Drury law firm, representing the Laborers' International Union of North America, Local Union No. 185 (see Attachment 2). The appeal letter alleged the project should have completed an Initial Study and Mitigated Negative Declaration instead of an Addendum because mitigation measures are necessary to address the project's significant cumulative air quality impacts and air pollution emissions and energy usage.

On October 20, 2022, the City received a letter from Buchalter Law Group (see Attachment 3), representing Schnitzer Properties (the applicant), concurring with the City's CEQA determination that an Addendum was the appropriate environmental document for CEQA compliance, and requesting the City Council adopt the Addendum to the Blue Oaks Commerce Center Initial Study and Mitigated Negative Declaration.

The following provides a summary of the issues raised in the original appeal letter along with the staff response.

Response I, Air Quality

The appeal asserts the Project may have potentially significant cumulative air quality impacts that were not previously analyzed in the 2010 NIPA Blue Oaks Commerce Center Initial Study and Mitigated Negative Declaration (NIPA Blue Oaks Commerce Center IS/MND) and new mitigation measures would substantially reduce one or more significant cumulative air quality impacts.

The appellant asserts that since the adoption of the NIPA Blue Oaks Commerce Center IS/MND there are new standard mitigation measures related to distribution centers and warehouses that would reduce the cumulative air quality impacts of the Project. However, the appellant fails to provide Project-specific impacts associated with air quality that would warrant new mitigation

measures. According to California Environmental Quality Act (CEQA) Guidelines § 15162, an Addendum to a previously certified and adopted negative declaration or environmental impact report may be prepared for a project if only minor technical changes or additions are necessary or none of the conditions calling for the preparation of a subsequent EIR or negative declaration have occurred. As described in the Addendum, the increase of approximately 50,000 square-feet does not result in a substantial increase in the severity of a previously identified impact which would warrant an IS/MND or EIR. The Project air quality impacts associated with the increase in square footage of the Project are consistent with the development scenarios previously analyzed in the NIPA Blue Oaks Commerce Center IS/MND. Furthermore, current Placer County Air Pollution Control District (PCAPCD) regulations, which are designed to ensure compliance with air quality standards, apply to the Project. Based on this information and the applicable mitigation measures previously outlined in the NIPA Blue Oaks Commerce Center IS/MND, the Project would not require any new mitigation measures.

Response II, Air Pollution & Energy

The appeal asserts the Project did not appropriately analyze the increase in energy usage associated with the increase in the building square footage.

The appellant provided no analysis or evidence that would prove their assertion, but rather the appellant makes a speculative and general statement that the increase in the Project building square footage would generate an increase in energy usage because of an increase in trucks. The Addendum acknowledges that Energy was not previously analyzed in the 2010 NIPA Blue Oaks Commerce Center IS/MND because Energy is a new issue area that is now required to be examined. However, based on the Project's land use designation, the assumed development was evaluated as part of the citywide analysis prepared for the General Plan Update EIR, which assessed the energy demand and determined that the Project would not result in substantial unplanned demands, nor would it result in inefficient, wasteful, or unnecessary consumption of energy. The Project is within the scope of development assumed within the General Plan analysis. Thus, emissions from the project are not a new, project-specific impact requiring analysis, and per the tiering provisions of CEQA additional environmental analysis is not required. It is explicitly stated in the General Plan Update EIR that the EIR will be used by future projects for this tiering.

On December 6 and 7, 2022 the City received additional correspondence from the appellant (see Attachments 4 and 5). In both letters, the appellant expanded on the allegations regarding air quality, air pollution and energy that were raised in the September 30, 2022 appeal letter and introduced a new concern related to biological resources. These letters did not introduce any new evidence that warrants additional responses to the September 30, 2022 appeal letter, regarding air quality, air pollution, or energy usage. The new issue raised relates to speculation that the increased square footage of the project could result in additional truck traffic, which would then result in 669 vertebrate related vehicle deaths per year. Staff worked with the applicant to have a biologist visit the project site and provide an analysis of wildlife occurrences and habitat on or nearby. The biologist visited the site on December 15, 2022 and concluded (see Attachment 6) that there is no evidence to support the appellant's assertion that the project will result in 669 wildlife fatalities per year.

On December 21, 2022, the City received a second letter from Buchalter Law Group, representing Schnitzer Properties (see Attachment 6). This letter provides a detailed response to the appellant's most recent allegations and concludes with concurrence of the City's determination that the Addendum to the Blue Oaks Commerce Center Initial Study and Mitigated Negative Declaration is the appropriate document for CEQA compliance.

Public Outreach

The proposed project was distributed to all internal and external agencies and departments who have requested such notice, and all comments or recommended conditions of approval have been incorporated into the project, as appropriate. Notice of both the Planning Commission hearing and the City Council hearing was published in the Roseville Press Tribune and on the Roseville Coalition of Neighborhood Associations (RCONA) website, and mailed to all property owners and residents within a 300 foot radius of the project site. As of the writing of this report, staff has not received any public comment regarding the project.

Conclusion

Based on the analysis, the proposed project is consistent with the City's General Plan, Zoning Ordinance, North Roseville Area Design Guidelines, Community Design Guidelines, and the prior Blue Oaks Commerce Center project approvals. Therefore, staff recommends that the City Council deny the appeal of the Planning Commission's approval of entitlements and approve the Major Permit Project Stage 1 Modification and Major Project Permit Stage 2.

FISCAL IMPACT

The development of the site with four (4) new industrial buildings and associated site improvements will not result in negative impacts to the City's General Fund as it will develop two (2) vacant parcels with four (4) new industrial buildings.

ENVIRONMENTAL REVIEW

The City of Roseville, acting as Lead Agency, prepared an Addendum to the Blue Oaks Commerce Center Initial Study and Mitigated Negative Declaration (Adopted on May 27, 2010) for the Blue Oaks Commerce Center project (File #PL22-0101) consistent with CEQA Section 15164. This Addendum (see Exhibit A) evaluated the impact of development of the Blue Oaks Commerce Center, which includes the project site. The proposed project is substantially consistent with the Project previously evaluated in the Initial Study and Mitigated Negative Declaration (Adopted on May 27, 2010) and no new significant effects are expected to occur. In the September 30, 2022 appeal, Lozeau Drury challenges the determination that an Addendum was the appropriate environmental document for the Blue Oaks Commerce Center project and that the City should prepare a subsequent Mitigated Negative Declaration in lieu of the Addendum. However, the appeal letter does not offer any substantial evidence to support the claim for a subsequent Mitigated Negative Declaration. As mentioned above, in the analysis of the appeal, staff is confident that the Addendum adequately evaluated the Project and concluded that it would not result in any new or substantially more severe environmental impacts. Based on the analysis contained in the Addendum, the Addendum is the appropriate environmental document for this project.

The background section of this report provides a description of the appellant's concerns regarding the Addendum as well as a staff response and the response from the Applicant.

Therefore, staff recommends the City Council consider the proposed Addendum to the Blue Oaks Commerce Center Initial Study and Mitigated Negative Declaration.

ITEM 6.2: **Major Project Permit Stage 1 Modification and Major Project Permit Stage 2 – 2200 Freedom Way – NIPA PCL 56 – Blue Oaks Commerce Center – File #PL22-0101****REQUEST**

The applicant requests approval of a Major Project Permit (MPP) Stage 1 Modification and MPP Stage 2 to allow construction of four (4) industrial buildings totaling approximately 310,000 square feet in size, which will be located on two (2) parcels totaling 23.94-acres in size.

Applicant – Jennifer Kimura, VLMK Engineering + Design
Property Owner – Harsch Investment Properties II, LLC

SUMMARY RECOMMENDATION

The Planning Division recommends the Planning Commission take the following actions:

1. Consider the Addendum to the Blue Oaks Commerce Center Initial Study and Mitigated Negative Declaration; and
2. Adopt the two (2) findings of fact and approve the Major Project Permit Stage 1 Modification subject to ten (10) conditions of approval; and
3. Adopt the two (2) findings of fact and approve the Major Project Permit Stage 2 subject to ninety-three (93) conditions of approval.

SUMMARY OF OUTSTANDING ISSUES

There are no outstanding issues associated with this request. The applicant has reviewed and is in agreement with all recommended conditions of approval.

BACKGROUND

The project site is located at 2200, 2301, and 2201 Freedom Way, at the southwest corner of Blue Oaks Boulevard and Fidelity Way (see Figure 1). On June 1, 2022, planning staff approved a Voluntary Merger (File# PL22-0059) to merge Parcel 4 (017-123-083) and Parcel 5 (017-123-084) of the Blue Oaks Commerce Center Subdivision Parcel Map into one (1) parcel. As of this writing, the lot merger has been recorded. The project has a zoning designation of General Industrial (M2) and a land use designation of General Industrial (IND) and is located on Parcel 56 of the North Industrial Planning Area (NIPA). The North Roseville Area Design Guidelines were adopted in order to influence the general character of development within the NIPA. The project site is bordered by Blue Oaks Boulevard to the north, a developed office building and an undeveloped parcel to the east, developed industrial uses to the south and Industrial Avenue and a railroad corridor to the west.

On May 27, 2010, the Planning Commission approved a Major Project Permit (MPP) Stage 1 and a Tentative Subdivision Map for development of the Blue Oaks Commerce Center project with a 575,505 square feet office, industrial and retail complex (File# 2007PL-039) (see Figure 2 below). An Initial Study leading to a Mitigated Negative Declaration was prepared as part of the MPP Stage 1 and Tentative Subdivision Map for the project to evaluate the environmental impacts of developing NIPA PCL 56, which was adopted by the Planning Commission.

Figure 1: Project Location

Figure 2: Approved Blue Oaks Commerce Center Site Plan (File# 2007PL-039)

On October 23, 2014, the Planning Commission approved a modification to the MPP Stage 1 site plan to allow the elimination of the retail portion of the project and replace 80,724 square feet of industrial uses with an approximately 122,385 square foot three story office building for the Federal Bureau of Investigation (FBI) (see Figure 3). A MPP Stage 2 was also approved for the FBI Office building, which approved the building architecture, site grading, and on-site landscaping. The MPP Stage 1 entitlement approved in 2010 included conceptual landscape plans for the Blue Oaks Commerce Center. The landscape plans were deemed to be consistent with the North Roseville Area Design Guidelines (NRADG). The NRADG was adopted in 1992 and does not address current water efficient landscape requirements. On May 24, 2016, the Planning Manager approved an Administrative Permit to modify the master landscape plan for the Blue Oaks Commerce Center to include more drought tolerant species and meet current water efficiency standards.

Figure 3: Blue Oaks Commerce Center Modified Site Plan (red)

Proposed Project

The proposed project is located on Parcel 1, 4, and 5 as illustrated in Figure 4. The total area of the project site is approximately 23.94 acres. The revised project will allow the development of four (4) industrial buildings totaling approximately 310,000 square feet in size with associated parking, lighting, and landscaping (see Figure 5). The eastern corner parcel of the previously approved Blue Oaks Commerce Center will remain unchanged with this application.

The request for an MPP Stage 1 Modification would change the approved site plan by increasing the square footage of the industrial buildings on the site by approximately 50,000 square feet. The modification will also reorient the layout of the project site and reduce the overall number of industrial buildings. Lastly, the project includes an MPP Stage 2 to evaluate the architecture and landscape plans of the four (4) new industrial buildings and associated site improvements. The future tenants of the buildings are unknown at this time, but it is anticipated that uses will include warehousing, light manufacturing, and/or distribution with office space.

Figure 4: Blue Oaks Commerce Center Parcel Maps

Figure 5: Overall Conceptual Site Plan

EVALUATION

The proposed project is being evaluated through the Major Project Permit entitlement process. The intent of the MPP process is to streamline the review of large and diverse projects that could be constructed over a period of several years. The MPP process allows for the resolution of site issues prior to the review of more detailed architectural and landscape plans that may not be finalized at the time the site plan is ready. In accordance with the City's MPP Section of the Zoning Ordinance, the MPP review process is segregated into three separate stages. The evaluation section of this report includes an analysis of the requested MPP Stage 1 Modification and MPP Stage 2. Each entitlement is analyzed for its consistency with the goals and policies of the applicable regulations, including the General Plan, the Zoning Ordinance, the Community Design Guidelines, the North Industrial Planning Area, and the North Roseville Area Design Guidelines.

Section 19.82.040 of the City of Roseville Zoning Ordinance describes the procedures for an amendment to a Major Project Permit. According to Section 19.82.040(C), all amendments that are not considered minor shall be reviewed in the same manner as the initial approval. The proposed request includes modifying the site plan and constructing four (4) new industrial buildings. This modification does not meet the minor modification criteria and; therefore, requires final action by the Planning Commission subject to the findings for a Major Project Permit Stage 1. The required findings are listed below in ***italicized, bold*** text and are followed by an evaluation.

The findings for a MPP Stage 1 (or modification of same) are as follows:

- 1. The Preliminary Development Plan is consistent with the General Plan, applicable Specific Plan, and adopted City Design Guidelines; and***
- 2. The design and installation of the Preliminary Development Plan shall not be detrimental to the public health and safety, or be materially detrimental to the public welfare.***

The findings for the MPP Stage 2 are as follows:

- 1. The architecture and landscaping is consistent with the General Plan, applicable Specific Plan, and adopted City Design Guidelines; and Phase 1 approval; and***
- 2. The design and installation of the Preliminary Development Plan shall not be detrimental to the public health and safety, or be materially detrimental to the public welfare.***

These findings are essentially the same, with the MPP Stage 1 Modification findings referring to the preliminary development plan, and the MPP Stage 2 findings referring to the architecture and landscaping, as well as consistency with the Stage 1 project. Therefore, for the purposes of this evaluation, both stages are examined together.

Site Plan and Building Siting: The project will modify the approved site plan by reorienting the industrial buildings on parcels 1, 4, and 5, and increasing the total square footage by approximately 50,000 square feet. Parcel 1 is situated at the southwest corner of Blue Oaks Boulevard and Fidelity Way, and Parcels 4 and 5 are located south of Parcel 1 and bounded by Industrial Avenue to the west and Freedom Way to the north.

As previously mentioned, on June 1, 2022, City staff approved a Voluntary Merger (File# PL22-0059) to merge Parcel 4 (017-123-083) and Parcel 5 (017-123-084) of the Blue Oaks Commerce Center Subdivision Parcel Map into one (1) parcel (resultant Parcel A). As of this writing, the Lot Merger has been recorded. Therefore, the project will encompass two (2) legal parcels.

Figure 6: Parcel 1 Proposed Site Plan

Figure 7: Parcel A Proposed Site Plan

Parcel 1 is proposed with two (2) standalone industrial buildings measuring 85 feet in width and 700 feet in length, totaling 119,500 square feet of building area (see Figure 6). Building D is setback approximately

120 feet from Blue Oaks Boulevard and has a front average setback of 105 feet. Similar to Parcel 1, Parcel A is proposed with two (2) standalone industrial buildings (see Figure 7). Building A is proposed to measure approximately 150 feet in depth and 730 feet in width. Building B is proposed to measure 110 feet in depth and 730 feet in width. The total square footage of Buildings A and B is approximately 189,300 square feet in size.

The NRADG requires minimum landscape setbacks for both Primary Arterial Corridors and Secondary Arterial Corridors. According to the NRADG, Blue Oaks Boulevard is designated as a Primary Landscape Corridor and Industrial Avenue as a Secondary Landscape Corridor, therefore, a 50 foot landscape corridor is proposed along Blue Oaks Boulevard and a 35 foot landscape corridor is proposed along Industrial Avenue. At the northeast corner of Parcel 1 the parking stalls encroach 2 feet within the landscape corridor. As a result of this encroachment the landscape corridor is decreased by two (2) feet, to allow for a minimum drive aisle width of 24 feet which will allow adequate emergency access and backup distance for vehicles exiting these spaces. This minor reduction in setback is supported by staff and is the only area of the project site where the landscape corridor is less than 50 feet.

Pursuant to the NRADG, a building pad landscape area of 10 feet is also required around the buildings. Buildings A-D all propose this landscape zone around the buildings where permissible.

Vehicle Access and Circulation: The changes to the site plan will result in modifications to the access and circulation pattern of the parcels. The project will provide driveways along Industrial Avenue to the west, along Freedom Way to the south and north, and along Fidelity Way to the east, consistent with the original MPP approval. However, a vehicle access evaluation of the project site was prepared by Fehr & Peers (Attachment 2) and found that the second driveway along Industrial Avenue would permit full turning movements. The same study also found that the driveway north of Freedom Way and South of the Blue Oaks Bridge would only permit right-turns in and out of the site.

Therefore, the Engineering Division has added Condition #7, which will require the driveway along Industrial Avenue on Parcel 1 to restrict inbound and outbound movements to right-turns only by constructing a narrow raised curb on the east edge of the median within Industrial Ave. City Engineering and Fire Department staff have reviewed the project and found it to conform to City design standards and emergency vehicle response standards. The project has adequate vehicle site access, meets design standards, and will not be detrimental to public health and safety.

Parking: The Blue Oaks Commerce Center project was approved and designed so that adequate parking for all uses was provided on each parcel independent of other projects and will meet the City's parking standards.,

Based on the Zoning Ordinance parking requirement for general industrial uses, the project is required a minimum of 400 parking spaces. Between the Parcels 1 and A, the project proposes 822 parking spaces, 4 bike parking, and 99 Clean Air/EV parking spaces, exceeding the parking requirement.

Architecture: The Blue Oaks Commerce Center MPP Stage 1 included the review and approval of the conceptual architecture and landscaping for the site. The purpose of the conceptual plans is to show a consistent architecture and landscape theme, in compliance with the applicable design guidelines, that provides a guide for development of the site. The Community Design Guidelines suggest that projects with multiple buildings develop an architectural theme throughout the project. The Blue Oaks Commerce Center MPP Stage 1 conceptual plans show a concrete tilt-up construction, score lines and wall, and roof line variation to provide visual interest, consistent with the Community Design Guidelines (see Figure 8).

Figure 8: Blue Oaks Commerce Center MPP Stage 1 Approved Building Elevations

The Blue Oaks Commerce Center Buildings A, B, C, & D will be of similar design to the approved MPP Stage 1 plans. The project buildings are designed as a concrete tilt-up industrial buildings with architecture features like reveals, stepped facades and parapets, metal cornices, steel beam accents over the windows and canopies at the entries. The buildings are rectangular in shape with variation in height to break up the structure and provide visual interest. The heights of the buildings vary between 35 feet and 43 feet tall, consistent with the NRADG. The project incorporates a similar paint palette found in other warehouse buildings within the vicinity, the buildings are proposed a variation of grey and white colors (see Figure 9).

Figure 9: Proposed Color Palette

The buildings are designed with a main entrance door defined by the forward presentation and aluminum storefront windows. The back elevations of each building will consist of a metal roll-up door for the loading dock area. The proposed evergreen trees at the corners of each building will minimize the views of the loading docks from public view. As proposed, the design of the buildings is similar to the approved Blue Oaks Commerce Center MPP Stage 1, and is consistent with the NRADG and the CDG.

Landscaping: The Blue Oaks Commerce Center conceptual landscape plans included a master landscape palette to be applied throughout the project. The proposed planting plan includes street trees suggested in the NRADG, shade trees, accent trees, and drought tolerant plants. Trees include a mix of London Planes and Chinese Pistache along the roadways and within the parking area, and Red Maples, Birch, Deodar Cedar, Loquat, Hawthorne, and Crape Myrtles around the building. Curvilinear lawns, areas of mow-free fescue, and shrub plantings are to be used along roadway frontages. The water quality swales should also be planted with trees and suitable vegetation that will allow the water treatment system to function properly. Consistent with the NRADG, 10 feet of planting area will be provided around the base of all buildings. The final landscaping will be required to adhere to the Water Efficient Landscaping Ordinance (WELO).

Landscaping within the parking area will consist of a mix of Cherokee crape myrtle and drake lacebark elm. The CDG requires that 50-percent of the paved parking areas be shaded by trees at 15-year maturity. The landscaping plan indicates that the project site will provide 54-percent parking lot shading, meeting the requirement. Lastly, along the north side of Freedom Way a Pacific Gas & Electric (PG&E) gas main exists that precludes any trees or shrubs to be located within five feet of the gas line. The proposed site plan shows the majority of the street trees would be located a minimum of five (5) feet from this line. To ensure this requirement, Condition #10 has been added to the project. Overall, the landscape design is consistent with the landscaping palate used throughout the NRADG and is consistent with the CDG.

Lighting: The parking lot lighting will consist of LED pole-mounted lights with an overall height of twenty-five (25) feet. This height complies with CDG Policy OI-82, which requires pole mounted lighting to be no taller than 35 feet for industrial projects. Consistent with CDG Policy OI-78, the lighting sources will have cut off lenses and be located to avoid light spillage and glare on adjacent properties and in private spaces. The lighting is conditioned to comply with the City's minimum lighting level requirements (0.5 foot-candles in pedestrian areas and 1.0 foot-candles in vehicle areas). As such, staff finds the photometric plan is consistent with the CDG.

CONCLUSION

The proposed project is consistent with the City's General Plan, Zoning Ordinance, North Roseville Area Design Guidelines, CDG, and the prior Blue Oaks Commerce Center project approvals. Therefore, staff recommends that the Planning Commission approve the MPP Stage 1 Modification and MPP Stage 2.

PUBLIC OUTREACH

The proposed project was distributed to all internal and external agencies and departments who have requested such notice, and all comments or recommended conditions of approval have been incorporated into the project, as appropriate. Early notification of the project was posted on the Roseville Coalition of Neighborhood Associations (RCONA)'s website. A notice of the public hearing was published in the Roseville Press Tribune on September 10, 2022 and a notice of the hearing was also distributed to all property owners within 300 feet of the site and posted on the RCONA website. No comments have been received as of publication of the staff report.

ENVIRONMENTAL DETERMINATION

An Addendum to the Blue Oaks Commerce Center Initial Study and Mitigated Negative Declaration (Adopted on May 27, 2010) was prepared for the Blue Oaks Commerce Center project (File #PL22-0101) consistent with CEQA Section 15164. This Addendum evaluated the impact of development of the Blue Oaks Commerce Center, which includes the project site. The proposed project is substantially consistent with the previously evaluated project, and no new effects are expected to occur.

RECOMMENDATION

The Planning Division recommends the Planning Commission take the following actions:

1. Consider the Addendum to the Blue Oaks Commerce Center Initial Study and Mitigated Negative Declaration; and
2. Adopt the two (2) findings of fact and approve the **MAJOR PROJECT PERMIT STAGE 1 MODIFICATION – 2200 FREEDOM WAY – NIPA PCL 56 – BLUE OAKS COMMERCE CENTER (BLDS. A, B, C, & D) – FILE #PL22-0101** subject to ten (10) conditions of approval; and
3. Adopt the two (2) findings of fact and approve the **MAJOR PROJECT PERMIT STAGE 2 – 2200 FREEDOM WAY – NIPA PCL 56 – BLUE OAKS COMMERCE CENTER (BLDS. A, B, C, & D) – FILE #PL22-0101** subject to ninety-three (93) conditions of approval.

CONDITIONS OF APPROVAL FOR THE MPP STAGE 1 MODIFICATION – FILE #PL22-0101

1. This Major Project Permit (MPP) Stage 1 modification approval shall be effectuated within a period of two (2) years from **September 22, 2022** and if not effectuated shall expire on **September 22, 2024**. Prior to said expiration date, the applicant may apply for an extension of time, provided this approval does not extend the expiration beyond **September 22, 2025**. (Planning)
2. The project is approved as shown in Exhibit A – B and as conditioned or modified below. (Planning)
3. The project is subject to the previously approved conditions of approval for the NIPA Blue Oaks Commerce Center MPP Stage 1 – File 2007PL-039 (MPP-000013 & SUB-000143), except as conditioned or modified below. (Planning)
4. The project shall comply with all required environmental mitigation identified in the Blue Oaks Commerce Center Initial Study and Mitigated Negative Declaration (File# 2007PL-039) and subsequent Addendum prepared for the project, and shall include all applicable mitigation measures as notes on the grading plans. (All Departments)
5. Bike parking and clean air vehicle spaces shall be provided per the California Green Building Standards. Bike rack/locker design and location shall be approved by Alternative Transportation. (Alternative Transportation, Building)
6. The applicant shall provide a bus shelter easement at the location of the bus shelter pad along northbound Industrial Avenue, north of Freedom Way, adjacent to the site. (Engineering, Alternative Transportation)
7. The applicant shall install a raised curb at the northern driveway along Industrial Avenue, per the recommendations identified in the Technical Memorandum (Focused Access Evaluation for the Blue Oaks Commerce Center) prepared by Fehr & Peers dated July 26th, 2022. The raised curb shall begin 100 feet north of the driveway centerline and end 75 feet to the south of the driveway centerline. A One Way Only sign shall be placed within the raised curb visible to vehicles exiting the driveway. A NO U-Turn sign shall be installed at the north end of the raised curb or in the adjacent median. This will limit this driveway to right in/out only. (Engineering)
8. The applicant shall stripe a 175 foot southbound left-turn lane within the paved median to serve the southern driveway located along Industrial Avenue. All turning movements are approved on this driveway. (Engineering)
9. The address for this project shall be 2200 Freedom Wy. The address for proposed Building A shall be 2251 Freedom Wy. The address for proposed Building B shall be 2151 Freedom Wy. The address for proposed Building C shall be 2150 Freedom Wy. The address for proposed Building D shall be

2250 Freedom Wy. All projects with multi-tenants or buildings must submit a site plan with building footprint(s) and suite numbers to the Development Services Department (Business Services – Addressing) for review and approval. (Business Services).

10. All trees and shrub plantings along Freedom Way shall be at least 5-feet away from the existing Pacific Gas & Electric gas line. (Planning)

CONDITIONS OF APPROVAL FOR THE MPP STAGE 2 – FILE #PL22-0101

1. This Major Project Permit approval shall be effectuated within a period of two (2) years from **September 22, 2022** and if not effectuated shall expire on **September 22, 2024**. Prior to said expiration date, the applicant may apply for an extension of time, provided this approval does not extend the expiration beyond **September 22, 2025**. (Planning)
2. The project is approved as shown in Exhibits A – B and as conditioned or modified below. (Planning)
3. Lighting shall be reviewed with Stage Two and shall comply with Community Design Guidelines lighting standards (1 footcandle for roadways and parking lots and 0.5 footcandles for walkways). (Planning)
4. Tree plantings on the project site shall cumulatively provide a minimum of 50% shade coverage for parking areas and drive aisles, consistent with the Community Design Guidelines. (Planning)
5. Fencing and retaining walls shall be reviewed with the MPP Stage 2 application and shall be consistent with the Zoning Ordinance, Community Design Guidelines and North Roseville Design Guidelines, and improvement standards. (Planning)
6. The applicant shall pay City's actual costs for providing plan check, mapping, GIS, and inspection services. This may be a combination of staff costs and direct billing for contract professional services. (Engineering, Environmental Utilities, Finance)
7. The design and construction of all improvements shall conform to the Improvement Standards and Construction Standards of the City of Roseville, or as modified by these conditions of approval, or as directed by the City Engineer. (Engineering)
8. The applicant shall not commence with any on-site improvements until such time as grading and/or improvement plans are approved and grading and/or encroachment permits are issued by the Development Services - Engineering. (Engineering)
9. The approval of this project does not constitute approval of proposed improvements as to size, design, materials, or location, unless specifically addressed in these conditions of approval. (Engineering)

PRIOR TO ISSUANCE OF BUILDING PERMITS:

10. All buildings shall be occupied with uses permitted in the General Industrial (M2) zone district, per the Roseville Municipal Code. Conditionally permitted uses may be permitted upon approval of a Conditional Use Permit prior to building occupancy. Uses not permitted under the current zoning shall only be permitted upon approval of a Rezone. All future development must comply with the Roseville Zoning Ordinance. (Planning)
11. Parking lot design shall conform to the City's design standards, including the following minimum standards for parking stalls:
 - a. All parking stalls shall be double-striped. Parking stalls adjacent to sidewalks, landscaped areas or light fixtures, and all Accessible stalls shall abut a 6-inch raised curb or concrete bumper. (Planning)

- b. Standard – 9 feet x 18 feet; Compact – 9 feet x 16 feet; Accessible – 14 feet x 18 feet (a 9-foot-wide parking area plus a 5-foot-wide loading area) and a minimum of one (1) parking space shall be Accessible van accessible – 17 feet x 18 feet (9-foot-wide parking area plus an 8-foot-wide loading area). (Planning)
 - c. An 'exterior routes of travel' site accessibility plan incorporating slope, cross-slope, width, pedestrian ramps, curb ramps, handrails, signage, detectable warnings or speed limit signs or equivalent means shall comprise part of the site improvement plans submitted to City for review, prior to building plan check approvals. This site accessibility plan shall also include:
 - i. Accessible parking stalls shall be dispersed and located closest to accessible entrances. The total number of accessible parking spaces shall be established by Table 11B-208.2 of the CBC.
 - ii. Accessible Parking spaces and crosswalks shall be signed, marked and maintained as required by Chapter 11 of the CBC.
 - iii. Accessible parking and exterior route of travel shall comply with CBC, Sections 11B-206 and 11B-208. (Building)
12. Signs and/or striping shall be provided on-site as required by the Planning Department to control on-site traffic movements. (Planning)
13. The plans submitted to the Building Department for permits shall indicate all approved revisions/alterations as approved by the Commission including all conditions of approval. (Planning)
14. The project Landscape Plans shall comply with the following:
- a. The Landscape Plan shall indicate the location of, and be designed to avoid conflicts with, all pole-mounted light fixtures and utility equipment including (but not limited to) electric transformers, switchgear, and overhead lines; backflow preventers; fire department connections; and public water, sewer, and storm drain facilities. (Planning, Fire, Environmental Utilities, Electric, Public Works)
 - b. The tree plantings in the parking lot shall be designed to provide a minimum of 50% shade coverage after 15 years. (Planning)
 - c. At a minimum, landscaped areas not covered with live material shall be covered with a rock, (3") bark (no shredded bark) or (3") mulch covering. (Planning)
 - d. The landscape plan shall comply with the Landscape Guidelines for North Roseville Area Design Guidelines and the City of Roseville Water Efficient Landscape Ordinance. (Planning, Environmental Utilities)
 - e. Landscaping adjacent to preserve areas shall consist of California native, drought-tolerant groundcover, shrubs, plants, and trees. (Open Space, Planning)
 - f. All landscaping in areas containing electrical service equipment shall conform to the Electric Department's Landscape Requirements and Work Clearances as outlined in Section 10.00 of the Departments "Specification for Commercial Construction." (Electric)
 - g. Slopes within landscape planters shall be no more than 3:1. A two-foot flat bench located at back-of-walk shall be included in the landscape area to slow or allow absorption of nuisance run-off from the planters. (Parks, Recreation, and Libraries)

- h. All landscaping shall conform to the standards of crime prevention through environmental design with the intent to create natural surveillance, controlling access, and territorial reinforcement to property boundaries. (Police) At a minimum, landscaped areas not covered with live material shall be covered with a rock, (2") bark (no shredded bark) or (2") mulch covering. (Planning)
15. Any roof-mounted equipment and satellite dishes proposed shall be shown on the building plans. The equipment shall be fully screened from public streets and the surrounding properties. (Planning)
16. At the time of building permit application and plan submittal, the project applicant shall submit a proposed plan which shows the proposed addressing for the building and dwelling unit numbers. The Building Official, or the designee, shall approve said plan prior to building permit approval. Refer to the *City of Roseville Addressing Guidelines*. (Building)
17. At the time of building permit application and plan submittal, the project applicant shall submit a proposed plan which shows the proposed suite addressing for individual tenant spaces within the building. The Building Official, or the designee, shall approve said plan prior to building permit approval. Refer to the *City of Roseville Addressing Guidelines*. (Building)
18. A separate Architectural Site Accessibility Plan which details the project's site accessibility information as required by California Title 24, Part 2 shall be submitted as part of the project Building Permit Plans. (Building)
19. For Multiple Building Complexes: As part of the required Architectural Site Accessibility Plan, the developer shall delineate the extent of the site accessibility improvements being installed as part of the initial improvements for the project, and those that are planned to be developed as part of subsequent phases (i.e. around future pad buildings). (Building)
20. Building permit plans shall comply with all applicable code requirements (California Building Code – CBC – based on the International Building Code, California Green Building Standards Code–CGBSC, California Mechanical Code – CMC – based on the Uniform Mechanical Code, California Plumbing Code – CPC – based on the Uniform Plumbing Code, California Fire Code – CFC – based on the International Fire Code – with City of Roseville Amendments – RFC, California Electrical Code – CEC – based on the National Electrical Code, and California Energy Standards – CEC T-24 Part 6), California Title 24 and the American with Disabilities Act - ADA requirements, and all State and Federally mandated requirements in effect at the time of submittal for building permits (contact the Building Division for applicable Code editions). (Building)
21. For restaurants, other food services, or commercial swimming pools: The developer shall obtain all required approvals and permits from the Placer County Health Department. (Building)
22. For restaurants, other food services, or commercial swimming pools: The developer shall obtain all required approvals and permits from the Placer County Health Department and the City of Roseville Industrial Waste Division. (Building, Environmental Utilities)
23. Maintenance of copy of building plans: Health and Safety Code section 19850 requires the building department of every city or county to maintain an official copy of the building plans for the life of the building. As such, each individual building shall be submitted as a separate submittal package. Building plan review, permit issuance and archiving is based on each individual building address. (Building)
24. For all work to be performed off-site, permission to enter and construct shall be obtained from the property owner, in the form of a notarized right-of-entry. Said notarized right-of-entry shall be provided to Public Works prior to approval of any plans. (Public Works)

25. Improvements on Industrial Avenue shall be constructed to obtain 12-foot north bound and south bound travel lanes, a 10-foot north bound auxiliary lane across the entire frontage, a 12 –foot two-way left turn lane, and a 4-foot north bound bike lane. The property frontage on Industrial Avenue shall be improved to include standard curb, gutter, and an 8-foot detached pedestrian path. The site shall be accessed, with full turn movements, through Road A and the A-7 driveways located north and south of Road A. Driveways shall be 35-feet in width and shall have 30-foot curb returns for truck access. (Engineering)
26. The Improvement Plans shall include a complete set of Landscape Plans. The Landscape Plans shall be approved with the Improvement Plans. (Planning, Public Works, Fire, Environmental Utilities, Electric)
27. A note shall be added to the grading plans that states:

*“Prior to the commencement of grading operations, the contractor shall identify the site where the **excess/borrow** earthen material shall be imported/deposited. If the **borrow/deposit** site is within the City of Roseville, the contractor shall produce a report issued by a geotechnical engineer to verify that the exported materials are suitable for the intended fill, and shall show proof of all approved grading plans. Haul routes to be used shall be specified.”* (Public Works)
28. The developer shall place bus shelters and pads on northbound Industrial Avenue north of Road A (Shelter #10-249), southbound Washington Boulevard south of Road A (Shelter #10-250), westbound Road A west of Washington Boulevard (Shelter #10-251), eastbound Road “A” before the entrance to Parcel 7 (Shelter #10-252), and southbound on Road B south of Blue Oaks Boulevard (Shelter #10-253). (Engineering/Transportation)
29. Developer shall be responsible for the installation of a bus shelter and related improvements conforming to the city's current standards on the shelter pads as conditioned above. The Developer and City may enter into a deferred improvement or other agreement based upon a construction cost of \$10,000 per shelter. (Engineering, Transit)
30. All driveways located on Road A and Road B shall be designed and constructed as 35-foot wide Type A-7 driveways. (Engineering)
31. The applicant shall dedicate all necessary rights-of-way or Public Utility Easement for the widening of any streets or transfer of public utilities across and over any portion of the property as required with this entitlement. A separate document shall be drafted for approval and acceptance by the City of Roseville, and recorded at the County Recorder's Office. (Public Works)
32. Bike parking and clean air vehicle spaces shall be provided per the California Green Building Standards. Bike rack/locker design and location shall be approved by Alternative Transportation. (Alternative Transportation, Building).
33. The grading plans shall be accompanied with engineered structural calculations for all retaining walls greater than 4 feet in height. All retaining walls shall be of either split faced masonry units, keystone type construction, or cast in place concrete with fascia treatment. (Engineering)
34. All storm drainage, including roof drains, shall be collected on site and treated with Best Management Practices (BMP's) per the City's Stormwater Quality Design Manual. All storm water shall be routed to the nearest existing storm drain system or natural drainage facility. Drain outfalls shall extend down to the receiving water and shall be constructed with adequate velocity attenuation devices. The grading/improvement plans for the site shall be accompanied with a shed map that defines that area tributary to this site and all drainage facilities shall be designed to accommodate the tributary flow. The storm drain system and proposed BMP's shall be privately owned and maintained by the property

owner. Prior to the issuance of any permits, the owner shall provide a plan for the maintenance of the proposed BMP's. (Public Works)

35. Prior to the approval of the Improvement Plans, the project proponent shall provide proof of preparation and submittal of a Storm Water Pollution Prevention Plan (SWPPP) to the Regional Water Quality Control Board (RWQCB). Proof shall be in the form of the Waste Discharge Identification Number (WDID#), provided to the applicant from RWQCB, placed on the coversheet of the improvement plans. Upon approval of the improvement plans, a copy of the SWPPP shall be required onsite and available for viewing by City inspection staff upon request. (Engineering)
36. The developer shall be responsible for any necessary relocation of signal interconnect cables that may require re-location as a result of the construction of turn lanes and/or driveways. (Public Works)
37. Sight distances for all driveways shall be clearly shown on the improvement plans to verify that minimum standards are achieved. It will be the responsibility of the project proponent to provide appropriate landscaping and improvement plans, and to relocate and/or modify existing facilities as needed to meet these design objectives. (Public Works)
38. Roseville Electric will be requiring a 25' Public Utilities Easement (PUE) that runs contiguously along the east side of Road "B" and the north side of Road "A", and a 12'-6" PUE that runs contiguously along the west side of Road "B" and the south side of Road "A". (Electric, Engineering)
39. Roseville Electric will be requiring the proposed 50' landscape easement along Blue Oaks Blvd. be changed to a 50' Landscape/ Public Utility Easement. (Electric, Engineering)
40. Roseville Electric will be requiring the proposed 50' landscape easement along Washington Blvd. be changed to a 50' Landscape/ Public Utility Easement. (Electric, Engineering)
41. Roseville Electric will be requiring the proposed 35' landscape easement along Industrial Ave. to be changed to a 35' Landscape/ Public Utility Easement. (Electric, Engineering)
42. Roseville Electric will be requiring a 35' Public Utility Easement centered on all existing overhead electric lines throughout the entire site. (Electric, Engineering)
43. All street lighting along road A and B shall be installed, at the developer's expense, per the approved City of Roseville Electric Site Utility Design generated by Roseville Electric. (Electric)
44. Roseville Electric shall require additional easements to cover all high voltage electric equipment. This can be accomplished by a common area Public Utilities Easements over the each parcel or by an easement by separate document over all high voltage equipment, as shown on the approved Electric Site Utility Design, generated by Roseville Electric. (Electric, Engineering)
45. The applicant shall remove and reconstruct any existing damaged curb, gutter, and sidewalk along the property frontage. During plan check of the improvement plans and/or during inspection, Public Works will designate the exact areas to be reconstructed. Any existing public facilities damaged during the course of construction shall be repaired by the property owner and at the property owner's expense, to the satisfaction of the City. (Public Works)
46. Prior to the approval of the improvement plans, it will be the project proponent's responsibility to pay the standard City Trench Cut Recovery Fee for any cuts within the City streets that are required for the installation of underground utilities. (Public Works)
47. Prior to the issuance of building permits, the property owner shall pay into the following fee programs: Citywide Drainage Fee, Citywide Traffic Mitigation Fee (TMF), Highway 65 Joint Partners Association (JPA), South Placer Regional Transportation Authority (SPRTA), and City/County Fee. (Public Works)

48. The applicant shall pay all applicable water and sewer fees. (Environmental Utilities)
49. Water and sewer infrastructure shall be designed pursuant to the adopted City of Roseville Improvement Standards and the City of Roseville Construction Standards and shall include:
 - a. Utilities or permanent structures shall not be located within the area which would be disturbed by an open trench needed to expose sewer trunk mains deeper than 12' unless approved by Environmental Utilities in these conditions. The area needed to construct the trench is a sloped cone above the sewer main. The cone shall have 1:1 side slopes.
 - b. Water and sewer mains shall not exceed a depth of 12' below finished grade, unless authorized in these conditions of approval.
 - c. All sewer manholes shall have all weather 10-ton vehicle access unless authorized by these conditions of approval. (Environmental Utilities)
50. No trees are to be planted within 10' of the 30" water main along the southern boundary of the property except with the approval of the Environmental Utilities Director. (Environmental Utilities)
51. The design and installation of all fire protection equipment shall conform to the California Fire Code and the amendments adopted by the City of Roseville, along with all standards and policies implemented by the Roseville Fire Department. (Fire)
52. The applicable codes and standards adopted by the City shall be enforced at the time construction plans have been submitted to the City for permitting. (Fire)
53. Based on the adopted fire protection codes adopted by this department, it appears that several of the buildings shall have installed a full fire alarm system subject to approval by this department. (Fire)
54. Trash enclosures, recycling areas, and enclosure approaches shall be designed to current Refuse Division specifications, the materials and colors shall match the building, and the location of such facilities shall be reviewed and approved by the Refuse Division, Planning and the Fire Department. The enclosure must have inside dimensions of 12 feet wide and 9 feet deep and be built to the specifications of the Solid Waste Department's Enclosure Description. (Refuse, Planning, Fire)
55. Access to trash enclosures shall have an inside turning radius of 25 feet and an outside turning radius of 45 feet must be maintained to allow the refuse truck access to and from the enclosure. Enclosures must have a clear approach of 65 feet in front of the enclosure to allow servicing bins. (Refuse)
56. A trash enclosure and recycling enclosure is required for each building and each tenant, otherwise, the building owner is responsible for the trash service. (Refuse)
57. A covered seating or reception area at the main entrance at buildings N and M visible from the driveways, shall be provided for dial-a-ride passengers, and the drop-off/pick-up shall be signed. (Planning, Transportation)
58. The applicant/developer shall prepare a Transportation Systems Management (TSM) Plan for Blue Oaks Commerce Center to be reviewed and approved by the Transportation Commission. (Transportation)
59. All on-site external lighting shall be installed and directed to have no off-site glare. Lighting within the parking areas shall provide a maintained minimum of one (1) foot candle of light. All exterior light fixtures shall be vandal resistant. (Planning & Police)

60. The parking lot shall have properly posted signs that state the use of the parking area is for the exclusive use of employees and customers of this project. (See California Vehicle Code Sections 22507.8, 22511.5, 22511.8, 22658(a), and the City of Roseville Municipal Code Section 11.20.110). The location of the signs shall be shown on the approved site plan. (Planning & Police)
61. It is the developer's responsibility to notify PG&E of any work required on PG&E facilities. (PG&E)
62. Recycled water infrastructure shall be designed pursuant to the adopted City of Roseville Improvement Standards and the City of Roseville Construction Standards. The applicant shall pay all applicable recycled water fees. Easements shall be provided as necessary for recycled water infrastructure. (Environmental Utilities)
63. The Electric Department requires the submittal of the following information in order to complete the final electric design for the project:
 - a. one (1) set of improvement plans
 - b. load calculations
 - c. electrical panel one-line drawings

DURING CONSTRUCTION & PRIOR TO ISSUANCE OF OCCUPANCY PERMITS:

64. Any backflow preventers visible from the street shall be painted green to blend in with the surrounding landscaping. The backflow preventers shall be screened with landscaping and shall comply with the following criteria:
 - a. There shall be a minimum clearance of four feet (4'), on all sides, from the backflow preventer to the landscaping.
 - b. For maintenance purposes, the landscaping shall only be installed on three sides and the plant material shall not have thorns.
 - c. The control valves and the water meter shall be physically unobstructed.
 - d. The backflow preventer shall be covered with a green cover that will provide insulation. (Planning, Environmental Utilities)
65. The following easements shall be provided by separate instrument and shown on the site plan, unless otherwise provided for in these conditions:
 - a. Water and sewer easements. (Electric, Public Works, Environmental Utilities)
66. Easement widths shall comply with the City's Improvement Standards and Construction Standards. Separate document easements required by the City shall be prepared in accordance with the City's "Policy for Dedication of Easements to the City of Roseville". All legal descriptions shall be prepared by a licensed land Surveyor. All existing public utility, electric, water, sewer and reclaimed water easements shall be maintained unless otherwise authorized by these conditions of approval. (Public Works, Environmental Utilities, Electric)
67. Inspection of the potable water supply system on new commercial/industrial/office projects shall be as follows:
 - a. The Environmental Utilities Inspector will inspect all potable water supply up to the downstream side of the backflow preventer.

- b. The property owner/applicant shall be responsible for that portion of the water supply system from the backflow preventer to the building. The builder/contractor shall engage a qualified inspector to approve the installation of this portion of the water supply. The Building Division will require from the builder/contractor, a written document certifying that this portion of the potable water supply has been installed per improvement plans and in accordance with the Uniform Plumbing Code. This certificate of compliance shall be submitted to the Building Division before a temporary occupancy or a building final is approved.
 - c. The building inspectors will exclusively inspect all potable water supply systems for the building from the shutoff valve at the building and downstream within the building. (Building, Environmental Utilities)
- 68. All improvements being constructed in accordance with the approved grading and improvement plans shall be accepted as complete by the City. (Public Works)
- 69. The words "traffic control appurtenances" shall be included in the list of utilities allowed in public utilities easements (PUE's) located along public roadways. (Public Works)
- 70. Water, sewer and reclaimed water shall be constructed pursuant to the adopted City of Roseville Improvement Standards and the City of Roseville Construction Standards. (Environmental Utilities)
- 71. All water backflow devices shall be tested and approved by the Environmental Utilities Department. (Environmental Utilities)
- 72. **Restaurants or other Food Service Establishment (FSE).** The applicant shall design for installation and/or install an exterior grease interceptor if the proposed business could potentially discharge substances containing fats, oils and grease (FOG) into the sewer system. The grease interceptor shall be adequate to separate and remove FOG contained in the wastewater from FSE's prior to discharge to the public sewer. (Environmental Utilities)
- 73. In the event an exterior grease interceptor cannot be installed due to space limitation, the developer shall install a grease trap, per City Standards, that will mechanically separate the FOG contained in the wastewater from the FSE prior to discharge to the public sewer. (Environmental Utilities)
- 74. Pursuant to the Municipal Code, the applicant shall apply for and obtain a FOG waste discharge permit (FOG WDP) from the Environmental Utilities Industrial Waste Division prior to occupancy or prior to discharging waste to the public sewer. The applicant shall submit information required by the Environmental Utilities Department for evaluation, including but not limited to: site plans, floor plans, mechanical and plumbing plans, and details to show all sewers, FOG control device, grease interceptor or other pretreatment equipment and appurtenances by size, location and elevation. Additional information related to the applicant's business operations and potential discharge may be requested to properly evaluate the FOG WDP application. (Environmental Utilities)
- 75. All Electric Department facilities, including streetlights where applicable, shall be designed and built to the "City of Roseville Specifications for Commercial Construction." (Electric)
- 76. The City of Roseville Electric Department has electrical construction charges which are to be paid by the developer and which are explained in the City of Roseville "Specification for Commercial Construction." These charges will be determined upon completion of the final electrical design. (Electric)
- 77. Any relocation, rearrangement, or change of existing electric facilities due to this development shall be at the developer's expense. (Electric)

78. Any facilities proposed for placement within public/electric utility easements shall be subject to review and approval by the Electric Department before any work commences in these areas. This includes, but is not limited to, landscaping, lighting, paving, signs, trees, walls, and structures of any type. (Electric)
79. All electric metering shall be directly outside accessible. This can be accomplished in any of the following ways:
 - a. Locate the metered service panel on the outside of the building.
 - b. Locate the metered service panel in a service room with a door that opens directly to the outside. The developer will be required to provide a key to the door for placement in a lock box to be installed on the outside of the door. Any doors leading from the service room to other areas of the building shall be secured to prohibit unauthorized entry. (Electric)
80. One ¾-inch conduit with a 2-pair phone line shall be installed from the building's telephone service panel to the meter section of the customer's electrical switchgear or panel. (Electric)
81. It is the responsibility of the developer to ensure that all existing electric facilities remain free and clear of any obstruction during construction and when the project is complete. (Electric)

OTHER CONDITIONS OF APPROVAL:

82. Signs shown on the elevations are not approved as part of the Major Project Permit Stage 2. A Sign Permit is required for all project signs. (Planning)
83. Following the installation of the landscaping, all landscape material shall be maintained in a healthy and weed-free condition; dead plant material shall be replaced immediately. All trees shall be maintained and pruned in accordance with the accepted practices of the International Society of Arboriculture (ISA). (Planning)
84. The City reserves the right to restrict vehicle turning movements within the public right-of-way in the future if deemed necessary by the City Engineer. (Public Works)
85. The required width of fire apparatus access roads shall not be obstructed in any manner, including the parking of vehicles. Minimum required widths and vertical clearances established by the Fire Code shall be maintained at all times during construction. Closure of accesses for fire apparatus by gates, barricades and other devices shall be prohibited unless approved by the Fire Chief. (Fire)
86. Temporary aboveground storage tanks may be used at construction sites for diesel fuel only and shall not exceed 1,000 gallon capacity. Tanks shall comply with all provisions found within the Fire Code. A Fire Department Permit shall be obtained prior to tank installation. The permit shall expire after 90 days from the date of issuance, unless extended by the Fire Chief. (Fire)
87. If site survey or earth moving work results in the discovery of hazardous materials in containers or what appears to be hazardous wastes released into the ground, the contractor or person responsible for the building permit must notify the Roseville Fire Department immediately. A representative from the Fire Department will make a determination as to whether the incident is reportable or not and if site remediation is required. (Fire)
88. The location and design of the gas service shall be determined by PG&E. The design of the gas service for this project shall not begin until PG&E has received a full set of City approved improvement plans for the project. (PG&E)

89. All commercial air conditioning units 5 tons or less (<65,000 btu/ h) shall meet the current Consortium for Energy Efficiency ("CEE") Tier I specifications. The SEER/EER ratings will be specified on building plans and Title 24 compliance certificates at the time building permits are requested. The SEER and EER ratings will be verified with appropriate documentation. These requirements shall be utilized in the overall energy compliance calculations required for issuance of any building permit for any commercial building in the Plan Area. Any variances, with the exception of Tier 2 compliance, must be approved by the Electric Department's Retail Energy Services Department. (Electric)
90. The project is subject to the noise standards established in the City's Noise Ordinance. In accordance with the City's Noise Ordinance, project construction is exempt between the hours of seven a.m. and seven p.m. Monday through Friday, and between the hours of eight a.m. and eight p.m. Saturday and Sunday, provided that all construction equipment shall be fitted with factory installed muffling devices and be maintained in good working order. (Building)
91. The developer (or designated consultant) shall certify that the building foundation location has been placed according to all approved setback requirements shown on the approved site plan. The developer shall prepare a written statement confirming building placement and provide an original copy to the City Building Division Field Inspector at the time of or prior to the foundation inspection. (Building)
92. Prior to Certificate of Occupancy, the applicant may apply for a Temporary Certificate of Occupancy (TCO) of the building. If a TCO is desired, the applicant must submit a written request to the Building Division a minimum of thirty (30) days prior to the expected temporary occupancy date and shall include a schedule for occupancy and a description of the purpose for the Temporary Certificate of Occupancy. (Building)
93. Concurrent with submittal for plan check and prior to a request for final building inspection, the applicant may request City approval of an occupancy phasing plan to allow individual or multiple building occupancies. This request shall be made in writing to the Building Division and shall include 10 copies of the following:
 - a. A description of measures that will be undertaken to minimize conflict between residents/building occupants and construction traffic (e.g. fencing, etc.);
 - b. A phasing plan showing the proposed buildings, internal roads and access routes, landscaping, trash enclosure locations, and any other improvements planned for each phase; and
 - c. An estimated time frame for each phase and a specific date for the first phase. (Planning, Building)

APPEAL FORM

Name: Laborers International Union of North America, Local Union 185 **Date:** September 30, 2022

Address: 1939 Harrison St. Ste 150 **City:** Oakland **Zip Code:** 94612

Phone Numbers: (work/day) 510-836-4200 **(home/evening)**
(cell) 510-607-8234 **(email)** michael@lozeaudrury.com and hannah@lozeaudrury.com

Please describe below the action for which this appeal is being filed. (You may attach a separate letter if enough space is not provided.)

This appeal is being filed by Lozeau Drury LLP on behalf of Laborers International Union of North America, Local Union 185, to appeal the Planning Commission's September 22, 2022 decision to approve a Major Project Permit (MPP) Stage 1 Modification and MPP Stage 2 to allow construction and operation of four industrial buildings totaling approximately 310,000 square feet in size and an Addendum to the Blue Oaks Commerce Center Initial Study and Mitigated Negative Declaration (MND) for NIPA PCL 56 - Blue Oaks Commerce Center, 2200 Freedom Wy, File # PL22-010. The specific grounds for this appeal are (1) mitigation measures which are considerably different from those analyzed in the 2010 MND would substantially reduce one or more significant cumulative air quality impacts. As the 2004 West Roseville Specific Plan determined, the Project will contribute to significant cumulative air quality impacts. In the last several years, numerous mitigation measures for distribution centers and warehouses have been identified to address air quality impacts which have not been adopted for the Project. A subsequent MND must be prepared to address those more recent mitigation measures. (2) The proposed increase in size of the Project by 17%, and the resulting increase in truck and other air pollution emissions and energy usage, is a substantial change to the Project which requires major revisions of the prior MND. As a result, a subsequent MND for the Project must be prepared.

Signed: Michael R. Lozeau Date: 9/30/2022

Joseph Speaker
Assistant City Attorney
City of Roseville
311 Vernon Street
Roseville, California 95678

Re: File Number PL 22-010; Blue Oaks Commerce Center

Dear Joe:

I am writing on behalf of my client, Schnitzer Properties, project applicant (“Applicant”) for Blue Oaks Commerce Center, File Number 22-0101. Blue Oaks Commerce Center consists of the development of four industrial buildings totaling approximately 310,000 square feet (“Project”), located on two parcels totaling 23.94 acres at 2200, 2301, and 2201 Freedom Way (“Property” or “Project Site”) in the City of Roseville (“City”). On September 22, 2022, the Roseville Planning Commission adopted an addendum (“Addendum”) to a previously adopted Initial Study/Mitigated Negative Declaration (“IS/MND”) and approved a Major Project Permit Stage 1 Modification and Major Project Permit Stage 2 Modification for the Project.

Lozeau Drury, LLP, on behalf of Laborers International Union of North America, Local Union 185 (“LIUNA” or “Appellant”), filed an appeal challenging the Planning Commission’s approval of the Project (“Appeal”). LIUNA never submitted any comments on the IS/MND in 2011, nor did it submit any comments before or at the Planning Commission meeting on the Project. LIUNA first questioned the City’s adoption of the Addendum and the approval of the Project for the first time in its generic Appeal contending that there were different unspecified mitigation measures compared to those identified in the IS/MND that would reduce significant cumulative air quality impacts. LIUNA also suggested the Project’s increased size required major revisions to the IS/MND under the California Environmental Quality Act (“CEQA”) without any evidence.

The purpose of this letter is to address LIUNA’s unsubstantiated assertions, and explain that contrary to LIUNA’s assertions, substantial evidence supports the City’s reliance on the

IS/MND and Addendum. For the reasons discussed further below, we respectfully request that the City Council find that the LIUNA appeal is without merit and should be rejected, based on the finding that the Project approval and adoption of the Addendum are supported by substantial evidence and comply with CEQA.

The Appeal Does Not Provide Substantial Evidence that the Project May Result in Significant Impact(s) on the Environment

Legal Standards for Addendum and Substantial Evidence

When an IS/MND has been prepared and adopted, no further environmental analysis is required unless there are substantial changes to the project and/or the circumstances in which it is being undertaken which require major revisions to the earlier analysis, or new information becomes available at the time of the next discretionary action which was not or could not have been known at the time of the earlier analysis. (Public Resources Code (PRC) § 21166.) The CEQA Guidelines further define substantial changes to the project and/or its circumstances as changes that result in “new significant environmental effects or a substantial increase in the severity of previously identified significant effects.” (14 CCR § 15162(a).) To trigger an MND, CEQA requires that new information be of substantial importance, and show: A) one or more significant effects not previously examined in the IS/MND, B) significant effects previously examined will be substantially more severe, C) mitigation measures previously found to be infeasible would be feasible, or D) mitigation measures or alternatives considerably different from those previously studied would substantially reduce one or more significant effects on the environment, and those mitigation measures were declined by the project. (14 CCR § 15162(a)(3).) The City shall prepare an addendum to the IS/MND if none of the conditions described above have occurred. (14 CCR § 15164(b).)

To demonstrate that the City erred in preparing the Addendum and should have instead prepared a subsequent MND, the Appellant must provide substantial evidence demonstrating substantial changes to the project and/or its circumstances or new information, as defined above by 14 CCR § 15162. Substantial evidence is defined as “enough relevant information and reasonable inferences from this information that a fair argument can be made to support a conclusion, even though other conclusions might also be reached.” (14 CCR § 15384(a).) “Argument, speculation, unsubstantiated opinion” is expressly excluded from substantial evidence. (*Id.*) Substantial evidence includes “facts, reasonable assumptions predicated upon facts, and expert opinion supported by facts.” (14 CCR § 15384(b).)

LIUNA’s Appeal contends that the City should require a subsequent MND for the Project because: 1) new unspecified air quality mitigation measures for distribution centers and warehouses exist which are more robust than those identified in the IS/MND, and 2) because the

project is larger, it results in greater emissions and energy usage that would require further environmental review. LIUNA does not provide any substantial evidence to support either of these arguments, while the analysis provided in the Addendum and the entirety of the record provide substantial evidence that a subsequent MND is not required.

Air Quality Mitigation Measures

As noted above, new information of substantial importance includes mitigation measures which are considerably different from those previously analyzed which would substantially reduce significant effect(s) on the environment but are declined by the project proponents. (14 CCR § 15162(a)(3)(D).) The Appellant asserts that new air quality mitigation measures exist specific to distribution centers and warehouses, but does not identify these measures. Without providing any applicable mitigation measures that purportedly exist (let alone any technical documentation demonstrating that such measures would actually reduce the Project's potential air quality impacts beyond the Project's existing mitigation measures and regulatory compliance), LIUNA is merely speculating that other mitigation measures exist. Under CEQA, such speculation does not constitute substantial evidence.

Even if there were other measures, that alone does not trigger the requirement for subsequent environmental review. If a commenter requests that other mitigation measures be adopted, the CEQA Guidelines require the Project to “decline to adopt the [new] mitigation measure” in order to trigger the preparation of a revised and recirculated IS/MND. (14 CCR § 15162(a)(3).) Even if the Appellant could demonstrate that a new, more effective mitigation measure has been identified, which it has not done, there is no evidence in the Addendum or elsewhere in the record that the Project has declined any new mitigation measures. The Project has accepted and agreed to implement all mitigation measures identified in the IS/MND. Thus, there is no basis to require recirculation of the IS/MND.

By contrast, the Addendum, the IS/MND and the Project technical studies prepared as part of the IS/MND provide extensive analysis demonstrating 1) potential air quality impacts were previously analyzed in the IS/MND which identified mitigation measures to address those potential impacts and mitigate them to a less than significant level; and 2) those mitigation measures are still applicable and were incorporated into the Project. (Addendum, pages 13-16.) The Addendum further incorporates information from the City's 2035 General Plan Update (“GPU”) the GPU Environmental Impact Report (“EIR”) that the City certified in August 2020.¹

¹ Though the EIR found that impacts would be reduced through compliance with PCAPCD and GPU policies, implementation of the GPU would result in a significant unavoidable environmental impact by generating emissions in excess of PCAPCD significance thresholds. The City adopted a statement of overriding considerations when it adopted the GPU. (Addendum, page 13.)

The Addendum states that the Project would be consistent with the GPU, and would comply with Placer County Air Pollution Control District (PCAPCD) and GPU policies, regulations, and permitting requirements. The analysis included in the Addendum concludes that 1) the Project “remains consistent with development scenarios outlined in the MND,” 2) any changes to the Project would not result in new or substantially more severe impacts, and 3) implementation of the air quality mitigation measures identified in the IS/MND would result in less than significant impacts. (Addendum, page 14.) Accordingly, the Addendum is based on substantial evidence and found that the Project does not constitute a substantial change from that analyzed in the IS/MND. Moreover, the City concluded that the adopted IS/MND air quality mitigation measures continue to ensure that the Project would not result in a significant impact. There is no new significant air quality impact, nor is there a substantial increase in the severity of prior identified air quality impacts warranting further environmental review. For this reason, the City Council should reject the LIUNA Appeal.

The Project Does Not Result in Changes that would result in New Significant Impacts or in a Substantial Increase in the Severity of a Prior Impact Warranting Major Revisions to the IS/MND.

The Appellant’s second argument is that because the Project is larger and may result in greater emissions and energy usage, that this alone means that the Project warrants major revisions in the prior IS/MND triggering a subsequent MND. This claim misstates CEQA’s requirements. CEQA defines substantial changes to the Project warranting major revisions to a prior MND as changes causing the involvement of “new significant environmental effects or a substantial increase in the severity of previously identified significant effects.” (14 CCR § 15162(a).) In other words, just because there is a change to the Project, that change may not trigger the need for a major revision to the prior IS/MND.

The Project Addendum extensively analyzes air quality and traffic impacts in support of the conclusion that changes to the Project (even if the size of the buildings have increased) would not result in new or substantially more severe environmental impacts. The Addendum also properly addresses energy usage, noting that the IS/MND was not required to analyze energy effects of the Project because the industrial use was consistent with the existing General Plan’s land use designation, and therefore development with industrial uses, and their associated energy usage, was already anticipated as future development under the existing General Plan for that location. The Addendum further explains that the Project is consistent with subsequent General Plan Update, including citywide assessments of energy demand associated with those changes. As the Project would not result in substantial unplanned demands or in inefficient, wasteful, or unnecessary consumption of energy, energy impacts would be less than significant, and thus would not constitute a substantial change to the Project warranting a major revision to the adopted IS/MND. LIUNA did not provide any evidence to the contrary. For that reason, the City Council

Joseph Speaker
October 20, 2022
Page 5

should reject the LIUNA Appeal on the basis that there is no evidence that the IS/MND required further revision and recirculation. The City fully evaluated all significant impacts in the IS/MND and concluded that the proposed Project would not result in any new significant or substantially more severe air quality, traffic (including truck traffic) and energy impacts.

Conclusion

We appreciate the City's thorough and comprehensive analysis of the Project's environmental impacts in the Blue Oaks Commerce Center IS/MND and Addendum. As we have demonstrated, the Project and its circumstances do not constitute substantial changes, since they do not result in new significant environmental effects or a substantial increase in the severity of previously identified effects. Accordingly, the Addendum is appropriate and there is no basis for the City to require a subsequent MND. We respectfully request that the City reject the LIUNA Appeal and uphold the Planning Commission's adoption of the Addendum and Project approval.

Please let us know if you have any questions regarding our responses to LIUNA's letter.

**Re: Appeal of Addendum to the 2010 IS/MND for Blue Oaks Commerce Center (NIPA PCL 56 – Blue Oaks Commerce Center; File #PL22-0101)
Roseville City Council Hearing; December 7, 2022, Agenda Item 8.1**

Dear Mayor Bernasconi, Vice Mayor Houdesheldt, Honorable Members of the City Council, and Ms. Mar,

I am writing on behalf of Laborers International Union of North America, Local 185, and its members living or working in and around the City of Roseville (collectively, “LIUNA”), in support of LIUNA’s appeal of the Planning Commission’s September 22, 2022 decisions: (1) adopting an Addendum to the 2010 Initial Study/Mitigated Negative Declaration (“2010 MND”) prepared for the Blue Oaks Commerce Center project, (2) approving a Major Project Permit (“MPP”) Stage 1 Modification, and (3) approving a MPP Stage 2 to allow construction and operation of four industrial buildings totaling 310,000 square feet (“Project”).

LIUNA is concerned by the City of Roseville’s (“City”) improper use of an Addendum which, if approved, would violate the California Environmental Quality Act (“CEQA”). First, the City has failed to undertake its duties as a lead agency to investigate the Project’s potential impacts and support the Addendum’s findings with substantial evidence. An addendum unsupported by evidence violates CEQA. Second, CEQA prohibits the use of an addendum when the proposed changes introduce new significant environmental effects or a substantial increase in the severity of previously identified significant effects. Here, the Project’s increase of 50,000 square feet of industrial uses will have new and more significant impacts than those analyzed in

December 5, 2022

Appeal re: Blue Oaks Commerce Center and Addendum to 2010 IS/MND

City Council Hearing

Page 2 of 11

the 2010 MND. Finally, CEQA prohibits the use of an addendum if there is new information demonstrating additional mitigation measures available to reduce project's significant impacts. Here, new mitigation measures have been developed since 2010 that can mitigate the Project's potentially significant air quality impacts.

Therefore, LIUNA respectfully requests that the City Council grant its appeal, decline to approve the Project and Addendum, and send the Project back to staff to prepare an supplemental MND or an EIR.

I. PROJECT DESCRIPTION

In 2010, the City approved a MPP Stage 1 and a Tentative Subdivision Map for the development of the Blue Oaks Commerce Center office, industrial, and retail complex, which included the development of 17 buildings totaling 575,505 square feet for office, industrial, and retail uses (the "2010 Project"). The City also adopted an IS/MND for the 2010 Project. In 2014, the City approved a modification to the MPP Stage 1 site plan to eliminate the retail portion of the Project and to replace approximately 80,000 square feet of industrial uses with the approximately 122,385 square foot Federal Bureau of Investigation building.

Now, the Applicant seeks entitlements to develop four industrial buildings totaling 308,000 square feet, increasing the total square footage of industrial buildings by 50,000 square feet – a 17% increase.

II. LEGAL STANDARD

CEQA contains a strong presumption in favor of requiring a lead agency to prepare an EIR. This presumption is reflected in the "fair argument" standard, which requires the lead agency to prepare an EIR whenever substantial evidence in the whole record before the agency supports a fair argument that a project may have a significant effect on the environment. (Pub. Res. Code § 21082.2; *Laurel Heights Improvement Ass'n v. Regents of the University of California* (1993) ("Laurel Heights II") 6 Cal.4th 1112, 1123; *No Oil, Inc. v. City of Los Angeles* (1974) 13 Cal.3d 68, 75, 82; *Quail Botanical Gardens v. City of Encinitas* (1994) 29 Cal.App.4th 1597, 1602.)

Under the "fair argument" standard, an EIR is required if any substantial evidence in the record indicates that a project may have an adverse environmental effect—even if contrary evidence exists to support the agency's decision. (14 CCR § 15064(f)(1); *Pocket Protectors*, 124 Cal.App.4th at 931; *Stanislaus Audubon Society v. County of Stanislaus* (1995) 33 Cal.App.4th 144, 150-51; *Quail Botanical Gardens Found., Inc. v. City of Encinitas* (1994) 29 Cal.App.4th 1597, 1602.) The "fair argument" standard creates a "low threshold" favoring environmental review through an EIR rather than through issuance of negative declarations or notices of exemption from CEQA. (*Pocket Protectors*, 124 Cal.App.4th at 928.)

The "fair argument" standard is virtually the opposite of the typical deferential standard

December 5, 2022

Appeal re: Blue Oaks Commerce Center and Addendum to 2010 IS/MND

City Council Hearing

Page 3 of 11

accorded to agencies. As a leading CEQA treatise explains:

This ‘fair argument’ standard is very different from the standard normally followed by public agencies in their decision making. Ordinarily, public agencies weigh the evidence in the record and reach a decision based on a preponderance of the evidence. [Citation]. The fair argument standard, by contrast, prevents the lead agency from weighing competing evidence to determine who has a better argument concerning the likelihood or extent of a potential environmental impact.

(Kostka & Zishcke, *Practice Under the California Environmental Quality Act*, §6.37 (2d ed. Cal. CEB 2021).) The Courts have explained that “it is a question of law, not fact, whether a fair argument exists, and the courts owe no deference to the lead agency’s determination. Review is *de novo*, with a *preference for resolving doubts in favor of environmental review*.” (*Pocket Protectors*, 124 Cal.App.4th at 928 (emphasis in original).)

A. CEQA Addendum

The City has prepared an Addendum to a previously adopted MND. In order to be compliant with CEQA, an Addendum must comply with the CEQA Guidelines and with the courts’ prior decisions outlining the circumstances under which an Addendum may be adopted. The Addendum presented today fails to comply with either of these requirements and, if adopted, would directly violate CEQA.

1. CEQA Guidelines

Pursuant to the CEQA Guidelines, “[a]n addendum to [a previously] adopted negative declaration may be prepared if only **minor technical changes** or additions are necessary or **none of the conditions described in Section 15162 calling for the preparation of a subsequent EIR or negative declaration have occurred**.” (CEQA Guidelines § 15164(b).)

Furthermore, pursuant to CEQA Guidelines § 15162(a), an addendum is not appropriate where:

- (1) Substantial changes are proposed in the project which will require major revisions of the previous EIR or negative declaration due to **the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects**;
- (2) Substantial changes occur with respect to the circumstances under which the project is undertaken which will require major revisions of the previous EIR or Negative Declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; or
- (3) **New information of substantial importance**, which was not known and could not have been known with the exercise of reasonable diligence at the time the

previous EIR was certified as complete or the negative declaration was adopted, shows any of the following:

- (A) The project will have **one or more significant effects not discussed in the previous EIR or negative declaration;**
- (B) Significant effects previously examined will be **substantially more severe** than shown in the previous EIR;
- (C) Mitigation measures or alternatives previously found not to be feasible would, in fact, be feasible and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or
- (D) **Mitigation measures or alternatives which are considerably different from those analyzed in the previous EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.**

(emphasis added).

The significant changes presented in the Addendum cannot plausibly be described as “minor technical changes” to the 2010 IS/MND. To the contrary, the addition of 50,000 square feet of industrial uses, and the associated heavy-duty trucks that come along with the significant expansion make abundantly clear that the Project involves **new significant environmental effects** and **new information of substantial importance** that make the use of Addendum here entirely inappropriate.

2. Legal Precedent.

A CEQA addendum must adhere to the courts’ guidance informing when, and under what circumstances, its use is legally permissible. The courts have established a detailed, two-step inquiry for reviewing legal challenges to a CEQA addendum. This deliberative process is outlined in two important court decisions arising from the same case, *Friends of College of San Mateo Gardens v. San Mateo County Community College Dist.* (2016). The first decision was issued by the California Supreme Court and will be referred to here as “*San Mateo Gardens I*.”¹ A subsequent decision in the same case was issued by the Court of Appeal and will be referred to here as “*San Mateo Gardens II*.”²

The first step in this two-step analysis is for the reviewing court to determine whether **substantial evidence** supports the lead agency’s determination that the original CEQA document, in this case the 2010 IS/MND, “retains some informational value.” (*San Mateo Gardens I* at p. 952.) If the court finds that the original document “retains some informational value,” it must hold that CEQA’s subsequent review provisions apply (*San Mateo Gardens II* at 604-605.)

¹ 1 Cal.5th 937 (2016).

² 11 Cal.App.5th 596 (2017).

But this determination is “only the first step” in the court’s analysis. (*San Mateo Gardens I* at 956.) “[T]he next—and critical—step is to determine whether the agency has properly determined how to comply with its obligations under those provisions.” (*San Mateo Gardens I* at 953.) The *San Mateo Gardens II* opinion helpfully outlines the analysis required during this second stage of review:

[O]nce we have determined that the [CEQA] subsequent review provisions apply to a project approved through a negative declaration, **our application of the standard of review changes and is less deferential to the agency.** It is less deferential because a negative declaration requires a major revision—i.e., a subsequent EIR or mitigated negative declaration—whenever there is substantial evidence to support a fair argument that proposed changes ‘might have a significant environmental impact not previously considered in connection with the project as originally approved.’ (quoting *San Mateo Gardens I* at 959 [additional citations omitted].)

Proposed changes might have a significant environmental impact when there is some competent evidence to suggest such an impact, even if other evidence suggests otherwise. (See *Friends of “B” Street* (1980) 106 Cal.App.3d 988, 1002.) This means that an agency’s determination that a major revision to a negative declaration is not required will necessarily lack substantial evidence when **a fair argument exists that the project might have a previously unstudied significant environmental impact.** (*San Mateo Gardens II* at 607-608 [emph. added].)

In proposing the Addendum here, the City seeks to make revisions to the 2010 IS/MND without performing a legally sufficient environmental review or offering appropriate mitigation for the Project’s significant environmental effects. The expert evidence which LIUNA presents today constitutes substantial evidence of a fair argument that the Project will have significant environmental effects which the Addendum has not adequately addressed. Therefore, to comply with CEQA, the City should grant LIUNA’s appeal, decline to adopt the Addendum, and undertake the necessary efforts to prepare an EIR.

III. DISCUSSION

A. The City violated its duty to investigate the environmental impact of the Project’s additional 50,000 square feet of warehouse construction and operation not analyzed in the 2010 MND.

The City violated its duty to investigate the impacts of what amounts to the construction and operation of a new 50,000 square foot warehouse when compared to the 2010 Project.

“CEQA places the burden of environmental investigation on government rather than the public. If the local agency has failed to study an area of possible environmental impact, a fair argument may be based on the limited facts in the record.” (*Gentry v. City of Murrieta* (1995) 36

December 5, 2022

Appeal re: Blue Oaks Commerce Center and Addendum to 2010 IS/MND

City Council Hearing

Page 6 of 11

Cal.App.4th 1359, 1378–79 [quotations omitted].) Indeed, “[d]eficiencies in the record may actually enlarge the scope of fair argument by lending a logical plausibility to a wider range of inferences.” (*Id.*; see also *Christward Ministry v. Superior Court* (1986) 184 Cal.App.3d 180, 197 [holding that city’s failure to undertake adequate environmental analysis further supported fair argument that project would have significant impacts].)

The Addendum contains only conclusions – no facts or analysis – to support its findings that the Project will not significantly increase the severity of the air quality, human health, GHG, or energy impacts associated with the 2010 Project and analyzed in the 2010 MND. For example, the conclusion that “[c]onstruction and operation of the project will increase emissions on the site, but not substantially” (Addendum, p. 14) is unsupported by any evidence and provides the public no meaningful understanding of the impact the Project will have on the environment and human health.

It is patently obvious that the City has not met its burden to investigate the Project’s environmental impacts. Moreover, the complete lack of evidence supporting any of the Addendum’s conclusions leaves the City without evidence to rely on if the Addendum were challenged in court.

The City must abide by its duty to investigate the potentially significant impacts the Project will have on the environment that have not been previously studied.

B. The Project will have substantially greater air quality, energy, GHG, and human health impacts than those analyzed in the 2010 MND.

The Project proposes to increase the size of industrial land uses by 50,000 square feet – an increase of 17% above the project analyzed in the 2010 IS/MND. A 50,000 square foot warehouse will have significant environmental impacts as a result of construction and the resulting increase in truck and other air pollution emissions, as well as energy use.

The Addendum admits that the Project’s construction-related emissions will increase by 17%. (Addendum, p. 14.) Based on the City’s failure to study this or any of the other environmental impacts associated with construction and operation of an additional 50,000 square feet of warehouse space, it can be assumed that all other impacts will similarly increase by 17%. An increase in air quality emissions, GHG emissions, diesel truck emissions, and energy use are each a “substantial increase in the severity of previously identified significant effects” and preclude reliance on an addendum. CEQA Guidelines § 15162(a)(1).

C. New mitigation measures are available to substantially reduce the Project’s cumulative air quality impacts which were not available in 2010.

The West Roseville Specific Plan EIR determined that the Project will contribute to significant cumulative air quality impacts. The dramatic increase in warehouse and distribution

December 5, 2022

Appeal re: Blue Oaks Commerce Center and Addendum to 2010 IS/MND

City Council Hearing

Page 7 of 11

centers and the associated heavy duty truck trips generated by those facilities has caused a plethora of air quality impacts and has impacted the health of those living near such facilities. Since the 2010 IS/MND was adopted, numerous mitigation measures for distribution centers and warehouses have been identified to address air quality impacts stemming from these land uses, but have not been adopted for the Project.

The California Attorney General recently identified available mitigation measures to address air pollution from warehouses, including:

- Requiring off-road construction equipment to be zero-emission, where available, and all diesel-fueled off-road construction equipment, to be equipped with CARB Tier IV-compliant engines or better, and including this requirement in applicable bid documents, purchase orders, and contracts, with successful contractors demonstrating the ability to supply the compliant construction equipment for use prior to any ground-disturbing and construction activities.
- Prohibiting off-road diesel-powered equipment from being in the “on” position for more than 10 hours per day.
- Requiring on-road heavy-duty haul trucks to be model year 2010 or newer if diesel-fueled.
- Providing electrical hook ups to the power grid, rather than use of diesel-fueled generators, for electric construction tools, such as saws, drills and compressors, and using electric tools whenever feasible.
- Limiting the amount of daily grading disturbance area.
- Prohibiting grading on days with an Air Quality Index forecast of greater than 100 for particulates or ozone for the project area.
- Forbidding idling of heavy equipment for more than two minutes.
- Keeping onsite and furnishing to the lead agency or other regulators upon request, all equipment maintenance records and data sheets, including design specifications and emission control tier classifications.
- Conducting an on-site inspection to verify compliance with construction mitigation and to identify other opportunities to further reduce construction impacts.
- Using paints, architectural coatings, and industrial maintenance coatings that have volatile organic compound levels of less than 10 g/L.
- Providing information on transit and ridesharing programs and services to construction employees.
- Providing meal options onsite or shuttles between the facility and nearby meal destinations for construction employees.
- Requiring that all facility-owned and operated fleet equipment with a gross vehicle weight rating greater than 14,000 pounds accessing the site meet or exceed 2010 model-year emissions equivalent engine standards as currently defined in California Code of Regulations Title 13, Division 3, Chapter 1, Article 4.5, Section 2025. Facility operators shall maintain records on-site demonstrating compliance with this requirement and shall make records available for inspection by the local jurisdiction, air district, and state upon request.

December 5, 2022

Appeal re: Blue Oaks Commerce Center and Addendum to 2010 IS/MND

City Council Hearing

Page 8 of 11

- Requiring all heavy-duty vehicles entering or operated on the project site to be zero-emission beginning in 2030.
- Requiring on-site equipment, such as forklifts and yard trucks, to be electric with the necessary electrical charging stations provided.
- Requiring use of zero-emission light- and medium-duty vehicles as part of business operations.
- Forbidding trucks from idling for more than two minutes and requiring operators to turn off engines when not in use.
- Posting both interior- and exterior-facing signs, including signs directed at all dock and delivery areas, identifying idling restrictions and contact information to report violations to CARB, the air district, and the building manager.
- Constructing electric truck charging stations proportional to the number of dock doors at the project.
- Constructing electric light-duty vehicle charging stations proportional to the number of parking spaces at the project.
- Installing solar photovoltaic systems on the project site of a specified electrical generation capacity, such as equal to the building's projected energy needs.
- Requiring all stand-by emergency generators to be powered by a non-diesel fuel.
- Requiring facility operators to train managers and employees on efficient scheduling and load management to eliminate unnecessary queuing and idling of trucks.
- Requiring operators to establish and promote a rideshare program that discourages single-occupancy vehicle trips and provides financial incentives for alternate modes of transportation, including carpooling, public transit, and biking.
- Meeting CalGreen Tier 2 green building standards, including all provisions related to designated parking for clean air vehicles, electric vehicle charging, and bicycle parking.
- Achieving certification of compliance with LEED green building standards.
- Providing meal options onsite or shuttles between the facility and nearby meal destinations.
- Requiring that every facility operator and tenant train its staff in charge of keeping vehicle records in diesel technologies and compliance with CARB regulations, by attending CARB-approved courses. Also require facility operators to maintain records on-site demonstrating compliance and make records available for inspection by the local jurisdiction, air district, and state upon request.
- Requiring facility operators and tenants to enroll in the United States Environmental Protection Agency's SmartWay program, and requiring tenants to use carriers that are SmartWay carriers.

California Department of Justice, "Warehouse Projects: Best Practices and Mitigation Measures to Comply with the California Environmental Quality Act" (attached as Exhibit A).

To address the Project's cumulative air quality impacts, pursuant to CEQA Guidelines § 15162, the City must determine that the sparse mitigation measures adopted in the 2010 MND

December 5, 2022

Appeal re: Blue Oaks Commerce Center and Addendum to 2010 IS/MND

City Council Hearing

Page 9 of 11

now trigger the need to supplement the prior MND to include some or all of the now available mitigation measures for industrial and warehouse projects within the City. Each of the above recommended measures constitute “New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous EIR was certified....” CEQA Guidelines § 15162(a)(3).

Use of an Addendum is not appropriate where, as here, “[m]itigation measures or alternatives which are considerably different from those analyzed in the previous EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.” Instead, a subsequent MND must be prepared to address each of these mitigation measures now available to reduce the Project’s cumulative air quality impact.

D. The Project will have significant impacts on biological resources than were not analyzed in the 2010 MND or the Addendum, and substantially greater impacts resulting from the Project’s increase of 50,000 square feet of industrial uses.

Shawn Smallwood, Ph.D. reviewed the Addendum for the Project and the 2010 MND to assess the Project’s potential biological impacts. Dr. Smallwood’s comment letter and CV are attached as Exhibit B and his comments are briefly summarized here.

The Addendum contains no analysis of the adverse impact that the increased traffic on the roadways servicing the Project will have on wildlife. Vehicle collisions with special-status species is not a minor issue, but rather results in the death of millions of species each year. Dr. Smallwood explains: “. . . the US estimate of avian mortality on roads is 2,200 to 8,405 deaths per 100 km per year, or 89 million to 340 million total per year (Loss et al. 2014).” (Ex. B, p. 6.)

Dr. Smallwood reviewed occurrence databases for the site and prepared a table of occurrence likelihoods for special-status bird species at or near the Project site. (*Id.* at 1-2, see Table 1.) Dr. Smallwood’s table shows that there are 97 special-status species with the potential to occur at or near the project site. He concluded that each of these special-status species would be vulnerable to collision mortality as a result of project-generated traffic on roads servicing the Project. (*Id.* at 6.) Neither the 2010 MND nor the Addendum analyze this potentially significant impact on special-status species.

While the Addendum does not include an estimate of the increased vehicle miles traveled (“VMT”) that will result from the proposed Project, Dr. Smallwood estimated the Project’s potential VMT based on the mean annual VMT per square foot of floor space from 26 similar warehouse projects, which was 24.2195 annual VMT per square foot of floor space. Applying this mean to the Project’s proposed 310,000 square feet, Dr. Smallwood estimated an annual VMT of 7,570,045 for the Project as a whole. (Ex. B, p. 8.) Dr. Smallwood estimated the additional 50,000 square feet of new industrial space not included in the 2010 MND or Project would generate 1,220,975 annual VMT. (*Id.* at 9.)

Using the Project's VMT estimates, scientific studies on road mortality, and his years of experience studying the subject, Dr. Smallwood was able to predict the Project-generated traffic impacts to wildlife. (Ex. B at 8-9.) Dr. Smallwood calculates that the Project would cause an accumulated 4,148 vertebrate wildlife fatalities per year. (*Id.* at 9.) The new 50,000 square feet of industrial space not included in the project in 2010 would result in 669 vertebrate wildlife fatalities per year. (*Id.*) Dr. Smallwood concluded that this is a significant and unmitigated impact on special-status species. This is a significant impact not addressed in the 2010 MND and a significant increase in an impact as a result of the increase industrial uses proposed by the Project.

An initial study must be prepared for the Project which determines whether a supplemental MND or an EIR is necessary to analyze and mitigate the Project's impacts on special-status species from the increased traffic generated by the Project.

E. New information of substantial importance is available regarding the Project's potential biological resources impacts.

Since the 2010 IS/MND was adopted, the designations of special-status species have changed. According to Dr. Smallwood, many species that were not considered special-status in 2010 may now have that designation due to changed circumstances. (Ex. B, p. 1.) The 2010 IS/MND attached to the Addendum does not list out the potentially-occurring special-status species onsite. Nonetheless, Dr. Smallwood states that if it had, it would necessarily need to be updated with a new list. (*Id.*)

Dr. Smallwood reviewed occurrence databases for the site and prepared a table of occurrence likelihoods for special-status bird species at or near the Project site. (*Id.* at 1-2, see Table 1.) Dr. Smallwood's table shows that there are 97 special-status species with the potential to occur at or near the project site. Many of these were either not designated as special status species in 2010 or were not likely to be present at the Project site in 2010. A supplemental MND or EIR is needed to determine what changes have occurred since 2010.

Additionally, Dr. Smallwood reviewed the mitigation measures proposed in the 2010 MND, which included a requirement to perform pre-construction surveys for nesting birds and raptors at least 30 days in advance of construction. The Addendum states that the site has been graded in preparation for development of the Project. (Addendum, p. 4.) Dr. Smallwood notes that it is unclear whether the required preconstruction surveys were conducted prior to the grading of the site, and if they were, such surveys should be shared with the public. (Ex. B, p. 9.) However, regardless of whether the surveys were already conducted, Dr. Smallwood states that enough time has passed since the grading of the site to warrant preconstruction surveys prior to any next step in construction. (*Id.*) He notes that "a graded site could attract various bird species that breed on open ground, such as killdeer and California horned lark." (*Id.*) This is additional new information of substantial importance which was not known at the time the 2010 MND was certified, and it demonstrates potentially significant biological impacts which were not previously analyzed. The use of an Addendum is therefore not appropriate for this Project.

Appeal re: Blue Oaks Commerce Center and Addendum to 2010 IS/MND

City Council Hearing

Page 11 of 11

F. CONCLUSION

As demonstrated in the comments above, a subsequent environmental document is required under CEQA Guidelines § 15162(a) based on the substantial increase in the severity of previously identified air quality and biological resources impacts (§ 15162(a)(1)), the new mitigation measures available which would reduce the Project's air quality impacts (§ 15162(a)(3)(D)), and the existence of new information of substantial importance which was not previously known and which shows potentially significant impacts (§ 15162(a)(3)(A)). As a result, the City must prepare an initial study to determine whether an MND or an EIR is appropriate for review of the proposed Project. LIUNA therefore respectfully requests that the City Council refrain from approving the Addendum and return the Project to City staff for further consideration of the Project's environmental impacts, including the necessary preparation and public disclosure of an initial study.

Sincerely,

A handwritten signature in blue ink, appearing to read 'R. Davis', with a long horizontal flourish extending to the right.

Rebecca L. Davis
LOZEAU | DRURY LLP

EXHIBIT A

Warehouse Projects: Best Practices and Mitigation Measures to Comply with the California Environmental Quality Act

In carrying out its duty to enforce laws across California, the California Attorney General's Bureau of Environmental Justice (Bureau)¹ regularly reviews proposed warehouse projects for compliance with the California Environmental Quality Act (CEQA) and other laws. When necessary, the Bureau submits comment letters to lead agencies, and in rare cases the Bureau has filed litigation to enforce CEQA.² This document builds upon the Bureau's comment letters, collecting knowledge gained from the Bureau's review of hundreds of warehouse projects across the state. It is meant to help lead agencies pursue CEQA compliance and promote environmentally-just development as they confront warehouse project proposals.³ While CEQA analysis is necessarily project-specific, this document provides information on feasible best practices and mitigation measures, the overwhelming majority of which have been adapted from actual warehouse projects in California.

I. Background

In recent years, the proliferation of e-commerce and rising consumer expectations of rapid shipping have contributed to a boom in warehouse development.⁴ California, with its ports, population centers, and transportation network, has found itself at the center of this trend. For example, in 2014, 40 percent of national container cargo flowed through Southern California, which was home to nearly 1.2 billion square feet of warehouse facilities.⁵ In the Inland Empire alone, 150 million square feet of new industrial space was built over the last decade,⁶ and 21 of the largest 100 logistics leases signed in 2019 nationwide were in the Inland

¹ <https://oag.ca.gov/environment/justice>.

² <https://oag.ca.gov/environment/ceqa/letters>; *South Central Neighbors United et al. v. City of Fresno et al.* (Super. Ct. Fresno County, No. 18CECG00690).

³ Anyone reviewing this document to determine CEQA compliance responsibilities should consult their own attorney for legal advice.

⁴ As used in this document, "warehouse" or "logistics facility" is defined as a facility consisting of one or more buildings that stores cargo, goods, or products on a short or long term basis for later distribution to businesses and/or retail customers.

⁵ Industrial Warehousing in the SCAG Region, Task 2. Inventory of Warehousing Facilities (April 2018), http://www.scag.ca.gov/Documents/Task2_FacilityInventory.pdf at 1-1, 2-11.

⁶ Los Angeles Times, *When your house is surrounded by massive warehouses*, October 27, 2019, <https://www.latimes.com/california/story/2019-10-27/fontana-california-warehouses-inland-empire-pollution>.

Empire, comprising 17.5 million square feet.⁷ This trend has not slowed, even with the economic downturn caused by COVID-19, as e-commerce has continued to grow.⁸ Forecasts predict that the Central Valley is where a new wave of warehouse development will go.⁹

When done properly, these activities can contribute to the economy and consumer welfare. However, imprudent warehouse development can harm local communities and the environment. Among other pollutants, diesel trucks visiting warehouses emit nitrogen oxide (NO_x)—a primary precursor to smog formation and a significant factor in the development of respiratory problems like asthma, bronchitis, and lung irritation—and diesel particulate matter (a subset of fine particulate matter that is smaller than 2.5 micrometers)—a contributor to cancer, heart disease, respiratory illnesses, and premature death.¹⁰ Trucks and on-site loading activities can also be loud, bringing disruptive noise levels during 24/7 operation that can cause hearing damage after prolonged exposure.¹¹ The hundreds, and sometimes thousands, of daily truck and passenger car trips that warehouses generate contribute to traffic jams, deterioration of road surfaces, and traffic accidents. These environmental impacts also tend to be concentrated in neighborhoods already suffering from disproportionate health impacts.

II. Proactive Planning: General Plans, Local Ordinances, and Good Neighbor Policies

To systematically address warehouse development, we encourage governing bodies to proactively plan for logistics projects in their jurisdictions. Proactive planning allows jurisdictions to prevent land use conflicts before they materialize and guide sustainable development. Benefits also include providing a predictable business environment, protecting residents from environmental harm, and setting consistent expectations jurisdiction-wide.

Proactive planning can take any number of forms. Land use designation and zoning decisions should channel development into appropriate areas. For example, establishing industrial districts near major highway and rail corridors but away from sensitive receptors can help avoid conflicts between warehouse facilities and residential communities.

In addition, general plan policies, local ordinances, and good neighbor policies should set minimum standards for logistics projects. General plan policies can be incorporated into existing economic development, land use, circulation, or other related elements. Many jurisdictions alternatively choose to consolidate policies in a separate environmental justice element. Adopting general plan policies to guide warehouse development may also help jurisdictions comply with their obligations under SB 1000, which requires local government general plans to identify objectives and policies to reduce health risks in disadvantaged communities, promote civil engagement in the public decision making process, and prioritize improvements and programs that address the needs of disadvantaged communities.¹²

The Bureau is aware of four good neighbor policies in California: Riverside County, the City of Riverside, the City of Moreno Valley, and the Western Riverside Council of Governments.¹³ These policies provide minimum standards that all warehouses in the jurisdiction must meet. For example, the Western Riverside Council of Governments policy sets a minimum buffer zone of 300 meters between warehouses and sensitive receptors, and it requires a number of design features to reduce truck impacts on nearby sensitive receptors. The Riverside County policy requires vehicles entering sites during both construction and operation to meet certain California Air Resources Board (CARB) guidelines, and it requires community benefits agreements and supplemental funding contributions toward additional pollution offsets.

The Bureau encourages jurisdictions to adopt their own local ordinances and/or good neighbor policies that combine the most robust policies from those models with measures discussed in the remainder of this document.

¹² For more information about SB 1000, see <https://oag.ca.gov/environment/sb1000>.

III. Community Engagement

Early and consistent community engagement is central to establishing good relationships between communities, lead agencies, and warehouse developers and tenants. Robust community engagement can give lead agencies access to community residents' on-the-ground knowledge and information about their concerns, build community support for projects, and develop creative solutions to ensure new logistics facilities are mutually beneficial. Examples of best practices for community engagement include:

- Holding a series of community meetings at times and locations convenient to members of the affected community and incorporating suggestions into the project design.
- Posting information in hard copy in public gathering spaces and on a website about the project. The information should include a complete, accurate project description, maps and drawings of the project design, and information about how the public can provide input and be involved in the project approval process. The information should be in a format that is easy to navigate and understand for members of the affected community.
- Providing notice by mail to residents and schools within a certain radius of the project and along transportation corridors to be used by vehicles visiting the project, and by posting a prominent sign on the project site. The notice should include a brief project description and directions for accessing complete information about the project and for providing input on the project.
- Providing translation or interpretation in residents' native language, where appropriate.
- For public meetings broadcast online or otherwise held remotely, providing for access and public comment by telephone and supplying instructions for access and public comment with ample lead time prior to the meeting.
- Partnering with local community-based organizations to solicit feedback, leverage local networks, co-host meetings, and build support.
- Considering adoption of a community benefits agreement, negotiated with input from affected residents and businesses, by which the developer provides benefits to the community.
- Creating a community advisory board made up of local residents to review and provide feedback on project proposals in early planning stages.
- Identifying a person to act as a community liaison concerning on-site construction activity and operations, and providing contact information for the community relations officer to the surrounding community.

IV. Warehouse Siting and Design Considerations

The most important consideration when planning a logistics facility is its location. Warehouses located in residential neighborhoods or near other sensitive receptors expose community residents and those using or visiting sensitive receptor sites to the air pollution, noise, traffic, and other environmental impacts they generate. Therefore, placing facilities away from sensitive receptors significantly reduces their environmental and quality of life harms on local

communities. The suggested best practices for siting and design of warehouse facilities does not relieve lead agencies' responsibility under CEQA to conduct a project-specific analysis of the project's impacts and evaluation of feasible mitigation measures and alternatives; lead agencies' incorporation of the best practices must be part of the impact, mitigation and alternatives analyses to meet the requirements of CEQA. Examples of best practices when siting and designing warehouse facilities include:

- Per CARB guidance, siting warehouse facilities so that their property lines are at least 1,000 feet from the property lines of the nearest sensitive receptors.¹⁴
- Creating physical, structural, and/or vegetative buffers that adequately prevent or substantially reduce pollutant dispersal between warehouses and any areas where sensitive receptors are likely to be present, such as homes, schools, daycare centers, hospitals, community centers, and parks.
- Providing adequate areas for on-site parking, on-site queuing, and truck check-in that prevent trucks and other vehicles from parking or idling on public streets.
- Placing facility entry and exit points from the public street away from sensitive receptors, e.g., placing these points on the north side of the facility if sensitive receptors are adjacent to the south side of the facility.
- Locating warehouse dock doors and other onsite areas with significant truck traffic and noise away from sensitive receptors, e.g., placing these dock doors on the north side of the facility if sensitive receptors are adjacent to the south side of the facility.
- Screening dock doors and onsite areas with significant truck traffic with physical, structural, and/or vegetative barriers that adequately prevent or substantially reduce pollutant dispersal from the facility towards sensitive receptors.
- Posting signs clearly showing the designated entry and exit points from the public street for trucks and service vehicles.
- Posting signs indicating that all parking and maintenance of trucks must be conducted within designated on-site areas and not within the surrounding community or public streets.

V. Air Quality and Greenhouse Gas Emissions Analysis and Mitigation

Emissions of air pollutants and greenhouse gases are often among the most substantial environmental impacts from new warehouse facilities. CEQA compliance demands a proper accounting of the full air quality and greenhouse gas impacts of logistics facilities and adoption of all feasible mitigation of significant impacts. Although efforts by CARB and other authorities to regulate the heavy-duty truck and off-road diesel fleets have made excellent progress in reducing the air quality impacts of logistics facilities, the opportunity remains for local jurisdictions to further mitigate these impacts at the project level. Lead agencies and developers

¹⁴ California Air Resources Board (CARB), Air Quality and Land Use Handbook: A Community Health Perspective (April 2005), at ES-1. CARB staff has released draft updates to this siting and design guidance which suggests a greater distance may be warranted under varying scenarios; this document may be found on CARB's website and is entitled: "California Sustainable Freight Initiative: Concept Paper for the Freight Handbook" (December 2019).

should also consider designing projects with their long-term viability in mind. Constructing the necessary infrastructure to prepare for the zero-emission future of goods movement not only reduces a facility's emissions and local impact now, but it can also save money as regulations tighten and demand for zero-emission infrastructure grows. In planning new logistics facilities, the Bureau strongly encourages developers to consider the local, statewide, and global impacts of their projects' emissions.

Examples of best practices when studying air quality and greenhouse gas impacts include:

- Fully analyzing all reasonably foreseeable project impacts, including cumulative impacts. In general, new warehouse developments are not ministerial under CEQA because they involve public officials' personal judgment as to the wisdom or manner of carrying out the project, even when warehouses are permitted by a site's applicable zoning and/or general plan land use designation. CEQA Guidelines § 15369.
- When analyzing cumulative impacts, thoroughly considering the project's incremental impact in combination with past, present, and reasonably foreseeable future projects, even if the project's individual impacts alone do not exceed the applicable significance thresholds.
- Preparing a quantitative air quality study in accordance with local air district guidelines.
- Preparing a quantitative health risk assessment in accordance with California Office of Environmental Health Hazard Assessment and local air district guidelines.
- Refraining from labeling compliance with CARB or air district regulations as a mitigation measure—compliance with applicable regulations is a baseline expectation.
- Fully analyzing impacts from truck trips. CEQA requires full public disclosure of a project's anticipated truck trips, which entails calculating truck trip length based on likely truck trip destinations, rather than the distance from the facility to the edge of the air basin. Emissions beyond the air basin are not speculative, and, because air pollution is not static, may contribute to air basin pollution. Moreover, any contributions to air pollution outside the local air basin should be quantified and their significance should be considered.
- Accounting for all reasonably foreseeable greenhouse gas emissions from the project, without discounting projected emissions based on participation in California's Cap-and-Trade Program.

Examples of measures to mitigate air quality and greenhouse gas impacts from construction are below. To ensure mitigation measures are enforceable and effective, they should be imposed as permit conditions on the project where applicable.

- Requiring off-road construction equipment to be zero-emission, where available, and all diesel-fueled off-road construction equipment, to be equipped with CARB Tier IV-compliant engines or better, and including this requirement in applicable

bid documents, purchase orders, and contracts, with successful contractors demonstrating the ability to supply the compliant construction equipment for use prior to any ground-disturbing and construction activities.

- Prohibiting off-road diesel-powered equipment from being in the “on” position for more than 10 hours per day.
- Requiring on-road heavy-duty haul trucks to be model year 2010 or newer if diesel-fueled.
- Providing electrical hook ups to the power grid, rather than use of diesel-fueled generators, for electric construction tools, such as saws, drills and compressors, and using electric tools whenever feasible.
- Limiting the amount of daily grading disturbance area.
- Prohibiting grading on days with an Air Quality Index forecast of greater than 100 for particulates or ozone for the project area.
- Forbidding idling of heavy equipment for more than two minutes.
- Keeping onsite and furnishing to the lead agency or other regulators upon request, all equipment maintenance records and data sheets, including design specifications and emission control tier classifications.
- Conducting an on-site inspection to verify compliance with construction mitigation and to identify other opportunities to further reduce construction impacts.
- Using paints, architectural coatings, and industrial maintenance coatings that have volatile organic compound levels of less than 10 g/L.
- Providing information on transit and ridesharing programs and services to construction employees.
- Providing meal options onsite or shuttles between the facility and nearby meal destinations for construction employees.

Examples of measures to mitigate air quality and greenhouse gas impacts from operation include:

- Requiring that all facility-owned and operated fleet equipment with a gross vehicle weight rating greater than 14,000 pounds accessing the site meet or exceed 2010 model-year emissions equivalent engine standards as currently defined in California Code of Regulations Title 13, Division 3, Chapter 1, Article 4.5, Section 2025. Facility operators shall maintain records on-site demonstrating compliance with this requirement and shall make records available for inspection by the local jurisdiction, air district, and state upon request.
- Requiring all heavy-duty vehicles entering or operated on the project site to be zero-emission beginning in 2030.
- Requiring on-site equipment, such as forklifts and yard trucks, to be electric with the necessary electrical charging stations provided.
- Requiring tenants to use zero-emission light- and medium-duty vehicles as part of business operations.
- Forbidding trucks from idling for more than two minutes and requiring operators to turn off engines when not in use.
- Posting both interior- and exterior-facing signs, including signs directed at all

dock and delivery areas, identifying idling restrictions and contact information to report violations to CARB, the air district, and the building manager.

- Installing and maintaining, at the manufacturer's recommended maintenance intervals, air filtration systems at sensitive receptors within a certain radius of facility for the life of the project.
- Installing and maintaining, at the manufacturer's recommended maintenance intervals, an air monitoring station proximate to sensitive receptors and the facility for the life of the project, and making the resulting data publicly available in real time. While air monitoring does not mitigate the air quality or greenhouse gas impacts of a facility, it nonetheless benefits the affected community by providing information that can be used to improve air quality or avoid exposure to unhealthy air.
- Constructing electric truck charging stations proportional to the number of dock doors at the project.
- Constructing electric plugs for electric transport refrigeration units at every dock door, if the warehouse use could include refrigeration.
- Constructing electric light-duty vehicle charging stations proportional to the number of parking spaces at the project.
- Installing solar photovoltaic systems on the project site of a specified electrical generation capacity, such as equal to the building's projected energy needs.
- Requiring all stand-by emergency generators to be powered by a non-diesel fuel.
- Requiring facility operators to train managers and employees on efficient scheduling and load management to eliminate unnecessary queuing and idling of trucks.
- Requiring operators to establish and promote a rideshare program that discourages single-occupancy vehicle trips and provides financial incentives for alternate modes of transportation, including carpooling, public transit, and biking.
- Meeting CalGreen Tier 2 green building standards, including all provisions related to designated parking for clean air vehicles, electric vehicle charging, and bicycle parking.
- Achieving certification of compliance with LEED green building standards.
- Providing meal options onsite or shuttles between the facility and nearby meal destinations.
- Posting signs at every truck exit driveway providing directional information to the truck route.
- Improving and maintaining vegetation and tree canopy for residents in and around the project area.
- Requiring that every tenant train its staff in charge of keeping vehicle records in diesel technologies and compliance with CARB regulations, by attending CARB-approved courses. Also require facility operators to maintain records on-site demonstrating compliance and make records available for inspection by the local jurisdiction, air district, and state upon request.
- Requiring tenants to enroll in the United States Environmental Protection Agency's SmartWay program, and requiring tenants to use carriers that are SmartWay carriers.

- Providing tenants with information on incentive programs, such as the Carl Moyer Program and Voucher Incentive Program, to upgrade their fleets.

VI. Noise Impacts Analysis and Mitigation

The noise associated with logistics facilities can be among their most intrusive impacts to nearby sensitive receptors. Various sources, such as unloading activity, diesel truck movement, and rooftop air conditioning units, can contribute substantial noise pollution. These impacts are exacerbated by logistics facilities' typical 24-hour, seven-days-per-week operation. Construction noise is often even greater than operational noise, so if a project site is near sensitive receptors, developers and lead agencies should adopt measures to reduce the noise generated by both construction and operation activities.

Examples of best practices when studying noise impacts include:

- Preparing a noise impact analysis that considers all reasonably foreseeable project noise impacts, including to nearby sensitive receptors. All reasonably foreseeable project noise impacts encompasses noise from both construction and operations, including stationary, on-site, and off-site noise sources.
- Adopting a lower significance threshold for incremental noise increases when baseline noise already exceeds total noise significance thresholds, to account for the cumulative impact of additional noise and the fact that, as noise moves up the decibel scale, each decibel increase is a progressively greater increase in sound pressure than the last. For example, 70 dBA is ten times more sound pressure than 60 dBA.

Examples of measures to mitigate noise impacts include:

- Constructing physical, structural, or vegetative noise barriers on and/or off the project site.
- Locating or parking all stationary construction equipment as far from sensitive receptors as possible, and directing emitted noise away from sensitive receptors.
- Verifying that construction equipment has properly operating and maintained mufflers.
- Requiring all combustion-powered construction equipment to be surrounded by a noise protection barrier
- Limiting operation hours to daytime hours on weekdays.
- Paving roads where truck traffic is anticipated with low noise asphalt.
- Orienting any public address systems onsite away from sensitive receptors and setting system volume at a level not readily audible past the property line.

VII. Traffic Impacts Analysis and Mitigation

Warehouse facilities inevitably bring truck and passenger car traffic. Truck traffic can present substantial safety issues. Collisions with heavy-duty trucks are especially dangerous for passenger cars, motorcycles, bicycles, and pedestrians. These concerns can be even greater if

truck traffic passes through residential areas, school zones, or other places where pedestrians are common and extra caution is warranted.

Examples of measures to mitigate traffic impacts include:

- Designing, clearly marking, and enforcing truck routes that keep trucks out of residential neighborhoods and away from other sensitive receptors.
- Installing signs in residential areas noting that truck and employee parking is prohibited.
- Constructing new or improved transit stops, sidewalks, bicycle lanes, and crosswalks, with special attention to ensuring safe routes to schools.
- Consulting with the local public transit agency and securing increased public transit service to the project area.
- Designating areas for employee pickup and drop-off.
- Implementing traffic control and safety measures, such as speed bumps, speed limits, or new traffic signs or signals.
- Placing facility entry and exit points on major streets that do not have adjacent sensitive receptors.
- Restricting the turns trucks can make entering and exiting the facility to route trucks away from sensitive receptors.
- Constructing roadway improvements to improve traffic flow.
- Preparing a construction traffic control plan prior to grading, detailing the locations of equipment staging areas, material stockpiles, proposed road closures, and hours of construction operations, and designing the plan to minimize impacts to roads frequented by passenger cars, pedestrians, bicyclists, and other non-truck traffic.

VIII. Other Significant Environmental Impacts Analysis and Mitigation

Warehouse projects may result in significant environmental impacts to other resources, such as to aesthetics, cultural resources, energy, geology, or hazardous materials. All significant adverse environmental impacts must be evaluated, disclosed and mitigated to the extent feasible under CEQA. Examples of best practices and mitigation measures to reduce environmental impacts that do not fall under any of the above categories include:

- Appointing a compliance officer who is responsible for implementing all mitigation measures, and providing contact information for the compliance officer to the lead agency, to be updated annually.
- Creating a fund to mitigate impacts on affected residents, schools, places of worship, and other community institutions by retrofitting their property. For example, retaining a contractor to retrofit/install HVAC and/or air filtration systems, doors, dual-paned windows, and sound- and vibration-deadening insulation and curtains.
- Sweeping surrounding streets on a daily basis during construction to remove any construction-related debris and dirt.
- Directing all lighting at the facility into the interior of the site.

- Using full cut-off light shields and/or anti-glare lighting.
- Using cool pavement to reduce heat island effects.
- Installing climate control in the warehouse facility to promote worker well-being.
- Installing air filtration in the warehouse facility to promote worker well-being.

IX. Conclusion

California's world-class economy, ports, and transportation network position it at the center of the e-commerce and logistics industry boom. At the same time, California is a global leader in environmental protection and environmentally just development. The guidance in this document furthers these dual strengths, ensuring that all can access the benefits of economic development. The Bureau will continue to monitor proposed projects for compliance with CEQA and other laws. Lead agencies, developers, community advocates, and other interested parties should feel free to reach out to us as they consider how to guide warehouse development in their area.

Please do not hesitate to contact the Environmental Justice Bureau at ej@doj.ca.gov if you have any questions.

RE: Blue Oaks Commerce Center

Dear Ms. Mar,

I write to comment on the Addendum to the 2010 Blue Oaks Commerce Center Mitigated Negative Declaration (MND) prepared for the proposed Blue Oaks Commerce Center, which I understand would add four industrial buildings totaling 310,000 square feet of floor space onto 23.94 acres.

My qualifications for preparing expert comments are the following. I hold a Ph.D. degree in Ecology from University of California at Davis, where I also worked as a post-graduate researcher in the Department of Agronomy and Range Sciences. My research has been on animal density and distribution, habitat selection, wildlife interactions with the anthrosphere, and conservation of rare and endangered species. I authored many papers on these and other topics. I served as Chair of the Conservation Affairs Committee for The Wildlife Society – Western Section. I am a member of The Wildlife Society and Raptor Research Foundation, and I've lectured part-time at California State University, Sacramento. I was Associate Editor of wildlife biology's premier scientific journal, The Journal of Wildlife Management, as well as of Biological Conservation, and I was on the Editorial Board of Environmental Management. I have performed wildlife surveys in California for thirty-seven years. My CV is attached.

BIOLOGICAL IMPACTS ASSESSMENT

Circumstances regarding wildlife have changed over the 12 years since the 2010 MND. The overall decline in bird abundance across North America (Rosenberg et al. 2019) has also included declines in special-status species. These declines prompted recent changes in statutes and more designations of special-status to biological species. As examples, neither California gull nor northern harrier were US Fish and Wildlife Bird Species of Conservation Concern in 2010, but they became so since then (Table 1). I did not find a list of potentially-occurring special-status species in the 2010 MND, but if one had been constructed, it is obsolete and should be replaced by Table 1.

My review of occurrence databases reveals 97 special-status species with potential to occur at or near the project site, including 32 (33%) between 1.5 miles of the site and 24 (25%) within 1.5 and 4 miles of the site, and 37 (38%) between 4 and 30 miles. With so many special-status species known to occur so close to the project site, a project-specific EIR is warranted to appropriately characterize the existing wildlife community.

Table 1. Occurrence likelihoods of special-status bird species at or near the proposed project site, according to eBird/iNaturalist records (<https://eBird.org>, <https://www.inaturalist.org>) and on-site survey findings, where ‘Very close’ indicates within 1.5 miles of the site, “nearby” indicates within 1.5 and 4 miles, and “in region” indicates within 4 and 30 miles, and ‘in range’ means the species’ geographic range overlaps the site.

Common name	Species name	Status ¹	Status changed since 2010	Data base records, Site visits
Monarch	<i>Danaus plexippus</i>	FC	Yes	Nearby
Crotch’s bumble bee	<i>Bombus crotchii</i>	CCE	Yes	In region

¹ Listed as FT or FE = federal threatened or endangered, FC = federal candidate for listing, BCC = U.S. Fish and Wildlife Service Bird of Conservation Concern, CT or CE = California threatened or endangered, CCT or CCE = Candidate California threatened or endangered, CFP = California Fully Protected (California Fish and Game Code 3511), SSC = California Species of Special Concern (not threatened with extinction, but rare, very restricted in range, declining throughout range, peripheral portion of species' range, associated with habitat that is declining in extent), SSC1, SSC2 and SSC3 = California Bird Species of Special Concern priorities 1, 2 and 3, respectively (Shuford and Gardali 2008), WL = Taxa to Watch List (Shuford and Gardali 2008), and BOP = Birds of Prey (CFG Code 3503.5), and WBWG = Western Bat Working Group with priority rankings, of low (L), moderate (M), and high (H).

TRAFFIC IMPACTS TO WILDLIFE

All of the special-status species listed in Table 1 would be vulnerable to collision mortality caused by project-generated traffic on roads servicing the project. Wildlife-vehicle mortality would extend as far from the project's building footprints as cars and trucks travel to and from the project site. Neither the Addendum nor the 2010 MND analyzed potential project impacts to wildlife resulting from the construction and operation of 310,000 square feet of warehouse buildings, 50,000 square feet of which would be newly added to the earlier project (Staff Report to Planning Commission, 22 September 2022). Below, I address potential project impacts to wildlife that need to be analyzed in a project-specific EIR.

Both the 2010 MND and the Addendum neglect to address one of the project's most obvious, substantial impacts to wildlife, and that is wildlife mortality and injuries caused by project-generated traffic. Project-generated traffic would endanger wildlife that must, for various reasons, cross roads used by the project's traffic (Photos 1-5). Vehicle collisions have accounted for the deaths of many thousands of amphibian, reptile, mammal, bird, and arthropod fauna, and the impacts have often been found to be significant at the population level (Forman et al. 2003). Across North America traffic impacts have taken devastating tolls on wildlife (Forman et al. 2003). In Canada, 3,562 birds were estimated killed per 100 km of road per year (Bishop and Brogan 2013), and the US estimate of avian mortality on roads is 2,200 to 8,405 deaths per 100 km per year, or 89 million to 340 million total per year (Loss et al. 2014).

Photo 1. *A Gambel's quail dashes across a road on 3 April 2021. Such road crossings are usually successful, but too often prove fatal to the animal. Photo by Noriko Smallwood.*

Photo 2. *White-tailed antelope squirrel dashes across a road, 26 May 2022.*

Photo 3. Great-tailed grackle walks onto a rural road in Imperial County, 4 February 2022.

Photo 4. Mourning dove killed by vehicle on a California road. Photo by Noriko Smallwood, 21 June 2020.

Photo 5. Raccoon killed on Road 31 just east of Highway 505 in Solano County. Photo taken on 10 November 2018.

Local impacts can be more intense than nationally. The nearest study of traffic-caused wildlife mortality was performed along a 2.5-mile stretch of Vasco Road in Contra Costa County, California. Fatality searches in this study found 1,275 carcasses of 49 species of mammals, birds, amphibians and reptiles over 15 months of searches (Mendelsohn et al. 2009). This fatality number needs to be adjusted for the proportion of fatalities that were not found due to scavenger removal and searcher error. This adjustment is typically made by placing carcasses for searchers to find (or not find) during their routine periodic fatality searches. This step was not taken at Vasco Road (Mendelsohn et al. 2009), but it was taken as part of another study right next to Vasco Road (Brown et al. 2016). The Brown et al. (2016) adjustment factors were similar to those for carcass

persistence of road fatalities (Santos et al. 2011). Applying searcher detection rates estimated from carcass detection trials performed at a wind energy project immediately adjacent to this same stretch of road (Brown et al. 2016), the adjusted total number of fatalities was estimated at 12,187 animals killed by traffic on the road. This fatality number translates to a rate of 3,900 wild animals per mile per year killed along 2.5 miles of road in 1.25 years. In terms comparable to the national estimates, the estimates from the Mendelsohn et al. (2009) study would translate to 243,740 animals killed per 100 km of road per year, or 29 times that of Loss et al.'s (2014) upper bound estimate and 68 times the Canadian estimate. An analysis is needed of whether increased traffic generated by the project site would similarly result in local impacts on wildlife.

For wildlife vulnerable to front-end collisions and crushing under tires, road mortality can be predicted from the study of Mendelsohn et al. (2009) as a basis, although it would be helpful to have the availability of more studies like that of Mendelsohn et al. (2009) at additional locations. My analysis of the Mendelsohn et al. (2009) data resulted in an estimated 3,900 animals killed per mile along a county road in Contra Costa County. Two percent of the estimated number of fatalities were birds, and the balance was composed of 34% mammals (many mice and pocket mice, but also ground squirrels, desert cottontails, striped skunks, American badgers, raccoons, and others), 52.3% amphibians (large numbers of California tiger salamanders and California red-legged frogs, but also Sierran treefrogs, western toads, arboreal salamanders, slender salamanders and others), and 11.7% reptiles (many western fence lizards, but also skinks, alligator lizards, and snakes of various species). The metric known as vehicle miles traveled (VMT) is useful for predicting wildlife mortality because I was able to quantify miles traveled along the studied reach of Vasco Road during the time period of the Mendelsohn et al. (2009), hence enabling a rate of fatalities per VMT that can be projected to other sites, assuming similar collision fatality rates.

In my own surveys for wildlife-vehicle collision mortality on roads near the project site, including a short reach of Highway 65, from 1990 through February 2008, I recorded 903 fatalities of the following species: American white pelican, duck of unknown species, American coot, great blue heron, great egret, turkey vulture, American kestrel, barn owl, great horned owl, ring-necked pheasant, belted kingfisher, rock pigeon, American crow, yellow-billed magpie, California kingsnake, gopher snake, frogs, desert cottontail, black-tailed jackrabbit, Norway rat, muskrat, California ground squirrel, western gray squirrel, eastern gray squirrel, black-tailed deer, raccoon, mink, river otter, striped skunk, feral house cat, gray fox, coyote, and Virginia opossum. Since 2008 I have recorded many more fatalities, but I do not have them ready for summary reporting. By memory, I recall finding fatalities of red-tailed hawk, Swainson's hawk, red-shouldered hawk, Cooper's hawk, American badger and Monarch. Overwhelming evidence is available that cars and trucks kill many members of many species of California's wildlife.

Predicting project-generated traffic impacts to wildlife

The Addendum fails to report a prediction for VMT, so I relied upon the mean rate of annual VMT per square foot of warehouse floorspace at 26 other proposed projects. The mean was 24.4195 annual VMT per square foot of floorspace. This mean applied to the

project's proposed 310,000 square feet would predict an annual VMT of 7,570,045. During the Mendelsohn et al. (2009) study, 19,500 cars traveled Vasco Road daily, so the vehicle miles that contributed to my estimate of non-volant fatalities was $19,500 \text{ cars} \times 2.5 \text{ miles} \times 365 \text{ days/year} \times 1.25 \text{ years} = 22,242,187.5 \text{ vehicle miles}$ per 12,187 wildlife fatalities, or 1,825 vehicle miles per fatality. This rate divided into my prediction of 7,570,045 annual VMT due to the project predicts 4,148 vertebrate wildlife fatalities per year. Even if the project-generated traffic would kill only half the number of wild animals as measured at Vasco Road, the annual mortality would be 2,074. But it also remains to be known to what degree vehicle tires contributed to carcass removals from the roadway, thereby contributing a negative bias to the fatality estimates I made from the Mendelsohn et al. (2009) fatality counts.

As a result of the 50,000 square feet of added warehouse floor space to the earlier project (Staff Report to Planning Commission, 22 September 2022), the mean 24.4195 annual VMT per square foot of floorspace predicts 1,220,975 annual VMT. The project's added floor space would be predicted to result in 669 vertebrate wildlife fatalities per year, and even if the additional project-generated traffic would kill only half the number of wild animals as measured at Vasco Road, the annual mortality would be 335. California's loss of another 335 wild animals per year would easily qualify as a significant unmitigated impact of the project's additional 50,000 square feet of floor space.

Based on my assumptions and simple calculations, the project-generated traffic would cause substantial, significant impacts to wildlife. There is at least a fair argument that can be made for the need to prepare a project-specific EIR to analyze this impact. Mitigation measures to improve wildlife safety along roads are available and are feasible, and they need exploration for their suitability with the proposed project. My predicted loss of 2,074 to 4,148 wild vertebrate animals/year would be substantial, and therefore it is my expert opinion based on the facts and reasonable assumption that the project would result in a potentially significant impact from project-generated traffic that has not been addressed in the 2010 MND or 2022 Addendum.

A fair argument can be made for the need to prepare a project-specific EIR to analyze the potential project impacts resulting from wildlife-vehicle collision mortality caused by project-generated traffic. The EIR's analysis should extend in scope to the distances that project-generated traffic would travel along roads in the region.

MITIGATION

The Addendum includes the following mitigation measure, which is the same measure that appears in the 2010 MND:

MITIGATION MEASURE BIO#3: "A qualified biologist shall perform pre-construction surveys for nesting birds and raptors at least 30 days in advance of construction if construction is planned during January to July. If the survey does not identify any special-status birds or raptors species, no further mitigation is required. If nesting is found to be occurring, avoid disturbance of the nest site with a suitable buffer

zone. The on-site biologist shall consult with the California Department of Fish & Game to determine the size of the no-disturbance buffer (typically between 150 to 200 feet). Additionally, if Swainson's hawk are found to be using the site in any capacity, off-site mitigation would be required at a ratio deemed suitable by the CDFG."

The Addendum says that the site was graded in preparation of the development. I assume, therefore, that if this grading was done during the avian breeding season, preconstruction surveys would have been completed. However, it should be clarified whether preconstruction surveys were in fact completed prior to grading. Furthermore, it should be clarified whether a preconstruction survey report was prepared, and if it was prepared, then it should be shared as part of the CEQA review for the proposed project.

Regardless of whether preconstruction surveys preceded grading, sufficient time has elapsed since the site was graded to warrant preconstruction surveys prior to any next step in construction should the project go forward. A graded site could attract various bird species that breed on open ground, such as killdeer and California horned lark.

RECOMMENDED MEASURES

I suggest that an EIR be prepared for this proposed project, and that it considers the following measures.

Detection Surveys

The City of Roseville should implement the available protocols and guidelines on detection surveys for special-status species of wildlife. There are many special-status species potentially affected by the proposed project (Table 1), and each species comes with unique methods that are needed to determine presence or absence of the species. Therefore, there are many survey protocols needed. Detection surveys are needed to inform preconstruction take-avoidance surveys and to inform the formulation of appropriate mitigation measures.

Road Mortality: Compensatory mitigation is needed for the increased wildlife mortality that would be caused by the project-generated road traffic in the region. I suggest that this mitigation can be directed toward funding research to identify fatality patterns and effective impact reduction measures such as reduced speed limits and wildlife under-crossings or overcrossings of particularly dangerous road segments. Compensatory mitigation can also be provided in the form of donations to wildlife rehabilitation facilities (see below).

Fund Wildlife Rehabilitation Facilities

Wildlife will be killed and injured by collisions with traffic associated with the project. The impacts to injured wildlife can be rectified by helping to pay the costs of wildlife rehabilitation facilities, which operate on volunteer support and inadequate budgets. Leyvas and Smallwood (2015) surveyed 38 rehabilitation facilities to assess the cost of

rehabilitating raptors injured by wind turbines, and recommend \$3,230/injured raptor would serve as a reasonable interim mitigation cost. However, wildlife injured by car and truck traffic to and from the project will include animals other than raptors. Most of these non-raptor animals likely cost less to rehabilitate or to care for until those who cannot be released or placed in the care of others need to be euthanized humanely. In the absence of any additional cost summaries from rehabilitation facilities, I estimate that \$500 per injured animal would be reasonable.

The next challenge is estimating how many animals will require treatment during the life of the project. Live, injured animals will contribute directly to the costs incurred by rehabilitation facilities receiving the animals, but animals killed outright by cars and trucks should also be mitigated through one or more compensatory measures. Compensating for animals that are killed can come in the form of rehabilitating animals that were injured by other projects or anthropogenic activities. As a starting point, I suggest assessing \$100 per project-caused fatality. Still, there has yet to be a basis for multiplying these dollar amounts by the numbers of killed and injured wildlife caused by the project. And it should be remembered that most of the animals killed will never be documented.

There are two ways that project impacts can be assessed for deciding upon a rehabilitation fee. One way is to predict project-level impacts, but this prediction would be highly uncertain. One could use fatality and injury rates from available studies. A projected injury rate could be multiplied by \$3,230 per raptor and \$500 per non-raptor, and a projected fatality rate could be multiplied by \$100 per fatality. Thus, perhaps for every animal found injured at the project site and delivered to a rehabilitation facility, the cost for the injury is paid (\$3,230 per raptor and \$500 per non-raptor) plus \$2,500 is paid for all the projected dead animals per injured animal.

The second way to assess the impact is to fund scientific monitoring. This second way would necessitate a delay in establishing the cost-basis of the mitigation fee, but learning about the impacts would make the delay worthwhile. As scientific monitoring proceeds, a mitigation fee can be paid based on the injuries and fatalities that are found. Upon completion of the monitoring, an annual fee would be paid based on the average annual findings from the monitoring effort. I suggest splitting a fund among multiple wildlife rehabilitation facilities in the region.

Thank you for your attention,

Shawn Smallwood, Ph.D.

**Re: Appeal of Addendum to the 2010 IS/MND for Blue Oaks Commerce Center (NIPA PCL 56 – Blue Oaks Commerce Center; File #PL22-0101)
Roseville City Council Hearing; December 7, 2022, Agenda Item 8.1**

Dear Mayor Bernasconi, Vice Mayor Houdesheldt, Honorable Members of the City Council, and Ms. Mar,

I am writing on behalf of Laborers International Union of North America, Local 185, and its members living or working in and around the City of Roseville (collectively, “LIUNA”), in support of LIUNA’s appeal of the Planning Commission’s September 22, 2022 decisions: (1) adopting an Addendum to the 2010 Initial Study/Mitigated Negative Declaration (“2010 MND”) prepared for the Blue Oaks Commerce Center project, (2) approving a Major Project Permit (“MPP”) Stage 1 Modification, and (3) approving a MPP Stage 2 to allow construction and operation of four industrial buildings totaling 310,000 square feet (“Project”). This letter supplements our prior letter, dated December 5, 2022.

In our December 5, 2022 letter, we raised our concerns that the City had violated its duty to investigate the environmental impacts of the proposed Project, particularly compared to the 2010 project. In particular, the Addendum states on page 14 that “[c]onstruction and operation of the project will increase emissions on the site, but not substantially.” (Addendum, p. 14)

To further our understanding of the potential impacts, and how the Addendum’s conclusions were reached, my office requested the air quality data relied on by the City in its

December 7, 2022

Appeal re: Blue Oaks Commerce Center and Addendum to 2010 IS/MND

City Council Hearing

Page 2 of 2

determination that an addendum was appropriate, and that the Project now being approved did not have substantially greater impacts than the 2010 project. We specifically requested the CalEEMod data prepared for the Project. This is the data output generated by experts who run air quality analyses. My office was informed that “The Blue Oaks Commerce Center Addendum did not include a CalEEMod file as the project relied on the City of Roseville 2035 General Plan Update air quality analysis.” Without having prepared any analysis of the air quality impacts that this Project will have, the City has no evidence to support its reliance on an Addendum. The City has no evidence that the Project now being approved – with its 50,000 square feet of industrial warehouse space - will not result in substantially greater air quality impacts than the project approved and analyzed in the 2010 MND.

The Addendum also states that “the construction phase project-level ROG (lbs/day) percent difference between the original project and the propped project will have approximately a 17% difference.” There appears to be no evidentiary basis for this statement.

In addition, we recently obtained from City staff Attachment 2 to the 2010 MND, which is a 404 Permit application containing the biological resources assessment relied on in support of the 2010 MND’s conclusions. This assessment was prepared 17 years ago, in 2005. When compared to the list of species potentially occurring at the Project site prepared by Dr. Smallwood, there are many new special status species that were not previously either likely to occur on the site or not previously listed as special status species, including, for example, the long-billed curlew, rufous hummingbird, barrow’s goldeneye, willet, California gull, sharp-shinned hawk, and dozens of others. (Smallwood Comments, attached as Exhibit 1, pp. 2-5.) The fact that these species now have the potential to occur on site is a changed circumstance, and requires major revisions to the MND to analyze and mitigate the Project’s potential impact on these species, as described in Dr. Smallwood’s comments. (See CEQA Guidelines, § 15162(a)(2).)

Further, many of the species identified by Dr. Smallwood were not designated as special-status species in 2010. These new designations constitute new information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous MND was adopted, and Dr. Smallwood’s comments show that the Project may have significant impacts on these species. (See CEQA Guidelines, § 15162(a)(3).)

Sincerely,

A handwritten signature in blue ink, appearing to read 'Rebecca L. Davis', with a long horizontal flourish extending to the right.

Rebecca L. Davis

RE: Blue Oaks Commerce Center

Dear Ms. Mar,

I write to comment on the Addendum to the 2010 Blue Oaks Commerce Center Mitigated Negative Declaration (MND) prepared for the proposed Blue Oaks Commerce Center, which I understand would add four industrial buildings totaling 310,000 square feet of floor space onto 23.94 acres.

My qualifications for preparing expert comments are the following. I hold a Ph.D. degree in Ecology from University of California at Davis, where I also worked as a post-graduate researcher in the Department of Agronomy and Range Sciences. My research has been on animal density and distribution, habitat selection, wildlife interactions with the anthrosphere, and conservation of rare and endangered species. I authored many papers on these and other topics. I served as Chair of the Conservation Affairs Committee for The Wildlife Society – Western Section. I am a member of The Wildlife Society and Raptor Research Foundation, and I've lectured part-time at California State University, Sacramento. I was Associate Editor of wildlife biology's premier scientific journal, The Journal of Wildlife Management, as well as of Biological Conservation, and I was on the Editorial Board of Environmental Management. I have performed wildlife surveys in California for thirty-seven years. My CV is attached.

BIOLOGICAL IMPACTS ASSESSMENT

Circumstances regarding wildlife have changed over the 12 years since the 2010 MND. The overall decline in bird abundance across North America (Rosenberg et al. 2019) has also included declines in special-status species. These declines prompted recent changes in statutes and more designations of special-status to biological species. As examples, neither California gull nor northern harrier were US Fish and Wildlife Bird Species of Conservation Concern in 2010, but they became so since then (Table 1). I did not find a list of potentially-occurring special-status species in the 2010 MND, but if one had been constructed, it is obsolete and should be replaced by Table 1.

My review of occurrence databases reveals 97 special-status species with potential to occur at or near the project site, including 32 (33%) between 1.5 miles of the site and 24 (25%) within 1.5 and 4 miles of the site, and 37 (38%) between 4 and 30 miles. With so many special-status species known to occur so close to the project site, a project-specific EIR is warranted to appropriately characterize the existing wildlife community.

Table 1. Occurrence likelihoods of special-status bird species at or near the proposed project site, according to eBird/iNaturalist records (<https://eBird.org>, <https://www.inaturalist.org>) and on-site survey findings, where ‘Very close’ indicates within 1.5 miles of the site, “nearby” indicates within 1.5 and 4 miles, and “in region” indicates within 4 and 30 miles, and ‘in range’ means the species’ geographic range overlaps the site.

TRAFFIC IMPACTS TO WILDLIFE

All of the special-status species listed in Table 1 would be vulnerable to collision mortality caused by project-generated traffic on roads servicing the project. Wildlife-vehicle mortality would extend as far from the project's building footprints as cars and trucks travel to and from the project site. Neither the Addendum nor the 2010 MND analyzed potential project impacts to wildlife resulting from the construction and operation of 310,000 square feet of warehouse buildings, 50,000 square feet of which would be newly added to the earlier project (Staff Report to Planning Commission, 22 September 2022). Below, I address potential project impacts to wildlife that need to be analyzed in a project-specific EIR.

Both the 2010 MND and the Addendum neglect to address one of the project's most obvious, substantial impacts to wildlife, and that is wildlife mortality and injuries caused by project-generated traffic. Project-generated traffic would endanger wildlife that must, for various reasons, cross roads used by the project's traffic (Photos 1-5). Vehicle collisions have accounted for the deaths of many thousands of amphibian, reptile, mammal, bird, and arthropod fauna, and the impacts have often been found to be significant at the population level (Forman et al. 2003). Across North America traffic impacts have taken devastating tolls on wildlife (Forman et al. 2003). In Canada, 3,562 birds were estimated killed per 100 km of road per year (Bishop and Brogan 2013), and the US estimate of avian mortality on roads is 2,200 to 8,405 deaths per 100 km per year, or 89 million to 340 million total per year (Loss et al. 2014).

Photo 1. *A Gambel's quail dashes across a road on 3 April 2021. Such road crossings are usually successful, but too often prove fatal to the animal. Photo by Noriko Smallwood.*

Photo 2. *White-tailed antelope squirrel dashes across a road, 26 May 2022.*

Photo 3. Great-tailed grackle walks onto a rural road in Imperial County, 4 February 2022.

Photo 4. Mourning dove killed by vehicle on a California road. Photo by Noriko Smallwood, 21 June 2020.

Photo 5. Raccoon killed on Road 31 just east of Highway 505 in Solano County. Photo taken on 10 November 2018.

Local impacts can be more intense than nationally. The nearest study of traffic-caused wildlife mortality was performed along a 2.5-mile stretch of Vasco Road in Contra Costa County, California. Fatality searches in this study found 1,275 carcasses of 49 species of mammals, birds, amphibians and reptiles over 15 months of searches (Mendelsohn et al. 2009). This fatality number needs to be adjusted for the proportion of fatalities that were not found due to scavenger removal and searcher error. This adjustment is typically made by placing carcasses for searchers to find (or not find) during their routine periodic fatality searches. This step was not taken at Vasco Road (Mendelsohn et al. 2009), but it was taken as part of another study right next to Vasco Road (Brown et al. 2016). The Brown et al. (2016) adjustment factors were similar to those for carcass

persistence of road fatalities (Santos et al. 2011). Applying searcher detection rates estimated from carcass detection trials performed at a wind energy project immediately adjacent to this same stretch of road (Brown et al. 2016), the adjusted total number of fatalities was estimated at 12,187 animals killed by traffic on the road. This fatality number translates to a rate of 3,900 wild animals per mile per year killed along 2.5 miles of road in 1.25 years. In terms comparable to the national estimates, the estimates from the Mendelsohn et al. (2009) study would translate to 243,740 animals killed per 100 km of road per year, or 29 times that of Loss et al.'s (2014) upper bound estimate and 68 times the Canadian estimate. An analysis is needed of whether increased traffic generated by the project site would similarly result in local impacts on wildlife.

For wildlife vulnerable to front-end collisions and crushing under tires, road mortality can be predicted from the study of Mendelsohn et al. (2009) as a basis, although it would be helpful to have the availability of more studies like that of Mendelsohn et al. (2009) at additional locations. My analysis of the Mendelsohn et al. (2009) data resulted in an estimated 3,900 animals killed per mile along a county road in Contra Costa County. Two percent of the estimated number of fatalities were birds, and the balance was composed of 34% mammals (many mice and pocket mice, but also ground squirrels, desert cottontails, striped skunks, American badgers, raccoons, and others), 52.3% amphibians (large numbers of California tiger salamanders and California red-legged frogs, but also Sierran treefrogs, western toads, arboreal salamanders, slender salamanders and others), and 11.7% reptiles (many western fence lizards, but also skinks, alligator lizards, and snakes of various species). The metric known as vehicle miles traveled (VMT) is useful for predicting wildlife mortality because I was able to quantify miles traveled along the studied reach of Vasco Road during the time period of the Mendelsohn et al. (2009), hence enabling a rate of fatalities per VMT that can be projected to other sites, assuming similar collision fatality rates.

In my own surveys for wildlife-vehicle collision mortality on roads near the project site, including a short reach of Highway 65, from 1990 through February 2008, I recorded 903 fatalities of the following species: American white pelican, duck of unknown species, American coot, great blue heron, great egret, turkey vulture, American kestrel, barn owl, great horned owl, ring-necked pheasant, belted kingfisher, rock pigeon, American crow, yellow-billed magpie, California kingsnake, gopher snake, frogs, desert cottontail, black-tailed jackrabbit, Norway rat, muskrat, California ground squirrel, western gray squirrel, eastern gray squirrel, black-tailed deer, raccoon, mink, river otter, striped skunk, feral house cat, gray fox, coyote, and Virginia opossum. Since 2008 I have recorded many more fatalities, but I do not have them ready for summary reporting. By memory, I recall finding fatalities of red-tailed hawk, Swainson's hawk, red-shouldered hawk, Cooper's hawk, American badger and Monarch. Overwhelming evidence is available that cars and trucks kill many members of many species of California's wildlife.

Predicting project-generated traffic impacts to wildlife

The Addendum fails to report a prediction for VMT, so I relied upon the mean rate of annual VMT per square foot of warehouse floorspace at 26 other proposed projects. The mean was 24.4195 annual VMT per square foot of floorspace. This mean applied to the

project's proposed 310,000 square feet would predict an annual VMT of 7,570,045. During the Mendelsohn et al. (2009) study, 19,500 cars traveled Vasco Road daily, so the vehicle miles that contributed to my estimate of non-volant fatalities was $19,500 \text{ cars} \times 2.5 \text{ miles} \times 365 \text{ days/year} \times 1.25 \text{ years} = 22,242,187.5 \text{ vehicle miles}$ per 12,187 wildlife fatalities, or 1,825 vehicle miles per fatality. This rate divided into my prediction of 7,570,045 annual VMT due to the project predicts 4,148 vertebrate wildlife fatalities per year. Even if the project-generated traffic would kill only half the number of wild animals as measured at Vasco Road, the annual mortality would be 2,074. But it also remains to be known to what degree vehicle tires contributed to carcass removals from the roadway, thereby contributing a negative bias to the fatality estimates I made from the Mendelsohn et al. (2009) fatality counts.

As a result of the 50,000 square feet of added warehouse floor space to the earlier project (Staff Report to Planning Commission, 22 September 2022), the mean 24.4195 annual VMT per square foot of floorspace predicts 1,220,975 annual VMT. The project's added floor space would be predicted to result in 669 vertebrate wildlife fatalities per year, and even if the additional project-generated traffic would kill only half the number of wild animals as measured at Vasco Road, the annual mortality would be 335. California's loss of another 335 wild animals per year would easily qualify as a significant unmitigated impact of the project's additional 50,000 square feet of floor space.

Based on my assumptions and simple calculations, the project-generated traffic would cause substantial, significant impacts to wildlife. There is at least a fair argument that can be made for the need to prepare a project-specific EIR to analyze this impact. Mitigation measures to improve wildlife safety along roads are available and are feasible, and they need exploration for their suitability with the proposed project. My predicted loss of 2,074 to 4,148 wild vertebrate animals/year would be substantial, and therefore it is my expert opinion based on the facts and reasonable assumption that the project would result in a potentially significant impact from project-generated traffic that has not been addressed in the 2010 MND or 2022 Addendum.

A fair argument can be made for the need to prepare a project-specific EIR to analyze the potential project impacts resulting from wildlife-vehicle collision mortality caused by project-generated traffic. The EIR's analysis should extend in scope to the distances that project-generated traffic would travel along roads in the region.

MITIGATION

The Addendum includes the following mitigation measure, which is the same measure that appears in the 2010 MND:

MITIGATION MEASURE BIO#3: "A qualified biologist shall perform pre-construction surveys for nesting birds and raptors at least 30 days in advance of construction if construction is planned during January to July. If the survey does not identify any special-status birds or raptors species, no further mitigation is required. If nesting is found to be occurring, avoid disturbance of the nest site with a suitable buffer

zone. The on-site biologist shall consult with the California Department of Fish & Game to determine the size of the no-disturbance buffer (typically between 150 to 200 feet). Additionally, if Swainson's hawk are found to be using the site in any capacity, off-site mitigation would be required at a ratio deemed suitable by the CDFG."

The Addendum says that the site was graded in preparation of the development. I assume, therefore, that if this grading was done during the avian breeding season, preconstruction surveys would have been completed. However, it should be clarified whether preconstruction surveys were in fact completed prior to grading. Furthermore, it should be clarified whether a preconstruction survey report was prepared, and if it was prepared, then it should be shared as part of the CEQA review for the proposed project.

Regardless of whether preconstruction surveys preceded grading, sufficient time has elapsed since the site was graded to warrant preconstruction surveys prior to any next step in construction should the project go forward. A graded site could attract various bird species that breed on open ground, such as killdeer and California horned lark.

RECOMMENDED MEASURES

I suggest that an EIR be prepared for this proposed project, and that it considers the following measures.

Detection Surveys

The City of Roseville should implement the available protocols and guidelines on detection surveys for special-status species of wildlife. There are many special-status species potentially affected by the proposed project (Table 1), and each species comes with unique methods that are needed to determine presence or absence of the species. Therefore, there are many survey protocols needed. Detection surveys are needed to inform preconstruction take-avoidance surveys and to inform the formulation of appropriate mitigation measures.

Road Mortality: Compensatory mitigation is needed for the increased wildlife mortality that would be caused by the project-generated road traffic in the region. I suggest that this mitigation can be directed toward funding research to identify fatality patterns and effective impact reduction measures such as reduced speed limits and wildlife under-crossings or overcrossings of particularly dangerous road segments. Compensatory mitigation can also be provided in the form of donations to wildlife rehabilitation facilities (see below).

Fund Wildlife Rehabilitation Facilities

Wildlife will be killed and injured by collisions with traffic associated with the project. The impacts to injured wildlife can be rectified by helping to pay the costs of wildlife rehabilitation facilities, which operate on volunteer support and inadequate budgets. Leyvas and Smallwood (2015) surveyed 38 rehabilitation facilities to assess the cost of

rehabilitating raptors injured by wind turbines, and recommend \$3,230/injured raptor would serve as a reasonable interim mitigation cost. However, wildlife injured by car and truck traffic to and from the project will include animals other than raptors. Most of these non-raptor animals likely cost less to rehabilitate or to care for until those who cannot be released or placed in the care of others need to be euthanized humanely. In the absence of any additional cost summaries from rehabilitation facilities, I estimate that \$500 per injured animal would be reasonable.

The next challenge is estimating how many animals will require treatment during the life of the project. Live, injured animals will contribute directly to the costs incurred by rehabilitation facilities receiving the animals, but animals killed outright by cars and trucks should also be mitigated through one or more compensatory measures. Compensating for animals that are killed can come in the form of rehabilitating animals that were injured by other projects or anthropogenic activities. As a starting point, I suggest assessing \$100 per project-caused fatality. Still, there has yet to be a basis for multiplying these dollar amounts by the numbers of killed and injured wildlife caused by the project. And it should be remembered that most of the animals killed will never be documented.

There are two ways that project impacts can be assessed for deciding upon a rehabilitation fee. One way is to predict project-level impacts, but this prediction would be highly uncertain. One could use fatality and injury rates from available studies. A projected injury rate could be multiplied by \$3,230 per raptor and \$500 per non-raptor, and a projected fatality rate could be multiplied by \$100 per fatality. Thus, perhaps for every animal found injured at the project site and delivered to a rehabilitation facility, the cost for the injury is paid (\$3,230 per raptor and \$500 per non-raptor) plus \$2,500 is paid for all the projected dead animals per injured animal.

The second way to assess the impact is to fund scientific monitoring. This second way would necessitate a delay in establishing the cost-basis of the mitigation fee, but learning about the impacts would make the delay worthwhile. As scientific monitoring proceeds, a mitigation fee can be paid based on the injuries and fatalities that are found. Upon completion of the monitoring, an annual fee would be paid based on the average annual findings from the monitoring effort. I suggest splitting a fund among multiple wildlife rehabilitation facilities in the region.

Thank you for your attention,

Shawn Smallwood, Ph.D.

Born May 3, 1963 in
Sacramento, California.
Married, father of two.

Ecologist

Expertise

- Finding solutions to controversial problems related to wildlife interactions with human industry, infrastructure, and activities;
- Wildlife monitoring and field study using GPS, thermal imaging, behavior surveys;
- Using systems analysis and experimental design principles to identify meaningful ecological patterns that inform management decisions.

Education

Ph.D. Ecology, University of California, Davis. September 1990.
M.S. Ecology, University of California, Davis. June 1987.
B.S. Anthropology, University of California, Davis. June 1985.
Corcoran High School, Corcoran, California. June 1981.

Experience

- 762 professional reports, including:
- 90 peer reviewed publications
- 24 in non-reviewed proceedings
- 646 reports, declarations, posters and book reviews
- 8 in mass media outlets
- 92 public presentations of research results

Editing for scientific journals: Guest Editor, *Wildlife Society Bulletin*, 2012-2013, of invited papers representing international views on the impacts of wind energy on wildlife and how to mitigate the impacts. Associate Editor, *Journal of Wildlife Management*, March 2004 to 30 June 2007. Editorial Board Member, *Environmental Management*, 10/1999 to 8/2004. Associate Editor, *Biological Conservation*, 9/1994 to 9/1995.

Member, Alameda County Scientific Review Committee (SRC), August 2006 to April 2011. The five-member committee investigated causes of bird and bat collisions in the Altamont Pass Wind Resource Area, and recommended mitigation and monitoring measures. The SRC reviewed the science underlying the Alameda County Avian Protection Program, and advised

the County on how to reduce wildlife fatalities.

Consulting Ecologist, 2004-2007, California Energy Commission (CEC). Provided consulting services as needed to the CEC on renewable energy impacts, monitoring and research, and produced several reports. Also collaborated with Lawrence-Livermore National Lab on research to understand and reduce wind turbine impacts on wildlife.

Consulting Ecologist, 1999-2013, U.S. Navy. Performed endangered species surveys, hazardous waste site monitoring, and habitat restoration for the endangered San Joaquin kangaroo rat, California tiger salamander, California red-legged frog, California clapper rail, western burrowing owl, salt marsh harvest mouse, and other species at Naval Air Station Lemoore; Naval Weapons Station, Seal Beach, Detachment Concord; Naval Security Group Activity, Skaggs Island; National Radio Transmitter Facility, Dixon; and, Naval Outlying Landing Field Imperial Beach.

Part-time Lecturer, 1998-2005, California State University, Sacramento. Instructed Mammalogy, Behavioral Ecology, and Ornithology Lab, Contemporary Environmental Issues, Natural Resources Conservation.

Senior Ecologist, 1999-2005, BioResource Consultants. Designed and implemented research and monitoring studies related to avian fatalities at wind turbines, avian electrocutions on electric distribution poles across California, and avian fatalities at transmission lines.

Chairman, Conservation Affairs Committee, The Wildlife Society--Western Section, 1999-2001. Prepared position statements and led efforts directed toward conservation issues, including travel to Washington, D.C. to lobby Congress for more wildlife conservation funding.

Systems Ecologist, 1995-2000, Institute for Sustainable Development. Headed ISD's program on integrated resources management. Developed indicators of ecological integrity for large areas, using remotely sensed data, local community involvement and GIS.

Associate, 1997-1998, Department of Agronomy and Range Science, University of California, Davis. Worked with Shu Geng and Mingua Zhang on several studies related to wildlife interactions with agriculture and patterns of fertilizer and pesticide residues in groundwater across a large landscape.

Lead Scientist, 1996-1999, National Endangered Species Network. Informed academic scientists and environmental activists about emerging issues regarding the Endangered Species Act and other environmental laws. Testified at public hearings on endangered species issues.

Ecologist, 1997-1998, Western Foundation of Vertebrate Zoology. Conducted field research to determine the impact of past mercury mining on the status of California red-legged frogs in Santa Clara County, California.

Senior Systems Ecologist, 1994-1995, EIP Associates, Sacramento, California. Provided consulting services in environmental planning, and quantitative assessment of land units for their conservation and restoration opportunities based on ecological resource requirements of 29 special-status species. Developed ecological indicators for prioritizing areas within Yolo County

to receive mitigation funds for habitat easements and restoration.

Post-Graduate Researcher, 1990-1994, Department of Agronomy and Range Science, *U.C. Davis*. Under Dr. Shu Geng's mentorship, studied landscape and management effects on temporal and spatial patterns of abundance among pocket gophers and species of Falconiformes and Carnivora in the Sacramento Valley. Managed and analyzed a data base of energy use in California agriculture. Assisted with landscape (GIS) study of groundwater contamination across Tulare County, California.

Work experience in graduate school: Co-taught Conservation Biology with Dr. Christine Schonewald, 1991 & 1993, UC Davis Graduate Group in Ecology; Reader for Dr. Richard Coss's course on Psychobiology in 1990, UC Davis Department of Psychology; Research Assistant to Dr. Walter E. Howard, 1988-1990, UC Davis Department of Wildlife and Fisheries Biology, testing durable baits for pocket gopher management in forest clearcuts; Research Assistant to Dr. Terrell P. Salmon, 1987-1988, UC Wildlife Extension, Department of Wildlife and Fisheries Biology, developing empirical models of mammal and bird invasions in North America, and a rating system for priority research and control of exotic species based on economic, environmental and human health hazards in California. Student Assistant to Dr. E. Lee Fitzhugh, 1985-1987, UC Cooperative Extension, Department of Wildlife and Fisheries Biology, developing and implementing statewide mountain lion track count for long-term monitoring.

Fulbright Research Fellow, Indonesia, 1988. Tested use of new sampling methods for numerical monitoring of Sumatran tiger and six other species of endemic felids, and evaluated methods used by other researchers.

Projects

Repowering wind energy projects through careful siting of new wind turbines using map-based collision hazard models to minimize impacts to volant wildlife. Funded by wind companies (principally NextEra Renewable Energy, Inc.), California Energy Commission and East Bay Regional Park District, I have collaborated with a GIS analyst and managed a crew of five field biologists performing golden eagle behavior surveys and nocturnal surveys on bats and owls. The goal is to quantify flight patterns for development of predictive models to more carefully site new wind turbines in repowering projects. Focused behavior surveys began May 2012 and continue. Collision hazard models have been prepared for seven wind projects, three of which were built. Planning for additional repowering projects is underway.

Test avian safety of new mixer-ejector wind turbine (MEWT). Designed and implemented a before-after, control-impact experimental design to test the avian safety of a new, shrouded wind turbine developed by Ogin Inc. (formerly known as FloDesign Wind Turbine Corporation). Supported by a \$718,000 grant from the California Energy Commission's Public Interest Energy Research program and a 20% match share contribution from Ogin, I managed a crew of seven field biologists who performed periodic fatality searches and behavior surveys, carcass detection trials, nocturnal behavior surveys using a thermal camera, and spatial analyses with the collaboration of a GIS analyst. Field work began 1 April 2012 and ended 30 March 2015 without Ogin installing its MEWTs, but we still achieved multiple important scientific advances.

Reduce avian mortality due to wind turbines at Altamont Pass. Studied wildlife impacts caused by 5,400 wind turbines at the world's most notorious wind resource area. Studied how impacts are perceived by monitoring and how they are affected by terrain, wind patterns, food resources, range management practices, wind turbine operations, seasonal patterns, population cycles, infrastructure management such as electric distribution, animal behavior and social interactions.

Reduce avian mortality on electric distribution poles. Directed research toward reducing bird electrocutions on electric distribution poles, 2000-2007. Oversaw 5 founts of fatality searches at 10,000 poles from Orange County to Glenn County, California, and produced two large reports.

Cook *et al.* v. Rockwell International *et al.*, No. 90-K-181 (D. Colorado). Provided expert testimony on the role of burrowing animals in affecting the fate of buried and surface-deposited radioactive and hazardous chemical wastes at the Rocky Flats Plant, Colorado. Provided expert reports based on four site visits and an extensive document review of burrowing animals. Conducted transect surveys for evidence of burrowing animals and other wildlife on and around waste facilities. Discovered substantial intrusion of waste structures by burrowing animals. I testified in federal court in November 2005, and my clients were subsequently awarded a \$553,000,000 judgment by a jury. After appeals the award was increased to two billion dollars.

Hanford Nuclear Reservation Litigation. Provided expert testimony on the role of burrowing animals in affecting the fate of buried radioactive wastes at the Hanford Nuclear Reservation, Washington. Provided three expert reports based on three site visits and extensive document review. Predicted and verified a certain population density of pocket gophers on buried waste structures, as well as incidence of radionuclide contamination in body tissue. Conducted transect surveys for evidence of burrowing animals and other wildlife on and around waste facilities. Discovered substantial intrusion of waste structures by burrowing animals.

Expert testimony and declarations on proposed residential and commercial developments, gas-fired power plants, wind, solar and geothermal projects, water transfers and water transfer delivery systems, endangered species recovery plans, Habitat Conservation Plans and Natural Communities Conservation Programs. Testified before multiple government agencies, Tribunals, Boards of Supervisors and City Councils, and participated with press conferences and depositions. Prepared expert witness reports and court declarations, which are summarized under Reports (below).

Protocol-level surveys for special-status species. Used California Department of Fish and Wildlife and US Fish and Wildlife Service protocols to search for California red-legged frog, California tiger salamander, arroyo southwestern toad, blunt-nosed leopard lizard, western pond turtle, giant kangaroo rat, San Joaquin kangaroo rat, San Joaquin kit fox, western burrowing owl, Swainson's hawk, Valley elderberry longhorn beetle and other special-status species.

Conservation of San Joaquin kangaroo rat. Performed research to identify factors responsible for the decline of this endangered species at Lemoore Naval Air Station, 2000-2013, and implemented habitat enhancements designed to reverse the trend and expand the population.

Impact of West Nile Virus on yellow-billed magpies. Funded by Sacramento-Yolo Mosquito and Vector Control District, 2005-2008, compared survey results pre- and post-West Nile Virus epidemic for multiple bird species in the Sacramento Valley, particularly on yellow-billed magpie and American crow due to susceptibility to WNV.

Workshops on HCPs. Assisted Dr. Michael Morrison with organizing and conducting a 2-day workshop on Habitat Conservation Plans, sponsored by Southern California Edison, and another 1-day workshop sponsored by PG&E. These Workshops were attended by academics, attorneys, and consultants with HCP experience. We guest-edited a Proceedings published in Environmental Management.

Mapping of biological resources along Highways 101, 46 and 41. Used GPS and GIS to delineate vegetation complexes and locations of special-status species along 26 miles of highway in San Luis Obispo County, 14 miles of highway and roadway in Monterey County, and in a large area north of Fresno, including within reclaimed gravel mining pits.

GPS mapping and monitoring at restoration sites and at Caltrans mitigation sites. Monitored the success of elderberry shrubs at one location, the success of willows at another location, and the response of wildlife to the succession of vegetation at both sites. Also used GPS to monitor the response of fossorial animals to yellow star-thistle eradication and natural grassland restoration efforts at Bear Valley in Colusa County and at the decommissioned Mather Air Force Base in Sacramento County.

Mercury effects on Red-legged Frog. Assisted Dr. Michael Morrison and US Fish and Wildlife Service in assessing the possible impacts of historical mercury mining on the federally listed California red-legged frog in Santa Clara County. Also measured habitat variables in streams.

Opposition to proposed No Surprises rule. Wrote a white paper and summary letter explaining scientific grounds for opposing the incidental take permit (ITP) rules providing ITP applicants and holders with general assurances they will be free of compliance with the Endangered Species Act once they adhere to the terms of a “properly functioning HCP.” Submitted 188 signatures of scientists and environmental professionals concerned about No Surprises rule US Fish and Wildlife Service, National Marine Fisheries Service, all US Senators.

Natomas Basin Habitat Conservation Plan alternative. Designed narrow channel marsh to increase the likelihood of survival and recovery in the wild of giant garter snake, Swainson’s hawk and Valley Elderberry Longhorn Beetle. The design included replication and interspersions of treatments for experimental testing of critical habitat elements. I provided a report to Northern Territories, Inc.

Assessments of agricultural production system and environmental technology transfer to China. Twice visited China and interviewed scientists, industrialists, agriculturalists, and the Directors of the Chinese Environmental Protection Agency and the Department of Agriculture to assess the need and possible pathways for environmental clean-up technologies and trade opportunities between the US and China.

Yolo County Habitat Conservation Plan. Conducted landscape ecology study of Yolo County to spatially prioritize allocation of mitigation efforts to improve ecosystem functionality within the County from the perspective of 29 special-status species of wildlife and plants. Used a hierarchically structured indicators approach to apply principles of landscape and ecosystem ecology, conservation biology, and local values in rating land units. Derived GIS maps to help guide the conservation area design, and then developed implementation strategies.

Mountain lion track count. Developed and conducted a carnivore monitoring program throughout California since 1985. Species counted include mountain lion, bobcat, black bear, coyote, red and gray fox, raccoon, striped skunk, badger, and black-tailed deer. Vegetation and land use are also monitored. Track survey transect was established on dusty, dirt roads within randomly selected quadrats.

Sumatran tiger and other felids. Upon award of Fulbright Research Fellowship, I designed and initiated track counts for seven species of wild cats in Sumatra, including Sumatran tiger, fishing cat, and golden cat. Spent four months on Sumatra and Java in 1988, and learned Bahasa Indonesia, the official Indonesian language.

Wildlife in agriculture. Beginning as post-graduate research, I studied pocket gophers and other wildlife in 40 alfalfa fields throughout the Sacramento Valley, and I surveyed for wildlife along a 200 mile road transect since 1989 with a hiatus of 1996-2004. The data are analyzed using GIS and methods from landscape ecology, and the results published and presented orally to farming groups in California and elsewhere. I also conducted the first study of wildlife in cover crops used on vineyards and orchards.

Agricultural energy use and Tulare County groundwater study. Developed and analyzed a data base of energy use in California agriculture, and collaborated on a landscape (GIS) study of groundwater contamination across Tulare County, California.

Pocket gopher damage in forest clear-cuts. Developed gopher sampling methods and tested various poison baits and baiting regimes in the largest-ever field study of pocket gopher management in forest plantations, involving 68 research plots in 55 clear-cuts among 6 National Forests in northern California.

Risk assessment of exotic species in North America. Developed empirical models of mammal and bird species invasions in North America, as well as a rating system for assigning priority research and control to exotic species in California, based on economic, environmental, and human health hazards.

Re: Appeal of Addendum to the 2010 IS/MND for Blue Oaks Commerce Center
(NIPA PCL 56 – Blue Oaks Commerce Center; File #PL22-0101)
Roseville City Council Hearing; January 18, 2023, Agenda Item 10.1

Dear Mayor Bernasconi and Members of the City Council:

Buchalter represents Schnitzer Properties, the project applicant (“Applicant”) for the Blue Oaks Commerce Center, File Number 22-0101. Blue Oaks Commerce Center consists of the development of four industrial buildings totaling approximately 310,000 square feet (“Project”), located on two parcels totaling 23.94 acres at 2200, 2301, and 2201 Freedom Way (“Property” or “Project Site”) in the City of Roseville (“City”). On September 22, 2022, the Roseville Planning Commission adopted an addendum (“Addendum”) to a previously adopted Initial Study/Mitigated Negative Declaration (“IS/MND”) and approved a Major Project Permit Stage 1 Modification and Major Project Permit Stage 2 Modification for the Project.

On September 30, 2022, Lozeau Drury, LLP, on behalf of Laborers International Union of North America, Local Union 185 (“LIUNA” or “Appellant”), appealed the Roseville Planning Commission’s approval of the Project (“Appeal”). Buchalter addressed LIUNA’s Appeal in our letter dated October 20, 2022 attached hereto as **Attachment A** and incorporated by this reference. In its Appeal, LIUNA questioned the City’s adoption of the Addendum and the approval of the Project for the first time contending that there were different unspecified mitigation measures compared to those identified in the original 2010 IS/MND that would supposedly reduce significant cumulative air quality impacts. LIUNA also suggested the Project’s increased size compared to the original 2010 Project required major revisions to the IS/MND without any evidence. LIUNA subsequently submitted two additional letters to the City Council on December

5 (the “December 5 Letter”) and on December 7, 2022 (the “December 7 Letter”) reiterating its same concerns.

The purpose of this letter is to address the unsubstantiated claims that LIUNA alleged in its December 5 and December 7 Letters, and to demonstrate that substantial evidence supports the City’s adoption of the IS/MND and Addendum in accordance with the California Environmental Quality Act (Pub. Res. Code §§ 21000 *et seq.*; 14 Cal. Code Regs. §§ 15000 *et seq.*). For the reasons discussed further below, we respectfully request that the City Council find that the LIUNA appeal is without merit and reject the Appeal based on the finding that the Project approval and adoption of the Addendum are supported by substantial evidence and comply with CEQA.

Substantial evidence does not support the Appeal’s assertions that the Project may result in significant environmental impacts warranting further CEQA review.

Legal Standards

As I noted in my October 20, 2022 letter, CEQA permits a lead agency to prepare an addendum to a negative declaration “if only minor technical changes or additions are necessary or none of the conditions described in Section 15162 [of the CEQA Guidelines]” have occurred. (14 Cal. Code Regs. (the “CEQA Guidelines”), § 15164(b).) Those conditions described in CEQA Guidelines Section 15162 generally provide that: (i) no substantial changes are proposed in the project or with how it is undertaken, requiring major revisions to the CEQA document; or (ii) that new information of substantial importance has arisen, showing that the project will result in significant environmental impacts or more severe impacts. (CEQA Guidelines, § 15162.)

In order to trigger a subsequent IS/MND when a lead agency previously adopted an IS/MND or certified an EIR for the initial project, CEQA requires that new information be of substantial importance, and show: A) one or more significant effects not previously examined in the IS/MND, B) significant effects previously examined will be substantially more severe, C) mitigation measures previously found to be infeasible would be feasible, or D) mitigation measures or alternatives considerably different from those previously studied would substantially reduce one or more significant effects on the environment, and those mitigation measures were declined by the project. (*Id.*, § 15162(a)(3).) The lead agency shall prepare an addendum to the IS/MND if none of the conditions described above have occurred. (*Id.*, § 15164(b).) That is not the case here.

To demonstrate that the City erred in preparing the Addendum and should have instead prepared a subsequent MND, the Appellant must provide substantial evidence demonstrating that substantial changes to the project and/or its circumstances or new information occurred in accordance with CEQA Guidelines Section 15162. Substantial evidence is defined as “enough relevant information and reasonable inferences from this information that a fair argument can be

Mayor Krista Bernasconi and
Members of the City Council
December 21, 2022
Page 3

made to support a conclusion, even though other conclusions might also be reached.” (*Id.*, § 15384(a).) “Argument, speculation, unsubstantiated opinion” is expressly excluded from substantial evidence. (*Id.*) Substantial evidence includes “facts, reasonable assumptions predicated upon facts, and expert opinion supported by facts.” (*Id.*, § 15384(b).)

The Appellant makes several unsubstantiated claims that a subsequent IS/MND is required for the Project, because: (1) the City allegedly failed to investigate the increased size of the Project; and (2) that the Project will purportedly result in significant impacts to air quality, energy use, greenhouse gas emissions, and biological resources. For the reasons detailed below, LIUNA’s unsubstantiated claims do not warrant preparation of a subsequent MND. LIUNA’s latest letters raise the same issues without any evidence, and the Appellant failed to meet its burden of proof.

The Addendum incorporated the City’s General Plan Update EIR findings, which evaluated the environmental impacts of the proposed Project on this site.

LIUNA made sweeping unfounded claims that the City had a duty to conduct additional analysis for the original warehouse/industrial project that was previously subject to the adopted IS/MND. The Addendum clearly explained that the IS/MND, which was attached to the Addendum, evaluated the environmental impacts associated with the development of the 575,505 square foot Blue Oaks Commerce Center. (Addendum, p. 3.) The Addendum also explained the changes to the Project over the years, which included eliminating retail uses, replacing industrial uses, and including office uses. Thus, this updated Project, including the 50,000 additional square feet of industrial uses, is merely a minor modification that fits within the original footprint of the Blue Oaks Commerce Center that was evaluated in the IS/MND as explained in the Addendum.

The City further explained that the Addendum relied upon the environmental analysis contained in the City’s 2035 General Plan Update EIR, the West Roseville Specific Plan, and the Subsequent EIR and the Roseville 2020 Transportation System Capital Improvements Program Update. (Addendum, pp. 6-7.) This is consistent with CEQA Guidelines Section 15168, which allows incorporation of a program EIR into a later project to evaluate the project’s impacts to “regional influences, secondary effects, cumulative impacts, broad alternatives, and other factors.” Thus, as explained below, the Addendum appropriately analyzed each of the environmental topics evaluated in the IS/MND and the City’s other applicable program EIRs and demonstrated that the Project would not trigger the need for subsequent environmental review pursuant to CEQA Guidelines Section 15162. Consistent with CEQA, the City has relied on two EIRs, the adopted IS/MND and the Addendum to document the environmental impacts of the Blue Oaks Commerce Center.

The Addendum and the IS/MND adequately analyzed air quality, energy, GHG, and purported impacts to human health.

Mayor Krista Bernasconi and
Members of the City Council
December 21, 2022
Page 4

In its December 5 Letter, LIUNA claimed without providing any evidence that the Project would result in increased impacts to air quality, energy, greenhouse gas (“GHG”) emissions, and other human health impacts. The Addendum utilized the checklist provided in Appendix G of the CEQA Guidelines for determining whether a project will result in potentially significant impacts to the environment. LIUNA, however, ignores the extensive analysis contained in the Addendum’s “Air Quality” section. For example, the Addendum explained that the Project was evaluated in the City’s General Plan update and associated EIR, and that existing rules and regulations, such as those imposed by the Placer County Air Pollution Control District (“PCAPCD”) would reduce Project impacts. (Addendum, p. 13.) The Addendum further analyzed the change in impacts to reactive organic gases during construction which “remain[] consistent with the development scenarios outlined in the MND.” (Addendum, p. 14.) Finally, the Addendum concluded that permitting requirements under PCAPCD would subject the Project to mitigation measures which would reduce air quality impacts to a less than significant level. (Addendum, p.14.) The Addendum identified the mitigation measures detailed in the IS/MND which would be applicable to the Project addressed in the Addendum. (Addendum, pp. 14-15.) Thus, air quality impacts were adequately addressed in the Addendum.

With respect to energy use, the Addendum explained that the new CEQA requirement to evaluate energy impacts was not required at the time the City adopted the IS/MND. (Addendum, p. 21.) Nonetheless, the IS/MND evaluated the provision of utilities and services, including gas/ electric services based on the General Plan EIR, and included a discussion of EV charging stations and other energy efficient measures incorporated into the Project’s design (see e.g., IS/MND pp. 27-27). This further demonstrates that the CEQA documents prepared for the Project took into consideration information that was known with the exercise of reasonable diligence at the time the IS/MND was adopted, and that the analysis did not indicate the Project would result in a significant energy impact. Given the Project’s consistency with the assumed development for industrial uses under both the City’s General Plan and the Amoruso Ranch Specific Plan, the Project, even with the 50,000 square foot increase remains “consistent with the current citywide assessment of energy demand, and . . . would not result in substantial unplanned demands, nor would it result in inefficient, wasteful, or unnecessary consumption of energy.” This is consistent with the level of analysis advised by Appendix G of the CEQA Guidelines, and it is consistent with CEQA’s requirements for the analysis of subsequent changes to an approved Project. For these reasons, no additional CEQA analysis is warranted.

LIUNA made an unsubstantiated assumption that the Project will result in an increase in GHG emissions which would warrant additional CEQA analysis. However, at the time that the IS/ MND was prepared in 2010, the CEQA Guidelines did not provide thresholds of significance for determining the impacts of GHG emissions. Section 15064.4 of the CEQA Guidelines, which provides such thresholds, became operative on March 18, 2010. The IS/MND was published in April 2010, but the City embarked on the CEQA review process well before the publication date

Mayor Krista Bernasconi and
Members of the City Council
December 21, 2022
Page 5

and operation of Section 15064.4. Amendments to the CEQA Guidelines apply prospectively only and new requirements “will apply to steps in the CEQA process not yet undertaken by the date when agencies must comply with the amendments.” (CEQA Guidelines, § 15007(b).) If a document meets the requirements applicable to the project, “the document shall not need to be revised to conform to any new content requirements in guideline amendments taking effect before the document is finally approved.” (*Id.*, § 15007(c).) Even though new GHG thresholds of significance were later adopted, the 2010 IS/MND evaluated the Project’s potential GHG effects based on the information that was known at that time. The IS/MND evaluated the Project’s incremental contribution to cumulative GHG impacts and identified potential measures to reduce the Project’s contribution as explained on pages 25 and 26 of the 2010 IS/MND. Thus, the City complied with CEQA and there is no evidence that subsequent environmental review was required to address impacts that were already addressed in the adopted IS/MND and Roseville General Plan Update EIR.

Moreover, the Addendum explained why no additional CEQA analysis is required simply because minor modifications are proposed to the project, when the project was approved prior to CEQA’s requirement of GHG analysis. (Addendum, pp. 23-24.) The court in *Citizens Against Airport Pollution v. City of San Jose* (2014) explained that, despite the subsequent addition of Section 15064.4 requiring GHG analysis, an addendum need not analyze such impacts. (*Citizens Against Airport Pollution v. City of San Jose* (2014) 227 Cal.App.4th 788, 806-08.) Additionally, because GHG environmental impacts have widely been known “since the 1970’s,” GHG impacts cannot constitute new information which would require additional CEQA review per Section 15162 of the CEQA Guidelines. (*Id.*, pp. 807-08.) Both the 2010 IS/MND and the Addendum explained this. Thus, no additional CEQA analysis of GHG emission impacts is required.

LIUNA claims in the December 5 Letter that the Project will have vague “human health impacts.” LIUNA provided no evidence to support this assertion. “Human health impacts” is not an environmental factor subject to CEQA review, or a factor contained in the CEQA review checklist. (See CEQA Guidelines, Appendix G.) While it could be possible for other hypothetical environmental impacts to affect human health (e.g. hazardous materials, air quality, etc.), both the Addendum and the adopted IS/MND concluded that the Project would not result in *any* significant environmental impacts, including the environmental effects indirectly related to human health impacts. Moreover, the Addendum explained why the proposed construction and operation of the industrial commerce center buildings would not result in the exposure of individuals to toxic and/or hazardous materials as the Project includes a Risk Management and Prevention Program for those uses that handle specified quantities of toxic and/or hazardous materials (see e.g., page 25 of the Addendum). Thus, the Project will not result in impacts that could adversely affect human health. LIUNA’s vague claim that the Project will result in “human health impacts” is unfounded.

Mayor Krista Bernasconi and
Members of the City Council
December 21, 2022
Page 6

The mitigation measures included in the IS/MND mitigate the Project's air quality impacts to a less than significant level.

The Appellant further claims that, because California Attorney General has identified recommended mitigation measures for warehouse projects in recent years, this allegedly constitutes “new information of substantial importance” and that these mitigation measures are considerably different from those analyzed in the IS/MND, which would prohibit use of an Addendum. Section 15162(a)(3) of the CEQA Guidelines, which Appellant cites, requires these new mitigation measures to be “considerably different” than those previously analyzed in order to warrant preparation of a subsequent MND.

LIUNA's assertion, however, fails to consider the air quality mitigation measures that were adopted as part of the IS/MND, and supported the City's prior determination that the Project would result in a less than significant environmental impact with mitigation incorporated. (IS/MND, pp. 8-9.) The Project is required to comply with Mitigation Measures AQ#1 and AQ#2 which, among other things, imposes specified NO_x, particle emission reduction measures, and the use of low sulfur fuel for all diesel-powered equipment. (Addendum, pp. 14-16.) Further, these mitigation measures require compliance with all current PCAPCD rules and regulations and also require special permits for processes that discharge 2 pounds per day or more of air contaminants. (*Id.*) Some of the PCAPCD regulations achieve the same goals as those identified in the Attorney General's suggested mitigation measures, such as by limiting particulate matter emissions and limiting the emission of specific contaminants. (*See* PCAPCD [Rules and Regulations](#).)

Section 15162(a)(3)(D) of the CEQA Guidelines imposes this “considerably different” requirement on new mitigation measures before a subsequent negative declaration be prepared. The Attorney General's suggested mitigation measures simply are not “considerably different” from the mitigation measures imposed on the Project and recommended in the IS/MND and required by PCAPCD. Appellant's mere recitation of the Attorney General's mitigation measures does not qualify as the substantial evidence necessary to require a subsequent negative declaration. Finally, because the IS/MND explained how all of the Project air quality impacts have already been reduced to a less than significant level and the proposed modifications addressed in the Addendum would not result in a substantial increase in the severity of the previously identified significant air quality impacts, there is no reason to impose different measures from those previously adopted.

The Addendum and IS/MND adequately addressed the Project's impacts to biological resources, and the Project would not result in any new significant impacts.

In its December 5 Letter, Appellant summarizes the findings from a biologist's review of the Project which jumbles a transportation and biological impact analysis to misleadingly suggest

Mayor Krista Bernasconi and
Members of the City Council
December 21, 2022
Page 7

that the Project will result in a certain number of wildlife roadway mortality incidents. This explanation, however, ignores the Addendum's summary of the biological resource impacts discussed in the IS/MND and the Addendum's reference and incorporation of two additional program EIRs prepared in 2020. CEQA requires later activities to be "examined in the light of the program EIR to determine whether an additional environmental document must be prepared." (CEQA Guidelines, § 15168(c).) Later activities found within the scope of the program EIR require no further environmental documents. (*Id.*, § 15168(c)(5).) Thus, a program EIR may be incorporated into a later project to evaluate the project's impacts to "regional influences, secondary effects, cumulative impacts, broad alternatives, and other factors." (*Id.*, § 15168(d)(2).)

Here, the City not only relied on the 2010 IS/MND analysis of biological resources, but it also incorporated by reference into the Addendum the General Plan 2035 EIR (SCH# 2019080418) and the City's 2020 Capital Improvements Program Update EIR (SCH# 2006062086)—both of which anticipated development of the Project site. (Addendum, p. 35.) The General Plan EIR evaluated and addressed impacts due to increases in vehicle miles travelled (VMT). (*See generally* General Plan 2035 EIR, pp. 4.3-6—12.) Thus, the Project's transportation impacts, including those caused by VMT, were adequately addressed. Further, the Addendum included an additional traffic analysis prepared by Fehr and Peers, reviewing the updated Project's trip generation impacts on adjacent roadways. (Addendum, Attachment 2.) With respect to roadway wildlife fatalities, the CEQA Guidelines do not recognize this as an environmental impact. (*See* CEQA Guidelines, Appendix G.) Accordingly, although an analysis of this impact is unwarranted, the project biologist visited the project site on December 15, 2022 and confirmed that few bird species were observed on roads surrounding the project site, and the site is surrounded by urban development with marginal habitat. No federally or state listed bird species were observed on the property. Habitat present on-site offers marginal foraging habitat for raptors as there is a lack of small mammal burrows secondary to site compaction and no raptors were observed during the field visit. Thus, there is no evidence to support the Appellant's biologist's contention that the Project traffic associated with a 50,000 square foot increase in development area would result in 669 roadway wildlife fatalities due to additional traffic (traffic that was previously accounted for in the General Plan Update EIR).

LIUNA also claims that the Project could result in impacts to more special status species than those that were evaluated in the IS/MND. However, Appellant's biologist only states that the site "could attract" certain species and there is a "potential" for such species to be located on the site. Appellant's biologist provides no evidence of any special status species existing on the Project site. Without such evidence, Appellant's argument is merely speculation or unsubstantiated opinion, which CEQA expressly excludes from substantial evidence. (CEQA Guidelines, § 15384(a).)

Mayor Krista Bernasconi and
Members of the City Council
December 21, 2022
Page 8

The Applicant retained a biologist with Adema Environmental to visit the Project site on December 15, 2022. After a thorough evaluation of original project documents, species data from multiple sources, and a site visit conducted by principal biologist Carol Adema to document present day site conditions, Ms. Adema concluded that no new or significantly increased impacts to biological resources would occur with project construction on the Project site. As such, no additional mitigation measures beyond those identified in the adopted IS/MND will be necessary.

As she explains in her letter attached hereto as **Attachment B** and incorporated by this reference, the present day, post-grading and habitat elimination from prior grading activities demonstrates that no wetland or vernal pool features or habitat occupy the project site. Therefore, no new species with potential to occur within the site have been listed, no critical habitat has been designated that may be affected by the proposed project, and no project description changes that would change a level of potential effect were identified. Ms. Adema's letter confirms that there is no suitable habitat present on the project site.

With respect to wetlands, waters of the U.S. and waters of the State, a wetland delineation was conducted for the entire original project area in 2005 and finalized in 2006 identifying 2.028 acres of aquatic features representing jurisdictional WOUS at that time. The feature types were comprised of 9 vernal pool features (0.708 ac), 44 seasonal wetland features (0.687 ac), 7 seasonal swale features (0.246 ac), 3 seasonal marsh features (0.139 ac), and 2 intermittent drainage features (0.248 ac). (**Attachment A in Attachment B: Figure 3 - Original Wetland Delineation Map**). All features were permanently impacted as a result of site grading which occurred in 2014 through 2017. Present day site conditions indicate no wetland features have re-established within the project area. Therefore, the only "aquatic" features on-site are the man-made stormwater treatment swales that lie along the western border of the property, which will not be impacted by project work and are not jurisdictional. Thus, as documented in the Addendum and further confirmed in **Attachment B**, the Project would not result in any new significant or substantially greater impacts to biological resources that would warrant further environmental review.

The Addendum determined that the Project would not result in any air quality impacts.

In its December 7 Letter, Appellant erroneously claims that the Project's air quality analysis was deficient because the Addendum did not include a CalEEMod file that was relied upon as part of the General Plan 2035's environmental analysis. As explained previously, the Addendum incorporated the analysis contained in the General Plan 2035 EIR, consistent with Section 15168(d)(2) of the CEQA Guidelines. That EIR evaluated over 2,300 acres of industrial uses across the City, including on the Project site. (General Plan 2035 EIR, p. 2-30.) This analysis included an assumption of over 370,000 square feet of development capacity with buildout of the General Plan update. Thus, the Project's impacts, including the 50,000 square foot addition, were

Mayor Krista Bernasconi and
Members of the City Council
December 21, 2022
Page 9

adequately analyzed in the General Plan Update EIR, which the Addendum relies upon, and there was no basis to require another air quality analysis or further CEQA review. (Addendum, p. 6.)

Conclusion

The Applicant team appreciates the City's thorough and comprehensive analysis of the Project's environmental impacts in the Blue Oaks Commerce Center IS/MND and Addendum. As we have extensively demonstrated, the Project does not constitute substantial changes from what was analyzed in the IS/MND, and the Project will not result in new significant environmental effects or a substantial increase in the severity of previously identified effects. Accordingly, the Addendum complies with CEQA. We respectfully request that the City reject the LIUNA Appeal and uphold the Planning Commission's adoption of the Addendum and Project approval.

Roseville, California 95678

Re: File Number PL 22-0101; Blue Oaks Commerce Center

Dear Joe:

I am writing on behalf of my client, Schnitzer Properties, project applicant (“Applicant”) for Blue Oaks Commerce Center, File Number 22-0101. Blue Oaks Commerce Center consists of the development of four industrial buildings totaling approximately 310,000 square feet (“Project”), located on two parcels totaling 23.94 acres at 2200, 2301, and 2201 Freedom Way (“Property” or “Project Site”) in the City of Roseville (“City”). On September 22, 2022, the Roseville Planning Commission adopted an addendum (“Addendum”) to a previously adopted Initial Study/Mitigated Negative Declaration (“IS/MND”) and approved a Major Project Permit Stage 1 Modification and Major Project Permit Stage 2 Modification for the Project.

Lozeau Drury, LLP, on behalf of Laborers International Union of North America, Local Union 185 (“LIUNA” or “Appellant”), filed an appeal challenging the Planning Commission’s approval of the Project (“Appeal”). LIUNA never submitted any comments on the IS/MND in 2011, nor did it submit any comments before or at the Planning Commission meeting on the Project. LIUNA first questioned the City’s adoption of the Addendum and the approval of the Project for the first time in its generic Appeal contending that there were different unspecified mitigation measures compared to those identified in the IS/MND that would reduce significant cumulative air quality impacts. LIUNA also suggested the Project’s increased size required major revisions to the IS/MND under the California Environmental Quality Act (“CEQA”) without any evidence.

The purpose of this letter is to address LIUNA’s unsubstantiated assertions, and explain that contrary to LIUNA’s assertions, substantial evidence supports the City’s reliance on the buchalter.com

IS/MND and Addendum. For the reasons discussed further below, we respectfully request that the City Council find that the LIUNA appeal is without merit and should be rejected, based on the finding that the Project approval and adoption of the Addendum are supported by substantial evidence and comply with CEQA.

The Appeal Does Not Provide Substantial Evidence that the Project May Result in Significant Impact(s) on the Environment

Legal Standards for Addendum and Substantial Evidence

When an IS/MND has been prepared and adopted, no further environmental analysis is required unless there are substantial changes to the project and/or the circumstances in which it is being undertaken which require major revisions to the earlier analysis, or new information becomes available at the time of the next discretionary action which was not or could not have been known at the time of the earlier analysis. (Public Resources Code (PRC) § 21166.) The CEQA Guidelines further define substantial changes to the project and/or its circumstances as changes that result in “new significant environmental effects or a substantial increase in the severity of previously identified significant effects.” (14 CCR § 15162(a).) To trigger an MND, CEQA requires that new information be of substantial importance, and show: A) one or more significant effects not previously examined in the IS/MND, B) significant effects previously examined will be substantially more severe, C) mitigation measures previously found to be infeasible would be feasible, or D) mitigation measures or alternatives considerably different from those previously studied would substantially reduce one or more significant effects on the environment, and those mitigation measures were declined by the project. (14 CCR § 15162(a)(3).) The City shall prepare an addendum to the IS/MND if none of the conditions described above have occurred. (14 CCR § 15164(b).)

To demonstrate that the City erred in preparing the Addendum and should have instead prepared a subsequent MND, the Appellant must provide substantial evidence demonstrating substantial changes to the project and/or its circumstances or new information, as defined above by 14 CCR § 15162. Substantial evidence is defined as “enough relevant information and reasonable inferences from this information that a fair argument can be made to support a conclusion, even though other conclusions might also be reached.” (14 CCR § 15384(a).) “Argument, speculation, unsubstantiated opinion” is expressly excluded from substantial evidence. (*Id.*) Substantial evidence includes “facts, reasonable assumptions predicated upon facts, and expert opinion supported by facts.” (14 CCR § 15384(b).)

LIUNA’s Appeal contends that the City should require a subsequent MND for the Project because: 1) new unspecified air quality mitigation measures for distribution centers and warehouses exist which are more robust than those identified in the IS/MND, and 2) because the

project is larger, it results in greater emissions and energy usage that would require further environmental review. LIUNA does not provide any substantial evidence to support either of these arguments, while the analysis provided in the Addendum and the entirety of the record provide substantial evidence that a subsequent MND is not required.

Air Quality Mitigation Measures

As noted above, new information of substantial importance includes mitigation measures which are considerably different from those previously analyzed which would substantially reduce significant effect(s) on the environment but are declined by the project proponents. (14 CCR § 15162(a)(3)(D).) The Appellant asserts that new air quality mitigation measures exist specific to distribution centers and warehouses, but does not identify these measures. Without providing any applicable mitigation measures that purportedly exist (let alone any technical documentation demonstrating that such measures would actually reduce the Project's potential air quality impacts beyond the Project's existing mitigation measures and regulatory compliance), LIUNA is merely speculating that other mitigation measures exist. Under CEQA, such speculation does not constitute substantial evidence.

Even if there were other measures, that alone does not trigger the requirement for subsequent environmental review. If a commenter requests that other mitigation measures be adopted, the CEQA Guidelines require the Project to “decline to adopt the [new] mitigation measure” in order to trigger the preparation of a revised and recirculated IS/MND. (14 CCR § 15162(a)(3).) Even if the Appellant could demonstrate that a new, more effective mitigation measure has been identified, which it has not done, there is no evidence in the Addendum or elsewhere in the record that the Project has declined any new mitigation measures. The Project has accepted and agreed to implement all mitigation measures identified in the IS/MND. Thus, there is no basis to require recirculation of the IS/MND.

By contrast, the Addendum, the IS/MND and the Project technical studies prepared as part of the IS/MND provide extensive analysis demonstrating 1) potential air quality impacts were previously analyzed in the IS/MND which identified mitigation measures to address those potential impacts and mitigate them to a less than significant level; and 2) those mitigation measures are still applicable and were incorporated into the Project. (Addendum, pages 13-16.) The Addendum further incorporates information from the City's 2035 General Plan Update (“GPU”) the GPU Environmental Impact Report (“EIR”) that the City certified in August 2020.¹

¹ Though the EIR found that impacts would be reduced through compliance with PCAPCD and GPU policies, implementation of the GPU would result in a significant unavoidable environmental impact by generating emissions in excess of PCAPCD significance thresholds. The City adopted a statement of overriding considerations when it adopted the GPU. (Addendum, page 13.)

The Addendum states that the Project would be consistent with the GPU, and would comply with Placer County Air Pollution Control District (PCAPCD) and GPU policies, regulations, and permitting requirements. The analysis included in the Addendum concludes that 1) the Project “remains consistent with development scenarios outlined in the MND,” 2) any changes to the Project would not result in new or substantially more severe impacts, and 3) implementation of the air quality mitigation measures identified in the IS/MND would result in less than significant impacts. (Addendum, page 14.) Accordingly, the Addendum is based on substantial evidence and found that the Project does not constitute a substantial change from that analyzed in the IS/MND. Moreover, the City concluded that the adopted IS/MND air quality mitigation measures continue to ensure that the Project would not result in a significant impact. There is no new significant air quality impact, nor is there a substantial increase in the severity of prior identified air quality impacts warranting further environmental review. For this reason, the City Council should reject the LIUNA Appeal.

The Project Does Not Result in Changes that would result in New Significant Impacts or in a Substantial Increase in the Severity of a Prior Impact Warranting Major Revisions to the IS/MND.

The Appellant’s second argument is that because the Project is larger and may result in greater emissions and energy usage, that this alone means that the Project warrants major revisions in the prior IS/MND triggering a subsequent MND. This claim misstates CEQA’s requirements. CEQA defines substantial changes to the Project warranting major revisions to a prior MND as changes causing the involvement of “new significant environmental effects or a substantial increase in the severity of previously identified significant effects.” (14 CCR § 15162(a).) In other words, just because there is a change to the Project, that change may not trigger the need for a major revision to the prior IS/MND.

The Project Addendum extensively analyzes air quality and traffic impacts in support of the conclusion that changes to the Project (even if the size of the buildings have increased) would not result in new or substantially more severe environmental impacts. The Addendum also properly addresses energy usage, noting that the IS/MND was not required to analyze energy effects of the Project because the industrial use was consistent with the existing General Plan’s land use designation, and therefore development with industrial uses, and their associated energy usage, was already anticipated as future development under the existing General Plan for that location. The Addendum further explains that the Project is consistent with subsequent General Plan Update, including citywide assessments of energy demand associated with those changes. As the Project would not result in substantial unplanned demands or in inefficient, wasteful, or unnecessary consumption of energy, energy impacts would be less than significant, and thus would not constitute a substantial change to the Project warranting a major revision to the adopted IS/MND. LIUNA did not provide any evidence to the contrary. For that reason, the City Council

Joseph Speaker
October 20, 2022
Page 5

should reject the LIUNA Appeal on the basis that there is no evidence that the IS/MND required further revision and recirculation. The City fully evaluated all significant impacts in the IS/MND and concluded that the proposed Project would not result in any new significant or substantially more severe air quality, traffic (including truck traffic) and energy impacts.

Conclusion

We appreciate the City's thorough and comprehensive analysis of the Project's environmental impacts in the Blue Oaks Commerce Center IS/MND and Addendum. As we have demonstrated, the Project and its circumstances do not constitute substantial changes, since they do not result in new significant environmental effects or a substantial increase in the severity of previously identified effects. Accordingly, the Addendum is appropriate and there is no basis for the City to require a subsequent MND. We respectfully request that the City reject the LIUNA Appeal and uphold the Planning Commission's adoption of the Addendum and Project approval.

Please let us know if you have any questions regarding our responses to LIUNA's letter.

Regards,

Biological Resources Letter Report

Blue Oaks Commerce Center - 2200 Freedom Way

December 2022

SUMMARY

Schnitzer Properties (Owner) is proposing to complete development of the 575,505 square foot Blue Oaks Commerce Center office, industrial and retail complex (project). The City of Roseville approved the Blue Oaks Commerce Center in 2010. The Owner constructed the first project building in 2015/2016. The Owner proposes to modify the Project to complete the development of four buildings totaling approximately 310,000 square feet. Project activities would occur within Sections 21 & 22, Township 11N, Range 06E, within the Roseville USGS 7.5' Quad, Placer County Assessor's Parcel Number (APN) 017-123-090. (**Attachment A: Figure 1 – Location Map**)

Original project activities were evaluated and approved under an Initial Study/Mitigated Declaration (IS/MND). The IS/MND identified three biological Mitigation Measures (MMs) to mitigate potential project impacts. The mitigation measures generally included the requirement to obtain regulatory permits for habitat elimination, issuance of a grading permit and coverage under the CA Construction General Permit (CGP), and pre-construction presence/absence species surveys prior to construction.

After a thorough evaluation of original project documents, species data from multiple sources, and a site visit conducted by principal biologist Carol Adema to document present day site conditions; the Project biologist concluded that no new or significantly increased environmental impacts would occur secondary to the re-initiation of project activities. As such, no additional MMs beyond those identified in the original project IS/MND will be necessary, though the timing windows mentioned in MM BIO#3 have been updated to reflect present day standards, as discussed in the Conclusions and Recommendations Section.

PROJECT HISTORY & DESCRIPTION

The City of Roseville circulated the IS/MND for public review on April 29, 2010 (SCH# 2010042089), closing for comment on May 29, 2010. Project activities commenced in September 2014 with initial site preparation and grading, including the removal of naturally occurring aquatic features within the entirety of the site, removal of a portion of roadway located on the northwest corner of the project area, installation of stormwater treatment swales along the western border of the property, and concluding in 2017 with the construction of a Federal Bureau of Investigation campus on the southeast corner of the property.

As required by the MMs, the Owner obtained regulatory permits from the U.S. Army Corps of Engineers (USACE), the U.S. Fish & Wildlife Service (USFWS), the CA Regional Water Quality Control Board (RWQCB) (for both Clean Water Act (CWA) and CGP), and the CA Department of Fish and Wildlife. Mitigation credits were then purchased, as stipulated by agency permits. (**Appendix A: Regulatory Permits and Proof of**

Mitigation Purchase) Prior to re-initiation of ground disturbing activities during the migratory bird breeding season, a pre-construction survey was conducted by a qualified biologist with negative findings. **(Appendix B: Pre-construction Survey Report)**

Initial grading and compaction of the undeveloped portion of the site eliminated all 2.028 acres of naturally occurring on-site aquatic features and resulted in the installation of stormwater treatment swales along the western border of the property.

The proposed project will allow the development of four industrial buildings totaling approximately 310,000 square feet in size with associated parking, lighting, and landscaping.

PROJECT SPECIFIC IS/MND BIOLOGICAL MITIGATION MEASURES

- **MITIGATION MEASURE BIO#1:** *Prior to the issuance of a grading permit or approval of improvement plans and prior to the filling of any potential wetlands or waters of the US as identified in the wetland delineation, the applicant shall obtain appropriate permits from the US Army Corps (anticipated to be an Individual Permit). Additionally, a Clean Water Act Section 401 permit shall be obtained from the Central Valley Regional Water Quality Control Board (CVRWQCB) to ensure the proposed discharge complies with all State water quality requirements. Additionally, a Fish and Game Section 1601 permit shall be obtained for streambed alterations that are regulated by Fish & Game. The project shall implement the mitigation requirements of these permits to ensure no net loss of wetlands/waters of the US.*
- **MITIGATION MEASURE BIO#2:** *Prior to grading and excavation activities on-site, the developer shall obtain a grading permit to ensure that the project is in compliance with the City's (Roseville) best management practices for water quality control and the Storm Water Pollution Prevention Plan (SWPPP).*
- **MITIGATION MEASURE BIO#3:** *A qualified biologist shall perform pre-construction surveys for nesting birds and raptors at least 30 days in advance of construction if construction is planned during January to July. If the survey does not identify any special-status birds or raptors species, no further mitigation is required. If nesting is found to be occurring, avoid disturbance of the nest site with a suitable buffer zone. The on-site biologist shall consult with the California Department of Fish & Game to determine the size of the no-disturbance buffer (typically between 150 to 200 feet). Additionally, if Swainson's hawk are found to be using the site in any capacity, off-site mitigation would be required at a ratio deemed suitable by the CDFG.*

METHODS

On December 15, 2022, principal biologist Carol Adema conducted a survey for biological and aquatic resources present on-site within the Biological Survey Area (BSA). The nearly 26-acre BSA was created by buffering the project area a distance sufficient to analyze project impacts on adjacent resources (approximately 250-500 feet). The survey took place from approximately 1200-1600; conditions were cold and sunny with temperatures ranging from the mid- to upper-50's with a very slight north breeze. The results of the site survey and data analysis are provided and discussed on pages 4-9 of this letter report.

Prior to conducting the surveys, past environmental survey reports, maps and documents, existing databases, topographic maps, soil reports, and multiple years of aerial imagery of the BSA were reviewed, and areas of potential habitat noted. Additionally, after conducting the surveys, agency special-status species lists were reviewed, considering existing conditions observed within the BSA both during the season surveyed as well as all other times of year.

Ms. Wallen obtained lists of special-status habitats and/or species potentially occurring in the vicinity of the BSA from the USFWS Information for Planning and Consultation (IPac) as well as the USFWS National Wetlands Inventory (NWI). Additionally, a 5-mile project buffer was applied to execute a search of the CDFW California Natural Diversity Database (CNDDDB), while a 9-quadrant search (Sheridan, Pleasant Grove, Lincoln, Gold Hill, Rocklin, Citrus Heights, Roseville, Rio Linda, and Folsom) was utilized to query the California Native Plant Society's (CNPS) Online Rare and Endangered Plant Inventory. The agency lists are provided as **Appendix C: Supporting Agency Species Lists**. A map of CNDDDB occurrences within 5 miles of the project area may be found as **Attachment A: Figure 2 - CNDDDB Map**.

Ms. Wallen conducted a biological survey of the project area and surrounding habitat to examine the site for potentially sensitive biological resources. Survey methodology involved traversing meandering transects through the project area and surrounding habitat where accessible. The surveys were general in nature and were conducted to determine the presence/absence of special-status species and/or habitats within the BSA and to determine if these resources would be impacted by proposed project activities. After reviewing the original wetland delineation map, areas which had been identified as aquatic habitat prior to site alteration were specifically inspected and evaluated to ensure past features had reestablished. (**Attachment A: Figure 3 – Original Wetland Delineation Map**) A list of species encountered during the survey is included as **Attachment B: Observed Species List** and are discussed in the "Results" section.

Following the field survey, the "potential for occurrence" was determined based on the quality and types of habitats observed on-site. This discussion may be found in the "Results" Section. For plants, assuming suitable habitat is on-site, potential for occurrence is considered during the appropriate flowering period. For birds and bats, the potential for occurrence is considered during the appropriate timeframes when these species breed, forage, roost, over-winter, or stop-over in the BSA during migration. Any bird or bat species could fly over the BSA; however, this is not considered a potential for occurrence as it would not result in any impact. The categories for the potential for occurrence include:

- **None:** The species or natural community is not known to occur and has no potential to occur in the BSA based on sufficient surveys, the lack of suitable habitat (including soil, vegetation, connectivity, etc.), and/or the BSA is well outside of the known distribution of the species.
- **Low:** Potential habitat in the BSA is sub-marginal and the species is not known to occur in the vicinity of the BSA. Protocol-level surveys are not recommended.
- **Moderate:** Suitable habitat is present in the BSA and the species is known to occur in the vicinity of the BSA.
- **High:** Habitat in the BSA is highly suitable for the species and there are reliable records close to the BSA, but the species was not observed.
- **Known:** The species or natural community was detected in the BSA or a recent reliable record exists for the BSA.

EXISTING SITE CONDITIONS

The proposed project area is characterized as vacant, undeveloped land in the southwestern portion of the City of Roseville. The project area is located on the southeast corner of Blue Oaks Blvd. and Industrial Ave. and is bisected by Freedom Way; all observed to have consistent traffic moving quickly during the time of survey. The project area is bordered to the south by an industrial complex and to the east by an office complex and undeveloped field. There is also a rail line located immediately to the west of the site.

There are four man-made vegetated stormwater receiving swales located along the western border of the project area. These areas appear to be in the process of establishing some riparian vegetation, as designed, to treat site runoff water. Additionally, the swale areas are lined with an erosion control fabric that allows root establishment but prevents rodent burrows. As such, no burrows were observed within the stormwater swale areas.

The topography within the project area is characterized as nearly flat, with a gently sloped landscape south and north toward Freedom Way then heading west toward the stormwater receiving swale systems.

Secondary to site grading, habitat elimination, and compaction, no wetland features occupy the project site. Additionally, no small mammal burrows or residual soil/spoil mounds were observed anywhere within the site boundaries.

California habitat types are described in the California Wildlife Habitat Relationships (CWHR) system based on classifications created by Mayer and Laudenslayer (1988). The CWHR system was designed to aid in the mapping of habitats utilized by California's commonly occurring birds, mammals, reptiles, and amphibians. Aside from the created stormwater drainage swale areas, a single habitat type is present within the project area: Annual Grassland, which is described in further detail below. Representative site photos may be found in **Attachment C: Site Photos**.

Annual Grassland:

Annual Grassland habitat occurs throughout the entire project area. It is comprised mostly of sparse non-native annual grasses and herbaceous plant species; likely due to drought conditions combined with the compacted nature of the on-site soil post-grading. Annual grassland habitats can be found throughout California and are found on flat plains to gently rolling foothills. Annual grasslands are described as open grasslands composed primarily of annual plant species and often consist of a variety of introduced invasive species. Species composition is strongly influenced by abiotic factors and compositional changes fluctuate seasonally due to the phenology of plants found within an area. Species commonly found within annual grasslands include wild oats (*Avena fatua*), ripgut brome (*Bromis diandrus*), red brome (*Bromus madritensis*), soft chess (*Bromus hordeaceus*), wild barely (*Hordeum spp.*), foxtail fescue (*Vulpia myuros*), filaree (*Erodium spp.*), and various clovers (*Trifolium spp.*) among others.

A number of wildlife species may use annual grasslands for breeding and foraging if the habitat is suitable.

RESULTS

A table analyzing the potential for presence of a special-status species identified by resources agencies within the project area can be found in **Attachment D: Special Status Species Table**. As stated before, a list of species observed during the survey may be found in **Attachment C: Observed Species List**. Only

species with a known or historical presence on-site, that are state or federally listed, or with a moderate or high potential to occur on-site are analyzed below as part of the Results Section.

The following narrative focuses on a combination of site observations as well as the species identified in agency lists and their potential to occur within the project area. Species and habitat which originally occurred within the project area have been accounted and mitigated for as part of the original Project permitting effort. The IS/MND included applicable MMs that address special-status migratory bird species with potential to occur within the project area. There are no critical habitats within the project area.

Sensitive Natural Communities

No sensitive natural communities (SNCs) were determined to occur within the BSA. Prior to alteration, the project site hosted vernal pool, wetland, intermittent drainage, and marsh areas. However, grading of the site in 2014 successfully eliminated these features, in accordance with applicable regulatory permits. **(Appendix A - Regulatory Permits)** Additionally, though listed as having once occurred within 5 miles of the project area in the CNDDDB list, the site does not contain Alkali SNCs, nor is it adjacent to any Alkali sources/influences.

Secondary to site grading, habitat elimination, and compaction, the site has not re-established any wetland features or any other type of SNC.

Plants

The USFWS IPac listed no potential for federally listed plants within the project area, however, the CNPS list does include Sacramento orcutt grass.

Prior to site alteration, special status plant surveys were conducted on May 15 and June 26, 2006 with negative results for listed species. The December 2022 site visit, though not during the flowering window, shows the site to be inundated with the skeletal remains of invasive species such as medusahead (*Elymus caput-medusae*) and star thistle (*Centaurea solstitialis*). Other species observed on-site included common tarweed (*Hemizonia pungens*) and hairy hawkbit (*Leontodon saxatilis*). No wetland plant species were detected within the project area.

The USFWS evaluated the site for occurrence potential for Sacramento orcutt grass (*Orcuttia viscida*) and slender orcutt grass (*Orcuttia tenuis*). **(Appendix A5: USFWS Concurrence)** On March 18, 2008 the USFWS concluded that,

“The Special-Status Plant Survey did not identify either species occurring on the site, and the Service has determined that the survey was done adequately to demonstrate absence of these species. Therefore, the Service concurs that the proposed project as proposed is not likely to adversely affect the Sacramento orcutt grass and slender orcutt grass.”

The present day, post-grading and habitat elimination yields site conditions consisting of no wetland or vernal pool features. Therefore, in accordance with the USFWS, as no new information has revealed effects of the proposed action that may affect listed species in a manner or to an extent not considered, no new species with potential to occur within the site have been listed, no critical habitat has been designated that may be affected by the proposed project. There are no project description changes that would change a level of potential effect on biological resources. No further action pursuant to the Endangered Species Act is necessary. Similar to the federal ESA, with no habitat or individuals occurring historically and with habitat elimination in 2014 with present day-maintenance, there is no potential for

state-listed endangered or threatened species to occur on-site, and as such coverage under Section 2080 or 2081 of CESA is not warranted.

Invertebrates

Five federally listed invertebrates were found on the official USFWS IPac list: Monarch butterfly (*Danaus plexippus*) [Candidate], valley elderberry longhorn beetle (VELB) (*Desmocerus californicus dimorphus*) [Threatened], conservancy fairy shrimp (*Branchinecta conservatio*) [Endangered], vernal pool fairy shrimp (*Branchinecta lynchi*) [Threatened], and vernal pool tadpole shrimp (*Lepidurus packardii*) [Endangered], collectively, vernal pool crustaceans.

- **Monarch butterfly:** The Monarch overwinters in the coastal CA region and may pass through the region during migrations. The Monarch relies heavily on milkweed and flowering species during migration and breeding. While the site may have provided some flowering plants prior to wetland feature elimination, in its currently maintained state, there is no potential habitat for breeding or foraging monarchs.
- **Valley Elderberry Longhorn Beetle:** The VELB is found exclusively in blue elderberry (*Sambucus nigra* spp. *caerulea*) shrubs in California's Central Valley where the species utilizes the shrubs for all life stages. Females will lay eggs on the bark of the shrub where they hatch and the larvae will bore into a stem where it will live for one to two years, feeding on the pith. After developing, an adult beetle will exit the stem and emerge to seek a mate. The adults are not particularly strong fliers and do not appear to disperse very far.

There are no elderberry shrubs present within the BSA, nor within a distance of work to be impacted. The nearest occurrence of VELB occurrence to the project area is approximately 3.8 miles to the west in the foothill canyon areas. Both historically and in its currently maintained state, there is no potential habitat for VELB in any life stage and therefore no potential for impact.

- **Vernal Pool Crustaceans:** Vernal pool fairy shrimp, vernal pool tadpole shrimp, and conservation fairy shrimp are federally listed and as their name suggests, are dependent upon vernal pool environments.

According to a March 18, 2008 USFWS Letter (**Appendix A5 – USFWS Concurrence**),

“Service guideline-level wet season surveys were completed during the 2005-2006 and 2006-2007 seasons to determine the status of the vernal pool crustaceans on the project site. The Service has determined that, based on the methods and results outlined in the 90-day reports, the surveys were performed adequately and the conditions on the site were appropriate to demonstrate absence of these species on the project site. Therefore, the Service concurs that the proposed project as proposed is not likely to adversely affect the vernal pool crustaceans.”

The above pre-construction USFWS designation combined with post-site alteration conditions that yield no vernal features on-site, confirm there is no potential for vernal pool crustaceans within the project area. Furthermore, now that all vernal features have been removed, there is no potential for vernal pool crustaceans within the site.

Fish

The only federally listed fish species found on the official USFWS list is delta smelt (*Hypomesus transpacificus*). Central Valley steelhead (*Oncorhynchus mykiss*) is found on the CDFW CNDDDB list. Delta

smelt are confined to the Delta region of CA in estuary habitats. Central valley steelhead are found on the Sacramento River and its tributaries, favoring cold and clean water for holding and spawning.

An original feature on-site was an intermittent drainage, but it was incapable of supporting Central valley steelhead. Present day conditions, where the intermittent drainage has been converted to man-made stormwater treatment swales, has further eliminated this area as potential habitat for the lone federally listed species found on the agency lists. Therefore, there is no potential for the species to be affected by the proposed project.

Reptiles and Amphibians

No federally listed species were found on the official USFWS IPac list. One special-status species was returned by the CNDDDB search: the western spadefoot toad (WST) (*Spea hammondi*).

The WST is a relatively small, smooth skinned toad, with white and orange tipped turbercles on its back, and distinctive vertical pupils. It is named for the sharp-edged “spades” on its hind feet utilized for digging. The species occupies grassland, sage scrub, and woodland habitats from Tehama County to Baja. The species is dependent on ephemeral pools or slow-moving water courses that are predator free for breeding. Larval development can be rapid (approximately 30 days) if vernal pools are drying.

There are no vernal features or ephemeral waters found within the project area suitable to support the WST. Additionally, compacted soil would be difficult if not impossible for the WST to dig in, as noted by the absence of small mammal burrows post-grading and compaction. Therefore, the site does not provide suitable WST habitat.

Birds

No federally listed bird species were identified in the IPaC database search though it identified several listed as Birds of Conservation Concern (BCC) which are addressed in **Attachment D**. According to The USFWS, “Although the bird taxa included in the BCC 2021 are priorities for conservation action, this list makes no finding with regard to whether they warrant consideration for ESA listing.” (USFWS, 2021)

A search of CDFW’s CNDDDB identified occurrences of three state-listed threatened species: the CA black rail (CBRA) (*Laterallus jamaicensis coturniculus*), the tricolored blackbird (TRBL) (*Agelaius tricolor*), and the Swainson’s Hawk (SWHA) (*Buteo swainsoni*).

- **CA Black Rail:** The CBRA is known to inhabit saltwater, brackish, and freshwater marshes. In California, the San Francisco Bay/Delta region has all three types of marshes. Vegetation of CBRA marshes varies from almost pure pickleweed (*Salicornia sp.*) to sedges (*Carex sp.*) and saltgrass (*Distichlis sp.*) to bulrush (*Scirpus sp.*) and cattails (*Typha sp.*). In San Francisco Bay marshes the presence of the CBRA is associated with relatively high values for vegetation height, *Frankenia* (alkali-heath) abundance, and insect abundance, but with low values of amphipod abundance (Evens et al. 1986).

The lone occurrence of CBRA within 5 miles of the project area was a single adult male in 2006 located 4.9 miles west of the project area adjacent to Clover creek. Based on the lack of suitable foraging or breeding habitat combined with a lack of known occurrences adjacent to the site, project activities would not result in impacts to the CBRA.

- **Tricolored Blackbird:** Current TRBL species studies indicate that primary foraging habitats for TRBL during the breeding season include grasslands, low density shrublands (e.g., alkali scrub), pastures, dry seasonal pools, and certain agricultural crops including alfalfa and rice”. (CDFW, 2018) Tricolors will not settle without access to open water and dominant nest substrate species for TRBL include cattails, bulrushes, Himalaya blackberry, and agricultural silage. Although other plant species are used as nesting substrate, all are either flooded, spinous or otherwise defended against easy access by predators. Strips of emergent vegetation along canals are typically avoided as nest sites. If sites are hard for an observer to reach, the site it is relatively suitable. (Hamilton, 2004) Studies have also found that, “While breeding, most foraging occurs within 2–3 miles (3.2 - 4.8 km) of colony sites.” (Orians 1961, Hamilton et al. 1992)

Current site conditions do not support nesting or suitable foraging habitat and no suitable nesting habitat or open water exists within 3 miles of the project area. The nearest known occurrence of TRBL to the site is approximately 4 miles to the north. The fact that the site lacks suitable nesting or foraging habitat combined with the distance to the nearest known siting which has not been active since 2015 indicate there is no potential for TRBL, and therefore no potential for project impacts to TRBL.

- **Swainson’s Hawk:** SWHA breeding habitat includes annual grassland areas with scattered trees, large shrubs and is found peripheral to riparian areas. They will often feed in agricultural areas (Goodrich and Smith 2008, p. 120). Young are fed rodents, rabbits, and reptiles. However, when not breeding, adults feed almost exclusively on insects, primarily grasshoppers (Bechard et al. 2010). Areas they inhabit require at least small tracks of adjacent land containing lightly irrigated agricultural areas particularly with alfalfa and grass hay, or non-agricultural areas with low or moderate height vegetated areas (Wheeler 2003, p. 274).

Current site conditions are not conducive to breeding rodent populations and are not adjacent to agricultural areas. No rodents or other small mammals were observed during the site visit and no evidence of established populations (burrows) were noted on-site. This is likely due to soil compaction, which does not allow for burrowing or solid cover plant growth.

Due to a lack of suitable nesting trees or foraging habitat adjacent to or within the site, potential impacts to SWHA are unlikely.

Unlike the species listed above, the BSA may seasonally provide marginal foraging habitat for other avian species protected under the coverage offered by the MTBA. Although a few such species were observed during the survey (**Attachment C: Observed Species**), there was very little avian activity considering the time of day. This is likely due to consistent noise/disturbance from traffic and active railway to the west combined with the sparsely vegetated (and therefore highly exposed) nature of the site, which provides marginal to poor quality foraging habitat for smaller passerine species. This is likely due to the post-site compaction nature of the site which contributes to sparsely vegetated landscape, as seeds have a hard time taking in compacted soil on exposed areas. The site offers poor quality foraging habitat for raptors in general as well; likely due to the lack of small mammal burrows, secondary to site compaction. No raptors nor any prey sources for them (including roadkill) were observed during the field visit. No evidence of raptors utilizing the site for prey was detected (i.e. owl pellets, whitewash, down feathers, etc.).

Mammals

There were no special-status mammals found on any of the agency lists. Some that have potential to occur within the general region, but outside the 5-mile primarily consist of bat species such as hoary bat (*Lasiurus cinereus*), pallid bat (*Antrozous pallidus*), silver-haired bat (*Lasionycteris noctivangans*), western mastiff bat (*Eumops perotis*), and Yuma myotis (*Myotis yumanensis*).

There is no potential roosting habitat on-site and minimal potential roosting habitat located on properties adjacent to the project area for any of these species with the exception of building ledges as there are few trees, all of which are ornamental in nature, and no rocky cliffs found.

There is potential marginal to poor foraging habitat above the grassland within the BSA, however, it is of lower quality than the greater undeveloped areas to the north and wooded foothill areas to the east where a variety of habitats are present providing a more robust prey base.

Aquatic Resources

A wetland delineation was conducted for the entire original project area in 2005 and finalized in 2006 identifying 2.028 acres of aquatic features representing jurisdictional WOUS. The feature types were comprised of 9 vernal pool features (0.708 ac), 44 seasonal wetland features (0.687 ac), 7 seasonal swale features (0.246 ac), 3 seasonal marsh features (0.139 ac), and 2 intermittent drainage features (0.248 ac). **(Attachment A: Figure 3 - Original Wetland Delineation Map).**

All features were permanently removed as a result of site grading which occurred in 2014 through 2017. Present day site conditions indicate no wetland features have re-established within the project area. Only man-made stormwater treatment swales lie along the western border of the property, which will not be impacted by project work and are not jurisdictional.

CONCLUSIONS AND RECOMMENDATIONS

Present day recommendations from various regulatory agencies suggest that for the northern CA region, pre-construction avian surveys should be conducted during the typical migratory bird breeding season from February 1 through August 31 to ensure nesting activities are not disturbed by construction activities. Additionally, surveys should be conducted no more than two weeks in advance of commencement of construction and should be repeated if a lapse in construction of two weeks or greater occurs.

With adherence to the MMs from the original IS/MND including minor modifications to the timing of surveys; impacts to special status species would be eliminated, minimized, and sufficiently mitigated. Consequently, the proposed project would not result in any new significant biological resource impacts or in a substantial increase in the severity of the previously identified biological resource impacts described in the IS/MND. No additional mitigation measures are required.

ATTACHMENT D:
SPECIAL-STATUS SPECIES AND SENSITIVE NATURAL COMMUNITY EVALUATION

An analysis of special-status species listed by various agency sources with potential to occur in the survey area.

Common Name (Scientific Name)	Status Fed/State/ CNPS	Associated Habitats	Potential for Occurrence*
SENSITIVE NATURAL COMMUNITIES			
Alkali Meadow	__/_/SNC/_	Characterized by fine-grained soils that have a high residual salt content supporting a distinctive, salt tolerant plant community.	<u>None:</u> Does not occur within the BSA.
Alkali Seep	__/_/SNC/_	A seep of saline water with an area of alkali salt crystals that form when the salty water reaches the surface and evaporates.	<u>None:</u> Does not occur within the BSA.
Northern Hardpan Vernal Pool	__/_/SNC/_	Seasonally flooded depressions on impermeable soils or rock.	<u>None:</u> Any potential habitat removed (filled) 9/2014.
Northern Volcanic Mud Flow Vernal Pool	__/_/SNC/_	Seasonally flooded depressions on impermeable soils or rock.	<u>None:</u> Any potential habitat removed (filled) 9/2014.
PLANTS			
Ahart's dwarf rush (<i>Juncus leiospermus</i> var. <i>ahartii</i>)	__/_/S1	Valley and foothill grassland (mesic).	<u>None:</u> Any potential habitat removed (filled) 9/2014.
Big-scale Balsam Root (<i>Balsamorhiza macrolepis</i>)	__/_/S2	Cismontane woodlands and chaparral. Valley and Foothill grasslands. Sometimes serpentinite. (Mar-June)	<u>None:</u> No suitable habitat within the BSA.
Boggs Lake hedge-hyssop (<i>Gratiola heterosepala</i>)	__/_/S2	Marshes and swamps (shallow freshwater) and vernal pools. (Apr-Aug)	<u>None:</u> Any potential habitat removed (filled) 9/2014.
Brandegee's clarkia (<i>Clarkia biloba</i> spp. <i>brandegeae</i>)	__/_/S4	Chaparral, cismontane woodland. Lower montane coniferous forest. (May-Jun)	<u>None:</u> No suitable habitat within the BSA.
bristly leptosiphon (<i>Leptosiphon aureus</i>)	__/_/S4	Chaparral, cismontane woodland. Coastal prairie. Valley and foothill grassland. (Apr-Jun)	<u>None:</u> No suitable habitat within the BSA.
Dwarf downingia (<i>Downingia pusilla</i>)	__/_/S2	Valley and foothill grassland (mesic). Vernal pools. (Mar-May)	<u>None:</u> Any potential habitat removed (filled) 9/2014.
hispid salty bird's-beak (<i>Chloropyron mole</i> ssp. <i>hispidum</i>)	__/_/S1	Meadows and seeps. Playas. Valley and foothill grassland (Jun-Sep)	<u>None:</u> Any potential habitat removed (filled) 9/2014.
legenere (<i>Legenere limosa</i>)	__/_/S2	Vernal Pools. (Apr-Jun)	<u>None:</u> Any potential habitat removed (filled) 9/2014.
pincushion navarretia (<i>Navarretia myersii</i> ssp. <i>myersii</i>)	__/_/S2	Vernal Pools. (Apr-Jun)	<u>None:</u> Any potential habitat removed (filled) 9/2014.

ATTACHMENT D - SPECIAL-STATUS SPECIES AND SENSITIVE NATURAL COMMUNITY EVALUATION

Common Name (Scientific Name)	Status Fed/State/ CNPS	Associated Habitats	Potential for Occurrence*
Red Bluff Dwarf Rush (<i>Juncus leiospermus</i> var. <i>leiospermus</i>)	___/___/1B.1	Chaparral, cismontane woodland, meadows and seeps, valley and foothill grassland and vernal pools/vernally mesic habitats. (Mar-May)	<u>None</u> : No mesic habitat present within the BSA.
Sacramento Orcutt grass (<i>Orcuttia viscida</i>)	FE/CE/S1	Vernal Pools. (Apr-Jul)	<u>None</u> : Any potential habitat removed (filled) 9/2014.
Sanford's arrowhead (<i>Sagittaria sanfordii</i>)	___/___/S3	Marshes and swamps (shallow freshwater). (May-Oct)	<u>None</u> : No suitable habitat present within the BSA.
stinkbells (<i>Fritillaria agrestis</i>)	___/___/S3	Chaparral, cismontane woodland. Pinyon and juniper woodland. Valley and foothill grassland. (Mar-Jun)	<u>None</u> : No suitable marsh habitat present within the BSA.
valley brodiaea (<i>Brodiaea rosea</i> ssp. <i>Vallicola</i>)	___/___/S3	Valley and foothill grassland; vernal pools. (Apr-May)	<u>None</u> : Any potential habitat removed (filled) 9/2014.
INVERTEBRATES			
Andrenid bee (<i>Andrena subapasta</i>)	___/___/S1S2	Solitary ground nesters found where the flowering plants they pollinate occur.	<u>None</u> : Compacted soil and removal of vernal features eliminates suitable habitat within the BSA.
California Linderiella (<i>Linderiella occidentalis</i>)	___/___/___	Vernal pools, swales, and ephemeral freshwater habitat.	<u>None</u> : Any potential habitat removed (filled) 9/2014.
Conservancy Fairy Shrimp (<i>Branchinecta conservatio</i>)	FE/___/___	Moderately turbid, deep, cool-water vernal pool	<u>None</u> : Any potential habitat removed (filled) 9/2014.
Monarch Butterfly (<i>Danaus plexippus</i>)	Candidate/ ___/S2S3	Overwinters on CA coast, migrates through valley feeding on milkweed.	<u>Low</u> : No milkweed or historical occurrences on- site. Individuals may pass through, but no potential habitat is found in the BSA.
Ricksecker's water scavenger beetle (<i>Hydrochara rickseckeri</i>)	___/___/___	Vernal pools and other aquatic habitats in the Central Valley.	<u>None</u> : Any potential habitat removed (filled) 9/2014.
Valley Elderberry Longhorn Beetle (<i>Desmocerus californicus dimorphus</i>)	FT/___/___	Blue elderberry shrubs usually associated with riparian areas.	<u>None</u> : No elderberry plants (the sole host plant of this beetle) occur within or adjacent to the BSA.
Vernal Pool Fairy Shrimp (<i>Branchinecta lynchi</i>)	FT/___/___	Vernal pools, swales, and ephemeral freshwater habitat.	<u>None</u> : Any potential habitat removed (filled) 9/2014.
Vernal Pool Tadpole Shrimp (<i>Lepidurus packardii</i>)	FE/___/___	Vernal pools, swales, and ephemeral freshwater habitat.	<u>None</u> : Any potential habitat removed (filled) 9/2014.
FISH			
Delta Smelt (<i>Hypomesus transpacificus</i>)	FT/ST/___	Sacramento River Delta and tributaries.	<u>None</u> : No suitable or critical habitat within the BSA.
Central Valley Steelhead (<i>Oncorhynchus mykiss</i>)	FT/___/___	Sacramento and San Joaquin Rivers and their tributaries.	<u>None</u> : No suitable or critical habitat within the BSA.

ATTACHMENT D - SPECIAL-STATUS SPECIES AND SENSITIVE NATURAL COMMUNITY EVALUATION

Common Name (Scientific Name)	Status Fed/State/ CNPS	Associated Habitats	Potential for Occurrence*
AMPHIBIANS			
Western Spadefoot (<i>Spea hammondi</i>)	___/SSC/___	Grassland and woodland and vernal pools without aquatic predators for breeding.	<u>None</u> : Any potential habitat removed (filled) 9/2014.
BIRDS			
Bald Eagle (<i>Haliaeetus leucocephalus</i>)	MBTA & EA/SE/___	Lakes, rivers, estuaries, reservoirs, and some coastal habitats.	<u>None</u> : No suitable habitat present within the BSA.
Belding's Savannah Sparrow (<i>Passerculus sandwichensisbeldingi</i>)	BCR/___/___	Uncommon and local in saltmarshes of coastal southern CA.	<u>None</u> : No suitable nesting habitat present within the BSA.
Burrowing Owl (<i>Athene cunicularia</i>)	___/SSC/___	Nests in burrows in the ground, often in old ground squirrel or badger burrows, w/in open dry grassland & desert habitat.	<u>None</u> : Any potential habitat removed (filled) 9/2014.
Bullock's Oriole (<i>Icterus bullockii</i>)	BCR/___/___	Breed in riparian and open woodlands, including urban parks.	<u>None</u> : Species may pass through site, but no suitable nesting or foraging habitat exists w/in the project area.
California Black Rail (<i>Laterallus jamaicensis coturniculus</i>)	MBTA/ST/___	Yearlong resident of saline, brackish, & fresh emergent wetlands in the San Francisco Bay Area, Sacramento-San Joaquin Delta, coastal Southern CA, the Salton Sea, & lower Colorado River area.	<u>None</u> : No suitable habitat present within the BSA.
California Gull (<i>Larus californicus</i>)	BCC/___/___	Common on ponds, lakes, and coastlines. Often also seen foraging on ag lands or loitering around restaurants, parking lots, and city parking lots looking for food.	<u>Low</u> : Species may pass over site, but no suitable nesting or foraging habitat exists within the project area.
Common Yellowthroat (<i>Geothlypis trichas sinuosa</i>)	BCR/___/___	Common in a wide variety of weedy, brushy, and marshy habitats; nearly always in low wet areas.	<u>None</u> : Any potential habitat removed (filled) 9/2014.
Golden Eagle (<i>Aquila chrysaetos</i>)	MBTA & EA/SE/___	Rare in grasslands, deserts, and other open country relatively far from people, usually in mountainous areas.	<u>None</u> : Suitable habitat is not present within the BSA.
grasshopper sparrow (<i>Ammodramus savannarum</i>)	___/SSC/___	Common locally in grasslands w/scattered shrubs or weeds. Solitary and secretive; difficult to see except when singing.	<u>None</u> : Any potential habitat removed (filled) 9/2014.
Lawrence's Goldfinch (<i>Carduelis lawrencei</i>)	BCC/___/___	Remote, arid habitats of California and the Desert Southwest.	<u>None</u> : Suitable habitat is not present within the BSA.
Long-eared Owl (<i>asio otus</i>)	BCC/___/___	Uncommon. Nests in old barns and other structures. Strictly nocturnal.	<u>None</u> : Suitable habitat is not present within the BSA.
Nuttall's Woodpecker (<i>Picoides nuttallii</i>)	BCR/___/___	Uncommon. Oak and riparian woodlands.	<u>None</u> : Any potential habitat removed (filled) 9/2014.
Oak Titmouse (<i>Baeolophus inornatus</i>)	BCC/___/___	Common in open oak woods or nearby trees. Feeds on seeds and insects.	<u>None</u> : Suitable habitat is not present within the BSA.

ATTACHMENT D - SPECIAL-STATUS SPECIES AND SENSITIVE NATURAL COMMUNITY EVALUATION

Common Name (Scientific Name)	Status Fed/State/ CNPS	Associated Habitats	Potential for Occurrence*
Olive-sided Flycatcher (<i>Contopus cooperi</i>)	BCC/___/___	Uncommon. Found in boreal forests.	<u>None</u> : Suitable habitat is not present within the BSA.
Purple Martin (<i>Progne subis</i>)	___/SSC/___	Uncommon and local. Nests almost exclusively in man-made martin boxes placed in the open near water; also nests in tree cavities.	<u>None</u> : Suitable habitat is not present within the BSA.
Short-billed Dowitcher (<i>Limnodromus griseus</i>)	BCC/___/___	Common on mudflats and shallow muddy ponds along coast; uncommon to rare inland.	<u>None</u> : Suitable habitat is not present within the BSA.
Swainson's Hawk (<i>Buteo swainsoni</i>)	___/ST/___	Nests in isolated trees or riparian woodlands adjacent to suitable foraging habitat including grasslands or suitable grain or alfalfa fields, or livestock pastures.	<u>Low</u> : Species may pass over site, but no suitable nesting habitat exists within the project area.
Tri-colored Blackbird (<i>Agelaius tricolor</i>)	BCC/SSC/___	Nests in dense blackberry, cattail, tules, willow, or wild rose within emergent wetlands throughout the Central valley and foothills surrounding the valley.	<u>None</u> : No suitable nesting habitat present within the BSA.
Wrentit (<i>Chamaea fasciata</i>)	BCC/___/___	Common but difficult to see in chaparral and other dense brushy habitats.	<u>None</u> : Suitable habitat is not present within the BSA.
Yellow-billed Magpie (<i>Pica nuttalli</i>)	BCC/___/___	Common in oak savannas within limited range.	<u>None</u> : Suitable habitat is not present within the BSA.
Migratory Birds and Raptors	MBTA	Nest and forage in a variety of habitats including hardwood woodlands, coniferous forests, meadows, grasslands, and riparian.	<u>Low</u> : Birds protected by the MBTA were observed on-site, however, site provides poor nesting habitat and marginal foraging habitat.
<u>CODE DESIGNATIONS</u> CE = Candidate Endangered FE = Federally-listed Endangered FT = Federally-listed Threatened FC = Federal Candidate Species BCC = Federal Bird of Conservation Concern MBTA = protected by the federal Migratory Bird Treaty Act SE = State-listed Endangered ST = State-listed Threatened SH = Presumed extinct in California SSC = CDFW Species of Special Concern FP = CDFW Fully Protected Species SNC = CDFW Sensitive Natural Community CNPS 1B = Rare or Endangered in California or elsewhere CNPS 2 = rare or Endangered in California, more common elsewhere CNPS 3 = More information is needed CNPS 4 = Plants with limited distribution BCC = Birds of Conservation Concern BCR = Bird of Conservation Concern only in particularly Bird Conservation Regions in the continental USA *Potential for occurrence: for plants it is considered the potential to occur during the survey period; for birds and bats it is considered the potential to breed, forage, roost, over-winter, or stop-over in the BSA during migration. Any bird or bat species could fly over the BSA, but this is not considered a potential for occurrence. The categories for the potential for occurrence include:			

ATTACHMENT D - SPECIAL-STATUS SPECIES AND SENSITIVE NATURAL COMMUNITY EVALUATION

Common Name (<i>Scientific Name</i>)	<u>Status</u> Fed/State/ CNPS	Associated Habitats	Potential for Occurrence*
<u>None</u>: The species or natural community is known not to occur, and has no potential to occur in the BSA based on sufficient surveys, the lack of suitable habitat, and/or the BSA is well outside of the known distribution of the species. <u>Low</u>: Potential habitat in the BSA is sub-marginal and the species is not known to occur in the vicinity of the BSA. Protocol-level surveys are not recommended. <u>Moderate</u>: Suitable habitat is present in the BSA and the species is known to occur in the vicinity of the BSA. <u>High</u>: Habitat in the BSA is highly suitable for the species and there are reliable records close to the BSA, but the species was not observed. <u>Known</u>: Species was detected in the BSA or a recent reliable record exists for the BSA.

DEPARTMENT OF THE ARMY
U.S. ARMY ENGINEER DISTRICT, SACRAMENTO
CORPS OF ENGINEERS
1325 J STREET
SACRAMENTO CA 95814-2922

REPLY TO
ATTENTION OF

DEPARTMENT OF THE ARMY PERMIT

Permittee: Mr. J. Randy Kyte
Harsch Investment Properties-II, LLC
P.O. Box 2708
Portland, Oregon 97208-2708

Permit Number: SPK-2005-00307

Issuing Office: U.S. Army Engineer District, Sacramento
Corps of Engineers
1325 "J" Street
Sacramento, California 95814-2922

NOTE: The term "you" and its derivatives, as used in this permit, means the permittee or any future transferee. The term "this office" refers to the appropriate district or division office of the Corps of Engineers having jurisdiction over the permitted activity or the appropriate official of that office acting under the authority of the commanding officer.

You are authorized to perform work in accordance with the terms and conditions specified below. A notice of appeal options is enclosed.

Project Description:

To impact 2.038 acres of waters of the United States (0.708 acres vernal pools and 1.33 acres seasonal wetlands), including wetlands regulated under Section 404 of the Clean Water Act, to construct a commercial and industrial business park (Blue Oaks Commerce Center) by developing 49.4 acres with 17 buildings totaling 575,505 square feet, providing a mix of office, industrial and commercial uses, and grading, parking, landscaping and lighting improvements. The local drainage through the western portion of the projects site will be realigned for water quality treatment per the drawing "Preliminary Grading Plan, Blue Oaks Commercial Center, City of Roseville, County of Placer, State of California, April 28, 2008, updated December 19, 2008". The property is located in Sections 21 & 22, Township 11 North, Range 6 East, MDB&M, in the City of Roseville, in Placer County, California.

Compensation for these impacts, a total of 2.038 acres of wetlands will be purchased at the Corps' approved Toad Hill Mitigation Bank in Placer County.

All work is to be completed in accordance with the enclosed plan(s).

Project Location:

The project site is an infill property bounded on the north by Blue Oaks Boulevard, on the west by Industrial Avenue, on the east by Washington Boulevard, and the south by an existing industrial complex in Sections 21 & 22, Township 11 North, Range 6 East, MDB&M, in the City of Roseville, in Placer County, California.

Permit Conditions:

General Conditions:

1. The time limit for completing the work authorized ends on August 19, 2016. If you find that you need more time to complete the authorized activity, submit your request for a time extension to this office for consideration at least one month before the above date is reached.
2. You must maintain the activity authorized by this permit in good condition and in conformance with the terms and conditions of this permit. You are not relieved of this requirement if you abandon the permitted activity, although you may make a good faith transfer to a third party in compliance with General Condition 4 below. Should you wish to cease to maintain the authorized activity or should you desire to abandon it without a good faith transfer, you must obtain a modification of this permit from this office, which may require restoration of the area.
3. If you discover any previously unknown historic or archeological remains while accomplishing the activity authorized by this permit, you must immediately notify this office of what you have found. We will initiate the Federal and state coordination required to determine if the remains warrant a recovery effort or if the site is eligible for listing in the National Register of Historic Places.
4. If you sell the property associated with this permit, you must obtain the signature of the new owner in the space provided and forward a copy of the permit to this office to validate the transfer of this authorization.
5. If a conditioned water quality certification has been issued for your project, you must comply with the conditions specified in the certification as special conditions to this permit. For your convenience, a copy of the certification is attached if it contains such conditions.
6. You must allow representatives from this office to inspect the authorized activity at any time deemed necessary to ensure that it is being or has been accomplished in accordance with the terms and conditions of your permit.

Special Conditions:

1. To insure your project complies with the Federal Endangered Species Act, you must implement all of the mitigating measures identified in the enclosed Fish and Wildlife Service letter of

concurrence (Number 81420-2008-I-0286-1, dated March 18, 2008), including those ascribed to the Corps therein. If you are unable to implement any of these measures, you must immediately notify this office and the Fish and Wildlife Office so we may consult as appropriate, prior to initiating the work, in accordance with Federal law.

2. To mitigate for the loss of 2.038 acres of waters of the United States you shall purchase 0.708 credits of vernal pool and 1.33 credits of seasonal wetland at Toad Hill Mitigation Bank, a Corps approved wetland mitigation bank. Evidence of this purchase shall be provided to this office prior to proceeding with any activity otherwise authorized by this permit.

3. All terms and conditions of the 24 August 2010 Section 401 Water Quality Certification are expressly incorporated as conditions of this permit.

4. You shall design all crossings of waters of the United States as indicated on the preliminary grading plans dated 19 December 2008, which will accommodate expected high flows. You shall submit detailed plans for these crossings to the Corps of Engineers for approval prior to beginning construction

Further Information:

1. Congressional Authorities: You have been authorized to undertake the activity described above pursuant to:

☐ Section 10 of the Rivers and Harbors Act of 1899 (33 U.S.C. 403).

☒ Section 404 of the Clean Water Act (33 U.S.C. 1344).

☐ Section 103 of the Marine Protection, Research and Sanctuaries Act of 1972 (33 U.S.C. 1413).

2. Limits of this authorization.

a. This permit does not obviate the need to obtain other Federal, state, or local authorizations required by law.

b. This permit does not grant any property rights or exclusive privileges.

c. This permit does not authorize any injury to the property or rights of others.

d. This permit does not authorize interference with any existing or proposed Federal projects.

3. Limits of Federal Liability. In issuing this permit, the Federal Government does not assume any liability for the following:

- a. Damages to the permitted project or uses thereof as a result of other permitted or unpermitted activities or from natural causes.
- b. Damages to the permitted project or uses thereof as a result of current or future activities undertaken by or on behalf of the United States in the public interest.
- c. Damages to persons, property, or to other permitted or unpermitted activities or structures caused by the activity authorized by this permit.
- d. Design or construction deficiencies associated with the permitted work.
- e. Damage claims associated with any future modification, suspension, or revocation of this permit.

4. Reliance on Applicant's Data. The determination of this office that issuance of this permit is not contrary to the public interest was made in reliance on the information you provided.

5. Reevaluation of Permit Decision. This office may reevaluate its decision on this permit at any time the circumstances warrant.

Circumstances that could require a reevaluation include, but are not limited to, the following:

- a. You fail to comply with the terms and conditions of this permit.
- b. The information provided by you in support of your permit application proves to have been false, incomplete, or inaccurate (see 4 above).
- c. Significant new information surfaces which this office did not consider in reaching the original public interest decision.

Such a reevaluation may result in a determination that it is appropriate to use the suspension, modification, and revocation procedures contained in 33 CFR 325.7 or enforcement procedures such as those contained in 33 CFR 326.4 and 326.5. The referenced enforcement procedures provide for the issuance of an administrative order requiring you comply with the terms and conditions of your permit and for the initiation of legal action where appropriate. You will be required to pay for any corrective measures ordered by this office, and if you fail to comply with such directive, this office may in certain situations (such as those specified in 33 CFR 209.170) accomplish the corrective measures by contract or otherwise and bill you for the cost.

6. Extensions. General Condition 1 establishes a time limit for the completion of the activity authorized by this permit. Unless there are circumstances requiring either a prompt completion of the authorized activity or a reevaluation of the public interest decision, the Corps will normally give favorable consideration to a request for an extension of this time limit.

Your signature below, as permittee, indicates that you accept and agree to comply with the terms and conditions of this permit.

**CLEAN WATER ACT §401 TECHNICALLY CONDITIONED WATER QUALITY
CERTIFICATION FOR DISCHARGE OF DREDGED AND/OR FILL MATERIALS FOR THE
BLUE OAKS COMMERCE CENTER (or BLUE OAKS-WASHINGTON) PROJECT,
(WDID#5A31CR00297) PLACER COUNTY**

This Order responds to your 23 June 2010 application submittal for the Water Quality Certification of a commercial and industrial development project impacting approximately 2.038 acres/1,345 linear feet of waters of the United States.

WATER QUALITY CERTIFICATION STANDARD CONDITIONS:

1. This certification action is subject to modification or revocation upon administrative or judicial review, including review and amendment pursuant to §13330 of the California Water Code and §3867 of Title 23 of the California Code of Regulations (23 CCR).
2. This certification action is not intended and shall not be construed to apply to any discharge from any activity involving a hydroelectric facility requiring a Federal Energy Regulatory Commission (FERC) license or an amendment to a FERC license unless the pertinent certification application was filed pursuant to 23 CCR subsection 3855(b) and the application specifically identified that a FERC license or amendment to a FERC license for a hydroelectric facility was being sought.
3. The validity of any non-denial certification action shall be conditioned upon total payment of the full fee required under 23 CCR §3833, unless otherwise stated in writing by the certifying agency.
4. Certification is valid for the duration of the described project. This certification is no longer valid if the project (as currently described) is modified, or coverage under Section 404 of the Clean Water Act has expired.

California Environmental Protection Agency

ADDITIONAL TECHNICALLY CONDITIONED CERTIFICATION CONDITIONS:

In addition to the four standard conditions, Harsch Investment Properties, LLC shall satisfy the following:

1. Harsch Investment Properties, LLC shall notify the Central Valley Water Quality Control Board (Central Valley Water Board) in writing 7 days in advance of the start of any in-water activities.
2. Except for activities permitted by the U.S. Army Corps under §404 of the Clean Water Act, soil, silt, or other organic materials shall not be placed where such materials could pass into surface water or surface water drainage courses.
3. All areas disturbed by project activities shall be protected from washout or erosion.
4. Harsch Investment Properties, LLC shall maintain a copy of this Certification and supporting documentation (Project Information Sheet) at the Project site during construction for review by site personnel and agencies. All personnel (employees, contractors, and subcontractors) performing work on the proposed project shall be adequately informed and trained regarding the conditions of this Certification.
5. All temporarily affected areas will be restored to pre-construction contours and conditions upon completion of construction activities.
6. Harsch Investment Properties, LLC shall perform surface water sampling: 1) When performing any in-water work; 2) In the event that project activities result in any materials reaching surface waters or; 3) When any activities result in the creation of a visible plume in surface waters. The following monitoring shall be conducted immediately upstream out of the influence of the project and 300 feet downstream of the active work area. Sampling results shall be submitted to this office within two weeks of initiation of sampling and every two weeks thereafter. The sampling frequency may be modified for certain projects with written permission from the Central Valley Water Board.

Parameter	Unit	Type of Sample	Frequency of Sample
Turbidity	NTU	Grab	Every 4 hours during in water work
Settleable Material	ml/l	Grab	Same as above.
Visible construction related pollutants	Observations	Visible Inspections	Continuous throughout the construction period

7. Activities shall not cause turbidity increases in surface water to exceed:
- (a) where natural turbidity is less than 1 Nephelometric Turbidity Units (NTUs), controllable factors shall not cause downstream turbidity to exceed 2 NTU;
 - (b) where natural turbidity is between 1 and 5 NTUs, increases shall not exceed 1 NTU;
 - (c) where natural turbidity is between 5 and 50 NTUs, increases shall not exceed 20 percent;
 - (d) where natural turbidity is between 50 and 100 NTUs, increases shall not exceed 10 NTUs;
 - (e) where natural turbidity is greater than 100 NTUs, increases shall not exceed 10 percent.

Except that these limits will be eased during in-water working periods to allow a turbidity increase of 15 NTU over background turbidity as measured in surface waters 300 feet downstream from the working area. In determining compliance with the above limits, appropriate averaging periods may be applied provided that beneficial uses will be fully protected. Averaging periods may only be assessed by prior permission of the Central Valley Water Board.

8. Activities shall not cause settleable matter to exceed 0.1 ml/l in surface waters as measured in surface waters 300 feet downstream from the project.
9. The discharge of petroleum products or other excavated materials to surface water is prohibited. Activities shall not cause visible oil, grease, or foam in the work area or downstream. Harsch Investment Properties, LLC shall notify the Central Valley Water Board immediately of any spill of petroleum products or other organic or earthen materials.
10. Harsch Investment Properties, LLC shall notify the Central Valley Water Board immediately if the above criteria for turbidity, settleable matter, oil/grease, or foam are exceeded.
11. Harsch Investment Properties, LLC shall comply with all California Department of Fish and Game 1600 requirements for the project.
12. Harsch Investment Properties, LLC must obtain coverage under the NPDES General Permit for Storm Water Discharges Associated with Construction and Land Disturbance Activities issued by the State Water Resources Control Board for any project disturbing an area of 1 acre or greater.
13. The Conditions in this water quality certification are based on the information in the attached "Project Information." If the information in the attached Project Information is modified or the project changes, this water quality certification is no longer valid until amended by the Central Valley Water Board.
14. In the event of any violation or threatened violation of the conditions of this Order, the violation or threatened violation shall be subject to any remedies, penalties, process, or sanctions as provided for under State law and section 401 (d) of the federal Clean Water Act. The applicability of any State law authorizing remedies, penalties, process, or sanctions for the violation or threatened violation constitutes a limitation necessary to ensure compliance with this Order.

- a. If Harsch Investment Properties, LLC or a duly authorized representative of the project fails or refuses to furnish technical or monitoring reports, as required under this Order, or falsifies any information provided in the monitoring reports, the applicant is subject to civil, for each day of violation, or criminal liability.
 - b. In response to a suspected violation of any condition of this Order, the Central Valley Water Board may require Harsch Investment Properties, LLC to furnish, under penalty of perjury, any technical or monitoring reports the Central Valley Water Board deems appropriate, provided that the burden, including cost of the reports, shall be in reasonable relationship to the need for the reports and the benefits to be obtained from the reports.
 - c. Harsch Investment Properties, LLC shall allow the staff(s) of the Central Valley Water Board, or an authorized representative(s), upon the presentation of credentials and other documents, as may be required by law, to enter the project premises for inspection, including taking photographs and securing copies of project-related records, for the purpose of assuring compliance with this certification and determining the ecological success of the project.
15. Harsch Investment Properties, LLC shall provide a Notice of Completion (NOC) no later than 30 days after the project completion. The NOC shall demonstrate that the project has been carried out in accordance with the project's description (and any amendments approved). The NOC shall include a map of the project location(s), including final boundaries of any in situ restoration area(s), if appropriate, and representative pre and post construction photographs. Each photograph shall include a descriptive title, date taken, photographic site, and photographic orientation.
16. The mitigation measures specified in the mitigation monitoring and reporting program for the approved Mitigated Negative Declaration as they pertain to hydrology and water quality impacts, are included in this Water Quality Certification, as required by California Public Resource Code Section 21081.6 and CEQA Guidelines, California Code of Regulations Section 15097

ADDITIONAL STORM WATER QUALITY CONDITIONS:

Harsch Investment Properties, LLC shall also satisfy the following additional storm water quality conditions:

1. During the construction phase, Harsch Investment Properties, LLC must employ strategies to minimize erosion and the introduction of pollutants into storm water runoff. These strategies must include the following:
 - (a) the Storm Water Pollution Prevention Plan (SWPPP) must be prepared during the project planning and design phases and implemented, as appropriate, before construction;
 - (b) an effective combination of erosion and sediment control Best Management Practices (BMPs) must be implemented and adequately working prior to the rainy season and during all phases of construction.
2. Harsch Investment Properties, LLC must minimize the short and long-term impacts on receiving water quality from the Blue Oaks Commerce Center (aka Blue Oaks-

Washington) Project by implementing the following post-construction storm water management practices and as required by the local agency permitting the project, as appropriate:

- (a) minimize the amount of impervious surface;
 - (b) reduce peak runoff flows;
 - (c) provide treatment BMPs to reduce pollutants in runoff;
 - (d) ensure existing waters of the State (e.g., wetlands, vernal pools, or creeks) are not used as pollutant source controls and/or treatment controls;
 - (e) preserve and, where possible, create or restore areas that provide important water quality benefits, such as riparian corridors, wetlands, and buffer zones;
 - (f) limit disturbances of natural water bodies and natural drainage systems caused by development (including development of roads, highways, and bridges);
 - (g) use existing drainage master plans or studies to estimate increases in pollutant loads and flows resulting from projected future development and require incorporation of structural and non-structural BMPs to mitigate the projected pollutant load increases in surface water runoff;
 - (h) identify and avoid development in areas that are particularly susceptible to erosion and sediment loss, or establish development guidance that protects areas from erosion/ sediment loss;
 - (i) control post-development peak storm water run-off discharge rates and velocities to prevent or reduce downstream erosion, and to protect stream habitat.
3. Harsch Investment Properties, LLC must ensure that all development within the project provides verification of maintenance provisions for post-construction structural and treatment control BMPs and as required by the local agency permitting the project. Verification shall include one or more of the following, as applicable:
- (a) the developer's signed statement accepting responsibility for maintenance until the maintenance responsibility is legally transferred to another party; or
 - (b) written conditions in the sales or lease agreement that require the recipient to assume responsibility for maintenance; or
 - (c) written text in project conditions, covenants and restrictions for residential properties assigning maintenance responsibilities to a home owner's association, or other appropriate group, for maintenance of structural and treatment control BMPs; or
 - (d) any other legally enforceable agreement that assigns responsibility for storm water BMP maintenance.

REGIONAL WATER QUALITY CONTROL BOARD CONTACT PERSON:

Skyler Anderson, Environmental Scientist
11020 Sun Center Drive #200
Rancho Cordova, California 95670-6114
sanderson@waterboards.ca.gov
(916) 464-4849

WATER QUALITY CERTIFICATION:

I hereby issue an order certifying that any discharge from the Harsch Investment Properties, LLC, Blue Oaks Commerce Center (aka Blue Oaks-Washington) Project (WDID# 5A31CR00297) will comply with the applicable provisions of §301 ("Effluent Limitations"), §302 ("Water Quality Related Effluent Limitations"), §303 ("Water Quality Standards and Implementation Plans"), §306 ("National Standards of Performance"), and §307 ("Toxic and Pretreatment Effluent Standards") of the Clean Water Act. This discharge is also regulated under State Water Resources Control Board Water Quality Order No. 2003-0017 DWQ "Statewide General Waste Discharge Requirements For Dredged Or Fill Discharges That Have Received State Water Quality Certification (General WDRs)".

Except insofar as may be modified by any preceding conditions, all certification actions are contingent on (a) the discharge being limited and all proposed mitigation being completed in strict compliance with Harsch Investment Properties, LLC's project description and the *attached Project Information Sheet*, and (b) compliance with all applicable requirements of the *Water Quality Control Plan for the Sacramento River and San Joaquin River*, Fourth Edition, revised September 2009.

for Pamela C. Creedon
Executive Officer

Rocklin, CA 95677

Project Name: Blue Oaks Commerce Center Project

Application Number: WDID# 5A31CR00297

Type of Project: Commercial and Industrial Development Project

Project Location: Section 21 and 22, Township 11 North, Range 6 East, MDB&M.
Latitude: 38°47'35" and Longitude: -121°18'15"

County: Placer County

Receiving Water(s) (hydrologic unit): Pleasant Grove Creek, Sacramento Hydrologic Basin, Valley-American Hydrologic Unit #519.22, Pleasant Grove HSA

Water Body Type: Wetlands, Streambed

Designated Beneficial Uses: The *Water Quality Control Plan for the Sacramento River and San Joaquin River*, Fourth Edition, revised September 2009 (Basin Plan) has designated beneficial uses for surface and ground waters within the region. Beneficial uses that could be impacted by the project include: Municipal and Domestic Water Supply (MUN); Agricultural Supply (AGR); Industrial Supply (IND), Hydropower Generation (POW); Groundwater Recharge, Water Contact Recreation (REC-1); Non-Contact Water Recreation (REC-2); Warm Freshwater Habitat (WARM); Cold Freshwater Habitat (COLD); and Wildlife Habitat (WILD).

Project Description (purpose/goal): The proposed project involves the development of a commercial and industrial business park in Roseville. The 50 acre project is located south of Blue Oaks Boulevard and Industrial Avenue. The project site is in close proximity to Highway 65 to the east. The project site is surrounded by developed commercial, industrial and residential parcels.

Wetland vegetation within the project area occurs within low-lying depressions and the bank-to-bank extent of the intermittent drainage and drainage ditches. Jurisdictional waters of the United States and waters of the State mapped a total of 2.038 acres and include: 0.708 acre of vernal pools, 0.687 acre of seasonal wetland, 0.246 acre of seasonal wetland swale and 0.139 acre of seasonal marsh. Other waters of the United States include 0.248 acre of

intermittent drainage and 0.010 acre of drainage ditch, totaling approximately 1,345 linear feet of channel.

The purposed project will permanently impact 2.038 acres of waters of the United States and waters of the state. The areas predominantly affected include a seasonal wetland area on the east side of the property, along Washington Boulevard, and vernal pools and an unnamed tributary that flows south to north through the site, along and near Industrial Avenue. The unnamed tributary enters the site from the south via a culvert from the Sierra Business Park, and exits the site into a culvert under Blue Oaks Boulevard.

Preliminary Water Quality Concerns: Construction activities may impact surface waters with increased turbidity and settleable matter.

Proposed Mitigation to Address Concerns: Harsch Investment Properties, LLC will implement Best Management Practices (BMPs) to control sedimentation and erosion. All temporary affected areas will be restored to pre-construction contours and conditions upon completion of construction activities. Harsch Investment Properties, LLC will conduct turbidity and settleable matter testing during in-water work, stopping work if the Basin Plan criteria are exceeded or are observed.

Fill/Excavation Area: Approximately 3,300 cubic yards of clean native soil will be placed into 1.78 acres of jurisdictional wetland and 0.258 acre (1,345 linear feet) of un-vegetated streambed (for a total of 2.038 acres of fill).

Dredge Volume: None

U.S. Army Corps File Number: 200500307

U.S. Army Corps of Engineers Permit Number: Individual Permit

Department of Fish and Game Streambed Alteration Agreement: Harsch Investment Properties, LLC applied for a Streambed Alteration Agreement on 1 June 2010.

Possible Listed Species: Vernal pool fairy shrimp, vernal pool tadpole shrimp

Status of CEQA Compliance: The City of Roseville approved the Mitigated Negative Declaration and filed a Notice of Determination on 4 June 2010 (State Clearinghouse Number 2010042089).

As a Responsible Agency under California Environmental Quality Act (CEQA), the Central Valley Water Board reviewed the Mitigated Negative Declaration and found that impacts to water quality were adequately addressed. Through implementation of Low Impact Development measures and mitigation at a minimum 1:1 ratio level, impacts to water quality will be mitigated to a less than significant level. Mitigation for impacts to water quality is discussed in the "Proposed Mitigation to Address Concerns" section above, and the "Compensatory Mitigation" section below.

The City of Roseville found that all other impacts to water quality were less than significant. With regard to the remaining impacts identified in the Mitigated Negative Declaration, the corresponding mitigation measures proposed are within the responsibility and jurisdiction of

another public agency, and not within the jurisdiction of the Central Valley Water Board. Such impacts and mitigation measures do not relate to water quality or related nuisance, and therefore fall outside of the Central Valley Water Board's jurisdiction.

Compensatory Mitigation: Harsch Investment Properties, LLC will pay fees required by the Army Corps of Engineers and dedicate 2.038 acres of seasonal wetland to a Wildlands Conservation Bank.

<u>Preserve</u>	<u>Impacts Mitigated</u>	<u>Acreage</u>	<u>Cost per Mitigation Value</u>	<u>Total Cost</u>
Locust Road Preserve	Vernal Pool Creation	0.708 acre	\$350,000.00	\$247,800.00
Locust Road Preserve	Seasonal Wetlands	1.33 acres	\$150,000.00	\$199,500.00
Purchase Price				\$447,300.00

Application Fee Provided: Total fees of \$14,147.00 have been submitted to the Central Valley Water Board as required by 23 CCR §3833b(3)(A) and by 23 CCR §2200(e).

RECEIPT OF YOUR NOTICE OF INTENT (NOI)

The State Water Resources Control Board (State Water Board) has received and processed your NOI to comply with the terms of the General Permit to Discharge Storm Water Associated with Construction Activity. Accordingly, you are required to comply with the permit requirements.

The Waste Discharger Identification (WDID) number is: **5S31C370715**. Please use this number in any future communication regarding this permit.

OWNER:	SITE DESCRIPTION
DEVELOPER:	Harsch Investment Properties II LLC
SITE INFORMATION:	Harsch Investment Properties II LLC
	Blue Oaks Commerce Center
	8950 Industrial Avenue
	Roseville
TOTAL DISTURBED ACRES:	38.85
START DATE:	September 01, 2014
COMPLETION DATE:	December 30, 2016
COUNTY:	Placer

When the Owner changes , a new NOI, site map, and fee must be submitted by the new Owner. As the previous owner, you are required to submit a Notice of Termination (NOT) to the local Regional Water Board stating you no longer own or operate the Site and coverage under the General Permit is not required. Unless notified, you will continue and are responsible to pay the annual fee invoiced each July.

If you have any questions regarding permit requirements, please contact your Regional Water Board at 916-464-3291 . Please visit the storm water web site at http://www.waterboards.ca.gov/water_issues/programs/stormwater/ to obtain an NOT and other storm water related information and forms.

Sincerely,

Storm Water Section

Streambed Alteration Agreement
Notification No. 1600-2010-0104 -R2
Unnamed tributary and drainage to Pleasant Grove Creek
Harsch Investment Properties-11 LLC
Blue Oaks Commerce Center

This Streambed Alteration Agreement (Agreement) is entered into between the California Department of Fish and Game (DFG) and Harsch Investment Properties-11 LLC (Permittee) as represented by J. Randy Kyte.

RECITALS

WHEREAS, pursuant to Fish and Game Code (FGC) section 1602, Permittee notified DFG on 23 June, 2010 that Permittee intends to complete the project described herein.

WHEREAS, pursuant to FGC section 1603, DFG has determined that the project could substantially adversely affect existing fish or wildlife resources and has included measures in the Agreement necessary to protect those resources.

WHEREAS, Permittee has reviewed the Agreement and accepts its terms and conditions, including the measures to protect fish and wildlife resources.

NOW THEREFORE, Permittee agrees to complete the project in accordance with the Agreement.

PROJECT LOCATION

The project is located at an unnamed tributary and drainage to Pleasant Grove Creek with associated wetlands, in the County of Placer, State of California; Latitude 38 degrees 47 minutes 35 seconds North, Longitude 121 degrees 18 minutes 15 seconds West.

PROJECT DESCRIPTION

The project is limited to fill of approximately 0.54 acres of interconnected seasonal drainage, grassy swale, wetlands and marsh which drain to Pleasant Grove Creek. All drainage water flowing onto the site from adjacent property will be directed through a drainage system into a created grassy swale area on the western edge of the property where it will be allowed to naturally flow into Pleasant Grove Creek. As a result of the fill activities all wetland and marsh habitat and vegetation on the site will be removed.

A handwritten signature in blue ink, appearing to be "J. Randy Kyte", written over the version number.

PROJECT IMPACTS

Existing fish or wildlife resources the project could substantially adversely affect include: marsh nesting avian species, amphibians, and other aquatic and terrestrial plant and wildlife species.

The adverse effects the project could have on the fish or wildlife resources identified above include: permanent loss of habitat, potential increases in turbidity in Pleasant Grove Creek through loss of natural settling actions from wetlands and marsh.

STREAM ZONE DEFINED

The Stream Zone comprises all components of a stream, including the channel, bed, banks, and floodplains. The Stream Zone is the land, including vegetation, that bounds a lake or the channel of a stream and that defines the lateral extent of their waters.

MEASURES TO PROTECT FISH AND WILDLIFE RESOURCES

1. Administrative Measures

Permittee shall meet each administrative requirement described below.

- 1.1 Documentation at Project Site. Permittee shall make the Agreement, any extensions and amendments to the Agreement, and all related notification materials and California Environmental Quality Act (CEQA) documents, readily available at the project site at all times and shall be presented to DFG personnel, or personnel from another state, federal, or local agency upon request.
- 1.2 Providing Agreement to Persons at Project Site. Permittee shall provide copies of the Agreement and any extensions and amendments to the Agreement to all persons who will be working on the project at the project site on behalf of Permittee, including but not limited to contractors, subcontractors, inspectors, and monitors.
- 1.3 Notification of Conflicting Provisions. Permittee shall notify DFG if Permittee determines or learns that a provision in the Agreement might conflict with a provision imposed on the project by another local, state, or federal agency. In that event, DFG shall contact Permittee to resolve any conflict.
- 1.4 Project Site Entry. Permittee agrees that DFG personnel may enter the project site to verify compliance with the Agreement. DFG personnel may only enter the project site when it is safe to do so. When appropriate, DFG personnel shall contact the Permittee prior to entering the construction area.

Initials: 

- 1.5 Authorized Work. The notification, together with all supporting documents submitted with the notification, is hereby incorporated into this agreement to describe the location and features of the proposed project. The Permittee agrees that all work shall be done as described in the notification and supporting documents, incorporating all project modifications, wildlife resource protection features, mitigation measures, and provisions as described in this agreement. Where apparent conflicts exist between the notification and the provisions listed in this agreement, the Permittee shall comply with the provisions listed in this agreement. The Permittee further agrees to notify DFG of any modifications made to the project plans submitted to DFG. At the discretion of DFG, this agreement will be amended to accommodate modifications to the project plans submitted to DFG and/or new project activities.

2. Avoidance and Minimization Measures

To avoid or minimize adverse impacts to fish and wildlife resources identified above, Permittee shall implement each measure listed below.

- 2.1 Work Period. The time period for completing the work within the stream zone shall be restricted to periods of low stream flow and dry weather. Construction activities shall be timed with awareness of precipitation forecasts and likely increases in stream flow. Construction activities within the stream zone shall cease until all reasonable erosion control measures, inside and outside of the stream zone, have been implemented prior to all storm events. Revegetation, restoration and erosion control work is not confined to this time period.
- 2.2 Work Period Extensions. At DFG's discretion, the work period may be extended based on the extent of the work remaining, on site conditions and reasonably anticipated future conditions. If the Permittee finds more time is needed to complete the authorized activity, the Permittee shall submit a written request for a work period time extension to DFG. The work period extension request shall provide the following information: 1) Describe the extent of work already completed; 2) Provide specific detail of the activities that remain to be completed within the stream zone; and 3) Detail the actual time required to complete each of the remaining activities within the stream zone. The work period extension request should consider the effects of increased stream conditions, rain delays, increased erosion control measures, limited access due to saturated soil conditions, and limited growth of erosion control grasses due to cool weather. Photographs of the work completed and the proposed work areas are helpful in assisting DFG in its evaluation. Time extensions are issued at the discretion of DFG. DFG will have ten calendar days to approve the proposed work period extension. DFG reserves the right to require additional measures designed to protect natural resources.
- 2.3 Stream Diversions / Dewatering. If work in the flowing portion of the stream is unavoidable, the entire stream flow shall be diverted around or through the work area during the excavation and/or construction operations. Stream flow shall be

Initials: _____

diverted using gravity flow through temporary culverts/pipe's or pumped around the work site with the use of hoses. When any dam or other artificial obstruction is being constructed, maintained, or placed in operation, sufficient water shall at all times be allowed to pass downstream to maintain aquatic life below the dam pursuant to Fish and Game Code section 5937. The temperature of the diverted water will not be allowed to become elevated such that it may be deleterious to aquatic organisms downstream. The dissolved oxygen concentration of the diverted water will not be allowed to drop to a level that may be deleterious to downstream aquatic life. Any temporary dam or other artificial obstruction constructed shall only be built from clean materials such as sandbags, gravel bags, water dams, or clean/washed gravel which will cause little or no siltation.

- 2.4 Bird Nests. It is unlawful to take, possess, or needlessly destroy the nest or eggs of any bird except as otherwise provided by the Fish and Game Code. No trees that contain active nests of birds shall be disturbed until all eggs have hatched and young birds have fledged without prior consultation and approval of a Department representative.
- 2.5 Vegetation Removal. Disturbance or removal of vegetation shall not exceed the minimum necessary to complete operations. Except for the trees specifically identified for removal in the notification, no native trees with a trunk diameter at breast height (DBH) in excess of four (4) inches shall be removed or damaged without prior consultation and approval of a Department representative. Using hand tools (clippers, chain saw, etc.), trees may be trimmed to the extent necessary to gain access to the work sites. All cleared material/vegetation shall be removed out of the riparian/stream zone.
- 2.6 Sediment Control. Precautions to minimize turbidity/siltation shall be taken into account during project planning and implementation. This may require the placement of silt fencing, coir logs, coir rolls, straw bale dikes, or other siltation barriers so that silt and/or other deleterious materials are not allowed to pass to downstream reaches. Passage of sediment beyond the sediment barrier(s) is prohibited. If any sediment barrier fails to retain sediment, corrective measures shall be taken. The sediment barrier(s) shall be maintained in good operating condition throughout the construction period and the following rainy season. Maintenance includes, but is not limited to, removal of accumulated silt and/or replacement of damaged silt fencing, coir logs, coir rolls, and/or straw bale dikes. **The use of monofilament netting based erosion control blankets is prohibited within the stream zone or associated riparian areas.** The Permittee is responsible for the removal of non-biodegradable silt barriers (such as plastic silt fencing) or the netting surrounding coir logs and/or rolls, after the disturbed areas have been stabilized with erosion control vegetation (usually after the first growing season). Upon Department determination that turbidity/siltation levels resulting from project related activities constitute a threat to aquatic life, activities associated with the turbidity/siltation shall be halted until effective Department approved control devices are installed or abatement procedures are initiated.

Initials: _____

- 2.7 Pollution Control. Utilize Best Management Practices (BMPs) to prevent spills and leaks into water bodies. If maintenance or refueling of vehicles or equipment must occur on-site, use a designated area and/or a secondary containment, located away from drainage courses to prevent the runoff of storm water and the runoff of spills. Ensure that all vehicles and equipment are in good working order (no leaks). Place drip pans or absorbent materials under vehicles and equipment when not in use. Ensure that all construction areas are covered by a site-wide spill response plan and have proper spill clean up materials (absorbent pads, sealed containers, booms, etc.) to contain the movement of any spilled substances. Any other substances which could be hazardous to aquatic life, resulting from project related activities, shall be prevented from contaminating the soil and/or entering the waters of the state. Any of these materials, placed within or where they may enter a stream or lake by the Applicant or any party working under contract or with the permission of the Permittee, shall be removed immediately. DFG shall be notified immediately by the Permittee of any spills and shall be consulted regarding clean-up procedures.

3. Compensatory Measures

To compensate for adverse impacts to fish and wildlife resources identified above that cannot be avoided or minimized, Permittee shall implement each measure listed below.

- 3.1 Site Restoration. All exposed/disturbed areas and access points within the stream zone left barren of vegetation as a result of the construction activities shall be restored using locally native grass seeds, locally native grass plugs and/or a mix of quick growing sterile non-native grass with locally native grass seeds. Seeded areas shall be covered with broadcast straw and/or jute netted (**monofilament erosion blankets are not authorized**). Riparian trees and native shrubs removed as a result of construction activities shall be mitigated on site to maximum extent possible.
- 3.2 Mitigation Credits. The applicant shall purchase mitigation credits at an approved area mitigation bank at the rate of 1 to1 for habitat removed as a result of the project. The applicant shall submit proof of purchase of the mitigation credits **prior** to the Department's signing of this agreement.

4. Reporting Measures

Permittee shall meet each reporting requirement described below.

- 4.1 The Permittee shall notify DFG within two working days of beginning work within the stream zone of an unnamed tributary and drainage to Pleasant Grove Creek with associated wetlands. Notification shall be submitted as instructed in Contact Information section below. Email notification is preferred.

Initials: _____

- 4.2 Upon completion of the project activities described in this agreement, the work area within the stream zone shall be digitally photographed. Photographs shall be submitted to DFG within two days of completion. Photographs and project commencement notification shall be submitted as instructed in Contact Information section below. Email submittal is preferred.

CONTACT INFORMATION

Any communication that Permittee or DFG submits to the other shall be in writing and any communication or documentation shall be delivered to the address below by U.S. mail, fax, or email, or to such other address as Permittee or DFG specifies by written notice to the other. Refer to the project's Notification Number when submitting documents to DFG.

To Permittee:

Harsch Investment Properties-11 LLC

Fax: 916-358-2912
bhosea@dfg.ca.gov

LIABILITY

Permittee shall be solely liable for any violations of the Agreement, whether committed by Permittee or any person acting on behalf of Permittee, including its officers, employees, representatives, agents or contractors and subcontractors, to complete the project or any activity related to it that the Agreement authorizes.

This Agreement does not constitute DFG's endorsement of, or require Permittee to proceed with the project. The decision to proceed with the project is Permittee's alone.

Initials: _____

SUSPENSION AND REVOCATION

DFG may suspend or revoke in its entirety the Agreement if it determines that Permittee or any person acting on behalf of Permittee, including its officers, employees, representatives, agents, or contractors and subcontractors, is not in compliance with the Agreement.

Before DFG suspends or revokes the Agreement, it shall provide Permittee written notice by certified or registered mail that it intends to suspend or revoke. The notice shall state the reason(s) for the proposed suspension or revocation, provide Permittee an opportunity to correct any deficiency before DFG suspends or revokes the Agreement, and include instructions to Permittee, if necessary, including but not limited to a directive to immediately cease the specific activity or activities that caused DFG to issue the notice.

ENFORCEMENT

Nothing in the Agreement precludes DFG from pursuing an enforcement action against Permittee instead of, or in addition to, suspending or revoking the Agreement.

Nothing in the Agreement limits or otherwise affects DFG's enforcement authority or that of its enforcement personnel.

OTHER LEGAL OBLIGATIONS

This Agreement does not relieve Permittee or any person acting on behalf of Permittee, including its officers, employees, representatives, agents, or contractors and subcontractors, from obtaining any other permits or authorizations that might be required under other federal, state, or local laws or regulations before beginning the project or an activity related to it.

This Agreement does not relieve Permittee or any person acting on behalf of Permittee, including its officers, employees, representatives, agents, or contractors and subcontractors, from complying with other applicable statutes in the FGC including, but not limited to, FGC sections 2050 et seq. (threatened and endangered species), 3503 (bird nests and eggs), 3503.5 (birds of prey), 5650 (water pollution), 5652 (refuse disposal into water), 5901 (fish passage), 5937 (sufficient water for fish), and 5948 (obstruction of stream).

The Permittee shall notify DFG where conflicts exist between the provisions of this agreement and those imposed by other regulatory agencies. Unless otherwise notified, the Permittee shall comply with the provision that offers the greatest protection to water quality, species of special concern and/or critical habitat.

Initials: 

Nothing in the Agreement authorizes Permittee or any person acting on behalf of Permittee, including its officers, employees, representatives, agents, or contractors and subcontractors, to trespass.

AMENDMENT

DFG may amend the Agreement at any time during its term, provided the amendment is mutually agreed to in writing by Permittee and DFG.

TRANSFER AND ASSIGNMENT

This Agreement may not be transferred or assigned to another entity, and any purported transfer or assignment of the Agreement to another entity shall not be valid or effective, unless the transfer or assignment is requested by Permittee in writing, as specified below, and thereafter DFG approves the transfer or assignment in writing.

The transfer or assignment of the Agreement to another entity shall constitute a minor amendment, and therefore to request a transfer or assignment, Permittee shall submit to DFG a completed DFG "Request to Amend Lake or Streambed Alteration" form and include with the completed form payment of the minor amendment fee identified in DFG's current fee schedule (see Cal. Code Regs., tit. 14, § 699.5).

EXTENSIONS

In accordance with FGC section 1605(b), Permittee may request one extension of the Agreement, provided the request is made prior to the expiration of the Agreement's term. To request an extension, Permittee shall submit to DFG a completed DFG "Request to Extend Lake or Streambed Alteration" form and include with the completed form payment of the extension fee identified in DFG's current fee schedule (see Cal. Code Regs., tit. 14, § 699.5). DFG shall process the extension request in accordance with FGC 1605(b) through (e).

If Permittee fails to submit a request to extend the Agreement prior to its expiration, Permittee must submit a new notification and notification fee before beginning or continuing the project the Agreement covers (Fish & G. Code, § 1605, subd. (f)).

EFFECTIVE DATE

The Agreement becomes effective on the date of DFG's signature, which shall be: 1) after Permittee's signature; 2) after DFG complies with all applicable requirements under the California Environmental Quality Act (CEQA); and 3) after payment of the applicable FGC section 711.4 filing fee listed at http://www.dfg.ca.gov/habcon/ceqa/ceqa_changes.html.

TERM

Initials: _____

This Agreement shall expire five years from the date of DFG signature, unless it is terminated or extended before then. All provisions in the Agreement shall remain in force throughout its term. Permittee shall remain responsible for implementing any provisions specified herein to protect fish and wildlife resources after the Agreement expires or is terminated, as FGC section 1605(a)(2) requires.

AUTHORITY

If the person signing the Agreement (signatory) is doing so as a representative of Permittee, the signatory hereby acknowledges that he or she is doing so on Permittee's behalf and represents and warrants that he or she has the authority to legally bind Permittee to the provisions herein.

AUTHORIZATION

This Agreement authorizes only the project described herein. If Permittee begins or completes a project different from the project the Agreement authorizes, Permittee may be subject to civil or criminal prosecution for failing to notify DFG in accordance with FGC section 1602.

FISH AND WILDLIFE SERVICE

Sacramento Fish and Wildlife Office
2800 Cottage Way, Room W-2605
Sacramento, California 95825-1846

In reply refer to:
81420-2008-I-0286-1

MAR 18 2008

Mr. Michael S. Jewell
Chief, Regulatory Branch
U.S. Army Corps of Engineers
1325 J Street, Room 1480
Sacramento, California 95814-2922

Subject: Request for Concurrence on the Blue Oaks-Washington Project in
Roseville, Placer County, California

Dear Mr. Jewell:

This letter acknowledges the U.S. Fish and Wildlife Service's (Service) November 6, 2007, receipt of the U.S. Army Corps of Engineers' (Corps) November 1, 2007, letter requesting initiation of section 7 consultation under the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*) (Act). The consultation concerns the possible effects of the proposed Blue Oaks-Washington project (proposed project) on two federally-listed species, the endangered vernal pool tadpole shrimp (*Lepidurus packardii*) and the threatened vernal pool fairy shrimp (*Branchinecta lynchi*) (collectively, the vernal pool crustaceans).

The findings and recommendations in this consultation are based on: (1) the March 31, 2006, *Information to Support Formal Section 7 Consultation, Blue Oaks-Washington Property, Placer County, California*, prepared by ECORP Consulting, Inc. (ECORP); (2) the July 6, 2007, and July 24, 2007, Wet Season 90-day Reports of Findings Regarding Federally Listed Branchiopods for the proposed project; (3) the October 10, 2006, Special-Status Plant Survey for the proposed project; (4) various e-mails between Cynthia Hertzog of ECORP and Jana Milliken of the Service; and (5) other information available to the Service. A complete administrative record is on file at the Sacramento Fish and Wildlife Office.

The proposed project involves construction of a mixed commercial and industrial business park south of Blue Oaks Boulevard, between Washington Boulevard and Industrial Avenue near Roseville. According to the information provided, construction will necessitate the filling of 1.953 acres of seasonal wetland habitat.

TAKE PRIDE
IN AMERICA 

Service guideline-level wet season surveys were completed during the 2005-2006 and 2006-2007 seasons to determine the status of the vernal pool crustaceans on the project site. The Service has determined that, based on the methods and results outlined in the 90-day reports, the surveys were performed adequately and the conditions on the site were appropriate to demonstrate absence of these species on the project site. Therefore, the Service concurs that the proposed project as proposed is not likely to adversely affect the vernal pool crustaceans.

Although not included in your initiation request, the proposed project site is within the range of and contains suitable habitat for the Sacramento orcutt grass (*Orcuttia viscida*) and slender orcutt grass (*Orcuttia tenuis*). The Special-Status Plant Survey did not identify either species occurring on the site, and the Service has determined that the survey was done adequately to demonstrate absence of these species. Therefore, the Service concurs that the proposed project as proposed is not likely to adversely affect the Sacramento orcutt grass and slender orcutt grass.

Unless new information reveals effects of the proposed action that may affect listed species in a manner or to an extent not considered, a new species is listed or critical habitat is designated that may be affected by the proposed project, or if the project description changes, no further action pursuant to the Act is necessary.

If you have any questions or concerns regarding this consultation, please contact Jana Milliken or the Acting Sacramento Valley Branch Chief, at (916) 414-6645.

Sincerely,

A handwritten signature in black ink that reads "Peter A. Cross". The signature is written in a cursive, slightly slanted style.

Peter A. Cross
Deputy Assistant Field Supervisor

Ms. Cynthia Hertzog, ECORP Consulting, Inc., Rocklin, California

BILL OF SALE

Contract # THRMB-11-10

In consideration of \$447,300.00, receipt of which is hereby acknowledged, **WILDLANDS TOAD HILL HOLDINGS, LLC ("Seller")**, does hereby bargain, sell and transfer to **HARSCH INVESTMENT PROPERTIES, LLC**, an Oregon limited liability company ("**Buyer**"), the following vernal pool creation credits and seasonal wetland mitigation credits from the Toad Hill Ranch Mitigation Bank:

<u>Bank</u>	<u>Impacts Mitigated</u>	<u># Credits</u>	<u>Cost per Credit</u>	<u>Total Cost</u>
Toad Hill Ranch Mitigation Bank	0.708 acres Vernal Pool Creation	0.708	\$350,000.00	\$247,800.00
Toad Hill Ranch Mitigation Bank	1.33 acres Seasonal Wetlands	1.33	\$150,000.00	\$199,500.00
Purchase Price				\$447,300.00

Seller represents and warrants that it has good title to the credits and the property thereon, has good right to sell the same, and they are free and clear of all claims, liens, or encumbrances.

Seller covenants and agrees with Buyer to warrant and defend the sale of the credits hereinbefore described against all and every person and persons whomsoever lawfully claiming or to claim the same.

WILDLANDS TOAD HILL HOLDINGS, LLC

Date: 12/15/2011

**AGREEMENT FOR PURCHASE AND SALE OF MITIGATION VALUES
AND RIGHT OF FIRST REFUSAL
(Locust Road – Harsch Investment Properties)**

This Agreement for Purchase and Sale of Mitigation Values and Right of First Refusal ("**Agreement**"), dated for reference purposes only as May 27th, 2009 ("**Effective Date**"), is entered into by and between **WILDLANDS, INC.**, a Delaware corporation ("**Seller**"), and **HARSCH INVESTMENT PROPERTIES, LLC**, an Oregon limited liability company ("**Buyer**"), who agree as follows:

1. Background and General.

(a) Project. Buyer is a developer, and is undertaking the development of a project in the County of Placer, State of California, commonly referred to as the Blue Oaks-Washington Project (the "**Project**"). The Project, if constructed, may unavoidably and adversely impact waters of the United States thereon and certain protected species.

(b) Applicable Agencies. As a part of the approval process for the Project, Buyer must obtain approvals from, among other agencies, the United States Army Corps of Engineers ("**Corps**") and the United States Fish and Wildlife Service ("**USFWS**") to compensate for such impacts by preserving, creating, enhancing and/or restoring wetlands or by purchasing sufficient suitable mitigation values to offset these identified impacts. The Corps and USFWS are collectively referred herein as the "**Applicable Agencies**."

(c) Seller' Business. Seller is the operator of compensatory mitigation projects for impacts to wetlands, protected species and/or protected habitat, and is in the business of locating properties suitable for mitigating such impacts (each, a "**Mitigation Site**").

(d) Locust Road Preserve. Seller is in the process of establishing mitigation values ("**Mitigation Values**") at the Locust Road vernal pool preserve (the "**Locust Road Preserve**"). The Locust Road Preserve contains suitable ground for the restoration/creation of vernal pools ("**Vernal Pool Creation**") and seasonal wetlands ("**Seasonal Wetland Creation**").

(e) Mitigation Activities To Date. As of the Effective Date of this Agreement, Seller is in the process of establishing the Locust Road Preserve for mitigating impacts to wetlands and associated threatened or endangered species through Vernal Pool Creation and Seasonal Wetland Creation. A description of the Locust Road Preserve is attached hereto as Exhibit A and incorporated herein by this reference.

(i) Habitat Restoration Activities. Seller has undertaken substantial activities towards determining the feasibility of the development and restoration/creation of the mitigation values at the Locust Road Preserve. These include, for example, such activities as performing wildlife surveys and resource mapping, soils reconnaissance to explore habitat restoration/creation potential, and other activities.

(ii) Development Narrative. As of the Effective Date of this Agreement, Wildlands has undertaken substantial activities towards establishing the Mitigation Values,

including, without limitation, obtaining a Section 404 Permit from the Corps (reference number SPK-2007-855-SA) and a grading permit from Placer County (reference number DFF-1413), and commencing construction activities in accordance with the Mitigation Documents (as hereinafter defined). Furthermore, Seller has prepared a written description of the development objectives for the Locust Road Preserve (the "**Development Narrative**"), which includes design goals and objectives, descriptions of targeted compensatory habitats, generalized mapping of habitats, water management strategies and long-term vegetation management techniques and funding mechanisms.

(1) Based on the Development Narrative, the Locust Road Preserve is anticipated to yield at least 0.708 acres of Vernal Pool Creation Mitigation Values and at least 1.33 acres of Seasonal Wetland Creation Mitigation Values, and it may be applicable to the amounts necessary to comply with the terms and conditions of Buyer's USFWS biological opinion and its Corps 404 permit (the "**404 Permit**").

(2) Seller has submitted or will be submitting the Development Narrative and a habitat mitigation and monitoring plan (collectively or individually the "**Mitigation Documents**") for approval by the Applicable Agencies in order to allow development of the Locust Road Preserve for wetlands and threatened or endangered species habitat on the Locust Road Preserve.

(f) Advance Mitigation Rights. Buyer desires to secure the right to provide for mitigation of the Project, in advance of construction, in whole or in part, through the purchase of Mitigation Values from the Locust Road Preserve.

(g) Purpose. The purpose of this Agreement is to provide for the purchase and sale of Mitigation Values from the Locust Road Preserve.

2. Purchase and Sale of Allocated Mitigation.

(a) Allocation of Mitigation Values. Pursuant to the terms and conditions of this Agreement, Seller agrees to sell to Buyer and set aside for the exclusive use of Buyer, and Buyer agrees to purchase from Seller, the following-described Mitigation Values from the Locust Road Preserve (the "**Allocated Mitigation** "):

<u>Preserve</u>	<u>Impacts Mitigated</u>	<u>Acreage</u>	<u>Cost per Mitigation Value</u>	<u>Total Cost</u>
Locust Road Preserve	Vernal Pool Creation	0.708 acres	\$350,000.00	\$247,800.00
Locust Road Preserve	Seasonal Wetlands	1.33 acres	\$150,000.00	\$199,500.00
Purchase Price				\$447,300.00

(b) Purchase Price; Payment. The purchase price ("**Purchase Price**") for the Allocated Mitigation shall be Four Hundred Forty-Seven Thousand Three Hundred and No/100ths Dollars (\$447,300.00), which was determined by multiplying the amount of the Allocated Mitigation by the cost per Mitigation Value in accordance with Section 2 above. The Purchase Price shall be paid by Buyer to Seller as follows:

(i) First Deposit. On or before June 1, 2009, Buyer shall deliver to Seller the amount of Forty-Four Thousand Seven Hundred Thirty and No/100ths Dollars (\$44,730.00) (the "**First Deposit**"). Except in the event of a default by Seller, the First Deposit shall become nonrefundable upon Buyer's delivery of the First Deposit to Seller.

(ii) Application of Deposit. The First Deposit shall be credited to the Purchase Price at the Closing (as hereinafter defined).

(iii) Balance at Closing. On or before the Closing, Buyer shall deliver to Seller the balance of the Purchase Price, in immediately available funds.

(c) Closing. For purposes of this Agreement, "**Closing**" shall be defined as the date on which Seller delivers to Buyer a Bill of Sale, which shall be in the form attached hereto as Exhibit B and incorporated herein by this reference. The Closing shall occur on or before December 31, 2009 (the "**Closing Date**").

(d) Failure to Close. If Buyer fails to pay the balance of the Purchase Price by the Closing Date, then Seller shall be entitled to retain the Deposit as liquidated damages pursuant to Section 7 below, and Seller shall automatically be released from its obligation to sell the Allocated Mitigation to Buyer pursuant to this Section 2, and Buyer's right to purchase the Allocated Mitigation pursuant to the provisions of this Section 2 shall automatically terminate. In such event, Buyer shall have a right of first refusal to purchase the Allocated Mitigation pursuant to the provisions of Section 3 below.

3. Right of First Refusal. The provisions of this Section 3 shall apply if, and only if, Buyer fails to purchase the Allocated Mitigation and pay the balance of the Purchase Price by the Closing Date pursuant to Section 2 above.

(a) Buyer's Right of First Refusal. Seller hereby grants to Buyer the right of first refusal (the "**Right of First Refusal**") to purchase the Allocated Mitigation, and any portions thereof, upon the terms and conditions set forth in this Section 3.

(b) Term. The term of the Right of First Refusal ("**Refusal Term**") shall commence on January 1, 2010, and, unless sooner terminated, shall continue until December 15, 2011.

(c) Additional Deposits. As additional consideration for the Right of First Refusal granted by Seller to Buyer hereunder, Buyer shall pay the following additional amounts to Seller:

(i) Second Deposit. As a condition to the effectiveness of the Right of First Refusal, on or before December 31, 2009, Buyer shall deliver to Seller the additional amount of Forty-Four Thousand Seven Hundred Thirty and No/100ths Dollars (\$44,730.00) (the "**Second Deposit**"). Except in the event of a default by Seller, the Second Deposit shall become nonrefundable upon Buyer's delivery of the Second Deposit to Seller.

(ii) Third Deposit. On or before June 1, 2010, Buyer shall deliver to Seller the amount of Forty-Four Thousand Seven Hundred Thirty and No/100ths Dollars (\$44,730.00) (the "**Third Deposit**"). Except in the event of a default by Seller, the Third Deposit shall become nonrefundable upon Buyer's delivery of the First Deposit to Seller.

(iii) Fourth Deposit. On or before December 31, 2010, Buyer shall deliver to Seller the additional amount of Forty-Four Thousand Seven Hundred Thirty and No/100ths Dollars (\$44,730.00) (the "**Fourth Deposit**"). Except in the event of a default by Seller, the Fourth Deposit shall become nonrefundable upon Buyer's delivery of the Second Deposit to Seller.

(iv) Fifth Deposit. On or before June 1, 2011, Buyer shall deliver to Seller the additional amount of Forty-Four Thousand Seven Hundred Thirty and No/100ths Dollars (\$44,730.00) (the "**Fifth Deposit**"). Except in the event of a default by Seller, the Fifth Deposit shall become nonrefundable upon Buyer's delivery of the Second Deposit to Seller.

(v) Application of Deposits. The First Deposit, Second Deposit, Third Deposit, Fourth Deposit and Fifth Deposit, to the extent paid, are each individually referred to herein as a "**Deposit**" and collectively referred to herein as the "**Deposits**." In the event that Seller sends Buyer an Offer Notice (as hereinafter defined) pursuant to the provisions of this Section 3 and Buyer timely exercises its Right of First Refusal in accordance with the provisions of this Section 3, the Deposits shall be credited to the Purchase Price at the Closing for the Resale Allocated Mitigation (as hereinafter defined); provided, however, in the event that the Resale Allocated Mitigation is less than the total Allocated Mitigation (i.e., 0.708 acres of vernal pool creation and 1.33 acres of season wetlands), the Deposits shall be credited to the Purchase Price on a prorata basis based upon the acreage of the Resale Allocated Mitigation.

(vi) Example of Application of Deposits. For example, if the Resale Allocated Mitigation consists of 0.354 acres of vernal pool creation and 0.665 acres of seasonal wetlands (i.e., one-half of the Allocated Mitigation), and if Buyer has paid the First Deposit, Second Deposit and Third Deposit as of the date of the Closing for such Resale Allocated Mitigation,

then the amount of Sixty-Seven Thousand Ninety-Five and No/100ths Dollars (\$67,095.00) (i.e., one-half of the Deposits paid by Buyer to Seller as of the date of the Closing for such Resale Allocated Mitigation) would be credited to the Purchase Price for such Resale Allocated Mitigation, and the remainder of the Deposits (including the Fourth Deposit and the Fifth Deposit, to the extent paid thereafter) would be applicable on a prorata basis to the Purchase Price allocable to any additional portion of the Resale Allocated Mitigation that is acquired by Buyer pursuant to the provisions of this Section 3.

(vii) Failure to Pay Deposits. In the event that Buyer fails to pay any Deposit by the date on which such Deposit is due, Buyer's Right of First Refusal shall automatically terminate on such date, and Seller shall thereafter have no further obligation to sell the Allocated Mitigation to Buyer. Provided, however, that if Buyer fails to pay a Deposit when due then Seller shall send Buyer written notice of the failure and Buyer shall have ten (10) days from the date of the notice to pay the Deposit.

(d) Substitution of Allocated Mitigation. Seller is in the process of obtaining all necessary approvals and permits from the Applicable Agencies for the establishment of the Toad Hill Ranch Mitigation Bank, which consists of approximately 1,630 acres and is located at Sunset Boulevard West and Brewer Road in Placer County, California (the "**Toad Hill Bank**"). The Toad Hill Bank contains suitable ground for the restoration/creation of vernal pools and seasonal wetlands. A description of the Toad Hill Bank is attached hereto as Exhibit C and incorporated herein by this reference. The Toad Hill Bank will allow for impacts to waters of the United States, covered species and covered habitat to be mitigated or compensated through credits from the Toad Hill Bank, and such credits will include vernal pool creation credits and seasonal wetlands credits (the "**Toad Hill Credits**"). Seller shall have the right at any time during the Refusal Term to substitute the Allocated Mitigation with Toad Hill Credits, provided that the Toad Hill Bank has been approved by the Applicable Agencies, the Toad Hill Credits are available for use and that the Toad Hill Credits consist of the same amount and same type as the Allocated Mitigation described in Section 2(a) above (0.708 acres of vernal pool creation and 1.33 acres of season wetlands). In the event that Seller elects to replace the Allocated Mitigation with Toad Hill Credits, Seller shall provide Buyer with written notice of such replacement. In such event, the term "Allocated Mitigation" shall mean the Toad Hill Credits. Buyer shall have no interest in the Toad Hill Credits unless and until such time as Seller notifies Buyer that Seller has elected to substitute the Mitigation Values from the Locust Road Preserve with the Toad Hill Credits

(e) Notice. If Seller desires to transfer the Allocated Mitigation or any portion of the Allocated Mitigation (individually and collectively, the "**Resale Allocated Mitigation**"), then, prior to transferring the Resale Allocated Mitigation or entering into any agreement to do so, Seller shall provide Buyer with written notice of its intent to transfer the Resale Allocated Mitigation (the "**Offer Notice**"). The Offer Notice shall contain a copy of the proposed offer which Seller desires to accept, the agreement Seller is about to enter into or other document between Seller and its purchaser which verifies the amount of the Resale Allocated Mitigation; provided, however, Seller shall have the right to redact all other terms of the offer.

(f) Exercise. Buyer shall have the irrevocable right to exercise its Right of First Refusal for a period of fifteen (15) business days (the "**Exercise Period**") following Buyer's receipt of the Offer Notice.

(g) Manner of Exercise. Exercise shall be by written notice of exercise ("**Exercise Notice**"), sent to Seller within the Exercise Period.

(h) Terms of Repurchase. If Buyer exercises its Right of First Refusal, Seller shall sell the Resale Allocated Mitigation to Buyer on the same terms and conditions set forth in this Agreement, except that the Closing will occur within fifteen (15) calendar days after the date on which Buyer delivers the Exercise Notice to Seller. The purchase price for the Resale Allocated Mitigation shall be calculated pursuant to Sections 2(a) and 2(b) above (\$350,000.00/vernal pool creation acre/credit and \$150,000.00/seasonal wetland acre/credit).

(i) Failure to Exercise. If Buyer fails to exercise its Right of First Refusal by the end of the Exercise Period, Seller may thereafter transfer the Resale Allocated Mitigation described in the Offer Notice to the transferee named therein.

(i) If the Resale Allocated Mitigation is transferred within ninety (90) days following Buyer's failure to exercise its Right of First Refusal or such longer time as may be provided in the Offer Notice, upon such transfer, this Right of First Refusal shall automatically terminate with respect to the Resale Allocated Mitigation.

(ii) If the Resale Allocated Mitigation is not transferred within ninety (90) days following Buyer's failure to exercise their Right of First Refusal or such longer time as may be provided in the Offer Notice, Seller may not thereafter transfer the Resale Allocated Mitigation without again complying with the provisions of this Section 3 and giving Buyer another opportunity to purchase the Resale Allocated Mitigation in accordance with the terms of this Section 3.

(j) Exempt Transactions. Buyer's Right of First Refusal shall not apply to any transfer from Seller to an individual or entity controlled by, or under common control with, Seller (including any limited partnership whose general partner is Seller, or is controlled by, or under common control with, Seller) (each, an "**Affiliate**"). The Right of First Refusal shall apply to any subsequent transfer by the Affiliate, however.

4. Preserve Activities.

(a) Qualification, Continued Qualification of Preserves. Seller shall qualify and shall maintain the qualification of the Locust Road Preserve by performing the following activities:

(i) Analysis and Verification. To the extent they have not already done so, Seller's specialists shall review, analyze and verify the biological attributes, soil types and conditions, hydrological resources and other factors to the degree required to submit the Locust Road Preserve to the Applicable Agencies as a suitable location for the Allocated Mitigation.

(ii) Mitigation Site Documentation. To the extent not otherwise available or previously prepared and submitted with respect to the Locust Road Preserve, Seller shall prepare and submit the following documentation to the Applicable Agencies:

(1) The Development Narrative;

(2) The Mitigation Documents;

(3) The various legal and administrative documents which are reasonably necessary to enable the Locust Road Preserve to be endorsed by the Applicable Agencies, which may include, by way of example, a conservation easement affecting the Mitigation Site; and

(4) Permits and surveys required by the Applicable Agencies in order to approve the documents described above, including, without limitation, those required to implement such documents.

(iii) Development Arrangements. To the extent Seller has not already done so, Seller shall enter into such arrangements as may be necessary or convenient to enable Seller to develop the Allocated Mitigation on the Locust Road Preserve.

(b) Development of Preserves. To the extent Seller has not already done so, Seller shall cause the Allocated Mitigation portion of the Locust Road Preserve to be developed in the manner described in the Mitigation Documents.

(i) Permits, Etc. Seller shall be responsible for obtaining permits, performing surveys or studies and preparing other documents that are required for the implementation of the Mitigation Documents.

(ii) Construction and Other Work. Seller shall be responsible for the construction or other work on the Locust Road Preserve required by the Mitigation Documents.

(c) Maintenance of the Locust Road Preserve. Seller shall provide for the long-term maintenance, monitoring and management of the Locust Road Preserve in a manner that is comparable to the maintenance, monitoring and management of similar mitigation sites. Seller shall monitor and make reports to the Applicable Agencies on the status of the Locust Road Preserve.

(d) Toad Hill Bank. In the event that Seller elects to substitute the Allocated Mitigation with the Toad Hill Credits, the provisions of this Section 4 shall thereafter apply with respect to the Toad Hill Bank as opposed to the Locust Road Preserve.

5. Limitation of Obligations, Rights of Buyer.

(a) Limitation of Obligations. Buyer's obligations under this Agreement shall be limited to the payment of the Purchase Price. Buyer shall have no obligation whatsoever by reason of the use of the Locust Road Preserve or the Toad Hill Bank for the Allocated Mitigation, to support, pay for, monitor, report on, sustain, continue in perpetuity or otherwise be

obligated or liable for the success or continued expense or maintenance in perpetuity of the Locust Road Preserve or the Toad Hill Bank. As set forth above, Seller shall be fully and completely responsible therefore and for satisfying any and all conditions placed on the Locust Road Preserve (or the Toad Hill Bank, if applicable) by the Applicable Agencies.

(b) Limitation of Rights to Preserves. Nothing in this Agreement shall result in Buyer having any right, title or interest in the Locust Road Preserve or the Toad Hill Bank greater than that specifically granted by this Agreement. Buyer's sole right shall be to have Seller's obligations with respect to the Locust Road Preserve (or the Toad Hill Bank, if applicable) serve as the required mitigation for the Project if and when the Applicable Agencies approve the Allocated Mitigation.

(c) Joint Use. Upon Buyer's delivery of the balance of the Purchase Price to Seller, Seller shall reserve the Allocated Mitigation for the sole use of Buyer, and shall deliver to Buyer a Bill of Sale evidencing the sale of the Allocated Mitigation to Buyer. This reservation shall in no way restrain Seller from selling to others the remaining Mitigation Values at the Locust Road Preserve or the remaining credits at the Toad Hill Bank, so long as the aggregate number of Mitigation Values sold to all parties, including Buyer, from the Locust Road Preserve (or the Toad Hill Bank, if applicable), does not exceed the aggregate number of Mitigation Values available at the Locust Road Preserve (or credits available at the Toad Hill Bank, if applicable). Seller hereby represents to Buyer that no person or entity other than Buyer has any rights in or right to acquire or obtain any interest in the Allocated Mitigation, and as long as this Agreement remains in force, Seller will not transfer, option, mortgage, pledge or convey its interest in the Allocated Mitigation.

(d) Project Approvals. Buyer shall be solely responsible to the Applicable Agencies to mitigate the impacts of the Project with the Allocated Mitigation. In that regard, Seller has made and makes no representation, warranty or guaranty that the Applicable Agencies will approve the Locust Road Preserve or the Toad Hill Bank as suitable mitigation for the Project or that the Allocated Mitigation will be sufficient to fully mitigate the impacts of the Project. Notwithstanding the foregoing provision, Seller shall reasonably cooperate with Buyer's efforts to obtain the Applicable Agencies' approval of the use of the Allocated Mitigation for Buyer's Project by providing information required by the Applicable Agencies and executing documents required by the Applicable Agencies.

(e) Limitations on Assignment; Transfer. Buyer acknowledges that Seller is not willing to sell the Allocated Mitigation which could be resold in competition with the remaining the Mitigation Values available for sale from the Locust Road Preserve or the Toad Hill Bank, if applicable. Accordingly, Buyer shall be prohibited from transferring any Mitigation Values (or Toad Hill Credits, if applicable) to a third party without the prior written consent and approval of Seller, which Seller may withhold in its sole and absolute discretion.

6. Seller' Right To Create a Conservation Bank; Mitigation Bank. Seller specifically reserves the right to create a mitigation bank or conservation bank on the Locust Road Preserve. If Seller elects to do so, in Seller' sole discretion: (a) the Allocated Mitigation shall be provided in the form of conservation bank credits or mitigation bank credits; (b) Buyer shall have no

obligations with respect to the conservation bank or mitigation bank; and (c) Buyer shall have no rights to any proceeds or excess credits of the conservation bank or mitigation bank.

7. Default by Buyer; Liquidated Damages. BUYER RECOGNIZES THAT THE ALLOCATED MITIGATION WILL BE REMOVED BY SELLER FROM THE MARKET DURING THE EXISTENCE OF THIS AGREEMENT, AND THAT IF THE CLOSING DOES NOT OCCUR BECAUSE OF BUYER'S DEFAULT, IT WOULD BE EXTREMELY DIFFICULT AND IMPRACTICAL TO ASCERTAIN THE EXTENT OF THE DETRIMENT TO SELLER. THE PARTIES HAVE DETERMINED AND AGREED THAT THE ACTUAL AMOUNT OF DAMAGES THAT WOULD BE SUFFERED BY SELLER AS A RESULT OF ANY SUCH DEFAULT IS DIFFICULT OR IMPRACTICABLE TO DETERMINE AS OF THE DATE OF THIS AGREEMENT AND THAT THE AMOUNT OF THE DEPOSIT IS A REASONABLE ESTIMATE OF THE AMOUNT OF SUCH DAMAGES. FOR THESE REASONS, THE PARTIES AGREE THAT IF THE CLOSING DOES NOT OCCUR BECAUSE OF BUYER'S DEFAULT, THAT THE DEPOSIT SHALL BE FORFEITED TO SELLER AS LIQUIDATED DAMAGES. UPON ANY SUCH BREACH OR DEFAULT BY BUYER HEREUNDER, THIS AGREEMENT SHALL BE TERMINATED, AND NEITHER PARTY SHALL HAVE ANY FURTHER RIGHTS OR OBLIGATIONS HEREUNDER, EACH TO THE OTHER, EXCEPT FOR THE RIGHT OF SELLER TO RETAIN SUCH LIQUIDATED DAMAGES. DELIVERY TO AND RETENTION OF THE DEPOSIT AMOUNT SHALL BE SELLER'S SOLE AND EXCLUSIVE REMEDY AGAINST BUYER IN THE EVENT OF A MATERIAL DEFAULT OR BREACH BY BUYER RESULTING IN THE FAILURE OF CLOSING, AND SELLER WAIVES ANY AND ALL RIGHT TO SEEK OTHER RIGHTS OR REMEDIES AGAINST BUYER FOR SUCH MATERIAL DEFAULT, INCLUDING WITHOUT LIMITATION, SPECIFIC PERFORMANCE. THE PAYMENT AND RETENTION OF SUCH AMOUNT AS LIQUIDATED DAMAGES IS NOT INTENDED AS A FORFEITURE OR PENALTY WITHIN THE MEANING OF CALIFORNIA CIVIL CODE SECTIONS 3275 OR 3369, BUT IS INTENDED TO CONSTITUTE LIQUIDATED DAMAGES TO SELLER PURSUANT TO CALIFORNIA CIVIL CODE SECTIONS 1671, 1676 AND 1677. SELLER HEREBY WAIVES THE PROVISIONS OF CALIFORNIA CIVIL CODE SECTION 3389.

Seller 

Buyer 

8. Miscellaneous Provisions.

(a) Ownership of Documents. All work papers, drawings, internal memoranda of any kind, photographs, and any written or graphic material, however produced, prepared by Seller in connection with its performance of services hereunder shall be, and shall remain after termination of this Agreement, the property of Seller, and may be used by Seller for any purpose whatsoever. Seller agrees to return to Buyer upon termination of this Agreement all documents, drawings, photographs and other written or graphic material, however produced, received from Buyer and used by Seller in the performance of its services hereunder.

(b) Notices. All notices, demands, consents, requests or other communications required to or permitted to be given pursuant to this Agreement shall be in writing, shall be given only in accordance with the provisions of this Section, shall be addressed to the parties in the manner set forth below, and shall be conclusively deemed to have been properly delivered: (a) upon receipt when hand delivered during normal business hours; (b) upon receipt when sent by facsimile prior to 5:00 p.m. of a given business day (otherwise such receipt is deemed as of the following business day) to the number set forth below (provided, however, that notices given by facsimile shall not be effective unless the sending party's machine provides written confirmation of successful delivery thereof); (c) upon the day of delivery if the notice has been deposited in a authorized receptacle of the United States Postal Service as first-class, registered or certified mail, postage prepaid, with a return receipt requested (provided that the sender has in its possession the return receipt to prove actual delivery); or (d) one (1) Business Day after the notice has been deposited with either FedEx or United Parcel Service to be delivered by overnight delivery (provided that the sending party receives a confirmation of actual delivery from the courier). The addresses of the parties to receive notices are as follows:

To Seller: Wildlands, Inc.
3855 Atherton Road
Rocklin, California 95765
Attention: Mark Heintz, Vice President and General Counsel
Telephone: (916) 435-3555
Facsimile: (916) 435-3556

To Buyer: Harsch Investment Properties, LLC
1121 SW Salmon Street, 5th Floor
Portland, Oregon 97205
Attention: Legal Department
Telephone: (503) 242-2900
Facsimile: (503) 274-2093

Any party may change its address for purposes of this section by giving the other party written notice of the new address in the manner set forth above.

(c) Partial Invalidity. If any term or provision of this Agreement or the application thereof to any person or circumstance shall, to any extent, be invalid or unenforceable, the remainder of this Agreement, or the application of such term or provision to persons or circumstances other than those as to which it is held invalid or unenforceable, shall not be affected thereby, and each such term and provision of this Agreement shall be valid, and shall be enforced to the fullest extent permitted by law.

(d) Waivers. No waiver of any breach of any covenant or provision herein contained shall be deemed a waiver of any preceding or succeeding breach thereof, or of any other covenant or provision herein contained. No extension of time for performance of any obligation or act shall be deemed an extension of time for performance of any other obligation or act except those of the waiving party, which shall be extended by a period of time equal to the period of the delay.

(e) Successors and Assigns. This Agreement shall be binding upon and shall inure to the benefit of the permitted successors and assigns of the parties hereto.

(f) Resolution of Disputes; Arbitration. Any dispute, controversy or claim arising out of or relating to this Agreement, including any dispute relating to interpretation of or performance under the Agreement ("**Dispute**"), shall be resolved in the manner set forth in this Section 8(f), which shall be in lieu of litigation in any court, and the parties specifically waive any right to a jury trial of any Dispute between them.

(i) Negotiation. The parties will attempt in good faith to resolve the Dispute promptly by negotiations between senior representatives of the parties who have the authority to settle the Dispute (each a "**Representative**").

(ii) ARBITRATION OF DISPUTES. In the event the Representatives are not able to resolve the Dispute within thirty (30) days following the date one party first notifies the other party of the Dispute in writing, the Dispute shall be resolved by binding arbitration before a retired judge of the Superior Court, Appellate Court or Supreme Court of the State of California (the "**Arbitrator**") in accordance with the following provisions:

(1) The parties stipulate and agree that any and all necessary parties may be joined in the arbitration, but the parties agree to proceed with arbitration of all Disputes between themselves even if other parties refuse to participate. The parties specifically waive any objection to arbitration based on the failure or refusal of any other party to be joined.

(2) The arbitration shall be initiated by written notice (the "**Arbitration Notice**") of a demand to arbitrate by registered or certified mail sent by one party to the other party. The Arbitration Notice shall include a plain statement of the Dispute and the relief requested. It shall attach the documents the party demanding arbitration relies upon and a detailed statement of the expected testimony of witnesses, including expert witnesses. Within thirty (30) days of receipt of the Arbitration Notice, the responding party shall provide its own plain statement of the Dispute, together with documents it intends to rely upon and the expected testimony of witnesses, including expert witnesses. The parties shall each advance one-half of the Arbitrator's fee, as fixed and required by the Arbitrator in order to initiate the arbitration, although they shall ultimately bear responsibility for such fee as determined by the Arbitrator.

(3) The parties shall attempt to agree on an Arbitrator. If they are unable to agree, either party may petition the presiding judge of the Superior Court for the County of Placer to appoint the Arbitrator.

(4) The Arbitrator shall have the power to grant all legal and equitable remedies, including, but not limited to, injunction, specific performance, reformation, cancellation, accounting and compensatory damages, except that under no circumstances shall either party be liable for and the Arbitrator shall not have the power to award any special, consequential or punitive damages. The Arbitrator shall issue a binding decision within thirty (30) days of the conclusion of the arbitration. The Arbitrator's decision shall be conclusive and binding, and it may be confirmed thereafter as a judgment by the Superior Court of the State of California, subject only to challenge on the grounds set forth in California Code of Civil

Procedure Section 1286.2. The validity and enforceability of the Arbitrator's decision is to be determined exclusively by the California courts pursuant to the provisions of this Section 8(f).

(5) The Arbitrator may award reasonable attorneys' fees and costs, including the Arbitrator's fees and expert fees, to the "Prevailing Party." For purposes of this section, the "**Prevailing Party**" shall be the party which substantially obtains or successfully resists the equitable relief sought or the party which obtains a net monetary recovery, exclusive of attorneys' fees and costs UNLESS the net monetary recovery is equal to or less than the amount of a written offer from the opposing party made after the negotiations described in Section 8(f)(i). The Arbitrator shall have exclusive and binding authority to determine entitlement to attorneys' fees and costs, including Arbitrator's and experts' fees, under this section.

(6) The arbitration shall be conducted in Placer County, California. Any party may be represented by counsel or other authorized representative.

"NOTICE: BY INITIALLING IN THE SPACE BELOW YOU ARE AGREEING TO HAVE ANY DISPUTE ARISING OUT OF THE MATTERS INCLUDED IN THE 'ARBITRATION OF DISPUTES' PROVISION DECIDED BY NEUTRAL ARBITRATION AS PROVIDED BY CALIFORNIA LAW AND YOU ARE GIVING UP ANY RIGHTS YOU MIGHT POSSESS TO HAVE THE DISPUTE LITIGATED IN A COURT OR JURY TRIAL. BY INITIALLING IN THE SPACE BELOW YOU ARE GIVING UP YOUR JUDICIAL RIGHTS TO DISCOVERY AND APPEAL, UNLESS THOSE RIGHTS ARE SPECIFICALLY INCLUDED IN THE 'ARBITRATION OF DISPUTES' PROVISION. IF YOU REFUSE TO SUBMIT TO ARBITRATION AFTER AGREEING TO THIS PROVISION, YOU MAY BE COMPELLED TO ARBITRATE UNDER THE AUTHORITY OF THE CALIFORNIA CODE OF CIVIL PROCEDURE. YOUR AGREEMENT TO THIS ARBITRATION PROVISION IS VOLUNTARY.

"WE HAVE READ AND UNDERSTAND THE FOREGOING AND AGREE TO SUBMIT DISPUTES ARISING OUT OF THE MATTERS INCLUDED IN THE 'ARBITRATION OF DISPUTES' PROVISION TO NEUTRAL ARBITRATION."

Buyer's Initials

Seller's Initials

(g) Attorneys' Fees Defined. For the purpose of this Agreement, the terms "attorneys' fees" or "attorneys' fees and costs" shall mean the fees and expenses of counsel to the parties hereto, which may include printing, photostating, duplicating and other expenses, air freight charges, and fees billed for law clerks, paralegals, librarians and others not admitted to the bar but performing services under the supervision of an attorney. The terms "attorneys' fees" or "attorneys' fees and costs" shall also include, without limitation, all such fees and expenses

incurred with respect to appeals, arbitrations and bankruptcy proceedings, and whether or not any action or proceeding is brought with respect to the matter for which said fees and expenses were incurred. The term "attorney" shall have the same meaning as the term "counsel."

(h) Entire Agreement. This Agreement (including all Exhibits attached hereto) is the final expression of, and contains the entire agreement between, the parties with respect to the subject matter hereof and supersedes all prior understandings with respect thereto. This Agreement may not be modified, changed, supplemented, superseded, canceled or terminated, nor may any obligations hereunder be waived, except by written instrument signed by the party to be charged or by its agent duly authorized in writing or as otherwise expressly permitted herein. The parties do not intend to confer any benefit hereunder on any person, firm or corporation other than the parties hereto and lawful assignees.

(i) Time of Essence. Seller and Buyer hereby acknowledge and agree that time is strictly of the essence with respect to each and every term, condition, obligation and provision under this Agreement and that failure to timely perform any of the terms, conditions, obligations or provisions hereof by either party shall constitute a material breach of and a non curable (but waivable) default under this Agreement by the party so failing to perform.

(j) Relationship of Parties. Nothing contained in this Agreement shall be deemed or construed by the parties to create the relationship of principal and agent, a partnership, joint venture or any other association between Buyer and Seller, except as provided in this Agreement.

(k) Construction. Headings at the beginning of each paragraph and subparagraph are solely for the convenience of the parties and are not a part of the Agreement. Whenever required by the context of this Agreement, the singular shall include the plural and the masculine shall include the feminine and vice versa. This Agreement shall not be construed as if it had been prepared by one of the parties, but rather as if both parties had prepared the same. Unless otherwise indicated, all references to paragraphs, sections, subparagraphs and subsections are to this Agreement. All exhibits referred to in this Agreement are attached and incorporated by this reference.

(l) Exhibits. The exhibits to this Agreement, are hereby incorporated by reference into this Agreement.

(m) Choice of Law; Venue. This Agreement shall be governed by and construed in accordance with the laws of the State of California. Any suit, action or proceeding brought under the scope of this Agreement shall be brought and maintained to the extent allowed by law in the County of Placer, California.

(n) Counterparts. This Agreement may be executed in multiple counterparts, each of which shall be deemed an original, but all of which, together, shall constitute one and the same instrument.

(o) Days of Week. A "**Business Day**," as used herein, shall mean any day other than a Saturday, Sunday or holiday, as defined in Section 6700 of the California Government

Code. If any date for performance herein falls on a day other than a Business Day, the time for such performance shall be extended to 5:00 p.m. on the next Business Day.

(p) Representation by Counsel. Notwithstanding any rule or maxim of construction to the contrary, any ambiguity or uncertainty shall not be construed against either Buyer or Seller based upon authorship of any of the provisions hereof. Buyer and Seller each hereby warrant, represent and certify to the other as follows: (a) that the contents of this Agreement have been completely and carefully read by the representing party and counsel for the representing party; (b) that the representing party has been separately represented by counsel and the representing party is satisfied with such representation; (c) that the representing party's counsel has advised the representing party of, and the representing party fully understands, the legal consequences of this Agreement; and (d) that no other person (whether a party to this Agreement or not) has made any threats, promises or representations of any kind whatsoever to induce the execution hereof, other than the performance of the terms and provisions hereof.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement as of the dates set forth below.

PRE-CONSTRUCTION SURVEY REPORT (ECORPS: MARCH 19, 2015)

March 19, 2015

Ms. Erica Gray
Development Coordinator
Harsch Investment Properties
1121 SW Salmon Street, Suite 500
Portland, Oregon 97205

**RE: *Blue Oaks Commerce Center, City of Roseville, Placer County, California –
Preconstruction Nesting Bird Survey***

Dear Ms. Gray:

At your request, ECORP Consulting, Inc. (ECORP) conducted a nesting bird survey for the Blue Oaks Commerce Center project site located in the City of Roseville, Placer County, California. The project site is bounded by Blue Oaks Boulevard on the north, Industrial Avenue on the west, and Washington Boulevard on the east. This survey included all trees and open areas located within the project site, and all suitable habitats within publicly accessible areas within 300 feet of the project.

The Federal Migratory Bird Treaty Act (MBTA) protects most naturally occurring birds (including common species) and makes it illegal to take, possess, export, transport, sell, purchase, barter or offer for sale, purchase, or barter any migratory bird, or the parts, nests, or eggs of such a bird except under the terms of a valid permits issued pursuant to Federal regulations. The California Fish and Game Code §3503 makes it unlawful to take, possess, or needlessly destroy the nest or eggs of any bird, except as otherwise provided by this code or any regulation pursuant thereto. All raptors (owls, hawks, eagles, and falcons), including their nests, are protected from take pursuant to the California Fish and Game Code §3503.5, and the MBTA, among other federal and state regulations. Potential tree-nesting raptors within this region include Great Horned Owl (*Bubo virginianus*), Red-tailed Hawk (*Buteo jamaicensis*), White-tailed Kite (*Elanus leucurus*), Cooper's Hawk (*Accipiter cooperii*), and American Kestrel (*Falco sparverius*), among others. Potential ground-nesting raptors include Northern Harrier (*Circus cyaneus*) and Burrowing Owl (*Athene cunicularia*).

This survey was conducted via visual observation on March 19, 2015 by ECORP senior biologist Keith Kwan. Binoculars (10x40 magnification) and a spotting scope (20-60x magnification) were used to assist with field identification and observations. Trees were visually inspected from multiple angles for active nests, and transects were walked through open areas to locate potential ground-nesting species. Transects were spaced approximately 50 feet apart to ensure complete coverage.

During this survey, no active bird nests were found within the project site and the 300-foot survey area. The project site has been previously graded and treated with hydroseed erosion control. There are no trees on the project site, but several are located offsite, along Industrial Avenue in the industrial development to the south. A list of birds observed is included as Attachment A.

Cliff Swallows (*Petrochelidon pyrrhonota*) are beginning to nest under the Blue Oaks Boulevard overpass at Industrial Avenue, but these should not be affected by site construction, which is over 300 feet away.

In conclusion, no active bird nests were found during the survey conducted on March 19, 2015. It is recommended that a follow up survey be conducted if no construction activity occurs within 14 days of this survey, as new nests could be built within the survey area at any time during this period.

If you have any questions feel free to contact me at (916) 782-9100.

Sincerely,

Keith Kwan
Senior Biologist

SUPPORTING AGENCY SPECIES LISTS

- C1 - USFWS IPAC
- C2 - USFWS NWI MAP
- C3 - CDFW CNDDDB 5-MILE OCCURRENCE LIST
- C4 - CNPS 9-QUAD QUERY RESULTS

IPaC resource list

This report is an automatically generated list of species and other resources such as critical habitat (collectively referred to as *trust resources*) under the U.S. Fish and Wildlife Service's (USFWS) jurisdiction that are known or expected to be on or near the project area referenced below. The list may also include trust resources that occur outside of the project area, but that could potentially be directly or indirectly affected by activities in the project area. However, determining the likelihood and extent of effects a project may have on trust resources typically requires gathering additional site-specific (e.g., vegetation/species surveys) and project-specific (e.g., magnitude and timing of proposed activities) information.

Below is a summary of the project information you provided and contact information for the USFWS office(s) with jurisdiction in the defined project area. Please read the introduction to each section that follows (Endangered Species, Migratory Birds, USFWS Facilities, and NWI Wetlands) for additional information applicable to the trust resources addressed in that section.

Sacramento, CA 95825-1846

NOT FOR CONSULTATION

Endangered species

This resource list is for informational purposes only and does not constitute an analysis of project level impacts.

The primary information used to generate this list is the known or expected range of each species. Additional areas of influence (AOI) for species are also considered. An AOI includes areas outside of the species range if the species could be indirectly affected by activities in that area (e.g., placing a dam upstream of a fish population even if that fish does not occur at the dam site, may indirectly impact the species by reducing or eliminating water flow downstream). Because species can move, and site conditions can change, the species on this list are not guaranteed to be found on or near the project area. To fully determine any potential effects to species, additional site-specific and project-specific information is often required.

Section 7 of the Endangered Species Act **requires** Federal agencies to "request of the Secretary information whether any species which is listed or proposed to be listed may be present in the area of such proposed action" for any project that is conducted, permitted, funded, or licensed by any Federal agency. A letter from the local office and a species list which fulfills this requirement can **only** be obtained by requesting an official species list from either the Regulatory Review section in IPaC (see directions below) or from the local field office directly.

For project evaluations that require USFWS concurrence/review, please return to the IPaC website and request an official species list by doing the following:

1. Draw the project location and click CONTINUE.
2. Click DEFINE PROJECT.
3. Log in (if directed to do so).
4. Provide a name and description for your project.
5. Click REQUEST SPECIES LIST.

Listed species¹ and their critical habitats are managed by the [Ecological Services Program](#) of the U.S. Fish and Wildlife Service (USFWS) and the fisheries division of the National Oceanic and Atmospheric Administration (NOAA Fisheries²).

Species and critical habitats under the sole responsibility of NOAA Fisheries are **not** shown on this list. Please contact [NOAA Fisheries](#) for [species under their jurisdiction](#).

-
1. Species listed under the Endangered Species Act are threatened or endangered; IPaC also shows species that are candidates, or proposed, for listing. See the [listing status page](#) for more information. IPaC only shows species that are regulated by USFWS (see FAQ).

2. [NOAA Fisheries](#), also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

The following species are potentially affected by activities in this location:

Fishes

NAME	STATUS
Delta Smelt <i>Hypomesus transpacificus</i> Wherever found There is final critical habitat for this species. Your location does not overlap the critical habitat. https://ecos.fws.gov/ecp/species/321	Threatened

Insects

NAME	STATUS
Monarch Butterfly <i>Danaus plexippus</i> Wherever found No critical habitat has been designated for this species. https://ecos.fws.gov/ecp/species/9743	Candidate
Valley Elderberry Longhorn Beetle <i>Desmocerus californicus dimorphus</i> Wherever found There is final critical habitat for this species. Your location does not overlap the critical habitat. https://ecos.fws.gov/ecp/species/7850	Threatened

Crustaceans

NAME	STATUS
Conservancy Fairy Shrimp <i>Branchinecta conservatio</i> Wherever found There is final critical habitat for this species. Your location does not overlap the critical habitat. https://ecos.fws.gov/ecp/species/8246	Endangered

Vernal Pool Fairy Shrimp *Branchinecta lynchi*

Threatened

Wherever found

There is **final** critical habitat for this species. Your location does not overlap the critical habitat.

<https://ecos.fws.gov/ecp/species/498>

Vernal Pool Tadpole Shrimp *Lepidurus packardii*

Endangered

Wherever found

There is **final** critical habitat for this species. Your location does not overlap the critical habitat.

<https://ecos.fws.gov/ecp/species/2246>

Critical habitats

Potential effects to critical habitat(s) in this location must be analyzed along with the endangered species themselves.

There are no critical habitats at this location.

Migratory birds

Certain birds are protected under the Migratory Bird Treaty Act¹ and the Bald and Golden Eagle Protection Act².

Any person or organization who plans or conducts activities that may result in impacts to migratory birds, eagles, and their habitats should follow appropriate regulations and consider implementing appropriate conservation measures, as described [below](#).

1. The [Migratory Birds Treaty Act](#) of 1918.
2. The [Bald and Golden Eagle Protection Act](#) of 1940.

Additional information can be found using the following links:

- Birds of Conservation Concern <https://www.fws.gov/program/migratory-birds/species>
- Measures for avoiding and minimizing impacts to birds
<https://www.fws.gov/library/collections/avoiding-and-minimizing-incidental-take-migratory-birds>
- Nationwide conservation measures for birds
<https://www.fws.gov/sites/default/files/documents/nationwide-standard-conservation-measures.pdf>

The birds listed below are birds of particular concern either because they occur on the [USFWS Birds of Conservation Concern](#) (BCC) list or warrant special attention in your project location. To learn more about the levels of concern for birds on your list and how this list is generated, see the FAQ [below](#). This is not a list of every bird you may find in this location, nor a guarantee that every bird on this list will be found in your project area. To see exact locations of where birders and the general public have sighted birds in and around your project area, visit the [E-bird data mapping tool](#) (Tip: enter your location, desired date range and a species on your list). For projects that occur off the Atlantic Coast, additional maps and models detailing the relative occurrence and abundance of bird species on your list are available. Links to additional information about Atlantic Coast birds, and other important information about your migratory bird list, including how to properly interpret and use your migratory bird report, can be found [below](#).

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to migratory birds on your list, click on the PROBABILITY OF PRESENCE SUMMARY at the top of your list to see when these birds are most likely to be present and breeding in your project area.

NAME	BREEDING SEASON
Bald Eagle <i>Haliaeetus leucocephalus</i> This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities.	Breeds Jan 1 to Aug 31
Belding's Savannah Sparrow <i>Passerculus sandwichensis beldingi</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA https://ecos.fws.gov/ecp/species/8	Breeds Apr 1 to Aug 15
Bullock's Oriole <i>Icterus bullockii</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA	Breeds Mar 21 to Jul 25
California Gull <i>Larus californicus</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds Mar 1 to Jul 31
Common Yellowthroat <i>Geothlypis trichas sinuosa</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA https://ecos.fws.gov/ecp/species/2084	Breeds May 20 to Jul 31

Golden Eagle <i>Aquila chrysaetos</i> This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/1680	Breeds Jan 1 to Aug 31
Lawrence's Goldfinch <i>Carduelis lawrencei</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9464	Breeds Mar 20 to Sep 20
Long-eared Owl <i>asio otus</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/3631	Breeds Mar 1 to Jul 15
Nuttall's Woodpecker <i>Picoides nuttallii</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA https://ecos.fws.gov/ecp/species/9410	Breeds Apr 1 to Jul 20
Oak Titmouse <i>Baeolophus inornatus</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9656	Breeds Mar 15 to Jul 15
Olive-sided Flycatcher <i>Contopus cooperi</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/3914	Breeds May 20 to Aug 31
Short-billed Dowitcher <i>Limnodromus griseus</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9480	Breeds elsewhere
Tricolored Blackbird <i>Agelaius tricolor</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/3910	Breeds Mar 15 to Aug 10

Wrentit *Chamaea fasciata*

Breeds Mar 15 to Aug 10

This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Yellow-billed Magpie *Pica nuttalli*

Breeds Apr 1 to Jul 31

This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

<https://ecos.fws.gov/ecp/species/9726>

Probability of Presence Summary

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read and understand the FAQ "Proper Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

Probability of Presence (■)

Each green bar represents the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during a particular week of the year. (A year is represented as 12 4-week months.) A taller bar indicates a higher probability of species presence. The survey effort (see below) can be used to establish a level of confidence in the presence score. One can have higher confidence in the presence score if the corresponding survey effort is also high.

How is the probability of presence score calculated? The calculation is done in three steps:

1. The probability of presence for each week is calculated as the number of survey events in the week where the species was detected divided by the total number of survey events for that week. For example, if in week 12 there were 20 survey events and the Spotted Towhee was found in 5 of them, the probability of presence of the Spotted Towhee in week 12 is 0.25.
2. To properly present the pattern of presence across the year, the relative probability of presence is calculated. This is the probability of presence divided by the maximum probability of presence across all weeks. For example, imagine the probability of presence in week 20 for the Spotted Towhee is 0.05, and that the probability of presence at week 12 (0.25) is the maximum of any week of the year. The relative probability of presence on week 12 is $0.25/0.25 = 1$; at week 20 it is $0.05/0.25 = 0.2$.
3. The relative probability of presence calculated in the previous step undergoes a statistical conversion so that all possible values fall between 0 and 10, inclusive. This is the probability of presence score.

To see a bar's probability of presence score, simply hover your mouse cursor over the bar.

Yellow bars denote a very liberal estimate of the time-frame inside which the bird breeds across its entire range. If there are no yellow bars shown for a bird, it does not breed in your project area.

Vertical black lines superimposed on probability of presence bars indicate the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps. The number of surveys is expressed as a range, for example, 33 to 64 surveys.

A week is marked as having no data if there were no survey events for that week.

Surveys from only the last 10 years are used in order to ensure delivery of currently relevant information. The exception to this is areas off the Atlantic coast, where bird returns are based on all years of available data, since data in these areas is currently much more sparse.

Tell me more about conservation measures I can implement to avoid or minimize impacts to migratory birds.

[Nationwide Conservation Measures](#) describes measures that can help avoid and minimize impacts to all birds at any location year round. Implementation of these measures is particularly important when birds are most likely to occur in the project area. When birds may be breeding in the area, identifying the locations of any active nests and avoiding their destruction is a very helpful impact minimization measure. To see when birds are most likely to occur and be breeding in your project area, view the Probability of Presence Summary. [Additional measures](#) or [permits](#) may be advisable depending on the type of activity you are conducting and the type of infrastructure or bird species present on your project site.

What does IPaC use to generate the list of migratory birds that potentially occur in my specified location?

The Migratory Bird Resource List is comprised of USFWS [Birds of Conservation Concern \(BCC\)](#) and other species that may warrant special attention in your project location.

The migratory bird list generated for your project is derived from data provided by the [Avian Knowledge Network \(AKN\)](#). The AKN data is based on a growing collection of [survey, banding, and citizen science datasets](#) and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle ([Eagle Act](#) requirements may apply), or a species that has a particular vulnerability to offshore activities or development.

Again, the Migratory Bird Resource list includes only a subset of birds that may occur in your project area. It is not representative of all birds that may occur in your project area. To get a list of all birds potentially present in your project area, please visit the [Rapid Avian Information Locator \(RAIL\) Tool](#).

What does IPaC use to generate the probability of presence graphs for the migratory birds potentially occurring in my specified location?

The probability of presence graphs associated with your migratory bird list are based on data provided by the [Avian Knowledge Network \(AKN\)](#). This data is derived from a growing collection of [survey, banding, and citizen science datasets](#).

Probability of presence data is continuously being updated as new and better information becomes available. To learn more about how the probability of presence graphs are produced and how to interpret them, go to the Probability of Presence Summary and then click on the "Tell me about these graphs" link.

How do I know if a bird is breeding, wintering or migrating in my area?

To see what part of a particular bird's range your project area falls within (i.e. breeding, wintering, migrating or year-round), you may query your location using the [RAIL Tool](#) and look at the range maps provided for birds in your area at the bottom of the profiles provided for each bird in your results. If a bird on your migratory bird species list has a breeding season associated with it, if that bird does occur in your project area, there may be nests present at some point within the timeframe specified. If "Breeds elsewhere" is indicated, then the bird likely does not breed in your project area.

What are the levels of concern for migratory birds?

Migratory birds delivered through IPaC fall into the following distinct categories of concern:

1. "BCC Rangewide" birds are [Birds of Conservation Concern](#) (BCC) that are of concern throughout their range anywhere within the USA (including Hawaii, the Pacific Islands, Puerto Rico, and the Virgin Islands);
2. "BCC - BCR" birds are BCCs that are of concern only in particular Bird Conservation Regions (BCRs) in the continental USA; and
3. "Non-BCC - Vulnerable" birds are not BCC species in your project area, but appear on your list either because of the [Eagle Act](#) requirements (for eagles) or (for non-eagles) potential susceptibilities in offshore areas from certain types of development or activities (e.g. offshore energy development or longline fishing).

Although it is important to try to avoid and minimize impacts to all birds, efforts should be made, in particular, to avoid and minimize impacts to the birds on this list, especially eagles and BCC species of rangewide concern. For more information on conservation measures you can implement to help avoid and minimize migratory bird impacts and requirements for eagles, please see the FAQs for these topics.

Details about birds that are potentially affected by offshore projects

For additional details about the relative occurrence and abundance of both individual bird species and groups of bird species within your project area off the Atlantic Coast, please visit the [Northeast Ocean Data Portal](#). The Portal also offers data and information about other taxa besides birds that may be helpful to you in your project review. Alternately, you may download the bird model results files underlying the portal maps through the [NOAA NCCOS Integrative Statistical Modeling and Predictive Mapping of Marine Bird Distributions and Abundance on the Atlantic Outer Continental Shelf](#) project webpage.

Bird tracking data can also provide additional details about occurrence and habitat use throughout the year, including migration. Models relying on survey data may not include this information. For additional information on marine bird tracking data, see the [Diving Bird Study](#) and the [nanotag studies](#) or contact [Caleb Spiegel](#) or [Pam Loring](#).

What if I have eagles on my list?

If your project has the potential to disturb or kill eagles, you may need to [obtain a permit](#) to avoid violating the Eagle Act should such impacts occur.

Proper Interpretation and Use of Your Migratory Bird Report

The migratory bird list generated is not a list of all birds in your project area, only a subset of birds of priority concern. To learn more about how your list is generated, and see options for identifying what other birds may be in your project area, please see the FAQ "What does IPaC use to generate the migratory birds potentially occurring in my specified location". Please be aware this report provides the "probability of presence" of birds within the 10 km grid cell(s) that overlap your project; not your exact project footprint. On the graphs provided, please also look carefully at the survey effort (indicated by the black vertical bar) and for the existence of the "no data" indicator (a red horizontal bar). A high survey effort is the key component. If the survey effort is high, then the probability of presence score can be viewed as more dependable. In contrast, a low survey effort bar or no data bar means a lack of data and, therefore, a lack of certainty about presence of the species. This list is not perfect; it is simply a starting point for identifying what birds of concern have the potential to be in your project area, when they might be there, and if they might be breeding (which means nests might be present). The list helps you know what to look for to confirm presence, and helps guide you in knowing when to implement conservation measures to avoid or minimize potential impacts from your project activities, should presence be confirmed. To learn more about conservation measures, visit the FAQ "Tell me about conservation measures I can implement to avoid or minimize impacts to migratory birds" at the bottom of your migratory bird trust resources page.

Facilities

National Wildlife Refuge lands

Any activity proposed on lands managed by the [National Wildlife Refuge](#) system must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

There are no refuge lands at this location.

Fish hatcheries

There are no fish hatcheries at this location.

Wetlands in the National Wetlands Inventory (NWI)

Impacts to [NWI wetlands](#) and other aquatic habitats may be subject to regulation under Section 404 of the Clean Water Act, or other State/Federal statutes.

For more information please contact the Regulatory Program of the local [U.S. Army Corps of Engineers District](#).

Wetland information is not available at this time

This can happen when the National Wetlands Inventory (NWI) map service is unavailable, or for very large projects that intersect many wetland areas. Try again, or visit the [NWI map](#) to view wetlands at this location.

Data limitations

The Service's objective of mapping wetlands and deepwater habitats is to produce reconnaissance level information on the location, type and size of these resources. The maps are prepared from the analysis of high altitude imagery. Wetlands are identified based on vegetation, visible hydrology and geography. A margin of error is inherent in the use of imagery; thus, detailed on-the-ground inspection of any particular site may result in revision of the wetland boundaries or classification established through image analysis.

The accuracy of image interpretation depends on the quality of the imagery, the experience of the image analysts, the amount and quality of the collateral data and the amount of ground truth verification work conducted. Metadata should be consulted to determine the date of the source imagery used and any mapping problems.

Wetlands or other mapped features may have changed since the date of the imagery or field work. There may be occasional differences in polygon boundaries or classifications between the information depicted on the map and the actual conditions on site.

Data exclusions

Certain wetland habitats are excluded from the National mapping program because of the limitations of aerial imagery as the primary data source used to detect wetlands. These habitats include seagrasses or submerged aquatic vegetation that are found in the intertidal and subtidal zones of estuaries and nearshore coastal waters. Some deepwater reef communities (coral or tubercid worm reefs) have also been excluded from the inventory. These habitats, because of their depth, go undetected by aerial imagery.

Data precautions

Federal, state, and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, state, or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate Federal, state, or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

FLOODPLAIN OF PLEASANT GROVE CREEK. APPROX 2.2 AIR MILES E OF JCT PLACER BLVD & SPRR TRACKS.	APPROXIMATELY 4 MILES NE OF ROSEVILLE.	0.75 MILE SOUTH OF THE INTERSECTION OF HIGHWAY 65 AND PLEASANT GROVE ROAD, EAST OF HIGHWAY 65.	NORTH OF PLEASANT GROVE CREEK. APPROX. 1.5 AIR MILES NW OF R. F. FIDDYMENT RANCH, NW OF ROSEVILLE.
WHEN VISITED IN 1997, WHAT APPEARS TO BE DEDICATED OPEN SPACE WAS SEEN JUST TO THE EAST OF MAPPED LOCATION FOR THIS SITE. FUTURE SURVEYS SHOULD TARGET THIS AREA.	WITHIN STANFORD RANCH ALKALI SEEP PRESERVE, SPRING VALLEY. SITE IS NEAR PARK DRIVE AND STANFORD RANCH ROAD INTERSECTION. IN THE SW 1/4 SECTION 12. NEAR 3 SEEPS.		MAPPED IN THE SE 1/4 OF THE NW 1/4 OF SECTION 14 ACCORDING TO LAT/LONG COORDINATES PROVIDED BY FISHER.
VERNAL POOL AREA IN FLOODPLAIN OF INTERMITTENT STREAM. ASSOCIATED WITH RANUNCULUS BONARIENSIS TRISEPALUS.	SPRING FED ALKALI MEADOW WITH DISTICHLIS SPICATA, SCIRPUS OLNEYI, FRANKENIA GRANDIFOLIA VAR. CAMPESTRIS, CRESSA TRUXILLENSIS, MONERMA CYLINDRICA, AND LIPPIA NODIFLORA. AREA SURROUNDED BY ALAMO VARIANT CLAY, BUT SOIL AT SITE IS UNCLASSIFIED.	VERNAL POOL ON CLAYPAN SUBSTRATE. ASSOCIATED WITH DOWNINGIA BICORNUTA, D. ORNATISSIMA, ALLOCARYA STIPITATA MICRANTHA.	OCCURS IN ONE OF THE DEEPER BASIN VERNAL POOLS IN THE AREA; ONLY VERNAL POOL WITH STANDING WATER AT TIME OF SURVEY (1-2"); ASSOCIATED WITH ERYNGIUM VASEYI, NAVARRETTIA LEUCOCEPHALA, DOWNINGIA BICORNUTA, AND THE RARE DOWNINGIA PUSILLA.
ABOUT 100 PLANTS IN 1984. WINDSHIELD SURVEY CONDUCTED IN 1997 TO CONFIRM PRESENCE OR ABSENCE OF HABITAT; IF MAPS ARE ACCURATE, THIS SITE IS NOW UNDER THE PAVEMENT AT DEVON DR, FARRIER RD & RACHEL CT IN THE STANFORD RANCH SUBDIVISION.	OVER 10,000 PLANTS SEEN IN 1982, 2000-5000 SEEN IN 1989, AND ~2500 IN 1991. ACCORDING TO DAINS, DECLINE IN POP PROBABLY DUE TO WEATHER, NOT MANAGEMENT. SITE FENCED, HABITAT LOOKED GOOD IN LATE SEASON (JUNE) 1997 WINDSHIELD SURVEY.	MORE THAN 30 PLANTS OBSERVED IN 1985.	1000-1500 PLANTS OBSERVED IN 2006. 1000 PLANTS OBSERVED IN A SUBSEQUENT VISIT IN 2008.
	GRAZING REMOVED BY 1991, FILL HAD BEEN DUMPED ON SITE IN 1989; SUBSEQUENTLY REMOVED TO RESOLVE WETLANDS VIOLATIONS.	AREA GRAZED, BUT LITTLE DISTURBANCE. PARCEL TO EAST BEING DEVELOPED.	RESIDENTIAL AND COMMERCIAL DEVELOPMENT.
	Grazing; Other	Grazing	Development

	EAST OF FIDDYMENT ROAD, WEST OF FOOTHILLS BLVD, AND NORTH OF BASELINE ROAD, NW OF ROSEVILLE.	SW SIDE OF THE CITY OF LINCOLN; WEST OF THE JUNCTION OF EAGLESFIELD LANE AND REDCLIFFE LANE.	NORTH SIDE OF ORCHARD CREEK, 1.4 MILES NW OF INTERSECTION OF INDUSTRIAL AND ATHENS AVE, 3 MILES SOUTHWEST OF LINCOLN.	N TRIBUTARY OF PLEASANT GROVE CREEK, N OF PLEASANT GROVE CREEK, S OF PLACER BLVD, E OF HWY 65.
		MAPPED AS 2 POLYGONS ACCORDING TO 2014 HUDDLESTON COORDINATES, IN THE NORTH 1/2 OF THE SW 1/4 OF SECTION 28.	MAPPED WITHIN THE NW 1/4 OF THE NE 1/4 OF SECTION 32.	
	HABITAT CONSISTS OF SEASONAL WETLANDS; REFERENCE VERNAL POOLS, AND CONSTRUCTED VERNAL POOLS WITHIN A DESIGNATED WETLAND MITIGATION AREA. SURROUNDING UPLAND CONSISTS OF NON-NATIVE ANNUAL GRASSLAND/MIXED OAK WOODLAND.	OPEN GRASSLAND WITH VERNAL POOLS. LARGE VERNAL POOLS ON SOILS MAPPED AS SAN JOAQUIN SANDY LOAM SOILS. ASSOCIATED WITH ELEOCHARIS MACROSTACHYA, LASTHENIA GLABERRIMA, DOWNINGIA ORNATISSIMA, PLAGIOBOTHRYS, DESCHAMPSIA DANTHONIOIDES, ETC.	SCATTERED MARGINS OF LARGE VERNAL POOL WITH PLAGIOBOTHRYS UNDULATUS, P. STIPITATUS, LASTHENIA FREMONTII, L. GLABERRIMA, DOWNINGIA BICORNUTA, NAVARRETTA LEUCOCEPHALA, AND CALLITRICHE MARGINATA.	VERNAL POOL AREA ON FLOODPLAIN OF INTERMITTENT STREAM.
	CALIFORNIA LINDERIELLA WERE IDENTIFIED WITHIN 83 (44%) OF THE CONSTRUCTED VERNAL POOLS & SEASONAL WETLANDS AND 4 (21%) OF THE REFERENCE VERNAL POOLS SEASONAL WETLANDS. BRANCHINECTA LYNCHI ALSO OBSERVED.	IN 2014, NW POLYGON HAD 1000+ PLANTS AND SE POLYGON HAD 50+ PLANTS.	IN 2002 HUNDREDS OF PLANTS OBSERVED IN FOUR POOLS; LIKELY TO OCCUR IN OTHER ADJACENT POOLS.	ABOUT 200 PLANTS IN 1984. NONE FOUND IN 1997 (TOO LATE IN SEASON). THE NORTHERN POOLS WHICH WERE MAPPED HERE IN 1984 APPEAR TO BE EXTIRPATED. S POOLS UNDISTURBED IN 1997.
	THREATENED BY SURROUNDING DEVELOPMENT (GOLF COURSES AND RESIDENTIAL DEVELOPMENT).	NO VISIBLE THREATS AT THE TIME OF SURVEY.	LIGHT DISTURBANCE FROM GRAZING.	PART OF AREA PLANNED FOR INDUSTRIAL PARK USE (AREA GRADED IN 1983). GRAVEL PIT TO SOUTH.

DRY CREEK AND ITS TRIBUTARIES SECRET RAVINE AND MINERS RAVINE.	BETWEEN KASEBERG CREEK & SOUTH BRANCH PLEASANT GROVE CREEK; ABOUT 0.6 MILE SW OF FOOTHILLS BLVD AT PLEASANT GROVE BLVD.	VICINITY OF FIDDYMENT RD. FROM PLEASANT GROVE BLVD TO ABOUT 3 MILES NORTH, ROSEVILLE.	VICINITY OF BOARDMAN CANAL, BETWEEN I-80 AND SIERRA COLLEGE BLVD, N OF SECRET RAVINE PKWY, 1 MILE SE OF ROCKLIN PO.	
MAPPED TO REACHES OF DRY CREEK & OCCUPIED TRIBUTARIES CURRENTLY NAVIGABLE BY STEELHEAD. COTTONWOOD DAM WAS TOTAL BARRIER ON MINERS PRIOR TO ITS FAILURE IN 2009. ALL SPAWNING REPORTS FROM U/S OF WASTEWATER TREATMENT PLANT (38.736, -121.316).	AKA WOODCREEK OAKS MITIGATION SITE. 1993: EXACT DETECTION LOCATION UNKNOWN; SOMEWHERE IN TRS SEC 29. 1995: MAPPED TO LOCATION GIVEN FOR POOL C2 ON MAP IN SUGNET REPORTS; SPECIMEN LOCALITY GIVEN AS "NW 1/4 OF SW 1/4 SECTION 28, T11N R06E."	MAPPED TO INCLUDE 1993 DETECTION LOCATIONS GIVEN AS T11N R6E SECTION 18 (SUGNET ID #91), T11N R5E SECTION 25 (SUGNET ID #89), AND BOUNDARY OF AREA SURVEYED IN 1997 IN SECTIONS 19 AND 30. EXACT LOCATIONS UNKNOWN.	MAPPED TO PROVIDED PROJECT BOUNDARY FOR THE HIGHLANDS. 10 YEAR MONITORING CONDUCTED BY ECORP CONSULTING INC. MONITORING BEGAN IN 2002. CNDDDB DID NOT HAVE RECORDS FOR 2002-2004 & 2009. VELB CONSERVATION AREA ALONG N MOST END OF SITE.	
MAINSTEM DRY CREEK (DC) USED AS MIGRATORY CORRIDOR, BUT WATER QUALITY & SUBSTRATE TOO DEGRADED TO SUPPORT SPAWNING. SPAWNING & REARING HABITAT UPSTREAM, IN SECRET (SR) & MINERS (MR) RAVINES.	1993: MANMADE VERNAL POOL. 1995: HARDPAN VERNAL POOL IN ANNUAL NON-NATIVE GRASSLAND ON WETLAND COMPENSATION/MITIGATION PRESERVE. AIR PHOTOS SINCE THE TIME OF SURVEY SHOW DEVELOPMENT IN VICINITY.	AERIAL PHOTOS INDICATE DEVELOPMENT IN THE VICINITY OF THE 1993 DETECTIONS; HABITAT MAY HAVE BEEN LOST. 1997: A MITIGATION AREA WITH SEASONAL WETLANDS, REFERENCE VERNAL POOLS, AND CONSTRUCTED POOLS IN ANNUAL GRASSLAND/OAK WOODLAND.	OAK WOODLAND AND SAVANNAH, VERNAL POOLS, AND SEASONAL WETLANDS ARE INTERSPERSED WITHIN THE GREATER GRASSLAND AREA. ASSOCIATED SPECIES INCLUDED CALIFORNIA BUCKEYE, TOYON, COYOTE BRUSH, BUCK BRUSH, GRAY PINE, BLUE OAK, AND VALLEY OAK.	
1998-2000: ESTIMATED RUN TO UPPER DC "A FEW 100"; JUVENILES CAUGHT AT MR/SR CONFLUENCE, PRESUMED PRESENT IN BOTH TRIBS. '04-05 ELECTROFISHING SURVEYS CAUGHT 136 O. MYKISS IN SR, 0 IN DC & MR. EVIDENCE OF SPAWNING OBS IN SR IN 2007.	FOUND IN 1 POOL ON 4 FEB 1993. FOUND IN 1 OF 14 BASINS SAMPLED FEB-MAR 1995; 3 COLLECTED (CASIZ #103128). FWS 5-YEAR PLAN DESCRIBED OCCURRENCE AS LIKELY EXTIRPATED IN 2007 (P. BALFOUR, PERS. COMM.)	FOUND IN 3 OF 3 BASINS SAMPLED IN SEC 18, 16 JAN 1993. FOUND IN 5 OF 31 BASINS SAMPLED IN SEC 25, 27 JAN 1993. FOUND IN 71 BASINS, 16 JAN 1997.	5 VALLEY ELDERBERRY LONGHORN BEETLE EXIT HOLES OBSERVED IN APR 2001. NO EVIDENCE OF VELB OCCUPANCY DETECTED IN 2005-2011. ELDERBERRY SHRUBS TRANSPLANTED TO CONSERVATION AREA AT NORTHERN PORTION OF SITE.	
BANK DESTABILIZATION/EROSION, VEG REMOVAL, CHANNELIZATION, POLLUTION, BARRIERS, LOW FLOWS, URBANIZATION, SILTATION. <i>Artemia jacksoniana</i> regime;	DEVELOPMENT.	THREATENED BY DEVELOPMENT (GOLF COURSES AND RESIDENTIAL DEVELOPMENT).	DEVELOPMENT. MASS GRADING FOR BUILDING OF ROADS, BRIDGES, & RELATED INFRASTRUCTURE; PREDOMINANTLY ON EAST SIDE OF SITE.

KASEBERG CREEK, 0.75 MILE E OF FIDDYMENT ROAD AND 0.25 MILE N OF PLEASANT GROVE BOULEVARD, E SIDE OF ROSEVILLE.	250 FT NORTH OF EAST CATLETT RD, 0.4 MI WEST OF FIDDYMENT RD, SW OF LINCOLN.	NORTH SIDE OF PHILIP ROAD, APPROXIMATELY 0.75 MILE WEST OF FIDDYMENT ROAD, NW OF ROSEVILLE.	NEAR THE INTERSECTION OF WOODCREEK OAKS BLVD AND PLEASANT GROVE BLVD, WOODCREEK OAKS SUBDIVISION IN WESTERN ROSEVILLE.
NEST TREE WAS LOCATED IN WHAT BECAME THE NORTH EDGE OF AN OPEN SPACE CORRIDOR/GOLF COURSE IN 1996. MAPPED TO PROVIDED TOPO MAP.	LOCATED ON MOORE RANCH WETLAND RESTORATION PROJECT PROPERTY.		MAPPED TO DESCRIPTION GIVEN (TOWNSHIP, SECTION AND ELEVATION DON'T MATCH SITE DESCRIPTION).
HABITAT WAS A WOODLAND CORRIDOR ALONG KASEBERG CREEK. DEVELOPMENT BEGINNING IN THE MID-1990S CONTINUES TO REPLACE FORAGING & NESTING HABITAT. NEST SITE IS NOW WITHIN THE CITY OF ROSEVILLE PUBLIC GOLF COURSE, SURROUNDED BY DEVELOPMENT.	HABITAT CONSISTS OF MIXED NATIVE AND NON-NATIVE GRASSLAND, WHICH IS WITHIN A VERNAL POOL RESTORATION PROJECT AREA. SURROUNDED BY GRAZED AND UNGRAZED PASTURES.	HABITAT CONSISTS OF MODERATELY-GRAZED, ROLLING GRASSLAND, WITH NO EVIDENCE OF HISTORIC SOIL DISTURBANCE. SITE WOULD BE BETTER IF MORE BURROWS WERE PRESENT; HARD SOILS AND LACK OF GROUND SQUIRRELS MAY BE THE CAUSE.	GRASSLAND WITH NUMEROUS VERNAL POOLS AND SWALES.
NESTING INITIATED IN 1996 DURING GRADING BUT PRIOR TO CONSTRUCTION OF HOUSES; 2 YOUNG PRODUCED. NEST SITE VACANT IN 1997, THOUGH NEST TREE REMAINED WITHIN AN OPEN SPACE/GOLF COURSE. NO ACTIVITY IN 2000 & 2001; TERRITORY APPEARS ABANDONED.	1 ADULT OBSERVED AT BURROW SITE ON 30 JAN, 1 FEB AND 18 FEB 2008. GULLS ATTRACTED BY NEARBY WASTEWATER & GARBAGE COLLECTION FACILITIES COULD POSSIBLY PREY UPON BUOW CHICKS IF NESTING OCCURS.	OWLS (NEVER MORE THAN 2) OBSERVED YEAR-ROUND DURING 1998. HABITAT APPEARS EXTANT, BUT NO OWLS WERE OBSERVED ON 5 MAY 2003 - DATE OF SITE VISIT LIKELY TO EARLY.	30+ METAMORPHS OBSERVED IN A DRYING INTERMITTENT DRAINAGE, 1990.
SURROUNDING SUBDIVISIONS & GOLF COURSE IN RIPARIAN CORRIDOR WERE CONSTRUCTED BEGINNING IN 1996. CONTINUING DEVELOPMENT.	THREATENED BY ENCROACHING URBAN DEVELOPMENT FROM BOTH LINCOLN & ROSEVILLE.	THREATS INCLUDE POSSIBLE FUTURE DEVELOPMENT OR LOSS OF GRAZERS.	LAND HAS BEEN DEVELOPED SINCE OBSERVATION.

COLONY LOCATED "WEST OF THE SOUTH BOUND OFF RAMP FOR TWELVE BRIDGES AND HWY 65." BLACKBERRY BRAMBLES VISIBLE IN GOOGLE STREET VIEW. COLONY DATA STORED IN UC DAVIS TRICOLORED BLACKBIRD PORTAL. MAPPED TO LOCATION PROVIDED IN PORTAL.	COLONY DATA STORED IN THE UC DAVIS TRICOLORED BLACKBIRD PORTAL; SITE NAME WAS "RODEO GROUND OPEN SPACE 2." PREVIOUSLY REFERRED TO AS "CAPERTON AND STERLING PARKWAY" IN THE PORTAL.	COLONY DATA STORED IN UC DAVIS TRICOLORED BLACKBIRD PORTAL; SITE NAME "ORCHARD CREEK." MAPPED TO LOCATION PROVIDED IN PORTAL. LOCATION DESCRIBED AS "JUST EAST OF INDUSTRIAL AVENUE, ABOUT 0.25 MILE SOUTH OF TWELVE BRIDGES RD."	COLONY DATA STORED IN UC DAVIS TRICOLORED BLACKBIRD PORTAL; SITE NAME "ORCHARD CREEK." MAPPED TO LOCATION PROVIDED IN PORTAL. LOCATION DESCRIBED AS "JUST EAST OF INDUSTRIAL AVENUE, ABOUT 0.25 MILE SOUTH OF TWELVE BRIDGES RD."	MAPPED TO PROVIDED MAPS, COORDINATES, AND LOCATION DESCRIPTIONS. COLONY DATA STORED IN UC DAVIS TRICOLORED BLACKBIRD PORTAL; SITE NAME "INDUSTRIAL AVENUE." AN ADDITIONAL 2,000 BIRDS NOTED SOMETIME IN 1992.
HIMALAYAN BLACKBERRY AND TULE. BIRDS OBSERVED FORAGING IN SURROUNDING GRASSLANDS IN 2011.	HABITAT WAS HIMALAYAN BLACKBERRY. SITE WAS ON A SMALL STREAM FED BY THE CAPERTON CANAL. A SIGNIFICANT AMOUNT OF HABITAT HAD BEEN CUT BY 2011 SURVEY. THE SURROUNDING AREA HAS UNDERGONE SIGNIFICANT RESIDENTIAL DEVELOPMENT FROM 2000-2011.	HABITAT COMPOSED OF SEVERAL ADJACENT CLUMPS OF HIMALAYAN BLACKBERRY. IN 2014, FORAGING BIRDS WERE FLYING LOW ACROSS INDUSTRIAL AVE TO FORAGE AND AT LEAST ONE WAS HIT BY A CAR.	HABITAT COMPOSED OF SEVERAL ADJACENT CLUMPS OF HIMALAYAN BLACKBERRY. IN 2014, FORAGING BIRDS WERE FLYING LOW ACROSS INDUSTRIAL AVE TO FORAGE AND AT LEAST ONE WAS HIT BY A CAR.	NESTING SUBSTRATE CONSISTED OF BULRUSH GROWING IN A SHALLOW FARM POND. POND WAS A SMALL LAKE & MARSHY CREEK WITH PAVED WALKING, BIKE, & DOG WALKING TRAILS. AT THE EDGE OF A DEVELOPED SUBDIVISION (2011). HABITAT STILL EXISTS (2015).
200 BIRDS OBS ON 22 APR 2000. 200 BIRDS OBS ON 25 APR 2008; CLASSIFIED AS SINGING/CARRYING NEST MATERIAL. 0 OBS ON 29 MAR 2011. 2.5K BIRDS OBS FORAGING/NESTING ON 16 APR 2011. 0 OBS ON 18 APR 2014. 0 OBS ON 17 APR 2015; 200 OBS WEEK PRIOR.	AN ESTIMATED 1500 BIRDS OBSERVED ON 25 APR 2008; INCUBATION CONFIRMED, NEST BUILDING OBSERVED THE WEEK PRIOR. 0 BIRDS OBSERVED ON 3 APR 2011, 18 APR 2014, AND 17 APR 2015.	300-500 OBS NESTING ON 5 APR 2014. 1.8K OBS NESTING ON 18 APR 2014. 2.2K OBS ON 16 MAY 2014; 15+ FLEDGLINGS. 2.2K OBS ON 23 MAY 2014; 160 FLEDGLINGS. 5K BIRDS SINGING IN & OUT BLACKBERRY ON 10 APR 2015; ONLY 10 REMAINING BY 17 APR.	25 BIRDS OBSERVED NESTING IN JUL 1992. NESTING COLONY ANECDOTALLY REPORTED IN 1993. 1K NESTING BIRDS OBS IN APR 1994. 2K NESTING BIRDS OBS ON 21 APR 1995. 5K NESTING ON 22 APR 2000. ADDITIONAL 4K FORAGING NEARBY. 0 OBS IN 2011 & 2015.

ON N SIDE OF TWELVE BRIDGES DR, ABOUT 2.7 MI E OF INTERSECTION WITH HWY 65, S OF LINCOLN.	ALONG INDUSTRIAL AVE (=LINCOLN BLVD), ABOUT 0.3 MILE SSW OF THE LINCOLN BYPASS (=HWY 65) OVERPASS, SSW OF LINCOLN.	NORTH SIDE OF PLEASANT GROVE CREEK, JUST S OF STARWOOD CT AT TRADEWINDS DR IN BLUE OAKS DEVELOPMENT NW OF ROSEVILLE.
MAPPED ACCORDING TO LOCATION ON PROVIDED MAP. PROVIDED ROAD DESIGNATIONS WERE "HIGHWAY 65 & DIRT ROAD, 1.7 MI SOUTH OF RODEO GROUNDS."	MAPPED TO GIVEN COORDINATES; MAPPED NON-SPECIFICALLY BECAUSE IT SEEMS LIKELY THAT THE CYST FOUND MAY HAVE BEEN TRANSPORTED FROM A NEARBY WETLAND.	MAPPED TO POINT FROM CDFW SHAPEFILE OF NEST RECORDS FROM 2009.
CIRCULAR PATCH OF HIMALAYAN BLACKBERRY. 2000 COLONY WAS IN A HILLSIDE SEEP. LARGE STOCKPOND WITHIN 0.5 MILE.	SEASONAL WETLAND ALONG ROADSIDE DISTURBED BY EXCAVATION OF A TELECOMMUNICATION LINE; PREVIOUSLY FILLED WITH RUNOFF FROM ADJACENT WETLAND COMPLEX AND NEARBY STREAM. SURROUNDING LAND BEING DEVELOPED FOR HOUSING.	NEST IN 55' BLUE OAK IN RIPARIAN STRIP WITH AN OPEN FIELD DIRECTLY NE, SURROUNDED BY RESIDENTIAL DEVELOPMENT.
ANECDOTALLY REPORTED AS NESTING IN 1994. A FORAGING FLOCK OF ABOUT 250 BIRDS OBSERVED ON 21 APR 1995. ABOUT 200 BIRDS OBSERVED ON 22 APR 2000; NOTED AS CARRYING FOOD.	1 CYST IDENTIFIED FROM SOIL SAMPLED ON 23 MAR 2002.	NEST WITH YOUNG OBSERVED ON 28 APR 2009; FLEDGING SUCCESS UNKNOWN.
POTENTIAL THREAT FROM DEVELOPMENT.	SINCE THE TIME OF SURVEY, THE WETLAND IN WHICH THE CYST WAS FOUND WAS PAVED OVER DURING ROAD EXPANSION PROJECT.	
	Road/trail construction/maint.

ADDENDUM TO BLUE OAKS COMMERCE CENTER MITIGATED NEGATIVE DECLARATION (ADOPTED ON MAY 27, 2010)

Project Title/File Number:	NIPA PCL 56 – Blue Oaks Commerce Center; File #PL22-0101
Project Location:	2200 Freedom Way, Roseville, Placer County, CA 95678 (APN 017-123-090-000)
Project Description:	The applicant requests approval of a Major Project Permit (MPP) Stage 1 Modification and MPP Stage 2 to allow construction of four (4) industrial buildings totaling approximately 310,000 square feet in size with associated parking, lighting, and landscaping, which will be located on two (2) parcels totaling 23.94-acres in size.
Project Applicant:	Jennifer Kimura, VLMK Engineering + Design
Property Owner:	Harsch Investment Properties II, LLC
Lead Agency Contact:	Escarlet Mar, Associate Planner; Phone (916) 774-5247

An Addendum to a previously certified and adopted negative declaration or environmental impact report may be prepared for a project if only minor technical changes or additions are necessary or none of the conditions calling for the preparation of a subsequent EIR or negative declaration have occurred (California Environmental Quality Act Guidelines [CEQA] Section 15164). Consistent with CEQA Guidelines Section 15164, the below analysis has been prepared in order to demonstrate that none of the conditions described in Section 15162 of the CEQA Guidelines calling for preparation of a subsequent EIR have occurred and that only minor technical changes or additions are necessary in order to deem the adopted negative declaration adequate to describe the impacts of the proposed project. CEQA Guidelines Section 15164 also states that an addendum need not be circulated for public review, but can be included in or attached to the adopted negative declaration for consideration by the hearing body. This Addendum focuses only on those aspects of the project or its impacts which require additional discussion.

PROJECT DESCRIPTION

Project Location

The project site is located at 2200, 2301, and 2201 Freedom Way, at the southeast corner of Blue Oaks Boulevard and Industrial Avenue (see Figure 1). On June 1, 2022, planning staff approved a Voluntary Merger (File# PL22-0059) to merge Parcel 4 (017-123-083) and Parcel 5 (017-123-084) of the Blue Oaks Commerce Center Subdivision Parcel Map into one (1) parcel. As of this writing, the Lot Merger has been recorded. The project is located on Parcel 56 of the North Industrial Planning Area (NIPA), which has adopted design guidelines (North Roseville Area Design Guidelines) that influence the general character of development within the planning area. The project site is surrounded by developed industrial parcels to the north, south, west, and an undeveloped parcel and office building to the east.

Background

On May 27, 2010, the Planning Commission approved a Major Project Permit (MPP) Stage 1 and a Tentative Subdivision Map for development of approximately 49.4 acres with 17 buildings totaling approximately 576,000 square feet of office, industrial and commercial uses (File# 2007PL-039). An Initial Study leading to a Mitigated Negative Declaration was prepared as part of the MPP Stage 1 and Tentative Subdivision Map for the Blue Oaks Commerce Center (BOCC) office, industrial and retail complex project to evaluate the environmental impacts of developing NIPA PCL 56. The Planning Commission adopted the Blue Oaks Commerce Center Initial Study and Mitigated Negative Declaration (MND) on May 27, 2010. On October 23, 2014, the Planning Commission approved a modification to the MPP Stage 1 site plan to allow the elimination of the retail portion of the project and replace approximately 81,000 square feet of industrial uses with an approximately 123,000 square foot three-story office building for the Federal Bureau of Investigation (FBI). An MPP Stage 2 was also approved for the FBI Office building, which approved the building architecture, site grading, and on-site landscaping. The MPP Stage 1 entitlement approved in 2010 included conceptual landscape plans for the Blue Oaks Commerce Center.

The landscape plans were deemed to be consistent with the North Roseville Area Design Guidelines (NRADG). However, the NRADG was adopted in 1992 and did not address current water efficient landscape requirements. Therefore, on May 24, 2016, the Planning Manager approved an Administrative Permit to modify the master landscape plan for the Blue Oaks Commerce Center to include more drought tolerant species and meet current water efficiency standards.

Environmental Setting

The project site is currently undeveloped but has been previously graded in preparation for the BOCC development and the FBI office building. As illustrated in Figures 2 through 4 below, the aerials of the BOCC site show that grading for the center were completed concurrent with the development of the FBI building. The aerials also show the removal of the jughandle that bisected the northwest corner of the site between Blue Oaks Boulevard and Industrial Avenue. As part of the MND analysis, the BOCC noted that grading and filling of approximately 1.70 acres of seasonal wetlands regulated by the U.S. Army Corps of Engineers would occur. The previously identified 1.95 acres of potential jurisdictional waters including 1.70 acres of wetlands and 0.26 acres of other waters has been filled and a Section 404 Individual Permit Application submitted and approved by the US Army Corps of Engineers (Corps). Currently, no wetlands exist on the site. In addition to grading, streetlights were located along the roadway frontages and utility poles along Blue Oaks Boulevard. Curb and gutter improvements exist along the perimeter of the BOCC site. Sidewalks are fully constructed along Blue Oaks Boulevard, Industrial Avenue, Freedom Way, and Fidelity Way.

Figure 2: Existing Site Conditions 2013

Figure 3: Existing Site Conditions 2015

As shown in Table 1 below, the site is surrounded by several industrial users to the north, south, and west. To the east of the Project site is a vacant parcel and an office building, the vacant parcel has been previously disturbed by an approximately 220-foot wide series of power lines that bisect the northeast portion of the property at a 45-degree angle from Washington Boulevard to Blue Oaks Boulevard.

Table 1: Adjacent Zoning and Land Use

Location	Zoning	General Plan Land Use	Actual Use of Property
Site	General Industrial (M2)	General Industrial (IND)	Vacant
North	M2	IND	Industrial users
South	M2	IND	Industrial users
East	M2	IND	Vacant; Office building for the FBI
West	Light Industrial (M1)	Light Industrial (LI)	Albertsons warehouse

Proposed Project

The proposed project (Project) consist of four (4) industrial buildings totaling approximately 310,000 square feet in size with associated parking, lighting, and landscaping improvements (see Figure 5 below). The Project is proposed on two (2) vacant industrial parcels totaling approximately 23.94-acres. The project entitlements consist of a Major Project Permit (MPP) Stage 1 Modification and MPP Stage 2. The request for a MPP Stage 1 Modification will change the orientation of the buildings, decrease the number of buildings from 10 to four (4), and increase the total square footage of the Project by approximately 50,000 square feet.

Figure 5: Site Plan

PURPOSE AND SCOPE OF ADDENDUM

This Addendum tiers from the previously approved MND and the 2035 General Plan Environmental Impact Report (GP EIR) and the 2021 Housing Element Addendum (HE Addendum) (combined, the GP EIR and Addendum), which analyzed the impacts of full buildout of the City's General Plan land uses and implementation of its policies consistent with the General Plan and the 2021 Housing Element. The MND and related attachments are included as Attachment 1 of this Addendum. The GP EIR is available for review on the City's website at <https://www.roseville.ca.us/generalplan> and the HE Addendum is available at www.roseville.ca.us/housingelement. These are also accessible upon request at the Planning counter during normal business hours.

The adopted MND evaluated the following topical sections as it relates to:

- Aesthetics
- Agricultural and Forestry Resources
- Air Quality
- Biological Resources
- Cultural Resources
- Geology and Soils
- Hazards and Hazardous Materials
- Hydrology and Water Quality

- Land Use and Planning
- Mineral Resources
- Noise
- Population and Housing
- Public Services
- Recreation
- Transportation/Traffic
- Utilities and Service Systems
- Greenhouse Gas Emissions

The MND evaluated the same impact areas as the Project, but did not include an analysis on Energy, Tribal Cultural Resources, or Wildfire as these sections were added to the CEQA Guidelines after the Project approval date. Nevertheless, because this Addendum tiers from the previously approved GP EIR and Addendum, in addition to the MND, those sections are included in the GP EIR and Addendum as described below.

The GP EIR evaluated the following topical sections, as numbered below:

Chapter 4.0. Introduction to the Environmental Analysis

- Section 4.1. Land Use and Agriculture
- Section 4.2. Population, Employment, and Housing
- Section 4.3. Transportation
- Section 4.4. Air Quality
- Section 4.5. Greenhouse Gas Emissions
- Section 4.6. Noise and Vibration
- Section 4.7. Geology, Soils, and Paleontological Resources
- Section 4.8. Biological Resources
- Section 4.9. Cultural and Tribal Cultural Resources
- Section 4.10. Hazards, Hazardous Materials, and Wildfire
- Section 4.11. Public Services and Recreation
- Section 4.12. Utilities and Service Systems
- Section 4.13. Hydrology and Water Quality
- Section 4.14. Aesthetics
- Section 4.15. Energy

The HE Addendum evaluated the same impact areas, but was formatted in the same analysis order as the CEQA Guidelines Initial Study Checklist, in which impacts are evaluated by topic area in alphabetical order. For each impact topic and question, the HE Addendum listed the location (page number) where that topic was addressed in the GP EIR and the disposition of the impact. This Addendum follows the same format. The area analyzed in the GP EIR and Addendum included all areas within the City limits and those areas that are within the City's Sphere of Influence, referred to throughout as the Planning Area. For consistency with previous documentation, in this Addendum the Planning Area will continue to refer to the area assessed within the GP EIR and Addendum, while "Project area" will refer to the much smaller subarea of the Planning area affected by the proposed Project.

The GP EIR included a comprehensive analysis of the impacts of City buildout compared to baseline physical conditions and conservatively assumed that developable sites would be fully developed, rather than developing at average intensities. The analysis in the GP EIR and Addendum assumed the Project site would be developed with uses consistent with the Project land use designation and the City's Zoning Ordinance and Community Design Guidelines. Therefore, development of the Project site would comply with the development standards of the zoning district and development of the site would be well within the range of development analyzed within the GP EIR, which is why an Addendum was prepared.

The GP EIR and Addendum focused in the same manner as the MND on the development of the Project site with industrial users. Consistent with previous project approvals on the site, as described in the Background section, the GP EIR and Addendum assumed development of the Project site with approximately 380,000 square feet of industrial buildings. Including the already-constructed FBI building site, the MND assumed the original site would be developed with 17 buildings totaling approximately 575,505 square feet of office, industrial, and commercial uses. The Project development of 310,000 square feet of building does not exceed the maximum development potential previously analyzed in either the GP EIR and Addendum or the MND.

The analyses below rely on the GP EIR and Addendum and the MND analysis with minor supplements or technical updates where appropriate. Most of the project impacts remain identical to the impacts of the GP EIR and Addendum and MND because the proposed project is consistent with the industrial use type envisioned and analyzed for the subject property. No changes are proposed to the land use or zoning designation of the site. Impacts to physical resources (such as agricultural land, biological resources, etc.) are based on the grading and development of an area, not on the proposed use types of the buildings (i.e. restaurant vs. retail) on the property. For other types of impacts which are affected by use type and square footage, the project uses reduce or maintain the same level of potential impacts, as discussed in this Addendum.

ENVIRONMENTAL CHECKLIST FOR ADDENDUM ENVIRONMENTAL REVIEW

The purpose of this checklist is to evaluate the categories in terms of any “changed condition” (i.e. changed circumstances, project changes, or new information of substantial importance) that may result in a changed environmental result. A “no” answer does not necessarily mean there are no potential impacts relative to the environmental category, but that there is no change in the condition or status of the impact since it was analyzed and addressed in prior environmental documents.

EXPLANATION OF CHECKLIST EVALUATION CATEGORIES

Where Impact was Analyzed

This column provides a cross-reference to the pages of the prior environmental documents where information and analysis may be found relative to the environmental issue listed under each topic.

Do Proposed Changes Involve New Significant Impacts?

Pursuant to Section 15162(a)(1) of the CEQA Guidelines, this column indicates whether the changes represented by the current project will result in new significant impacts that have not already been considered and mitigated by the prior environmental review documents and related approvals, or will result in a substantial increase in the severity of a previously identified impact.

Any new Circumstances Involving New Impacts?

Pursuant to Section 15162(a)(2) of the CEQA Guidelines, this column indicates whether there have been changes to the project site or the vicinity (circumstances under which the project is undertaken) which have occurred subsequent to the certification or adoption of prior environmental documents, which would result in the current project having new significant environmental impacts that were not considered in the prior environmental documents or that substantially increase the severity of a previously identified impact.

Any new Information Requiring New Analysis or Verification?

Pursuant to Section 15162(a)(3)(A–D) of the CEQA Guidelines, this column indicates whether new information of substantial importance which was not known and could not have been known with the exercise of reasonable diligence at the time the previous environmental documents were certified or adopted is available requiring an update to the analysis of the previous environmental documents to verify that the environmental conclusions and mitigation measures remain valid. Either “yes” or “no” will be answered to indicate whether there is new information showing that: (A) the project will have one or more significant effects not discussed in the prior environmental documents; (B) that significant effects previously examined will be substantially more severe than

shown in the prior environmental documents; (C) that mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or (D) that mitigation measures or alternatives which are considerably different from those analyzed in the prior environmental documents would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative. If “no,” then no additional environmental documentation (supplemental or subsequent EIR) is required.

Mitigation Measures Implemented or Addressing Impacts

Pursuant to Section 15162(a)(3) of the CEQA Guidelines, this column indicates whether the prior environmental documents provide mitigation measures to address effects in the related impact category. In some cases, the mitigation measures have already been implemented. A “yes” response will be provided in any instance where mitigation was included, regardless of whether the mitigation has been completed at this time. If “none” is indicated, this environmental analysis concludes a significant impact does not occur with this project, no mitigation was previously included, and no mitigation is needed.

DISCUSSION AND MITIGATION SECTIONS

Discussion

A discussion of the elements of the checklist is provided under each environmental category in order to clarify the answers. The discussion provides information about the particular environmental issue, how the project relates to the issue and the status of any mitigation that may be required or has already been implemented.

Mitigation Measures

Applicable mitigation measures from the prior environmental review that apply to the project are listed under each environmental category.

Conclusions

A discussion of the conclusion relating to the analysis contained in each section.

CHECKLIST

I. Aesthetics

	Where Impact Was Analyzed in Prior Environmental Documents	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents' Mitigation Measures Implemented or Addressing Impacts.
a. Have a substantial adverse effect on a scenic vista?	Page 7	No	No	No	None
b. Substantially damage scenic resources, including but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?	Same	No	No	No	None
c. In non-urbanized area, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from a publicly accessible vantage point.) If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?	Same	No	No	No	None
d. Create a new source of substantial light or glare, which would adversely affect day or nighttime views in the area?	Same	No	No	No	None

Discussion: The proposed Project is located on a property already anticipated for development. The project site does not abut and is not visible from any scenic vista or scenic highway. The MND analyzed the impacts of grading of the project site and considered them to be less than significant. The proposed use (i.e., warehouse) is substantially consistent with the build out assumptions and would not increase the severity of already identified significant impacts. The Findings of Fact for the CEQA Implementing Procedures indicate that compliance with the Zoning Ordinance, Subdivision Ordinance, Community Design Guidelines, and applicable Specific Plan Policies and/or Specific Plan Design Guidelines will prevent significant impacts related to construction of buildings in urban settings.

The project has been evaluated for compliance with the City's Community Design Guidelines and the design guidelines established in the North Roseville Area Design Guidelines. As it relates to aesthetics, these standards ensure the high quality design and architectural character of any buildings developed as well as minimum landscaping standards. As it relates to light and glare, the Community Design Guidelines standards require all parking lot light fixtures to have glare shields. The project has been designed and will be conditioned to comply with the applicable Community Design Guidelines and the North Roseville Area Design Guidelines.

Based on the reasons listed in this section, the changes introduced by the Project and/or new circumstances relevant to the project would not, as compared to the MND result in a new significant impact or significant impacts that are substantially more severe than significant impacts previously disclosed. Therefore, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that “none of the conditions described in Section 15162 calling for preparation of a subsequent FEIR or negative declaration have occurred” relative to aesthetic resources.

Mitigation Measures: None required for this Project.

II. Agricultural & Forestry Resources

	Where Impact Was Analyzed in Prior Environmental Documents	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents' Mitigation Measures Implemented or Addressing Impacts.
a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	Page 8	No	No	No	None
b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?	Same	No	No	No	None
c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?	Same	No	No	No	None
d) Result in the loss of forest land or conversion of forest land to non-forest use?	Same	No	No	No	None
e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?	Same	No	No	No	None
Discussion: The MND concluded there were no resources to be affected by conversion of the site to urban uses. This conclusion remains appropriate for this Project. The project site is not used for agricultural purposes, does not include agricultural zoning, is not within or adjacent to one of the areas of the City designated as a protected farmland category on the Placer County Important Farmland map, is not within or adjacent to land within a Williamson Act Contract, and is not considered forest land. Given the foregoing, the Project will have no impact on agricultural resources. Therefore, pursuant to CEQA Guidelines section 15164, subdivision (a), the City					

finds that “none of the conditions described in Section 15162 calling for preparation of a subsequent FEIR or negative declaration have occurred” relative to agricultural and forestry resources.

Mitigation Measures: None required for this project.

III. Air Quality

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents' Mitigation Measures Implemented or Addressing Impacts.
a) Conflict with or obstruct implementation of the applicable air quality plan?	Pages 8-11	No	No	No	Mitigation Measure AQ#1 & AQ#2
b) Result in a cumulatively considerable net increase of any criteria for which the project region is non-attainment under an applicable federal or state ambient air quality standard?	Same	No	No	No	Same
c) Expose sensitive receptors to substantial pollutant concentrations?	Same	No	No	No	None
d) Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?	Same	No	No	No	None

Discussion: The City of Roseville 2035 General Plan Update found it will generate emissions that exceed Placer County Air Pollution Control District (PCAPCD) significance thresholds. Existing laws and regulations, including PCAPCD rules and regulations, combined with existing General Plan and proposed General Plan Update policies, would reduce these impacts. Projects would be subject to PCAPCD Rule 228 to minimize fugitive dust emissions of PM through implementation of dust control measures, such as PCAPCD's standard Dust Control Requirements. PCAPCD Rules 202 and 205 would also reduce exhaust-related emissions from the use of construction equipment. PCAPCD Rules 217 and 218 would reduce VOC emissions associated with paving and architectural coating activities.

While all future development with the potential to generate substantial emissions would be required to reduce those emissions, the effectiveness of these measures would depend on the number and extent of strategies feasible to incorporate as a part of any given project. Since the timing and level of construction activities for future development projects is speculative, and cannot be known, it is not possible to quantify the extent to which the reduction strategies would result in emission reductions. Consequently, even with adherence to PCAPCD rules, proposed General Plan Update Policy AQ1.3, and Specific Plan mitigation measures, it is conservatively assumed that emissions from buildout of the General Plan could

exceed PCAPCD-recommended thresholds. Therefore, implementation of the proposed General Plan Update could generate substantial constructed-related pollutant emissions, conflict with or obstruct implementation of the applicable air quality plan, and result in a cumulatively considerable net increase of criteria air pollutants for which the project region is designated a nonattainment area under an applicable federal or state ambient air quality standard. This project alone does not have a potential to significantly degrade air quality. However, the incremental impacts associated with this project considered cumulatively with the incremental impacts of other projects will degrade air quality. The General Plan Update found that the significant adverse air quality impacts cannot be mitigated to a less than significant level even with the mitigation measures proposed. Addressing the unmitigatable cumulative impacts to air quality, the General Plan Update adopted findings of overriding consideration. However, CEQA requires that reductions in adverse project impacts be made, where it is feasible to do so.

Short term impacts to air quality can be expected in association with construction activities. These impacts are primarily associated with grading activities and the increased potential for dust and wind driven erosion of soils. Particulate matter resulting from construction dust will be reduced by implementing standard dust control measures on the job site as part of an erosion control plan. The grading permit and on-site inspection by the Public Works Department will ensure appropriate dust control measures, such as watering are done to reduce short-term air quality impacts. Vehicle exhaust, produced during project construction, could temporarily contribute to the deterioration of ambient air quality. Diesel fuel fumes from construction equipment may be noticeable in the vicinity of the site; however, this is a short-term effect. All equipment must comply with the mitigation measures and with California emissions standards

The air quality impacts associated with the increase in square footage of the project will not result in new or substantially more severe significant impacts. For example, the construction phase project-level ROG (lbs/day) percent difference between the original project and the proposed project square footage is approximately a 17% difference, based on the project square footage increase. Furthermore, while the square footage is increased compared to the previously-approved MPP, the square footage remains less than the total amount of development assumed within the GP EIR and Addendum and the MND. The Project site is consistent with the existing land use designation and no new impacts not already analyzed in the GP EIR and Addendum will occur. Therefore, based on this the project remains consistent with the development scenarios outlined in the MND and GP EIR and Addendum. Future industrial uses that locate onsite will be required to comply with the PCAPCD requirements and may need to obtain permits prior to occupancy. Industrial users may need to install air quality devices such as exhaust systems. Permitting with the PCAPCD will ensure that operation emissions are regulated. Therefore, with the air quality mitigation measures incorporated into the project the air quality impacts of this project would be less than significant.

There are no sensitive receptors located in the immediate vicinity of the project. The multi-family residential development southeast of the FBI site on Washington Boulevard comprises of the nearest sensitive receptor. Construction and operation of the project will increase emissions on the site, but not substantially; implementation of mitigation measures AQ#1 and AQ#2 will reduce project emissions to less than significant levels. Potential impacts to sensitive receptors would therefore be less than significant.

The project does not include components with the potential to create significant objectionable odors. No impact associated with odor would result from the project.

Mitigation Measures: Applicable mitigation measures from the MND are below; no new measures are warranted for this Project.

Mitigation Measure AQ#1

1a. Prior to approval of Grading or Improvement Plans (whichever occurs first) on project sites greater than five (5) acres, the applicant shall submit a Construction Emission / Dust Control Plan to the Placer County APCD. The applicant shall provide written evidence, provided by APCD, to the local jurisdiction (city or county) that the plan has been submitted to APCD. If APCD does not respond within twenty (20) days the plan shall be considered approved. It is the responsibility of the applicant to deliver the approved plan to the local jurisdiction. The applicant shall not break ground prior to receiving APCD approval, of the Construction Emission / Dust Control Plan, and delivering that approval to the local jurisdiction issuing the permit.

1b. Include the following standard note on the Grading Plan or Improvement Plans: The prime contractor shall submit to the District a comprehensive inventory (i.e. make, model, year, emission rating) of all the heavy-duty off-road equipment (50 horsepower or greater) that will be used in aggregate of 40 or more hours for the construction project. If any new equipment is added after submission of the inventory, the prime contractor shall contact the APCD prior to the new equipment being utilized. At least three business days prior to the use of subject heavy-duty off-road equipment, the project representative shall provide the District with the anticipated construction timeline including start date, name, and phone number of the property owner, project manager, and on-site foreman.

1c. Prior to approval of Grading or Improvement Plans, whichever occurs first, the applicant shall provide a written calculation to the Placer County APCD for approval by the District demonstrating that the heavy-duty (> 50 horsepower) off-road vehicles to be used in the construction project, including owned, leased and subcontractor vehicles, will achieve a project wide fleet-average 20 percent NO_x reduction and 45 percent particulate reduction as required by CARB. Acceptable options for reducing emissions may include use of late model engines, low emission diesel products, alternative fuels, engine retrofit technology, after-treatment products, and/or other options as they become available. The following link shall be used to calculate compliance with this condition and shall be submitted to the Placer County APCD as described above: <http://www.airquality.org/ceqa/> (click on the current “Roadway Construction Emissions Model”).

Mitigation Measure AQ#2: The following APCD rules shall be noted on the Improvement Plans:

- The project shall comply with all applicable Placer County Air Pollution Control District rules and regulation, and shall obtain applicable permits and/or clearances from the District prior to the start of construction.
- The contractor shall use CARB ultra low sulfur diesel fuel for all diesel-powered equipment. In addition, low sulfur fuel shall be utilized for all stationary equipment. (California Standards for Motor Vehicle Diesel Fuel, title 13, article 4.8, chapter 9, California Code of Regulations).
- Processes that discharge 2 pounds per day or more of air contaminants, as defined by Health and Safety Code Section 39013, to the atmosphere may require a permit. Permits are required for both construction and operation. Developers/contractors should contact the District prior to construction and obtain any necessary permits prior to the issuance of a Building Permit. (Rule 501)

- Pursuant to the Placer County Air Pollution Control District Rule 501, General Permit Requirements, the proposed project may need a permit from the District prior to construction. In general, any engine greater than 50 brake horsepower or any boiler with heat greater than 1,000,000 Btu per hour shall require a permit issued by the District. (Rule 501)
- All on-site stationary equipment which is classified as 50 hp or greater shall either obtain a state issued portable equipment permit or a Placer County APCD issued portable equipment permit. (California Portable Equipment Registration Program, Section 2452).
- The contractor shall utilize existing power sources (e.g., power poles) or clean fuel generators rather than temporary diesel power generators if feasible.
- During construction, the contractor shall minimize idling time to a maximum of 5 minutes for all diesel powered equipment.
- During construction, traffic speeds on all unpaved surfaces shall be limited to 15 miles per hour or less. (Rule 228 / section 401.2)

IV. Biological Resources

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents' Mitigation Measures Implemented or Addressing Impacts.
a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	Pages 11-14	No	No	No	Mitigation Measure BIO#1, BIO#2, & BIO#3
b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies or regulations or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?	Same	No	No	No	Same

c) Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	Same	No	No	No	Same
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	Same	No	No	No	Same
e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	Same	No	No	No	None
f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?	Same	No	No	No	None

Discussion: The biological resources information presented in the GP EIR was based on review of the following sources: previous studies conducted for the West Roseville, Sierra Vista, Creekview, and Amoruso Ranch Specific Plan Areas and associated EIRs; a comment letter received from CDFW in response to the NOP; biological resource databases, including the United States Fish and Wildlife Service (USFWS) Information, Planning, and Conservation System (IPaC), USFWS Critical Habitat Mapper, USFWS National Wetlands Inventory (NWI) Wetlands Mapper, the California Natural Diversity Database (CNDDDB) and Biogeographic Information and Observation System (BIOS), and the California Native Plant Society (CNPS) Inventory of Rare and Endangered Plants; aerial photography interpretation; and the draft Western Placer County Habitat Conservation Plan/Natural Community Conservation Plan (HCP/NCCP).

Impacts related to the loss and degradation of special-status plants and their habitats were found to be potentially significant (GP EIR page 4.8-60) as were impacts to special-status wildlife and their habitats (GP EIR page 4.8-64), impacts to riparian habitat or other sensitive natural communities (GP EIR page 4.8-70), impacts to protected wetlands and other waters (GP EIR page 4.8-73), and impacts to wildlife movement corridors and nursery sites (GP EIR page 4.8-76) because buildout of the General Plan could result in direct removal or take of special-status species; modification or removal of sensitive habitats, wildlife corridors, nursery sites, protected waters, and habitats suitable for special-status species; indirect effects to species or habitats that may result from construction-related runoff, sedimentation, erosion, and introduction of invasive weeds; and the introduction of new sources of noise and light. Implementation of mitigation, combined with General Plan policies and existing laws and regulations, were found to reduce impacts to less than significant levels, because new development would be required to identify, avoid, and preserve sensitive habitats, wildlife corridors, nursery sites, protected waters, and habitats which may support special-status populations to the extent feasible, and compensate for the loss of these resources through preservation, compensation, or other appropriate measures in

coordination with state and federal agencies. Furthermore, the City's Specific Planning process has already resulted in the creation of connected open space corridors throughout the Planning Area which contain much of the sensitive habitat in the Planning Area.

Impacts related to conflicts with local ordinances protecting biological resources were found to be less than significant (GP EIR page 4.8-79) because while buildout of the Planning Area would result in impacts to biological resources, all development would be subject to and consistent with the city's ordinances and policies such as the Tree Preservation Ordinance. Therefore, impacts related to conflict with local ordinances were found to be less than significant.

Impacts related to conflict with the provisions of an adopted Habitat Conservation Plan, Natural Conservation Community Plan, or other approved Conservation Plan were found to be less than significant because there are no adopted plans which apply to the Planning Area.

All of the analyses described above are based on the potential impacts of grading and general development within the Planning Area, and the HE Addendum noted that the Housing Element neither changed the boundaries of the Planning Area nor the locations of potential grading and development within the Planning Area. Therefore, the GP EIR and Addendum analyses of biological resources adequately and appropriately describe the potential impacts of the Project. The Project area is within a developed and urbanized location of the Planning Area, where significant impacts to biological resources would not be expected to occur. Further, as described in the environmental setting, the site has been previously disturbed and graded pursuant to previously approved development entitlements, and federal permits for loss of wetlands were effectuated. No sensitive biological resources remain on the site.

The previously evaluated project in the MND included a request for a Section 404 Individual Permit from the US Army Corps of Engineers and a Section 401 of the Clean Water Act permit certified by the Central Valley Regional Water Quality Control Board to allow the fill of various wetlands and waters on the site. The wetland features onsite consisted of several scattered ephemeral wet features and an unnamed tributary to Pleasant Grove Creek, flowing from south to north through the far western portion of the site. The wetlands delineation identified a total of 1.95 acres of potentially jurisdictional waters including 1.695 acres of wetlands and 0.258 acres of other waters. The wetlands consist of 0.554 acres of vernal pools, 0.859 acres of seasonal wetlands, 0.143 acres of seasonal wetland swale, and 0.139 acres of seasonal marsh. Other waters include 0.248 acres of intermittent drainage and 0.010 acres of a drainage ditch. The MND required mitigation measure BIO#1 to ensure appropriate permits were obtained from the US Army Corps and a Clean Water Act Section 401 permit. Compliance with the mitigation measure would ensure the proposed discharge complies with all State water quality requirements. Further, the MND required mitigation measure BIO#2 to ensure the project complied with the City's best management practices for water quality control and Storm Water Pollution Prevention Plan (SWPP). Both of these mitigation measures were satisfied prior to the start of any grading activities for the site. At this time, the entire sites have been mass graded. All required permits for site development related to biological resources have been obtained and effectuated.

The previous MND surveyed the project site for the presence of eight special-status plant species (i.e., these include Sanford's arrowhead, big-scale balsamroot, Boggs Lake hedge-hyssop, Ahart's dwarf rush, Greene's legenera, dwarf downingia, slender Orcutt grass). The survey results found that no occurrences of the aforementioned species were found on the property. Furthermore, the applicant retained a biologist with Adema Environmental who produced a Biological analysis (Attachment 3), which found no new or significantly increased impacts to biological resources on the site which would occur with the construction of the Project. Therefore, revised or new mitigation is not required; the adopted MND mitigation listed below remains applicable to the Project.

The previous MND found the site contained potential habitat for several special-status invertebrates, amphibians, and bird species listed by the California Department of Fish and Game. Although none of the special status wildlife species were observed onsite, the loss of vegetation could destroy unobserved nesting habitat for birds. Mitigation Measure BIO#3 requested that pre-construction surveys be completed to confirm the absence of special status wildlife. As previously mentioned, the project site has been previously mass graded and disturbance of the site has occurred. The Project will not result in any new or modified impacts to biological resources. Therefore, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that "none of the conditions described in Section 15162 calling for preparation of a subsequent FEIR have occurred."

Mitigation Measures: Applicable mitigation measures from the MND are below; no new measures are warranted for this Project.

MITIGATION MEASURE BIO#2: Prior to grading and excavation activities on-site, the developer shall obtain a grading permit to ensure that the project is in compliance with City's best management practices for water quality control and the Storm Water Pollution Prevention Plan (SWPPP).

MITIGATION MEASURE BIO#3: A qualified biologist shall perform pre-construction surveys for nesting birds and raptors at least 30 days in advance of construction if construction is planned during January to July. If the survey does not identify any special-status birds or raptors species, no further mitigation is required. If nesting is found to be occurring, avoid disturbance of the nest site with a suitable buffer zone. The on-site biologist shall consult with the California Department of Fish & Game to determine the size of the no-

disturbance buffer (typically between 150 to 200 feet). Additionally, if Swainson's hawk are found to be using the site in any capacity, off-site mitigation would be required at a ratio deemed suitable by the CDFG.

V. Cultural Resources

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents' Mitigation Measures Implemented or Addressing Impacts.
a) Cause a substantial adverse change in the significance of an historic resource pursuant to in Section 15064.5?	Page 14	No	No	No	None
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to Section 15064.5?	Same	No	No	No	None
c) Disturb any human remains, including those interred outside of dedicated cemeteries?	Same	No	No	No	None
Discussion: The MND required a cultural resources survey report be prepared for the project. A cultural resources survey report prepared by ECORP, dated August 2009 was completed with the MND. The report concluded that no cultural resources are known to exist on the project site. Standard mitigation measures in the General Plan EIR will be applied to reduce impacts to cultural resources, should any be found on-site. The mitigation measure requires that in the event of a discovery of buried archeological or historic deposits, project activity in the vicinity to be halted until a qualified archeologist can assess the resources and provide management. This mitigation need not be applied herein, as it is already applicable and required of the Project pursuant to the General Plan EIR. The Project will not result in any new impacts beyond those already discussed and disclosed in the WRSP EIR and MND; therefore, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that “none of the conditions described in Section 15162 calling for preparation of a subsequent FEIR or negative declaration have occurred.” Mitigation Measures: None required for this Project.					

VI. Energy – Energy is a new issue area.

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents' Mitigation Measures Implemented or Addressing Impacts.
a) Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?	Not applicable	No	No	No	None
b) Conflict with or obstruct a state or local plan for renewable energy or energy inefficiency?	Same	No	No	No	Same
Discussion: The MND did not previously analyzed the energy effects of the project. However, based on the existing Industrial land use designation the project was therefore assumed for development with industrial uses in the citywide environmental analyses, such as in the Amoruso Ranch Specific Plan, which updated the City's General Plan. The project is therefore consistent with the current citywide assessment of energy demand, and it is determined it would not result in substantial unplanned demands, nor would it result in inefficient, wasteful, or unnecessary consumption of energy; therefore, impacts were found to be less than significant. Pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that "none of the conditions described in Section 15162 calling for preparation of a subsequent FEIR or negative declaration have occurred." Mitigation Measures: None required for this Project.					

VII. Geology and Soils

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents' Mitigation Measures Implemented or Addressing Impacts.
a) Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:	Pages 14-16	No	No	No	None
i) Ruptures of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? (Refer to Division of Mines and Geology Special Publication 42.)	Same	No	No	No	None
ii) Strong seismic ground shaking?	Same	No	No	No	None
iii) Seismic-related ground failure, including liquefaction?	Same	No	No	No	None
iv) Landslides?	Same	No	No	No	None
b) Result in substantial soil erosion or the loss of topsoil?	Same	No	No	No	None
c) Be located in a geological unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?	Same	No	No	No	None
d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?	Same	No	No	No	None

e) Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?	Same	No	No	No	None
f) Directly or indirectly destroy a unique paleontological resource or site or unique geological feature?	Same	No	No	No	None
Discussion: The MND indicated that compliance with existing regulations and permit requirements would be sufficient to avoid impacts related to these issues. This conclusion remains appropriate for this Project. Therefore, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that “none of the conditions described in Section 15162 calling for preparation of a subsequent FEIR or negative declaration have occurred.” Mitigation Measures: None required for this Project.					

VIII. Greenhouse Gases

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents' Mitigation Measures Implemented or Addressing Impacts.
a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?	Pages 24-26	No	No	No	None
b) Conflict with an applicable plan, policy, or regulation adopted for the purpose of reducing the emissions of greenhouse gases?	Same	No	No	No	None
Discussion: The MND did not address climate change or greenhouse gas emissions because the MND determined there were no thresholds of significance against which to measure the impacts of the project and as a result the project was evaluated qualitatively relative to its incremental contribution to the overall issue of global warming. While the MND did not evaluate impacts related to greenhouse gas (GHG) emissions, the potential environmental impact of GHG emissions was known or could have been known with reasonable diligence at the time of the adoption of the MND, but no one raised the issue to the City. According to case law, a supplemental or subsequent EIR therefore may not be required here simply because the City is considering changes to a project that was approved based on an MND before CEQA expressly required GHG analysis.					

(See *Citizens Against Airport Pollution v. City of San Jose* (2014) 227 Cal.App.4th 788, 806-808 [upholds addendum for changes to an approved airport master plan even though the underlying 1997 EIR and 2003 Supplemental EIR did not address GHG impacts]; see also *Citizens for Responsible Equitable Environmental Development (CREED) v. City of San Diego* (2011) 196 Cal.App.4th 515, 530-532; and *Concerned Dublin Citizens v. City of Dublin* (2013) 214 Cal.App.4th 1301, 1318-1320.). It is acknowledged that the project would include sources of greenhouse gas emissions; however, the project also includes mitigating features that are beneficial in terms of minimizing greenhouse gas emissions. Based on these reasons, this Project would not make a significantly greater contribution to GHG emissions than what was previously evaluated. Thus, based on a body of case law, the MND's lack of GHG analysis does by itself not preclude adoption of an addendum for the proposed project and pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that "none of the conditions described in Section 15162 calling for preparation of a subsequent FEIR have occurred" relative to GHGs.

Mitigation Measures: None required for this Project.

IX. Hazards and Hazardous Materials

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents' Mitigation Measures Implemented or Addressing Impacts.
a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	Pages 16-17	No	No	No	None
b) Create a significant hazard to the public or the environment though reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	Same	No	No	No	
c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	Same	No	No	No	

d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?	Same	No	No	No	
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?	Same	No	No	No	
f) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?	Same	No	No	No	
g) Expose people or structures either directly or indirectly to a significant risk of loss, injury or death involving wildland fires?	Same	No	No	No	

Discussion: The MND found that the previously evaluated project has a Light Industrial zoning and the potential for future users to have hazardous materials on-site could occur. However, it is unknown at this time if any hazardous materials will be used or stored on-site. The California Health and Safety Code and local City Ordinances regulate the handling, storage, and transportation of hazardous and toxic materials. The California Health and Safety Codes require a Risk Management and Prevention Program (RMPP) for those uses that handle specified quantities of toxic and/or hazardous materials. Also, businesses that handle toxic or hazardous materials are required to complete a Hazardous Materials Management Program (HMMP). Furthermore, all business owners must file a site-specific business plan with the City Fire Department before a new building is occupied. All plans would need to specify what materials would be used or stored on-site and what to do in the event of an accident and which transportation routes would be used. With the implementation of the HMMP and business plan requirements, the use of storage of hazardous materials on-site would be reduced to less than significant levels with the appropriate aforementioned implementation HMMP and business plan requirements.

The MND found that during construction activities there is the possibility that potentially hazardous materials might be stored or used at the project site. The developer (during construction) is required to comply with all California Health and Safety Codes and local City Ordinances regulating the handling, storage and transportation of hazardous and toxic materials. The California Health and Safety Codes require a Risk Management and Prevention Program (RMPP) for those uses that handle specified quantities of toxic and/or hazardous materials.

The project site is not located within an airport land use plan area, no airports are located within two miles of the project site, and the project site is not located within the vicinity of a private airstrip. The project site is within an area of the City currently receiving emergency services and the project would not increase the demand for emergency services beyond that identified in the General Plan EIR.

The proposed project use does not significantly change the project's potential impacts related to hazardous materials, and it will also be subject to the City's existing regulations and permits that would prevent significant impacts. Therefore, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that "none of the conditions described in Section 15162 calling for preparation of a subsequent FEIR or negative declaration have occurred."

Mitigation Measures: None required for this Project.

X. Hydrology and Water Quality

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents' Mitigation Measures Implemented or Addressing Impacts.
a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?	Pages 17-19	No	No	No	None
b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?	Same	No	No	No	None
c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:	Same	No	No	No	None

i) result in substantial erosion or siltation on or off-site;	Same	No	No	No	None
ii) substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site;	Same	No	No	No	None
iii) create or contribute runoff water which would exceed the capacity of existing or planned stormwater systems or provide substantial additional sources of polluted runoff; or	Same	No	No	No	None
iv) impede or redirect flood flows?	Same	No	No	No	None
d) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?	Same	No	No	No	None
e) Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?	Same	No	No	No	None
f) In flood hazard, tsunami, or seiches zones, risk release of pollutants due to project inundation?	Same	No	No	No	None

Discussion: The MND indicated that development of the site would not result in any significant water-related impacts and that existing regulations and permits would ensure that water quality and stormwater impacts would be less than significant. The proposed project has been evaluated by the City to ensure the design continues to meet current adopted stormwater quality design standards. Therefore, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that “none of the conditions described in Section 15162 calling for preparation of a subsequent FEIR or negative declaration have occurred” as it relates to hydrology and water quality impacts

Mitigation Measures: None required for this Project.

XI. Land Use and Planning

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents' Mitigation Measures Implemented or Addressing Impacts.
a) Physically divide an established community?	Page 19	No	No	No	None
b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation of an agency adopted for the purpose of avoiding or mitigating an environmental effect?	Same	No	No	No	None
Discussion: The MND concluded that the previously evaluated project would not physically divide an established community as it is located in an area that has been planned for development, including adequate roads and pedestrian paths to provide connections within the community. The MND found that the previously evaluated project was consistent with the policies of the Zoning Ordinance and General Plan, which are adopted for the purpose of avoiding environmental effects. These conclusions remain applicable to the proposed project. The proposed industrial buildings are consistent with the zoning and land use designations of the site. City staff has determined that the project is consistent with the standards and guidelines outlined in the City's Zoning Ordinance, Community Design Guidelines, and the North Roseville Area Design Guidelines, including setbacks, landscaping, lighting, and building architecture to fit in with the surrounding community. The project will not divide an existing community and no conflicts with policies adopted for the purpose of avoiding or mitigating an environmental effect have been identified. The Project is substantially consistent with the build out assumptions and would not increase the severity of already identified significant impacts; therefore, there would be no new significant impacts not previously identified in the MND relative to land use. Thus, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that "none of the conditions described in Section 15162 calling for preparation of a subsequent FEIR or negative declaration have occurred" relative to land use and planning Mitigation Measures: None required for this Project.					

XII. Mineral Resources

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents' Mitigation Measures Implemented or Addressing Impacts.
a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?	Pages 19-20	No	No	No	None
b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?	Same	No	No	No	None
Discussion: The MND indicated that the project site was not known to include any mineral resources that would be of local, regional, or statewide importance. This conclusion remains appropriate for this Project. Therefore, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that “none of the conditions described in Section 15162 calling for preparation of a subsequent FEIR or negative declaration have occurred.” Mitigation Measures: None required for this Project.					

XIII. Noise

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents' Mitigation Measures Implemented or Addressing Impacts.
a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	Page 20	No	No	No	None
b) Generation of excessive ground borne vibration of ground borne noise levels?	Same	No	No	No	None
c) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?	Same	No	No	No	None

Discussion: The MND addressed construction noise, and found that surrounding uses may experience short-term increases in noise levels. However, these increases would only occur for a short period of time. When conducted during daytime hours, construction activities are exempt from Noise Ordinance standards, but the standards do apply to construction occurring during nighttime hours. While the noise generated may be a minor nuisance, the City Noise Regulation standards are designed to ensure that impacts are not unduly intrusive. Based on this, the MND found that impacts would be less than significant. This conclusion remains appropriate and applicable to the Project.

The MND found the buildout in the area would result in an increase in the ambient (background) noise level in the project area. In particular, point source noise from vehicular traffic is anticipated to raise the ambient noise level in the area. However, the MND found that the anticipated level of traffic is within the limits anticipated by the General Plan EIR and CIP EIR for build out of the project site. The future users on-site will be required to maintain noise levels in accordance with the City's Noise Ordinance. Based on this, the MND found that impacts would be less than significant. This conclusion remains appropriate and applicable to the Project.

Mitigation Measures: None required for this Project.

XIV. Population and Housing

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents Mitigation Measures Implemented or Addressing Impacts.
a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?	Page 21	No	No	No	None
b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?	Same	No	No	No	None

Discussion: The MND concluded that the site development was not housing-related, was consistent with the land use designation and thus would not induce unplanned growth, and would not displace housing. This conclusion remains appropriate for this Project. Therefore, pursuant

to CEQA Guidelines section 15164, subdivision (a), the City finds that “none of the conditions described in Section 15162 calling for preparation of a subsequent FEIR or negative declaration have occurred.”

Mitigation Measures: None required for this Project.

XV. Public Services

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents Mitigation Measures Implemented or Addressing Impacts.
Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any the public services:					
a) Fire protection?	Page 21	No	No	No	None
b) Police protection?	Same	No	No	No	None
c) Schools?	Same	No	No	No	None
d) Parks?	Same	No	No	No	None
e) Other public facilities?	Same	No	No	No	None
Discussion: The MND indicates that the City’s General Plan examined Citywide service needs based on land use designations, so any project consistent with existing land use designations would not negatively impact services. The proposed project remains consistent with the land use designation of the site, and therefore this conclusion remains appropriate for this Project. Therefore, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that “none of the conditions described in Section 15162 calling for preparation of a subsequent FEIR or negative declaration have occurred.”					

Mitigation Measures: None required for this Project.

XVI. Recreation

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents Mitigation Measures Implemented or Addressing Impacts.
a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that physical deterioration of the facility would occur or be accelerated?	Page 22	No	No	No	None
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?	Same	No	No	No	None
Discussion: The MND indicates that the City's General Plan examined the level of park services that would need to be provided in order to serve planned growth in the community. This was based on land use designations, so any project consistent with existing land use designations would not cause any unforeseen or new impacts related to the use of existing or proposed parks and recreational facilities, or related to the construction or expansion of recreational facilities. The proposed project remains consistent with the land use designation of the site, and therefore this conclusion remains appropriate for this Project. Therefore, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that "none of the conditions described in Section 15162 calling for preparation of a subsequent FEIR or negative declaration have occurred." Mitigation Measures: None required for this Project.					

XVII. Transportation

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents Mitigation Measures Implemented or Addressing Impacts.
a) Conflict with a program, plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle, and pedestrian facilities?	Page 22-23	No	No	No	None
b) Conflict or be inconsistent with CEQA Guidelines Section 15064.3, subdivision (b)?	Same	No	No	No	None
c) Substantially increase hazards due to a geometric design feature(s) (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?	Same	No	No	No	None
d) Result in inadequate emergency access?	Same	No	No	No	None

Discussion: The MND determined the previously evaluated project would result in less than significant impact on traffic and transportation. The project site was anticipated for development and transportation/traffic impacts were analyzed in General Plan EIR and 2020 CIP EIR. The 2020 CIP EIR was prepared for the Transportation System Capital Improvements Program Update that reflected changing conditions and ensured an adequate transportation system was in place.

A long-term traffic analysis has been prepared for the project by DKS Associates (dated July 27, 2007) and analyzed the project's potential level of service impacts at the City's existing intersections. The results of the study did not identify any significant impacts to the City's CIP intersections. The traffic analysis was reviewed by the City's Public Works Department, Engineering Division, and found to be adequate to support the findings.

Further, a short-term traffic analysis was prepared for the project by Fehr & Peers Transportation Associates (dated August 5, 2008). The short-term analysis looked at transportation impacts as a result of the trip generation created by the project and evaluated turning movements and site and circulation improvements. The analysis also evaluated the improvements to the City's existing roadways and circulation system that are proposed as part of the project as well as the City proposed improvements adjacent to the project site. The analysis was reviewed by the City's Public Works Department, Engineering Division, taking into account the City of Roseville level of service policies and improvement standards. The analysis determined, and the Engineering Division concurred, that the existing traffic levels of service do not meet City level of service standards and, the proposed project plus development of the adjacent Parcel 49 project, would exasperate traffic conditions. However, with the proposed improvements, the project would restore traffic operations to better than "no project" levels. The project drive aisle depths and internal circulation were also found to be adequate for the project and do not present a known traffic hazard.

The MND also analyzed the left-hand turn lane at the intersection of the HWY 65 fly-over and the jughandle and found that it presented a vehicular safety issue. The previously approved roadway improvements proposed with the project would improve vehicular safety and circulation in the area would improve with the project and emergency access will not be negatively impacted. However, a Focused Access Evaluation of the project was prepared by Fehr & Peers Transportation Associates (dated July 27, 2022) (Attachment 2) found that the second driveway along Industrial Avenue would permit all turning movements. The same study also found that the driveway closest to the HWY 64 fly-over would only permit inbound and outbound movements to right-turns only.

Given the foregoing changes introduced by the Project, these changes would not as compared to the MND result in a new significant impact or significant impacts that are substantially more severe than significant impacts previously disclosed. Therefore, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that "none of the conditions described in Section 15162 calling for preparation of a subsequent FEIR or negative declaration have occurred" as it relates to transportation impacts.

Mitigation Measures: None required for this Project.

XVIII. Tribal Cultural Resources

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents Mitigation Measures Implemented or Addressing Impacts.
Would the project cause a substantial adverse change in the significance of a Tribal Cultural Resource as defined in Public Resources Code Section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:					
a) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k)?		No	No	No	
b) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1? In applying the criteria set forth in subdivision (c) of Public Resources Code Section 5024.1 the lead agency shall consider the significance of the resource to a California Native American tribe.		No	No	No	

Discussion: In addition to archeological resources, tribal cultural resources are also given particular treatment. Tribal cultural resources are defined in Public Resources Code Section 21074, as either 1) a site, feature, place, geographically-defined cultural landscape, sacred place, or object with cultural value to a California Native American Tribe, that is listed or eligible for listing on the California Register or Historical Resources, or on a local register of historical resources or as 2) a resource determined by the lead agency, supported by substantial evidence, to be significant according to the historical register criteria in Public Resources Code section 5024.1(c), and considering the significance of the resource to a California Native American Tribe. The MND had a cultural resources survey report completed by ECORP, dated August 2009. The report concluded that no cultural resources are known to exist on the project site. While it is anticipated that there will be no impacts to cultural resources, the project will be conditioned to adhere to the General Plan EIR mitigation measures that require, in the event of a discovery of buried archeological or historic deposits, project activity in the vicinity to be halted until a qualified archeologist can assess the resources and provide management. Consistent with the MND, impacts to potential cultural resources are therefore considered to be less than significant and pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that “none of the conditions described in Section 15162 calling for preparation of a subsequent FEIR or negative declaration have occurred.”

Mitigation Measures: None required for this Project.

XIX. Utilities and Service Systems

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents Mitigation Measures Implemented or Addressing Impacts.
a) Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?	Page 24	No	No	No	None
b) Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry, and multiple dry years?	Same	No	No	No	None
c) Result in a determination by the wastewater treatment provider which serves the project that it has adequate capacity to serve the project's projected demand in addition of the provider's existing commitments?	Same	No	No	No	None
d) Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?	Same	No	No	No	None
e) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?	Same	No	No	No	None

Discussion: The MND found that the previous project would have a less than significant impact on utilities and services. The proposed project has been analyzed by City and external service and utility providers, and has been found to be consistent with standards, and utilities and service demands are within the scope of the previously analyzed project. Furthermore, Citywide planning of water supply and sewer infrastructure is based on land use, and the Project is consistent with the existing land use designation. Therefore, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that “none of the conditions described in Section 15162 calling for preparation of a subsequent FEIR or negative declaration have occurred.”

Mitigation Measures: None required for this Project.

XX. Wildfire – Wildfire is a new issue area.

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents Mitigation Measures Implemented or Addressing Impacts.
If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:					
a) Substantially impair an adopted emergency response plan or emergency evacuation plan?	Not applicable	No	No	No	None
b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?	Same	No	No	No	Same
c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?	Same	No	No	No	Same

d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?	Same	No	No	No	Same
Discussion: The MND did not previously analyzed the wildfire effects of the project. However, the checklist questions a—d above do not apply, because the project site is not within a Very High Fire Hazard Severity Zone and is not in a CAL FIRE responsibility area. The project receives fire protection from the Roseville Fire Department. Therefore, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that “none of the conditions described in Section 15162 calling for preparation of a subsequent FEIR or negative declaration have occurred.” Mitigation Measures: None required for this Project.					

XXI. Mandatory Findings of Significance

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents Mitigation Measures Implemented or Addressing Impacts.
a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of an endangered, threatened or rare species, or eliminate important examples of the major periods of California history or prehistory?	Pages 26-27	No	No	No	None

b) Does the project have impacts which are individually limited, but cumulatively considerable? (“Cumulatively considerable” means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.)	Same	No	No	No	None
c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	Same	No	No	No	None
Discussion: The MND concluded that long term environmental goals are not impacted by the proposed project and the cumulative impacts do not deviate beyond what was contemplated by the 2020 General Plan EIR. With implementation of the proposed mitigation measures the project does not have the potential to degrade the quality of the environment, substantially reduce the habitat of any wildlife species nor create adverse effects on human beings. Based on the foregoing, the proposed project does not have the potential to degrade the quality of the environment, substantially reduce the habitat of any wildlife species, or create adverse effects on human beings. Therefore, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that “none of the conditions described in Section 15162 calling for preparation of a subsequent FEIR or negative declaration have occurred.”					

ENVIRONMENTAL DETERMINATION:

In reviewing the site specific information provided for this project and acting as Lead Agency, the City of Roseville, Development Services Department, Planning Division has analyzed the potential environmental impacts created by this project and determined that the findings of CEQA Section 15162 concerning the decision not to prepare a subsequent EIR or negative declaration and the findings of CEQA Section 15164 concerning the decision to prepare an Addendum can be made. As supported by substantial evidence within the Addendum to the Blue Oaks Commerce Center Mitigated Negative Declaration (Adopted May 27, 2010), the Lead Agency makes the following findings:

[X] No substantial changes are proposed in the project which would require major revisions of the previous EIR or Mitigated Negative Declaration.

[X] No substantial changes have occurred with respect to the circumstances under which the project is undertaken.

[X] There is no new information of substantial importance which was not known and could not have been known with the exercise of due diligence at the time the previous EIR was certified as complete or the Mitigated Negative Declaration was adopted.

[X] Only minor technical changes or additions are necessary in order to deem the adopted environmental document adequate.

Addendum Prepared by:

Escarlet Mar, Associate Planner
City of Roseville, Development Services–Planning Division

NOTICE OF MITIGATED NEGATIVE DECLARATION

Project Title/File Number: Blue Oaks Commerce Center/2007PL-039

Project Location: 8950 Industrial Ave, Roseville, Placer County

Project Description: The applicant requests approval of the following: 1) a Major Project Permit - Stage I for development of 49.4 acres with 17 buildings totaling 575,505 square feet, providing a mix of office, industrial and commercial uses, and grading, parking, landscaping and lighting improvements. The project also includes the removal of the Blue Oaks Bl to Industrial Ave jughandle and the installation of two new roadways that would connect Blue Oaks Bl to Industrial Ave and Washington Bl; and 2) a Tentative Map to subdivide 49.4 acres into eight parcels.

Project Applicant: VLMK Consulting Engineers, 3933 SW Kelly Ave, Portland, OR

Property Owner: Harsch Investment Properties, LLC, 1121 SW Salmon St, Portland, OR

Lead Agency Contact Person: Gina LaTorra, Associate Planner Phone (916) 774-5276

DECLARATION: *The Planning Director has determined that the above project will have no significant effect on the environment and is therefore exempt from the requirement of an Environmental Impact Report. The determination is based on the following findings:*

- A. *The project will not have the potential to degrade the quality of the environment, substantially reduce the habitat of fish or wildlife species, cause a fish or wildlife population to drop below self sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal community, reduce the number or restrict the range of rare or endangered plants or animals or eliminate important examples of the major periods of California history or prehistory.*
- B. *The project will not have the potential to achieve short-term, to the disadvantage of long-term, environmental goals.*
- C. *The project will not have impacts, which are individually limited, but cumulatively considerable.*
- D. *The project will not have environmental effects, which will cause substantial adverse effects on human beings, either directly or indirectly.*
- E. *No substantial evidence exists that the project will have a negative or adverse effect on the environment.*
- F. *The project incorporates all applicable mitigation measures identified in the attached initial study.*
- G. *This mitigated negative declaration reflects the independent judgment of the lead agency.*

Written comments shall be submitted no later than 30 days from the start of the posting date. Appeal of this determination must be made during the posting period.

Submit comments to:

Roseville Planning & Redevelopment Department
Attn: Gina LaTorra
311 Vernon Street
Roseville, CA 95678

Posting period: 4/28/10 to 5/27/10

Initial Study Prepared by:

Gina LaTorra, Associate Planner

The public hearing regarding the project will be held on May 27, 2010 at 7:00 p.m. before the Planning Commission. The hearing will be held in the City of Roseville Council Chambers located at 311 Vernon Street, Roseville, California.

NOTE TO PLACER COUNTY CLERK: Please mail the original of this document back to the Roseville City Clerk at 311 Vernon Street, Suite 208, Roseville, CA 95678.

INITIAL STUDY & ENVIRONMENTAL CHECKLIST

Project Title/File Number: Blue Oaks Commerce Center/2007PL-039

Project Location: 8950 Industrial Ave, Roseville, Placer County

Project Description: The applicant requests approval of the following: 1) a Major Project Permit - Stage I for development of 49.4 acres with 17 buildings totaling 575,505 square feet, providing a mix of office, industrial and commercial uses, and grading, parking, landscaping and lighting improvements. The project also includes the removal of the Blue Oaks Bl to Industrial Ave jughandle and the installation of two new roadways that would connect Blue Oaks Bl to Industrial Ave and Washington Bl; and 2) a Tentative Map to subdivide 49.4 acres into eight parcels.

Project Applicant: VLMK Consulting Engineers, 3933 SW Kelly Ave, Portland, OR

Property Owner: Harsch Investment Properties, LLC, 1121 SW Salmon St, Portland, OR

Lead Agency Contact Person: Gina LaTorra, Associate Planner Phone (916) 774-5276

This initial study has been prepared to identify and assess the anticipated environmental impacts of the above described project application. The document relies on previous environmental documents (see Attachments) and site-specific studies prepared to address in detail the effects or impacts associated with the project.

This document has been prepared to satisfy the California Environmental Quality Act (CEQA), (Public Resources Code, Section 21000 et seq.) and the State CEQA Guidelines (14 CCR 15000 et seq.). CEQA requires that all state and local government agencies consider the environmental consequences of projects over which they have discretionary authority before acting on those projects.

The initial study is a public document used by the decision-making lead agency to determine whether a project may have a significant effect on the environment. If the lead agency finds substantial evidence that any aspect of the project, either individually or cumulatively, may have a significant effect on the environment, regardless of whether the overall effect of the project is adverse or beneficial, the lead agency is required to prepare an EIR, use a previously prepared EIR and supplement that EIR, or prepare a subsequent EIR to analyze the project at hand. If the agency finds no substantial evidence that the project or any of its aspects may cause a significant effect on the environment, a negative declaration shall be prepared. If in the course of analysis, the agency recognizes that the project may have a significant impact on the environment, but that by incorporating specific mitigation measures the impact will be reduced to a less than significant effect, a mitigated negative declaration shall be prepared.

In reviewing the site specific information provided for this project, the City of Roseville Planning Department has analyzed the potential environmental impacts created by this project and determined that with mitigation the impacts are considered to be less than significant. As demonstrated in the initial study checklist, there are no "project specific significant effects which are peculiar to the project or site" that cannot be reduced to less than significant effects through mitigation (CEQA Section 15183) and therefore an additional EIR is **not** required. Therefore, **on the basis of the following initial evaluation**, we find that the proposed project **could not** have a significant effect on the environment, and a **Mitigated Negative Declaration** will be prepared.

Prepared by:

Gina LaTorra

Gina LaTorra, Associate Planner

Date:

4.27.10

PROJECT DESCRIPTION

The project includes several entitlements that would allow for future development of an undeveloped 49.4 acre site. The applicant requests approval of the following: 1) a Major Project Permit - Stage I for development of the 49.4 acres with 17 buildings totaling 575,505 square feet, providing a mix of office, industrial and commercial uses, and grading, roadway, parking, landscaping and lighting improvements; and 2) a Tentative Map to subdivide 49.4 acres into eight parcels. The project would include the grading and fill of 1.695 acres of seasonal wetlands regulated by the U.S. Army Corps of Engineers. The project also includes the removal of the Blue Oaks Boulevard to Industrial Avenue jughandle and the construction of two new public roadways to connect Blue Oaks Boulevard to Industrial Avenue and Washington Boulevard. Future construction on the site would require additional permits including, but not limited to; a Major Project Permit – Stage II and Stage III, 404 Permit, permits from Caltrans, and Building Permits.

ENVIRONMENTAL SETTING

The 49.4 acre project site is located at 8950 Industrial Avenue within the North Industrial planning area. The project site extends from Industrial Avenue along the west perimeter to Washington Boulevard along the east perimeter, and is encumbered by the Caltrans right-of-way adjacent to Blue Oaks Boulevard along the north perimeter (see Figure 1). The project site is in close proximity to HWY 65 to the east. The project site is surrounded by developed commercial, industrial, and residential parcels, with the exception of Parcel 49 to the east. Parcel 49 is anticipated for development with office and commercial uses.

Figure 1 – Site Aerial

The North Industrial planning area consists of 2,045 gross acres west of Washington Boulevard and north of the Northwest Roseville Specific Plan area. The North Industrial planning area is not subject to a specific plan but is subject to adopted design guidelines (1992) that influence the general character of development within the planning area.

The Roseville General Plan identifies the project site with a General Industrial (IND) land use. The intended primary uses within the IND land use include a wide range of manufacturing, wholesale distribution, large storage areas and other industrial uses. Identified secondary uses include incidental retail and service commercial uses associated with large employment areas. Consistent with the General Plan, the Roseville Zoning Ordinance designates the site with a Light Industrial (M1) zoning. The M1 zoning designation permits a mix of light industrial uses compatible with commercial and office uses. The project site was also identified by the Blue Ribbon Corporate Center Committee in 2007 as an ideal location to support a large corporate center development.

The 49.4 acre project site is undeveloped and is comprised of primarily non-native grasslands. A total of 1.95 acres of potential jurisdictional waters are present on-site, including 1.695 acres of wetlands (seasonal wetlands and vernal pools) and 0.258 acres of "other waters". An approximately 220-foot wide series of power lines bisect a northeast portion of the property at a 45-degree angle from Washington Boulevard to Blue Oaks Boulevard. The northwest portion of the property is bisected by the Blue Oaks Boulevard to Industrial Avenue jughandle. The remainder of the site is undisturbed.

PREVIOUS ENVIRONMENTAL DOCUMENTS

The City has determined that an Initial Study shall be prepared in order to determine whether the potential exists for significant or potentially significant impacts resulting from the proposed project. Relevant analysis from the General Plan EIR, West Roseville Specific Plan (WRSP) EIR, Capital Improvement Program (CIP) EIR and other project-specific studies and reports that have been generated to date were used as the database for the Initial Study. The

decision to prepare the Initial Study utilizing the analysis contained in the General Plan EIR, WRSP EIR, CIP EIR and project-specific analysis summarized herein, is sustained by Sections 15168 and 15183 of the CEQA Guidelines.

Section 15183 states that “projects which are consistent with the development density established by existing zoning, community plan or general plan policies for which an EIR was certified shall not require additional environmental review, except as may be necessary to examine whether there are project specific significant effects which are peculiar to the project or site.” Thus, if an impact is not peculiar to the project or site, has been addressed as a significant effect in the prior EIR, or can be substantially mitigated by the imposition of uniformly applied development policies or standards then an additional EIR need not be prepared for the project solely on the basis of that impact.

Section 15168 relating to program EIRs indicates that where subsequent activities involve site specific operations, the agency should use a written checklist or similar device to document the evaluation of the site and the activity, to determine whether the environmental effects of the operation were covered in the earlier program EIR. A program EIR is intended to provide the basis in an Initial Study for determining whether the later activity may have any significant effects. It can also be incorporated by reference to deal with regional influences, secondary effects, cumulative impacts, broad alternatives, and other factors that apply to the program as a whole.

Regarding the subject project, the **General Plan EIR** serves as the program-level EIR from which incorporation by reference can occur.

1. GENERAL PLAN EIR

The City's 2020 General Plan was adopted on February 4, 2004 by Resolution #04-39. The current General Plan contains in large part the same goals, policies, and implementation measures as the previous 2010 General Plan (adopted on November 18, 1992, by Resolution #92-321), for which a formal General Plan EIR was prepared. However, the current General Plan has been updated to reflect the current level of development in the City and to reflect the 3,100-acre West Roseville Specific Plan annexation that was approved in 2004. Changes between the 2010 General Plan and the current 2020 General Plan were analyzed as part of the West Roseville Specific Plan Environmental Impact Report (WRSP EIR) (SCH #2002082057).

Each element of the General Plan (GP) references and provides policies relating to specific plans. The specific plans are viewed as the primary mechanism for implementing the goals and policies of the GP. The plans are consistent with, and incorporated by reference into, the Land Use Element of the GP (page II-59 of the GP). Specific plan land uses are reflected on the GP land use map. The specific plans establish detailed policies and implementation programs for portions of the City, consistent with the goals and policies established in the GP.

The City Council adopted a Statement of Overriding Considerations when they certified the GP EIR, identifying the following impacts as significant and unavoidable:

- flood hazard
- vehicular air emissions (ozone)
- construction air emissions (ozone)
- vehicle noise
- railroad noise
- noise from fixed sources
- conversion of open space outside of infill area
- jobs/housing imbalance
- affordable housing
- increased traffic/degraded LOS
- loss of annual grasslands
- loss of oak trees and oak woodlands
- loss of riparian woodlands
- loss of vernal pools
- loss of intermittent drainages and other seasonal wetland habitat
- habitat fragmentation and loss of wildlife habitat
- risk of hazardous materials-related emergencies due to rail operations

- cumulative air quality, land use, jobs/housing, traffic, biological, cultural, risk of upset, open space, public services and utilities, and water impacts
- growth inducement

2. WEST ROSEVILLE SPECIFIC PLAN

The West Roseville Specific Plan is referenced and utilized in the evaluation of this project as it represents the most recent significant change in land use and allocation of new land use to the City following the adoption of the 1992 General Plan. The project added approximately 3,100 acres to the City's corporate limits, and included a mixed-use land use plan of commercial, business professional, industrial, park, open space, and school land uses, and included 8,430 new residential dwelling units. As mentioned above, processing of this plan also resulted in an update to the City's 2010 General Plan.

In accordance with the California Environmental Quality Act (CEQA), it was determined that the West Roseville Specific Plan had the potential to have a significant adverse impact upon the environment, and the WRSP EIR (SCH #2002082057) was prepared for the project. A Notice of Completion was filed with the State of California Office of Planning and Research. The Final Environmental Impact Report (FEIR) was certified by the City Council on February 4, 2004. A copy of the WRSP EIR is available for review within the Planning Department at 311 Vernon Street, Roseville, CA.

The City Council adopted a Statement of Overriding Considerations when they certified the WRSP EIR. The EIR identified the following impacts associated with development of the WRSP area as significant and unavoidable:

- Potential incompatibility of internal land uses
- Conversion of agricultural land to developed uses
- Inducement of substantial population growth
- Increased traffic on City of Roseville roadways
- Increased traffic on State Highways
- Increased traffic on Placer County roadways
- Increased emissions of fugitive dust and PM10 from grading and trenching activities (short term)
- Increased emissions of ozone precursors during construction (short-term)
- Increased emissions of air pollutants during operation
- Loss of oak trees of greater than 6 inches dbh (short-term)
- Removal of historically significant properties and/or loss of historic integrity of such resources
- Increased demand for solid waste services at the landfill
- Increased demand for solid waste services at the MRF
- Construction debris demand for solid waste services
- Alteration of the visual character of the site and vicinity
- New sources of light and glare

For buildout of the WRSP project area, the WRSP EIR also identified the following cumulative impacts as significant and unavoidable:

- Agricultural land conversion
- Increased traffic on City of Roseville roadways with Kaiser Medical Center
- Air quality emissions from construction
- Air quality emissions from operation
- On-site noise levels that exceed City standards
- Off-site noise levels that exceed City standards
- Loss of historic resources
- Increased demand for water
- Increased demand for recycled water distribution system
- Increased generation of solid waste
- Increased stormwater runoff in the Curry Creek Watershed
- Change in visual character

3. SUBSEQUENT ENVIRONMENTAL IMPACT REPORT AND ROSEVILLE 2020 TRANSPORTATION SYSTEM CAPITAL IMPROVEMENTS PROGRAM UPDATE

The Subsequent Environmental Impact Report and Roseville 2020 Transportation System Capital Improvements Program Update (2020 CIP EIR) was adopted by the Roseville City Council on June 20, 2007 by Resolution #07-311. The 2020 CIP EIR updated the City's Roadway Capital Improvement Program (CIP) and General Plan to reflect changing conditions and ensure an adequate transportation system, consistent with the City's General Plan. The 2020 CIP EIR reflects the most current level of development in the City, including the 3,100-acre West Roseville Specific Plan annexation that was approved in 2004.

The EIR identified the following impacts associated with the General Plan land use allocation as significant and unavoidable:

Existing Plus Project Conditions

- Increased traffic on City of Roseville roadways
- Increased traffic on state highways
- Increased traffic on Placer County roadways
- Increased traffic on Sacramento County roadways
- Growth-inducing impacts

2020 Plus Project Conditions

- Increased traffic on City of Roseville's roadways
- Increased traffic on state highways
- Increased traffic on Placer County roadways
- Growth-inducing impacts

2025 Cumulative Plus Project Conditions

- Increased traffic on City of Roseville roadways
- Increased traffic on state highways
- Increased air emissions
- Loss of biological resources
- Growth-inducing impacts

CITY OF ROSEVILLE MITGATING POLICIES AND STANDARDS

The California Environmental Quality Act (CEQA) Guidelines¹ allow the use of previously adopted development policies or standards as mitigation for the environmental effects of future projects, when the standards have been adopted by the City with findings, based on substantial evidence, that the policies or standards will substantially mitigate environmental effects, unless substantial new information shows that the policies or standards will not substantially mitigate the effects (§15183[f]). In March 2003, the City of Roseville adopted findings applicable to the following regulations and ordinances, which include standards and policies that are uniformly applied throughout the City, and will substantially mitigate specified environmental effects of future projects.

- City of Roseville Zoning Ordinance (RMC Title 19)
- Noise Regulation (RMC Ch.9.24)
- Flood Damage Prevention Ordinance (RMC Ch.9.80)
- Traffic Mitigation Fee (RMC Ch.4.44)
- Drainage Fees (Dry Creek [RMC Ch.4.49] and Pleasant Grove Creek [RMC Ch.4.48])
- City of Roseville Improvement Standards (Resolution 02-37)

¹ California Code of Regulations Title 14, Chapter 3, §15000-15387.

- City of Roseville Construction Standards (Resolution 01-208)
- City of Roseville Grading Ordinance (RMC Ch.16.20)
- Tree Preservation Ordinance (RMC Ch.19.66)
- Subdivision Ordinance (RMC Title 18)
- Community Design Guidelines (Resolution 95-347)
- Specific Plan Design Guidelines:
 - Development Guidelines Del Webb Specific Plan (Resolution 96-330)
 - Landscape Design Guidelines for North Central Roseville Specific Plan (Resolution 90-170)
 - North Roseville Specific Plan and Design Guidelines (Resolution 00-432)
 - Northeast Roseville Specific Plan (Olympus Pointe) Signage Guidelines (Resolution 89-42)
 - North Roseville Area Design Guidelines (Resolution 92-226)
 - Northeast Roseville Specific Plan Landscape Design Guidelines (Resolution 87-31)
 - Southeast Roseville Specific Plan Landscape Design Guidelines (Resolution 88-51)
 - Stoneridge Specific Plan and Design Guidelines (Resolution 98-53)
 - West Roseville Specific Plan (Resolution #04-38)

As demonstrated in the checklist discussions below and the discussion that follows, no project changes resulting in important revisions to the previous EIRs, substantial changes in circumstances or substantially important new information (CEQA Guidelines thresholds per Sections 15162 and 15163) have occurred or become available in any environmental issue area since the time the CIP EIR, GP EIR, and WRSP EIR were certified.

INITIAL STUDY CHECKLIST

The initial study checklist recommended by the State of California Environmental Quality Act (CEQA) Guidelines is used to determine potential impacts of the proposed project on the physical environment. The checklist provides a list of questions concerning a comprehensive array of environmental issue areas potentially affected by the project. Explanations to answers are provided in a discussion for each section of questions, as follows:

1. A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g. the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g. the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
2. All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project level, indirect as well as direct, and construction as well as operational impacts.
3. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect is significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
4. "Less Than Significant With Mitigation" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less-than-significant level.
5. "Less Than Significant Impact" applies where the impact does not require mitigation or result in a substantial or potentially substantial change of any of the physical conditions within the area affected by the project.
6. Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D).

7. Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.

Initial Study Checklist

1. Aesthetics

Would the project:

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation	Less Than Significant Impact	No Impact
a) Have a substantial adverse effect on a scenic vista?			X	
b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?			X	
c) Substantially degrade the existing visual character or quality of the site and its surroundings?			X	
d) Create a new source of substantial light or glare, which would adversely affect day or nighttime views in the area?			X	

Discussion of Checklist Answers:

No scenic vistas are identified in the area of the project. The General Plan EIR identified that the conversion of open space to urban development as an unavoidable significant impact for which the City Council adopted a statement of overriding considerations. The City of Roseville has adopted Community Design Guidelines (CDG) with the purpose of minimizing the aesthetic impacts of new development projects. The CDG includes guidelines for building design, site design and landscape design, which have the purpose of improving the built environment. The North Roseville Design Guidelines also contain design guidelines that promote high standards of architectural design and continuity within the North Industrial planning area. The City's approving authority (Planning Commission) will review the Major Project Permit (MPP) - Stage I & II and Tentative Subdivision Map for conformance with City standards and requirements. The project will not result in any new aesthetic impacts beyond those identified in the General Plan EIR.

Light and glare will increase above the existing condition. Light and glare associated with the proposed project will result from parking lot lighting and exterior building lighting. Additional daytime glare could be caused by reflections from windows on buildings and additional automobile windshields. As part of the MPP – Stage II process, site lighting is reviewed for consistency with the CDG that address aesthetic concerns as well as off-site affects. Existing sources of light and glare exist along the major roadways and HWY 65 and in the project vicinity. The Blue Oaks Commerce Center development would not differ substantially from that of nearby development and the amount of additional lighting and glare would contribute to the already affected viewshed.

Based on the information presented above, impacts associated with the project upon aesthetics are considered less than significant.

2. Agricultural and Forestry Resources

In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Department of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In

determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board. Would the project:

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation	Less Than Significant Impact	No Impact
a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?				X
b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?				X
c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?				X
d) Result in the loss of forest land or conversion of forest land to non-forest use?				X
e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?				X

Discussion of Checklist Answers:

No agricultural resources are present on the site and the property does not have an agricultural zoning designation. The site is not considered forest land and the project will not result in the loss of forest land. Therefore, the proposed development would have no impact on agricultural resources.

3. Air Quality

Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations.

Would the project:

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation	Less Than Significant Impact	No Impact
a) Conflict with or obstruct implementation of the applicable air quality plan?		X		

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation	Less Than Significant Impact	No Impact
b) Violate any air quality standard or contribute substantially to an existing or projected air quality violation?		X		
c) Result in a cumulatively considerable net increase of any criteria for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions, which exceed quantitative thresholds for ozone precursors)?		X		
d) Expose sensitive receptors to substantial pollutant concentrations?			X	
e) Create objectionable odors affecting a substantial number of people?			X	

Discussion of Checklist Answers:

California Clean Air Act Requirements

The City of Roseville, along with the south Placer County area, is located in the Sacramento Air Quality Maintenance Area (SAQMA). Under the California Clean Air Act, Placer County has been designated a "serious non-attainment" area for ozone and a "non-attainment" area for PM10 (particulate matter less than 10 microns in diameter). The Placer County Air Pollution Control District (PCAPCD) is responsible for administration of state and federal air quality standards. In 1991, the PCAPCD adopted its first Air Quality Attainment Plan (AQAP). The AQAP is required by the California Clean Air Act (CCAA), and is designed to bring Placer County into compliance with state ozone standards, which are generally more stringent than current federal ambient standards.

Federal Clean Air Act Requirements

Under the Federal Clean Air Act, Placer County is designated as a severe non-attainment area for ozone, and is an attainment area for the federal PM10 standards, and other criteria pollutants. The City of Roseville, along with the south Placer County area, is located in the Sacramento Air Quality Maintenance Area (SAQMA). The Sacramento Area Council of Governments (SACOG), in conjunction with SAQMA air quality management districts, and the California Air Resources Board, developed the SAQMA portion of the State Implementation Plan (SIP). The SIP is required to demonstrate compliance with the Federal Clean Air Act Amendments. The U.S. EPA approved the SIP in 1996, and the SAQMA has since been operating under the SIP control measures.

This project alone does not have a potential to significantly degrade air quality. However, the incremental impacts associated with this project considered cumulatively with the incremental impacts of other projects will degrade air quality. The City has assessed the impacts to air quality of continued development in the City in the General Plan EIR and its cumulative impact analyses. The General Plan EIR found that the significant adverse air quality impacts cannot be mitigated to a less than significant level even with the mitigation measures proposed. Addressing the unmitigatable cumulative impacts to air quality, the General Plan EIR adopted findings of overriding consideration. However, CEQA requires that reductions in adverse project impacts be made, where it is feasible to do so.

AIR QUALITY MITIGATION MEASURES

The PCAPCD and the City of Roseville have coordinated on a list of feasible mitigation measures that may be applied to projects to address air quality impacts. The project applicant has agreed to the following mitigation measures:

MITIGATION MEASURE AQ#1:

1a. Prior to approval of Grading or Improvement Plans (whichever occurs first) on project sites greater than five (5) acres, the applicant shall submit a Construction Emission / Dust Control Plan

to the Placer County APCD. The applicant shall provide written evidence, provided by APCD, to the local jurisdiction (city or county) that the plan has been submitted to APCD. If APCD does not respond within twenty (20) days the plan shall be considered approved. It is the responsibility of the applicant to deliver the approved plan to the local jurisdiction. The applicant shall not break ground prior to receiving APCD approval, of the Construction Emission / Dust Control Plan, and delivering that approval to the local jurisdiction issuing the permit.

1b. Include the following standard note on the Grading Plan or Improvement Plans: The prime contractor shall submit to the District a comprehensive inventory (i.e. make, model, year, emission rating) of all the heavy-duty off-road equipment (50 horsepower or greater) that will be used in aggregate of 40 or more hours for the construction project. If any new equipment is added after submission of the inventory, the prime contractor shall contact the APCD prior to the new equipment being utilized. At least three business days prior to the use of subject heavy-duty off-road equipment, the project representative shall provide the District with the anticipated construction timeline including start date, name, and phone number of the property owner, project manager, and on-site foreman.

1c. Prior to approval of Grading or Improvement Plans, whichever occurs first, the applicant shall provide a written calculation to the Placer County APCD for approval by the District demonstrating that the heavy-duty (> 50 horsepower) off-road vehicles to be used in the construction project, including owned, leased and subcontractor vehicles, will achieve a project wide fleet-average 20 percent NOx reduction and 45 percent particulate reduction as required by CARB. Acceptable options for reducing emissions may include use of late model engines, low emission diesel products, alternative fuels, engine retrofit technology, after-treatment products, and/or other options as they become available. The following link shall be used to calculate compliance with this condition and shall be submitted to the Placer County APCD as described above: <http://www.airquality.org/ceqa/> (click on the current "Roadway Construction Emissions Model").

MITIGATION MEASURE AQ#2: The following APCD rules shall be noted on the Improvement Plans:

- The project shall comply with all applicable Placer County Air Pollution Control District rules and regulation, and shall obtain applicable permits and/or clearances from the District prior to the start of construction.
- The contractor shall use CARB ultra low sulfur diesel fuel for all diesel-powered equipment. In addition, low sulfur fuel shall be utilized for all stationary equipment. (California Standards for Motor Vehicle Diesel Fuel, title 13, article 4.8, chapter 9, California Code of Regulations).
- Processes that discharge 2 pounds per day or more of air contaminants, as defined by Health and Safety Code Section 39013, to the atmosphere may require a permit. Permits are required for both construction and operation. Developers/contractors should contact the District prior to construction and obtain any necessary permits prior to the issuance of a Building Permit. (Rule 501)
- Pursuant to the Placer County Air Pollution Control District Rule 501, General Permit Requirements, the proposed project may need a permit from the District prior to construction. In general, any engine greater than 50 brake horsepower or any boiler with heat greater than 1,000,000 Btu per hour shall require a permit issued by the District. (Rule 501)
- All on-site stationary equipment which is classified as 50 hp or greater shall either obtain a state issued portable equipment permit or a Placer County APCD issued portable equipment permit. (California Portable Equipment Registration Program, Section 2452).
- The contractor shall utilize existing power sources (e.g., power poles) or clean fuel generators rather than temporary diesel power generators if feasible.
- During construction, the contractor shall minimize idling time to a maximum of 5 minutes for all diesel powered equipment.
- During construction, traffic speeds on all unpaved surfaces shall be limited to 15 miles per hour or less. (Rule 228 / section 401.2)

Short term impacts to air quality can be expected in association with construction activities. These impacts are primarily associated with grading activities and the increased potential for dust and wind driven erosion of soils. Particulate matter resulting from construction dust will be reduced by implementing standard dust control measures on the job site as part of an erosion control plan. The grading permit and on-site inspection by the Public Works Department will ensure appropriate dust control measures, such as watering are done to reduce short-term air quality impacts. Vehicle exhaust, produced during project construction, could temporarily contribute to the deterioration of ambient air quality. Diesel fuel fumes from construction equipment may be noticeable in the vicinity of the site; however, this is a short-term effect. All equipment must comply with the mitigation measures and with California emissions standards.

This project remains consistent with the development scenarios modeled for the General Plan Land Use designation of General Industrial (IND) and the findings and statement of overriding considerations adopted by the City for the General Plan. Future industrial uses that locate onsite will be required to comply with the PCAPCD requirements and may need to obtain permits prior to occupancy. Industrial users may need to install air quality devices such as exhaust systems. Permitting with the PCAPCD will ensure that operation emissions are regulated. Therefore, with the air quality mitigation measures incorporated into the project the air quality impacts of this project would be less than significant.

There are no sensitive receptors located in the immediate vicinity of the project. The multi-family residential development southeast of the project on Washington Boulevard comprises of the nearest sensitive receptor. Construction and operation of the project will increase emissions on the site, but not substantially; implementation of mitigation measures AQ#1 and AQ#2 will reduce project emissions to less than significant levels. Potential impacts to sensitive receptors would therefore be less than significant.

The project does not include components with the potential to create significant objectionable odors. No impact associated with odor would result from the project.

4. Biological Resources

Would the project:

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation	Less Than Significant Impact	No Impact
a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?		X		
b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies or regulations or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?		X		
c) Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?		X		

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation	Less Than Significant Impact	No Impact
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?		X		
e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?			X	
f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?				X

Discussion of Checklist Answers:

The project site is undeveloped and several potential biological resources have been identified on-site including potential wetlands, drainage channels, and grasslands. The applicant proposes to disturb 1.95 acres of wetlands, as such; a Section 404 Individual Permit Application was submitted to the US Army Corps of Engineers (Corps). Pursuant to Section 7 of Federal Endangered Species Act, surveys were conducted to confirm the absence of special status species, specifically vernal pool tadpole shrimp and vernal pool fairy shrimp. The 404 permit application included a wetland delineation and biological resources assessment. Based on the information contained within the application and within the City's General Plan EIR, the potential impacts and mitigation measures are as follows;

Special Status Species:

The project site is not located within an area designated as Critical Habitat for the special status species vernal pool fairy shrimp, however, the wetland types found onsite could potentially represent habitat for the endangered species. The USFWS confirmed that the service guideline-level wet season surveys completed during the 2005-2006 and 2006-2007 seasons were performed adequately and the conditions on the site were appropriate to demonstrate the absence of special status species on the project site. Potential impacts to special status species is therefore considered less than significant.

Wetlands:

The Roseville General Plan includes policies related to wetlands preservation. They are: 1) avoid the wetlands if feasible; 2) reconstruct wetlands on-site; or 3) provide mitigation for the wetlands off-site at a replacement ratio of 1 to 1. Even with these policies, the General Plan EIR determined that development within the City would result in the loss of wetlands, and that the loss of wetlands was a significant and unavoidable impact. A statement of overriding considerations was adopted.

Wetland features onsite consist of several scattered ephemerally wet features and an unnamed tributary to Pleasant Grove Creek, flowing from south to north through the far western portion of the site. The wetlands delineation identified a total of 1.95 acres of potentially jurisdictional waters including 1.695 acres of wetlands and 0.258 acres of other waters. The wetlands consist of 0.554 acres of vernal pools, 0.859 acres of seasonal wetlands, 0.143 acres of seasonal wetland swale, and 0.139 acres of seasonal marsh. Other waters include 0.248 acres of intermittent drainage and 0.010 acres of a drainage ditch. The project would permanently fill the above listed onsite wetlands and waters. Pursuant to Section 404 of the Clean Water Act, construction activities are subject to approval of the Corps. Pursuant to Section 401 of the Clean Water Act, the Corps permit will need to be certified by the Central Valley

Regional Water Quality Control Board (CVRWQCB). Proper permitting as required by Mitigation Measure BIO#1 and BIO#2 will ensure that the potential impacts to wetlands are less than significant.

BIOLOGICAL RESOURCES MITIGATION MEASURES

The following mitigation measures will reduce the wetlands impacts to a less than significant level:

MITIGATION MEASURE BIO#1: Prior to the issuance of a grading permit or approval of improvement plans and prior to the filling of any potential wetlands or waters of the US as identified in the wetland delineation, the applicant shall obtain appropriate permits from the US Army Corps (anticipated to be an Individual Permit). Additionally, a Clean Water Act Section 401 permit shall be obtained from the Central Valley Regional Water Quality Control Board (CVRWQCB) to ensure the proposed discharge complies with all State water quality requirements. Additionally, a Fish and Game Section 1601 permit shall be obtained for streambed alterations that are regulated by Fish & Game. The project shall implement the mitigation requirements of these permits to ensure no net loss of wetlands/waters of the US.

MITIGATION MEASURE BIO#2: Prior to grading and excavation activities on-site, the developer shall obtain a grading permit to ensure that the project is in compliance with City's best management practices for water quality control and the Storm Water Pollution Prevention Plan (SWPPP).

Special Status Plants:

The majority of the site consists of both native and non-native grassland habitat. The General Plan EIR identifies the loss of annual grassland and habitat fragmentation as significant unavoidable impacts. A statement of overriding considerations was adopted by the City Council for these impacts.

Based on the conditions found onsite, the property was surveyed for the presence of eight special-status plant species. These include Sanford's arrowhead, big-scale balsamroot, Boggs Lake hedge-hyssop, Ahart's dwarf rush, Greene's legene, dwarf downingia, slender Orcutt grass and Sacramento Orcutt grass. No occurrences of these species were observed on the property. The USFWS determined that the survey was done adequately to demonstrate absence of these species. Therefore potential impacts to special status plants are considered less than significant.

Special Status Wildlife:

Several special-status wildlife species are known to occur or potentially occur within the jurisdictional area of the General Plan EIR, which includes the project site. The site contains potential habitat for several special-status invertebrates, amphibians, and bird species listed by the California Department of Fish and Game. Although none of the special status wildlife species were observed onsite, the loss of vegetation could destroy unobserved nesting habitat for birds. Therefore, pre-construction surveys should be conducted to confirm the absence of special status wildlife. With mitigation measure BIO#3 the impact to these species is considered less than significant.

BIOLOGICAL RESOURCES MITIGATION MEASURES

The following mitigation measures will reduce the special-status wildlife impacts to a less than significant level:

MITIGATION MEASURE BIO#3: A qualified biologist shall perform pre-construction surveys for nesting birds and raptors at least 30 days in advance of construction if construction is planned during January to July. If the survey does not identify any special-status birds or raptors species, no further mitigation is required. If nesting is found to be occurring, avoid disturbance of the nest site with a suitable buffer zone. The on-site biologist shall consult with the California Department of Fish & Game to determine the size of the no-disturbance buffer (typically between 150 to 200 feet). Additionally, if Swainson's hawk are found to be using the site in any capacity, off-site mitigation would be required at a ratio deemed suitable by the CDFG.

Native Oak Trees:

There are no native oak trees onsite and the project will not conflict with the City's Tree Preservation Ordinance, therefore impacts to native oaks are considered less than significant.

5. Cultural Resources

Would the project:

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation	Less Than Significant Impact	No Impact
a) Cause a substantial adverse change in the significance of a historic resource as defined in Section 15064.5?			X	
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to Section 15064.5?			X	
c) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?			X	
d) Disturb any human remains, including those interred outside of formal cemeteries?			X	

Discussion of Checklist Answers:

A cultural resources survey report was prepared for the project by ECORP, dated August 2009. The report concluded that no cultural resources are known to exist on the project site. While it is anticipated that there will be no impacts to cultural resources, the project will be conditioned to adhere to the General Plan EIR mitigation measures that require, in the event of a discovery of buried archeological or historic deposits, project activity in the vicinity to be halted until a qualified archeologist can assess the resources and provide management. Impacts to potential cultural resources are therefore considered to be less than significant.

6. Geology and Soils

Would the project:

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation	Less Than Significant Impact	No Impact
a) Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:			X	
i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? (Refer to Division of Mines and Geology Special Publication 42.)			X	
ii) Strong seismic ground shaking?			X	

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation	Less Than Significant Impact	No Impact
iii) Seismic-related ground failure, including liquefaction?			X	
iv) Landslides?			X	
b) Result in substantial soil erosion or the loss of topsoil?			X	
c) Be located in a geological unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?			X	
d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?			X	
e) Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?				X

Discussion of Checklist Answers:

- a. The project may expose people or structures to potential substantial adverse effects involving seismic shaking, ground failure or landslides.

i-iii) The project site is located in Roseville which is in Placer County. The California Department of Mines and Geology classifies the South Placer area as a low severity earthquake zone. No active faults are known to exist within the County. The project site is considered to have low seismic risk with respect to faulting, ground shaking, seismically related ground failure and liquefaction. The risk associated with rupture of a known earthquake fault or seismic related ground failure to new structures is low and therefore the impact is less than significant.

iv) Landslides typically occur where soils on steep slopes become saturated or where natural or manmade conditions have taken away supporting structures and vegetation. The existing and proposed slopes are not steep enough to present a hazard during development or upon completion of the project. In addition, during construction, measures would be incorporated to shore slopes and prevent potential earth movement. Therefore, impacts associated with landslides are considered less than significant.

- b. Grading activities will result in the disruption, displacement, compaction and over covering of soils associated with site preparation (grading and trenching for utilities). Grading activities for the project will be limited to the project site.

Grading activities require a grading permit from the Engineering Division of the Public Works Department. The grading permit will be reviewed for compliance with the City's Improvement Standards, including the provision of proper drainage, appropriate dust control and erosion control measures. Grading and erosion control measures will be incorporated into the required grading plans.

- c-d. The project site is not located in a sensitive geologic area and does not expose people to potential geologic impacts. Additionally, the Roseville General Plan finds such impacts to be less than significant since new buildings and structures are required to comply with all applicable building codes. A soil report is required with the submittal of the improvement plans. The City of Roseville Building Department will review construction plans before a building permit is issued and the Engineering Division will review and approve

all rough grading plans to ensure that all grading and structures would withstand shrink-swell potentials and earthquake activity in this area.

- e. A General Plan Policy requires that new development connect to the City's sanity sewer system. The City's Environmental Utilities Department has reviewed the project and determined that City's sanity sewer system can accommodate the project. No septic tanks will be permitted as part of the project. Therefore, no impact to soils relative to supporting use of septic tanks would occur.

Impacts to the geology and soils on site are considered to be less than significant.

7. Hazards and Hazardous Materials

Would the project:

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation	Less Than Significant Impact	No Impact
a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?			X	
b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?			X	
c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?			X	
d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?				X
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?				X
f) For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing in the project area?				X
g) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?				X
h) Expose people or structures to a significant risk of loss, injury or death				X

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation	Less Than Significant Impact	No Impact
involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?				

Discussion of Checklist Answers:

The California Health and Safety Code and local City Ordinances regulate the handling, storage, and transportation of hazardous and toxic materials. The California Health and Safety Codes require a Risk Management and Prevention Program (RMPP) for those uses that handle specified quantities of toxic and/or hazardous materials. Also, businesses that handle toxic or hazardous materials are required to complete a Hazardous Materials Management Program (HMMP). Furthermore, all business owners must file a site-specific business plan with the City Fire Department before a new building is occupied. All plans would need to specify what materials would be used or stored on-site and what to do in the event of an accident and which transportation routes would be used. The property has a Light Industrial zoning so there is the potential for future users to have hazardous materials on-site. It is however not known at this time if any hazardous materials will be used or stored on-site. Any potential impacts as a result of the use or storage of hazardous materials are reduced to less than significant levels with implementation of the HMMP and business plan requirements.

During construction activities, there is the possibility that potentially hazardous materials might be stored or used at the project site. The developer (during construction) is required to comply with all California Health and Safety Codes and local City Ordinances regulating the handling, storage and transportation of hazardous and toxic materials. The California Health and Safety Codes require a Risk Management and Prevention Program (RMPP) for those uses that handle specified quantities of toxic and/or hazardous materials.

The project is not located within an airport land use plan area, no airports are located within two miles of the project site, and the project site is not located within the vicinity of a private airstrip. No impact would occur.

This project is located within an area currently receiving City emergency services. Fire Station 8 is located less than 0.3 miles from the property and would be able to serve the site within the City's standard response time. The project will not increase the demand for emergency services beyond that identified in the General Plan EIR, and therefore will have a less than significant impact to the City's Emergency Response or Management Plans.

8. Hydrology and Water Quality

Would the project:

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation	Less Than Significant Impact	No Impact
a) Violate any water quality standards or waste discharge requirements?			X	
b) Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?			X	
c) Substantially alter the existing drainage pattern of the site or area,			X	

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation	Less Than Significant Impact	No Impact
including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on- or off-site?				
d) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site?			X	
e) Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted water?			X	
f) Otherwise substantially degrade water quality?			X	
g) Place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?				X
h) Place within a 100-year flood hazard area structures, which would impede or redirect flood flows?				X
i) Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?			X	
j) Inundation by seiche, tsunami, or mudflow?				X

Discussion of Checklist Answers:

Development of the site will not result in any significant water-related impacts. Construction of the proposed project and over covering of the site with paving will have a minor effect on the absorption rate of water on-site; however, the project will include a drainage system designed in accordance with the City's improvement standards which will adequately handle on-site drainage associated with the development of the property. Prior to the approval of the Improvement Plans, the developer shall prepare and submit a Storm Water Pollution Prevention Plan (SWPPP) to the City, as defined by the Regional Water Quality Control Board, to ensure that the project will not result in the release of materials that will affect water quality.

A grading permit, with associated mitigation measures for dust control, will be required before construction starts. There may be minor amounts of wind and/or water erosion associated with construction of the facility. Standard erosion control measures will be required during construction. Additionally, measures to protect water quality will be taken as determined by the Soil Management Plan and Health and Safety Plan required by DTSC prior to any grading or construction on site.

No groundwater withdrawal is proposed. The proposed project will have no effect on groundwater supplies. Seiches and tsunamis are seismically induced large waves of water. Because there are no large bodies of water nearby, the threat of seiche and tsunami is non-existent. Similarly, mudflows are not a concern in Placer County.

Therefore, based on the soil types found in Placer County, the proposed project would have no impact relative to inundation by seiche, tsunami or mudflow.

Based on the information provided above, impacts regarding hydrology and water quality are considered less than significant.

9. Land Use and Planning

Would the project:

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation	Less Than Significant Impact	No Impact
a) Physically divide an established community?				X
b) Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?				X
c) Conflict with any applicable habitat conservation plan or natural community conservation plan?				X

Discussion of Checklist Answers:

The General Plan land use designation is General Industrial (IND); the zone district designation is General Industrial (M2). The development will include 13 light industrial buildings, two (2) office buildings, and two retail/commercial buildings totaling 575,505 square feet, and associated landscaping and parking which is consistent with the existing zoning designation. There are no Habitat Conservation Plans or Natural Community Conservation Plans covering the project site. The land use and planning impacts that would occur in association with the proposed project are consistent with the General Plan EIR, WRSP EIR and CIP EIR and are less than significant.

10. Mineral Resources

Would the project:

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation	Less Than Significant Impact	No Impact
a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?				X
b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?				X

Discussion of Checklist Answers:

The project site is not known to include any mineral resources that would be of local, regional, or statewide importance, therefore, the project is not considered to have any impacts on mineral resources.

11. Noise

Would the project result in:

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation	Less Than Significant Impact	No Impact
a) Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?			X	
b) Exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels?			X	
c) A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?			X	
d) A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?			X	
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?				X
f) For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?				X

Discussion of Checklist Answers:

Short term impacts such as construction activities could expose nearby tenants/landowners to increased noise levels. These impacts would be temporary and are considered less than significant since noise levels and construction hours are limited by the City's Municipal Code to daytime hours (7:00 a.m. to 7:00 p.m., Monday through Friday, and 8:00a.m. to 8:00 p.m., Saturday, Sunday and holidays).

Buildout in the area will result in an increase in the ambient (background) noise level in the project area. In particular, point source noise from vehicular traffic is anticipated to raise the ambient noise level in the area. However, the anticipated level of traffic is within the limits anticipated by the General Plan EIR and CIP EIR for build out of the site. Future uses on-site will be required to maintain noise levels in accordance with the City's Noise Ordinance. As a result, the long term impacts related to noise generation are considered less than significant.

12. Population and Housing

Would the project:

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation	Less Than Significant Impact	No Impact
a) Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?			X	
b) Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?				X
c) Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?				X

Discussion of Checklist Answers:

The proposal is not a housing-related project, does not induce growth beyond that anticipated in the General Plan EIR and does not displace any existing housing. Therefore, the project will have a less than significant impact on population or housing.

13. Public Services

Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the following public services:

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation	Less Than Significant Impact	No Impact
a) Fire protection?			X	
b) Police protection?			X	
c) Schools?			X	
d) Other public facilities?			X	

Discussion of Checklist Answers:

The General Plan EIR identifies and adopts mitigation for impacts to public services, including police and fire protection, wastewater services, and solid waste disposal. The proposed project will not increase the need for public services and utilities beyond that identified in the General Plan EIR. As a result, no further environmental review is necessary.

14. Recreation

Would the project:

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation	Less Than Significant Impact	No Impact
a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that physical deterioration of the facility would occur or be accelerated?			X	
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?				X

Discussion of Checklist Answers:

The proposed project will not generate new jobs that could increase park usage in the area of the project. However adequate facilities are located within the plan area and the project does not require and additional facilities. Therefore, the project will not impact the existing and planned park facilities.

15. Transportation/Traffic

Would the project:

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation	Less Than Significant Impact	No Impact
a) Conflict with an applicable plan, ordinance or policy establishing measures of effectiveness for the performance of the circulation system, taking into account all modes of transportation including mass transit and non-motorized travel and relevant components of the circulation system, including but not limited to intersections, streets, highways and freeways, pedestrian and bicycle paths, and mass transit?			X	
b) Conflict with an applicable congestion management program, including, but not limited to level of service standards and travel demand measures, or other standards established by the county congestion management agency for designated roads and highways?			X	
c) Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?				X

d) Substantially increase hazards due to design features (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?			X	
e) Result in inadequate emergency access?			X	
f) Conflict with adopted policies, plans, or programs regarding public transit, bicycle, or pedestrian facilities, or otherwise decrease the performance or safety of such facilities.			X	

Discussion of Checklist Answers:

The project site was anticipated for development and transportation/traffic impacts were analyzed in General Plan EIR and 2020 CIP EIR. The 2020 CIP EIR was prepared for the Transportation System Capital Improvements Program Update that reflected changing conditions and ensured an adequate transportation system was in place.

A long-term traffic analysis has been prepared for the project by DKS Associates (dated July 27, 2007) and analyzed the project's potential level of service impacts at the City's existing intersections. The results of the study did not identify any significant impacts to the City's CIP intersections. The traffic analysis was reviewed by the City's Public Works Department, Engineering Division, and found to be adequate to support the findings.

A short-term traffic analysis was prepared for the project by Fehr & Pers Transportation Associates (dated August 5, 2008). The short-term analysis looked at transportation impacts as a result of the trip generation created by the project and evaluated turning movements and site and circulation improvements. The analysis also evaluated the improvements to the City's existing roadways and circulation system that are proposed as part of the project as well as the City proposed improvements adjacent to the project site. Improvements include; 1) the removal of the Blue Oaks Bl. to Industrial Ave. jughandle, 2) the installation of two new roadways to connect Blue Oaks Bl to Industrial Ave. and Washington Bl, 3) left-turn access into the project site from the westbound Hwy 65 fly-over, 4) construction of third eastbound travel lane/right-turn lane on Blue Oaks Bl., 5) construction of a left turn lane on Blue Oak Bl. into the project site, 6) reconfiguration of Washington Bl. to allow deceleration lanes into the project site, 7) deceleration lanes into the project on Industrial Ave., 8) the addition of a traffic signal at the intersection of "Road A" and Washington Bl., 9) continuation of bicycle lanes on Blue Oaks and Washington Bl's., 10) installation of sidewalks along all roadways within and fronting the project site, and 11) the addition of bus shelters within the project. The analysis was reviewed by the City's Public Works Department, Engineering Division, taking into account the City of Roseville level of service policies and improvement standards. The analysis determined, and the Engineering Division concurred, that the existing traffic levels of service do not meet City level of service standards and, the proposed project plus development of the adjacent Parcel 49 project, would exasperate traffic conditions. However, with the proposed improvements, the project would restore traffic operations to better than "no project" levels. The project drive aisle depths and internal circulation were also found to be adequate for the project and do not present a know traffic hazard.

The left-hand turn lane at the intersection of the HWY 65 fly-over and the jughandle currently presents a vehicular safety issue. The roadway improvements proposed with the project will improve vehicular safety. Circulation in the area will improve with the project and emergency access will not be negatively impacted.

The Alternative Transportation division has also reviewed the project to ensure that it will not conflict with adopted policies, plans, or programs regarding public transit, bicycle, or pedestrian facilities, or otherwise decrease the performance or safety of such facilities. The project is conditioned to provide a Transportation Systems Management (TSM) plan. The intent is to reduce vehicle trips and reduce peak hour traffic generated from the project. The installation of sidewalks, continuation of bicycle lanes and installation of bus shelters along the existing bus route will encourage alternative transportation methods, which have the potential to further reduce the amount of vehicle trips generated from the project. That applicant must show alternative commute options are encouraged as part of the TSM plan. The City's Alternative Transportation Division will review and approve the plan prior to building permit approval of the project.

The project will have a less than significant impact on traffic and transportation.

16. Utilities and Service Systems

Would the project:

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation	Less Than Significant Impact	No Impact
a) Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?			X	
b) Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?			X	
c) Require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?			X	
d) Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?			X	
e) Result in a determination by the wastewater treatment provider which serves the project that it has adequate capacity to serve the project's projected demand in addition of the provider's existing commitments?			X	
f) Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?			X	
g) Comply with federal, state, and local statutes and regulations related to solid waste?			X	

Discussion of Checklist Answers:

Water and sewer services will be provided by the City of Roseville. The developer will be responsible for extending new lines onto the site in order to serve the project. Storm water will be collected on-site and transferred via pipe into an off-site storm drain system. Solid waste will be collected by the City of Roseville's Refuse Department. The City of Roseville will provide electric service to the site, while natural gas will be provided by PG&E. Comcast will provide cable. Adequate services are available to the project, therefore, impacts to utilities are considered to be less than significant.

17. Greenhouse Gas Emissions

Would the project:

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation	Less Than Significant Impact	No Impact
a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?			X	
b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?			X	

Background

Global climate change is a change in the average weather of the earth, which can be measured by wind patterns, storms, precipitation, and temperature. It is exacerbated by greenhouse gases, which trap heat in the atmosphere (thus the “greenhouse” effect). Greenhouse gases include carbon dioxide, methane, and nitrous oxide, and are emitted by natural processes and human activities. The accumulation of greenhouse gases in the atmosphere regulates the earth’s temperature, and is natural and desirable, as without it the Earth’s surface would be about 61 degrees cooler.²

Scientific evidence suggests that emissions from human activities, such as electricity production and vehicle emissions, have elevated the concentration of these gases in the atmosphere, and are increasing the rate and magnitude of climate change to a degree that could present hazardous conditions. Potential adverse effects of global warming include the exacerbation of air quality problems, a reduction in the quality and supply of water to the state from the Sierra snowpack, a rise in sea levels, changes to ecosystems and the natural environment, and an increase in the incidences of infectious diseases, asthma, and other human health-related problems.³

The potential for climate change impacts at specific locations remains uncertain, and to assign specific impacts to the project site would be speculative. Some conclusions can be drawn about the potential in general for the project area to be subject to increased likelihood of flooding, drought, and susceptibility to the increased potential for infectious diseases as cited above. An individual project, even a very large project, does not in itself generate enough greenhouse gas emissions to significantly influence global climate change. Global climate change is a cumulative process. A project contributes to this potential impact through its cumulative incremental contribution combined with the emissions of all other sources of greenhouse gases.

Legislation

In 2006, the State Legislature passed and the Governor signed AB 32, which acknowledged global climate change and charged the California Air Resources Board (CARB) with developing regulations to address global climate change. CARB is mandated to achieve feasible and cost-effective reductions in greenhouse gases by 2020, and to approve an implementation plan no later than January 1, 2009. On December 12, 2008, the CARB adopted a Scoping Plan that provides the outline for actions to reduce California’s greenhouse gas (GHG) emissions. CARB is currently working to implement the measures outlined in the plan.

There are currently no established thresholds for measuring the significance of a project’s cumulative contribution to global climate change. However, individual projects can contribute to greenhouse gas emission reductions by incorporating features that reduce vehicle emissions, and maximize energy-efficiency. The City has existing programs in place that reduce and minimize greenhouse gas emissions:

- City Adopted National Action Plan for Energy Efficiency (2006)
- Solar Electric (PV) Incentive Programs

² “Recommendations by the Association of Environmental Professionals on How to Analyze Greenhouse Gas Emissions and Global Climate Change in CEQA Documents, Comment Draft”. March 5, 2007.

³ Division 25.5 California Global Warming Solutions Act of 2006, Part 1. General Provisions. Section 38501 (a).

- Joined California Climate Action Registry (2006)
- City adopted “Smart Choices for Roseville’s Future: Implementation Strategies to Achieve Blueprint Project Objectives (June 2005)
- City has installed solar electric generation (PV) on several City Facilities.
- City’s Civic Center and Roseville Electric buildings with clean, renewable power by purchasing 100% of their energy use from Green Roseville.
- 20% renewable power resources in Roseville Electric’s power portfolio.
- Shade Tree Program
- Roseville Electric goal to reduce energy requirements by 5% by 2012
- Alternatively Fueled City Vehicles
- Electric Vehicle Charging Stations
- City Traffic Signal Head Retrofit from traditional incandescent to LED
- City facilities retrofitted with a HVAC efficiency management program
- Asphalt Recycling
- Residential Energy Efficiency Programs
- Energy Efficiency Programs for Low Income Residents
- Commercial Energy Efficiency Programs
- Tree Mitigation Ordinance
- Parking Lot Shade Tree Ordinance
- Recycling Drop-Offs throughout City
- Summer Youth Bus Pass
- Bicycle Incentive Programs
- ITS (Intelligent Transportation System) for traffic management
- Alternatives to Paper at the Library

Since there are no thresholds of significance against which to measure the impacts of the project, the project has been evaluated qualitatively relative to its incremental contribution to the overall issue of global warming. The magnitude of global warming is such that the contributions of the proposed project itself are negligible. It is acknowledged that the project would include sources of greenhouse gas emissions; however, the project also includes mitigating features that are beneficial in terms of minimizing greenhouse gas emissions. The potential impacts to greenhouse gas emissions are therefore considered less than significant.

18. Mandatory Findings of Significance

Would the project:

Environmental Issue	Potentially Significant	Potentially Significant Unless Mitigated	Less Than Significant	No Impact
a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal		X		

Environmental Issue	Potentially Significant	Potentially Significant Unless Mitigated	Less Than Significant	No Impact
community, reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory?				
b) Does the project have impacts which are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects).			X	
c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?			X	

Discussion of Checklist Answers:

Long term environmental goals are not impacted by the proposed project. The cumulative impacts do not deviate beyond what was contemplated by the 2020 General Plan EIR. With implementation of the proposed mitigation measures the project does not have the potential to degrade the quality of the environment, substantially reduce the habitat of any wildlife species nor create adverse effects on human beings.

Reference Documents for Blue Oaks Commerce Center (2007PL-039) Initial Study

The following documents were referenced in the Blue Oaks Commerce Center (2007PL-039) Initial Study and were used to support the environmental determination;

- USFWS Section 7 Consultation Letter dated March 18, 2008
- Section 404 Individual Permit Application prepared by ECORP, dated August 2009
- Cultural Resources Survey Report prepared by ECORP, dated August 2009
- Statement dated August 14, 2007 from Bill Moore, Associate Engineer, and Long-term Traffic Study
- Transportation Impact Study prepared by Fehr & Peers, dated August 5, 2008

The above stated documents are available for review Monday through Friday, 8 a.m. to 5 p.m. at the Roseville Planning Department, 311 Vernon Street, Roseville, CA 95678.

DRAFT TECHNICAL MEMORANDUM

Date: July 26, 2022
To: Jack Varozza, PE, City of Roseville
From: John Gard, PE, RSP1, Fehr & Peers
Subject: ***Focused Access Evaluation for Blue Oaks Commerce Center***

RS22-4207

This memorandum presents the data collection, analysis, and recommendations of our focused access review of Blue Oaks Commerce Center (BOCC), which is situated south of Blue Oaks Boulevard and east of Industrial Avenue in the City of Roseville (refer to **Figure 1** for project location). Our review specifically focuses on two driveways planned on Industrial Avenue that would serve the project's industrial uses. The remainder of this memorandum is organized into the following sections:

- I. Existing Conditions
- II. Project Travel Characteristics
- III. Project Access Review
- IV. Recommendations

I. Existing Conditions

Roadway Network

The following roadways would provide direct vehicular access to the BOCC:

Industrial Avenue – is a two-lane north-south collector street that begins at Washington Boulevard and extends northerly through Roseville into unincorporated Placer County. Along the project frontage, it has a posted speed limit of 45 miles per hour (mph). The travel lanes are divided by either left-turn pockets or a paved median. Industrial Avenue parallels SR 65 between Roseville and Lincoln and is a time-competitive alternate route when SR 65 becomes congested.

Freedom Way – is a two-lane east-west street that begins at Industrial Avenue and terminates at Washington Boulevard. Along the project frontage, it has a posted speed limit of 40 mph and two undivided 16-foot wide travel lanes.

Fidelity Way – is a two-lane north-south street that begins at Blue Oaks Boulevard and terminates at Freedom Way. Along the project frontage, it has a posted speed limit of 30 mph and two undivided 16-foot wide travel lanes. Movements at the Blue Oaks Boulevard/Fidelity Way intersection are controlled by a traffic signal, though northbound left-turns are prohibited.

Industrial Avenue/Freedom Way Intersection

This T-intersection is controlled by a traffic signal. The southbound left-turn movement operates with a flashing yellow arrow, which requires motorists to yield to oncoming traffic (see **Image 1**). If southbound motorists are required to wait in the left-turn lane for an extended period of time (while waiting to find a gap in northbound traffic), the flashing yellow arrow changes into a solid green arrow, converting the southbound left-turn from a permitted to protected movement.

Image 1: Flashing yellow arrow for southbound left-turn lane on Industrial Avenue

Truck Routes

Within the City of Roseville, there are two types of truck routes: Surface Transportation Assistance Act (STAA) routes and local routes. STAA routes allow large trucks to operate on the interstate freeway system and certain primary routes. These trucks, referred to as STAA trucks, are longer than California legal trucks. On surface streets, STAA routes are designated either as Terminal or Service Access routes. Terminal routes are approved by the agency with jurisdiction over the roadway to enable the truck to reach its ultimate destination. Service Access routes allow STAA trucks to exit the interstate onto a local road, for one mile only, for food, fuel, lodging, or repair.

According to the City of Roseville website¹, STAA Terminal routes exist on Industrial Avenue along its entire length within the City. An STAA Terminal route also exists on the entirety of Fidelity Way. A

¹

[11X17 \(civicleve.com\)](https://www.civicleve.com)

California legal truck route exists on the entirety of Freedom Way. Thus, a variety of established truck routes are located in the immediate proximity of the project site. Based on June 2022 traffic counts (described in detail below), trucks constitute about 8% of AM peak hour traffic and 3% of PM peak hour traffic at this intersection.

Traffic Volumes

Traffic volumes on Industrial Avenue and Freedom Way were collected from the City's ITS traffic count database for Tuesday – Thursday, May 10-12, 2022. Schools were in session at the time of the counts. The average daily traffic across the three weekdays was 11,200 vehicles on Industrial Avenue north of Freedom Way and 8,100 vehicles south of Freedom Way. Freedom Way east of Industrial Avenue carried 4,800 daily vehicles.

Traffic volumes during the AM and PM peak periods at the Industrial Avenue/Freedom Way intersection were also obtained from the City's ITS traffic count database for the same three days in May 2022. The busiest hour of travel during the morning occurred from 7:45 to 8:45 AM. The busiest hour of travel during the evening occurred from 4 to 5 PM. **Figure 2** shows the existing AM and PM peak hour traffic volumes (averaged for the three days), lane configurations, and traffic control at this intersection.

The City's ITS count database does not provide data regarding vehicle queue lengths. Accordingly, Fehr & Peers retained NDS to conduct traffic volume and maximum queue length counts on several different weekdays in June and July 2022. The first count was conducted on Wednesday, June 29, 2022 and yielded an unexpectedly high southbound left-turn volume of 458 vehicles from 4-5 PM.² Because of this anomaly, a second set of observations was conducted from 4-5 PM on Thursday, July 7, 2022. One last observation was made on Monday, July 11, 2022. **Table 1** shows the results of these data collection efforts.

²

The City's ITS count database was queried and showed a near identical southbound left-turn volume as the traffic count, indicating the observation was not erroneous. The ITS count database showed that mid-week volumes tend to be in range of 180 to 240 vehicles per hour. The anomaly on this particular day could have been caused by any number of atypical conditions such as severe SR 65 congestion resulting in diverted traffic to Industrial Avenue, construction activity, special events, or other effects.

TABLE 1			
TRAFFIC VOLUMES AND MAXIMUM QUEUES AT INDUSTRIAL AVENUE/FREEDOM WAY			
15-Minute Time Period Starting at:	Southbound Left-Turn		Northbound Through/Right Volume

² Traffic volumes from City's ITS count database. Queuing observations conducted by NDS.			
³ Traffic volumes from City's ITS count database. Queuing observations conducted by Fehr & Peers.			
Source: Fehr & Peers, 2022.			

On Wednesday, June 29, 2022, a maximum queue of five vehicles was observed during the PM peak hour. One incidence of this queue is shown in **Image 2** based on the camera placed at the intersection by NDS. During the observation period on Monday, July 11, 2022, a maximum queue of five vehicles was also observed as shown in **Image 3**.

Technical Memorandum: Focused Access Evaluation for Blue Oaks Commerce Center

July 27, 2022

Page 5

Image 2: Maximum queue of 5 vehicles in southbound left-turn lane during PM peak hour on Wednesday, June 29, 2022

Image 3: Maximum queue of 5 vehicles in southbound left-turn lane during PM peak hour on Monday, July 11, 2022 (note that the protected green arrow had been activated)

Neither video nor photography were available for the count on Thursday, July 7, 2022. NDS staff confirmed the accuracy of this data with the technician who performed the observations.

It is apparent from field observations, review of video collected on June 29, 2022, and the observed maximum queues themselves that many factors (beyond simply the left-turn volume) affect the number of vehicles queued in the southbound left-turn lane. Following is a list of those factors:

1. Level of northbound through/right traffic – these vehicles have the right-of-way and prevent southbound left-turns from occurring.
2. Random versus platooned arrivals on southbound Industrial Avenue – in some instances, vehicles arrived in large platoons (caused by a slow traveling lead vehicle). This quickly filled up the left-turn lane.
3. Driver uncertainty – some motorists appeared unfamiliar with the flashing yellow indication, waiting in the turn lane despite no approaching northbound traffic.

In summary, with respect to vehicle queues in the southbound left-turn lane, maximum queues of 5 vehicles during the PM peak hour are typical, though longer queues can develop under certain conditions (as was evidenced on July 7th). Additionally, since Industrial Avenue and Freedom Way are truck routes, trucks comprise a portion of the left-turn demand. As shown in Image 2, the maximum queue on June 29th included a truck, thereby resulting in a queue that was about 175 feet long.³

Collision History

City of Roseville staff provided data from its collision database for the segment of Industrial Avenue between the Blue Oaks Boulevard overcrossing and Galilee Road for the four-year period from June 2018 to June 2022. **Table 2** shows the results. Note that the southbound left-turn flashing yellow arrow had been installed prior to 2018.

This table shows 9 total collisions at the Industrial Avenue/Freedom Way intersection over the four-year period. Injuries were reported for 7 of the 9 collisions, but no fatalities occurred. The majority (6 of 9) were multi-vehicle broadside collisions involving southbound left-turn and northbound through motorists. No collisions involved bicyclists or pedestrians. Additionally, no collisions were reported along Industrial Avenue immediately north or south of the intersection.

³ Note that the 5th vehicle in the queue was positioned north of the terminus of the northbound Class II bike lane. The rear bumper of that vehicle was positioned about 180 feet north of the southbound left-turn stop bar, meaning that queued vehicles occupied an average of 36 feet of turn lane space. This is due to the truck that was present and the nature of the permissive left-turn, which tends to result in more of a “rolling queue” versus a stationary queue.

Technical Memorandum: Focused Access Evaluation for Blue Oaks Commerce Center

II. Project Travel Characteristics

Project Land Uses and Access

The portion of the BOCC under study is shown on **Figure 3**. As shown, this portion of BOCC is situated east of Industrial Avenue on both sides of Freedom Way. According to the site plan (source: *Blue Oaks Commerce Center*, VLMK Engineering+Design, March 2022), the following land uses are planned on each parcel:

- North Parcel – two industrial buildings with a total of 119,000 square feet of floor space.
- South Parcel – two industrial buildings with a total of 189,280 square feet of floor space.

In total, the two parcels would comprise 308,280 square feet of industrial space.

A total of 7 driveways would serve the two parcels. Driveways 1 and 2 would be situated along Industrial Avenue, driveways 3 through 6 would be situated on Freedom Way (directly opposite each other), and driveway 7 would be situated on Fidelity Way. *This study analyzes what turning movements should be allowed at Driveways 1 and 2. For analysis purposes, both driveways are assumed to permit all turning movements so as to understand travel demands, queuing, etc. under this condition.*

Driveways 1 and 2 are described in more detail below:

- Driveway 1 on Industrial Avenue – has already been constructed with curb returns and driveway apron in place. It is situated 215 feet north of Freedom Way.⁴ The driveway would be 40 feet wide, consist of a 100-foot throat depth, and have curb return radii of 20 feet. A northbound 120-foot right-turn deceleration lane is present. The southbound left-turn at the Industrial Avenue/Freedom Way intersection is 260 feet in length and extends beyond this driveway.
- Driveway 2 on Industrial Avenue – has already been constructed with curb returns and driveway apron in place. It is situated 275 feet south of Freedom Way and 340 feet north of the driveway serving 8880 Industrial Avenue.⁵ The driveway would be 40 feet wide, consist of a 100-foot throat depth, and have curb return radii of 20 feet. The driveway is situated along a section of Industrial Avenue that has a continuous 650-foot northbound acceleration/deceleration lane that becomes a right-turn lane at Freedom Way. The median of Industrial Avenue is paved with a width of 12 feet in the driveway vicinity.

The following page shows photos of each driveway.

⁴ Referenced from the near curb return of the adjacent intersection to the centerline of the driveway.

⁵ Referenced from the centerline of each driveway.

Image 5: View looking northbound on Industrial Avenue toward Driveway 2

Trip Generation

The "Industrial Park" (Land Use Code 130) category from the *Trip Generation Manual, 11th Edition* (ITE 2021) was chosen to estimate the project's trip generation and is defined as follows:

An industrial park contains several individual industrial or related facilities. It is characterized by a mix of manufacturing, service, and warehouse facilities with a wide variation in the proportion of each type of use from one location to another. Many industrial parks contain highly diversified facilities. Some parks in the database have a large number of small businesses and others have one or two dominant industries.

Table 3 shows the project's estimated weekday AM and PM peak hour trip generation. As shown, the North and South parcels would generate a combined 104 trips during each of the AM and PM peak hours. Trips during these two periods would be highly directional, with about 80% being inbound in the AM peak hour and outbound during the PM peak hour.

TABLE 3 PROJECT TRIP GENERATION										
Land Use	ITE Code	Quantity	AM Peak Hour of Adjacent Street				PM Peak Hour of Adjacent Street			
			Trip Rate ¹	Vehicle Trips			Trip Rate ¹	Vehicle Trips		
				In	Out	Total		In	Out	Total
Industrial Park (North Parcel)	130	119 KSF	0.34	32	8	40	0.34	8	32	40
Industrial Park (South Parcel)	130	189.28 KSF	0.34	52	12	64	0.34	14	50	64
Total			-	84	20	104	-	22	82	104
Notes:										
¹ Trip rates from the <i>Trip Generation Manual, 11th Edition</i> (Institute of Transportation Engineers, 2021). Source: Fehr & Peers, 2022.										

Data from the *Trip Generation Manual* also provides insights into the relative amount of passenger vehicle versus truck traffic at industrial parks. ITE data includes truck trip rate data and total trip rate data for three specific sites. Key findings from this data were:

- During the AM peak hour, trucks ranged from 11 to 13 percent of total trips at the three sites, for an average of 12 percent trucks.
- During the PM peak hour, trucks ranged from 4 to 12 percent of total trips at the three sites, for an average of 8 percent trucks.

This suggests that about 10 trucks are expected to enter/exit the two parcels during each peak hour.

Trip Distribution

Table 4 displays the project's estimated trip distribution. As shown, separate distribution percentages were derived for passenger vehicles (i.e., primarily employee trips) versus trucks. Whereas passenger vehicles are expected to be generally oriented in proportion to the location of residences, truck trip distribution is more aligned with truck routes and key destinations.

As shown, an estimated 15% of project trips would be distributed to/from the north on Industrial Avenue. Industrial Avenue is expected to be utilized by 20% of outbound project trips to travel westbound on Blue Oaks Boulevard (via Alantown Drive) toward Foothills Boulevard.

TABLE 4 PROPOSED PROJECT TRIP DISTRIBUTION			
Trip Distribution	Passenger Vehicles	Trucks	Weighted ¹
Blue Oaks Blvd toward SR 65 (East)	50%	60%	51%
Blue Oaks Blvd toward Foothills Blvd (West)	20%	15%	20%
Industrial Avenue toward Sunset Blvd (North)	15%	15%	15%
Industrial Avenue toward Washington Blvd (South)	5%	5%	5%
Freedom Way toward Washington Blvd (South)	10%	5%	10%
Total			101% ²
Notes:			
¹ Weighting is 90% passenger vehicles and 10% trucks (see previous page).			
² Sum exceeds 100% due to rounding.			
Source: Fehr & Peers, 2022.			

Trip Assignment

It is unlikely that project trips distributed to/from the east (i.e., on SR 65 or Washington Boulevard) would use project driveways situated on Industrial Avenue given the proximity and convenience of other more easterly driveways.

Conversely, it is also possible that some trips destined for Industrial Avenue will choose to use driveways on Fidelity Way or Freedom Way, which carry considerably less traffic compared to Industrial Avenue. The traffic assignments that follow consider these behaviors.

Figure 4 shows the existing plus project volumes at the Industrial Avenue/Freedom Way intersection and Driveways 1 and 2 on Industrial Avenue. As shown, Driveways 1 and 2 would each carry 15 or fewer vehicles per hour. The project would cause very modest changes in traffic volumes at the Industrial Avenue/Freedom Way intersection.

III. Project Access Review

The project access review focuses on the following project driveway aspects:

1. Sight distance analysis for southbound left-turn at Driveway 1
2. Maximum queue lengths at Driveways 1 and 2
3. Conflict points in southbound left-turn lane on Industrial Avenue at Driveway 1

Sight Distance Analysis for Southbound Left-Turn at Driveway 1

Motorists desiring to turn left into Driveway 1 could encounter sight distance limitations due to southbound queued vehicles in the Industrial Avenue/Freedom Way southbound left-turn lane. Since Industrial Avenue is posted with a 45 mph speed limit, a design speed of 50 mph was selected for the analysis. **Figure 5** shows that under conditions present in Image 5 (i.e., queue of 5 vehicles including one truck), a southbound left-turning vehicle at Driveway 1 would have 375 feet of available sight distance. This is less than the 440 feet required (refer to Figure 5 for calculation details). Thus, insufficient sight distance would be provided for the southbound left-turn into Driveway 1.

Maximum Queue Lengths at Driveways 1 and 2

The modest volumes (15 vehicles per hour or less) turning into and out of Driveways 1 and 2 suggest that maximum queues would typically be one or two vehicles. Both driveways would have throat depths of 100 feet, which is sufficient for either four passenger vehicles, or one truck and one passenger vehicle.

It is possible to stripe a 175-foot southbound left-turn lane in the Industrial Avenue median serving Driveway 2. This would provide adequate stacking for vehicles turning into this driveway.

Conflict Points in Southbound Left-Turn at Driveway 1

Field observations revealed many motorists on southbound Industrial Avenue enter the Freedom Way left-turn at its beginning (versus merging into the lane 100 feet further south for instance). This behavior is especially common among motorists who are following a slower lead vehicle. If southbound left-turns were permitted at Driveway 1 within this turn lane, continuing southbound motorists would encounter vehicles stopped in the turn lane, waiting to turn into Driveway 1. This would introduce a clear and obvious conflict area, which could lead to an increase in rear-end collisions.

Additionally, since queued left-turning vehicles already spill back to Driveway 1, it would not be possible to stripe separate left-turn lanes serving both Driveway 1 and Freedom Way.

IV. Recommendations

Based on the data and analyses presented in this memorandum, the following recommendations are offered at each driveway:

Driveway 1

1. Restrict inbound and outbound movements to right-turns only by constructing a narrow, raised curb on the east edge of the median/left-turn lane. The raised curb would begin 100 feet north of the driveway centerline and end 75 feet south of the driveway centerline.⁶
2. Post a One Way Only sign within the raised curb visible to vehicles exiting Driveway 1.
3. Post a No U-Turn sign at the north end of the raised curb or in the adjacent median.

Driveway 2

1. Stripe a 175-foot southbound left-turn lane within the paved median to serve this driveway.
2. Permit all turning movements.

⁶

A raised curb could be constructed similar to what exists on portions of Hazel Avenue (STAA route) north of Oak Avenue in Sacramento County. The recommended extents of the raised curb consider the minimum distance required to deter direct left-turns, while also not extending the raised curb an excessive distance.

Biological Resources Letter Report

Blue Oaks Commerce Center - 2200 Freedom Way

December 2022

SUMMARY

Schnitzer Properties (Owner) is proposing to complete development of the 575,505 square foot Blue Oaks Commerce Center office, industrial and retail complex (project). The City of Roseville approved the Blue Oaks Commerce Center in 2010. The Owner constructed the first project building in 2015/2016. The Owner proposes to modify the Project to complete the development of four buildings totaling approximately 310,000 square feet. Project activities would occur within Sections 21 & 22, Township 11N, Range 06E, within the Roseville USGS 7.5' Quad, Placer County Assessor's Parcel Number (APN) 017-123-090. (**Attachment A: Figure 1 – Location Map**)

Original project activities were evaluated and approved under an Initial Study/Mitigated Declaration (IS/MND). The IS/MND identified three biological Mitigation Measures (MMs) to mitigate potential project impacts. The mitigation measures generally included the requirement to obtain regulatory permits for habitat elimination, issuance of a grading permit and coverage under the CA Construction General Permit (CGP), and pre-construction presence/absence species surveys prior to construction.

After a thorough evaluation of original project documents, species data from multiple sources, and a site visit conducted by principal biologist Carol Adema to document present day site conditions; the Project biologist concluded that no new or significantly increased environmental impacts would occur secondary to the re-initiation of project activities. As such, no additional MMs beyond those identified in the original project IS/MND will be necessary, though the timing windows mentioned in MM BIO#3 have been updated to reflect present day standards, as discussed in the Conclusions and Recommendations Section.

PROJECT HISTORY & DESCRIPTION

The City of Roseville circulated the IS/MND for public review on April 29, 2010 (SCH# 2010042089), closing for comment on May 29, 2010. Project activities commenced in September 2014 with initial site preparation and grading, including the removal of naturally occurring aquatic features within the entirety of the site, removal of a portion of roadway located on the northwest corner of the project area, installation of stormwater treatment swales along the western border of the property, and concluding in 2017 with the construction of a Federal Bureau of Investigation campus on the southeast corner of the property.

As required by the MMs, the Owner obtained regulatory permits from the U.S. Army Corps of Engineers (USACE), the U.S. Fish & Wildlife Service (USFWS), the CA Regional Water Quality Control Board (RWQCB) (for both Clean Water Act (CWA) and CGP), and the CA Department of Fish and Wildlife. Mitigation credits were then purchased, as stipulated by agency permits. (**Appendix A: Regulatory Permits and Proof of**

Mitigation Purchase) Prior to re-initiation of ground disturbing activities during the migratory bird breeding season, a pre-construction survey was conducted by a qualified biologist with negative findings. **(Appendix B: Pre-construction Survey Report)**

Initial grading and compaction of the undeveloped portion of the site eliminated all 2.028 acres of naturally occurring on-site aquatic features and resulted in the installation of stormwater treatment swales along the western border of the property.

The proposed project will allow the development of four industrial buildings totaling approximately 310,000 square feet in size with associated parking, lighting, and landscaping.

PROJECT SPECIFIC IS/MND BIOLOGICAL MITIGATION MEASURES

- **MITIGATION MEASURE BIO#1:** *Prior to the issuance of a grading permit or approval of improvement plans and prior to the filling of any potential wetlands or waters of the US as identified in the wetland delineation, the applicant shall obtain appropriate permits from the US Army Corps (anticipated to be an Individual Permit). Additionally, a Clean Water Act Section 401 permit shall be obtained from the Central Valley Regional Water Quality Control Board (CVRWQCB) to ensure the proposed discharge complies with all State water quality requirements. Additionally, a Fish and Game Section 1601 permit shall be obtained for streambed alterations that are regulated by Fish & Game. The project shall implement the mitigation requirements of these permits to ensure no net loss of wetlands/waters of the US.*
- **MITIGATION MEASURE BIO#2:** *Prior to grading and excavation activities on-site, the developer shall obtain a grading permit to ensure that the project is in compliance with the City's (Roseville) best management practices for water quality control and the Storm Water Pollution Prevention Plan (SWPPP).*
- **MITIGATION MEASURE BIO#3:** *A qualified biologist shall perform pre-construction surveys for nesting birds and raptors at least 30 days in advance of construction if construction is planned during January to July. If the survey does not identify any special-status birds or raptors species, no further mitigation is required. If nesting is found to be occurring, avoid disturbance of the nest site with a suitable buffer zone. The on-site biologist shall consult with the California Department of Fish & Game to determine the size of the no-disturbance buffer (typically between 150 to 200 feet). Additionally, if Swainson's hawk are found to be using the site in any capacity, off-site mitigation would be required at a ratio deemed suitable by the CDFG.*

METHODS

On December 15, 2022, principal biologist Carol Adema conducted a survey for biological and aquatic resources present on-site within the Biological Survey Area (BSA). The nearly 26-acre BSA was created by buffering the project area a distance sufficient to analyze project impacts on adjacent resources (approximately 250-500 feet). The survey took place from approximately 1200-1600; conditions were cold and sunny with temperatures ranging from the mid- to upper-50's with a very slight north breeze. The results of the site survey and data analysis are provided and discussed on pages 4-9 of this letter report.

Prior to conducting the surveys, past environmental survey reports, maps and documents, existing databases, topographic maps, soil reports, and multiple years of aerial imagery of the BSA were reviewed, and areas of potential habitat noted. Additionally, after conducting the surveys, agency special-status species lists were reviewed, considering existing conditions observed within the BSA both during the season surveyed as well as all other times of year.

Ms. Wallen obtained lists of special-status habitats and/or species potentially occurring in the vicinity of the BSA from the USFWS Information for Planning and Consultation (IPac) as well as the USFWS National Wetlands Inventory (NWI). Additionally, a 5-mile project buffer was applied to execute a search of the CDFW California Natural Diversity Database (CNDDDB), while a 9-quadrant search (Sheridan, Pleasant Grove, Lincoln, Gold Hill, Rocklin, Citrus Heights, Roseville, Rio Linda, and Folsom) was utilized to query the California Native Plant Society's (CNPS) Online Rare and Endangered Plant Inventory. The agency lists are provided as **Appendix C: Supporting Agency Species Lists**. A map of CNDDDB occurrences within 5 miles of the project area may be found as **Attachment A: Figure 2 - CNDDDB Map**.

Ms. Wallen conducted a biological survey of the project area and surrounding habitat to examine the site for potentially sensitive biological resources. Survey methodology involved traversing meandering transects through the project area and surrounding habitat where accessible. The surveys were general in nature and were conducted to determine the presence/absence of special-status species and/or habitats within the BSA and to determine if these resources would be impacted by proposed project activities. After reviewing the original wetland delineation map, areas which had been identified as aquatic habitat prior to site alteration were specifically inspected and evaluated to ensure past features had reestablished. (**Attachment A: Figure 3 – Original Wetland Delineation Map**) A list of species encountered during the survey is included as **Attachment B: Observed Species List** and are discussed in the "Results" section.

Following the field survey, the "potential for occurrence" was determined based on the quality and types of habitats observed on-site. This discussion may be found in the "Results" Section. For plants, assuming suitable habitat is on-site, potential for occurrence is considered during the appropriate flowering period. For birds and bats, the potential for occurrence is considered during the appropriate timeframes when these species breed, forage, roost, over-winter, or stop-over in the BSA during migration. Any bird or bat species could fly over the BSA; however, this is not considered a potential for occurrence as it would not result in any impact. The categories for the potential for occurrence include:

- **None:** The species or natural community is not known to occur and has no potential to occur in the BSA based on sufficient surveys, the lack of suitable habitat (including soil, vegetation, connectivity, etc.), and/or the BSA is well outside of the known distribution of the species.
- **Low:** Potential habitat in the BSA is sub-marginal and the species is not known to occur in the vicinity of the BSA. Protocol-level surveys are not recommended.
- **Moderate:** Suitable habitat is present in the BSA and the species is known to occur in the vicinity of the BSA.
- **High:** Habitat in the BSA is highly suitable for the species and there are reliable records close to the BSA, but the species was not observed.
- **Known:** The species or natural community was detected in the BSA or a recent reliable record exists for the BSA.

EXISTING SITE CONDITIONS

The proposed project area is characterized as vacant, undeveloped land in the southwestern portion of the City of Roseville. The project area is located on the southeast corner of Blue Oaks Blvd. and Industrial Ave. and is bisected by Freedom Way; all observed to have consistent traffic moving quickly during the time of survey. The project area is bordered to the south by an industrial complex and to the east by an office complex and undeveloped field. There is also a rail line located immediately to the west of the site.

There are four man-made vegetated stormwater receiving swales located along the western border of the project area. These areas appear to be in the process of establishing some riparian vegetation, as designed, to treat site runoff water. Additionally, the swale areas are lined with an erosion control fabric that allows root establishment but prevents rodent burrows. As such, no burrows were observed within the stormwater swale areas.

The topography within the project area is characterized as nearly flat, with a gently sloped landscape south and north toward Freedom Way then heading west toward the stormwater receiving swale systems.

Secondary to site grading, habitat elimination, and compaction, no wetland features occupy the project site. Additionally, no small mammal burrows or residual soil/spoil mounds were observed anywhere within the site boundaries.

California habitat types are described in the California Wildlife Habitat Relationships (CWHR) system based on classifications created by Mayer and Laudenslayer (1988). The CWHR system was designed to aid in the mapping of habitats utilized by California's commonly occurring birds, mammals, reptiles, and amphibians. Aside from the created stormwater drainage swale areas, a single habitat type is present within the project area: Annual Grassland, which is described in further detail below. Representative site photos may be found in **Attachment C: Site Photos**.

Annual Grassland:

Annual Grassland habitat occurs throughout the entire project area. It is comprised mostly of sparse non-native annual grasses and herbaceous plant species; likely due to drought conditions combined with the compacted nature of the on-site soil post-grading. Annual grassland habitats can be found throughout California and are found on flat plains to gently rolling foothills. Annual grasslands are described as open grasslands composed primarily of annual plant species and often consist of a variety of introduced invasive species. Species composition is strongly influenced by abiotic factors and compositional changes fluctuate seasonally due to the phenology of plants found within an area. Species commonly found within annual grasslands include wild oats (*Avena fatua*), ripgut brome (*Bromis diandrus*), red brome (*Bromus madritensis*), soft chess (*Bromus hordeaceus*), wild barely (*Hordeum spp.*), foxtail fescue (*Vulpia myuros*), filaree (*Erodium spp.*), and various clovers (*Trifolium spp.*) among others.

A number of wildlife species may use annual grasslands for breeding and foraging if the habitat is suitable.

RESULTS

A table analyzing the potential for presence of a special-status species identified by resources agencies within the project area can be found in **Attachment D: Special Status Species Table**. As stated before, a list of species observed during the survey may be found in **Attachment C: Observed Species List**. Only

species with a known or historical presence on-site, that are state or federally listed, or with a moderate or high potential to occur on-site are analyzed below as part of the Results Section.

The following narrative focuses on a combination of site observations as well as the species identified in agency lists and their potential to occur within the project area. Species and habitat which originally occurred within the project area have been accounted and mitigated for as part of the original Project permitting effort. The IS/MND included applicable MMs that address special-status migratory bird species with potential to occur within the project area. There are no critical habitats within the project area.

Sensitive Natural Communities

No sensitive natural communities (SNCs) were determined to occur within the BSA. Prior to alteration, the project site hosted vernal pool, wetland, intermittent drainage, and marsh areas. However, grading of the site in 2014 successfully eliminated these features, in accordance with applicable regulatory permits. **(Appendix A - Regulatory Permits)** Additionally, though listed as having once occurred within 5 miles of the project area in the CNDDDB list, the site does not contain Alkali SNCs, nor is it adjacent to any Alkali sources/influences.

Secondary to site grading, habitat elimination, and compaction, the site has not re-established any wetland features or any other type of SNC.

Plants

The USFWS IPac listed no potential for federally listed plants within the project area, however, the CNPS list does include Sacramento orcutt grass.

Prior to site alteration, special status plant surveys were conducted on May 15 and June 26, 2006 with negative results for listed species. The December 2022 site visit, though not during the flowering window, shows the site to be inundated with the skeletal remains of invasive species such as medusahead (*Elymus caput-medusae*) and star thistle (*Centaurea solstitialis*). Other species observed on-site included common tarweed (*Hemizonia pungens*) and hairy hawkbit (*Leontodon saxatilis*). No wetland plant species were detected within the project area.

The USFWS evaluated the site for occurrence potential for Sacramento orcutt grass (*Orcuttia viscida*) and slender orcutt grass (*Orcuttia tenuis*). **(Appendix A5: USFWS Concurrence)** On March 18, 2008 the USFWS concluded that,

“The Special-Status Plant Survey did not identify either species occurring on the site, and the Service has determined that the survey was done adequately to demonstrate absence of these species. Therefore, the Service concurs that the proposed project as proposed is not likely to adversely affect the Sacramento orcutt grass and slender orcutt grass.”

The present day, post-grading and habitat elimination yields site conditions consisting of no wetland or vernal pool features. Therefore, in accordance with the USFWS, as no new information has revealed effects of the proposed action that may affect listed species in a manner or to an extent not considered, no new species with potential to occur within the site have been listed, no critical habitat has been designated that may be affected by the proposed project. There are no project description changes that would change a level of potential effect on biological resources. No further action pursuant to the Endangered Species Act is necessary. Similar to the federal ESA, with no habitat or individuals occurring historically and with habitat elimination in 2014 with present day-maintenance, there is no potential for

state-listed endangered or threatened species to occur on-site, and as such coverage under Section 2080 or 2081 of CESA is not warranted.

Invertebrates

Five federally listed invertebrates were found on the official USFWS IPac list: Monarch butterfly (*Danaus plexippus*) [Candidate], valley elderberry longhorn beetle (VELB) (*Desmocerus californicus dimorphus*) [Threatened], conservancy fairy shrimp (*Branchinecta conservatio*) [Endangered], vernal pool fairy shrimp (*Branchinecta lynchi*) [Threatened], and vernal pool tadpole shrimp (*Lepidurus packardii*) [Endangered], collectively, vernal pool crustaceans.

- **Monarch butterfly:** The Monarch overwinters in the coastal CA region and may pass through the region during migrations. The Monarch relies heavily on milkweed and flowering species during migration and breeding. While the site may have provided some flowering plants prior to wetland feature elimination, in its currently maintained state, there is no potential habitat for breeding or foraging monarchs.
- **Valley Elderberry Longhorn Beetle:** The VELB is found exclusively in blue elderberry (*Sambucus nigra* spp. *caerulea*) shrubs in California's Central Valley where the species utilizes the shrubs for all life stages. Females will lay eggs on the bark of the shrub where they hatch and the larvae will bore into a stem where it will live for one to two years, feeding on the pith. After developing, an adult beetle will exit the stem and emerge to seek a mate. The adults are not particularly strong fliers and do not appear to disperse very far.

There are no elderberry shrubs present within the BSA, nor within a distance of work to be impacted. The nearest occurrence of VELB occurrence to the project area is approximately 3.8 miles to the west in the foothill canyon areas. Both historically and in its currently maintained state, there is no potential habitat for VELB in any life stage and therefore no potential for impact.

- **Vernal Pool Crustaceans:** Vernal pool fairy shrimp, vernal pool tadpole shrimp, and conservation fairy shrimp are federally listed and as their name suggests, are dependent upon vernal pool environments.

According to a March 18, 2008 USFWS Letter (**Appendix A5 – USFWS Concurrence**),

“Service guideline-level wet season surveys were completed during the 2005-2006 and 2006-2007 seasons to determine the status of the vernal pool crustaceans on the project site. The Service has determined that, based on the methods and results outlined in the 90-day reports, the surveys were performed adequately and the conditions on the site were appropriate to demonstrate absence of these species on the project site. Therefore, the Service concurs that the proposed project as proposed is not likely to adversely affect the vernal pool crustaceans.”

The above pre-construction USFWS designation combined with post-site alteration conditions that yield no vernal features on-site, confirm there is no potential for vernal pool crustaceans within the project area. Furthermore, now that all vernal features have been removed, there is no potential for vernal pool crustaceans within the site.

Fish

The only federally listed fish species found on the official USFWS list is delta smelt (*Hypomesus transpacificus*). Central Valley steelhead (*Oncorhynchus mykiss*) is found on the CDFW CNDDDB list. Delta

smelt are confined to the Delta region of CA in estuary habitats. Central valley steelhead are found on the Sacramento River and its tributaries, favoring cold and clean water for holding and spawning.

An original feature on-site was an intermittent drainage, but it was incapable of supporting Central valley steelhead. Present day conditions, where the intermittent drainage has been converted to man-made stormwater treatment swales, has further eliminated this area as potential habitat for the lone federally listed species found on the agency lists. Therefore, there is no potential for the species to be affected by the proposed project.

Reptiles and Amphibians

No federally listed species were found on the official USFWS IPac list. One special-status species was returned by the CNDDDB search: the western spadefoot toad (WST) (*Spea hammondi*).

The WST is a relatively small, smooth skinned toad, with white and orange tipped turbercles on its back, and distinctive vertical pupils. It is named for the sharp-edged “spades” on its hind feet utilized for digging. The species occupies grassland, sage scrub, and woodland habitats from Tehama County to Baja. The species is dependent on ephemeral pools or slow-moving water courses that are predator free for breeding. Larval development can be rapid (approximately 30 days) if vernal pools are drying.

There are no vernal features or ephemeral waters found within the project area suitable to support the WST. Additionally, compacted soil would be difficult if not impossible for the WST to dig in, as noted by the absence of small mammal burrows post-grading and compaction. Therefore, the site does not provide suitable WST habitat.

Birds

No federally listed bird species were identified in the IPaC database search though it identified several listed as Birds of Conservation Concern (BCC) which are addressed in **Attachment D**. According to The USFWS, “Although the bird taxa included in the BCC 2021 are priorities for conservation action, this list makes no finding with regard to whether they warrant consideration for ESA listing.” (USFWS, 2021)

A search of CDFW’s CNDDDB identified occurrences of three state-listed threatened species: the CA black rail (CBRA) (*Laterallus jamaicensis coturniculus*), the tricolored blackbird (TRBL) (*Agelaius tricolor*), and the Swainson’s Hawk (SWHA) (*Buteo swainsoni*).

- **CA Black Rail:** The CBRA is known to inhabit saltwater, brackish, and freshwater marshes. In California, the San Francisco Bay/Delta region has all three types of marshes. Vegetation of CBRA marshes varies from almost pure pickleweed (*Salicornia sp.*) to sedges (*Carex sp.*) and saltgrass (*Distichlis sp.*) to bulrush (*Scirpus sp.*) and cattails (*Typha sp.*). In San Francisco Bay marshes the presence of the CBRA is associated with relatively high values for vegetation height, *Frankenia* (alkali-heath) abundance, and insect abundance, but with low values of amphipod abundance (Evens et al. 1986).

The lone occurrence of CBRA within 5 miles of the project area was a single adult male in 2006 located 4.9 miles west of the project area adjacent to Clover creek. Based on the lack of suitable foraging or breeding habitat combined with a lack of known occurrences adjacent to the site, project activities would not result in impacts to the CBRA.

- **Tricolored Blackbird:** Current TRBL species studies indicate that primary foraging habitats for TRBL during the breeding season include grasslands, low density shrublands (e.g., alkali scrub), pastures, dry seasonal pools, and certain agricultural crops including alfalfa and rice”. (CDFW, 2018) Tricolors will not settle without access to open water and dominant nest substrate species for TRBL include cattails, bulrushes, Himalaya blackberry, and agricultural silage. Although other plant species are used as nesting substrate, all are either flooded, spinous or otherwise defended against easy access by predators. Strips of emergent vegetation along canals are typically avoided as nest sites. If sites are hard for an observer to reach, the site it is relatively suitable. (Hamilton, 2004) Studies have also found that, “While breeding, most foraging occurs within 2–3 miles (3.2 - 4.8 km) of colony sites.” (Orians 1961, Hamilton et al. 1992)

Current site conditions do not support nesting or suitable foraging habitat and no suitable nesting habitat or open water exists within 3 miles of the project area. The nearest known occurrence of TRBL to the site is approximately 4 miles to the north. The fact that the site lacks suitable nesting or foraging habitat combined with the distance to the nearest known siting which has not been active since 2015 indicate there is no potential for TRBL, and therefore no potential for project impacts to TRBL.

- **Swainson’s Hawk:** SWHA breeding habitat includes annual grassland areas with scattered trees, large shrubs and is found peripheral to riparian areas. They will often feed in agricultural areas (Goodrich and Smith 2008, p. 120). Young are fed rodents, rabbits, and reptiles. However, when not breeding, adults feed almost exclusively on insects, primarily grasshoppers (Bechard et al. 2010). Areas they inhabit require at least small tracks of adjacent land containing lightly irrigated agricultural areas particularly with alfalfa and grass hay, or non-agricultural areas with low or moderate height vegetated areas (Wheeler 2003, p. 274).

Current site conditions are not conducive to breeding rodent populations and are not adjacent to agricultural areas. No rodents or other small mammals were observed during the site visit and no evidence of established populations (burrows) were noted on-site. This is likely due to soil compaction, which does not allow for burrowing or solid cover plant growth.

Due to a lack of suitable nesting trees or foraging habitat adjacent to or within the site, potential impacts to SWHA are unlikely.

Unlike the species listed above, the BSA may seasonally provide marginal foraging habitat for other avian species protected under the coverage offered by the MTBA. Although a few such species were observed during the survey (**Attachment C: Observed Species**), there was very little avian activity considering the time of day. This is likely due to consistent noise/disturbance from traffic and active railway to the west combined with the sparsely vegetated (and therefore highly exposed) nature of the site, which provides marginal to poor quality foraging habitat for smaller passerine species. This is likely due to the post-site compaction nature of the site which contributes to sparsely vegetated landscape, as seeds have a hard time taking in compacted soil on exposed areas. The site offers poor quality foraging habitat for raptors in general as well; likely due to the lack of small mammal burrows, secondary to site compaction. No raptors nor any prey sources for them (including roadkill) were observed during the field visit. No evidence of raptors utilizing the site for prey was detected (i.e. owl pellets, whitewash, down feathers, etc.).

Mammals

There were no special-status mammals found on any of the agency lists. Some that have potential to occur within the general region, but outside the 5-mile primarily consist of bat species such as hoary bat (*Lasiurus cinereus*), pallid bat (*Antrozous pallidus*), silver-haired bat (*Lasionycteris noctivangans*), western mastiff bat (*Eumops perotis*), and Yuma myotis (*Myotis yumanensis*).

There is no potential roosting habitat on-site and minimal potential roosting habitat located on properties adjacent to the project area for any of these species with the exception of building ledges as there are few trees, all of which are ornamental in nature, and no rocky cliffs found.

There is potential marginal to poor foraging habitat above the grassland within the BSA, however, it is of lower quality than the greater undeveloped areas to the north and wooded foothill areas to the east where a variety of habitats are present providing a more robust prey base.

Aquatic Resources

A wetland delineation was conducted for the entire original project area in 2005 and finalized in 2006 identifying 2.028 acres of aquatic features representing jurisdictional WOUS. The feature types were comprised of 9 vernal pool features (0.708 ac), 44 seasonal wetland features (0.687 ac), 7 seasonal swale features (0.246 ac), 3 seasonal marsh features (0.139 ac), and 2 intermittent drainage features (0.248 ac). **(Attachment A: Figure 3 - Original Wetland Delineation Map).**

All features were permanently removed as a result of site grading which occurred in 2014 through 2017. Present day site conditions indicate no wetland features have re-established within the project area. Only man-made stormwater treatment swales lie along the western border of the property, which will not be impacted by project work and are not jurisdictional.

CONCLUSIONS AND RECOMMENDATIONS

Present day recommendations from various regulatory agencies suggest that for the northern CA region, pre-construction avian surveys should be conducted during the typical migratory bird breeding season from February 1 through August 31 to ensure nesting activities are not disturbed by construction activities. Additionally, surveys should be conducted no more than two weeks in advance of commencement of construction and should be repeated if a lapse in construction of two weeks or greater occurs.

With adherence to the MMs from the original IS/MND including minor modifications to the timing of surveys; impacts to special status species would be eliminated, minimized, and sufficiently mitigated. Consequently, the proposed project would not result in any new significant biological resource impacts or in a substantial increase in the severity of the previously identified biological resource impacts described in the IS/MND. No additional mitigation measures are required.

ATTACHMENT D:
SPECIAL-STATUS SPECIES AND SENSITIVE NATURAL COMMUNITY EVALUATION

An analysis of special-status species listed by various agency sources with potential to occur in the survey area.

Common Name (Scientific Name)	Status Fed/State/ CNPS	Associated Habitats	Potential for Occurrence*
SENSITIVE NATURAL COMMUNITIES			
Alkali Meadow	__/_/SNC/_	Characterized by fine-grained soils that have a high residual salt content supporting a distinctive, salt tolerant plant community.	<u>None:</u> Does not occur within the BSA.
Alkali Seep	__/_/SNC/_	A seep of saline water with an area of alkali salt crystals that form when the salty water reaches the surface and evaporates.	<u>None:</u> Does not occur within the BSA.
Northern Hardpan Vernal Pool	__/_/SNC/_	Seasonally flooded depressions on impermeable soils or rock.	<u>None:</u> Any potential habitat removed (filled) 9/2014.
Northern Volcanic Mud Flow Vernal Pool	__/_/SNC/_	Seasonally flooded depressions on impermeable soils or rock.	<u>None:</u> Any potential habitat removed (filled) 9/2014.
PLANTS			
Ahart's dwarf rush (<i>Juncus leiospermus</i> var. <i>ahartii</i>)	__/_/S1	Valley and foothill grassland (mesic).	<u>None:</u> Any potential habitat removed (filled) 9/2014.
Big-scale Balsam Root (<i>Balsamorhiza macrolepis</i>)	__/_/S2	Cismontane woodlands and chaparral. Valley and Foothill grasslands. Sometimes serpentinite. (Mar-June)	<u>None:</u> No suitable habitat within the BSA.
Boggs Lake hedge-hyssop (<i>Gratiola heterosepala</i>)	__/_/S2	Marshes and swamps (shallow freshwater) and vernal pools. (Apr-Aug)	<u>None:</u> Any potential habitat removed (filled) 9/2014.
Brandegee's clarkia (<i>Clarkia biloba</i> spp. <i>brandegeae</i>)	__/_/S4	Chaparral, cismontane woodland. Lower montane coniferous forest. (May-Jun)	<u>None:</u> No suitable habitat within the BSA.
bristly leptosiphon (<i>Leptosiphon aureus</i>)	__/_/S4	Chaparral, cismontane woodland. Coastal prairie. Valley and foothill grassland. (Apr-Jun)	<u>None:</u> No suitable habitat within the BSA.
Dwarf downingia (<i>Downingia pusilla</i>)	__/_/S2	Valley and foothill grassland (mesic). Vernal pools. (Mar-May)	<u>None:</u> Any potential habitat removed (filled) 9/2014.
hispid salty bird's-beak (<i>Chloropyron mole</i> ssp. <i>hispidum</i>)	__/_/S1	Meadows and seeps. Playas. Valley and foothill grassland (Jun-Sep)	<u>None:</u> Any potential habitat removed (filled) 9/2014.
legenere (<i>Legenere limosa</i>)	__/_/S2	Vernal Pools. (Apr-Jun)	<u>None:</u> Any potential habitat removed (filled) 9/2014.
pincushion navarretia (<i>Navarretia myersii</i> ssp. <i>myersii</i>)	__/_/S2	Vernal Pools. (Apr-Jun)	<u>None:</u> Any potential habitat removed (filled) 9/2014.

ATTACHMENT D - SPECIAL-STATUS SPECIES AND SENSITIVE NATURAL COMMUNITY EVALUATION

Common Name (Scientific Name)	Status Fed/State/ CNPS	Associated Habitats	Potential for Occurrence*
Red Bluff Dwarf Rush (<i>Juncus leiospermus</i> var. <i>leiospermus</i>)	___/___/1B.1	Chaparral, cismontane woodland, meadows and seeps, valley and foothill grassland and vernal pools/vernally mesic habitats. (Mar-May)	<u>None</u> : No mesic habitat present within the BSA.
Sacramento Orcutt grass (<i>Orcuttia viscida</i>)	FE/CE/S1	Vernal Pools. (Apr-Jul)	<u>None</u> : Any potential habitat removed (filled) 9/2014.
Sanford's arrowhead (<i>Sagittaria sanfordii</i>)	___/___/S3	Marshes and swamps (shallow freshwater). (May-Oct)	<u>None</u> : No suitable habitat present within the BSA.
stinkbells (<i>Fritillaria agrestis</i>)	___/___/S3	Chaparral, cismontane woodland. Pinyon and juniper woodland. Valley and foothill grassland. (Mar-Jun)	<u>None</u> : No suitable marsh habitat present within the BSA.
valley brodiaea (<i>Brodiaea rosea</i> ssp. <i>Vallicola</i>)	___/___/S3	Valley and foothill grassland; vernal pools. (Apr-May)	<u>None</u> : Any potential habitat removed (filled) 9/2014.
INVERTEBRATES			
Andrenid bee (<i>Andrena subapasta</i>)	___/___/S1S2	Solitary ground nesters found where the flowering plants they pollinate occur.	<u>None</u> : Compacted soil and removal of vernal features eliminates suitable habitat within the BSA.
California Linderiella (<i>Linderiella occidentalis</i>)	___/___/___	Vernal pools, swales, and ephemeral freshwater habitat.	<u>None</u> : Any potential habitat removed (filled) 9/2014.
Conservancy Fairy Shrimp (<i>Branchinecta conservatio</i>)	FE/___/___	Moderately turbid, deep, cool-water vernal pool	<u>None</u> : Any potential habitat removed (filled) 9/2014.
Monarch Butterfly (<i>Danaus plexippus</i>)	Candidate/ ___/S2S3	Overwinters on CA coast, migrates through valley feeding on milkweed.	<u>Low</u> : No milkweed or historical occurrences on- site. Individuals may pass through, but no potential habitat is found in the BSA.
Ricksecker's water scavenger beetle (<i>Hydrochara rickseckeri</i>)	___/___/___	Vernal pools and other aquatic habitats in the Central Valley.	<u>None</u> : Any potential habitat removed (filled) 9/2014.
Valley Elderberry Longhorn Beetle (<i>Desmocerus californicus dimorphus</i>)	FT/___/___	Blue elderberry shrubs usually associated with riparian areas.	<u>None</u> : No elderberry plants (the sole host plant of this beetle) occur within or adjacent to the BSA.
Vernal Pool Fairy Shrimp (<i>Branchinecta lynchi</i>)	FT/___/___	Vernal pools, swales, and ephemeral freshwater habitat.	<u>None</u> : Any potential habitat removed (filled) 9/2014.
Vernal Pool Tadpole Shrimp (<i>Lepidurus packardii</i>)	FE/___/___	Vernal pools, swales, and ephemeral freshwater habitat.	<u>None</u> : Any potential habitat removed (filled) 9/2014.
FISH			
Delta Smelt (<i>Hypomesus transpacificus</i>)	FT/ST/___	Sacramento River Delta and tributaries.	<u>None</u> : No suitable or critical habitat within the BSA.
Central Valley Steelhead (<i>Oncorhynchus mykiss</i>)	FT/___/___	Sacramento and San Joaquin Rivers and their tributaries.	<u>None</u> : No suitable or critical habitat within the BSA.

ATTACHMENT D - SPECIAL-STATUS SPECIES AND SENSITIVE NATURAL COMMUNITY EVALUATION

Common Name (Scientific Name)	Status Fed/State/ CNPS	Associated Habitats	Potential for Occurrence*
AMPHIBIANS			
Western Spadefoot (<i>Spea hammondi</i>)	___/SSC/___	Grassland and woodland and vernal pools without aquatic predators for breeding.	<u>None</u> : Any potential habitat removed (filled) 9/2014.
BIRDS			
Bald Eagle (<i>Haliaeetus leucocephalus</i>)	MBTA & EA/SE/___	Lakes, rivers, estuaries, reservoirs, and some coastal habitats.	<u>None</u> : No suitable habitat present within the BSA.
Belding's Savannah Sparrow (<i>Passerculus sandwichensisbeldingi</i>)	BCR/___/___	Uncommon and local in saltmarshes of coastal southern CA.	<u>None</u> : No suitable nesting habitat present within the BSA.
Burrowing Owl (<i>Athene cunicularia</i>)	___/SSC/___	Nests in burrows in the ground, often in old ground squirrel or badger burrows, w/in open dry grassland & desert habitat.	<u>None</u> : Any potential habitat removed (filled) 9/2014.
Bullock's Oriole (<i>Icterus bullockii</i>)	BCR/___/___	Breed in riparian and open woodlands, including urban parks.	<u>None</u> : Species may pass through site, but no suitable nesting or foraging habitat exists w/in the project area.
California Black Rail (<i>Laterallus jamaicensis coturniculus</i>)	MBTA/ST/___	Yearlong resident of saline, brackish, & fresh emergent wetlands in the San Francisco Bay Area, Sacramento-San Joaquin Delta, coastal Southern CA, the Salton Sea, & lower Colorado River area.	<u>None</u> : No suitable habitat present within the BSA.
California Gull (<i>Larus californicus</i>)	BCC/___/___	Common on ponds, lakes, and coastlines. Often also seen foraging on ag lands or loitering around restaurants, parking lots, and city parking lots looking for food.	<u>Low</u> : Species may pass over site, but no suitable nesting or foraging habitat exists within the project area.
Common Yellowthroat (<i>Geothlypis trichas sinuosa</i>)	BCR/___/___	Common in a wide variety of weedy, brushy, and marshy habitats; nearly always in low wet areas.	<u>None</u> : Any potential habitat removed (filled) 9/2014.
Golden Eagle (<i>Aquila chrysaetos</i>)	MBTA & EA/SE/___	Rare in grasslands, deserts, and other open country relatively far from people, usually in mountainous areas.	<u>None</u> : Suitable habitat is not present within the BSA.
grasshopper sparrow (<i>Ammodramus savannarum</i>)	___/SSC/___	Common locally in grasslands w/scattered shrubs or weeds. Solitary and secretive; difficult to see except when singing.	<u>None</u> : Any potential habitat removed (filled) 9/2014.
Lawrence's Goldfinch (<i>Carduelis lawrencei</i>)	BCC/___/___	Remote, arid habitats of California and the Desert Southwest.	<u>None</u> : Suitable habitat is not present within the BSA.
Long-eared Owl (<i>asio otus</i>)	BCC/___/___	Uncommon. Nests in old barns and other structures. Strictly nocturnal.	<u>None</u> : Suitable habitat is not present within the BSA.
Nuttall's Woodpecker (<i>Picoides nuttallii</i>)	BCR/___/___	Uncommon. Oak and riparian woodlands.	<u>None</u> : Any potential habitat removed (filled) 9/2014.
Oak Titmouse (<i>Baeolophus inornatus</i>)	BCC/___/___	Common in open oak woods or nearby trees. Feeds on seeds and insects.	<u>None</u> : Suitable habitat is not present within the BSA.

ATTACHMENT D - SPECIAL-STATUS SPECIES AND SENSITIVE NATURAL COMMUNITY EVALUATION

Common Name (Scientific Name)	Status Fed/State/ CNPS	Associated Habitats	Potential for Occurrence*
Olive-sided Flycatcher (<i>Contopus cooperi</i>)	BCC/___/___	Uncommon. Found in boreal forests.	<u>None</u> : Suitable habitat is not present within the BSA.
Purple Martin (<i>Progne subis</i>)	___/SSC/___	Uncommon and local. Nests almost exclusively in man-made martin boxes placed in the open near water; also nests in tree cavities.	<u>None</u> : Suitable habitat is not present within the BSA.
Short-billed Dowitcher (<i>Limnodromus griseus</i>)	BCC/___/___	Common on mudflats and shallow muddy ponds along coast; uncommon to rare inland.	<u>None</u> : Suitable habitat is not present within the BSA.
Swainson's Hawk (<i>Buteo swainsoni</i>)	___/ST/___	Nests in isolated trees or riparian woodlands adjacent to suitable foraging habitat including grasslands or suitable grain or alfalfa fields, or livestock pastures.	<u>Low</u> : Species may pass over site, but no suitable nesting habitat exists within the project area.
Tri-colored Blackbird (<i>Agelaius tricolor</i>)	BCC/SSC/___	Nests in dense blackberry, cattail, tules, willow, or wild rose within emergent wetlands throughout the Central valley and foothills surrounding the valley.	<u>None</u> : No suitable nesting habitat present within the BSA.
Wrentit (<i>Chamaea fasciata</i>)	BCC/___/___	Common but difficult to see in chaparral and other dense brushy habitats.	<u>None</u> : Suitable habitat is not present within the BSA.
Yellow-billed Magpie (<i>Pica nuttalli</i>)	BCC/___/___	Common in oak savannas within limited range.	<u>None</u> : Suitable habitat is not present within the BSA.
Migratory Birds and Raptors	MBTA	Nest and forage in a variety of habitats including hardwood woodlands, coniferous forests, meadows, grasslands, and riparian.	<u>Low</u> : Birds protected by the MBTA were observed on-site, however, site provides poor nesting habitat and marginal foraging habitat.
<u>CODE DESIGNATIONS</u> CE = Candidate Endangered FE = Federally-listed Endangered FT = Federally-listed Threatened FC = Federal Candidate Species BCC = Federal Bird of Conservation Concern MBTA = protected by the federal Migratory Bird Treaty Act SE = State-listed Endangered ST = State-listed Threatened SH = Presumed extinct in California SSC = CDFW Species of Special Concern FP = CDFW Fully Protected Species SNC = CDFW Sensitive Natural Community CNPS 1B = Rare or Endangered in California or elsewhere CNPS 2 = rare or Endangered in California, more common elsewhere CNPS 3 = More information is needed CNPS 4 = Plants with limited distribution BCC = Birds of Conservation Concern BCR = Bird of Conservation Concern only in particularly Bird Conservation Regions in the continental USA *Potential for occurrence: for plants it is considered the potential to occur during the survey period; for birds and bats it is considered the potential to breed, forage, roost, over-winter, or stop-over in the BSA during migration. Any bird or bat species could fly over the BSA, but this is not considered a potential for occurrence. The categories for the potential for occurrence include:			

ATTACHMENT D - SPECIAL-STATUS SPECIES AND SENSITIVE NATURAL COMMUNITY EVALUATION

Common Name (<i>Scientific Name</i>)	<u>Status</u> Fed/State/ CNPS	Associated Habitats	Potential for Occurrence*
<u>None</u>: The species or natural community is known not to occur, and has no potential to occur in the BSA based on sufficient surveys, the lack of suitable habitat, and/or the BSA is well outside of the known distribution of the species. <u>Low</u>: Potential habitat in the BSA is sub-marginal and the species is not known to occur in the vicinity of the BSA. Protocol-level surveys are not recommended. <u>Moderate</u>: Suitable habitat is present in the BSA and the species is known to occur in the vicinity of the BSA. <u>High</u>: Habitat in the BSA is highly suitable for the species and there are reliable records close to the BSA, but the species was not observed. <u>Known</u>: Species was detected in the BSA or a recent reliable record exists for the BSA.

DEPARTMENT OF THE ARMY
U.S. ARMY ENGINEER DISTRICT, SACRAMENTO
CORPS OF ENGINEERS
1325 J STREET
SACRAMENTO CA 95814-2922

REPLY TO
ATTENTION OF

DEPARTMENT OF THE ARMY PERMIT

Permittee: Mr. J. Randy Kyte
Harsch Investment Properties-II, LLC
P.O. Box 2708
Portland, Oregon 97208-2708

Permit Number: SPK-2005-00307

Issuing Office: U.S. Army Engineer District, Sacramento
Corps of Engineers
1325 "J" Street
Sacramento, California 95814-2922

NOTE: The term "you" and its derivatives, as used in this permit, means the permittee or any future transferee. The term "this office" refers to the appropriate district or division office of the Corps of Engineers having jurisdiction over the permitted activity or the appropriate official of that office acting under the authority of the commanding officer.

You are authorized to perform work in accordance with the terms and conditions specified below. A notice of appeal options is enclosed.

Project Description:

To impact 2.038 acres of waters of the United States (0.708 acres vernal pools and 1.33 acres seasonal wetlands), including wetlands regulated under Section 404 of the Clean Water Act, to construct a commercial and industrial business park (Blue Oaks Commerce Center) by developing 49.4 acres with 17 buildings totaling 575,505 square feet, providing a mix of office, industrial and commercial uses, and grading, parking, landscaping and lighting improvements. The local drainage through the western portion of the projects site will be realigned for water quality treatment per the drawing "Preliminary Grading Plan, Blue Oaks Commercial Center, City of Roseville, County of Placer, State of California, April 28, 2008, updated December 19, 2008". The property is located in Sections 21 & 22, Township 11 North, Range 6 East, MDB&M, in the City of Roseville, in Placer County, California.

Compensation for these impacts, a total of 2.038 acres of wetlands will be purchased at the Corps' approved Toad Hill Mitigation Bank in Placer County.

All work is to be completed in accordance with the enclosed plan(s).

Project Location:

The project site is an infill property bounded on the north by Blue Oaks Boulevard, on the west by Industrial Avenue, on the east by Washington Boulevard, and the south by an existing industrial complex in Sections 21 & 22, Township 11 North, Range 6 East, MDB&M, in the City of Roseville, in Placer County, California.

Permit Conditions:

General Conditions:

1. The time limit for completing the work authorized ends on August 19, 2016. If you find that you need more time to complete the authorized activity, submit your request for a time extension to this office for consideration at least one month before the above date is reached.
2. You must maintain the activity authorized by this permit in good condition and in conformance with the terms and conditions of this permit. You are not relieved of this requirement if you abandon the permitted activity, although you may make a good faith transfer to a third party in compliance with General Condition 4 below. Should you wish to cease to maintain the authorized activity or should you desire to abandon it without a good faith transfer, you must obtain a modification of this permit from this office, which may require restoration of the area.
3. If you discover any previously unknown historic or archeological remains while accomplishing the activity authorized by this permit, you must immediately notify this office of what you have found. We will initiate the Federal and state coordination required to determine if the remains warrant a recovery effort or if the site is eligible for listing in the National Register of Historic Places.
4. If you sell the property associated with this permit, you must obtain the signature of the new owner in the space provided and forward a copy of the permit to this office to validate the transfer of this authorization.
5. If a conditioned water quality certification has been issued for your project, you must comply with the conditions specified in the certification as special conditions to this permit. For your convenience, a copy of the certification is attached if it contains such conditions.
6. You must allow representatives from this office to inspect the authorized activity at any time deemed necessary to ensure that it is being or has been accomplished in accordance with the terms and conditions of your permit.

Special Conditions:

1. To insure your project complies with the Federal Endangered Species Act, you must implement all of the mitigating measures identified in the enclosed Fish and Wildlife Service letter of

concurrence (Number 81420-2008-I-0286-1, dated March 18, 2008), including those ascribed to the Corps therein. If you are unable to implement any of these measures, you must immediately notify this office and the Fish and Wildlife Office so we may consult as appropriate, prior to initiating the work, in accordance with Federal law.

2. To mitigate for the loss of 2.038 acres of waters of the United States you shall purchase 0.708 credits of vernal pool and 1.33 credits of seasonal wetland at Toad Hill Mitigation Bank, a Corps approved wetland mitigation bank. Evidence of this purchase shall be provided to this office prior to proceeding with any activity otherwise authorized by this permit.

3. All terms and conditions of the 24 August 2010 Section 401 Water Quality Certification are expressly incorporated as conditions of this permit.

4. You shall design all crossings of waters of the United States as indicated on the preliminary grading plans dated 19 December 2008, which will accommodate expected high flows. You shall submit detailed plans for these crossings to the Corps of Engineers for approval prior to beginning construction

Further Information:

1. Congressional Authorities: You have been authorized to undertake the activity described above pursuant to:

☐ Section 10 of the Rivers and Harbors Act of 1899 (33 U.S.C. 403).

☒ Section 404 of the Clean Water Act (33 U.S.C. 1344).

☐ Section 103 of the Marine Protection, Research and Sanctuaries Act of 1972 (33 U.S.C. 1413).

2. Limits of this authorization.

a. This permit does not obviate the need to obtain other Federal, state, or local authorizations required by law.

b. This permit does not grant any property rights or exclusive privileges.

c. This permit does not authorize any injury to the property or rights of others.

d. This permit does not authorize interference with any existing or proposed Federal projects.

3. Limits of Federal Liability. In issuing this permit, the Federal Government does not assume any liability for the following:

- a. Damages to the permitted project or uses thereof as a result of other permitted or unpermitted activities or from natural causes.
- b. Damages to the permitted project or uses thereof as a result of current or future activities undertaken by or on behalf of the United States in the public interest.
- c. Damages to persons, property, or to other permitted or unpermitted activities or structures caused by the activity authorized by this permit.
- d. Design or construction deficiencies associated with the permitted work.
- e. Damage claims associated with any future modification, suspension, or revocation of this permit.

4. Reliance on Applicant's Data. The determination of this office that issuance of this permit is not contrary to the public interest was made in reliance on the information you provided.

5. Reevaluation of Permit Decision. This office may reevaluate its decision on this permit at any time the circumstances warrant.

Circumstances that could require a reevaluation include, but are not limited to, the following:

- a. You fail to comply with the terms and conditions of this permit.
- b. The information provided by you in support of your permit application proves to have been false, incomplete, or inaccurate (see 4 above).
- c. Significant new information surfaces which this office did not consider in reaching the original public interest decision.

Such a reevaluation may result in a determination that it is appropriate to use the suspension, modification, and revocation procedures contained in 33 CFR 325.7 or enforcement procedures such as those contained in 33 CFR 326.4 and 326.5. The referenced enforcement procedures provide for the issuance of an administrative order requiring you comply with the terms and conditions of your permit and for the initiation of legal action where appropriate. You will be required to pay for any corrective measures ordered by this office, and if you fail to comply with such directive, this office may in certain situations (such as those specified in 33 CFR 209.170) accomplish the corrective measures by contract or otherwise and bill you for the cost.

6. Extensions. General Condition 1 establishes a time limit for the completion of the activity authorized by this permit. Unless there are circumstances requiring either a prompt completion of the authorized activity or a reevaluation of the public interest decision, the Corps will normally give favorable consideration to a request for an extension of this time limit.

Your signature below, as permittee, indicates that you accept and agree to comply with the terms and conditions of this permit.

**CLEAN WATER ACT §401 TECHNICALLY CONDITIONED WATER QUALITY
CERTIFICATION FOR DISCHARGE OF DREDGED AND/OR FILL MATERIALS FOR THE
BLUE OAKS COMMERCE CENTER (or BLUE OAKS-WASHINGTON) PROJECT,
(WDID#5A31CR00297) PLACER COUNTY**

This Order responds to your 23 June 2010 application submittal for the Water Quality Certification of a commercial and industrial development project impacting approximately 2.038 acres/1,345 linear feet of waters of the United States.

WATER QUALITY CERTIFICATION STANDARD CONDITIONS:

1. This certification action is subject to modification or revocation upon administrative or judicial review, including review and amendment pursuant to §13330 of the California Water Code and §3867 of Title 23 of the California Code of Regulations (23 CCR).
2. This certification action is not intended and shall not be construed to apply to any discharge from any activity involving a hydroelectric facility requiring a Federal Energy Regulatory Commission (FERC) license or an amendment to a FERC license unless the pertinent certification application was filed pursuant to 23 CCR subsection 3855(b) and the application specifically identified that a FERC license or amendment to a FERC license for a hydroelectric facility was being sought.
3. The validity of any non-denial certification action shall be conditioned upon total payment of the full fee required under 23 CCR §3833, unless otherwise stated in writing by the certifying agency.
4. Certification is valid for the duration of the described project. This certification is no longer valid if the project (as currently described) is modified, or coverage under Section 404 of the Clean Water Act has expired.

California Environmental Protection Agency

ADDITIONAL TECHNICALLY CONDITIONED CERTIFICATION CONDITIONS:

In addition to the four standard conditions, Harsch Investment Properties, LLC shall satisfy the following:

1. Harsch Investment Properties, LLC shall notify the Central Valley Water Quality Control Board (Central Valley Water Board) in writing 7 days in advance of the start of any in-water activities.
2. Except for activities permitted by the U.S. Army Corps under §404 of the Clean Water Act, soil, silt, or other organic materials shall not be placed where such materials could pass into surface water or surface water drainage courses.
3. All areas disturbed by project activities shall be protected from washout or erosion.
4. Harsch Investment Properties, LLC shall maintain a copy of this Certification and supporting documentation (Project Information Sheet) at the Project site during construction for review by site personnel and agencies. All personnel (employees, contractors, and subcontractors) performing work on the proposed project shall be adequately informed and trained regarding the conditions of this Certification.
5. All temporarily affected areas will be restored to pre-construction contours and conditions upon completion of construction activities.
6. Harsch Investment Properties, LLC shall perform surface water sampling: 1) When performing any in-water work; 2) In the event that project activities result in any materials reaching surface waters or; 3) When any activities result in the creation of a visible plume in surface waters. The following monitoring shall be conducted immediately upstream out of the influence of the project and 300 feet downstream of the active work area. Sampling results shall be submitted to this office within two weeks of initiation of sampling and every two weeks thereafter. The sampling frequency may be modified for certain projects with written permission from the Central Valley Water Board.

Parameter	Unit	Type of Sample	Frequency of Sample
Turbidity	NTU	Grab	Every 4 hours during in water work
Settleable Material	ml/l	Grab	Same as above.
Visible construction related pollutants	Observations	Visible Inspections	Continuous throughout the construction period

7. Activities shall not cause turbidity increases in surface water to exceed:
- (a) where natural turbidity is less than 1 Nephelometric Turbidity Units (NTUs), controllable factors shall not cause downstream turbidity to exceed 2 NTU;
 - (b) where natural turbidity is between 1 and 5 NTUs, increases shall not exceed 1 NTU;
 - (c) where natural turbidity is between 5 and 50 NTUs, increases shall not exceed 20 percent;
 - (d) where natural turbidity is between 50 and 100 NTUs, increases shall not exceed 10 NTUs;
 - (e) where natural turbidity is greater than 100 NTUs, increases shall not exceed 10 percent.

Except that these limits will be eased during in-water working periods to allow a turbidity increase of 15 NTU over background turbidity as measured in surface waters 300 feet downstream from the working area. In determining compliance with the above limits, appropriate averaging periods may be applied provided that beneficial uses will be fully protected. Averaging periods may only be assessed by prior permission of the Central Valley Water Board.

8. Activities shall not cause settleable matter to exceed 0.1 ml/l in surface waters as measured in surface waters 300 feet downstream from the project.
9. The discharge of petroleum products or other excavated materials to surface water is prohibited. Activities shall not cause visible oil, grease, or foam in the work area or downstream. Harsch Investment Properties, LLC shall notify the Central Valley Water Board immediately of any spill of petroleum products or other organic or earthen materials.
10. Harsch Investment Properties, LLC shall notify the Central Valley Water Board immediately if the above criteria for turbidity, settleable matter, oil/grease, or foam are exceeded.
11. Harsch Investment Properties, LLC shall comply with all California Department of Fish and Game 1600 requirements for the project.
12. Harsch Investment Properties, LLC must obtain coverage under the NPDES General Permit for Storm Water Discharges Associated with Construction and Land Disturbance Activities issued by the State Water Resources Control Board for any project disturbing an area of 1 acre or greater.
13. The Conditions in this water quality certification are based on the information in the attached "Project Information." If the information in the attached Project Information is modified or the project changes, this water quality certification is no longer valid until amended by the Central Valley Water Board.
14. In the event of any violation or threatened violation of the conditions of this Order, the violation or threatened violation shall be subject to any remedies, penalties, process, or sanctions as provided for under State law and section 401 (d) of the federal Clean Water Act. The applicability of any State law authorizing remedies, penalties, process, or sanctions for the violation or threatened violation constitutes a limitation necessary to ensure compliance with this Order.

- a. If Harsch Investment Properties, LLC or a duly authorized representative of the project fails or refuses to furnish technical or monitoring reports, as required under this Order, or falsifies any information provided in the monitoring reports, the applicant is subject to civil, for each day of violation, or criminal liability.
 - b. In response to a suspected violation of any condition of this Order, the Central Valley Water Board may require Harsch Investment Properties, LLC to furnish, under penalty of perjury, any technical or monitoring reports the Central Valley Water Board deems appropriate, provided that the burden, including cost of the reports, shall be in reasonable relationship to the need for the reports and the benefits to be obtained from the reports.
 - c. Harsch Investment Properties, LLC shall allow the staff(s) of the Central Valley Water Board, or an authorized representative(s), upon the presentation of credentials and other documents, as may be required by law, to enter the project premises for inspection, including taking photographs and securing copies of project-related records, for the purpose of assuring compliance with this certification and determining the ecological success of the project.
15. Harsch Investment Properties, LLC shall provide a Notice of Completion (NOC) no later than 30 days after the project completion. The NOC shall demonstrate that the project has been carried out in accordance with the project's description (and any amendments approved). The NOC shall include a map of the project location(s), including final boundaries of any in situ restoration area(s), if appropriate, and representative pre and post construction photographs. Each photograph shall include a descriptive title, date taken, photographic site, and photographic orientation.
16. The mitigation measures specified in the mitigation monitoring and reporting program for the approved Mitigated Negative Declaration as they pertain to hydrology and water quality impacts, are included in this Water Quality Certification, as required by California Public Resource Code Section 21081.6 and CEQA Guidelines, California Code of Regulations Section 15097

ADDITIONAL STORM WATER QUALITY CONDITIONS:

Harsch Investment Properties, LLC shall also satisfy the following additional storm water quality conditions:

1. During the construction phase, Harsch Investment Properties, LLC must employ strategies to minimize erosion and the introduction of pollutants into storm water runoff. These strategies must include the following:
 - (a) the Storm Water Pollution Prevention Plan (SWPPP) must be prepared during the project planning and design phases and implemented, as appropriate, before construction;
 - (b) an effective combination of erosion and sediment control Best Management Practices (BMPs) must be implemented and adequately working prior to the rainy season and during all phases of construction.
2. Harsch Investment Properties, LLC must minimize the short and long-term impacts on receiving water quality from the Blue Oaks Commerce Center (aka Blue Oaks-

Washington) Project by implementing the following post-construction storm water management practices and as required by the local agency permitting the project, as appropriate:

- (a) minimize the amount of impervious surface;
 - (b) reduce peak runoff flows;
 - (c) provide treatment BMPs to reduce pollutants in runoff;
 - (d) ensure existing waters of the State (e.g., wetlands, vernal pools, or creeks) are not used as pollutant source controls and/or treatment controls;
 - (e) preserve and, where possible, create or restore areas that provide important water quality benefits, such as riparian corridors, wetlands, and buffer zones;
 - (f) limit disturbances of natural water bodies and natural drainage systems caused by development (including development of roads, highways, and bridges);
 - (g) use existing drainage master plans or studies to estimate increases in pollutant loads and flows resulting from projected future development and require incorporation of structural and non-structural BMPs to mitigate the projected pollutant load increases in surface water runoff;
 - (h) identify and avoid development in areas that are particularly susceptible to erosion and sediment loss, or establish development guidance that protects areas from erosion/ sediment loss;
 - (i) control post-development peak storm water run-off discharge rates and velocities to prevent or reduce downstream erosion, and to protect stream habitat.
3. Harsch Investment Properties, LLC must ensure that all development within the project provides verification of maintenance provisions for post-construction structural and treatment control BMPs and as required by the local agency permitting the project. Verification shall include one or more of the following, as applicable:
- (a) the developer's signed statement accepting responsibility for maintenance until the maintenance responsibility is legally transferred to another party; or
 - (b) written conditions in the sales or lease agreement that require the recipient to assume responsibility for maintenance; or
 - (c) written text in project conditions, covenants and restrictions for residential properties assigning maintenance responsibilities to a home owner's association, or other appropriate group, for maintenance of structural and treatment control BMPs; or
 - (d) any other legally enforceable agreement that assigns responsibility for storm water BMP maintenance.

REGIONAL WATER QUALITY CONTROL BOARD CONTACT PERSON:

Skyler Anderson, Environmental Scientist
11020 Sun Center Drive #200
Rancho Cordova, California 95670-6114
sanderson@waterboards.ca.gov
(916) 464-4849

WATER QUALITY CERTIFICATION:

I hereby issue an order certifying that any discharge from the Harsch Investment Properties, LLC, Blue Oaks Commerce Center (aka Blue Oaks-Washington) Project (WDID# 5A31CR00297) will comply with the applicable provisions of §301 ("Effluent Limitations"), §302 ("Water Quality Related Effluent Limitations"), §303 ("Water Quality Standards and Implementation Plans"), §306 ("National Standards of Performance"), and §307 ("Toxic and Pretreatment Effluent Standards") of the Clean Water Act. This discharge is also regulated under State Water Resources Control Board Water Quality Order No. 2003-0017 DWQ "Statewide General Waste Discharge Requirements For Dredged Or Fill Discharges That Have Received State Water Quality Certification (General WDRs)".

Except insofar as may be modified by any preceding conditions, all certification actions are contingent on (a) the discharge being limited and all proposed mitigation being completed in strict compliance with Harsch Investment Properties, LLC's project description and the *attached Project Information Sheet*, and (b) compliance with all applicable requirements of the *Water Quality Control Plan for the Sacramento River and San Joaquin River*, Fourth Edition, revised September 2009.

for Pamela C. Creedon
Executive Officer

Type of Project: Commercial and Industrial Development Project

Project Location: Section 21 and 22, Township 11 North, Range 6 East, MDB&M.
Latitude: 38°47'35" and Longitude: -121°18'15"

County: Placer County

Receiving Water(s) (hydrologic unit): Pleasant Grove Creek, Sacramento Hydrologic Basin, Valley-American Hydrologic Unit #519.22, Pleasant Grove HSA

Water Body Type: Wetlands, Streambed

Designated Beneficial Uses: The *Water Quality Control Plan for the Sacramento River and San Joaquin River*, Fourth Edition, revised September 2009 (Basin Plan) has designated beneficial uses for surface and ground waters within the region. Beneficial uses that could be impacted by the project include: Municipal and Domestic Water Supply (MUN); Agricultural Supply (AGR); Industrial Supply (IND), Hydropower Generation (POW); Groundwater Recharge, Water Contact Recreation (REC-1); Non-Contact Water Recreation (REC-2); Warm Freshwater Habitat (WARM); Cold Freshwater Habitat (COLD); and Wildlife Habitat (WILD).

Project Description (purpose/goal): The proposed project involves the development of a commercial and industrial business park in Roseville. The 50 acre project is located south of Blue Oaks Boulevard and Industrial Avenue. The project site is in close proximity to Highway 65 to the east. The project site is surrounded by developed commercial, industrial and residential parcels.

Wetland vegetation within the project area occurs within low-lying depressions and the bank-to-bank extent of the intermittent drainage and drainage ditches. Jurisdictional waters of the United States and waters of the State mapped a total of 2.038 acres and include: 0.708 acre of vernal pools, 0.687 acre of seasonal wetland, 0.246 acre of seasonal wetland swale and 0.139 acre of seasonal marsh. Other waters of the United States include 0.248 acre of

intermittent drainage and 0.010 acre of drainage ditch, totaling approximately 1,345 linear feet of channel.

The purposed project will permanently impact 2.038 acres of waters of the United States and waters of the state. The areas predominantly affected include a seasonal wetland area on the east side of the property, along Washington Boulevard, and vernal pools and an unnamed tributary that flows south to north through the site, along and near Industrial Avenue. The unnamed tributary enters the site from the south via a culvert from the Sierra Business Park, and exits the site into a culvert under Blue Oaks Boulevard.

Preliminary Water Quality Concerns: Construction activities may impact surface waters with increased turbidity and settleable matter.

Proposed Mitigation to Address Concerns: Harsch Investment Properties, LLC will implement Best Management Practices (BMPs) to control sedimentation and erosion. All temporary affected areas will be restored to pre-construction contours and conditions upon completion of construction activities. Harsch Investment Properties, LLC will conduct turbidity and settleable matter testing during in-water work, stopping work if the Basin Plan criteria are exceeded or are observed.

Fill/Excavation Area: Approximately 3,300 cubic yards of clean native soil will be placed into 1.78 acres of jurisdictional wetland and 0.258 acre (1,345 linear feet) of un-vegetated streambed (for a total of 2.038 acres of fill).

Dredge Volume: None

U.S. Army Corps File Number: 200500307

U.S. Army Corps of Engineers Permit Number: Individual Permit

Department of Fish and Game Streambed Alteration Agreement: Harsch Investment Properties, LLC applied for a Streambed Alteration Agreement on 1 June 2010.

Possible Listed Species: Vernal pool fairy shrimp, vernal pool tadpole shrimp

Status of CEQA Compliance: The City of Roseville approved the Mitigated Negative Declaration and filed a Notice of Determination on 4 June 2010 (State Clearinghouse Number 2010042089).

As a Responsible Agency under California Environmental Quality Act (CEQA), the Central Valley Water Board reviewed the Mitigated Negative Declaration and found that impacts to water quality were adequately addressed. Through implementation of Low Impact Development measures and mitigation at a minimum 1:1 ratio level, impacts to water quality will be mitigated to a less than significant level. Mitigation for impacts to water quality is discussed in the "Proposed Mitigation to Address Concerns" section above, and the "Compensatory Mitigation" section below.

The City of Roseville found that all other impacts to water quality were less than significant. With regard to the remaining impacts identified in the Mitigated Negative Declaration, the corresponding mitigation measures proposed are within the responsibility and jurisdiction of

another public agency, and not within the jurisdiction of the Central Valley Water Board. Such impacts and mitigation measures do not relate to water quality or related nuisance, and therefore fall outside of the Central Valley Water Board's jurisdiction.

Compensatory Mitigation: Harsch Investment Properties, LLC will pay fees required by the Army Corps of Engineers and dedicate 2.038 acres of seasonal wetland to a Wildlands Conservation Bank.

<u>Preserve</u>	<u>Impacts Mitigated</u>	<u>Acreage</u>	<u>Cost per Mitigation Value</u>	<u>Total Cost</u>
Locust Road Preserve	Vernal Pool Creation	0.708 acre	\$350,000.00	\$247,800.00
Locust Road Preserve	Seasonal Wetlands	1.33 acres	\$150,000.00	\$199,500.00
Purchase Price				\$447,300.00

Application Fee Provided: Total fees of \$14,147.00 have been submitted to the Central Valley Water Board as required by 23 CCR §3833b(3)(A) and by 23 CCR §2200(e).

Portland OR 97205

RECEIPT OF YOUR NOTICE OF INTENT (NOI)

The State Water Resources Control Board (State Water Board) has received and processed your NOI to comply with the terms of the General Permit to Discharge Storm Water Associated with Construction Activity. Accordingly, you are required to comply with the permit requirements.

The Waste Discharger Identification (WDID) number is: **5S31C370715**. Please use this number in any future communication regarding this permit.

OWNER:	SITE DESCRIPTION
DEVELOPER:	Harsch Investment Properties II LLC
SITE INFORMATION:	Harsch Investment Properties II LLC
	Blue Oaks Commerce Center
	8950 Industrial Avenue
	Roseville
TOTAL DISTURBED ACRES:	38.85
START DATE:	September 01, 2014
COMPLETION DATE:	December 30, 2016
COUNTY:	Placer

When the Owner changes , a new NOI, site map, and fee must be submitted by the new Owner. As the previous owner, you are required to submit a Notice of Termination (NOT) to the local Regional Water Board stating you no longer own or operate the Site and coverage under the General Permit is not required. Unless notified, you will continue and are responsible to pay the annual fee invoiced each July.

If you have any questions regarding permit requirements, please contact your Regional Water Board at 916-464-3291 . Please visit the storm water web site at http://www.waterboards.ca.gov/water_issues/programs/stormwater/ to obtain an NOT and other storm water related information and forms.

Sincerely,

Storm Water Section
Division of Water Quality

Streambed Alteration Agreement
Notification No. 1600-2010-0104 -R2
Unnamed tributary and drainage to Pleasant Grove Creek
Harsch Investment Properties-11 LLC
Blue Oaks Commerce Center

This Streambed Alteration Agreement (Agreement) is entered into between the California Department of Fish and Game (DFG) and Harsch Investment Properties-11 LLC (Permittee) as represented by J. Randy Kyte.

RECITALS

WHEREAS, pursuant to Fish and Game Code (FGC) section 1602, Permittee notified DFG on 23 June, 2010 that Permittee intends to complete the project described herein.

WHEREAS, pursuant to FGC section 1603, DFG has determined that the project could substantially adversely affect existing fish or wildlife resources and has included measures in the Agreement necessary to protect those resources.

WHEREAS, Permittee has reviewed the Agreement and accepts its terms and conditions, including the measures to protect fish and wildlife resources.

NOW THEREFORE, Permittee agrees to complete the project in accordance with the Agreement.

PROJECT LOCATION

The project is located at an unnamed tributary and drainage to Pleasant Grove Creek with associated wetlands, in the County of Placer, State of California; Latitude 38 degrees 47 minutes 35 seconds North, Longitude 121 degrees 18 minutes 15 seconds West.

PROJECT DESCRIPTION

The project is limited to fill of approximately 0.54 acres of interconnected seasonal drainage, grassy swale, wetlands and marsh which drain to Pleasant Grove Creek. All drainage water flowing onto the site from adjacent property will be directed through a drainage system into a created grassy swale area on the western edge of the property where it will be allowed to naturally flow into Pleasant Grove Creek. As a result of the fill activities all wetland and marsh habitat and vegetation on the site will be removed.

A handwritten signature in blue ink, appearing to be "J. Randy Kyte", written over the version number.

PROJECT IMPACTS

Existing fish or wildlife resources the project could substantially adversely affect include: marsh nesting avian species, amphibians, and other aquatic and terrestrial plant and wildlife species.

The adverse effects the project could have on the fish or wildlife resources identified above include: permanent loss of habitat, potential increases in turbidity in Pleasant Grove Creek through loss of natural settling actions from wetlands and marsh.

STREAM ZONE DEFINED

The Stream Zone comprises all components of a stream, including the channel, bed, banks, and floodplains. The Stream Zone is the land, including vegetation, that bounds a lake or the channel of a stream and that defines the lateral extent of their waters.

MEASURES TO PROTECT FISH AND WILDLIFE RESOURCES

1. Administrative Measures

Permittee shall meet each administrative requirement described below.

- 1.1 Documentation at Project Site. Permittee shall make the Agreement, any extensions and amendments to the Agreement, and all related notification materials and California Environmental Quality Act (CEQA) documents, readily available at the project site at all times and shall be presented to DFG personnel, or personnel from another state, federal, or local agency upon request.
- 1.2 Providing Agreement to Persons at Project Site. Permittee shall provide copies of the Agreement and any extensions and amendments to the Agreement to all persons who will be working on the project at the project site on behalf of Permittee, including but not limited to contractors, subcontractors, inspectors, and monitors.
- 1.3 Notification of Conflicting Provisions. Permittee shall notify DFG if Permittee determines or learns that a provision in the Agreement might conflict with a provision imposed on the project by another local, state, or federal agency. In that event, DFG shall contact Permittee to resolve any conflict.
- 1.4 Project Site Entry. Permittee agrees that DFG personnel may enter the project site to verify compliance with the Agreement. DFG personnel may only enter the project site when it is safe to do so. When appropriate, DFG personnel shall contact the Permittee prior to entering the construction area.

Initials: 

- 1.5 Authorized Work. The notification, together with all supporting documents submitted with the notification, is hereby incorporated into this agreement to describe the location and features of the proposed project. The Permittee agrees that all work shall be done as described in the notification and supporting documents, incorporating all project modifications, wildlife resource protection features, mitigation measures, and provisions as described in this agreement. Where apparent conflicts exist between the notification and the provisions listed in this agreement, the Permittee shall comply with the provisions listed in this agreement. The Permittee further agrees to notify DFG of any modifications made to the project plans submitted to DFG. At the discretion of DFG, this agreement will be amended to accommodate modifications to the project plans submitted to DFG and/or new project activities.

2. Avoidance and Minimization Measures

To avoid or minimize adverse impacts to fish and wildlife resources identified above, Permittee shall implement each measure listed below.

- 2.1 Work Period. The time period for completing the work within the stream zone shall be restricted to periods of low stream flow and dry weather. Construction activities shall be timed with awareness of precipitation forecasts and likely increases in stream flow. Construction activities within the stream zone shall cease until all reasonable erosion control measures, inside and outside of the stream zone, have been implemented prior to all storm events. Revegetation, restoration and erosion control work is not confined to this time period.
- 2.2 Work Period Extensions. At DFG's discretion, the work period may be extended based on the extent of the work remaining, on site conditions and reasonably anticipated future conditions. If the Permittee finds more time is needed to complete the authorized activity, the Permittee shall submit a written request for a work period time extension to DFG. The work period extension request shall provide the following information: 1) Describe the extent of work already completed; 2) Provide specific detail of the activities that remain to be completed within the stream zone; and 3) Detail the actual time required to complete each of the remaining activities within the stream zone. The work period extension request should consider the effects of increased stream conditions, rain delays, increased erosion control measures, limited access due to saturated soil conditions, and limited growth of erosion control grasses due to cool weather. Photographs of the work completed and the proposed work areas are helpful in assisting DFG in its evaluation. Time extensions are issued at the discretion of DFG. DFG will have ten calendar days to approve the proposed work period extension. DFG reserves the right to require additional measures designed to protect natural resources.
- 2.3 Stream Diversions / Dewatering. If work in the flowing portion of the stream is unavoidable, the entire stream flow shall be diverted around or through the work area during the excavation and/or construction operations. Stream flow shall be

Initials: _____

diverted using gravity flow through temporary culverts/pipe's or pumped around the work site with the use of hoses. When any dam or other artificial obstruction is being constructed, maintained, or placed in operation, sufficient water shall at all times be allowed to pass downstream to maintain aquatic life below the dam pursuant to Fish and Game Code section 5937. The temperature of the diverted water will not be allowed to become elevated such that it may be deleterious to aquatic organisms downstream. The dissolved oxygen concentration of the diverted water will not be allowed to drop to a level that may be deleterious to downstream aquatic life. Any temporary dam or other artificial obstruction constructed shall only be built from clean materials such as sandbags, gravel bags, water dams, or clean/washed gravel which will cause little or no siltation.

- 2.4 Bird Nests. It is unlawful to take, possess, or needlessly destroy the nest or eggs of any bird except as otherwise provided by the Fish and Game Code. No trees that contain active nests of birds shall be disturbed until all eggs have hatched and young birds have fledged without prior consultation and approval of a Department representative.
- 2.5 Vegetation Removal. Disturbance or removal of vegetation shall not exceed the minimum necessary to complete operations. Except for the trees specifically identified for removal in the notification, no native trees with a trunk diameter at breast height (DBH) in excess of four (4) inches shall be removed or damaged without prior consultation and approval of a Department representative. Using hand tools (clippers, chain saw, etc.), trees may be trimmed to the extent necessary to gain access to the work sites. All cleared material/vegetation shall be removed out of the riparian/stream zone.
- 2.6 Sediment Control. Precautions to minimize turbidity/siltation shall be taken into account during project planning and implementation. This may require the placement of silt fencing, coir logs, coir rolls, straw bale dikes, or other siltation barriers so that silt and/or other deleterious materials are not allowed to pass to downstream reaches. Passage of sediment beyond the sediment barrier(s) is prohibited. If any sediment barrier fails to retain sediment, corrective measures shall be taken. The sediment barrier(s) shall be maintained in good operating condition throughout the construction period and the following rainy season. Maintenance includes, but is not limited to, removal of accumulated silt and/or replacement of damaged silt fencing, coir logs, coir rolls, and/or straw bale dikes. **The use of monofilament netting based erosion control blankets is prohibited within the stream zone or associated riparian areas.** The Permittee is responsible for the removal of non-biodegradable silt barriers (such as plastic silt fencing) or the netting surrounding coir logs and/or rolls, after the disturbed areas have been stabilized with erosion control vegetation (usually after the first growing season). Upon Department determination that turbidity/siltation levels resulting from project related activities constitute a threat to aquatic life, activities associated with the turbidity/siltation shall be halted until effective Department approved control devices are installed or abatement procedures are initiated.

Initials: _____

- 2.7 Pollution Control. Utilize Best Management Practices (BMPs) to prevent spills and leaks into water bodies. If maintenance or refueling of vehicles or equipment must occur on-site, use a designated area and/or a secondary containment, located away from drainage courses to prevent the runoff of storm water and the runoff of spills. Ensure that all vehicles and equipment are in good working order (no leaks). Place drip pans or absorbent materials under vehicles and equipment when not in use. Ensure that all construction areas are covered by a site-wide spill response plan and have proper spill clean up materials (absorbent pads, sealed containers, booms, etc.) to contain the movement of any spilled substances. Any other substances which could be hazardous to aquatic life, resulting from project related activities, shall be prevented from contaminating the soil and/or entering the waters of the state. Any of these materials, placed within or where they may enter a stream or lake by the Applicant or any party working under contract or with the permission of the Permittee, shall be removed immediately. DFG shall be notified immediately by the Permittee of any spills and shall be consulted regarding clean-up procedures.

3. Compensatory Measures

To compensate for adverse impacts to fish and wildlife resources identified above that cannot be avoided or minimized, Permittee shall implement each measure listed below.

- 3.1 Site Restoration. All exposed/disturbed areas and access points within the stream zone left barren of vegetation as a result of the construction activities shall be restored using locally native grass seeds, locally native grass plugs and/or a mix of quick growing sterile non-native grass with locally native grass seeds. Seeded areas shall be covered with broadcast straw and/or jut netted (**monofilament erosion blankets are not authorized**). Riparian trees and native shrubs removed as a result of construction activities shall be mitigated on site to maximum extent possible.
- 3.2 Mitigation Credits. The applicant shall purchase mitigation credits at an approved area mitigation bank at the rate of 1 to1 for habitat removed as a result of the project. The applicant shall submit proof of purchase of the mitigation credits **prior** to the Department's signing of this agreement.

4. Reporting Measures

Permittee shall meet each reporting requirement described below.

- 4.1 The Permittee shall notify DFG within two working days of beginning work within the stream zone of an unnamed tributary and drainage to Pleasant Grove Creek with associated wetlands. Notification shall be submitted as instructed in Contact Information section below. Email notification is preferred.

Initials: _____

- 4.2 Upon completion of the project activities described in this agreement, the work area within the stream zone shall be digitally photographed. Photographs shall be submitted to DFG within two days of completion. Photographs and project commencement notification shall be submitted as instructed in Contact Information section below. Email submittal is preferred.

CONTACT INFORMATION

Any communication that Permittee or DFG submits to the other shall be in writing and any communication or documentation shall be delivered to the address below by U.S. mail, fax, or email, or to such other address as Permittee or DFG specifies by written notice to the other. Refer to the project's Notification Number when submitting documents to DFG.

To Permittee:

Harsch Investment Properties-11 LLC
J. Randy Kyte
1121 SW Salmon Street, Suite 500
Portland, OR 97205
(503) 226-8523

Rancho Cordova, CA 95670
Attn: Lake and Streambed Alteration Program
Notification #1600-2010-0104 R2
Fax: 916-358-2912
bhosea@dfg.ca.gov

LIABILITY

Permittee shall be solely liable for any violations of the Agreement, whether committed by Permittee or any person acting on behalf of Permittee, including its officers, employees, representatives, agents or contractors and subcontractors, to complete the project or any activity related to it that the Agreement authorizes.

This Agreement does not constitute DFG's endorsement of, or require Permittee to proceed with the project. The decision to proceed with the project is Permittee's alone.

Initials: _____

SUSPENSION AND REVOCATION

DFG may suspend or revoke in its entirety the Agreement if it determines that Permittee or any person acting on behalf of Permittee, including its officers, employees, representatives, agents, or contractors and subcontractors, is not in compliance with the Agreement.

Before DFG suspends or revokes the Agreement, it shall provide Permittee written notice by certified or registered mail that it intends to suspend or revoke. The notice shall state the reason(s) for the proposed suspension or revocation, provide Permittee an opportunity to correct any deficiency before DFG suspends or revokes the Agreement, and include instructions to Permittee, if necessary, including but not limited to a directive to immediately cease the specific activity or activities that caused DFG to issue the notice.

ENFORCEMENT

Nothing in the Agreement precludes DFG from pursuing an enforcement action against Permittee instead of, or in addition to, suspending or revoking the Agreement.

Nothing in the Agreement limits or otherwise affects DFG's enforcement authority or that of its enforcement personnel.

OTHER LEGAL OBLIGATIONS

This Agreement does not relieve Permittee or any person acting on behalf of Permittee, including its officers, employees, representatives, agents, or contractors and subcontractors, from obtaining any other permits or authorizations that might be required under other federal, state, or local laws or regulations before beginning the project or an activity related to it.

This Agreement does not relieve Permittee or any person acting on behalf of Permittee, including its officers, employees, representatives, agents, or contractors and subcontractors, from complying with other applicable statutes in the FGC including, but not limited to, FGC sections 2050 et seq. (threatened and endangered species), 3503 (bird nests and eggs), 3503.5 (birds of prey), 5650 (water pollution), 5652 (refuse disposal into water), 5901 (fish passage), 5937 (sufficient water for fish), and 5948 (obstruction of stream).

The Permittee shall notify DFG where conflicts exist between the provisions of this agreement and those imposed by other regulatory agencies. Unless otherwise notified, the Permittee shall comply with the provision that offers the greatest protection to water quality, species of special concern and/or critical habitat.

Initials: 

Nothing in the Agreement authorizes Permittee or any person acting on behalf of Permittee, including its officers, employees, representatives, agents, or contractors and subcontractors, to trespass.

AMENDMENT

DFG may amend the Agreement at any time during its term, provided the amendment is mutually agreed to in writing by Permittee and DFG.

TRANSFER AND ASSIGNMENT

This Agreement may not be transferred or assigned to another entity, and any purported transfer or assignment of the Agreement to another entity shall not be valid or effective, unless the transfer or assignment is requested by Permittee in writing, as specified below, and thereafter DFG approves the transfer or assignment in writing.

The transfer or assignment of the Agreement to another entity shall constitute a minor amendment, and therefore to request a transfer or assignment, Permittee shall submit to DFG a completed DFG "Request to Amend Lake or Streambed Alteration" form and include with the completed form payment of the minor amendment fee identified in DFG's current fee schedule (see Cal. Code Regs., tit. 14, § 699.5).

EXTENSIONS

In accordance with FGC section 1605(b), Permittee may request one extension of the Agreement, provided the request is made prior to the expiration of the Agreement's term. To request an extension, Permittee shall submit to DFG a completed DFG "Request to Extend Lake or Streambed Alteration" form and include with the completed form payment of the extension fee identified in DFG's current fee schedule (see Cal. Code Regs., tit. 14, § 699.5). DFG shall process the extension request in accordance with FGC 1605(b) through (e).

If Permittee fails to submit a request to extend the Agreement prior to its expiration, Permittee must submit a new notification and notification fee before beginning or continuing the project the Agreement covers (Fish & G. Code, § 1605, subd. (f)).

EFFECTIVE DATE

The Agreement becomes effective on the date of DFG's signature, which shall be: 1) after Permittee's signature; 2) after DFG complies with all applicable requirements under the California Environmental Quality Act (CEQA); and 3) after payment of the applicable FGC section 711.4 filing fee listed at http://www.dfg.ca.gov/habcon/ceqa/ceqa_changes.html.

TERM

Initials: _____

This Agreement shall expire five years from the date of DFG signature, unless it is terminated or extended before then. All provisions in the Agreement shall remain in force throughout its term. Permittee shall remain responsible for implementing any provisions specified herein to protect fish and wildlife resources after the Agreement expires or is terminated, as FGC section 1605(a)(2) requires.

AUTHORITY

If the person signing the Agreement (signatory) is doing so as a representative of Permittee, the signatory hereby acknowledges that he or she is doing so on Permittee's behalf and represents and warrants that he or she has the authority to legally bind Permittee to the provisions herein.

AUTHORIZATION

This Agreement authorizes only the project described herein. If Permittee begins or completes a project different from the project the Agreement authorizes, Permittee may be subject to civil or criminal prosecution for failing to notify DFG in accordance with FGC section 1602.

FISH AND WILDLIFE SERVICE

Sacramento Fish and Wildlife Office
2800 Cottage Way, Room W-2605
Sacramento, California 95825-1846

In reply refer to:
81420-2008-I-0286-1

MAR 18 2008

Mr. Michael S. Jewell
Chief, Regulatory Branch
U.S. Army Corps of Engineers
1325 J Street, Room 1480
Sacramento, California 95814-2922

Subject: Request for Concurrence on the Blue Oaks-Washington Project in
Roseville, Placer County, California

Dear Mr. Jewell:

This letter acknowledges the U.S. Fish and Wildlife Service's (Service) November 6, 2007, receipt of the U.S. Army Corps of Engineers' (Corps) November 1, 2007, letter requesting initiation of section 7 consultation under the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*) (Act). The consultation concerns the possible effects of the proposed Blue Oaks-Washington project (proposed project) on two federally-listed species, the endangered vernal pool tadpole shrimp (*Lepidurus packardii*) and the threatened vernal pool fairy shrimp (*Branchinecta lynchi*) (collectively, the vernal pool crustaceans).

The findings and recommendations in this consultation are based on: (1) the March 31, 2006, *Information to Support Formal Section 7 Consultation, Blue Oaks-Washington Property, Placer County, California*, prepared by ECORP Consulting, Inc. (ECORP); (2) the July 6, 2007, and July 24, 2007, Wet Season 90-day Reports of Findings Regarding Federally Listed Branchiopods for the proposed project; (3) the October 10, 2006, Special-Status Plant Survey for the proposed project; (4) various e-mails between Cynthia Hertzog of ECORP and Jana Milliken of the Service; and (5) other information available to the Service. A complete administrative record is on file at the Sacramento Fish and Wildlife Office.

The proposed project involves construction of a mixed commercial and industrial business park south of Blue Oaks Boulevard, between Washington Boulevard and Industrial Avenue near Roseville. According to the information provided, construction will necessitate the filling of 1.953 acres of seasonal wetland habitat.

Service guideline-level wet season surveys were completed during the 2005-2006 and 2006-2007 seasons to determine the status of the vernal pool crustaceans on the project site. The Service has determined that, based on the methods and results outlined in the 90-day reports, the surveys were performed adequately and the conditions on the site were appropriate to demonstrate absence of these species on the project site. Therefore, the Service concurs that the proposed project as proposed is not likely to adversely affect the vernal pool crustaceans.

Although not included in your initiation request, the proposed project site is within the range of and contains suitable habitat for the Sacramento orcutt grass (*Orcuttia viscida*) and slender orcutt grass (*Orcuttia tenuis*). The Special-Status Plant Survey did not identify either species occurring on the site, and the Service has determined that the survey was done adequately to demonstrate absence of these species. Therefore, the Service concurs that the proposed project as proposed is not likely to adversely affect the Sacramento orcutt grass and slender orcutt grass.

Unless new information reveals effects of the proposed action that may affect listed species in a manner or to an extent not considered, a new species is listed or critical habitat is designated that may be affected by the proposed project, or if the project description changes, no further action pursuant to the Act is necessary.

If you have any questions or concerns regarding this consultation, please contact Jana Milliken or the Acting Sacramento Valley Branch Chief, at (916) 414-6645.

Sincerely,

A handwritten signature in black ink that reads "Peter A. Cross". The signature is written in a cursive, slightly slanted style.

Peter A. Cross
Deputy Assistant Field Supervisor

BILL OF SALE

Contract # THRMB-11-10

In consideration of \$447,300.00, receipt of which is hereby acknowledged, **WILDLANDS TOAD HILL HOLDINGS, LLC ("Seller")**, does hereby bargain, sell and transfer to **HARSCH INVESTMENT PROPERTIES, LLC**, an Oregon limited liability company ("**Buyer**"), the following vernal pool creation credits and seasonal wetland mitigation credits from the Toad Hill Ranch Mitigation Bank:

<u>Bank</u>	<u>Impacts Mitigated</u>	<u># Credits</u>	<u>Cost per Credit</u>	<u>Total Cost</u>
Toad Hill Ranch Mitigation Bank	0.708 acres Vernal Pool Creation	0.708	\$350,000.00	\$247,800.00
Toad Hill Ranch Mitigation Bank	1.33 acres Seasonal Wetlands	1.33	\$150,000.00	\$199,500.00
Purchase Price				\$447,300.00

Seller represents and warrants that it has good title to the credits and the property thereon, has good right to sell the same, and they are free and clear of all claims, liens, or encumbrances.

Seller covenants and agrees with Buyer to warrant and defend the sale of the credits hereinbefore described against all and every person and persons whomsoever lawfully claiming or to claim the same.

**AGREEMENT FOR PURCHASE AND SALE OF MITIGATION VALUES
AND RIGHT OF FIRST REFUSAL
(Locust Road – Harsch Investment Properties)**

This Agreement for Purchase and Sale of Mitigation Values and Right of First Refusal ("**Agreement**"), dated for reference purposes only as May 27th, 2009 ("**Effective Date**"), is entered into by and between **WILDLANDS, INC.**, a Delaware corporation ("**Seller**"), and **HARSCH INVESTMENT PROPERTIES, LLC**, an Oregon limited liability company ("**Buyer**"), who agree as follows:

1. Background and General.

(a) Project. Buyer is a developer, and is undertaking the development of a project in the County of Placer, State of California, commonly referred to as the Blue Oaks-Washington Project (the "**Project**"). The Project, if constructed, may unavoidably and adversely impact waters of the United States thereon and certain protected species.

(b) Applicable Agencies. As a part of the approval process for the Project, Buyer must obtain approvals from, among other agencies, the United States Army Corps of Engineers ("**Corps**") and the United States Fish and Wildlife Service ("**USFWS**") to compensate for such impacts by preserving, creating, enhancing and/or restoring wetlands or by purchasing sufficient suitable mitigation values to offset these identified impacts. The Corps and USFWS are collectively referred herein as the "**Applicable Agencies**."

(c) Seller' Business. Seller is the operator of compensatory mitigation projects for impacts to wetlands, protected species and/or protected habitat, and is in the business of locating properties suitable for mitigating such impacts (each, a "**Mitigation Site**").

(d) Locust Road Preserve. Seller is in the process of establishing mitigation values ("**Mitigation Values**") at the Locust Road vernal pool preserve (the "**Locust Road Preserve**"). The Locust Road Preserve contains suitable ground for the restoration/creation of vernal pools ("**Vernal Pool Creation**") and seasonal wetlands ("**Seasonal Wetland Creation**").

(e) Mitigation Activities To Date. As of the Effective Date of this Agreement, Seller is in the process of establishing the Locust Road Preserve for mitigating impacts to wetlands and associated threatened or endangered species through Vernal Pool Creation and Seasonal Wetland Creation. A description of the Locust Road Preserve is attached hereto as Exhibit A and incorporated herein by this reference.

(i) Habitat Restoration Activities. Seller has undertaken substantial activities towards determining the feasibility of the development and restoration/creation of the mitigation values at the Locust Road Preserve. These include, for example, such activities as performing wildlife surveys and resource mapping, soils reconnaissance to explore habitat restoration/creation potential, and other activities.

(ii) Development Narrative. As of the Effective Date of this Agreement, Wildlands has undertaken substantial activities towards establishing the Mitigation Values,

including, without limitation, obtaining a Section 404 Permit from the Corps (reference number SPK-2007-855-SA) and a grading permit from Placer County (reference number DFF-1413), and commencing construction activities in accordance with the Mitigation Documents (as hereinafter defined). Furthermore, Seller has prepared a written description of the development objectives for the Locust Road Preserve (the "**Development Narrative**"), which includes design goals and objectives, descriptions of targeted compensatory habitats, generalized mapping of habitats, water management strategies and long-term vegetation management techniques and funding mechanisms.

(1) Based on the Development Narrative, the Locust Road Preserve is anticipated to yield at least 0.708 acres of Vernal Pool Creation Mitigation Values and at least 1.33 acres of Seasonal Wetland Creation Mitigation Values, and it may be applicable to the amounts necessary to comply with the terms and conditions of Buyer's USFWS biological opinion and its Corps 404 permit (the "**404 Permit**").

(2) Seller has submitted or will be submitting the Development Narrative and a habitat mitigation and monitoring plan (collectively or individually the "**Mitigation Documents**") for approval by the Applicable Agencies in order to allow development of the Locust Road Preserve for wetlands and threatened or endangered species habitat on the Locust Road Preserve.

(f) Advance Mitigation Rights. Buyer desires to secure the right to provide for mitigation of the Project, in advance of construction, in whole or in part, through the purchase of Mitigation Values from the Locust Road Preserve.

(g) Purpose. The purpose of this Agreement is to provide for the purchase and sale of Mitigation Values from the Locust Road Preserve.

2. Purchase and Sale of Allocated Mitigation.

(a) Allocation of Mitigation Values. Pursuant to the terms and conditions of this Agreement, Seller agrees to sell to Buyer and set aside for the exclusive use of Buyer, and Buyer agrees to purchase from Seller, the following-described Mitigation Values from the Locust Road Preserve (the "**Allocated Mitigation** "):

<u>Preserve</u>	<u>Impacts Mitigated</u>	<u>Acreage</u>	<u>Cost per Mitigation Value</u>	<u>Total Cost</u>
Locust Road Preserve	Vernal Pool Creation	0.708 acres	\$350,000.00	\$247,800.00
Locust Road Preserve	Seasonal Wetlands	1.33 acres	\$150,000.00	\$199,500.00
Purchase Price				\$447,300.00

(b) Purchase Price; Payment. The purchase price ("**Purchase Price**") for the Allocated Mitigation shall be Four Hundred Forty-Seven Thousand Three Hundred and No/100ths Dollars (\$447,300.00), which was determined by multiplying the amount of the Allocated Mitigation by the cost per Mitigation Value in accordance with Section 2 above. The Purchase Price shall be paid by Buyer to Seller as follows:

(i) First Deposit. On or before June 1, 2009, Buyer shall deliver to Seller the amount of Forty-Four Thousand Seven Hundred Thirty and No/100ths Dollars (\$44,730.00) (the "**First Deposit**"). Except in the event of a default by Seller, the First Deposit shall become nonrefundable upon Buyer's delivery of the First Deposit to Seller.

(ii) Application of Deposit. The First Deposit shall be credited to the Purchase Price at the Closing (as hereinafter defined).

(iii) Balance at Closing. On or before the Closing, Buyer shall deliver to Seller the balance of the Purchase Price, in immediately available funds.

(c) Closing. For purposes of this Agreement, "**Closing**" shall be defined as the date on which Seller delivers to Buyer a Bill of Sale, which shall be in the form attached hereto as Exhibit B and incorporated herein by this reference. The Closing shall occur on or before December 31, 2009 (the "**Closing Date**").

(d) Failure to Close. If Buyer fails to pay the balance of the Purchase Price by the Closing Date, then Seller shall be entitled to retain the Deposit as liquidated damages pursuant to Section 7 below, and Seller shall automatically be released from its obligation to sell the Allocated Mitigation to Buyer pursuant to this Section 2, and Buyer's right to purchase the Allocated Mitigation pursuant to the provisions of this Section 2 shall automatically terminate. In such event, Buyer shall have a right of first refusal to purchase the Allocated Mitigation pursuant to the provisions of Section 3 below.

3. Right of First Refusal. The provisions of this Section 3 shall apply if, and only if, Buyer fails to purchase the Allocated Mitigation and pay the balance of the Purchase Price by the Closing Date pursuant to Section 2 above.

(a) Buyer's Right of First Refusal. Seller hereby grants to Buyer the right of first refusal (the "**Right of First Refusal**") to purchase the Allocated Mitigation, and any portions thereof, upon the terms and conditions set forth in this Section 3.

(b) Term. The term of the Right of First Refusal ("**Refusal Term**") shall commence on January 1, 2010, and, unless sooner terminated, shall continue until December 15, 2011.

(c) Additional Deposits. As additional consideration for the Right of First Refusal granted by Seller to Buyer hereunder, Buyer shall pay the following additional amounts to Seller:

(i) Second Deposit. As a condition to the effectiveness of the Right of First Refusal, on or before December 31, 2009, Buyer shall deliver to Seller the additional amount of Forty-Four Thousand Seven Hundred Thirty and No/100ths Dollars (\$44,730.00) (the "**Second Deposit**"). Except in the event of a default by Seller, the Second Deposit shall become nonrefundable upon Buyer's delivery of the Second Deposit to Seller.

(ii) Third Deposit. On or before June 1, 2010, Buyer shall deliver to Seller the amount of Forty-Four Thousand Seven Hundred Thirty and No/100ths Dollars (\$44,730.00) (the "**Third Deposit**"). Except in the event of a default by Seller, the Third Deposit shall become nonrefundable upon Buyer's delivery of the First Deposit to Seller.

(iii) Fourth Deposit. On or before December 31, 2010, Buyer shall deliver to Seller the additional amount of Forty-Four Thousand Seven Hundred Thirty and No/100ths Dollars (\$44,730.00) (the "**Fourth Deposit**"). Except in the event of a default by Seller, the Fourth Deposit shall become nonrefundable upon Buyer's delivery of the Second Deposit to Seller.

(iv) Fifth Deposit. On or before June 1, 2011, Buyer shall deliver to Seller the additional amount of Forty-Four Thousand Seven Hundred Thirty and No/100ths Dollars (\$44,730.00) (the "**Fifth Deposit**"). Except in the event of a default by Seller, the Fifth Deposit shall become nonrefundable upon Buyer's delivery of the Second Deposit to Seller.

(v) Application of Deposits. The First Deposit, Second Deposit, Third Deposit, Fourth Deposit and Fifth Deposit, to the extent paid, are each individually referred to herein as a "**Deposit**" and collectively referred to herein as the "**Deposits**." In the event that Seller sends Buyer an Offer Notice (as hereinafter defined) pursuant to the provisions of this Section 3 and Buyer timely exercises its Right of First Refusal in accordance with the provisions of this Section 3, the Deposits shall be credited to the Purchase Price at the Closing for the Resale Allocated Mitigation (as hereinafter defined); provided, however, in the event that the Resale Allocated Mitigation is less than the total Allocated Mitigation (i.e., 0.708 acres of vernal pool creation and 1.33 acres of season wetlands), the Deposits shall be credited to the Purchase Price on a prorata basis based upon the acreage of the Resale Allocated Mitigation.

(vi) Example of Application of Deposits. For example, if the Resale Allocated Mitigation consists of 0.354 acres of vernal pool creation and 0.665 acres of seasonal wetlands (i.e., one-half of the Allocated Mitigation), and if Buyer has paid the First Deposit, Second Deposit and Third Deposit as of the date of the Closing for such Resale Allocated Mitigation,

then the amount of Sixty-Seven Thousand Ninety-Five and No/100ths Dollars (\$67,095.00) (i.e., one-half of the Deposits paid by Buyer to Seller as of the date of the Closing for such Resale Allocated Mitigation) would be credited to the Purchase Price for such Resale Allocated Mitigation, and the remainder of the Deposits (including the Fourth Deposit and the Fifth Deposit, to the extent paid thereafter) would be applicable on a prorata basis to the Purchase Price allocable to any additional portion of the Resale Allocated Mitigation that is acquired by Buyer pursuant to the provisions of this Section 3.

(vii) Failure to Pay Deposits. In the event that Buyer fails to pay any Deposit by the date on which such Deposit is due, Buyer's Right of First Refusal shall automatically terminate on such date, and Seller shall thereafter have no further obligation to sell the Allocated Mitigation to Buyer. Provided, however, that if Buyer fails to pay a Deposit when due then Seller shall send Buyer written notice of the failure and Buyer shall have ten (10) days from the date of the notice to pay the Deposit.

(d) Substitution of Allocated Mitigation. Seller is in the process of obtaining all necessary approvals and permits from the Applicable Agencies for the establishment of the Toad Hill Ranch Mitigation Bank, which consists of approximately 1,630 acres and is located at Sunset Boulevard West and Brewer Road in Placer County, California (the "**Toad Hill Bank**"). The Toad Hill Bank contains suitable ground for the restoration/creation of vernal pools and seasonal wetlands. A description of the Toad Hill Bank is attached hereto as Exhibit C and incorporated herein by this reference. The Toad Hill Bank will allow for impacts to waters of the United States, covered species and covered habitat to be mitigated or compensated through credits from the Toad Hill Bank, and such credits will include vernal pool creation credits and seasonal wetlands credits (the "**Toad Hill Credits**"). Seller shall have the right at any time during the Refusal Term to substitute the Allocated Mitigation with Toad Hill Credits, provided that the Toad Hill Bank has been approved by the Applicable Agencies, the Toad Hill Credits are available for use and that the Toad Hill Credits consist of the same amount and same type as the Allocated Mitigation described in Section 2(a) above (0.708 acres of vernal pool creation and 1.33 acres of season wetlands). In the event that Seller elects to replace the Allocated Mitigation with Toad Hill Credits, Seller shall provide Buyer with written notice of such replacement. In such event, the term "Allocated Mitigation" shall mean the Toad Hill Credits. Buyer shall have no interest in the Toad Hill Credits unless and until such time as Seller notifies Buyer that Seller has elected to substitute the Mitigation Values from the Locust Road Preserve with the Toad Hill Credits

(e) Notice. If Seller desires to transfer the Allocated Mitigation or any portion of the Allocated Mitigation (individually and collectively, the "**Resale Allocated Mitigation**"), then, prior to transferring the Resale Allocated Mitigation or entering into any agreement to do so, Seller shall provide Buyer with written notice of its intent to transfer the Resale Allocated Mitigation (the "**Offer Notice**"). The Offer Notice shall contain a copy of the proposed offer which Seller desires to accept, the agreement Seller is about to enter into or other document between Seller and its purchaser which verifies the amount of the Resale Allocated Mitigation; provided, however, Seller shall have the right to redact all other terms of the offer.

(f) Exercise. Buyer shall have the irrevocable right to exercise its Right of First Refusal for a period of fifteen (15) business days (the "**Exercise Period**") following Buyer's receipt of the Offer Notice.

(g) Manner of Exercise. Exercise shall be by written notice of exercise ("**Exercise Notice**"), sent to Seller within the Exercise Period.

(h) Terms of Repurchase. If Buyer exercises its Right of First Refusal, Seller shall sell the Resale Allocated Mitigation to Buyer on the same terms and conditions set forth in this Agreement, except that the Closing will occur within fifteen (15) calendar days after the date on which Buyer delivers the Exercise Notice to Seller. The purchase price for the Resale Allocated Mitigation shall be calculated pursuant to Sections 2(a) and 2(b) above (\$350,000.00/vernal pool creation acre/credit and \$150,000.00/seasonal wetland acre/credit).

(i) Failure to Exercise. If Buyer fails to exercise its Right of First Refusal by the end of the Exercise Period, Seller may thereafter transfer the Resale Allocated Mitigation described in the Offer Notice to the transferee named therein.

(i) If the Resale Allocated Mitigation is transferred within ninety (90) days following Buyer's failure to exercise its Right of First Refusal or such longer time as may be provided in the Offer Notice, upon such transfer, this Right of First Refusal shall automatically terminate with respect to the Resale Allocated Mitigation.

(ii) If the Resale Allocated Mitigation is not transferred within ninety (90) days following Buyer's failure to exercise their Right of First Refusal or such longer time as may be provided in the Offer Notice, Seller may not thereafter transfer the Resale Allocated Mitigation without again complying with the provisions of this Section 3 and giving Buyer another opportunity to purchase the Resale Allocated Mitigation in accordance with the terms of this Section 3.

(j) Exempt Transactions. Buyer's Right of First Refusal shall not apply to any transfer from Seller to an individual or entity controlled by, or under common control with, Seller (including any limited partnership whose general partner is Seller, or is controlled by, or under common control with, Seller) (each, an "**Affiliate**"). The Right of First Refusal shall apply to any subsequent transfer by the Affiliate, however.

4. Preserve Activities.

(a) Qualification, Continued Qualification of Preserves. Seller shall qualify and shall maintain the qualification of the Locust Road Preserve by performing the following activities:

(i) Analysis and Verification. To the extent they have not already done so, Seller's specialists shall review, analyze and verify the biological attributes, soil types and conditions, hydrological resources and other factors to the degree required to submit the Locust Road Preserve to the Applicable Agencies as a suitable location for the Allocated Mitigation.

(ii) Mitigation Site Documentation. To the extent not otherwise available or previously prepared and submitted with respect to the Locust Road Preserve, Seller shall prepare and submit the following documentation to the Applicable Agencies:

(1) The Development Narrative;

(2) The Mitigation Documents;

(3) The various legal and administrative documents which are reasonably necessary to enable the Locust Road Preserve to be endorsed by the Applicable Agencies, which may include, by way of example, a conservation easement affecting the Mitigation Site; and

(4) Permits and surveys required by the Applicable Agencies in order to approve the documents described above, including, without limitation, those required to implement such documents.

(iii) Development Arrangements. To the extent Seller has not already done so, Seller shall enter into such arrangements as may be necessary or convenient to enable Seller to develop the Allocated Mitigation on the Locust Road Preserve.

(b) Development of Preserves. To the extent Seller has not already done so, Seller shall cause the Allocated Mitigation portion of the Locust Road Preserve to be developed in the manner described in the Mitigation Documents.

(i) Permits, Etc. Seller shall be responsible for obtaining permits, performing surveys or studies and preparing other documents that are required for the implementation of the Mitigation Documents.

(ii) Construction and Other Work. Seller shall be responsible for the construction or other work on the Locust Road Preserve required by the Mitigation Documents.

(c) Maintenance of the Locust Road Preserve. Seller shall provide for the long-term maintenance, monitoring and management of the Locust Road Preserve in a manner that is comparable to the maintenance, monitoring and management of similar mitigation sites. Seller shall monitor and make reports to the Applicable Agencies on the status of the Locust Road Preserve.

(d) Toad Hill Bank. In the event that Seller elects to substitute the Allocated Mitigation with the Toad Hill Credits, the provisions of this Section 4 shall thereafter apply with respect to the Toad Hill Bank as opposed to the Locust Road Preserve.

5. Limitation of Obligations, Rights of Buyer.

(a) Limitation of Obligations. Buyer's obligations under this Agreement shall be limited to the payment of the Purchase Price. Buyer shall have no obligation whatsoever by reason of the use of the Locust Road Preserve or the Toad Hill Bank for the Allocated Mitigation, to support, pay for, monitor, report on, sustain, continue in perpetuity or otherwise be

obligated or liable for the success or continued expense or maintenance in perpetuity of the Locust Road Preserve or the Toad Hill Bank. As set forth above, Seller shall be fully and completely responsible therefore and for satisfying any and all conditions placed on the Locust Road Preserve (or the Toad Hill Bank, if applicable) by the Applicable Agencies.

(b) Limitation of Rights to Preserves. Nothing in this Agreement shall result in Buyer having any right, title or interest in the Locust Road Preserve or the Toad Hill Bank greater than that specifically granted by this Agreement. Buyer's sole right shall be to have Seller's obligations with respect to the Locust Road Preserve (or the Toad Hill Bank, if applicable) serve as the required mitigation for the Project if and when the Applicable Agencies approve the Allocated Mitigation.

(c) Joint Use. Upon Buyer's delivery of the balance of the Purchase Price to Seller, Seller shall reserve the Allocated Mitigation for the sole use of Buyer, and shall deliver to Buyer a Bill of Sale evidencing the sale of the Allocated Mitigation to Buyer. This reservation shall in no way restrain Seller from selling to others the remaining Mitigation Values at the Locust Road Preserve or the remaining credits at the Toad Hill Bank, so long as the aggregate number of Mitigation Values sold to all parties, including Buyer, from the Locust Road Preserve (or the Toad Hill Bank, if applicable), does not exceed the aggregate number of Mitigation Values available at the Locust Road Preserve (or credits available at the Toad Hill Bank, if applicable). Seller hereby represents to Buyer that no person or entity other than Buyer has any rights in or right to acquire or obtain any interest in the Allocated Mitigation, and as long as this Agreement remains in force, Seller will not transfer, option, mortgage, pledge or convey its interest in the Allocated Mitigation.

(d) Project Approvals. Buyer shall be solely responsible to the Applicable Agencies to mitigate the impacts of the Project with the Allocated Mitigation. In that regard, Seller has made and makes no representation, warranty or guaranty that the Applicable Agencies will approve the Locust Road Preserve or the Toad Hill Bank as suitable mitigation for the Project or that the Allocated Mitigation will be sufficient to fully mitigate the impacts of the Project. Notwithstanding the foregoing provision, Seller shall reasonably cooperate with Buyer's efforts to obtain the Applicable Agencies' approval of the use of the Allocated Mitigation for Buyer's Project by providing information required by the Applicable Agencies and executing documents required by the Applicable Agencies.

(e) Limitations on Assignment; Transfer. Buyer acknowledges that Seller is not willing to sell the Allocated Mitigation which could be resold in competition with the remaining the Mitigation Values available for sale from the Locust Road Preserve or the Toad Hill Bank, if applicable. Accordingly, Buyer shall be prohibited from transferring any Mitigation Values (or Toad Hill Credits, if applicable) to a third party without the prior written consent and approval of Seller, which Seller may withhold in its sole and absolute discretion.

6. Seller' Right To Create a Conservation Bank; Mitigation Bank. Seller specifically reserves the right to create a mitigation bank or conservation bank on the Locust Road Preserve. If Seller elects to do so, in Seller' sole discretion: (a) the Allocated Mitigation shall be provided in the form of conservation bank credits or mitigation bank credits; (b) Buyer shall have no

obligations with respect to the conservation bank or mitigation bank; and (c) Buyer shall have no rights to any proceeds or excess credits of the conservation bank or mitigation bank.

7. Default by Buyer; Liquidated Damages. BUYER RECOGNIZES THAT THE ALLOCATED MITIGATION WILL BE REMOVED BY SELLER FROM THE MARKET DURING THE EXISTENCE OF THIS AGREEMENT, AND THAT IF THE CLOSING DOES NOT OCCUR BECAUSE OF BUYER'S DEFAULT, IT WOULD BE EXTREMELY DIFFICULT AND IMPRACTICAL TO ASCERTAIN THE EXTENT OF THE DETRIMENT TO SELLER. THE PARTIES HAVE DETERMINED AND AGREED THAT THE ACTUAL AMOUNT OF DAMAGES THAT WOULD BE SUFFERED BY SELLER AS A RESULT OF ANY SUCH DEFAULT IS DIFFICULT OR IMPRACTICABLE TO DETERMINE AS OF THE DATE OF THIS AGREEMENT AND THAT THE AMOUNT OF THE DEPOSIT IS A REASONABLE ESTIMATE OF THE AMOUNT OF SUCH DAMAGES. FOR THESE REASONS, THE PARTIES AGREE THAT IF THE CLOSING DOES NOT OCCUR BECAUSE OF BUYER'S DEFAULT, THAT THE DEPOSIT SHALL BE FORFEITED TO SELLER AS LIQUIDATED DAMAGES. UPON ANY SUCH BREACH OR DEFAULT BY BUYER HEREUNDER, THIS AGREEMENT SHALL BE TERMINATED, AND NEITHER PARTY SHALL HAVE ANY FURTHER RIGHTS OR OBLIGATIONS HEREUNDER, EACH TO THE OTHER, EXCEPT FOR THE RIGHT OF SELLER TO RETAIN SUCH LIQUIDATED DAMAGES. DELIVERY TO AND RETENTION OF THE DEPOSIT AMOUNT SHALL BE SELLER'S SOLE AND EXCLUSIVE REMEDY AGAINST BUYER IN THE EVENT OF A MATERIAL DEFAULT OR BREACH BY BUYER RESULTING IN THE FAILURE OF CLOSING, AND SELLER WAIVES ANY AND ALL RIGHT TO SEEK OTHER RIGHTS OR REMEDIES AGAINST BUYER FOR SUCH MATERIAL DEFAULT, INCLUDING WITHOUT LIMITATION, SPECIFIC PERFORMANCE. THE PAYMENT AND RETENTION OF SUCH AMOUNT AS LIQUIDATED DAMAGES IS NOT INTENDED AS A FORFEITURE OR PENALTY WITHIN THE MEANING OF CALIFORNIA CIVIL CODE SECTIONS 3275 OR 3369, BUT IS INTENDED TO CONSTITUTE LIQUIDATED DAMAGES TO SELLER PURSUANT TO CALIFORNIA CIVIL CODE SECTIONS 1671, 1676 AND 1677. SELLER HEREBY WAIVES THE PROVISIONS OF CALIFORNIA CIVIL CODE SECTION 3389.

Seller 

Buyer 

8. Miscellaneous Provisions.

(a) Ownership of Documents. All work papers, drawings, internal memoranda of any kind, photographs, and any written or graphic material, however produced, prepared by Seller in connection with its performance of services hereunder shall be, and shall remain after termination of this Agreement, the property of Seller, and may be used by Seller for any purpose whatsoever. Seller agrees to return to Buyer upon termination of this Agreement all documents, drawings, photographs and other written or graphic material, however produced, received from Buyer and used by Seller in the performance of its services hereunder.

(b) Notices. All notices, demands, consents, requests or other communications required to or permitted to be given pursuant to this Agreement shall be in writing, shall be given only in accordance with the provisions of this Section, shall be addressed to the parties in the manner set forth below, and shall be conclusively deemed to have been properly delivered: (a) upon receipt when hand delivered during normal business hours; (b) upon receipt when sent by facsimile prior to 5:00 p.m. of a given business day (otherwise such receipt is deemed as of the following business day) to the number set forth below (provided, however, that notices given by facsimile shall not be effective unless the sending party's machine provides written confirmation of successful delivery thereof); (c) upon the day of delivery if the notice has been deposited in a authorized receptacle of the United States Postal Service as first-class, registered or certified mail, postage prepaid, with a return receipt requested (provided that the sender has in its possession the return receipt to prove actual delivery); or (d) one (1) Business Day after the notice has been deposited with either FedEx or United Parcel Service to be delivered by overnight delivery (provided that the sending party receives a confirmation of actual delivery from the courier). The addresses of the parties to receive notices are as follows:

To Seller: Wildlands, Inc.
3855 Atherton Road
Rocklin, California 95765
Attention: Mark Heintz, Vice President and General Counsel
Telephone: (916) 435-3555
Facsimile: (916) 435-3556

To Buyer: Harsch Investment Properties, LLC
1121 SW Salmon Street, 5th Floor
Portland, Oregon 97205
Attention: Legal Department
Telephone: (503) 242-2900
Facsimile: (503) 274-2093

Any party may change its address for purposes of this section by giving the other party written notice of the new address in the manner set forth above.

(c) Partial Invalidity. If any term or provision of this Agreement or the application thereof to any person or circumstance shall, to any extent, be invalid or unenforceable, the remainder of this Agreement, or the application of such term or provision to persons or circumstances other than those as to which it is held invalid or unenforceable, shall not be affected thereby, and each such term and provision of this Agreement shall be valid, and shall be enforced to the fullest extent permitted by law.

(d) Waivers. No waiver of any breach of any covenant or provision herein contained shall be deemed a waiver of any preceding or succeeding breach thereof, or of any other covenant or provision herein contained. No extension of time for performance of any obligation or act shall be deemed an extension of time for performance of any other obligation or act except those of the waiving party, which shall be extended by a period of time equal to the period of the delay.

(e) Successors and Assigns. This Agreement shall be binding upon and shall inure to the benefit of the permitted successors and assigns of the parties hereto.

(f) Resolution of Disputes; Arbitration. Any dispute, controversy or claim arising out of or relating to this Agreement, including any dispute relating to interpretation of or performance under the Agreement ("**Dispute**"), shall be resolved in the manner set forth in this Section 8(f), which shall be in lieu of litigation in any court, and the parties specifically waive any right to a jury trial of any Dispute between them.

(i) Negotiation. The parties will attempt in good faith to resolve the Dispute promptly by negotiations between senior representatives of the parties who have the authority to settle the Dispute (each a "**Representative**").

(ii) ARBITRATION OF DISPUTES. In the event the Representatives are not able to resolve the Dispute within thirty (30) days following the date one party first notifies the other party of the Dispute in writing, the Dispute shall be resolved by binding arbitration before a retired judge of the Superior Court, Appellate Court or Supreme Court of the State of California (the "**Arbitrator**") in accordance with the following provisions:

(1) The parties stipulate and agree that any and all necessary parties may be joined in the arbitration, but the parties agree to proceed with arbitration of all Disputes between themselves even if other parties refuse to participate. The parties specifically waive any objection to arbitration based on the failure or refusal of any other party to be joined.

(2) The arbitration shall be initiated by written notice (the "**Arbitration Notice**") of a demand to arbitrate by registered or certified mail sent by one party to the other party. The Arbitration Notice shall include a plain statement of the Dispute and the relief requested. It shall attach the documents the party demanding arbitration relies upon and a detailed statement of the expected testimony of witnesses, including expert witnesses. Within thirty (30) days of receipt of the Arbitration Notice, the responding party shall provide its own plain statement of the Dispute, together with documents it intends to rely upon and the expected testimony of witnesses, including expert witnesses. The parties shall each advance one-half of the Arbitrator's fee, as fixed and required by the Arbitrator in order to initiate the arbitration, although they shall ultimately bear responsibility for such fee as determined by the Arbitrator.

(3) The parties shall attempt to agree on an Arbitrator. If they are unable to agree, either party may petition the presiding judge of the Superior Court for the County of Placer to appoint the Arbitrator.

(4) The Arbitrator shall have the power to grant all legal and equitable remedies, including, but not limited to, injunction, specific performance, reformation, cancellation, accounting and compensatory damages, except that under no circumstances shall either party be liable for and the Arbitrator shall not have the power to award any special, consequential or punitive damages. The Arbitrator shall issue a binding decision within thirty (30) days of the conclusion of the arbitration. The Arbitrator's decision shall be conclusive and binding, and it may be confirmed thereafter as a judgment by the Superior Court of the State of California, subject only to challenge on the grounds set forth in California Code of Civil

Procedure Section 1286.2. The validity and enforceability of the Arbitrator's decision is to be determined exclusively by the California courts pursuant to the provisions of this Section 8(f).

(5) The Arbitrator may award reasonable attorneys' fees and costs, including the Arbitrator's fees and expert fees, to the "Prevailing Party." For purposes of this section, the "**Prevailing Party**" shall be the party which substantially obtains or successfully resists the equitable relief sought or the party which obtains a net monetary recovery, exclusive of attorneys' fees and costs UNLESS the net monetary recovery is equal to or less than the amount of a written offer from the opposing party made after the negotiations described in Section 8(f)(i). The Arbitrator shall have exclusive and binding authority to determine entitlement to attorneys' fees and costs, including Arbitrator's and experts' fees, under this section.

(6) The arbitration shall be conducted in Placer County, California. Any party may be represented by counsel or other authorized representative.

"NOTICE: BY INITIALLING IN THE SPACE BELOW YOU ARE AGREEING TO HAVE ANY DISPUTE ARISING OUT OF THE MATTERS INCLUDED IN THE 'ARBITRATION OF DISPUTES' PROVISION DECIDED BY NEUTRAL ARBITRATION AS PROVIDED BY CALIFORNIA LAW AND YOU ARE GIVING UP ANY RIGHTS YOU MIGHT POSSESS TO HAVE THE DISPUTE LITIGATED IN A COURT OR JURY TRIAL. BY INITIALLING IN THE SPACE BELOW YOU ARE GIVING UP YOUR JUDICIAL RIGHTS TO DISCOVERY AND APPEAL, UNLESS THOSE RIGHTS ARE SPECIFICALLY INCLUDED IN THE 'ARBITRATION OF DISPUTES' PROVISION. IF YOU REFUSE TO SUBMIT TO ARBITRATION AFTER AGREEING TO THIS PROVISION, YOU MAY BE COMPELLED TO ARBITRATE UNDER THE AUTHORITY OF THE CALIFORNIA CODE OF CIVIL PROCEDURE. YOUR AGREEMENT TO THIS ARBITRATION PROVISION IS VOLUNTARY.

"WE HAVE READ AND UNDERSTAND THE FOREGOING AND AGREE TO SUBMIT DISPUTES ARISING OUT OF THE MATTERS INCLUDED IN THE 'ARBITRATION OF DISPUTES' PROVISION TO NEUTRAL ARBITRATION."

Buyer's Initials

Seller's Initials

(g) Attorneys' Fees Defined. For the purpose of this Agreement, the terms "attorneys' fees" or "attorneys' fees and costs" shall mean the fees and expenses of counsel to the parties hereto, which may include printing, photostating, duplicating and other expenses, air freight charges, and fees billed for law clerks, paralegals, librarians and others not admitted to the bar but performing services under the supervision of an attorney. The terms "attorneys' fees" or "attorneys' fees and costs" shall also include, without limitation, all such fees and expenses

incurred with respect to appeals, arbitrations and bankruptcy proceedings, and whether or not any action or proceeding is brought with respect to the matter for which said fees and expenses were incurred. The term "attorney" shall have the same meaning as the term "counsel."

(h) Entire Agreement. This Agreement (including all Exhibits attached hereto) is the final expression of, and contains the entire agreement between, the parties with respect to the subject matter hereof and supersedes all prior understandings with respect thereto. This Agreement may not be modified, changed, supplemented, superseded, canceled or terminated, nor may any obligations hereunder be waived, except by written instrument signed by the party to be charged or by its agent duly authorized in writing or as otherwise expressly permitted herein. The parties do not intend to confer any benefit hereunder on any person, firm or corporation other than the parties hereto and lawful assignees.

(i) Time of Essence. Seller and Buyer hereby acknowledge and agree that time is strictly of the essence with respect to each and every term, condition, obligation and provision under this Agreement and that failure to timely perform any of the terms, conditions, obligations or provisions hereof by either party shall constitute a material breach of and a non curable (but waivable) default under this Agreement by the party so failing to perform.

(j) Relationship of Parties. Nothing contained in this Agreement shall be deemed or construed by the parties to create the relationship of principal and agent, a partnership, joint venture or any other association between Buyer and Seller, except as provided in this Agreement.

(k) Construction. Headings at the beginning of each paragraph and subparagraph are solely for the convenience of the parties and are not a part of the Agreement. Whenever required by the context of this Agreement, the singular shall include the plural and the masculine shall include the feminine and vice versa. This Agreement shall not be construed as if it had been prepared by one of the parties, but rather as if both parties had prepared the same. Unless otherwise indicated, all references to paragraphs, sections, subparagraphs and subsections are to this Agreement. All exhibits referred to in this Agreement are attached and incorporated by this reference.

(l) Exhibits. The exhibits to this Agreement, are hereby incorporated by reference into this Agreement.

(m) Choice of Law; Venue. This Agreement shall be governed by and construed in accordance with the laws of the State of California. Any suit, action or proceeding brought under the scope of this Agreement shall be brought and maintained to the extent allowed by law in the County of Placer, California.

(n) Counterparts. This Agreement may be executed in multiple counterparts, each of which shall be deemed an original, but all of which, together, shall constitute one and the same instrument.

(o) Days of Week. A "**Business Day**," as used herein, shall mean any day other than a Saturday, Sunday or holiday, as defined in Section 6700 of the California Government

Code. If any date for performance herein falls on a day other than a Business Day, the time for such performance shall be extended to 5:00 p.m. on the next Business Day.

(p) Representation by Counsel. Notwithstanding any rule or maxim of construction to the contrary, any ambiguity or uncertainty shall not be construed against either Buyer or Seller based upon authorship of any of the provisions hereof. Buyer and Seller each hereby warrant, represent and certify to the other as follows: (a) that the contents of this Agreement have been completely and carefully read by the representing party and counsel for the representing party; (b) that the representing party has been separately represented by counsel and the representing party is satisfied with such representation; (c) that the representing party's counsel has advised the representing party of, and the representing party fully understands, the legal consequences of this Agreement; and (d) that no other person (whether a party to this Agreement or not) has made any threats, promises or representations of any kind whatsoever to induce the execution hereof, other than the performance of the terms and provisions hereof.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement as of the dates set forth below.

BUYER:

**HARSCH INVESTMENT
PROPERTIES, LLC**, an Oregon limited
liability company

By: [Signature]

BILL OF SALE

Contract # _____

In consideration of \$447,300.00, receipt of which is hereby acknowledged, **WILDLANDS, INC.**, a Delaware corporation ("**Seller**"), does hereby bargain, sell and transfer to **HARSCH INVESTMENT PROPERTIES, LLC**, an Oregon limited liability company ("**Buyer**"), the following vernal pool creation and seasonal wetlands mitigation values ("**Mitigation Values**") from the Locust Road Preserve:

<u>Preserve</u>	<u>Impacts Mitigated</u>	<u>Acreage</u>	<u>Cost per Mitigation Value</u>	<u>Total Cost</u>
Locust Road Preserve	Vernal Pool Creation	0.708 acres	\$350,000.00	\$247,800.00
Locust Road Preserve	Seasonal Wetlands	1.33 acres	\$150,000.00	\$199,500.00
Purchase Price				\$447,300.00

Seller represents and warrants that it has good title to the Mitigation Values and the property thereon, has good right to sell the same, and they are free and clear of all claims, liens, or encumbrances.

Seller covenants and agrees with Buyer to warrant and defend the sale of the Mitigation Values hereinbefore described against all and every person and persons whomsoever lawfully claiming or to claim the same.

PRE-CONSTRUCTION SURVEY REPORT (ECORPS: MARCH 19, 2015)

March 19, 2015

Ms. Erica Gray
Development Coordinator
Harsch Investment Properties
1121 SW Salmon Street, Suite 500
Portland, Oregon 97205

**RE: *Blue Oaks Commerce Center, City of Roseville, Placer County, California –
Preconstruction Nesting Bird Survey***

Dear Ms. Gray:

At your request, ECORP Consulting, Inc. (ECORP) conducted a nesting bird survey for the Blue Oaks Commerce Center project site located in the City of Roseville, Placer County, California. The project site is bounded by Blue Oaks Boulevard on the north, Industrial Avenue on the west, and Washington Boulevard on the east. This survey included all trees and open areas located within the project site, and all suitable habitats within publicly accessible areas within 300 feet of the project.

The Federal Migratory Bird Treaty Act (MBTA) protects most naturally occurring birds (including common species) and makes it illegal to take, possess, export, transport, sell, purchase, barter or offer for sale, purchase, or barter any migratory bird, or the parts, nests, or eggs of such a bird except under the terms of a valid permits issued pursuant to Federal regulations. The California Fish and Game Code §3503 makes it unlawful to take, possess, or needlessly destroy the nest or eggs of any bird, except as otherwise provided by this code or any regulation pursuant thereto. All raptors (owls, hawks, eagles, and falcons), including their nests, are protected from take pursuant to the California Fish and Game Code §3503.5, and the MBTA, among other federal and state regulations. Potential tree-nesting raptors within this region include Great Horned Owl (*Bubo virginianus*), Red-tailed Hawk (*Buteo jamaicensis*), White-tailed Kite (*Elanus leucurus*), Cooper's Hawk (*Accipiter cooperii*), and American Kestrel (*Falco sparverius*), among others. Potential ground-nesting raptors include Northern Harrier (*Circus cyaneus*) and Burrowing Owl (*Athene cunicularia*).

This survey was conducted via visual observation on March 19, 2015 by ECORP senior biologist Keith Kwan. Binoculars (10x40 magnification) and a spotting scope (20-60x magnification) were used to assist with field identification and observations. Trees were visually inspected from multiple angles for active nests, and transects were walked through open areas to locate potential ground-nesting species. Transects were spaced approximately 50 feet apart to ensure complete coverage.

During this survey, no active bird nests were found within the project site and the 300-foot survey area. The project site has been previously graded and treated with hydroseed erosion control. There are no trees on the project site, but several are located offsite, along Industrial Avenue in the industrial development to the south. A list of birds observed is included as Attachment A.

Cliff Swallows (*Petrochelidon pyrrhonota*) are beginning to nest under the Blue Oaks Boulevard overpass at Industrial Avenue, but these should not be affected by site construction, which is over 300 feet away.

In conclusion, no active bird nests were found during the survey conducted on March 19, 2015. It is recommended that a follow up survey be conducted if no construction activity occurs within 14 days of this survey, as new nests could be built within the survey area at any time during this period.

If you have any questions feel free to contact me at (916) 782-9100.

Sincerely,

Keith Kwan
Senior Biologist

- C2 - USFWS NWI MAP
- C3 - CDFW CNDDDB 5-MILE OCCURRENCE LIST
- C4 - CNPS 9-QUAD QUERY RESULTS

IPaC resource list

This report is an automatically generated list of species and other resources such as critical habitat (collectively referred to as *trust resources*) under the U.S. Fish and Wildlife Service's (USFWS) jurisdiction that are known or expected to be on or near the project area referenced below. The list may also include trust resources that occur outside of the project area, but that could potentially be directly or indirectly affected by activities in the project area. However, determining the likelihood and extent of effects a project may have on trust resources typically requires gathering additional site-specific (e.g., vegetation/species surveys) and project-specific (e.g., magnitude and timing of proposed activities) information.

Below is a summary of the project information you provided and contact information for the USFWS office(s) with jurisdiction in the defined project area. Please read the introduction to each section that follows (Endangered Species, Migratory Birds, USFWS Facilities, and NWI Wetlands) for additional information applicable to the trust resources addressed in that section.

Location

Placer County, California

Local office

Sacramento Fish And Wildlife Office

☎ (916) 414-6600

📅 (916) 414-6713

Federal Building
2800 Cottage Way, Room W-2605
Sacramento, CA 95825-1846

NOT FOR CONSULTATION

Endangered species

This resource list is for informational purposes only and does not constitute an analysis of project level impacts.

The primary information used to generate this list is the known or expected range of each species. Additional areas of influence (AOI) for species are also considered. An AOI includes areas outside of the species range if the species could be indirectly affected by activities in that area (e.g., placing a dam upstream of a fish population even if that fish does not occur at the dam site, may indirectly impact the species by reducing or eliminating water flow downstream). Because species can move, and site conditions can change, the species on this list are not guaranteed to be found on or near the project area. To fully determine any potential effects to species, additional site-specific and project-specific information is often required.

Section 7 of the Endangered Species Act **requires** Federal agencies to "request of the Secretary information whether any species which is listed or proposed to be listed may be present in the area of such proposed action" for any project that is conducted, permitted, funded, or licensed by any Federal agency. A letter from the local office and a species list which fulfills this requirement can **only** be obtained by requesting an official species list from either the Regulatory Review section in IPaC (see directions below) or from the local field office directly.

For project evaluations that require USFWS concurrence/review, please return to the IPaC website and request an official species list by doing the following:

1. Draw the project location and click CONTINUE.
2. Click DEFINE PROJECT.
3. Log in (if directed to do so).
4. Provide a name and description for your project.
5. Click REQUEST SPECIES LIST.

Listed species¹ and their critical habitats are managed by the [Ecological Services Program](#) of the U.S. Fish and Wildlife Service (USFWS) and the fisheries division of the National Oceanic and Atmospheric Administration (NOAA Fisheries²).

Species and critical habitats under the sole responsibility of NOAA Fisheries are **not** shown on this list. Please contact [NOAA Fisheries](#) for [species under their jurisdiction](#).

-
1. Species listed under the Endangered Species Act are threatened or endangered; IPaC also shows species that are candidates, or proposed, for listing. See the [listing status page](#) for more information. IPaC only shows species that are regulated by USFWS (see FAQ).

2. [NOAA Fisheries](#), also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

The following species are potentially affected by activities in this location:

Fishes

NAME	STATUS
Delta Smelt <i>Hypomesus transpacificus</i> Wherever found There is final critical habitat for this species. Your location does not overlap the critical habitat. https://ecos.fws.gov/ecp/species/321	Threatened

Insects

NAME	STATUS
Monarch Butterfly <i>Danaus plexippus</i> Wherever found No critical habitat has been designated for this species. https://ecos.fws.gov/ecp/species/9743	Candidate
Valley Elderberry Longhorn Beetle <i>Desmocerus californicus dimorphus</i> Wherever found There is final critical habitat for this species. Your location does not overlap the critical habitat. https://ecos.fws.gov/ecp/species/7850	Threatened

Crustaceans

NAME	STATUS
Conservancy Fairy Shrimp <i>Branchinecta conservatio</i> Wherever found There is final critical habitat for this species. Your location does not overlap the critical habitat. https://ecos.fws.gov/ecp/species/8246	Endangered

Vernal Pool Fairy Shrimp *Branchinecta lynchi*

Threatened

Wherever found

There is **final** critical habitat for this species. Your location does not overlap the critical habitat.

<https://ecos.fws.gov/ecp/species/498>

Vernal Pool Tadpole Shrimp *Lepidurus packardii*

Endangered

Wherever found

There is **final** critical habitat for this species. Your location does not overlap the critical habitat.

<https://ecos.fws.gov/ecp/species/2246>

Critical habitats

Potential effects to critical habitat(s) in this location must be analyzed along with the endangered species themselves.

There are no critical habitats at this location.

Migratory birds

Certain birds are protected under the Migratory Bird Treaty Act¹ and the Bald and Golden Eagle Protection Act².

Any person or organization who plans or conducts activities that may result in impacts to migratory birds, eagles, and their habitats should follow appropriate regulations and consider implementing appropriate conservation measures, as described [below](#).

1. The [Migratory Birds Treaty Act](#) of 1918.
2. The [Bald and Golden Eagle Protection Act](#) of 1940.

Additional information can be found using the following links:

- Birds of Conservation Concern <https://www.fws.gov/program/migratory-birds/species>
- Measures for avoiding and minimizing impacts to birds
<https://www.fws.gov/library/collections/avoiding-and-minimizing-incident-take-migratory-birds>
- Nationwide conservation measures for birds
<https://www.fws.gov/sites/default/files/documents/nationwide-standard-conservation-measures.pdf>

The birds listed below are birds of particular concern either because they occur on the [USFWS Birds of Conservation Concern](#) (BCC) list or warrant special attention in your project location. To learn more about the levels of concern for birds on your list and how this list is generated, see the FAQ [below](#). This is not a list of every bird you may find in this location, nor a guarantee that every bird on this list will be found in your project area. To see exact locations of where birders and the general public have sighted birds in and around your project area, visit the [E-bird data mapping tool](#) (Tip: enter your location, desired date range and a species on your list). For projects that occur off the Atlantic Coast, additional maps and models detailing the relative occurrence and abundance of bird species on your list are available. Links to additional information about Atlantic Coast birds, and other important information about your migratory bird list, including how to properly interpret and use your migratory bird report, can be found [below](#).

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to migratory birds on your list, click on the PROBABILITY OF PRESENCE SUMMARY at the top of your list to see when these birds are most likely to be present and breeding in your project area.

NAME	BREEDING SEASON
Bald Eagle <i>Haliaeetus leucocephalus</i> This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities.	Breeds Jan 1 to Aug 31
Belding's Savannah Sparrow <i>Passerculus sandwichensis beldingi</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA https://ecos.fws.gov/ecp/species/8	Breeds Apr 1 to Aug 15
Bullock's Oriole <i>Icterus bullockii</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA	Breeds Mar 21 to Jul 25
California Gull <i>Larus californicus</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds Mar 1 to Jul 31
Common Yellowthroat <i>Geothlypis trichas sinuosa</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA https://ecos.fws.gov/ecp/species/2084	Breeds May 20 to Jul 31

Golden Eagle <i>Aquila chrysaetos</i> This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/1680	Breeds Jan 1 to Aug 31
Lawrence's Goldfinch <i>Carduelis lawrencei</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9464	Breeds Mar 20 to Sep 20
Long-eared Owl <i>asio otus</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/3631	Breeds Mar 1 to Jul 15
Nuttall's Woodpecker <i>Picoides nuttallii</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA https://ecos.fws.gov/ecp/species/9410	Breeds Apr 1 to Jul 20
Oak Titmouse <i>Baeolophus inornatus</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9656	Breeds Mar 15 to Jul 15
Olive-sided Flycatcher <i>Contopus cooperi</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/3914	Breeds May 20 to Aug 31
Short-billed Dowitcher <i>Limnodromus griseus</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9480	Breeds elsewhere
Tricolored Blackbird <i>Agelaius tricolor</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/3910	Breeds Mar 15 to Aug 10

Wrentit *Chamaea fasciata*

Breeds Mar 15 to Aug 10

This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Yellow-billed Magpie *Pica nuttalli*

Breeds Apr 1 to Jul 31

This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

<https://ecos.fws.gov/ecp/species/9726>

Probability of Presence Summary

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read and understand the FAQ "Proper Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

Probability of Presence (■)

Each green bar represents the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during a particular week of the year. (A year is represented as 12 4-week months.) A taller bar indicates a higher probability of species presence. The survey effort (see below) can be used to establish a level of confidence in the presence score. One can have higher confidence in the presence score if the corresponding survey effort is also high.

How is the probability of presence score calculated? The calculation is done in three steps:

1. The probability of presence for each week is calculated as the number of survey events in the week where the species was detected divided by the total number of survey events for that week. For example, if in week 12 there were 20 survey events and the Spotted Towhee was found in 5 of them, the probability of presence of the Spotted Towhee in week 12 is 0.25.
2. To properly present the pattern of presence across the year, the relative probability of presence is calculated. This is the probability of presence divided by the maximum probability of presence across all weeks. For example, imagine the probability of presence in week 20 for the Spotted Towhee is 0.05, and that the probability of presence at week 12 (0.25) is the maximum of any week of the year. The relative probability of presence on week 12 is $0.25/0.25 = 1$; at week 20 it is $0.05/0.25 = 0.2$.
3. The relative probability of presence calculated in the previous step undergoes a statistical conversion so that all possible values fall between 0 and 10, inclusive. This is the probability of presence score.

To see a bar's probability of presence score, simply hover your mouse cursor over the bar.

Yellow bars denote a very liberal estimate of the time-frame inside which the bird breeds across its entire range. If there are no yellow bars shown for a bird, it does not breed in your project area.

Vertical black lines superimposed on probability of presence bars indicate the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps. The number of surveys is expressed as a range, for example, 33 to 64 surveys.

A week is marked as having no data if there were no survey events for that week.

Surveys from only the last 10 years are used in order to ensure delivery of currently relevant information. The exception to this is areas off the Atlantic coast, where bird returns are based on all years of available data, since data in these areas is currently much more sparse.

Tell me more about conservation measures I can implement to avoid or minimize impacts to migratory birds.

[Nationwide Conservation Measures](#) describes measures that can help avoid and minimize impacts to all birds at any location year round. Implementation of these measures is particularly important when birds are most likely to occur in the project area. When birds may be breeding in the area, identifying the locations of any active nests and avoiding their destruction is a very helpful impact minimization measure. To see when birds are most likely to occur and be breeding in your project area, view the Probability of Presence Summary. [Additional measures](#) or [permits](#) may be advisable depending on the type of activity you are conducting and the type of infrastructure or bird species present on your project site.

What does IPaC use to generate the list of migratory birds that potentially occur in my specified location?

The Migratory Bird Resource List is comprised of USFWS [Birds of Conservation Concern \(BCC\)](#) and other species that may warrant special attention in your project location.

The migratory bird list generated for your project is derived from data provided by the [Avian Knowledge Network \(AKN\)](#). The AKN data is based on a growing collection of [survey, banding, and citizen science datasets](#) and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle ([Eagle Act](#) requirements may apply), or a species that has a particular vulnerability to offshore activities or development.

Again, the Migratory Bird Resource list includes only a subset of birds that may occur in your project area. It is not representative of all birds that may occur in your project area. To get a list of all birds potentially present in your project area, please visit the [Rapid Avian Information Locator \(RAIL\) Tool](#).

What does IPaC use to generate the probability of presence graphs for the migratory birds potentially occurring in my specified location?

The probability of presence graphs associated with your migratory bird list are based on data provided by the [Avian Knowledge Network \(AKN\)](#). This data is derived from a growing collection of [survey, banding, and citizen science datasets](#).

Probability of presence data is continuously being updated as new and better information becomes available. To learn more about how the probability of presence graphs are produced and how to interpret them, go to the Probability of Presence Summary and then click on the "Tell me about these graphs" link.

How do I know if a bird is breeding, wintering or migrating in my area?

To see what part of a particular bird's range your project area falls within (i.e. breeding, wintering, migrating or year-round), you may query your location using the [RAIL Tool](#) and look at the range maps provided for birds in your area at the bottom of the profiles provided for each bird in your results. If a bird on your migratory bird species list has a breeding season associated with it, if that bird does occur in your project area, there may be nests present at some point within the timeframe specified. If "Breeds elsewhere" is indicated, then the bird likely does not breed in your project area.

What are the levels of concern for migratory birds?

Migratory birds delivered through IPaC fall into the following distinct categories of concern:

1. "BCC Rangewide" birds are [Birds of Conservation Concern](#) (BCC) that are of concern throughout their range anywhere within the USA (including Hawaii, the Pacific Islands, Puerto Rico, and the Virgin Islands);
2. "BCC - BCR" birds are BCCs that are of concern only in particular Bird Conservation Regions (BCRs) in the continental USA; and
3. "Non-BCC - Vulnerable" birds are not BCC species in your project area, but appear on your list either because of the [Eagle Act](#) requirements (for eagles) or (for non-eagles) potential susceptibilities in offshore areas from certain types of development or activities (e.g. offshore energy development or longline fishing).

Although it is important to try to avoid and minimize impacts to all birds, efforts should be made, in particular, to avoid and minimize impacts to the birds on this list, especially eagles and BCC species of rangewide concern. For more information on conservation measures you can implement to help avoid and minimize migratory bird impacts and requirements for eagles, please see the FAQs for these topics.

Details about birds that are potentially affected by offshore projects

For additional details about the relative occurrence and abundance of both individual bird species and groups of bird species within your project area off the Atlantic Coast, please visit the [Northeast Ocean Data Portal](#). The Portal also offers data and information about other taxa besides birds that may be helpful to you in your project review. Alternately, you may download the bird model results files underlying the portal maps through the [NOAA NCCOS Integrative Statistical Modeling and Predictive Mapping of Marine Bird Distributions and Abundance on the Atlantic Outer Continental Shelf](#) project webpage.

Bird tracking data can also provide additional details about occurrence and habitat use throughout the year, including migration. Models relying on survey data may not include this information. For additional information on marine bird tracking data, see the [Diving Bird Study](#) and the [nanotag studies](#) or contact [Caleb Spiegel](#) or [Pam Loring](#).

What if I have eagles on my list?

If your project has the potential to disturb or kill eagles, you may need to [obtain a permit](#) to avoid violating the Eagle Act should such impacts occur.

Proper Interpretation and Use of Your Migratory Bird Report

The migratory bird list generated is not a list of all birds in your project area, only a subset of birds of priority concern. To learn more about how your list is generated, and see options for identifying what other birds may be in your project area, please see the FAQ "What does IPaC use to generate the migratory birds potentially occurring in my specified location". Please be aware this report provides the "probability of presence" of birds within the 10 km grid cell(s) that overlap your project; not your exact project footprint. On the graphs provided, please also look carefully at the survey effort (indicated by the black vertical bar) and for the existence of the "no data" indicator (a red horizontal bar). A high survey effort is the key component. If the survey effort is high, then the probability of presence score can be viewed as more dependable. In contrast, a low survey effort bar or no data bar means a lack of data and, therefore, a lack of certainty about presence of the species. This list is not perfect; it is simply a starting point for identifying what birds of concern have the potential to be in your project area, when they might be there, and if they might be breeding (which means nests might be present). The list helps you know what to look for to confirm presence, and helps guide you in knowing when to implement conservation measures to avoid or minimize potential impacts from your project activities, should presence be confirmed. To learn more about conservation measures, visit the FAQ "Tell me about conservation measures I can implement to avoid or minimize impacts to migratory birds" at the bottom of your migratory bird trust resources page.

Facilities

National Wildlife Refuge lands

Any activity proposed on lands managed by the [National Wildlife Refuge](#) system must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

There are no refuge lands at this location.

Fish hatcheries

There are no fish hatcheries at this location.

Wetlands in the National Wetlands Inventory (NWI)

Impacts to [NWI wetlands](#) and other aquatic habitats may be subject to regulation under Section 404 of the Clean Water Act, or other State/Federal statutes.

For more information please contact the Regulatory Program of the local [U.S. Army Corps of Engineers District](#).

Wetland information is not available at this time

This can happen when the National Wetlands Inventory (NWI) map service is unavailable, or for very large projects that intersect many wetland areas. Try again, or visit the [NWI map](#) to view wetlands at this location.

Data limitations

The Service's objective of mapping wetlands and deepwater habitats is to produce reconnaissance level information on the location, type and size of these resources. The maps are prepared from the analysis of high altitude imagery. Wetlands are identified based on vegetation, visible hydrology and geography. A margin of error is inherent in the use of imagery; thus, detailed on-the-ground inspection of any particular site may result in revision of the wetland boundaries or classification established through image analysis.

The accuracy of image interpretation depends on the quality of the imagery, the experience of the image analysts, the amount and quality of the collateral data and the amount of ground truth verification work conducted. Metadata should be consulted to determine the date of the source imagery used and any mapping problems.

Wetlands or other mapped features may have changed since the date of the imagery or field work. There may be occasional differences in polygon boundaries or classifications between the information depicted on the map and the actual conditions on site.

Data exclusions

Certain wetland habitats are excluded from the National mapping program because of the limitations of aerial imagery as the primary data source used to detect wetlands. These habitats include seagrasses or submerged aquatic vegetation that are found in the intertidal and subtidal zones of estuaries and nearshore coastal waters. Some deepwater reef communities (coral or tubercid worm reefs) have also been excluded from the inventory. These habitats, because of their depth, go undetected by aerial imagery.

Data precautions

Federal, state, and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, state, or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate Federal, state, or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

FLOODPLAIN OF PLEASANT GROVE CREEK, APPROX 2.2 AIR MILES E OF JCT PLACER BLVD & SPRR TRACKS.	APPROXIMATELY 4 MILES NE OF ROSEVILLE.	0.75 MILE SOUTH OF THE INTERSECTION OF HIGHWAY 65 AND PLEASANT GROVE ROAD, EAST OF HIGHWAY 65.	NORTH OF PLEASANT GROVE CREEK, APPROX. 1.5 AIR MILES NW OF R. F. FIDDYMENT RANCH, NW OF ROSEVILLE.
WHEN VISITED IN 1997, WHAT APPEARS TO BE DEDICATED OPEN SPACE WAS SEEN JUST TO THE EAST OF MAPPED LOCATION FOR THIS SITE. FUTURE SURVEYS SHOULD TARGET THIS AREA.	WITHIN STANFORD RANCH ALKALI SEEP PRESERVE, SPRING VALLEY. SITE IS NEAR PARK DRIVE AND STANFORD RANCH ROAD INTERSECTION. IN THE SW 1/4 SECTION 12. NEAR 3 SEEPS.		MAPPED IN THE SE 1/4 OF THE NW 1/4 OF SECTION 14 ACCORDING TO LAT/LONG COORDINATES PROVIDED BY FISHER.
VERNAL POOL AREA IN FLOODPLAIN OF INTERMITTENT STREAM. ASSOCIATED WITH RANUNCULUS BONARIENSIS TRISEPALUS.	SPRING FED ALKALI MEADOW WITH DISTICHLIS SPICATA, SCIRPUS OLNEYI, FRANKENIA GRANDIFOLIA VAR. CAMPESTRIS, CRESSA TRUXILLENSIS, MONERMA CYLINDRICA, AND LIPPIA NODIFLORA. AREA SURROUNDED BY ALAMO VARIANT CLAY, BUT SOIL AT SITE IS UNCLASSIFIED.	VERNAL POOL ON CLAYPAN SUBSTRATE. ASSOCIATED WITH DOWNINGIA BICORNUTA, D. ORNATISSIMA, ALLOCARYA STIPITATA MICRANTHA.	OCCURS IN ONE OF THE DEEPER BASIN VERNAL POOLS IN THE AREA; ONLY VERNAL POOL WITH STANDING WATER AT TIME OF SURVEY (1-2"); ASSOCIATED WITH ERYNGIUM VASEYI, NAVARRETTIA LEUCOCEPHALA, DOWNINGIA BICORNUTA, AND THE RARE DOWNINGIA PUSILLA.
ABOUT 100 PLANTS IN 1984. WINDSHIELD SURVEY CONDUCTED IN 1997 TO CONFIRM PRESENCE OR ABSENCE OF HABITAT; IF MAPS ARE ACCURATE, THIS SITE IS NOW UNDER THE PAVEMENT AT DEVON DR, FARRIER RD & RACHEL CT IN THE STANFORD RANCH SUBDIVISION.	OVER 10,000 PLANTS SEEN IN 1982, 2000-5000 SEEN IN 1989, AND ~2500 IN 1991. ACCORDING TO DAINS, DECLINE IN POP PROBABLY DUE TO WEATHER, NOT MANAGEMENT. SITE FENCED, HABITAT LOOKED GOOD IN LATE SEASON (JUNE) 1997 WINDSHIELD SURVEY.	MORE THAN 30 PLANTS OBSERVED IN 1985.	1000-1500 PLANTS OBSERVED IN 2006. 1000 PLANTS OBSERVED IN A SUBSEQUENT VISIT IN 2008.
	GRAZING REMOVED BY 1991, FILL HAD BEEN DUMPED ON SITE IN 1989; SUBSEQUENTLY REMOVED TO RESOLVE WETLANDS VIOLATIONS.	AREA GRAZED, BUT LITTLE DISTURBANCE. PARCEL TO EAST BEING DEVELOPED.	RESIDENTIAL AND COMMERCIAL DEVELOPMENT.
	Grazing; Other	Grazing	Development

	EAST OF FIDDYMENT ROAD, WEST OF FOOTHILLS BLVD, AND NORTH OF BASELINE ROAD, NW OF ROSEVILLE.	SW SIDE OF THE CITY OF LINCOLN; WEST OF THE JUNCTION OF EAGLESFIELD LANE AND REDCLIFFE LANE.	NORTH SIDE OF ORCHARD CREEK, 1.4 MILES NW OF INTERSECTION OF INDUSTRIAL AND ATHENS AVE, 3 MILES SOUTHWEST OF LINCOLN.	N TRIBUTARY OF PLEASANT GROVE CREEK, N OF PLEASANT GROVE CREEK, S OF PLACER BLVD, E OF HWY 65.
		MAPPED AS 2 POLYGONS ACCORDING TO 2014 HUDDLESTON COORDINATES, IN THE NORTH 1/2 OF THE SW 1/4 OF SECTION 28.	MAPPED WITHIN THE NW 1/4 OF THE NE 1/4 OF SECTION 32.	
	HABITAT CONSISTS OF SEASONAL WETLANDS; REFERENCE VERNAL POOLS, AND CONSTRUCTED VERNAL POOLS WITHIN A DESIGNATED WETLAND MITIGATION AREA. SURROUNDING UPLAND CONSISTS OF NON-NATIVE ANNUAL GRASSLAND/MIXED OAK WOODLAND.	OPEN GRASSLAND WITH VERNAL POOLS. LARGE VERNAL POOLS ON SOILS MAPPED AS SAN JOAQUIN SANDY LOAM SOILS. ASSOCIATED WITH ELEOCHARIS MACROSTACHYA, LASTHENIA GLABERRIMA, DOWNINGIA ORNATISSIMA, PLAGIOBOTHRYS, DESCHAMPSIA DANTHONIOIDES, ETC.	SCATTERED MARGINS OF LARGE VERNAL POOL WITH PLAGIOBOTHRYS UNDULATUS, P. STIPITATUS, LASTHENIA FREMONTII, L. GLABERRIMA, DOWNINGIA BICORNUTA, NAVARRETTA LEUCOCEPHALA, AND CALLITRICHE MARGINATA.	VERNAL POOL AREA ON FLOODPLAIN OF INTERMITTENT STREAM.
	CALIFORNIA LINDERIELLA WERE IDENTIFIED WITHIN 83 (44%) OF THE CONSTRUCTED VERNAL POOLS & SEASONAL WETLANDS AND 4 (21%) OF THE REFERENCE VERNAL POOLS SEASONAL WETLANDS. BRANCHINECTA LYNCHI ALSO OBSERVED.	IN 2014, NW POLYGON HAD 1000+ PLANTS AND SE POLYGON HAD 50+ PLANTS.	IN 2002 HUNDREDS OF PLANTS OBSERVED IN FOUR POOLS; LIKELY TO OCCUR IN OTHER ADJACENT POOLS.	ABOUT 200 PLANTS IN 1984. NONE FOUND IN 1997 (TOO LATE IN SEASON). THE NORTHERN POOLS WHICH WERE MAPPED HERE IN 1984 APPEAR TO BE EXTIRPATED. S POOLS UNDISTURBED IN 1997.
	THREATENED BY SURROUNDING DEVELOPMENT (GOLF COURSES AND RESIDENTIAL DEVELOPMENT).	NO VISIBLE THREATS AT THE TIME OF SURVEY.	LIGHT DISTURBANCE FROM GRAZING.	PART OF AREA PLANNED FOR INDUSTRIAL PARK USE (AREA GRADED IN 1983). GRAVEL PIT TO SOUTH.

KASEBERG CREEK, 0.75 MILE E OF FIDDYMENT ROAD AND 0.25 MILE N OF PLEASANT GROVE BOULEVARD, E SIDE OF ROSEVILLE.	250 FT NORTH OF EAST CATLETT RD, 0.4 MI WEST OF FIDDYMENT RD, SW OF LINCOLN.	NORTH SIDE OF PHILIP ROAD, APPROXIMATELY 0.75 MILE WEST OF FIDDYMENT ROAD, NW OF ROSEVILLE.	NEAR THE INTERSECTION OF WOODCREEK OAKS BLVD AND PLEASANT GROVE BLVD, WOODCREEK OAKS SUBDIVISION IN WESTERN ROSEVILLE.
NEST TREE WAS LOCATED IN WHAT BECAME THE NORTH EDGE OF AN OPEN SPACE CORRIDOR/GOLF COURSE IN 1996. MAPPED TO PROVIDED TOPO MAP.	LOCATED ON MOORE RANCH WETLAND RESTORATION PROJECT PROPERTY.		MAPPED TO DESCRIPTION GIVEN (TOWNSHIP, SECTION AND ELEVATION DON'T MATCH SITE DESCRIPTION).
HABITAT WAS A WOODLAND CORRIDOR ALONG KASEBERG CREEK. DEVELOPMENT BEGINNING IN THE MID-1990S CONTINUES TO REPLACE FORAGING & NESTING HABITAT. NEST SITE IS NOW WITHIN THE CITY OF ROSEVILLE PUBLIC GOLF COURSE, SURROUNDED BY DEVELOPMENT.	HABITAT CONSISTS OF MIXED NATIVE AND NON-NATIVE GRASSLAND, WHICH IS WITHIN A VERNAL POOL RESTORATION PROJECT AREA. SURROUNDED BY GRAZED AND UNGRAZED PASTURES.	HABITAT CONSISTS OF MODERATELY-GRAZED, ROLLING GRASSLAND, WITH NO EVIDENCE OF HISTORIC SOIL DISTURBANCE. SITE WOULD BE BETTER IF MORE BURROWS WERE PRESENT; HARD SOILS AND LACK OF GROUND SQUIRRELS MAY BE THE CAUSE.	GRASSLAND WITH NUMEROUS VERNAL POOLS AND SWALES.
NESTING INITIATED IN 1996 DURING GRADING BUT PRIOR TO CONSTRUCTION OF HOUSES; 2 YOUNG PRODUCED. NEST SITE VACANT IN 1997, THOUGH NEST TREE REMAINED WITHIN AN OPEN SPACE/GOLF COURSE. NO ACTIVITY IN 2000 & 2001; TERRITORY APPEARS ABANDONED.	1 ADULT OBSERVED AT BURROW SITE ON 30 JAN, 1 FEB AND 18 FEB 2008. GULLS ATTRACTED BY NEARBY WASTEWATER & GARBAGE COLLECTION FACILITIES COULD POSSIBLY PREY UPON BUOW CHICKS IF NESTING OCCURS.	OWLS (NEVER MORE THAN 2) OBSERVED YEAR-ROUND DURING 1998. HABITAT APPEARS EXTANT, BUT NO OWLS WERE OBSERVED ON 5 MAY 2003 - DATE OF SITE VISIT LIKELY TO EARLY.	30+ METAMORPHS OBSERVED IN A DRYING INTERMITTENT DRAINAGE, 1990.
SURROUNDING SUBDIVISIONS & GOLF COURSE IN RIPARIAN CORRIDOR WERE CONSTRUCTED BEGINNING IN 1996. CONTINUING DEVELOPMENT.	THREATENED BY ENCROACHING URBAN DEVELOPMENT FROM BOTH LINCOLN & ROSEVILLE.	THREATS INCLUDE POSSIBLE FUTURE DEVELOPMENT OR LOSS OF GRAZERS.	LAND HAS BEEN DEVELOPED SINCE OBSERVATION.

ABOUT 0.7 MI N OF HWY 65 AT TWELVE BRIDGES DR, 0.9 MI S OF HWY 65 AT JOINER PKWY, S OF LINCOLN.	AROUND THE CONFLUENCE OF INGRAM SLOUGH & ORCHARD CREEK, ABOUT 1.0 MI NE OF FIDDYMENT RD AT E CATLETT RD, SW OF LINCOLN.	CLOVER CREEK, IN CLOVER VALLEY, ABOUT 2.2 MI EAST OF TELEGRAPH HILL, ABOUT 2 MILES NW OF LOOMIS.	ALONG PLEASANT GROVE CREEK, BETWEEN FIDDYMENT ROAD AND BLUE OAKS BOULEVARD, WEST SIDE OF ROSEVILLE.	
COLONY DATA STORED IN UC DAVIS TRICOLORED BLACKBIRD PORTA; SITE NAME "RODEO GROUND OPEN SPACE 3." MAPPED TO LOCATION/COORDINATES PROVIDED BY PORTAL.	MAPPED TO PROVIDED LOCATIONS. PROPERTY KNOWN AS ANTONIO MOUNTAIN RANCH.	TEC: COORDS PROVIDED. RIC: GENERAL LOC PROVIDED VIA MAP (INDICATES SAME APPROX LOC, AND MAY REFER TO SAME DETECTION); OUTSIDE OF CORE STUDY AREA. MAPPED TO TEC LOCATION.		
BLACKBERRY BRAMBLES ALONG A CATTAIL/TULE MARSH. 2011 COLONY CONSISTED OF 3 BLACKBERRY BRAMBLES WITH OVER 100 BIRDS EACH; COLONY GROWING IN SIZE. DRY CONDITIONS AND MINIMAL WATER IN 2015.	NESTING IN HIMALAYAN BLACKBERRY IN RUDERAL GRASSLAND/VERNAL POOL COMPLEX AT CONVERGENCE OF ORCHARD CREEK AND INGRAM SLOUGH. SURROUNDING AREA USED FOR RANCHING. SUBURBAN HOUSING. IN 2017 SITE WAS IN THE PROCESS OF BECOMING A MITIGATION BANK.	LARGE, TYPHA-DOMINATED WETLAND SURROUNDING CLOVER CREEK; FIRM SUBSTRATE, UNSATURATED MUD WITH ALMOST NO STANDING WATER ELSEWHERE IN THE WETLAND. NO WATER FLOW WAS OBSERVED, BUT INFLOW IS AT NORTH END.	NEST TREE WAS A BLUE OAK; SURROUNDING HABITAT CONSISTS OF BLUE OAK WOODLAND GROWING ALONG PLEASANT GROVE CREEK.	
APPROXIMATELY 500 BIRDS OBSERVED ON 18 OR 19 APR 2011; COLONY NOT PREVIOUSLY OBSERVED, MARKED AS SINGING AND CARRYING NEST MATERIAL IN PORTAL. 0 BIRDS OBSERVED ON 18 APR 2014. 0 OBSERVED ON 17 APR 2015; ABOUT 1500 OBS THE WEEK PRIOR.	NESTING COLONY OF ABOUT 1000 OBSERVED ON 23 MAY 2017. ADULTS OBSERVED CARRYING FOOD (CATERPILLARS) INTO BLACKBERRY BRAMBLES.	1 RAIL (PROBABLE TERRITORIAL MALE) RESPONDED TO TAPED CALL ON 9 JUN 2006; LIKELY THE DETECTION NOTED IN RIC08A. RECENT DETECTIONS IN N PLA CO & NEARBY INDICATE THIS AS IMPORTANT'S EXTENSION OF THE PATCHY INLAND DISTRIBUTION OF THE CA BLRA.	DARK-PHASE ADULT SWHA OBSERVED ON 26 APR 2001; NO NEST FOUND. NEST FOUND BY THOMAS LEEMAN (ESA), AND HE REPORTED THAT AT 2 YOUNG HAD BEEN PRODUCED. BY 27 JUN 2001, WHEN WE RETURNED TO GPS THE NEST, THE YOUNG HAD FLEDGED.	
	URBAN DEVELOPMENT IN ADJACENT PARCELS.	THREATENED BY RESIDENTIAL DEVELOPMENT, INCLUDING A ROAD-CROSSING NEAR THE 2006 DETECTION SITE.	THREATENED BY DEVELOPMENT JUST WEST OF THE NEST SITE.

ON N SIDE OF TWELVE BRIDGES DR, ABOUT 2.7 MI E OF INTERSECTION WITH HWY 65, S OF LINCOLN.	ALONG INDUSTRIAL AVE (=LINCOLN BLVD), ABOUT 0.3 MILE SSW OF THE LINCOLN BYPASS (=HWY 65) OVERPASS, SSW OF LINCOLN.	NORTH SIDE OF PLEASANT GROVE CREEK, JUST S OF STARWOOD CT AT TRADEWINDS DR IN BLUE OAKS DEVELOPMENT NW OF ROSEVILLE.
MAPPED ACCORDING TO LOCATION ON PROVIDED MAP. PROVIDED ROAD DESIGNATIONS WERE "HIGHWAY 65 & DIRT ROAD, 1.7 MI SOUTH OF RODEO GROUNDS."	MAPPED TO GIVEN COORDINATES; MAPPED NON-SPECIFICALLY BECAUSE IT SEEMS LIKELY THAT THE CYST FOUND MAY HAVE BEEN TRANSPORTED FROM A NEARBY WETLAND.	MAPPED TO POINT FROM CDFW SHAPEFILE OF NEST RECORDS FROM 2009.
CIRCULAR PATCH OF HIMALAYAN BLACKBERRY. 2000 COLONY WAS IN A HILLSIDE SEEP. LARGE STOCKPOND WITHIN 0.5 MILE.	SEASONAL WETLAND ALONG ROADSIDE DISTURBED BY EXCAVATION OF A TELECOMMUNICATION LINE; PREVIOUSLY FILLED WITH RUNOFF FROM ADJACENT WETLAND COMPLEX AND NEARBY STREAM. SURROUNDING LAND BEING DEVELOPED FOR HOUSING.	NEST IN 55' BLUE OAK IN RIPARIAN STRIP WITH AN OPEN FIELD DIRECTLY NE, SURROUNDED BY RESIDENTIAL DEVELOPMENT.
ANECDOTALLY REPORTED AS NESTING IN 1994. A FORAGING FLOCK OF ABOUT 250 BIRDS OBSERVED ON 21 APR 1995. ABOUT 200 BIRDS OBSERVED ON 22 APR 2000; NOTED AS CARRYING FOOD.	1 CYST IDENTIFIED FROM SOIL SAMPLED ON 23 MAR 2002.	NEST WITH YOUNG OBSERVED ON 28 APR 2009; FLEDGING SUCCESS UNKNOWN.
POTENTIAL THREAT FROM DEVELOPMENT.	SINCE THE TIME OF SURVEY, THE WETLAND IN WHICH THE CYST WAS FOUND WAS PAVED OVER DURING ROAD EXPANSION PROJECT.	
	Road/trail construction/maint.

RESOLUTION NO. 23-023

DENYING THE APPEAL FROM THE SEPTEMBER 22, 2022 APPROVAL BY THE PLANNING COMMISSION; ADOPTING THE TWO (2) FINDINGS OF FACT AND APPROVING THE MAJOR PROJECT PERMIT STAGE 1 MODIFICATION SUBJECT TO TEN (10) CONDITIONS OF APPROVAL; AND ADOPTING THE TWO (2) FINDINGS OF FACT AND APPROVING THE MAJOR PROJECT PERMIT STAGE 2 SUBJECT TO NINETY-THREE (93) CONDITIONS OF APPROVAL.

WHEREAS, on September 22, 2022, the Planning Commission held a public hearing on the Blue Oaks Commerce Center (Project) located at 2200 Freedom Way; and

WHEREAS, the Project consists of four (4) industrial buildings totaling approximately 310,000-square-feet; and

WHEREAS, the Project requires a Major Project Permit Stage 1 Modification and Major Project Permit Stage 2 to allow the construction of four (4) industrial buildings totaling approximately 310,000 square-feet in size; and

WHEREAS, on September 22, 2022, the Planning Commission considered the Addendum to the Blue Oaks Commerce Center Initial Study and Mitigated Negative Declaration; and

WHEREAS, on September 22, 2022, the Planning Commission voted 6 aye, 0 no, and 1 absent to approve the Major Project Permit Stage 1 Modification after finding that with the conditions of approval, the Project was consistent with the following two (2) Findings of Fact:

1. The Preliminary Development Plan is consistent with the General Plan, applicable Specific Plan, and adopted City Design Guidelines.
2. The design and installation of the Preliminary Development Plan shall not be detrimental to the public health and safety, or be materially detrimental to the public welfare.

WHEREAS, on September 22, 2022, the Planning Commission voted 6 aye, 0 no, and 1 absent to approve the Major Project Permit Stage 2 after finding that with the conditions of approval, the Project was consistent with the following two (2) Findings of Fact:

1. The architecture and landscaping is consistent with the General Plan, applicable Specific Plan, and adopted City Design Guidelines; and Phase 1 approval.
2. The design and installation of the Preliminary Development Plan shall not be detrimental to the public health and safety, or be materially detrimental to the public welfare.

WHEREAS, following the Planning Commission's approval, an appeal was submitted by the Lozeau Drury law firm on September 30, 2022, based on concerns that the project had an inadequate environmental review; and

WHEREAS, a review of the record shows that the Project's Addendum is the appropriate CEQA document; and

WHEREAS, after holding a hearing on January 18, 2023 and considering the entire record, staff recommends that the City Council consider the Blue Oaks Commerce Center Addendum to the Blue Oaks Commerce Center Initial Study and Mitigated Negative Declaration and deny the appeal of the Planning Commission's approval of the Major Project Permit Stage 1 Modification and Major Project Permit Stage 2, because the necessary findings of facts can be made; and

WHEREAS, staff recommends that the City Council adopt the two (2) Findings of Fact for the Major Project Permit Stage 1 Modification and approve the Major Project Permit Stage 1 Modification subject to ten (10) conditions of approval; and

WHEREAS, staff recommends that the City Council adopt the two (2) Findings of Fact for the Major Project Permit Stage 2 and approve the Major Project Permit Stage 2 subject to ninety-three (93) conditions of approval; and

NOW, THEREFORE, BE IT RESOLVED that the City Council of the City of Roseville hereby considers the Blue Oaks Commerce Center Addendum and denies the appeal of the Planning Commission's September 22, 2022 approval of the Major Project Permit Stage 1 Modification and Major Project Permit Stage 2; and

BE IT FURTHER RESOLVED that the City Council hereby adopts the two (2) Findings of Fact for the Major Project Permit Stage 1 Modification and approves the Major Project Permit Stage 1 Modification subject to ten (10) conditions of approval; and

BE IT FURTHER RESOLVED that the City Council hereby adopts the two (2) Findings of Fact for the Major Project Permit Stage 2 and approves the Major Project Permit Stage 2 subject to ninety-three (93) conditions of approval.

PASSED AND ADOPTED by the Council of the City of Roseville this _____, 2023, by the following vote on roll call:

Blue Oaks Commerce Center

NEW SHELL BUILDINGS (A, B, C AND D)

2200 FREEDOM WAY
ROSEVILLE, CALIFORNIA 95678

PROJECT INFORMATION:

NARRATIVE:

THIS PROJECT INCLUDES FOUR NEW CONCRETE TILT-UP SHELL BUILDINGS DESIGNED FOR MULTI-TENANTS. IT WILL MAKE AVAILABLE TO THE COMMUNITY STATE OF THE ART FACILITIES FOR A LARGE RANGE OF BUSINESS ACTIVITIES. THE FACILITIES ARE DESIGNED TO ACCOMMODATE SMALL BUSINESSES AS WELL AS TENANTS SEEKING LARGE WAREHOUSE DISTRIBUTION SPACE.

SCOPE OF WORK:

- CONSTRUCTION OF (4) BUILDINGS (A, B, C AND D)
- ALL SITE WORK AS SHOWN ON SITE PLANS.
- CONSTRUCT (4) NEW DRIVEWAYS ON FREEDOM WAY.

PLANNING / ZONING REVIEW:

JURISDICTION	CITY OF ROSEVILLE, CALIFORNIA
LAND USE ZONE	M-2 (GENERAL INDUSTRIAL)
OVERLAY DISTRICT	NONE
STREET ADDRESS	2200 FREEDOM WAY (SEE G1.0 FOR EACH BLDG.)
LEGAL DESCRIPTION	SEE SURVEY

AREA SUMMARY:

PARCEL 3 AREA:	468,705 SQFT.	10.76 ACRES (+/-)
PARCELS 4-5 AREA:	574,170 SQFT.	13.18 ACRES (+/-)
TOTAL SITE AREA:	1,042,875 SQFT.	23.94 ACRES (+/-)

BUILDING:	AREA	COVERAGE	PARKING
BUILDING (A):	109,200 SQFT.	19%	228 SPACES
BUILDING (B):	80,080 SQFT.	14%	199 SPACES
BUILDING (C):	59,500 SQFT.	13%	192 SPACES
BUILDING (D):	59,500 SQFT.	13%	203 SPACES
TOTAL	308,280 SQFT.	29.6%	822 SPACES

LANDSCAPE (A) AREA:	267,439 SQFT.	25.6% COVERAGE
A.C.PAVING:	467,156 SQFT.	44.8% COVERAGE

AUTO PARKING (REQUIRED, MIN.):	400 SPACES
AUTO PARKING (PROVIDED):	822 SPACES 2.7 PER 1,000 SQFT.

AUTO PARKING BASED ON CITY REQUIREMENTS:

DESCRIPTION	REQUIREMENT	AREA	SPACES
PROF. OFFICE	(1) PER 250 S.F. (ASSUME 10-PERCENT)	30,828 SF.	123
WHSE. / MFR.	(1) PER 1,000 S.F.	277,452 SF.	277
TOTAL		308,280 SF.	400

ACCESSIBLE PARKING (REQUIRED):

PARCEL 3 (BLDGs. C-D) (395 SPACES)	8 SPACES
PARCEL 4-5 (BLDGs. A-B) (427 SPACES)	9 SPACES
TOTAL	17 SPACES

ACCESSIBLE PARKING (PROVIDED): 17 SPACES

VAN ACCESSIBLE PARKING (REQUIRED): 3 SPACES

VAN ACCESSIBLE PARKING (PROVIDED): 4 SPACES

BIKE PARKING (REQUIRED): 41 SPACES

BIKE PARKING (ACTUAL): 42 SPACES

REQUIRED BIKE PARKING BASED ON 5% OF ACTUAL AUTO PARKING SPACES PROVIDED (822) WITH A MINIMUM OF (4) SPACES.

THE REQUIRED AMOUNT WAS DIVIDED IN HALF BETWEEN SHORT TERM (RACKS ON CONC. PAD) AND LONG TERM (LOCKERS FOR 2-BIKES) AND DIVIDED BETWEEN ALL (4) BUILDINGS.

CLEAN AIR / EV PARKING SPACES (REQUIRED): 99 SPACES

CLEAN AIR / EV PARKING SPACES (PROVIDED): 99 SPACES

CLEAN AIR / EV PARKING BASED ON 12% OF ACTUAL AUTO PARKING SPACES PROVIDED (822).

THE REQUIRED AMOUNT WAS EQUALLY DIVIDED BETWEEN ALL (4) BUILDINGS.

QUICK REFERENCE BLDG. INFO:

AS AMENDED BY THE STATE OF CALIFORNIA AND LOCAL JURISDICTIONS.

GENERAL IBC REVIEW:

OCCUPANCY	SHELL BUILDINGS, TENANTS UNKNOWN AT THIS TIME - ASSUMED S-1 (WAREHOUSE), F-1 (MANUF.) AND B (OFFICE)
CONSTRUCTION TYPE	V-B (CONCRETE TILT-UP WITH WOOD ROOF)
FULLY SPRINKLED	YES
FIRE ALARM	YES
ALLOWABLE AREA	WITH (4) 60.0' SIDEYARDS AND FULLY SPRINKLERED, ALLOWABLE AREA IS TO BE UNLIMITED
BUILDING FOOTPRINT	308,280 SF
BUILDING HEIGHT	MAX. ALLOWED = 60-FEET, ACTUAL = 42'-6"
STORIES	ALLOWED = 2, ACTUAL = 1 (SINGLE)
OCCUPANT LOAD (SHELL BUILDING, OCCUPANTS NOT KNOWN)	ANTICIPATED OFFICE (B) = 30,828 SF. (10%), OCCUPANT LOAD (150) = 206 ANTICIPATED WAREHOUSE (S-1) = 246,624 SF. (80%), OCCUPANT LOAD (500) = 493 ANTICIPATED MANUFACTURING (F-1) = 30,828 SF. (10%), OCCUPANT LOAD (100) = 308 TOTAL OCCUPANT LOAD = 1,007
EXITS	MIN. REQUIRED = 3, ACTUAL = 10 PLUS (EA. BLDG.)
FIRE RATINGS	DUE TO UNLIMITED AREA, THE EXTERIOR WALLS ARE NOT REQUIRED TO BE RATED. SEE SHEET A7.01 FOR FIRE BARRIER WALLS AT ELECTRICAL AND FIRE PUMP ROOMS.
FIRE EXTINGUISHERS	SEE OVERALL FLOOR PLANS OF EACH BUILDING FOR TYPES AND LOCATIONS.
ENERGY CODE	THIS PROJECT IS FOR A SHELL BUILDING AND WILL BE SEMI-CONDITIONED (FREEZE-PROTECTED), TITLE 24 FORMS HAVE BEEN COMPLETED AND ARE INCLUDED ON THE MEP SHEETS.
ENERGY SCHEDULE	SEE MECHANICAL AND ELECTRICAL SHEETS (ALSO SEE ENERGY NOTE ABOVE).
ACCESSIBLE PARKING	PROVIDED AS SHOWN ON SITE PLAN
REQUIRED OPENING PROTECTION	NONE

SITE PLANNING SYMBOLS

- ASPHALT PAVING AS NOTED ON THIS SHEET
- NEW LANDSCAPED AREA - SEE SHEET L1.1
- EXISTING LANDSCAPED AREA - SEE SHEET L1.1
- FUTURE LANDSCAPED AREA (NOT PART OF THIS PROJECT)
- GARB. GARBAGE ENCLOSURE - SEE DETAIL 1 / G2.1.
- STANDARD ACCESSIBLE PARKING STALL. 9.0' WIDE STALL WITH 6.0' WIDE STRIPED SIDE ACCESS. PROVIDE CODE APPROVED SIGN AT EACH STALL. SEE DETAIL 9 / G2.0.
- VAN ACCESSIBLE PARKING STALL. 9.0' WIDE STALL WITH 8.0' WIDE STRIPED SIDE ACCESS. PROVIDE CODE APPROVED SIGN AT EACH STALL. SEE DETAIL 9 / G2.0.
- NUMBER OF STANDARD PARKING STALLS 9.0' X 18.0'
- NUMBER OF ELECTRIC VEHICLE (EV) PARKING STALLS WITH CONDUIT FROM THE ADJACENT ELECTRICAL ROOM FOR FUTURE CHARGING STATIONS. SEE KEYNOTES 12 AND 15.
- NUMBER AND WIDTH OF PARKING SPACES.
- NEW SITE LIGHT POLE - SEE ELECTRICAL.

GENERAL NOTES:

- PROPERTY LINE BEARINGS AND DISTANCES AS WELL AS SITE AREA CALCULATIONS ARE PROVIDED FOR ZONING AND PERMIT REVIEW ONLY. REAL PROPERTY LEGAL DESCRIPTIONS AND AREA CALCULATIONS ARE TO BE PROVIDED BY A REGISTERED PROFESSIONAL SURVEYOR.
- SEE COVER SHEET (CV/R1.0) FOR AREA SUMMARY TABLE.
- SEE SHEET G1.0 FOR OVERALL MASTER SITE PLAN.
- SEE SHEET G1.0 FOR ALL CONTROL DIMENSIONS.

PAVEMENT SECTIONS (NON AMENDED SOIL):

(BASED ON 20 YEAR DESIGN LIFE FROM GEO REPORT, DATED 09/23/2005)

- CAR PARKING AND AISLE - 3.0" A.C. PAVING OVER 9" CRUSHED ROCK OVER COMPACTED SUBGRADE.
- HEAVY TRUCK MANEUVERING - 4.0" A.C. PAVING OVER 15.5" CRUSHED ROCK OVER COMPACTED SUBGRADE.

NOTE:

ALL PARKING DIMENSIONS ARE SHOWN AS A NOMINAL 9.0' MODULE (12 SPACES AT 9' = 108'). HOWEVER DUE TO THE END SPACES BEING 9.0' (CURB TO STRIPE) AND THE REST BEING 9.0' (CENTER OF STRIPE TO CENTER OF STRIPE), THE OVERALL DIMENSION IS LONGER THAN 108'. PLEASE SEE DETAIL 7 / G2.3 FOR ADDITIONAL INFORMATION.

SITE PLAN KEYNOTES:

- NOTE: NOT ALL KEYNOTES APPEAR ON EACH SHEET. SEE ALL (4) SHEETS FOR LOCATIONS OF NOTES.
- SIDEWALK RAMP. 1:12 MAXIMUM SLOPE. PROVIDE CODE APPROVED DETECTABLE WARNING. SEE DETAIL 2 / G2.0.
 - ACCESSIBLE PARKING SPACES WHERE SHOWN. SEE DETAIL 9 / G2.0. SHEETS AND NOTES BELOW.
 - NEW MONUMENT SIGN PER DETAILS ON SHEET G2.2. PROVIDE (2) 1-INCH DIA. CONDUITS TO THIS LOCATION FROM THE ELECTRICAL ROOM. SEE ELECTRICAL FOR LIGHTS.
 - EXISTING STORM WATER SWALES TO REMAIN. SEE UTILITY PLANS FOR ADDITIONAL INFORMATION.
 - EXISTING STORM WATER SWALES TO BE MODIFIED. SEE UTILITY PLANS FOR ADDITIONAL INFORMATION.
 - GARBAGE ENCLOSURE WITH 65-FOOT CLEARANCE IN FRONT. SEE DETAIL SHEET G2.1.
 - EXISTING DRIVEWAY TO REMAIN. USE CAUTION TO PROTECT.
 - NEW DRIVEWAY PER CITY STANDARD DETAILS.
 - CONCRETE PEDESTRIAN AREA WITH TABLES / UMBRELLAS AND BENCHES - SEE DETAIL 3 / G2.3.
 - SHORT TERM BIKE PARKING (RACK ON CONCRETE PAD) PER DETAIL 6 / G2.0. (2) BIKES AT EACH LOCATION.
 - LONG TERM BIKE PARKING (LOCKED LOCKERS ON CONCRETE PAD) PER DETAIL 4 / G2.3. (2) BIKES AT EACH LOCATION.
 - ELECTRIC VEHICLE (EV) PARKING STALL. PROVIDE (1) 4-INCH CONDUIT FROM NEAREST ELECTRICAL ROOM TO PARKING STALL FOR FUTURE CHARGING STATION. ALSO SEE KEYNOTE 15.
 - NEW 5-FOOT WIDE SIDEWALK TO EXISTING BUS SHELTER CONCRETE PAD AT STREET.
 - NEW 5.0' X 24.0' BUS SHELTER EASEMENT (ONSITE) ADJACENT TO THE EXISTING CONCRETE BUS SHELTER PAD THAT IS IN THE RIGHT OF WAY.
 - EACH PARKING STALL INDICATED WITH A BOX IN FRONT IS TO BE DESIGNATED WITH THE WORDS "CLEAN AIR / CARPOOL / EV" PAINTED IN EACH STALL TO MEET CITY REQUIREMENTS. THERE APPROX. (25) SPACES PER BUILDING. ALSO SEE KEYNOTE 12.
 - 9.0' WIDE LANDSCAPE ISLANDS. SEE LANDSCAPE PLANS.
 - POURED-IN-PLACE CONCRETE CURB. LOCATE AROUND ALL LANDSCAPE AREAS AS SHOWN (U.N.O.). 5.0' TYPICAL CURB RADIUS AT CORNERS (U.N.O.). SEE DETAIL 3 / G2.0.
 - 3" WIDE PAINT STRIPE. DOUBLE AT EACH STALL - SEE DETAIL 11 / G2.0.
 - NEW CONCRETE SIDEWALK. SEE DETAIL 1 / G2.0.
 - TRANSFORMER PAD AND BOLLARDS - COORDINATE WITH ELECTRICAL.
 - 5.0' X 5.0' MIN. CONCRETE LANDING (4" THICK - UNREINFORCED).
 - LOADING DOCK CONCRETE SLAB. 7-INCH THICK UNREINFORCED CONCRETE OVER 8 INCHES COMPACTED CRUSHED ROCK OVER COMPACTED SUBGRADE.
 - PAINT STRIPING (3" WIDE AT 2.0' O.C.) DENOTING PEDESTRIAN ACCESS WALKWAY OR NO PARKING.
 - LOADING DOCK RETAINING WALL WITH GUARDRAIL - SEE DETAIL 10 / G2.0.
 - 12" CONCRETE BACKER CURB - SEE DETAIL 4 / G2.0.
 - CURB CUT AT BACK OF LANDSCAPE ISLAND - SEE GRADING PLANS AND DETAIL 6 / G2.3.
 - SEE NOTE ON THIS SHEET REGARDING PARKING DIMENSIONS.
 - EXISTING INTERIOR PROPERTY LINE TO BE REMOVED WITH LOT MERGER UNDER SEPARATE PERMIT SUBMITTAL. SEE LOT MERGER PLAN IN THIS SET.

DRAWN BGL	CHECKED CMP

1. PRIOR TO ANY CONSTRUCTION, CONTRACTOR SHALL VERIFY EXISTING UTILITIES AND TOPOGRAPHY ARE AS SHOWN ON PLANS. WHEN ACTUAL CONDITIONS DIFFER FROM THOSE SHOWN ON THE PLANS, THE CONTRACTOR SHALL NOTIFY THE ENGINEER PRIOR TO PROCEEDING WITH CONSTRUCTION.
2. CONTRACTOR TO LEAVE ALL AREAS OF PROJECT FREE OF DEBRIS AND UNUSED CONSTRUCTION MATERIAL.
3. CONTRACTOR SHALL PROVIDE ALL MATERIALS, EQUIPMENT, SURVEYING, TESTING, PERSONNEL, TRAFFIC SAFETY CONTROL AND AS-BUILTS FOR ALL PHASES OF CONSTRUCTION.
4. CONTRACTOR SHALL COORDINATE PUBLIC IMPROVEMENTS AND INSPECTIONS WITH THE CITY OF ROSEVILLE.
5. PROPERTY LINE BEARINGS AND DISTANCES AS WELL AS SITE AREA CALCULATIONS ARE PROVIDED FOR ZONING AND PERMIT REVIEW ONLY. REAL PROPERTY LEGAL DESCRIPTIONS AND AREA CALCULATIONS ARE TO BE PROVIDED BY A REGISTERED PROFESSIONAL SURVEYOR.
6. PROPERTY CORNER SURVEY MONUMENTS, WHICH ARE IN DANGER OF BEING DISTURBED OR DESTROYED BY THE WORK OF THIS PROJECT, SHALL BE TIED-OUT BY A REGISTERED PROFESSIONAL SURVEYOR PRIOR TO THE BEGINNING OF ANY CONSTRUCTION, AND SHALL BE RE-SET IN ACCORDANCE WITH STATE LAW, IMMEDIATELY FOLLOWING THE COMPLETION OF ALL CONSTRUCTION
7. ADA REQUIREMENTS - ALL ACCESSIBLE ROUTES AND PARKING SPACES, AISLES, RAMPS, ETC. SHALL BE IN COMPLIANCE WITH THE CURRENT OSSC REQUIREMENTS AND ANSI-A117.1-2009 (ADAAG).
ADDITIONAL DESIGN PARAMETERS:
 - 7.1. MAXIMUM RAMP SLOPE SHALL NOT EXCEED 7.5%
 - 7.2. MAXIMUM WALK CROSS-SLOPE SHALL NOT EXCEED 1.5%
 - 7.3. MAXIMUM LANDING SLOPE SHALL NOT EXCEED 1.5%
 - 7.4. NO PORTION OF ADA PARKING SPACES AND AISLES SHALL EXCEED 2.0%

1. ATTENTION EXCAVATORS: OREGON LAW REQUIRES YOU TO FOLLOW RULES ADOPTED BY THE OREGON UTILITY NOTIFICATION CENTER. THOSE RULES ARE SET FORTH IN OAR 952-001-0010 THROUGH OAR 952-001-0090. YOU MAY OBTAIN COPIES OF THESE RULES FROM THE CENTER BY CALLING 811 OR 1-800-332-2344. IF YOU HAVE ANY QUESTIONS ABOUT THE RULES, YOU MAY CONTACT THE CALL CENTER. YOU MUST NOTIFY THE CENTER AT LEAST 2 BUSINESS DAYS, BUT NOT MORE THAN 10 BUSINESS DAYS, BEFORE COMMENCING AN EXCAVATION. CALL 811 OR 1-800-332-2344.
2. ALL NEW CONTOURS SHOWN ARE FINISH GRADES, UNLESS OTHERWISE NOTED.
3. ORGANIC AND UNDESIRABLE MATERIAL SHALL BE REMOVED FROM THE CONSTRUCTION AREA AS DIRECTED BY THE ENGINEER.
4. ALL DISTURBED AREAS NOT LANDSCAPED ARE TO BE HYDROSEEDDED OR BEDDED IN STRAW TO PREVENT EROSION. SEE EROSION CONTROL PLAN.
5. ALL FILL AREAS SHALL BE STRIPPED OF ORGANIC MATERIAL. FILL WILL BE PLACED IN 6 TO 8-INCH LIFTS AND COMPACTED TO 95 PERCENT RELATIVE MAXIMUM DENSITY ACCORDING TO ASTM D-1557 STANDARDS. BASE ROCK IN THE PAVED AREAS WILL BE COMPACTED TO 95% ASTM D-1557. LANDSCAPED AREAS WILL BE COMPACTED TO 90 PERCENT. ADDITIONAL COMPACTION TESTS MAY BE REQUIRED BY THE CITY OR THE ENGINEER OF RECORD, IF POOR COMPACTION EFFORTS ARE OBSERVED DURING CONSTRUCTION. COMPACTION REPORTS FROM A REPUTABLE TESTING LAB WILL BE SUPPLIED TO THE ENGINEER.
6. INTERIOR SIDE SLOPES SHALL BE 3 HORIZONTAL TO 1 VERTICAL IN WATER QUALITY/DETENTION POND, TYPICAL.
7. TOPSOIL STRIPPINGS SHALL BE REPLACED IN LANDSCAPING AREAS AFTER SITE GRADING HAS BEEN COMPLETED.

GRADING PLAN SE

- ATTENTION EXCAVATORS: CALIFORNIA LAW REQUIRES YOU TO FOLLOW RULES ADAPTED BY DIGITALITY. YOU MUST NOTIFY DIGITALITY AT LEAST 2 BUSINESS DAYS BEFORE COMMENCING AN EXCAVATION. CALL 811 OR 1-800-422-4133.
2. THE WORKING DRAWINGS ARE GENERALLY DIAGRAMMATIC. THEY DO NOT SHOW EVERY OFFSET, BEND OR ELBOW REQUIRED OR INSTALLATION OF THE UTILITIES SHOWN. THE DRAWINGS DO NOT DEPICT EVERY DIMENSION, COMPONENT PIECE, SECTION, JOINT OR FITTING REQUIRED TO COMPLETE THE PROJECT. ALL LOCATIONS FOR WORK SHALL BE CHECKED AND COORDINATED WITH EXISTING CONDITIONS IN THE FIELD BEFORE BEGINNING CONSTRUCTION. EXISTING UNDERGROUND UTILITIES LAYING WITHIN THE LIMITS OF EXCAVATION SHALL BE VERIFIED AS TO CONDITION, SIZE AND LOCATION BY UNCOVERING, PROVIDING SUCH IS PERMITTED BY LOCAL PUBLIC AUTHORITIES WITH JURISDICTION, BEFORE BEGINNING CONSTRUCTION. CONTRACTOR TO NOTIFY ENGINEER IMMEDIATELY IF THERE ARE ANY DISCREPANCIES.
3. BEDDING AND PIPE ZONE BACKFILL SHALL BE PER "PIPE TRENCH EMBEDMENT" DETAIL, SHEET ____.
4. CONTRACTORS SHALL CONTACT CITY OF ROSEVILLE PUBLIC WORKS AT LEAST 2 BUSINESS DAYS, BUT NOT MORE THAN 10 BUSINESS DAYS, BEFORE COMMENCING AN EXCAVATION. CALL () ____.
5. THE MINIMUM HORIZONTAL SEPARATION BETWEEN SEWER LINES & PUBLIC WATER LINES SHALL BE 10-FT.
6. EXCAVATED SEWER TRENCH SPOIL MATERIAL SHALL BE TESTED AND LEGALLY DISPOSED OF AT A PROPER LANDFILL OR OTHER APPROPRIATE LOCATION.
7. ALL SEWER TRENCH LINES AND EXCAVATIONS SHALL BE PROPERLY SHORED AND BRACED TO PREVENT CAVING. UNUSUALLY DEEP EXCAVATIONS MAY REQUIRE EXTRA SHORING AND BRACING. ALL SHEETING, SHORING, AND BRACING OF TRENCHES SHALL CONFORM TO OREGON OCCUPATIONAL SAFETY AND HEALTH DIVISION (OSHA) REGULATIONS AND THE CITY OF ROSEVILLE STANDARD CONSTRUCTION SPECIFICATIONS.
8. CONTRACTOR SHALL NOTIFY AND COORDINATE WITH PRIVATE UTILITIES FOR RELOCATION OF CONDUITS, POWER POLES, VAULTS, PEDESTALS, ETC.
9. ALL EXISTING FACILITIES SHALL BE MAINTAINED BY THE CONTRACTOR UNLESS OTHERWISE SHOWN OR DIRECTED. CONTRACTOR SHALL TAKE ALL PRECAUTIONS NECESSARY TO SUPPORT, MAINTAIN, OR OTHERWISE PROTECT EXISTING UTILITIES AND OTHER FACILITIES AT ALL TIMES DURING CONSTRUCTION. CONTRACTOR SHALL LEAVE EXISTING FACILITIES IN AN EQUAL OR BETTER-THAN-ORIGINAL CONDITION.
10. PRIOR TO CONSTRUCTION, THE CONTRACTOR SHALL VERIFY THE LOCATION, SIZE & DEPTH OF EXISTING UTILITIES. NOTIFY ENGINEER IMMEDIATELY OF ANY DISCREPANCIES.
11. ALL SANITARY DRAINAGE, RAIN DRAIN AND STORM SEWER PIPING INSTALLED WITHIN 5-FT OF THE OUTSIDE OF THE BUILDING SHALL BE CAST IRON, SCHEDULE 40 ABS-D.W.V., SCHEDULE 40 PVC-D.W.V. OR OTHER MATERIAL AS APPROVED BY THE OREGON AMENDMENTS TO THE UNIFORM PLUMBING CODE.
12. HORIZONTAL STORM AND SANITARY DRAINAGE PIPE SHALL BE PROVIDED WITH A CLEANOUT AT ITS UPPER TERMINAL AND EACH RUN OF PIPING, WHICH IS MORE THAN 100 FEET IN TOTAL DEVELOPED LENGTH, SHALL BE PROVIDED WITH A CLEANOUT FOR EACH 100 FOOT, OR FRACTION THEREOF, IN LENGTH OF SUCH PIPING. AN ADDITIONAL CLEANOUT SHALL BE PROVIDED FOR EACH AGGREGATE HORIZONTAL CHANGE OF DIRECTION EXCEEDING 135 DEGREES. THE MAXIMUM DISTANCE ALLOWED BETWEEN MANHOLES IS 300 FEET. ALL REQUIRED CLEANOUTS MAY NOT BE LOCATED ON PLAN.
13. PRIVATE SANITARY SEWER LINES, DENOTED "SAN" OR "SA", SHALL BE PVC 3034 OR APPROVED EQUAL IN ACCORDANCE WITH PROJECT SPECIFICATIONS. USE PVC C900 OR CL52 DIP WHERE COVER IS LESS THAN 15-INCHES FROM PIPE CROWN TO PAVED SURFACE. NOTE: ALL SANITARY PIPING WITHIN 5-FT OF AN EXTERIOR BUILDING WALL SHALL BE SCHEDULE 40 PVC OR OTHER PER APPROVED MATERIALS PER THE UNIFORM PLUMBING CODE.
14. PRIVATE STORM SEWER LINES, DENOTED "STM" OR "ST", SHALL BE PVC 3034, PVC C900, PVC C905, HDPE, CL52 DIP OR APPROVED EQUIVALENT, UNLESS OTHERWISE NOTED. ALL STORM PIPING SHOWN HAS BEEN SIZED FOR A MANNING'S "N" VALUE = 0.013 AND PIPE INVERTS HAVE BEEN DESIGNED USING CONCENTRIC PIPE TO PIPE AND WYE FITTINGS, UNLESS OTHERWISE NOTED.
15. ALL STORM LATERALS SHALL HAVE #10 GAUGE COPPER WIRE OR TRACER TAPE AT 1.5-FT TO 2.0-FT ABOVE THE LATERAL.
16. ALL DOMESTIC (POTABLE) WATER SERVICE LINES OUTSIDE OF THE BUILDING DENOTED "DW" SHALL BE SCHEDULE 40 PVC OR PVC C900 CL150 UNLESS OTHERWISE NOTED. FIRE WATER SERVICE LINES OUTSIDE OF THE BUILDING DENOTED, "FW", "FDC" SHALL BE PVC C900 CL150 UNLESS OTHERWISE NOTED.
17. CONCRETE THRUST BLOCKING AND/OR MECHANICAL RESTRAINTS ("MEGA-LUG" OR EQUIVALENT) SHALL BE PROVIDED AT ALL WATERLINE FITTINGS AS REQUIRED BY THE CITY OF ROSEVILLE. BLOCKING SHALL BE POURED AGAINST UNDISTURBED EARTH AND CLEAR OF JOINT ACCESSORIES. BEARING AREA OF THRUST BLOCK SHALL BE COMPUTED ON THE BASIS OF ALLOWABLE SOIL BEARING PRESSURE. SEE DETAIL SHEET G ____.
18. MINIMUM COVER OVER WATERLINES IS TO BE 36 INCHES AS MEASURED FROM FINISH GRADE TO TOP OF PIPE. MINIMUM VERTICAL SEPARATION BETWEEN WATERLINE AND SANITARY SEWER AT A CROSSING IS 18 INCHES. SANITARY SEWER AT WATERLINE CROSSINGS WITH LESS THAN THE MINIMUM VERTICAL SEPARATION SHALL BE CONSTRUCTED OF DUCTILE IRON PIPE WITH WATERTIGHT JOINTS. IN SUCH CASES THE 18-FOOT LENGTH OF SANITARY SEWER SHALL BE CENTERED AT THE CROSSING.
19. PRIOR TO BEING PLACED IN SERVICE, THE WATERLINE AND SERVICES SHALL BE FLOUSED, STERILIZED, AND RE-FLOUSED, ALL IN ACCORDANCE WITH THE CITY OF ROSEVILLE "PUBLIC WORKS CONSTRUCTION CODE." CITY CREWS WILL TAKE BACTERIOLOGICAL TESTS WHEN SO REQUESTED BY THE CONTRACTOR INSTALLING WATER MAINS. THE REQUEST FOR THESE TESTS SHALL BE MADE THROUGH THE CITY INSPECTOR.
20. PRIOR TO CONSTRUCTION, ALL ON-SITE FIRE WATER SYSTEM LINE SIZES, METER SIZES, DOUBLE CHECK DETECTOR ASSEMBLY (DCDA) SIZES, AND OTHER APPURTENANCES SHOWN ON THE UTILITY PLAN SHALL BE VERIFIED BY THE FIRE PROTECTION ENGINEER FOR THE PROJECT. ANALYSIS OF THE SYSTEM SHALL BE FROM THE NEW FACILITY SERVICE TO THE POINT OF CONNECTION WITH THE PUBLIC WATER SYSTEM. THE MAKES AND MODELS OF ALL SYSTEM COMPONENTS SHALL BE ACCEPTABLE PER WATER DISTRICT LIST OF APPROVED COMPONENTS.

The proposed landscape plant palette consists of low and moderate water use shrubs, groundcover, trees, and ornamental grasses that are considered low maintenance and hardy. Choice of plants is guided by considerations of solar exposure and climate conditions of the site. Plant selection aims for longevity by selecting plants that are long lived varieties of trees, shrubs, groundcover, and grasses.

The Irrigation system will be serviced by a new point of connection. The Irrigation design will consist of low volume point source drip Irrigation. Proposed trees shall utilize bubbler irrigation to encourage deep root watering. The overall Irrigation system will be designed with a smart Irrigation controller. A weather sensor will be used to automatically adjust duration of application in accordance with recent weather conditions based on evapotranspiration. Maximum water allowance will be determined by State code. To also be consistent with the planting design, the Irrigation design will create separate Irrigation stations by hydrozone, locating plants of different water and solar needs into groups.

1. PANES OVER 9 SQUARE FEET AND LESS THAN 18 INCHES ABOVE THE FLOOR WITH TOP EDGE OVER 36 INCHES ABOVE FLOOR AND WITHIN 36 INCHES OF WALKWAY ARE TO BE TEMPERED.
2. ALL GLASS WITHIN 18" OF THE FLOOR IS TO BE TEMPERED.
3. ALL GLASS WITHIN 24" OF ANY DOOR IS TO BE TEMPERED.
4. ALSO SEE SPECIFICATIONS

(FE) FIRE EXTINGUISHER
(SHOWN WITH 75.0' RADIUS CIRCLE)

- 1) FIRE EXTINGUISHER (FE) TO BE MOUNTED ON METAL BRACKET PER MANUFACTURER. (FE) TO BE A MINIMUM 4A-10BC.
- 2) BASED ON NFPA 10 (TABLE E.3.4) THIS BUILDING IS ALLOWED TO HAVE A MAXIMUM OF 6,000 SF. PER FE. (109,200/6,000 = 18 FE'S REQUIRED.) (14) PROVIDED.
- 3) ADDITIONAL FE'S WILL BE INSTALLED IN THE FUTURE OFFICE WITH THE TENANT IMPROVEMENT PERMITS.

1. SEE FOUNDATION PLANS FOR ADDITIONAL DIMENSIONS OF ALL OPENINGS (DOORS, ETC.) THAT ARE NOT SHOWN.
2. VERIFY ALL UTILITY LOCATIONS AT EXIT FROM BUILDING WITH PLUMBING PLANS. COORDINATE ALL INTERIOR AND EXTERIOR UTILITY LOCATIONS PRIOR TO CONSTRUCTION.
3. SEE SITE PLAN (G10) FOR ADDITIONAL INFORMATION ON ITEMS THAT ARE SHOWN OUTSIDE OF BUILDING (WALKS, PARKING, ETC.).
4. DIMENSIONS TAKE PRECEDENCE OVER DRAWING; DO NOT SCALE DRAWING TO DETERMINE ANY LOCATIONS. THE ENGINEER SHALL BE NOTIFIED IF ANY DISCREPANCY OCCURS, PRIOR TO CONTINUING WITH WORK.
5. ALL DIMENSIONS ON PLANS ARE FROM THE OUTSIDE FACE OF EXTERIOR WALLS AND CENTERLINE OF INTERIOR WALLS UNLESS OTHERWISE NOTED.
6. EGRESS PATHS WILL BE INCLUDED WITH THE TENANT IMPROVEMENT PERMITS ONCE THE TENANTS ARE KNOWN AND THEIR RACKS AND/OR EQUIPMENT CAN BE SHOWN.

MARK	DESCRIPTION
①	EXTERIOR STOREFRONT WINDOWS PER SPECIFICATIONS.
②	VAPOR BARRIER UNDER SLAB AT ALL LOCATIONS SHOWN WITH HATCH PATTERN - SEE SPECIFICATIONS FOR TYPE.
③	ELECTRICAL ROOM PER SHEET A7.01 (2,000 AMP SERVICE).
④	FIRE PUMP ROOM PER SHEET A7.01.
⑤	FINISH SIDEWALKS AROUND THE BUILDING AS NOTED ON THE SITE PLANS (SHEETS G1.1 THROUGH G1.4).
