The City of Roseville (“City”) annually levies and collects special assessments in order to maintain the certain public improvements within the Olympus Pointe Landscaping and Lighting District (“District”) within the City. The District, which was formed in 1989, is levied annual assessments pursuant to the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code (the “1972 Act”).

The Engineer’s Report (“Report”) describes the District boundaries, any new annexations, improvements maintained by the District and the proposed assessments for the period of July 1, 2023 through June 30, 2024.

The District consists of two (2) benefit Zones (“Zones”). The improvements that benefit properties within each Zone and the costs associated with those improvements are identified and budgeted separately. Each parcel within a Zone is assessed proportionately for only those improvements and services that are a direct and special benefit to the properties within the respective Zone. The assessments are based on the historical and estimated cost to maintain the improvements that provide a direct and special benefit to properties within the District.

The word “parcel,” for the purposes of this Report, refers to an individual property assigned its own Assessor’s Parcel Number (“APN”) by the Placer County Assessor’s Office.

Following approval of the Report, the City Council will by resolution, order the improvements to be made, if any, and confirm the levy and collection of assessments herein pursuant to the 1972 Act. The assessment rates and method of apportionment described in this Report as approved or modified by the City Council define the assessments to be applied to each parcel within the District and respective Zones for Fiscal Year (“FY”) 2023/24. The assessments as approved will be submitted to the Placer County Auditor/Controller to be included on the property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved by the City Council.

## **B. COMPLIANCE WITH CURRENT LEGISLATION**

All assessments described in this Report and approved by the City Council are prepared in accordance with the 1972 Act and are in compliance with the substantive and procedural requirements of the California State Constitution Articles XIII C and XIII D (“Article XIII C” and “Article XIII D”) and the provisions of the Proposition 218 Omnibus Implementation Act [Government Code Section 53750 and following] (the “Implementation Act”). Articles XIII C and XIII D and the Implementation Act collectively are hereinafter referred to as “Proposition 218”.

The District’s Maximum Assessment Rates for all Zones and the Inflationary Adjustment Factor were previously approved and confirmed through property owner ballot proceedings and as such, comply with the provisions of Proposition 218.

Pursuant to the 1972 Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments, to review the Engineer’s Annual Levy Report prior to approving the annual assessments to be levied on the County tax rolls.

## **C. CLARIFICATION OF ZONE DESIGNATIONS**

In order to increase consistency with the City’s other districts and to facilitate presentation within the Engineer’s Report, the names of both Zones were redesignated, commencing with FY 2007/2008, as follows:

- The “Non-Residential/Multi-Family Residential Zone” was redesignated to “Zone A.” <sup>(1)</sup>
- The “Residential Zone” was redesignated to “Zone D.” <sup>(2)</sup>

(1) Prior to FY 2005/2006, this territory was known as “Zone A”. In FY 2005/2006, Zone A was redesignated to the “Non-Residential/Multi-Family Residential Zone”.

(2) Prior to FY 2005/2006, this territory was known as “Zones B & C”. In FY 2005/2006, Zones B & C were combined and redesignated to the “Residential Zone”.

#### **D. GENERAL DESCRIPTION OF DISTRICT**

The Olympus Pointe Landscaping and Lighting District is located in the City of Roseville at the southerly edge of Placer County, northeast of the intersection of Interstate 80 and Douglas Boulevard. The site is generally bounded by Interstate 80 on the west, East Roseville Parkway and Olympus Drive to the north, Douglas Boulevard to the south and Sierra College Boulevard to the east. See Appendix A for a rendering of the District boundary map.

The District consists of two zones as described below. These zones were established by the City through a District reengineering commencing with the FY 2005/2006 levy. Additional information regarding the reengineering is provided in Section III of the Report.

##### **Zone A**

Zone A includes land zoned for non-residential and multi-family residential uses. The Zone comprises the majority of the District and is primarily west and south of East Roseville Parkway, east of Interstate 80 and north of Douglas Boulevard. This Zone contains 581.78 acres of assessable land that was originally designated as “Zone A.” The area was then redesignated as the “Non-Residential/Multi-Family Zone” commencing with the FY 2005/06 and then redesignated back to “Zone A” commencing with the FY 2007/08 levy.

##### **Zone D**

Zone D includes two single-family residential developments on the eastern side of the District. The Zone is bisected by Olympus Drive and Sierra College Boulevard on the District’s eastern boundary and includes 468 developed single-family residences. Originally, each residential development was designated as separate zone (Zones B and C). The area was redesignated as the “Residential Zone” commencing with the FY 2005/2006 levy and then redesignated to the “Zone D” commencing with the FY 2007/2008 levy.

#### **E. IMPROVEMENTS AUTHORIZED BY THE 1972 ACT**

As applicable or may be applicable to a proposed District, the 1972 Act defines improvements to mean one or any combination of the following:

- The installation or planting of landscaping.
- The installation or construction of statuary, fountains, and other ornamental structures and facilities.
- The installation or construction of public lighting facilities.
- The installation or construction of any facilities which are appurtenant to any of the foregoing or which are necessary or convenient for the maintenance or

servicing thereof, including, but not limited to, grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities.

- The maintenance or servicing, or both, of any of the foregoing.
- The acquisition of any existing improvement otherwise authorized pursuant to this section.

Incidental expenses associated with the improvements including, but not limited to:

- The cost of preparation of the report, including plans, specifications, estimates, diagram, and assessment;
- The costs of printing, advertising, and the publishing, posting, and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;
- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
- Any expenses incidental to the issuance of bonds or notes pursuant to Section 22662.5.
- Costs associated with any elections held for the approval of a new or increased assessment.

The 1972 Act defines "Maintain" or "maintenance" to mean furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement, including:

- Repair, removal, or replacement of all or any part of any improvement.
- Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury.
- The removal of trimmings, rubbish, debris, and other solid waste.
- The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Furthermore, the 1972 Act specifies that where the cost of improvements (other than maintenance and operations) is greater than can be conveniently raised from a single annual assessment, an assessment to be levied and collected in annual installments. In that event, the governing body may choose to do any of the following:

- Provide for the accumulation of the moneys in an improvement fund until there are sufficient moneys to pay all or part of the cost of the improvements.
- Provide for a temporary advance to the improvement fund from any available and unencumbered funds of the local agency to pay all or part of the cost of the

improvements and collect those advanced moneys from the annual installments collected through the assessments.

- Borrow an amount necessary to finance the estimated cost of the proposed improvements. The amount borrowed, including amounts for bonds issued to finance the estimated cost of the proposed improvements.

## **F. DESCRIPTION AND LOCATION OF IMPROVEMENTS**

This District, through the levy special assessments, provides funding for the maintenance and operation of the following improvements located within the public rights-of-way and dedicated easements: project identification signs, including surrounding landscape and hardscape; special street materials; sculptures and sculpture park; special street signs; special lighting for the project identification signs and special illuminated street signs; and landscaped street medians (the “Improvements”). The specific locations of the improvements within the district are described as follows:

### **1. Zone A**

#### **a. Landscaped Median Islands:**

- Eureka Road from Douglas Boulevard to Taylor Road Connector
- Sunrise Avenue from southern boundary of the Northeast Roseville Specific Plan (the “NERSP”) to East Roseville Parkway
- East Roseville Parkway from Douglas Boulevard to Rocky Ridge Drive
- Douglas Boulevard from eastern boundary of NERSP to Rocky Ridge Drive

#### **b. Project identification signs (granite entryways) and special paving materials:**

- Eureka Road at Douglas Boulevard
- East Roseville Parkway at Douglas Boulevard
- Eureka Road at Taylor Road

#### **c. Sculpture and Sculpture Park:**

- Aris Demetrio’s original sculpture located on Parcel 14
- Sculpture park (0.85 acres located on Parcel 14)

#### **d. Special street signs:**

- Eureka Road at Sunrise Avenue, Rocky Ridge Drive, Lead Hill Drive and Douglas Boulevard
- Lead Hill Drive at Rocky Ridge Drive
- Sunrise Avenue at Auto Mall entrance
- East Roseville Parkway at Taylor Road, Lead Hill Drive, Olympus Drive and Douglas Boulevard

- Olympus Drive at Sierra College Boulevard:

## **2. Zone D**

### **a. Landscaped Frontage:**

- Southern side of Olympus Drive from East Roseville Parkway to Sierra College Boulevard, excluding any landscaping not within or adjacent to the Zone
- Northern side of Olympus Drive from the Zone boundary (the former Zone C boundary), which is 175 feet southwest of Corniche Lane, to Sierra College Boulevard, western side of Sierra College Boulevard from Olympus Drive to the Zone boundary (the former Zone C boundary), which is approximately 600 feet.

### **b. Project identification signs and special paving materials:**

- Sierra College Boulevard at Olympus Drive

## **G. DESCRIPTION OF MAINTENANCE AND SERVICES**

Maintenance means the furnishing of services and materials for the ordinary and usual maintenance, operation and servicing of the Improvements and appurtenant facilities, including repair, removal or replacement of all or part of any of Improvements or appurtenant facilities; providing for the life, growth, health and beauty of the Improvements including cultivation, irrigation, trimming, mowing, spraying, fertilizing and treating for disease or injury; the removal of trimmings, rubbish, debris and other solid waste.

Servicing means the furnishing of water and electricity for the Improvements including any decorative lighting and the furnishing of electric current or energy, gas, or other illuminating agent for the special street signs.

## II. METHOD OF APPORTIONMENT

---

### A. GENERAL

The Act permits the establishment of assessment districts by public agencies for the purpose of providing certain public improvements, which include the construction, maintenance, and servicing of streetlights, traffic signals and landscaping facilities. Streets and Highways Code Section 22573 requires that maintenance assessments be levied according to benefit rather than the assessed value.

*“The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements.”*

In addition, Article XIID and the Implementation Act require that a parcel’s assessment may not exceed the reasonable cost for the proportional special benefit conferred to that parcel. Article XIID and the Implementation Act further provide that only special benefits are assessable and the City must separate the general benefits from the special benefits. They also require that publicly owned properties, which specifically benefit from the improvements, be assessed.

### B. BENEFIT ANALYSIS

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIID addresses several key criteria for the levy of assessments, notably:

Article XIID Section 2d defines District as follows:

“District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service;”

Article XIID Section 2i defines Special Benefit as follows:

“Special benefit” means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute “special benefit.”

Article XIID Section 4a defines proportional special benefit assessments as follows:

“An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel

shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel.”

The City initiated and conducted property owner protest ballot proceedings in accordance with Article XIID and the Implementation Act for both the Non-Residential/Multi-Family Zone (Zone A) and the Residential Zone (Zone D). Each Zone’s Improvements, the associated costs and assessments had been reviewed, identified, and allocated based on special benefit pursuant to the provisions of the Constitution and Act.

All Improvements associated with these Zones have been identified as necessary, required and/or desired for the orderly development of the properties to their full potential. As such, these Improvements would be necessary and required of individual property owners for the development of such properties and the ongoing operation, servicing and maintenance of these Improvements would be the financial obligation of those properties. Therefore, the Improvements and the annual costs of ensuring the maintenance and operation of the Improvements are of direct and special benefit to the properties.

The method of apportionment (method of assessment) is based on the premise that each of the assessed parcels within these Zones receives special benefit from the Improvements maintained and financed by the assessments. Specifically, the assessments associated with the Zones are for the maintenance of the Improvements installed as part of the original development of the parcels within the Zones. The desirability and security of properties within each Zone is enhanced by the close proximity of these amenities to those properties.

The annual assessments outlined in this Report are proposed to cover the estimated costs to provide all necessary service, operation, administration, and maintenance required to keep the Zone Improvements in a healthy, vigorous, and satisfactory condition.

The special benefits associated with these improvements are specifically:

- Enhanced desirability of properties through association with the improvements.
- Improved aesthetic appeal of properties within the Zones providing a positive representation of the area.
- Enhanced adaptation of the urban environment within the natural environment from adequate green space and landscaping.
- Environmental enhancement through improved erosion resistance, and dust and debris control.

- Increased sense of pride in ownership of property within the District resulting from well-maintained improvements associated with the properties.
- Reduced criminal activity and property-related crimes (especially vandalism) against properties in the District through well-maintained surroundings and amenities including abatement of graffiti.
- Enhanced environmental quality of the parcels within the Zones by moderating temperatures, providing oxygenation, and attenuating noise.

All of the preceding special benefits allowed the property to be developed for the enjoyment of the property owners and contribute to an ongoing specific enhancement and desirability of each of the assessed parcels within the Zones.

The improvements are for the special benefit, enhancement, and use of properties within the Zones. Although the improvements include public easements, rights-of-way, streets, and other amenities available or visible to the public at large, the construction and installation of these Improvements were only necessary for the development of properties within the Zones and were not required nor necessarily desired by any properties or developments outside the Zone's boundaries. Therefore, any public access or use of the Improvements by others is incidental and there is no measurable general benefit to properties outside the Zones or to the public at large. In making this determination, it should be noted that all parkway and perimeter landscaping within the City is both funded and maintained by a special district, individual property owners or through some type of association.

### C. ASSESSMENT METHODOLOGY

To establish the special benefit to the individual lots and parcels within the District an Equivalent Benefit Unit ("EBU") system is used. The EBU method of apportioning benefit is typically seen as the most appropriate and equitable assessment methodology for districts formed under the Act, as the benefit to each parcel from the Improvements are apportioned as a function of land use type, size, and development. Acreage of common area parcels shall be apportioned to the remaining assessable parcels of a subdivision and/or parcel split(s) related to the creation of the common area parcel(s).

**EBU Application Table**

| Land Use                  | EBU per Unit/Acre |
|---------------------------|-------------------|
| Single Family Residential | 1.00 per Unit     |
| Multi-Family Residential  | 1.00 per Acre     |
| Non-Residential           | 1.00 per Acre     |
| Exempt                    | 0.00 per Acre     |

## 1. Definitions and Formulas Related to the Product Type EBU Method

Single-Family Residential — This land use is defined as a fully subdivided residential parcel that is part of a final tract map.

Multi-Family Residential — This land use is defined as a residential parcel anticipated to have or has more than one residential unit.

Non-Residential — Parcels that are not considered Single Family Residential, Multi-Family Residential or Exempt.

Exempt Parcels — This land use identifies properties that are not assessed and are assigned 0.0 EBU per acre. This land use classification may include, but is not limited, to lots or parcels identified as public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas, greenbelts, parkways, park properties and other publicly owned properties that are part of the District Improvements. These types of parcels are considered to receive little or no benefit from the Improvements and are therefore exempted from assessment.

## 2. Zone Benefit Formula

The benefit formula applied to parcels within each Zone is based on the preceding Equivalent Benefit Unit (EBU) Application Table. Each parcel's EBU correlates the parcel's special benefit received as compared to all other parcels benefiting from the Improvements.

The following formula is used to calculate the EBU for each parcel (proportional benefit).

$$\text{Parcel Type EBU} \times \text{Units/Acres} = \text{Parcel EBU}$$

The total number of Equivalent Benefit Units (EBUs) is the sum of all individual EBUs applied to parcels within each Zone that receive a special benefit from the Improvements. An assessment amount per EBU (Assessment Rate) for each Zone is established by taking the total costs associated with the Zone's Improvements and dividing that amount by the total number of EBUs within each Zone of all parcels benefiting from those Improvements. This Rate is then applied back to each individual parcel based on their assigned EBUs to determine the parcel's proportionate special benefit and assessment obligation from those Improvements.

$$\text{Zone Budget/ Total EBU} = \text{Assessment per EBU}$$

$$\text{Assessment per EBU} \times \text{Parcel EBU} = \text{Maximum Parcel Assessment Amount}$$

#### D. ASSESSMENT RANGE FORMULA

The purpose of establishing an Assessment Range Formula is to provide for reasonable increases and inflationary adjustment to annual assessments rather than initiating protest ballot proceedings to approve small increases in annual costs. This District provides for an annual adjustment to the Maximum Assessment Rate in an amount equal to three percent (3%).

The Maximum Assessment Rate is adjusted annually and is calculated independent of the District's annual budget and proposed annual assessment. Any proposed annual assessment rate (less than or equal to this Maximum Assessment Rate) is not considered an increased assessment, even if the proposed assessment is greater than the assessment applied in the prior fiscal year.

Although the Maximum Assessment Rate will increase each year, the actual assessment rate may go up and down as compared to the previous year(s). The Maximum Assessment Rate adjustment is designed to allow for the adjustment of the annual assessment for inflation in order to maintain the original purchasing power of the District budget. The Maximum Assessment Rate calculated each year does not require or facilitate an increase to the annual assessment and neither does it restrict assessments to the adjusted maximum amount. If the budget and assessment for the fiscal year do not require an increase, or the increase is less than the adjusted Maximum Assessment Rate, then the required budget and assessment may be applied without additional property owner balloting. If the budget and assessments calculated requires an increase greater than the adjusted Maximum Assessment Rate, then the assessment is considered an increased assessment and would be subject to Proposition 218 balloting requirements.

#### E. BASE MAXIMUM ASSESSMENT RATES

The base assessment rates and the annual inflationary adjustment to each Zone are listed in the table below:

| Zone   | Base Year  | Base Year Maximum Assessment Rate per EBU | Annual Inflationary Adjustment <sup>(1)</sup> |
|--------|------------|-------------------------------------------|-----------------------------------------------|
| Zone A | FY 2005/06 | \$296.65                                  | 3.00%                                         |
| Zone D | FY 2005/06 | \$99.76                                   | 3.00%                                         |

(1) The Annual Inflationary Adjustment commences with the Fiscal Year 2006/2007 assessments.

### III. DISTRICT BUDGET

#### A. FY 2023/24 BUDGET

| DESCRIPTION                                        | ZONE A<br>Fund 2006  | ZONE D<br>Fund 2007  |

## D. DESCRIPTION OF BUDGET ITEMS

Description of the terms used in the preceding Budget, Assessment Rates and Fund Balance tables are listed below:

### BUDGET:

#### DIRECT COSTS

**Contract Maintenance - Landscaping** – Includes all regularly scheduled contract labor, materials, supplies, and equipment required to properly maintain and ensure the satisfactory condition or maintenance of all landscaping improvements, irrigation, and related drainage systems, as well as maintenance of appurtenant facilities (the “improvements”). The costs to maintain improvements within the District’s entryway areas are not included in this amount.

**Contract Maintenance - Parks** - Includes all regularly scheduled contract labor, materials, supplies, and equipment required to properly maintain and ensure the satisfactory condition or maintenance of park improvements, as well as maintenance of appurtenant facilities (the “improvements”).

**Repair & Maintenance - Landscaping/Parks** - This line item includes repairs or maintenance items that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism, storms, etc.

**Maintenance - Parks City Staff** - This line item includes maintenance items that are performed by the Parks staff.

**Repair & Maintenance – Tree Work** - This line item includes annual costs for tree maintenance not included in the annual contract maintenance portion of the budget. If zero, this line item may not be shown in the budget.

**Utilities** - The furnishing of water and electricity required for the operation and maintenance of the improvements.

**Rehab Reserve Expenditures - Non-Routine Tree Work** – Expected costs to maintain trees other than costs of annual repair and maintenance. If zero, this line item may not be shown in the budget.

**Rehab Reserve Project Expenditures** – Expected costs for installation, replacement, or planned upgrades of District improvements for the current year that were previously funded or accumulated in the Rehabilitation Reserve. The Rehabilitation Reserve is used to accumulate funds for costs associated with the future rehabilitation or replacement of District improvements that cannot be conveniently raised from a single year’s assessment. If zero, this line item may not be shown in the budget.

## **ADMINISTRATION COSTS**

**City Administration** – Estimated costs incurred by the City Finance Department and other Departments in preparing the annual budget for the Engineer’s Report, together with other financial information required to determine the annual assessment. These costs would also include the preparation, posting and publishing of public notices required for City Council action relating to the District, as well as costs to perform legal review of documents.

**Contract Administration – Park’s Dept** – Estimated Costs of Park and Recreation Department staff to coordinate and oversee the maintenance contracts and overall repair and maintenance of the District. This amount also includes the cost of the Department’s estimates and analysis of certain budget items, estimated costs and useful lives of certain District Improvements.

**County Auditor Fees** - A fee of 1% of the total levy amount that is charged to the District by the County for placing assessments on property tax bills.

**Consulting and Professional Services** – Includes the costs and expenses of contracting with various professionals to provide legal, engineering and district administration services directly related to the District, including the calculation of the annual assessment amounts and the preparation of the Engineer's Report.

**Public Hearing Publishing Costs** –Includes the out-of-pocket costs to publish public notices required for City Council action relating to the District.

**Total Direct and Administration Costs** – The total expected costs of the District.

### **BUDGET ADJUSTMENTS**

**Replenishment/(Use) of Operating Reserve** – A “Replenishment” increases the levy in order to replenish the Operating Reserve. On the other hand, a “Use” of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the budget. Further information regarding the function of the Operating Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

**Contribution for / (Use of) Rehab Reserve** — A “Contribution” increases the levy in order to generate funding for the Rehabilitation Reserve. This reserve allows for the accumulation of funds for possible rehabilitation projects or replacements in future years. On the other hand, a “Use of” of the Rehabilitation Reserve provides current year funding of rehabilitation projects or replacements from available funds within the Rehabilitation Reserve. If zero, this line item may not be shown in the budget. Further information regarding the function of the Rehabilitation Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

**Rounding Adjustment** – The necessary rounding adjustment(s) due to limitations of the County property tax system that requires even penny levy amounts to be placed on the secured tax roll.

**BALANCE TO LEVY** - This is the total amount to be levied and collected through assessments for the current fiscal year for each zone. The Balance to Levy represents the sum of the total District costs together with any applicable adjustments to the budget as described above.

### **ASSESSMENT RATES:**

**Total Assessable Acreage** - The total acreage within each zone expected to be assessed in the current fiscal year.

**Total Assessable Units** - The total number of assessable single-family units within each zone expected to be assessed in the current fiscal year.

**Total Equivalent Benefit Units (“EBUs”)** - Total assessable EBUs within the District for the current fiscal year. Each assessable parcel is assigned EBUs as shown in Section II C of this Report.

**Applied Assessment Rate per Equivalent Benefit Unit (EBU)** - The assessment rate per EBU to be applied to the applicable Zone for the current fiscal year.

**Maximum Assessment Rate per Equivalent Benefit Unit (EBU)** - The maximum assessment rate per EBU that can be applied to the applicable Zone for the current fiscal year.

**Potential Maximum Assessment Per Zone** – The total amount that can be assessed to all parcels within each Zone for the current fiscal year based upon the expected number of assessable units and acres.

## **FUND BALANCE INFORMATION:**

### **OPERATING RESERVE**

**Beginning Operating Reserve Balance 7-1-2023 (est.)** - The anticipated beginning balance of cash and receivables net of any unpaid prior year obligations for each Zone. These beginning balances shall be used to fund each Zone’s expenditures from July 1, 2023 to December 31, 2023, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District’s fiscal year and the receipt of the collections from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

**Replenish from FY 2023/24 Levy** – This amount is added to the FY 2023/24 levy in order to replenish the Operating Reserve. Due to the six-month delay from the District’s receipt of assessment collections, the Operating Reserve balance shall be sufficiently funded to provide for expenditures from the period of July 1, 2023 (the beginning of the Fiscal Year) through December 31, 2023. If zero, this line item may not be shown in the budget.

**Use for FY 2023/24 Expenses** – The amount of the Operating Reserve to be used to fund FY 2023/24 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve Balance to an amount no greater than the expected District costs for the period of July 1, 2023 (the beginning of the Fiscal Year) through December 31, 2023. If zero, this line item may not be shown in the budget.

**Transfer from/(to) the Rehab Reserve** — The amount of Operating Reserve monies to be transferred to or from the Rehabilitation Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

**Ending Operating Reserve Balance 6-30-2024 (est.)** - This amount represents the anticipated Operating Reserve balance/(deficit) for each Zone as of June 30, 2024. The size of each Zone's Operating Reserve is limited by Streets and Highways Code 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance, service and incidental expenses from the first day of the fiscal year (July 1) to the date that the Agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each Zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

### **REHABILITATION RESERVE**

**Beginning Rehab Reserve Balance 7-1-2023 (est.)** — The projected balance of funds in the Rehabilitation Reserve as of July 1, 2023. Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

**Collect from FY 2023/24 Levy** — This amount is added to the FY 2023/24 levy to accumulate funding of future year rehabilitation projects, replacements, restorations or upgrades of District improvements. If zero, this line item may not be shown in the budget.

**Use for FY 2023/24 Rehab Projects** – The amount of Rehabilitation Reserve monies expected to be transferred out of the Rehabilitation Reserve to fund the costs of installation, replacement, or planned upgrades of District improvements for the current year. If zero, this line item may not be shown in the budget.

**Transfer from/(to) the Operating Reserve** — The amount of Rehabilitation Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department, in

order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

**Ending Rehab Reserve Balance 6-30-2024 (est.)** - The projected balance of funds in the Rehabilitation Reserve as of June 30, 2024. These funds shall be used to provide for future year rehabilitation projects, replacements, restorations, or upgrades of District improvements which cannot be conveniently raised from a single year's assessment.

Should the District have no Rehabilitation Reserve or related activity, the Rehabilitation Reserve information may not be presented in the Report.

## **E. REHABILITATION RESERVE – CAPITAL IMPROVEMENT PLAN**

*Streets and Highways Code 22660* allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

The Report provides a five-year Capital Improvement Plan ("CIP") which shows projected expenditures by Zone related to the rehabilitation, restoration and/or replacement of District improvements, and other allowable costs. The Current Fiscal Year CIP is shown in the preceding Budget Section A. The projected CIP costs for the remaining four years are shown in the table below.

### **Zone A**

| Description                                                                       | FY<br>2024-25   | FY<br>2025-26   | FY<br>2026-27   | FY<br>2027-28   | 4 Year<br>Total  |

| Replace, repair, renovate and/or refurbish plants, landscapes & related materials |                 | 2,500           |                 |                 | 2,500            |
| <b>Total Projected Expenditures</b>                                               | <b>\$18,000</b> | <b>\$18,100</b> | <b>\$45,500</b> | <b>\$22,000</b> | <b>\$103,600</b> |

### **Zone D**

| Description                                                                      | FY<br>2024-25   | FY<br>2025-26   | FY<br>2026-27   | FY<br>2027-28   | 4 Year<br>Total |
|----------------------------------------------------------------------------------|-----------------|-----------------|-----------------|-----------------|-----------------|
| Rehabilitate, renovate and/or replace project entryway improvements              | \$6,000         | \$6,000         | \$6,000         | \$6,000         | \$24,000        |
| Non-routine tree work                                                            | 5,000           | 5,000           | 5,000           | 5,000           | 20,000          |
| Replace irrigation controller(s)                                                 | 10,000          | 10,000          | 10,000          |                 | 30,000          |
| Replace, repair, renovate and/or refurbish plants, landscape & related materials | 2,000           |                 | 2,000           |                 | 4,000           |
| <b>Total Projected Expenditures</b>                                              | <b>\$23,000</b> | <b>\$21,000</b> | <b>\$23,000</b> | <b>\$11,000</b> | <b>\$78,000</b> |

Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements.

## **APPENDIX A – DISTRICT BOUNDARY MAP**

The boundary map for the District has previously been submitted to the Clerk of the City in the format required under the Act and is, by reference, hereby made part of this Report. These District Boundary Maps are available for inspection at the office of the City Clerk during normal business hours.

For general reference purposes, a rendering of the District's Boundaries is presented herein.

## APPENDIX B — FY 2023/24 ASSESSMENT ROLL

Parcel identification, for each lot or parcel within the District, shall be the parcel as shown on the Placer County Assessor's map for the year in which this Report is prepared.

A listing of parcels to be assessed within this District, along with the proposed assessment amounts, may be submitted to the City Clerk, under a separate cover, and by reference is made part of this Report.

Non-assessable lots or parcels may include areas of public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas and rights-of-way, including public greenbelts and parkways; utility rights-of-way; small parcels vacated by the County, bifurcated lots, and other property that cannot be developed, excepting common area parcels. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempt from assessment.

At the conclusion of the public hearing for the District and the proposed assessments, approval of the Report (as submitted or as modified) confirms the method of apportionment and the assessment rate to be levied against each eligible parcel and thereby constitutes the approved levy and collection of assessments for FY 2023/24. The listing of parcels and the amount of assessment to be levied shall be submitted to the County Auditor/Controller and included on the FY 2023/24 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved in this Report. Therefore, if a single parcel has changed to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

**City of Roseville**  
**Olympus Pointe Landscaping & Lighting District**

## RESOLUTION NO. 23-176

### **A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, INITIATING PROCEEDINGS FOR THE ANNUAL LEVY OF ASSESSMENTS FOR THE RIVERSIDE AVENUE LANDSCAPING AND LIGHTING DISTRICT, FOR FISCAL YEAR 2023/2024, PURSUANT TO THE PROVISIONS OF PART 2 OF DIVISION 15 OF THE CALIFORNIA STREETS AND HIGHWAYS CODE**

The City Council of the City of Roseville, California (hereafter referred to as the “City Council”) does resolve as follows:

**WHEREAS**, The City Council has, by previous Resolutions, formed the Riverside Avenue Landscaping and Lighting District (hereafter referred to as the “District”) pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the “Act”), that provides for levy and collection of assessments by the County of Placer for the City of Roseville to pay the maintenance and services of street lighting, landscaping, and all appurtenant facilities and operations related thereto; and,

**WHEREAS**, the City Council has retained Willdan Financial Services (hereinafter “Engineer”) for the purpose of assisting with the establishment of the assessments, the annexation of territory, and to prepare and file an Engineer’s Annual Levy Report (hereinafter referred to as the “Engineer’s Report”) with the City Clerk in accordance with the act, and in accordance with the California Constitution, Articles XIII C and XIII D;

**NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE RIVERSIDE AVENUE LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:**

**Section 1** Engineer’s Report: The City Council hereby orders the Engineer to prepare and file with the City Clerk the Engineer’s Report concerning the levy of assessments for the District in accordance with Chapter 3, Section 22622 of the Act.

**Section 2** Proposed improvements and any substantial changes in existing improvements: The District improvements include: the maintenance, operation of and the furnishing of services, materials and/or improvements for landscape, lighting, streetscape and hardscape areas, other public improvements within the street right of way areas and all appurtenant facilities related thereto as further described in the Engineer’s Report. The Engineer’s Report also describes all new improvements or substantial changes in existing improvements.

## RESOLUTION NO. 23-177

### **A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, DECLARING ITS INTENTION TO LEVY ANNUAL ASSESSMENTS FOR THE RIVERSIDE AVENUE LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2023/2024**

The City Council of the City of Roseville, California (hereafter referred to as the “City Council”) does resolve as follows:

**WHEREAS**, The City Council has, by previous Resolutions, formed the Riverside Avenue Landscaping and Lighting District (hereafter referred to as the “District”), and initiated proceedings for Fiscal Year 2023/2024, pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the “Act”) that provides for the levy and collection of assessments by the County of Placer for the City of Roseville to pay the maintenance, operation and servicing of all improvements and facilities related thereto; and,

**WHEREAS**, the City Council has retained Willdan Financial Services for the purpose of assisting with the Annual Levy of the District, and to prepare and file a report (hereinafter referred to as the “Engineer’s Report”) with the City Clerk in accordance with the Act; and,

**NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE RIVERSIDE AVENUE LANDSCAPING AND LIGHTING DISTRICT, PURSUANT TO CHAPTER 3, SECTION 22624 OF THE ACT, AS FOLLOWS:**

**Section 1** Intention: The City Council hereby declares that it is its intention to seek the Annual Levy of the District pursuant to the Act, over and including the land within the District boundary, and to levy and collect assessments on all such land to pay the annual costs of the improvements.

**Section 2** Proposed improvements and any substantial changes in existing improvements: The District improvements include: the maintenance, operation of and the furnishing of services, materials or improvements for landscape, lighting, streetscape and hardscape areas, including monuments, landmark and gateway features, bulb-outs, walls, fencing, signage, special lighting, paving, transit facilities, ground cover, shrubs, plants, trees, irrigation and drainage systems, other public improvements within the street right of way areas and all appurtenant facilities related thereto as further described in the Engineer’s Report. The Engineer’s Report also describes all new improvements or substantial changes in existing improvements.

**Section 3** Boundaries and Designation: The boundaries of the District are described as the boundaries previously defined in the formation documents of the original District. The District is known and designated as:

**“Riverside Avenue Landscaping and Lighting District”**

**Section 4** Proposed Assessment Amounts: The proposed assessments are outlined in the Report. District Assessments are calculated in accordance with the method of apportionment established for the District and do not exceed the assessment rates and annual inflationary adjustment previously authorized by City Council and approved by the property owners in accordance with the provisions of the California State Constitution, Article XIID.

**Section 5** Public Hearing(s): The City Council hereby declares its intention to conduct a Public Hearing annually concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22626* of the Act.

**Section 6** Notice: The City Clerk shall give notice of the time and place of the Public Hearing by causing the publishing of this Resolution once in a local newspaper not less than ten (10) days before the date of the hearing and by posting a copy of this Resolution on the official bulletin board customarily used by the City Council for the posting of notices.

**Section 7** Time and Place of Public Hearing: Notice is hereby given that a Public Hearing on these matters will be held by the City Council on **Wednesday, June 7, 2023 at 6:00 p.m.**, or as soon thereafter as feasible in the regular meeting chambers located at 311 Vernon Street, Roseville, California.

## RESOLUTION NO. 23-178

### **A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR PRELIMINARY APPROVAL OF THE ENGINEER'S ANNUAL LEVY REPORT FOR THE RIVERSIDE AVENUE LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2023/2024**

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

**WHEREAS**, the City Council has, by previous Resolutions, ordered the preparation of an Annual Levy Report (hereafter referred to as the "Engineer's Report") for the district known and designated as the Riverside Avenue Landscaping and Lighting District (hereafter referred to as the "District"), pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereinafter referred to as the "Act"); and,

**WHEREAS**, the City Council has retained Willdan Financial Services (hereinafter "Engineer"), for the purpose of assisting with the establishment of the assessments and to prepare and file an Engineer's Report with the City Clerk in accordance with the Act, and in accordance with the requirements of the California Constitution, Articles XIIC and XIID; and,

**WHEREAS**, there has now been presented to this City Council the Engineer's Report as required by *Chapter 1, Article 4, Section 22566* of said Act; and,

**WHEREAS**, this City Council has carefully examined and reviewed the Engineer's Report as presented, and is preliminarily satisfied with the District, each and all of the budget items and documents as set forth therein, and is satisfied that the assessments, on a preliminary basis, have been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed within the District, as set forth in said Engineer's Report; and,

**NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE RIVERSIDE AVENUE LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:**

**Section 1** That the above recitals are all true and correct.

**Section 2** That the Engineer's Report as presented, consists of the following:

- a. A Description of Improvements
- b. The Annual Budget (Costs and Expenses of Maintenance, Services, Operations and District Administration)
- c. The Assessment Roll containing the Fiscal Year 2023/2024 Levy for each Assessor Parcel within the District

**Section 3** The Engineer's Report is hereby approved on a preliminary basis and ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection.

**Section 4** That the City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation of the Engineer's Report.

Establishment of Annual Rates and Charges for the:

**Riverside Avenue**  
**Landscaping and Lighting District**

City of Roseville  
Placer County, State of California

This Report describes the District and any relevant zones therein, including the improvements, budgets, parcels and assessments to be levied for Fiscal Year 2023/24 as they existed at the time of the passage of the Resolution of Intention. Reference is hereby made to the Placer County Assessor's maps for a detailed description of the lines and dimensions of parcels within the District. The undersigned respectfully submits the enclosed Report as directed by the City Council.

Dated this 12th day of April, 2023

## I. OVERVIEW

---

### A. INTRODUCTION

The City of Roseville (“City”) annually levies and collects special assessments in order to maintain the improvements within the Riverside Avenue Landscaping and Lighting District (“District”). The District was formed in January of 2007 and is levied annual assessments pursuant to *the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code* (“1972 Act”).

The Engineer’s Report (“Report”) describes the District, any new annexations, changes to the District, and the proposed assessments for the period of July 1, 2023 through June 30, 2024. The special benefit assessments are based on historical and estimated costs to maintain the District improvements. These assessments, which provide a direct and special benefit to properties within the District, will provide funding for the operation and maintenance of District improvements.

The word “parcel,” for the purposes of this Report, refers to an individual property assigned its own Assessor’s Parcel Number (“APN”) by the Placer County Assessor’s Office. The Placer County Auditor/Controller uses Assessor’s Parcel Numbers and specific Tax Code Accounts, to identify on the County’s tax roll, properties assessed for special district benefit assessments.

Following approval of the Report, the City Council will, by resolution, order the improvements to be made and confirm the levy and collection of assessments herein pursuant to the 1972 Act. The assessment rates and method of apportionment described in this Report as approved or modified by the City Council define the assessments to be applied to each parcel within the District for Fiscal Year (“FY”) 2023/24. The assessments as approved will be submitted to the Placer County Auditor/Controller to be included on the property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the Current Fiscal Year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved by the City Council.

### B. COMPLIANCE WITH CURRENT LEGISLATION

The City Council, pursuant to the provisions of the “Landscaping and Lighting Act of 1972”, being Division 15, Part 2 of the Streets and Highways Code of the State of California, beginning with Section 22500 (the “1972 Act”); Article XIID of the Constitution of the State of California (“Article XIID”); and the Proposition 218 Omnibus Implementation Act, beginning with Government Code Section 53750 (the “Implementation Act”) (the 1972 Act, Article XIID and the Implementation Act are referred to collectively as the “Assessment Law”) initiated proceedings for the

formation of the District on November 15, 2006 and to levy and collect annual assessments against lots and parcels within the District for FY 2007/08. On January 17, 2007, pursuant to Assessment Law, the City conducted a Public Hearing and tabulated the returned ballots. The City determined that a majority protest did not exist and approved the District's maximum assessment rate and annual inflationary adjustment factor.

Pursuant to the 1972 Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments, to review the Engineer's Annual Levy Report prior to approving the annual assessments to be levied on the County tax rolls. The assessments described in this Report have been prepared in accordance with the 1972 Act and Assessment Law.

### **C. DESCRIPTION OF DISTRICT BOUNDARIES**

The proposed territory within the District consists of all lots, parcels and subdivisions of land as shown on the Boundary Map titled "Boundary Map of Riverside Avenue Landscaping and Lighting District" contained within this report in Appendix A-1.

The District is bounded by Douglas Boulevard to the north, Darling Way to the south and includes parcels that front Riverside Avenue. It is centrally located between Interstate 80 and Downtown Roseville and is east of the Union Pacific Railroad.

The District currently has a mix of different types of land uses including automotive related retail and car lots, community/neighborhood retail, offices, services, and residential units.

### **D. IMPROVEMENTS AUTHORIZED BY THE 1972 ACT**

As applicable or may be applicable to a proposed District, the 1972 Act defines improvements to mean one or any combination of the following:

- The installation or planting of landscaping.
- The installation or construction of statuary, fountains, and other ornamental structures and facilities.
- The installation or construction of public lighting facilities.
- The installation or construction of any facilities which are appurtenant to any of the foregoing, or which are necessary or convenient for the maintenance or servicing thereof, including, but not limited to, grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities.
- The maintenance or servicing, or both, of any of the foregoing.
- The acquisition of any existing improvement otherwise authorized pursuant to this section.

Incidental expenses associated with the improvements including, but not limited to:

- The cost of preparation of the report, including plans, specifications, estimates, diagram, and assessment;
- The costs of printing, advertising, and the publishing, posting, and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;
- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
- Any expenses incidental to the issuance of bonds or notes pursuant to Section 22662.5.
- Costs associated with any elections held for the approval of a new or increased assessment.

The 1972 Act defines "Maintain" or "maintenance" to mean furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement, including:

- Repair, removal, or replacement of all or any part of any improvement.
- Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury.
- The removal of trimmings, rubbish, debris, and other solid waste.
- The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Furthermore, the 1972 Act specifies that where the cost of improvements (other than maintenance and operations) is greater than can be conveniently raised from a single annual assessment, an assessment to be levied and collected in annual installments. In that event, the governing body may choose to do any of the following:

- Provide for the accumulation of the moneys in an improvement fund until there are sufficient moneys to pay all or part of the cost of the improvements.
- Provide for a temporary advance to the improvement fund from any available and unencumbered funds of the local agency to pay all or part of the cost of the improvements and collect those advanced moneys from the annual installments collected through the assessments.
- Borrow an amount necessary to finance the estimated cost of the proposed improvements. The amount borrowed, including amounts for bonds issued to finance the estimated cost of the proposed improvements.

## **E. DESCRIPTION OF THE IMPROVEMENTS AND MAINTENANCE**

The District, through the levy of special assessments, is to provide funding for ongoing maintenance, operation and servicing of landscaping and lighting improvements located within the public rights-of-ways and dedicated easements located within the District. These improvements may include, but are not limited to, all materials, equipment, utilities, labor, and appurtenant facilities related to the ongoing maintenance of the improvements. The improvements to be maintained and services are generally described as follows:

### **Landscaping Improvements**

The general landscaping improvements in the District are to be consistent with the improvements on Vernon Street located north of the District, which intersects Riverside Avenue. As a gateway to downtown Roseville, Riverside Avenue's compatibility with Vernon Street links the downtown area and Riverside Gateway area together.

The landscaping improvements have been designed to enhance the area within the District and may include, but are not limited to ground cover, shrubs and plants, trees, irrigation and drainage systems, ornamental lighting, masonry walls or other fencing, hardscape improvements, monuments and landmarks, mid-block bulbs, bulb-outs, and associated appurtenant located within the street rights-of-way and public areas within the District. Specifically, the proposed landscape improvement areas for this District are:

- Landscaping and hardscape improvements within the public rights-of-way of the streets within the District including, but not limited to, Riverside Avenue including the corners of Riverside Avenue and Second Street, Third Street, Fourth Street, Fifth Street, Sixth Street, Darling Way, Fern Street, Cherry Street, and Bonita Street.
- Decorative banners along Riverside Avenue.
- Transit facilities include bus stop seating and decorative shelters.
- Roundabout improvements including plantings, paving, and landmark feature located at the intersection of Vernon St., Douglas Blvd., and Riverside Ave.
- A Gateway feature located at the intersection of Darling Way and Riverside Avenue.
- Various amenities associated with the landscape improvements and public areas within the District, including, but not limited to, trash receptacles, street furniture, bike racks, entry signs, sidewalks, fencing, and retaining walls.

Specifically, not included as District improvements are those improvements located on private property, improvements and facilities that are outside the boundaries of the District and/or area funded by other sources available to the City.

## **Public Lighting Improvements**

The lighting improvements may include, but are not limited to, the cost of providing, maintaining, and servicing of lighting fixtures, poles, meters, conduits, electrical cable, and associated appurtenant facilities associated with:

- Lighting facilities within the landscaped areas and public areas including safety lights, security lights or ornamental lights installed as part of the District improvements; and
- Public street light improvements located on the streets within the District. Specifically excluded from the assessment are the street light energy costs. These costs are to be paid for by the City from other revenue sources.

Detailed maps and descriptions of the location and extent of the specific improvements to be maintained by the District are on file in the Office of Public Works and by reference are made part of this Report.

## **Description of Maintenance and Services**

Maintenance means the furnishing of services and materials for the ordinary and usual maintenance, operation and servicing of landscaping and street lighting improvements facilities and appurtenant facilities, including repair, removal or replacement of all or part of any of the landscaping and street lighting improvements, or appurtenant facilities; providing for the life, growth, health and beauty of landscaping improvements including cultivation, irrigation, trimming, mowing, spraying, fertilizing and treating for disease or injury; the removal of trimmings, rubbish, debris and other solid waste; and the cleaning sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Servicing means the furnishing of water and electricity for the irrigation of the landscape improvements or appurtenant facilities and the furnishing of electric current or energy for the operation of the landscaping improvements or appurtenant facilities. The street lighting improvements shall be maintained to provide adequate illumination; however, the City will be paying the actual energy costs of the streetlights.

## II. METHOD OF APPORTIONMENT

---

### A. GENERAL

The Implementation Act permits the establishment of assessment districts by agencies for the purpose of providing certain public improvements, which include the construction, maintenance, and servicing of landscaping improvements, streetlights, and traffic signals.

Streets and Highways Code Section 22573 requires that maintenance assessments be levied according to benefit rather than the assessed value.

*“The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements.”*

In addition, Article XIID and the Implementation Act require that a parcel’s assessment may not exceed the reasonable cost for the proportional special benefit conferred to that parcel. Article XIID and the Implementation Act further provides that only special benefits are assessable, and the City must separate the general benefits from the special benefits. They also require that publicly owned properties that specifically benefit from the improvements be assessed.

### B. SPECIAL BENEFIT ANALYSIS

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIID addresses several key criteria for the levy of assessments, notably:

Article XIID Section 2d defines District as follows:

“District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service;”

Article XIID Section 2i defines Special Benefit as follows:

“Special benefit” means a particular and distinct benefit over, and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute “special benefit.”

Article XIID Section 4a defines proportional special benefit assessments as follows:

“An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified

parcel shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel.”

This District was formed to establish and provide for the improvements that enhance the presentation of the surrounding properties and developments. These improvements will directly benefit the parcels to be assessed within the District. The assessments and method of apportionment is based on the premise that the assessments will be used to construct and install landscape and lighting improvements within the District as well as provide for the annual maintenance of those improvements, and the assessment revenues generated by District will be used solely for such purposes.

The costs of the proposed improvements have been identified and allocated to properties within the District based on special benefit. The improvements to be provided by this District and for which properties will be assessed have been identified as an essential component and local amenity that provides a direct reflection and extension of the properties within the District which the property owners and residents have expressed a high level of support.

The method of apportionment (method of assessment) set forth in the Report is based on the premise that each assessed property receives special benefits from the landscape and lighting improvements within the District, and the assessment obligation for each parcel reflects that parcel’s proportional special benefits as compared to other properties that receive special benefits.

To identify and determine the proportional special benefit to each parcel within the District, it is necessary to consider the entire scope of the improvements provided as well as the properties that benefit from those improvements. The improvements and the associated costs described in this Report, have been carefully reviewed and have been identified and allocated based on a benefit rationale and calculations that proportionally allocate the net cost of only those improvements determined to be of special benefit to properties within the District. The various public improvements and the associated costs have been identified as either “general benefit” (not assessed) or “special benefit.”

Proper maintenance and operation of parkway landscaping and streetlights provides special benefit to adjacent properties by providing community character, security, safety, and vitality. In addition, these improvements will enhance the ability of property owners to attract and maintain customers as well as increase the viability of commercial development.

### **Landscaping Special Benefit**

Landscaping and appurtenant facilities, if well maintained, provide beautification, shade, and enhancement of the desirability of the surroundings, and therefore increase property value. Specifically, they provide a sense of ownership and a common theme in the community providing aesthetic appeal and increased desirability of properties.

Landscaping provides special benefit to those developments that are directly adjacent to the public streets.

### **Landscaping General Benefit**

The Improvements were installed to directly benefit the property owners in the District to enhance business and development opportunities. Therefore, it has been determined that there are no general benefits associated with the landscaping improvements.

### **Lighting Special Benefit**

The operation, maintenance and servicing of lighting along local streets and arterial streets of a development provide the following special benefits:

- Improved security of lots and parcels along the perimeter of the development;
- Improved nighttime visibility for the local access of emergency vehicles; and
- Improved safety and traffic circulation to and from parcels.

### **Street Lights General Benefit**

Similar to the landscaping improvements described above, the Improvements were installed to directly benefit the property owners in the District to enhance business and development opportunities. Therefore, it has been determined that there are no general benefits associated with lighting improvements.

## **C. ASSESSMENT METHODOLOGY**

To establish the special benefit to the individual parcels within the District, a formula that spreads the costs of the maintenance based on the special benefit must be established. The improvements have been reviewed and a formula has been established to apportion the maintenance costs based on benefit.

The method of assessment is based on the front footage of each parcel located within the District. The parcel's Front Footage was determined based on Assessor Parcel maps or other sources. Only Front Footage on Riverside Avenue was used.

Based on the above formula, the FY 2007/08 maximum assessment rate approved on January 17, 2007 through a property owner balloting (the "Initial

Assessment Rate” or the “Base Year Maximum Assessment Rate”) is \$6.45 per each foot of frontage.

The following formulas were used to first calculate the District’s Initial Assessment Rate and then each parcel’s FY 2007/08 assessment (proportional benefit):

**Step 1:**

$$\text{Balance to Levy} \div \text{Total Front Footage} = \text{Maximum Front Footage Rate}$$

**Step 2:**

$$\text{Parcel Front Footage} \times \text{Maximum Front Footage Rate} = \text{Maximum Assessment}$$

The Total Front Footage was the sum of all the Front Feet within the District. The Initial Assessment Rate per Front Foot was established by taking the total cost of improvements (Balance to Levy) and dividing that amount by the Total Front Footage within the District. The Initial Assessment Rate per Front Foot, which is also the FY 2007/08 Maximum Front Footage Rate, is then applied back to each individual parcel’s Front Footage to determine the parcel’s proportionate special benefit and assessment obligation (The FY 2007/08 Maximum Assessment).

#### **D. ASSESSMENT RANGE FORMULA**

The purpose of establishing an Assessment Range Formula is to provide for reasonable increases and inflationary adjustment to annual assessment rates without requiring the District to go through the requirements of Proposition 218 in order to get a small increase in assessments. This District provides for an annual adjustment to the Maximum Assessment Rate of the lesser of the percentage change in the area’s Local Consumer Price Index for All Urban Consumers, which is currently the San Francisco-Oakland-Hayward Consumer Price Index for All Urban Consumers (the “CPI”) or three percent (3%) (the “Escalation Percentage”). The CPI in this adjustment shall be determined through CPI data from the Bureau of Labor Statistics from December to December, beginning with the period from December 2006 to December 2007.

In applying this year’s inflationary adjustment, the Escalation Percentage will increase the FY 2023/24 maximum assessment rate by 3% over that of the prior year.

The Assessment Range Formula shall be applied to all future assessments within the District beginning in fiscal year 2008/09. Generally, if the proposed annual assessment rate for the current fiscal year is less than or equal to the calculated Maximum Assessment Rate, then the proposed annual assessment is not considered an increased assessment. The Maximum Assessment Rate is equal to the FY 2007/08 Maximum Assessment Rate, which was approved on January 17, 2007 through a property owner balloting (the “Initial Assessment Rate” or “Base Year Assessment Rate”) and adjusted annually by the Escalation Percentage.

Beginning in the second fiscal year (Fiscal Year 2008/09) and each fiscal year thereafter, the Maximum Assessment Rate would be recalculated, and a new Maximum Assessment Rate established within the District.

The Maximum Assessment Rate is adjusted annually and is calculated independent of the District’s annual budget and proposed annual assessment. Any proposed annual assessment is not considered an increased assessment, even if the proposed assessment is greater than the assessment applied in the prior fiscal year.

Although the Maximum Assessment Rate will increase each year, the actual assessment rate may remain unchanged. The Maximum Assessment Rate adjustment is designed to establish a reasonable limit on assessments. The Maximum Assessment Rate calculated each year does not require or facilitate an increase in the annual assessment rate and neither does it restrict assessments to the adjusted maximum amount. If the budget and assessment for the fiscal year do not require an increase, or the increase is less than the adjusted Maximum Assessment Rate, then the required budget and assessment may be applied without additional property owner balloting. If the budget and assessments calculated requires an increase greater than the adjusted Maximum Assessment, then the assessment is considered an increased assessment and would be subject to balloting.

### III. DISTRICT BUDGET

#### A. FY 2023/24 BUDGET

| DESCRIPTION                                        | AMOUNT<br>(FUND 2023) |
|----------------------------------------------------|-----------------------|
| <b><u>DIRECT COSTS</u></b>                         |                       |
| Contract Maintenance - Landscaping                 | \$7,874.00            |
| Repair & Maintenance - Landscaping                 | 9,000.00              |
| Repair & Maintenance - Lighting                    | 1,500.00              |
| Repair and Maintenance - Streetscape and Signage   | 3,200.00              |
| Repair and Maintenance - Tree Work                 | 1,729.88              |
| Utilities                                          | 10,740.00             |
| Rehab Reserve Expenditures - Non-Routine Tree Work | 3,000.00              |

## D. DESCRIPTION OF BUDGET ITEMS

Description of the terms used in the preceding Budget, Assessment Rates and Fund Balance tables are listed below:

### BUDGET:

#### DIRECT COSTS

**Contract Maintenance - Landscaping** - Includes all regularly scheduled contract labor, materials, supplies, and equipment required to properly maintain and ensure the satisfactory condition or maintenance of all landscaping improvements,

irrigation, and related drainage systems, as well as maintenance of appurtenant facilities (the “improvements”).

**Repair & Maintenance - Landscaping** - This line item includes repairs that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism, storms, etc.

**Repair & Maintenance – Lighting** - This line item includes bulb replacement and repairs that are generally unforeseen. This may include repair of damaged amenities due to vandalism, storms, etc.

**Repair & Maintenance - Streetscape/Signage** - This line item includes repairs that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism, storms, etc.

**Repair & Maintenance – Tree Work** - This line item includes annual costs for tree maintenance not included in the annual contract maintenance portion of the budget. If zero, this line item may not be shown in the budget.

**Utilities** - The furnishing of water and electricity required for the operation and maintenance of the improvements.

**Rehab Reserve Expenditures - Non-Routine Tree Work** – Expected costs to maintain trees other than costs of annual repair and maintenance. If zero, this line item may not be shown in the budget.

**Rehab Reserve Project Expenditures** – Expected costs for installation, replacement, or planned upgrades of District improvements for the current year that were previously funded or accumulated in the Rehabilitation Reserve. The Rehabilitation Reserve is used to accumulate funds for costs associated with the future rehabilitation or replacement of District improvements that cannot be conveniently raised from a single year’s assessment. If zero, this line item may not be shown in the budget.

## **ADMINISTRATION COSTS**

**City Administration** – Estimated costs incurred by the City Finance Department and other Departments in preparing the annual budget for the Engineer’s Report, together with other financial information required to determine the annual assessment. These costs would also include the preparation, posting and publishing of public notices required for City Council action relating to the District, as well as costs to perform legal review of documents.

**Contract Administration – Park’s Dept** – Estimated Costs of Park and Recreation Department staff to coordinate and oversee the maintenance contracts

and overall repair and maintenance of the District. This amount also includes the cost of the Department's estimates and analysis of certain budget items, estimated costs and useful lives of certain District Improvements.

**County Auditor Fees** - A fee of 1% of the total levy amount that is charged to the District by the County for placing assessments on property tax bills.

**Consulting and Professional Services** – Includes the costs and expenses of contracting with various professionals to provide legal, engineering and district administration services directly related to the District, including the calculation of the annual assessment amounts and the preparation of the Engineer's Report.

**Public Hearing Publishing Costs** –Includes the out of pocket costs to publish public notices required for City Council action relating to the District.

**Total Direct and Administration Costs** – The total expected costs of the District.

### **BUDGET ADJUSTMENTS**

**Replenishment/(Use) of Operating Reserve** – A "Replenishment" increases the levy in order to replenish the Operating Reserve. On the other hand, a "Use" of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the budget. Further information regarding the function of the Operating Reserve is provided under "FUND BALANCE INFORMATION" in the following pages of this Section.

**Contribution for /(Use of) Rehab Reserve** — A "Contribution" increases the levy in order to generate funding for the Rehabilitation Reserve. This reserve allows for the accumulation of funds for possible rehabilitation projects or replacements in future years. On the other hand, a "Use of" of the Rehabilitation Reserve provides current year funding of rehabilitation projects or replacements from available funds within the Rehabilitation Reserve. If zero, this line item may not be shown in the budget. Further information regarding the function of the Rehabilitation Reserve is provided under "FUND BALANCE INFORMATION" in the following pages of this Section.

**Rounding Adjustment** – The necessary rounding adjustment(s) due to limitations of the County property tax system that requires even penny levy amounts to be placed on the secured tax roll.

**BALANCE TO LEVY** - This is the total amount to be levied and collected through assessments for the current fiscal year for each zone. The Balance to Levy represents the sum of the total District costs together with any applicable adjustments to the budget as described above.

## ASSESSMENT RATES:

**Number of Assessable Parcels** - The total number of parcels that are expected to be assessed. Non-assessable lots or parcels include government-owned land, public utility-owned property, land principally encumbered by public rights-of-way or easements, common areas, and/or parcels within the boundaries of the District currently do not benefit from the improvements and are therefore not assessed.

**Total Assessable Front Footage** - The total amount of assessable Front Footage within the District in accordance with the Method of Assessment Section of this Report.

**Applied Assessment Rate** - The assessment rate to be applied to the front footage of each non-exempt parcel within the District for the current fiscal year.

**Maximum Assessment Rate** - The Maximum Assessment Rate per front foot for the current fiscal year.

**Potential Maximum Assessment** – The total amount that can be assessed against all non-exempt District parcels for the current fiscal year based upon the expected assessable front footage within the District.

## FUND BALANCE INFORMATION:

### OPERATING RESERVE

**Beginning Operating Reserve Balance 7-1-2023 (est.)** - The anticipated beginning balance of cash and receivables net of any unpaid prior year obligations for each Zone. These beginning balances shall be used to fund each Zone's expenditures from July 1, 2023 to December 31, 2023, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's fiscal year and the receipt of the collections from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

**Replenish from FY 2023/24 Levy** – This amount is added to the FY 2023/24 levy in order to replenish the Operating Reserve. Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve balance shall be sufficiently funded to provide for expenditures from the period of July 1, 2023 (the beginning of the Fiscal Year) through December 31, 2023. If zero, this line item may not be shown in the budget.

**Use for FY 2023/24 Expenses** – The amount of the Operating Reserve to be used to fund FY 2023/24 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve Balance to an amount no greater than the expected District costs for the period of

July 1, 2023 (the beginning of the Fiscal Year) through December 31, 2023. If zero, this line item may not be shown in the budget.

**Transfer from/(to) the Rehab Reserve** — The amount of Operating Reserve monies to be transferred to or from the Rehabilitation Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

**Ending Operating Reserve Balance 6-30-2024 (est.)** - This amount represents the anticipated Operating Reserve balance/(deficit) for each Zone as of June 30, 2024. The size of each Zone's Operating Reserve is limited by Streets and Highways Code 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance, service and incidental expenses from the first day of the fiscal year (July 1) to the date that the Agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each Zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

## **REHABILITATION RESERVE**

**Beginning Rehab Reserve Balance 7-1-2023 (est.)** — The projected balance of funds in the Rehabilitation Reserve as of July 1, 2023. Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

**Collect from FY 2023/24 Levy** — This amount is added to the levy to accumulate funding of future year rehabilitation projects, replacements, restorations, or upgrades of District improvements. If zero, this line item may not be shown in the budget.

**Use for FY 2023/24 Rehab Projects** – The amount of Rehabilitation Reserve monies expected to be transferred out of the Rehabilitation Reserve to fund the costs of installation, replacement, or planned upgrades of District improvements for the current year. If zero, this line item may not be shown in the budget.

**Transfer from/(to) the Operating Reserve** — The amount of Rehabilitation Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all

funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

**Ending Rehab Reserve Balance 6-30-2024 (est.)** - The projected balance of funds in the Rehabilitation Reserve as of June 30, 2024. These funds shall be used to provide for future year rehabilitation projects, replacements, restorations, or upgrades of District improvements which cannot be conveniently raised from a single year's assessment.

## **E. REHABILITATION RESERVE – CAPITAL IMPROVEMENT PLAN**

*Streets and Highways Code 22660* allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

The Report provides a five-year Capital Improvement Plan ("CIP") which shows projected expenditures related to the rehabilitation, restoration and/or replacement of District improvements, and other allowable costs. The Current Fiscal Year CIP is shown in the preceding Budget Section A. The projected CIP costs for the remaining four years are shown in the table below.

| Description                                                                                        | FY<br>2024-25   | FY<br>2025-26   | FY<br>2026-27   | FY<br>2027-28   | 4 Year<br>Total  |
|----------------------------------------------------------------------------------------------------|-----------------|-----------------|-----------------|-----------------|------------------|
| Improve hardscapes, monuments, landmarks, gateway features                                         | \$5,000         | \$5,000         | \$5,000         | \$5,000         | \$20,000         |
| Non-routine tree work                                                                              | 3,500           | 3,500           | 3,500           | 3,500           | 14,000           |
| Improve street furniture, trash receptacles, bike racks, bus stop shelters                         | 3,000           | 5,000           | 3,000           | 5,000           | 16,000           |
| Replace plants, landscaping, irrigation and/or drainage systems                                    | 5,000           | 8,500           | 5,000           | 5,000           | 23,500           |
| Replace public street lights, lighting fixtures, poles/meters, safety, security, ornamental lights | 5,000           | 7,000           | 5,000           | 7,000           | 24,000           |
| Replace entry signs and decorative banners and hardware                                            | 3,000           | 2,000           | 3,000           | 3,000           | 11,000           |
| <b>Total Projected Expenditures</b>                                                                | <b>\$24,500</b> | <b>\$31,000</b> | <b>\$24,500</b> | <b>\$28,500</b> | <b>\$108,500</b> |

From time to time, funds held in a Rehabilitation Reserve may be needed to respond to changing needs due to the condition of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the District's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and/or operation of the improvements.

## APPENDIX A – DISTRICT BOUNDARY MAP

The boundary map for the District has previously been submitted to the Clerk of the City in the format required under the Act and is, by reference, hereby made part of this Report. These District Boundary Maps are available for inspection at the office of the City Clerk during normal business hours.

For general reference purposes, a summary of the District's Boundaries is presented herein.

## APPENDIX B — FY 2023/24 ASSESSMENT ROLL

Parcel identification, for each lot or parcel within the District, shall be the parcel as shown on the Placer County Assessor's map for the year in which this Report is prepared.

A listing of parcels to be assessed within this District, along with the proposed assessment amounts, shall be submitted to the City Clerk, under separate cover, and by reference is made part of this Report.

Non-assessable lots or parcels may include areas of public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas and rights-of-ways including public greenbelts and parkways; utility rights-of-ways; common areas; landlocked parcels, small parcels vacated by the County, bifurcated lots, and any other property that cannot be developed. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempt from assessment.

At the conclusion of the public hearing for the District and the proposed assessments, approval of the Report (as submitted or as modified) confirms the method of apportionment and the assessment rate to be levied against each eligible parcel and thereby constitutes the approved levy and collection of assessments for FY 2023/24. The listing of parcels and the amount of assessment to be levied shall be submitted to the County Auditor/Controller and included on the FY 2023/24 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the Current Fiscal Year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved in this Report. Therefore, if a single parcel has changed to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

## RESOLUTION NO. 23-179

### A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, INITIATING PROCEEDINGS FOR THE ANNUAL LEVY OF ASSESSMENTS FOR THE VERNON STREET LANDSCAPING AND LIGHTING DISTRICT, FOR FISCAL YEAR 2023/2024, PURSUANT TO THE PROVISIONS OF PART 2 OF DIVISION 15 OF THE CALIFORNIA STREETS AND HIGHWAYS CODE

The City Council of the City of Roseville, California (hereafter referred to as the “City Council”) does resolve as follows:

**WHEREAS**, The City Council has, by previous Resolutions, formed the Vernon Street Landscaping and Lighting District (hereafter referred to as the “District”) pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the “Act”), that provides for levy and collection of assessments by the County of Placer for the City of Roseville to pay the maintenance and services of street lighting, landscaping, and all appurtenant facilities and operations related thereto; and,

**WHEREAS**, the City Council has retained Willdan Financial Services (hereinafter “Engineer”) for the purpose of assisting with the establishment of the assessments, the annexation of territory, and to prepare and file an Engineer’s Annual Levy Report (hereinafter referred to as the “Engineer’s Report”) with the City Clerk in accordance with the act, and in accordance with the California Constitution, Articles XIII C and XIII D;

**NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE VERNON STREET LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:**

**Section 1** Engineer’s Report: The City Council hereby orders the Engineer to prepare and file with the City Clerk the Engineer’s Report concerning the levy of assessments for the District in accordance with Chapter 3, Section 22622 of the Act.

**Section 2** Proposed improvements and any substantial changes in existing improvements: The District improvements include: the maintenance and operation of and the furnishing of services, materials and/or improvements for landscape, lighting, hardscape and streetscape areas, other public improvements within the street right of way areas and all appurtenant facilities related thereto as further described in the Engineer’s Report. The Engineer’s Report also describes all new improvements or substantial changes in existing improvements.

## RESOLUTION NO. 23-180

### **A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, DECLARING ITS INTENTION TO LEVY ANNUAL ASSESSMENTS FOR THE VERNON STREET LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2023/2024**

The City Council of the City of Roseville, California (hereafter referred to as the “City Council”) does resolve as follows:

**WHEREAS**, The City Council has, by previous Resolutions, formed the Vernon Street Landscaping and Lighting District (hereafter referred to as the “District”), and initiated proceedings for Fiscal Year 2023/2024, pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the “Act”) that provides for the levy and collection of assessments by the County of Placer for the City of Roseville to pay the maintenance, operation and servicing of all improvements and facilities related thereto; and,

**WHEREAS**, the City Council has retained Willdan Financial Services for the purpose of assisting with the Annual Levy of the District, and to prepare and file a report (hereinafter referred to as the “Engineer’s Report”) with the City Clerk in accordance with the Act; and,

**NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE VERNON STREET LANDSCAPING AND LIGHTING DISTRICT, PURSUANT TO CHAPTER 3, SECTION 22624 OF THE ACT, AS FOLLOWS:**

**Section 1** Intention: The City Council hereby declares that it is its intention to seek the Annual Levy of the District pursuant to the Act, over and including the land within the District boundary, and to levy and collect assessments on all such land to pay the annual costs of the improvements.

**Section 2** Proposed improvements and any substantial changes in existing improvements: The District improvements include: the maintenance and operation of and the furnishing of services, materials or improvements for landscape, lighting, hardscape and streetscape areas within the District including, gateways, signage, street trees, sidewalks, curbs, gutters, parking stripes, pavers, planters, turf, trees, irrigation systems, drainage systems, other public improvements within the street right of way areas and all appurtenant facilities related thereto as further described in the Engineer’s Report. The Engineer’s Report also describes all new improvements or substantial changes in existing improvements.

**Section 3** Boundaries and Designation: The boundaries of the District are described as the boundaries previously defined in the formation documents of the original District. The District is known and designated as:

**“Vernon Street Landscaping and Lighting District”**

**Section 4** Proposed Assessment Amounts: The proposed assessments are outlined in the Report. District Assessments are calculated in accordance with the method of apportionment established for the District and do not exceed the assessment rates and annual inflationary adjustment previously authorized by City Council and approved by the property owners in accordance with the provisions of the California State Constitution, Article XIID.

**Section 5** Public Hearing(s): The City Council hereby declares its intention to conduct a Public Hearing annually concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22626* of the Act.

**Section 6** Notice: The City Clerk shall give notice of the time and place of the Public Hearing by causing the publishing of this Resolution once in a local newspaper not less than ten (10) days before the date of the hearing and by posting a copy of this Resolution on the official bulletin board customarily used by the City Council for the posting of notices.

**Section 7** Time and Place of Public Hearing: Notice is hereby given that a Public Hearing on these matters will be held by the City Council on **Wednesday, June 7, 2023 at 6:00 p.m.**, or as soon thereafter as feasible in the regular meeting chambers located at 311 Vernon Street, Roseville, California.

## RESOLUTION NO. 23-181

### **A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR PRELIMINARY APPROVAL OF THE ENGINEER'S ANNUAL LEVY REPORT FOR THE VERNON STREET LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2023/2024**

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

**WHEREAS**, the City Council has, by previous Resolutions, ordered the preparation of an Annual Levy Report (hereafter referred to as the "Engineer's Report") for the district known and designated as the Vernon Street Landscaping and Lighting District (hereafter referred to as the "District"), pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereinafter referred to as the "Act"); and,

**WHEREAS**, the City Council has retained Willdan Financial Services (hereinafter "Engineer"), for the purpose of assisting with the establishment of the assessments and to prepare and file an Engineer's Report with the City Clerk in accordance with the Act, and in accordance with the requirements of the California Constitution, Articles XIIC and XIID; and,

**WHEREAS**, there has now been presented to this City Council the Engineer's Report as required by *Chapter 1, Article 4, Section 22566* of said Act; and,

**WHEREAS**, this City Council has carefully examined and reviewed the Engineer's Report as presented, and is preliminarily satisfied with the District, each and all of the budget items and documents as set forth therein, and is satisfied that the assessments, on a preliminary basis, have been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed within the District, as set forth in said Engineer's Report; and,

**NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE VERNON STREET LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:**

**Section 1** That the above recitals are all true and correct.

**Section 2** That the Engineer's Report as presented, consists of the following:

- a. A Description of Improvements
- b. The Annual Budget (Costs and Expenses of Maintenance, Services, Operations and District Administration)
- c. The Assessment Roll containing the Fiscal Year 2023/2024 Levy for each Assessor Parcel within the District

**Section 3** The Engineer's Report is hereby approved on a preliminary basis, and ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection.

**Section 4** That the City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation of the Engineer's Report.

**RESOLUTION NO. 23-181**

Vernon Street

Landscaping and Lighting District

City of Roseville

Placer County, State of California

This Report describes the District and any relevant zones therein, including the improvements, budgets, parcels and assessments to be levied for Fiscal Year 2023/24 as they existed at the time of the passage of the Resolution of Intention. Reference is hereby made to the Placer County Assessor's maps for a detailed description of the lines and dimensions of parcels within the District. The undersigned respectfully submits the enclosed Report as directed by the City Council.

Dated this 12th day of April, 2023

Willdan Financial Services  
Assessment Engineer  
On Behalf of the City of Roseville

## I. OVERVIEW

---

### A. INTRODUCTION

The City of Roseville (“City”) annually levies and collects special assessments in order to maintain the improvements within the Vernon Street Landscaping and Lighting District (“District”). The District was formed in January of 2001 and is levied annual assessments pursuant to *the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code* (“1972 Act”).

The Engineer’s Report (“Report”) describes the District, any new annexations, changes to the District, and the proposed assessments for the period of July 1, 2023 through June 30, 2024. The special benefit assessments are based on historical and estimated costs to maintain the District improvements. These assessments, which provide a direct and special benefit to properties within the District, will provide funding for the operation and maintenance of District improvements.

The word “parcel,” for the purposes of this Report, refers to an individual property assigned its own Assessor’s Parcel Number (“APN”) by the Placer County Assessor’s Office. The Placer County Auditor/Controller uses Assessor’s Parcel Numbers and specific Tax Code Accounts, to identify on the County’s tax roll, properties assessed for special district benefit assessments.

Following approval of the Report, the City Council will by resolution, order the improvements to be made and confirm the levy and collection of assessments herein pursuant to the Act. The assessment rates and method of apportionment described in this Report as approved or modified by the City Council define the assessments to be applied to each parcel within the District for Fiscal Year (“FY”) 2023/24. The assessments as approved will be submitted to the Placer County Auditor/Controller to be included on the property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the Current Fiscal Year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved by the City Council.

### B. COMPLIANCE WITH THE CURRENT LEGISLATION

All assessments described in this Report and approved by the City Council are prepared in accordance with the 1972 Act and are in compliance with the provisions of the California Constitution Article XIID (Proposition 218).

The District has been formed pursuant to the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code. Pursuant

to the Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments, to review the Engineer's Annual Levy Report prior to approving the annual assessments to be levied on the County tax rolls. The assessments described in this Report have been prepared in accordance with the Act.

Prior to FY 2001/02, the City initiated (Resolution 00-523) and conducted property owner protest ballot proceedings (Resolution 01-22) in accordance with Article XIID of the California Constitution ("Article XIID") for the parcels within the District. An annual rate escalator was also included in the ballot that allows for an annual inflationary increase equal to the percentage change in the Consumer Price Index of the San Francisco-Oakland-Hayward Area (the "CPI") of each succeeding year (the "Escalation Percentage"). At the conclusion of the Public Hearing held on January 17, 2001, all property owner ballots returned were tabulated to determine if majority protest existed. The result of the protest proceeding was an approval of the assessment rate and the annual inflationary increase for maintaining the improvements within the District.

Pursuant to the Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments, to review the Engineer's Annual Levy Report prior to approving the annual assessments to be levied on the County tax rolls.

### **C. DESCRIPTION OF DISTRICT BOUNDARIES**

The District is located in downtown Roseville and includes all parcels that front along Vernon Street between Folsom Road and the Riverside/Douglas Boulevard. See Appendix A for District boundary map.

### **D. IMPROVEMENTS AUTHORIZED BY THE 1972 ACT**

As applicable or may be applicable to a proposed District, the 1972 Act defines improvements to mean one or any combination of the following:

- The installation or planting of landscaping.
- The installation or construction of statuary, fountains, and other ornamental structures and facilities.
- The installation or construction of public lighting facilities.
- The installation or construction of any facilities which are appurtenant to any of the foregoing or which are necessary or convenient for the maintenance or servicing thereof, including, but not limited to, grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities.
- The maintenance or servicing, or both, of any of the foregoing.
- The acquisition of any existing improvement otherwise authorized pursuant to this section.

Incidental expenses associated with the improvements including, but not limited to:

- The cost of preparation of the report, including plans, specifications, estimates, diagram, and assessment;
- The costs of printing, advertising, and the publishing, posting and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;
- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
- Any expenses incidental to the issuance of bonds or notes pursuant to Section 22662.5.
- Costs associated with any elections held for the approval of a new or increased assessment.

The 1972 Act defines "Maintain" or "maintenance" to mean furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement, including:

- Repair, removal, or replacement of all or any part of any improvement.
- Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury.
- The removal of trimmings, rubbish, debris, and other solid waste.
- The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Furthermore, the 1972 Act specifies that where the cost of improvements (other than maintenance and operations) is greater than can be conveniently raised from a single annual assessment, an assessment to be levied and collected in annual installments. In that event, the governing body may choose to do any of the following:

- Provide for the accumulation of the moneys in an improvement fund until there are sufficient moneys to pay all or part of the cost of the improvements.
- Provide for a temporary advance to the improvement fund from any available and unencumbered funds of the local agency to pay all or part of the cost of the improvements and collect those advanced moneys from the annual installments collected through the assessments.
- Borrow an amount necessary to finance the estimated cost of the proposed improvements. The amount borrowed, including amounts for bonds issued to finance the estimated cost of the proposed improvements.

## **E. DESCRIPTION OF THE IMPROVEMENTS AND MAINTENANCE**

The District ensures the continued maintenance, servicing, administration and operation of various landscape, lighting and streetscape improvements and associated appurtenances that are required to keep the improvements in a healthy, vigorous, and satisfactory condition. The assessable parcels receive benefit from the above improvements within the District.

Specific improvements include installation, maintenance and servicing of public facilities, including, but not limited to street trees, sidewalks, curbs, gutters, parking stripes, turf, brick pavers, planters, gateways, benches, bike racks, signage, trash receptacles, and lighting throughout the boundaries of the District (the “Improvements”).

As applied herein, “installation” means the construction of public Improvements, including, but not limited to, land preparation, such as grading, leveling, cutting and filling, sod, landscaping, irrigation systems, sidewalks and drainage, lights, equipment, turf, brick pavers, planters, gateways, benches, bike racks and signage.

“Maintenance” means the furnishing of services and materials for the ordinary and usual maintenance, operation and servicing of any Improvement, including repair, removal or replacement of all or any part of any Improvement; providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury; the removal of trimmings, rubbish, debris, and other solid waste, and the cleaning, sandblasting, and painting of Improvements to remove or cover graffiti.

“Servicing” means the furnishing of electric current, or energy, gas or other illuminating agent for any public lighting facilities or for the lighting or operation of any other Improvements; or water for the irrigation of any landscaping, the operation of any fountains, or the maintenance of any other Improvements.

Plans and specification for the Improvements to be maintained are on file in the office of the Economic and Community Services Director at 311 Vernon Street, Roseville, CA 95678.

All assessable parcels identified as being within the District share in both the cost and the benefits of the improvements. The costs associated with the Improvements are equitably spread among all benefiting parcels within the District. Only parcels that receive direct benefit from the Improvements are assessed, and each parcel is assessed in proportion to the estimated benefit received. The funds collected are dispersed and used for only the services and operation provided to the District.

## II. METHOD OF APPORTIONMENT

---

### A. GENERAL

The 1972 Act permits the establishment of assessment districts by agencies for the purpose of providing certain public improvements which include the construction, maintenance and servicing of public lights, landscaping and appurtenant facilities. The 1972 Act further requires that the cost of these improvements be levied according to benefit rather than assessed value:

*“The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements.”*

The formula used for calculating assessments in the District therefore reflects the composition of the parcels, and the Improvements and services provided, to fairly apportion the costs based on estimated benefit to each parcel.

### B. BENEFIT ANALYSIS

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIID addresses several key criteria for the levy of assessments, notably:

Article XIID Section 2d defines District as follows:

“District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service”;

Article XIID Section 2i defines Special Benefit as follows:

“Special benefit” means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute “special benefit.”

Article XIID Section 4a defines proportional special benefit assessments as follows:

“An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be

imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel.”

This District was formed to establish and provide for the improvements that enhance the presentation of the surrounding properties and developments. These improvements will directly benefit the parcels to be assessed within the District. The assessments and method of apportionment is based on the premise that the assessments will be used to construct and install landscape and lighting improvements within the District as well as provide for the annual maintenance of those improvements, and the assessment revenues generated by District will be used solely for such purposes.

The costs of the proposed improvements have been identified and allocated to properties within the District based on special benefit. The improvements to be provided by this District and for which properties will be assessed have been identified as an essential component and local amenity that provides a direct reflection and extension of the properties within the District which the property owners and residents have expressed a high level of support.

The method of apportionment (method of assessment) set forth in the Report is based on the premise that each assessed property receives special benefits from the landscape and lighting improvements within the District, and the assessment obligation for each parcel reflects that parcel’s proportional special benefits as compared to other properties that receive special benefits.

To identify and determine the proportional special benefit to each parcel within the District, it is necessary to consider the entire scope of the improvements provided as well as the properties that benefit from those improvements. The improvements and the associated costs described in this Report, have been carefully reviewed and have been identified and allocated based on a benefit rationale and calculations that proportionally allocate the net cost of only those improvements determined to be of special benefit to properties within the District. The various public improvements and the associated costs have been identified as either “general benefit” (not assessed) or “special benefit”. The City initiated and conducted property owner protest ballot proceedings in accordance with Article XIIID. Each of the proposed Improvements, the associated costs and assessments were identified and allocated based on special benefit pursuant to the provisions of Article XIIID and 1972 Act. Additionally, the Improvements and the annual costs of ensuring the maintenance and operation of the Improvements are of direct and special benefit to the properties.

The City annually levies and collects special benefit assessments in order to maintain and service the District Improvements. The District provides for specific Improvements and services that include the maintenance and operation of landscaping and lighting Improvements and associated appurtenances located within the District’s public rights-of-way and dedicated easements. The annual assessment is based on the historical and estimated cost to maintain the Improvements that provide a benefit to properties within these Districts. The

Improvements within the District and the costs of those Improvements are identified and budgeted separately, including all expenditures, deficits, surpluses, revenues, and reserves.

All Improvements within the District and the properties associated with those Improvements were reviewed for benefit prior to the formation of the District. Because the Improvements affront the benefited parcels, it has been determined that there is no measurable general benefit to properties outside the District or to the public at large. In making this determination it should be noted that similar improvements within California are typically maintained by individual property owners, through some type of association or a special district as allowed by State Law since the on-going maintenance of these improvements are a special benefit to the properties associated with those improvements.

The method of apportionment (method of assessment) for the District is based on the premise that each of the assessed parcels within the District receives special benefit from the Improvements maintained and financed by District assessments. The presence of these Improvements and the close proximity of the Improvements to the properties within the District enhance the desirability and security of properties within the District.

The landscape Improvements provided by the District may include landscaped parkways, perimeters, entryways, local medians, slopes, internal amenities and appurtenant facilities. Street lighting Improvements may include all energy costs and necessary maintenance to the facilities related thereto. The annual assessments outlined in this Report are proposed to cover the estimated costs to provide all necessary service, operation, administration, and maintenance required to keep these Improvements in a healthy, vigorous, and satisfactory condition. The special benefits associated with the local landscaping Improvements are specifically:

The special benefits associated with all landscaping Improvements are specifically:

- Enhanced desirability of properties through association with the Improvements.
- Improved aesthetic appeal of properties providing a positive representation of the area and properties.
- Enhanced adaptation of the urban environment within the natural environment from adequate landscaping.
- Environmental enhancement through improved dust and debris control, and fire prevention.
- Increased sense of pride in ownership of property within the District resulting from well-maintained Improvements associated with the properties.
- Enhanced quality of life through well-maintained landscaped areas.

- Reduced criminal activity and property-related crimes (especially vandalism) against properties in the District through well-maintained surroundings and amenities including abatement of graffiti.
- Enhanced environmental quality of the parcels by moderating temperatures, providing oxygenation and attenuating noise.

The special benefits of street lighting are the convenience, safety, and security of property, improvements, and goods. Specifically:

- Enhanced deterrence of crime and the aid to police protection.
- Increased nighttime safety on streets and roads within the Districts.
- Improved ability of pedestrians and motorists to see.
- Improved ingress and egress to property.
- Reduced vandalism and other criminal acts and damage to Improvements or property.
- Improved traffic circulation and reduced nighttime accidents and personal property loss.
- Increased promotion of business during nighttime hours in the case of commercial properties.

All of the preceding special benefits contribute to a specific enhancement and desirability of each of the assessed parcels within the District.

### **C. DESCRIPTION OF THE METHOD OF APPORTIONMENT**

Pursuant to the 1972 Act, the costs of the District may be apportioned by any formula or method that fairly distributes the net amount to be assessed, among all assessable parcels within the District in proportion to the estimated special benefits to be received by each such parcel from the Improvements. The special benefit formula used should reflect the composition of the parcels, the Improvements and services provided to fairly proportion the costs based on estimated special benefit to each parcel within the District. All assessable parcels within the District shall receive a direct special benefit from the services and Improvements provided by the District.

Article XIID of the California Constitution specifies that only special benefits are assessable and that the City must separate the general benefits from the special benefits conferred on any parcel. Since the District is a downtown business area and the Improvements that affront each District parcel primarily attract and retain an increased customer base, these benefits enhance the District parcels and there is no measurable benefit to the public at large. Therefore, 100% of the Improvements are considered special benefit to the District parcels. The cost of

maintaining the Improvements is therefore identified as special benefit and has been allocated to the special assessments.

It was determined that a uniform assessment rate per foot of frontage upon Vernon Street would fairly distribute the net amount to be assessed due to the following reasons:

1. The assessments are based upon a specific property owner's special benefit received from the Improvements.
2. The special benefits should be directly related to the extent at which a property fronts the improvements, relative to other properties in the District.

The base assessment rate for the District was \$4.59 per linear foot in FY 2001/02 and was determined using the formula below.

$$\text{Assessment Rate Per Foot} = \frac{\text{Balance to Levy}}{\text{Total Feet of Frontage}}$$

The annual assessment amount for each parcel was then determined using the formula below:

$$\text{Parcel Front Footage} \times \text{Rate per Linear Foot} = \text{Parcel Assessment Amount}$$

#### D. ANNUAL INFLATIONARY ADJUSTMENT

Commencing with FY 2002/03, the maximum assessment rate is to increase annually by the percentage change in the Consumer Price Index of the San Francisco-Oakland-Hayward ("CPI") as of January of each succeeding year (the "Escalation Percentage"). Since the Department of Labor, Bureau of Labor Statistics does not publish a CPI for January; the CPI for preceding month shall be used since this is the CPI *available* in the month of January. The District's starting CPI Index of 184.1, December of 2000, is hereby established as the base CPI (the "Base Year CPI Index").

In applying this year's CPI increase, the Escalation Percentage will increase the FY 2023/24 maximum assessment rate by 4.88% over that of the prior year.

If the proposed assessment increases over the prior fiscal year by a percentage no greater than the Escalation Percentage as defined above, then the proposed assessment is not considered an increase. This assessment range formula shall be applied to all future assessments within the District. Generally, if the proposed annual assessment rate for the Current Fiscal Year is less than or equal to the calculated maximum assessment rate, then the proposed annual assessment is not considered an increased assessment.

#### **E. APPEALS AND INTERPRETATION**

Any property owner, who believes that the assessment levied on the subject property is in error as a result of incorrect information being used to apply the foregoing method of assessment, may file a written appeal with the Finance Director of the City of Roseville or his or her designee. Any such appeal is limited to correction of an assessment during the then current Fiscal Year. Upon the filing of any such appeal, the Director of Housing and Redevelopment or his or her designee will promptly review the appeal and any information provided by the property owner. If the Director of Housing and Redevelopment or his or her designee finds that the assessment should be modified, the appropriate changes shall be made to the assessment roll. However, if any such changes are approved after the County of Placer's deadline for adjustments to the tax roll, the Director of Housing and Redevelopment or his or her designee is authorized to approve a refund of the reduction amount to the property owner. Any dispute over the decision of the Director of Housing and Redevelopment or his or her designee, shall be referred to the City Council of the City of Roseville and the decision of the City Council of the City of Roseville shall be final.

#### **F. DETERMINATION OF FRONT FOOTAGE**

The front footage of each assessable parcel is subject to revision and/or correction using measurements of front footage found on the then current Placer County Assessor's Parcel Maps or through direct measurement by City personnel. Any such correction that increases a Parcel Assessment shall not be considered an increased assessment subject to the procedural provisions of Article XIID.

### III. DISTRICT BUDGET

#### A. FY 2023/24 BUDGET

| DESCRIPTION                                        | AMOUNT<br>(FUND 2019) |
|----------------------------------------------------|-----------------------|
| <b><u>DIRECT COSTS</u></b>                         |                       |
| Contract Maintenance - Landscaping                 | \$5,167.00            |
| Repair & Maintenance - Landscaping                 | 8,400.00              |
| Repair & Maintenance - Lighting                    | 5,000.00              |
| Repair and Maintenance - Streetscape and Signage   | 1,250.00              |
| Repair and Maintenance - Tree Work                 | 5,310.00              |
| Utilities                                          | 12,885.00             |
| Rehab Reserve Expenditures - Non-Routine Tree Work | 2,250.00              |
| Rehab Reserve Project Expenditures                 | <u>20,500.00</u>      |
| <b>Total Direct Costs</b>                          | <b>\$60,762.00</b>    |
| <b><u>ADMINISTRATION COSTS</u></b>                 |                       |
| City Administration                                | \$846.00              |
| Contract Administration - Park's Dept              | 2,434.00              |
| County Auditor Fees                                | 443.49                |
| Consulting & Professional Services                 | 3,924.00              |
| Public Hearing Publishing Costs                    | <u>366.00</u>         |
| <b>Total Administrative Costs</b>                  | <b>\$8,013.49</b>     |
| <b>Total Direct and Administration Costs</b>       | <b>\$68,775.49</b>    |
| <b><u>BUDGET ADJUSTMENTS</u></b>                   |                       |
| Replenishment/(Use) of Operating Reserve           | (\$1,676.91)          |
| Contribution for /(Use of) Rehab Reserve           | (22,750.00)           |
| Rounding Adjustment                                | <u>(0.50)</u>         |
| <b>Total Adjustments</b>                           | <b>(\$24,427.41)</b>  |
| <b>BALANCE TO LEVY</b>                             | <b>\$44,348.08</b>    |

Fund balance information is reported in Section C on the following page.

## B. FY 2023/24 ASSESSMENT RATES

| DESCRIPTION                                        | AMOUNT<br>(FUND 2019) |

## D. DESCRIPTION OF BUDGET ITEMS

Description of the terms used in the preceding Budget, Assessment Rates and Fund Balance tables are listed below:

### BUDGET

#### DIRECT COSTS

**Contract Maintenance - Landscaping** - Includes all regularly scheduled contract labor, materials, supplies and equipment required to properly maintain and ensure the satisfactory condition or maintenance of all landscaping corridors, street medians, entryways, irrigation and related drainage systems as well as maintenance of appurtenant facilities (the "improvements").

**Repair & Maintenance – Landscaping** - This line item includes repairs that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism, storms, etc. If zero, this line item may not be shown in the budget.

**Repair & Maintenance – Lighting** - This line item includes bulb replacement and repairs that are generally unforeseen. This may include repair of damaged amenities due to vandalism, storms, etc.

**Repair & Maintenance - Streetscape/Signage** - This line item includes repairs that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism, storms, etc.

**Repair & Maintenance – Tree Work** - This line item includes annual costs for tree maintenance not included in the annual contract maintenance portion of the budget. If zero, this line item may not be shown in the budget.

**Utilities** - The furnishing of water and electricity required for the operation and maintenance of the improvements.

**Rehab Reserve Expenditures – Non-Routine Tree Work** – Expected costs to maintain trees other than costs of annual repair and maintenance. If zero, this line item may not be shown in the budget.

**Rehab Reserve Project Expenditures** – Expected costs for installation, replacement or planned upgrades of District improvements for the current year that were previously funded or accumulated in the Rehabilitation Reserve. The Rehabilitation Reserve is used to accumulate funds for costs associated with the future rehabilitation or replacement of District improvements that cannot be conveniently raised from a single year's assessment. If zero, this line item may not be shown in the budget.

## **ADMINISTRATION COSTS**

**City Administration** – Estimated costs incurred by the City Finance Department and other Departments in preparing the annual budget for the Engineer's Report, together with other financial information required to determine the annual assessment. These costs would also include the preparation, posting and publishing of public notices required for City Council action relating to the District, as well as costs to perform legal review of documents.

**Contract Administration – Park's Dept** – Estimated Costs of Park and Recreation Department staff to coordinate and oversee the maintenance contracts and overall repair and maintenance of the District. This amount also includes the

cost of the Department's estimates and analysis of certain budget items, estimated costs and useful lives of certain District Improvements.

**County Auditor Fees** - A fee of 1% of the total levy amount that is charged to the District by the County for placing assessments on property tax bills.

**Consulting and Professional Services** – Includes the costs and expenses of contracting with various professionals to provide legal, engineering and district administration services directly related to the District, including the calculation of the annual assessment amounts and the preparation of the Engineer's' Report.

**Public Hearing Publishing Costs** –Includes the out of pocket costs to publish public notices required for City Council action relating to the District.

**Total Direct and Administration Costs** – The total expected costs of the District.

### **BUDGET ADJUSTMENTS**

**Replenishment/(Use) of Operating Reserve** – A “Replenishment” increases the levy in order to replenish the Operating Reserve. On the other hand, a “Use” of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the budget. Further information regarding the function of the Operating Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

**Contribution for /(Use of) Rehab Reserve** — A “Contribution” increases the levy in order to generate funding for the Rehabilitation Reserve. This reserve allows for the accumulation of funds for possible rehabilitation projects or replacements in future years. On the other hand, a “Use of” of the Rehabilitation Reserve provides current year funding of rehabilitation projects or replacements from available funds within the Rehabilitation Reserve. If zero, this line item may not be shown in the budget. Further information regarding the function of the Rehabilitation Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

**Rounding Adjustment** – The necessary rounding adjustment(s) due to limitations of the County property tax system that requires even penny levy amounts to be placed on the secured tax roll.

**BALANCE TO LEVY** - This is the total amount to be levied and collected through assessments for the current fiscal year for each zone. The Balance to Levy represents the sum of the total District costs together with any applicable adjustments to the budget as described above.

### **ASSESSMENT RATES:**

**Number of Assessable Parcels** - The total number of parcels that are expected to be assessed. Non-assessable lots or parcels include government-owned land, public utility-owned property, land principally encumbered by public rights-of-way or easements, common areas, and/or parcels within the boundaries of the District currently do not benefit from the improvements and are therefore not assessed.

**Total Assessable Front Footage** - The total linear footage of that portion of each assessable parcel's boundary that is contiguous with Vernon Street.

**Applied Assessment Rate per Front Foot** - This amount represents the rate being applied to the front footage of each parcel for the Current Fiscal Year.

**Maximum Assessment Rate per Front Foot** - This amount represents the maximum rate that can be applied to the front footage of each parcel for the Current Fiscal Year.

**Maximum Potential Assessment** – The total amount that is expected to be assessed against all parcels within the District for the Current Fiscal Year.

## **FUND BALANCE INFORMATION:**

### **OPERATING RESERVE**

**Beginning Operating Reserve Balance 7-1-2023 (est.)** - The anticipated beginning balance of cash and receivables net of any unpaid prior year obligations for each Zone. These beginning balances shall be used to fund each Zone's expenditures from July 1, 2023 to December 31, 2023, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's fiscal year and the receipt of the collections from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

**Replenish from FY 2023/24 Levy** – This amount is added to the FY 2023/24 levy in order to replenish the Operating Reserve. Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve balance shall be sufficiently funded to provide for expenditures from the period of July 1, 2023 (the beginning of the Fiscal Year) through December 31, 2023. If zero, this line item may not be shown in the budget.

**Use for FY 2023/24 Expenses** – The amount of the Operating Reserve to be used to fund FY 2023/24 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve Balance to an amount no greater than the expected District costs for the period of July 1, 2023 (the beginning of the Fiscal Year) through December 31, 2023. If zero, this line item may not be shown in the budget.

**Transfer from/(to) the Rehab Reserve** — The amount of Operating Reserve monies to be transferred to or from the Rehabilitation Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

**Ending Operating Reserve Balance 6-30-2024 (est.)** - This amount represents the anticipated Operating Reserve balance/(deficit) for each Zone as of June 30, 2024. The size of each Zone's Operating Reserve is limited by Streets and Highways Code 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance, service and incidental expenses from the first day of the fiscal year (July 1) to the date that the Agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each Zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

### **REHABILITATION RESERVE**

**Beginning Rehab Reserve Balance 7-1-2023 (est.)** — The projected balance of funds in the Rehabilitation Reserve as of July 1, 2023. Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

**Collect from FY 2023/24 Levy** — This amount is added to the levy to accumulate funding of future year rehabilitation projects, replacements, restorations or upgrades of District improvements. If zero, this line item may not be shown in the budget.

**Use for FY 2023/24 Rehab Projects** – The amount of Rehabilitation Reserve monies expected to be transferred out of the Rehabilitation Reserve to fund the costs of installation, replacement or planned upgrades of District improvements for the current year. If zero, this line item may not be shown in the budget.

**Transfer from/(to) the Operating Reserve** — The amount of Rehabilitation Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department, in

order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

**Ending Rehab Reserve Balance 6-30-2024 (est.)** - The projected balance of funds in the Rehabilitation Reserve as of June 30, 2024. These funds shall be used to provide for future year rehabilitation projects, replacements, restorations or upgrades of District improvements which cannot be conveniently raised from a single year's assessment. Should the District have no Rehabilitation Reserve balances or related activity, no Rehabilitation Reserve information shall be presented in the Report.

## E. REHABILITATION RESERVE – CAPITAL IMPROVEMENT PLAN

*Streets and Highways Code 22660* allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

The Report provides a five-year Capital Improvement Plan ("CIP") which shows projected expenditures related to the rehabilitation, restoration and/or replacement of District improvements, and other allowable costs. The Current Fiscal Year CIP is shown in the preceding Budget Section A. The projected CIP costs for the remaining four years are shown in the table below.

| Description                                                                        | FY<br>2024-25   | FY<br>2025-26   | FY<br>2026-27   | FY<br>2027-28   | 4 Year<br>Total |
|------------------------------------------------------------------------------------|-----------------|-----------------|-----------------|-----------------|-----------------|
| Repair, replace and/or refurbish street furniture                                  | \$1,000         | \$3,000         | \$1,000         | \$3,000         | \$8,000         |
| Non-routine tree work                                                              | 2,250           | 2,500           | 2,250           | 2,500           | 9,500           |
| Replace, repair, renovate and/or refurbish plants, landscaping & related materials | 3,000           | 5,000           | 2,000           | 2,000           | 12,000          |
| Replace, repair, and/or refurbish light standard                                   | 2,000           | 2,500           | 2,000           | 2,500           | 9,000           |
| Replace, repair electrical outlets                                                 | 5,000           | 5,000           | 5,000           | 5,000           | 20,000          |
| <b>Total Projected Expenditures</b>                                                | <b>\$13,250</b> | <b>\$18,000</b> | <b>\$12,250</b> | <b>\$15,000</b> | <b>\$58,500</b> |

From time to time, funds held in a Rehabilitation Reserve may be needed to respond to changing needs due to the condition of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the Districts' Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and/or operation of the improvements.

## APPENDIX A – DISTRICT BOUNDARY MAP

The boundary map for the District has previously been submitted to the Clerk of the City in the format required under the 1972 Act and is, by reference, hereby made part of this Report. These District Boundary Maps are available for inspection at the office of the City Clerk during normal business hours.

For general reference purposes, a summary of the District's Boundaries is presented herein.

Assessment diagram

## APPENDIX B — FY 2023/24 ASSESSMENT ROLL

Parcel identification, for each lot or parcel within the District, shall be the parcel as shown on the Placer County Assessor's map for the year in which this Report is prepared.

A listing of parcels to be assessed within this District, along with the proposed assessment amounts, shall be submitted to the City Clerk, under separate cover, and by reference is made part of this Report.

Non-assessable lots or parcels may include areas of public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas and rights-of-ways including public greenbelts and parkways; utility rights-of-ways; common areas; landlocked parcels, small parcels vacated by the County, bifurcated lots, and any other property that cannot be developed. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempted from assessment.

At the conclusion of the public hearing for the District and the proposed assessments, approval of the Report (as submitted or as modified) confirms the method of apportionment and the assessment rate to be levied against each eligible parcel and thereby constitutes the approved levy and collection of assessments for FY 2023/24. The listing of parcels and the amount of assessment to be levied shall be submitted to the County Auditor/Controller and included on the FY 2023/24 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the Current Fiscal Year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved in this Report. Therefore, if a single parcel has changed to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

## COUNCIL COMMUNICATION

**CC #: 2671**  
**File #: 0900-02**

**Title:** Environmental Utilities Operations Center Phase 1A Project - Professional Design Services Agreement  
**Contact:** Janice Gainey 916-774-5535 jrgainey@roseville.ca.us

**Meeting Date: 5/3/2023**  
**Item #: 7.11.**

### RECOMMENDATION TO COUNCIL

Staff recommends that the City Council adopt a resolution approving the Professional Design Services Agreement with HDR Engineering, Inc. (HDR) for the design and environmental documentation for the proposed Environmental Utilities Operations Center Phase 1A in the amount of \$2,930,300 and authorizing the City Manager to execute it on behalf of the City of Roseville.

### BACKGROUND

To address ongoing growth of the City, and corresponding demands for support facilities needed to provide municipal services, the City is considering a project to design and construct a new Environmental Utilities Operations Center. This facility is proposed to encompass the following buildings, functions, and process equipment:

#### A. Resource Recovery and Transfer Operations (RRTO).

The RRTO will provide the following services to support EU's operations through buildout of the City:

- Waste Services transfer station.
- Organics receiving and pre-processing/transfer building. Sized to meet the SB 1383 requirements.
- Self-haul waste receiving, recyclables drop-off and household hazardous waste facility.
- Waste Services Material Processing and Waste Transfer Station Facilities.
- Gasification and transformation Facilities are being considered as future process functions on this site.

#### B. Administrative Building

- This facility will have administrative offices, crew areas, internal break room, public meeting rooms, large conference room, in-door gymnasium for staff, a kitchen, and miscellaneous indoor and outdoor functional areas.

#### C. Fleet Vehicle Maintenance Facility

- Vehicle Maintenance Building for servicing of Water, Wastewater, and Waste Services operations vehicles as well as Waste Services collection vehicles.

#### D. Vehicle charging stations and infrastructure

- Electric charging stations for light to medium duty vehicles.
- Electric backbone infrastructure for charging of heavy-duty vehicles in the future.

#### E. Parking Areas and Access Roadways

- Sufficient parking for operational vehicles (heavy and light duty), staff, and members of the public.
- Access roadways on the site between functional areas.

#### F. Utilities

- Installing and connecting municipal storm drain, potable water or sewer services to Project site. Upgrading electric power at the site.

#### G. Additional Site Improvements

- Demolition and removal of existing buildings or infrastructure on the property.
- Security systems including gates, controlled access, cameras, emergency access by fire and police.
- Water efficient landscaping throughout the facility. All facilities are required to follow the City of Roseville Water Efficient Landscape Ordinance (WELo).

HDR's scope of work includes preliminary design and the preparation of environmental studies, reports, and documents sufficient to prepare California Environmental Quality Act documentation required for all the facilities and improvements listed in items A. through G.

This project is proposed to progress in several Phases. The City published a Request for Proposals (RFP) for Professional Design Services for Phase 1 on September 30, 2022.

On November 16, 2022, one (1) consultant submitted a proposal for Professional Design Services for the Project. The proposal, from HDR Engineering, Inc., was evaluated by Environmental Utilities staff and an interview with the HDR team was held on December 15, 2022, to discuss assumptions, scope, fee, and sequence of work. Through these discussions, it was realized that until the initial investigations, analysis, and preliminary tasks were complete, scoping of subsequent tasks described in the RFP could not be accurately defined. It was agreed that tasks for Phase 1 should be divided into two groups; Phase 1A and Phase 1B as the tasks in group 1B could be more accurately defined and refined costs could be prepared after the findings of group 1A tasks were completed. Staff intends to award the contract for Phase 1B at a later date under the original RFP as all tasks in Phase 1 were included in the RFP.

HDR's Professional Design Services Agreement is attached. The scope and fee schedule are included in the agreement as Exhibit A (scope) and Exhibit B (fee schedule).

#### FISCAL IMPACT

The total project budget needed for Phase 1A is \$2,930,300 and is available from resources in the Waste Services Operations and the Water Operations funds.

## ENVIRONMENTAL REVIEW

Environmental Services to prepare an environmental analysis of the proposed future site development pursuant to California Environmental Quality Act (CEQA) are part of HDR's scope of work for Phase 1A. It is anticipated that CEQA compliance will require a stand-alone EIR that includes both Project-level and programmatic analysis, making maximum use of other analyses in the area, including the recent Sunset Area Plan EIR and the Roseville Industrial Park project. The approval of a contract for design and environmental documentation does not commit the City to approval of the proposed project, and provides the necessary authorization to prepare documentation pursuant to CEQA. The project is covered by the common sense exemption that CEQA applies only to projects which have the potential for causing a significant effect on the environment.

## CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal F - Invest in well-planned infrastructure and growth

Respectfully Submitted,

Janice Gainey, Principal Engineer

Richard Plecker, Environmental Utilities Director

---

Dominick Casey, City Manager

### **Description**

Resolution 23-150

HDR Agreement

RESOLUTION NO. 23-150

APPROVING A PROFESSIONAL DESIGN SERVICES AGREEMENT, BY AND BETWEEN  
THE CITY OF ROSEVILLE AND HDR ENGINEERING, INC., AND AUTHORIZING THE  
CITY MANAGER TO EXECUTE IT ON BEHALF OF  
THE CITY OF ROSEVILLE

WHEREAS, a professional design services agreement for the Environmental Utilities  
Operations Center Project, Phase 1A, by and between the City of Roseville and HDR  
Engineering, Inc., has been reviewed by the City Council; and

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Roseville that  
said agreement is hereby approved and that the City Manager is authorized to execute it on  
behalf of the City of Roseville.

PASSED AND ADOPTED by the Council of the City of Roseville this \_\_\_\_ day of  
\_\_\_\_\_, 2023, by the following vote on roll call:

AYES COUNCILMEMBERS:

NOES COUNCILMEMBERS:

ABSENT COUNCILMEMBERS:

## **PROFESSIONAL DESIGN SERVICES AGREEMENT**

### **Environmental Utilities Operations Center Project – Phase 1**

THIS AGREEMENT is made and entered into this \_\_\_\_ day of \_\_\_\_\_, 20\_\_,  
by and between the City of Roseville, a municipal corporation (“CITY”), and HDR Engineering,  
Inc., a Nebraska corporation (“CONSULTANT”); and

### **W I T N E S S E T H:**

WHEREAS, CITY desires professional design services consisting of engineering  
analysis, strategic planning, field investigation, environmental services, and engineering design;  
and

WHEREAS, CONSULTANT has prepared a proposal dated November 16, 2022, which  
describes the scope of work to be performed by CONSULTANT, the budget for the work, and  
the schedule for performance of the work; and

WHEREAS, CONSULTANT is qualified and experienced to provide such professional  
design services related to the Environmental Utilities Operations Center Project – Phase 1.

NOW, THEREFORE, the parties agree as follows:

1. Services. CONSULTANT shall perform, at the direction of CITY, the scope of  
services as described in EXHIBIT “A,” attached hereto and incorporated herein by this  
reference. CONSULTANT shall perform all services with the care and skill ordinarily used by

members of CONSULTANT's profession practicing under the same or similar circumstances at the same time and in the same locality.

2. Compensation. For its services provided hereunder, CONSULTANT shall be compensated on a time and expense basis in accordance with the budget estimate as described in EXHIBIT "B," attached hereto and incorporated herein by this reference. Total compensation shall not exceed two million, nine hundred thirty thousand, three hundred dollars (\$2,930,300).

CONSULTANT shall submit monthly invoices for its services. Such invoices shall be delineated by task, the person performing the services, and the hourly rate, which shall be stated in time increments of not greater than one-tenth (1/10) hours. CITY shall pay invoices within thirty (30) days after receipt, if the services specified in the invoice have been satisfactorily completed.

3. Indemnification. To the fullest extent allowed by law, CONSULTANT agrees to indemnify, including the cost to defend CITY, and its officers, agents, employees and volunteers from any and all claims, demands, costs or liability that arise out of, or pertain to, or relate to the negligence, recklessness, or willful misconduct of CONSULTANT and its agents in the performance of services under this contract, but this indemnity does not apply to liability for damages for death or bodily injury to persons, injury to property, or other loss, arising from the sole negligence, willful misconduct or defects in design by CITY or the agents, servants, or independent contractors who are directly responsible to CITY, or arising from the active negligence of CITY. Notwithstanding any terms of this section, indemnification and defense obligations shall conform to California Civil Code Section 2782.8.

CONSULTANT agrees to defend and indemnify CITY if, despite the parties intent and practice, any venue, agency, or court with competent jurisdiction determines that

CONSULTANT and/or any of its agents, officers, employees, volunteers, independent contractors, or subcontractors, are characterized as employee(s) of CITY.

CONSULTANT's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.

4. Insurance. CONSULTANT agrees to continuously maintain, in full force and effect, the following minimum policies of insurance during the term of this Agreement.

| <u>COVERAGE</u>                               | <u>LIMITS OF LIABILITY</u>                                                                                                       |
|-----------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------|

a. Form. CONSULTANT shall submit a certificate evidencing such coverage for the period covered by this Agreement in a form satisfactory to Risk Management and the City Attorney, prior to undertaking any work hereunder. Any insurance written on a claims made basis is subject to the approval of Risk Management and the City Attorney.

b. Additional Insureds. CONSULTANT shall also provide a separate endorsement form or section of the policy showing CITY, its officers, agents, employees and volunteers as additional insureds for each type of coverage, except for Workers' Compensation

and Professional Liability. Such insurance shall specifically cover the contractual liability of CONSULTANT. The additional insured coverage under the CONSULTANT's policy shall be primary and noncontributory, as evidenced by a separate endorsement or section of the policy, and shall not seek contribution from CITY's insurance or self-insurance. In addition, the additional insured coverage shall be at least as broad as the Insurance Services Office ("ISO") CG 20 01 Endorsement. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be: (1) the minimum coverage and limits specified in this Agreement; or (2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater.

c. Cancellation/Modification. CONSULTANT shall provide ten (10) days written notice to CITY prior to cancellation or modification of any insurance required by this Agreement.

d. Umbrella/Excess Insurance. The limits of insurance required in this Agreement may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of CITY (if agreed to in a written contract) before CITY's own insurance shall be called upon to protect it as a named insured.

e. Subcontractors. CONSULTANT agrees to include in its contracts with all subcontractors the same requirements and provisions of this Agreement, including the indemnity and insurance requirements, to the extent they apply to the scope of the subcontractor's work. Furthermore, CONSULTANT shall require its subcontractors to agree to be bound to CONSULTANT and CITY in the same manner and to the same extent as CONSULTANT is

bound to CITY under this Agreement. Additionally, CONSULTANT shall obligate its subcontractors to comply with these same provisions with respect to any tertiary subcontractor, regardless of tier. A copy of CITY's indemnity and insurance provisions will be furnished to the subcontractor or tertiary subcontractor upon request.

f. Self-Insured Retentions. All self-insured retentions ("SIR") must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or CITY. CITY reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.

g. Waiver of Subrogation. CONSULTANT hereby agrees to waive subrogation which any insurer of CONSULTANT may acquire from CONSULTANT by virtue of the payment of any loss under a Workers Compensation, Commercial General Liability or Automobile Liability policy. All Workers Compensation, Commercial General Liability and Automobile Liability policies shall be endorsed with a waiver of subrogation in favor of CITY, its officers, agents, employees and volunteers for all work performed by CONSULTANT, its employees, agents and subcontractors.

h. Liability/Remedies. Insurance coverage in the minimum amounts set forth herein shall not be construed to relieve CONSULTANT of liability in excess of such coverage, nor shall it preclude CITY from taking such other actions as are available to it under any other provisions of this Agreement or law.

5. Records. CONSULTANT and its subcontractors shall maintain all files and records relating to the services performed hereunder during the term of this Agreement and for a

period of not less than one (1) year after the date of termination or expiration. Provided, however, that in the event of litigation or settlement of claims arising from the performance of this Agreement, CONSULTANT and its subcontractors shall maintain all files and records until such litigation, appeals or claims are resolved. Duly authorized representatives of CITY shall have right of access during normal business hours and after reasonable notice to CONSULTANT's and subcontractors' files and records relating to the services performed hereunder, and may review and copy the files and records at appropriate stages during performance of the services and during the one (1) year period following termination or expiration of this Agreement. CONSULTANT shall include this provisions in its contracts with all subcontractors.

6. Time is of the Essence. Time is of the essence of this Agreement.

7. Prevailing Wages. When applicable, for purposes of this Agreement, CONSULTANT and its subcontractors shall comply with all applicable prevailing wage laws, e.g., but not limited to, California Labor Code Sections 1770 et seq. In accordance with said Section 1775, CONSULTANT shall forfeit as a penalty to the City two hundred dollars (\$200) for each calendar day or portion thereof for each worker paid less than the prevailing rates for such work or craft in which such worker is employed for any work done on-site under the Agreement by CONSULTANT or by any subcontractor in violation of the provisions of the Labor Code and in particular, Labor Code Sections 1770 to 1780, inclusive. In addition to said penalty and pursuant to said Section 1775, the difference between such stipulated prevailing wage rates and the amount paid to each worker for each calendar day or portion thereof for which each worker was paid less than the stipulated prevailing wage shall be paid to each worker by CONSULTANT or the applicable subcontractor.

Pursuant to the provisions of California Labor Code Section 1773, the contracting department has identified the source, stated below, of the general prevailing rate of wages applicable to the site to be done, for straight time, overtime, and holiday work. The holiday wage rate listed shall be applicable to all holidays recognized in the collective bargaining agreement of the particular craft, classification or type of worker concerned. These wage rates may be obtained from the State Department of Industrial Relations and/or the following website address: <http://www.dir.ca.gov/dlsr/DPreWageDetermination.htm>.

Pursuant to Labor Code Section 1773.2, general prevailing wage rates set forth above, which forms a part of this Agreement, shall be posted by CONSULTANT at a prominent place at the work site. Prevailing wage rates to be posted at the work site will be furnished by the contracting department. The possibility of wage increases is one of the elements to be considered by CONSULTANT in determining its proposal, and will not under any circumstances be considered as the basis of a claim against CITY or the Agreement.

8. Contractor Registration. No contractor or subcontractor may work on a public works project unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. During the performance of this Agreement, CONSULTANT and its subcontractors shall have a continuing legal obligation to maintain current registration with the Department of Industrial Relations. CONSULTANT is hereby notified that this Agreement is subject to compliance monitoring and enforcement by the Department of Industrial Relations.

9. Compliance with Laws. CONSULTANT shall comply with all federal, state and local laws, ordinances and policies as may be applicable to the performance of services under this Agreement.

10. Ability to Perform. CONSULTANT agrees and represents that it has the time, ability and professional expertise to perform the services required under this Agreement.

11. Governing Agreement. In the event of any conflict between this Agreement and its EXHIBITS, the provisions of this Agreement shall govern. In the event of any conflict between any of the EXHIBITS, the provisions of the first in order of attachment shall govern.

12. Assignment. CONSULTANT is employed to perform unique personal services. CONSULTANT shall not assign this Agreement without the prior written consent of CITY. CONSULTANT shall not employ or otherwise incur any obligation to pay other specialists or experts for services in connection with this Agreement, without prior written consent of CITY.

13. Independent Contractor. CONSULTANT, inclusive of its agents, officers, employees, volunteers, independent contractors, and subcontractors, shall act as an independent contractor, and covenants and agrees that it will conduct itself consistent with such status, that it will neither hold itself out as, nor claim to be, an officer or employee of CITY by reason of this Agreement.

CONSULTANT and CITY agree that: (a) CONSULTANT is free from the control and direction of CITY in connection with the performance of the work; (b) CONSULTANT is providing services directly to CITY; (c) CONSULTANT has and will maintain at all relevant times a business license; (d) CONSULTANT maintains a business location that is separate from CITY; (e) CONSULTANT is customarily engaged in an independently established business of the same nature as that involved in the work performed hereunder; (f) CONSULTANT actually contracts with other businesses to provide the same or similar services and maintains a clientele without restrictions from CITY; (g) CONSULTANT advertises and holds itself out to the public as available to provide the same or similar services;

(h) CONSULTANT provides its own tools, vehicles, and equipment to perform the services; (i) CONSULTANT has negotiated its own rates; (j) CONSULTANT set its own hours and location of work in accomplishing CITY's on-call needs; and (k) CONSULTANT has the right to control the manner and means of accomplishing the result desired and exercises its own expert independent judgement.

14. Representation and Warranties. CONSULTANT warrants that it has not employed or retained any company or person, other than a bona fide employee working for CONSULTANT, to solicit or secure this Agreement, and that it has not paid or agreed to pay any company or person, other than a bona fide employee, any fee, commission, percentage, brokerage fee, gift or any other consideration, contingent upon or resulting from the award or making of this Agreement. For breach or violation of this warranty, CITY shall have the right to terminate as void this Agreement, without liability, or, in its discretion, to deduct from the Agreement price or consideration, or otherwise recover, the full amount of such fee, commission, percentage, brokerage fee, gift or contingent fee.

15. Successors in Interest. This Agreement shall be binding upon the heirs, successors, executors, administrators and assigns of the respective parties hereto.

16. Copyright, Ownership and Use of Materials. All tangible materials ("Material") created or delivered pursuant to this Agreement is considered a work made for hire under the Copyright Act. To the extent such Material does not qualify as a work made for hire, CONSULTANT hereby assigns to CITY all right, title, and interest, including but not limited to all copyrights, in all Material created by CONSULTANT in its performance under this Agreement. Material constitutes the scope of work outlined in Exhibit A and attached hereto, and all written and other tangible expressions, including but not limited to, drawings, papers,

documents, reports, surveys, renderings, exhibits, sketches, maps, models, prints, paintings or photographs, in any and all media or formats in which such materials have been created or are maintained. All Material furnished by CONSULTANT is, and shall remain, the property of CITY. Any modification or reuse of such Materials for purposes other than those intended by this Agreement shall be at CITY's sole risk and without liability to CONSULTANT.

CONSULTANT shall execute any documents necessary to effectuate such assignment. In the event that CONSULTANT uses, employs, designates, or retains any person or entity who is not an employee of CONSULTANT, to perform any work required of it pursuant to this Agreement, CONSULTANT shall require said person or entity to execute an agreement containing the preceding paragraph.

17. Termination of Agreement. The City may terminate this Agreement without cause by giving CONSULTANT ten (10) days advance written notice from the City Manager. The City may also terminate this Agreement for cause but only after providing CONSULTANT written notice of the breach and a period of ten (10) days to cure. CONSULTANT may terminate this Agreement without cause by giving CITY thirty (30) days advance written notice. In the event of termination through no fault of CONSULTANT, CITY shall compensate CONSULTANT for services performed as of the date of termination, upon the release to CITY of all Material hereunder, in any and all media or formats in which such materials have been created or are maintained. CITY retains the right to receive and use any Material, notwithstanding any termination or any dispute regarding the amount to be paid.

18. Attorney's Fees; Venue; Governing Law. If either party commences any legal action against the other party arising out of this Agreement or the performance thereof, the prevailing party in such action shall be entitled to recover its reasonable litigation expenses,

including but not limited to, court costs, expert witness fees, discovery expenses, and attorneys' fees. Any action arising out of this Agreement shall be brought in Placer County, California, regardless of where else venue may lie. This Agreement shall be governed by and construed in accordance with the laws of the State of California.

19. Modification. This Agreement and each provision contained herein may be waived, amended, supplemented or eliminated only by mutual written agreement of the parties.

20. Severability. If any of the provisions contained in this Agreement is for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

21. Notices. Any notices to parties required by this Agreement shall be delivered personally or mailed, U.S. first class postage prepaid, addressed as follows:

CITY OF ROSEVILLE

Richard D. Plecker  
Environmental Utilities Director  
2005 Hilltop Circle  
Roseville, CA 95747

CONSULTANT

Tim Raibley  
HDR Engineering, Inc.  
2365 Iron Point Road, Ste. 300  
Folsom, CA 95630

Either party may amend its address for notice by giving notice to the other party in writing.

22. Integrated Agreement. This is an integrated agreement and contains all of the terms, considerations, understanding and promises of the parties. It shall be read as a whole.

23. Subsurface Conditions. In soils, foundation, groundwater, and other subsurface investigations, the actual characteristics may vary significantly between successive test points and sample intervals and at locations other than where observations, exploration, and investigations have been made. Because of the inherent uncertainties in subsurface evaluations, changed or unanticipated underground conditions may occur that could affect total cost and/or execution. These conditions and cost/delays associated with such variances are not the

responsibility of CONSULTANT and, if such conditions impact CONSULTANT's services, the parties will negotiate an equitable adjustment to CONSULTANT's fee and/or schedule for performance.

24. Cost Estimates. Any opinions of probable project cost or probable construction cost provided by CONSULTANT are made on the basis of information available to CONSULTANT and on the basis of CONSULTANT's experience and qualifications, and represents its judgment as an experienced and qualified professional engineer. However, since CONSULTANT has no control over the cost of labor, materials, equipment or services furnished by others, or over the contractor(s') methods of determining prices, or over competitive bidding or market conditions, CONSULTANT does not guarantee that proposals, bids or actual project or construction cost will not vary from opinions of probable cost CONSULTANT prepares.

25. Construction Procedures. CONSULTANT's observation or monitoring portions of the work performed under construction contracts shall not relieve the contractor from its responsibility for performing work in accordance with applicable contract documents. CONSULTANT shall not control or have charge of, and shall not be responsible for, construction means, methods, techniques, sequences, procedures of construction, health or safety programs or precautions connected with the work and shall not manage, supervise, control or have charge of construction. CONSULTANT shall not be responsible for the acts or omissions of the contractor or other parties on the project.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attested to by its City Clerk

under the authority of Resolution No. \_\_\_\_\_, adopted by the Council of the City of Roseville on the \_\_\_\_ day of \_\_\_\_\_, 20\_\_, and CONSULTANT has caused this Agreement to be executed.

RE: Exhibit A: Scope of Services to Provide Professional Design Services for the City of Roseville' Utility Operations Center Phase 1 RFP # 08-104

Dear Janice,

HDR is pleased to offer the attached Scope of Work for the City's Environmental Utility Operations Center Project Phase 1. We have rearranged the tasks in the RFP slightly to fit our approach to the Project by adding several tasks that we believe are instrumental in the success of the Project and rearranging the tasks to fit the anticipated project phasing. We offer the following table as a guide to correlate the RFP tasks to HDR's proposed task list.

| RFP Task and Name                           | Proposed Task and Name                      | Description/Rationale                                                                                         |
|---------------------------------------------|---------------------------------------------|---------------------------------------------------------------------------------------------------------------|
| <b>Phase 1A</b>                             |                                             |                                                                                                               |
| 1. Project Management and Meetings          | 1. Project Management and Meetings          |                                                                                                               |
|                                             | 2. Strategic Planning                       | The new task is needed to focus the planning and design efforts to meet the 2025 RRTTO construction schedule. |
| 2. Field Investigations and Data Collection | 3. Field Investigations and Data Collection |                                                                                                               |
| 3. Environmental Services                   |                                             | The task has moved down to Proposed Task 5.                                                                   |
| 4. Conceptual Design                        | 4. Conceptual Design                        |                                                                                                               |
|                                             | 5. Environmental Services                   | The task was moved to occur after the Conceptual Design that will be used in the Project description.         |

| Phase 1B                       |                                |                                                                                                                                                                                |
|--------------------------------|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 5. Preliminary Design and BODR | 6. Preliminary Design and BODR |                                                                                                                                                                                |
|                                | 7. Permitting                  | The new task is needed to secure state and local permits for the RRTO. This will occur concurrently with CEQA. The scope and budget for this task is not included at this time |
| 6. Final Design of RRTO        | 8. Final Design of RRTO        | The scope and budget for this task is not included at this time                                                                                                                |
| 7. CD and Contracting Support  | 9. CD and Contracting Support* | The scope and budget for this task is not included at this time.                                                                                                               |
| 8. ESDC and CM                 | 10. ESDC and CM*               | The scope and budget for this task is not included at this time.                                                                                                               |

*\*Scope and Budget to be negotiated at a later date.*

HDR understands and the City has agreed that after the Tasks included in Phase 1A are complete, the tasks in Phase 1B will be refined to reflect the project that has evolved at that point and that HDR will develop a scope and fee for the Phase 1B tasks at that time.

Sincerely,  
HDR Engineering, Inc.

# Exhibit A - Scope of Work

## For the City of Roseville Environmental Utilities Operations Facility Design Services - Phase 1A

### **TASK 1. Project Management and Meetings**

The purpose of Task 1 is to support project management services and keep the City informed of the progress of the Project. This task will address the following key aspects:

- a. Overall project, cost, and schedule management.
- b. Specific routine and deliverable meetings with the City.
- c. Critical path scheduling.
- d. Web based project file management and tracking system.
- e. Quality Assurance/Quality Control (QA/QC) for overall project deliverables (specific design submittal QA/QC included in relevant tasks).

#### **Project Management and Meetings**

##### **Task 1.1 Project Management**

The HDR Team will monitor the phases of work. Project Management will be managed under a single project management task for project execution, office administration, invoicing, coordinating work of the design team, and coordinating and reporting on the progress of the Project to the City. We will monitor project progress, assign labor resources, review work products, respond to City requests and concerns, and maintain communications with City staff regarding the work schedule and budget.

Monthly invoices will include progress reports and each report will summarize the work accomplished during the billing period, the work forecast anticipated for the following month, and a summary of the spent and remaining amounts.

Preparation of Critical Path Scheduling for the duration of the Project prior to construction will be performed under this task. Scheduling will be performed using Microsoft Project.

##### **Task 1.2 Meetings**

The HDR Team will schedule a Project kick-off meeting and technical review meetings to facilitate dialogue between project team members and to review submittals at subsequent phases of the work.

- Facilitate a bi-weekly virtual meeting during the first six months of the Project to keep the City staff apprised of the Project's progress.
- Schedule a pre-design meeting with City staff to discuss and investigate options and available alternatives for facility settings, equipment, and construction logistics.

- Schedule coordination meetings, workshops, and technical review meetings with key City staff and appropriate technical specialists. This will include agendas for upcoming meetings, Project meeting minutes, and a master log for tracking action items.

### **Task 1.3 Quality Assurance/Quality Control**

Provide and perform QA/QC. Establish a web-based document and tracking system for work progress submittals, exchange of information, and project cost tracking.

- Conduct formal internal review procedures prior to submittal of the Project deliverables to provide an objective check on the adequacy of the related work products.

### **Assumptions for Task 1:**

- For the first six months of the Project, the HDR Project Manager (PM) will facilitate a virtual bi-weekly status meeting to report on the progress of the Project. For the remainder of the Project, the meeting frequency will be reduced to a monthly status meeting.
- PM tasks are based on activities through Task 5 for the design of the Resource Recovery and Transfer Operation (RRTO). For budgeting purposes, it is assumed 18 months duration from commencement of the Project to the completion of Task 5, California Environmental Quality Act (CEQA) effort.
- For scheduling, it is anticipated startup and significant activity within the first three months for a total of 50 hours. For the remainder of the duration, it is assumed five hours per month that includes schedule maintenance.
- It is assumed that the City will identify and provide its core team members to the Project Management team for attendance at regular Project update meetings.

At the end of the Project, HDR assumes the City will move data from the web-based document and tracking system to their server, unless otherwise requested.

### **Deliverables for Task 1:**

- Monthly Progress Reports.
- Meeting Agendas and Meetings Minutes.
- Web-based Project tracking system.
- Microsoft Project-based Critical Path Schedule will be transmitted electronically to a PDF format monthly for two years.

## **TASK 2. Strategic Planning** *(HDR proposed task)*

The purpose of this task is to define the functional requirements and timing of the facilities, to simplify the subsequent CEQA, Permitting, and Design efforts to produce a project implementation process that meets the Project delivery sequencing. This will be accomplished by performing the following steps:

- a. Create a Facilities Functional Strategic Team (Facility Team) and determine key functional requirements of the project and associated schedule for implementation.

- b. Create a Utilities Strategic Team (Utilities Team) and determine the direction and schedule of delivery of the required water, sewer, power, and stormwater utility services.
- c. Create an Environmental and Permitting Strategic Team (Environmental and Permitting Team) to determine the strategy for both CEQA and environmental permitting efforts to streamline the processes for efficiency, long term flexibility, and functional expansion of future phased development.
- d. Document a summary of the insights and recommendations of the individual Strategic Team efforts into a consolidated guidance document for the Conceptual Design, CEQA, and Permitting tasks.

Sequencing of the meetings and deliverables for this strategy phase will be conducted to avoid overlap and undue requirements of the City staff. The following subtasks describe each of these key aspects.

### **Task 2.1 Facility Team**

It is anticipated the Air Pollution Control District (APCD)'s review of a new compost facility could result in heightened analysis that would extend the CEQA review process and prevent the RRTO from being constructed within the City's timeframe. While we understand this function is desirable, it may be preferable to include this function at a programmatic level rather than a Project level in the CEQA process. The nuance of how these topics are resolved through the CEQA/permitting process is described in the forthcoming Environmental Strategy task. We point this example out as an illustration of the types of concerns we believe need to be vetted regarding the future waste facility functions and the overall permitting process. Additional facility functions that may impact the process include anaerobic digestion, gasification, and related conversion technologies.

The Facility Team will be performed by two separate groups, namely a group focused on the Corporation Yard and a separate group focused on the Solid Waste/Recycling functions of the facility. Each group will focus on their respective portion of the future facility but will confer and work together to resolve how the site should be arranged to accommodate both functions.

The Facility Team will begin by reviewing the Corporation Yard Assessment Study, previously prepared by HDR, and the Western Placer Waste Management Authority (WPWMA) facility forecast studies, previously conducted by Jacobs. In addition to review of these two prior studies, the Corporation Yard team will engage Environmental Utility staff using a virtual meeting format to discuss their perspective of the future needs of the Corporation Yard, its area, staffing, and functionality. The Corp Yard team will be led by senior corporation yard staff who will facilitate a series of interactive meetings with the Environmental Utility staff, engaging them on sizing, site massing, infrastructure needs, etc. Some of the key aspects this Corp Yard will need to address is the likelihood of shifting the fleet fueling/charging from CNG to electricity over the near term of the facility use. We will assess these and related topics, bringing our initial insights and concepts into a series of virtual working sessions or meetings. We anticipate the use of virtual meetings initially, which will serve to minimize travel-related costs and focus on the data, analysis, and developing of conceptual site layouts as discussed in Task 4 below. For budgeting purposes, we have assumed up to three virtual meetings for the Corporation Yard team will occur before the final in-person workshop discussed below.

Similar to the Corp Yard functionality, the Solid Waste/Recycling group will confirm project assumptions, throughput ranges and overall sizing-related assumptions for the solid waste aspects of the facility. The Solid Waste/Recycling group will be led by Tim Raibley and supported by our national waste facilities lead Bob Rella. Similar to the Corporation yard team above, the solid waste/recycling team will engage the city staff in a series of virtual meetings. The solid waste/recycling group will discuss changes to the assumptions of future solid waste and recycling options the city may prefer. These include recycling throughput ranges based on recyclables generated within the city but also interest expressed by regional jurisdictions or private sector providers in the region. Other variables include options for transfer and disposal of residuals, transfer and processing of organics elsewhere and/or processing at the new site. Our solid waste/recycling team will offer suggestions for scale house queuing, buy-back and household hazardous waste management functions. Although this task is before the conceptual design effort, these insights will inform our team on the sizing and functionality of the facility which will ultimately be used when developing the conceptual design phase of the project. For budgeting purposes, we have assumed up to three virtual meetings for the Solid Waste/Recycling team will occur before the final in-person workshop discussed below.

As part of the planning efforts, we will address key features of the facility, required timing, influence on the CEQA process, and the likely requirements expected to be imposed on the project by the local/state regulatory agencies. As the planning effort concludes, we anticipate meeting in person to confirm our work using a workshop or charrette format. The intent of the final in-person workshop is to finalize the analysis and conclude the future functional needs of the facility, focusing on those features which are urgent or near term, and those which could be considered optional or postponed to a future time. This approach is also presented in Task 2.3 below; however, it is described here due to the importance of defining the facility function as the primary concern for this team. Following the concluding workshop, key discussions, needs, preferences, and related insights of the meeting will be summarized. Key decisions and programmatic summaries will be documented in a formal Key Decision Document and coordinated with the other strategy teams.

## **Task 2.2 Utilities Team**

The function of the Utilities Team is to analyze and select the appropriate remedy to the lack of utilities at the site. The Utilities Team will be led by senior utility staff who will coordinate the outcomes of each of the specialized topics below.

- **Power Supply:** This team will evaluate the necessity and benefits of either utilizing a temporary utility infrastructure installation, or permanent on-site utilities that could be incorporated into the City systems in the future, or extension and interconnection with the public utility system. We will also explore timing of securing a new service sized to supply the needs of the RRT0 (Phase 1) project versus later to support the larger power demand needs.
- **Sanitary Sewer:** The Sanitary Sewer aspects of the overall site will be explored in conjunction with the Utility Operations Center site and the overall facility plan. Use of a temporary or initial phase sanitary service versus the traditional extension of utilities to the Wastewater Treatment Plant (WWTP) will be assessed. Potential sanitary sewer options may include pressure/mound system, temporary collection, traditional sewer/extension, septic, or a storage system for off-site trucking to the WWTP.

- **Water Supply:** This team will evaluate new RRTO potable and non-potable (fire suppression and wash down) water source including a new groundwater well or extending existing City potable water utility service to the site. Assessment considerations for a new well or use of existing well(s) will be based on available existing well historical performance and flow data.

The Utilities Team will incorporate insights and decisions from the Facility Team efforts to understand the range of demands for each utility category. The Facility Team, in coordination with the City's input, will develop assumptions to support potable and non-potable water demand estimates, such as timing of staff and facility use and occupancy levels, irrigation needs, fire suppression requirements, washdown requirements, etc. The team will develop conceptual alternatives for each option being considered. In lieu of an initial workshop session, a high-level pro/con assessment of the development options will be prepared for each utility. The pro/con assessment will include consideration of cost, time, environmental/permitting process, and other key related metrics. For budgeting purposes, we have assumed up to three virtual meetings for the Utilities team (one for each of the key topics discussed above) will occur.

This information will be provided to the Environmental and Permitting Team for consideration.

### **Task 2.3 Environmental and Permitting Strategic Team**

The Project involves an ambitious effort by the City to provide needed facilities for SB 1383 compliance and achieve the City's sustainability goals over the long term. The environmental and permitting strategy needs to be balanced with environmental review document and permitting requirements for the process to be as seamless as possible to avoid unnecessary time delays in either the environmental review or securing permits.

The compost example referenced above in Task 2.1 depicts the potential influence of a reviewing agency on the CEQA timing. As a first step in the environmental review and permitting processes, our team will assist the City in selecting appropriate boundaries of the environmental study and further determine what aspects would be appropriately addressed from a project-specific level (as part of Phase 1) and other aspects to be addressed programmatically, while allowing for future streamlining and tiering under CEQA. This approach is intended to realize permitting efficiency and flexibility, in addition to articulating the nexus between the state and local permits and the environmental study. Both the environmental study and the state/local permits need to be prepared in such a way that when approved, they provide the city with flexibility in terms of operations and implementing changes to the facility in the future.

The team will focus the results on selecting Project level components confined to those aspects of the facility that are absolutely going to be constructed in the near future and are also relatively straightforward with respect to their permitting pathway. Programmatic level components should be used for aspects of the facility that are more subjective and may or may not eventually be constructed. Also, programmatic components may be features that are currently considered optional and may require prolonged permitting review processes by other agencies. These types of components could slow down the environmental process if these components were included as a Project level. It is anticipated the review process by APCD to be prolonged and may delay APCD from supporting the final Environmental Impact Report (EIR). If the City anticipates the necessity of this component is less than the known features (e.g., the RRTO), it

may be recommended the compost facility be addressed at a programmatic level in the environmental study.

The decisions that define the environmental study will inform the Environmental and Permitting Strategy Team of the structure of the Project Description that will be developed later in the CEQA process, but also the features that are incorporated into the preparation of the Solid Waste Facility Permit and the APCD to construct permit and Countywide Non-Disposal Element permit applications.

## **Task 2.4 Conclusion of Strategic Planning Teams**

It is intended to summarize the outcomes of the three strategic teams into a single Strategy Planning Technical Memorandum (TM). The Strategy Planning TM will summarize the conclusions of each of the strategic teams to inform and guide the subsequent site master planning, CEQA, permitting, and utility/infrastructure tasks.

### **Assumptions for Task 2:**

- Key HDR, Jacobs, Ascent, Douglas Environmental, and Edgar & Associates staff will participate in each of the of the Strategy Planning sessions. Approximately eleven (11) virtual meetings will be conducted with two (2) to four (4) technical professionals in each of the virtual meetings. These include three virtual meetings for the Corporation Yard team, three virtual meetings for the Waste/Recycling team, three (3) virtual meetings for the Utilities Team and two (2) virtual meetings for the Environmental Team have been budgeted. Also, we have assumed up to six (6) technical professionals will attend the one day in-person workshop at the conclusion of the planning process.
- Strategy Planning sessions are assumed to be focused efforts to identify key, high-level decisions to guide the subsequent planning, permitting, and design efforts to be as successful and efficient as possible. The Strategic Planning sessions are envisioned to be completed within a concentrated ten to twelve-week timeframe.
- Key decision makers representing the City's technical, planning, financial, and management are assumed to be available to participate in these strategic planning efforts.
- Scope of work and fee is based on two rounds of review for each submittal and assumes (except for the Final submittal) reviewers will backcheck comment responses against the updates included in the subsequence submittal.
- Available data on existing groundwater wells (such as geotechnical, well logs, historical performance and groundwater levels, water quality, and maintenance records) will be provided by the City and will be used for desktop comparison of 1) existing groundwater wells, 2) new groundwater wells, and 3) potable water pipeline extension. Data gaps will be addressed through use of assumptions for the purpose of the strategic evaluation. Field investigation of existing wells is not included in this scope.

### **Deliverables for Task 2:**

- Meeting Agendas and Minutes, including Key Decisions.
- Key results of each of the Strategy Team conclusions including:

- a. A Master Facility Function Concept Plan addressing the key aspects of the Project and their respective timing.
  - b. A Master Utility Concept Plan defining the anticipated demands for power, sewer, and water services required by the facility components.
  - c. A Master CEQA/Permitting Concept Plan addressing which components of the Project must be included at a Project level, which can be addressed at a programmatic level, and the rationale for both.
  - d. Develop selection metrics for evaluating a water supply system, e.g., capital and O&M costs, schedule, and risks.
  - e. Develop selection method for evaluating a water supply system, e.g., advantages and disadvantages.
- Draft and Final Technical Memorandum summarizing the results of the combined Strategic Planning phase.

### **TASK 3. Field Investigations and Data Collection**

The purpose of Task 3 is to capture information necessary for later planning and design efforts. This will be accomplished by the following steps:

- a. Develop data request document and submit to the City for response. Should the information be unavailable, site reconnaissance may be required.
- b. Develop survey controls and mapping needs and secure topographic and boundary information required for design.
- c. Develop geotechnical investigation and analysis program requirements at Project planning phase and initiate field and laboratory effort.
- d. Hydrogeologic investigation is an optional task.
- e. CEQA field studies and investigations are included in Task 5.

#### **Task 3.1 Data Collection.**

Collect data required to facilitate the work from the City. Perform site reconnaissance as described below.

#### **Task 3.2 Survey and Mapping**

Prepare a topographic survey for engineering and design purposes. The Project covers a 243-acre site. Deliverables will include survey in an AutoCAD, 2018 or newer, compatible format. Project files, including survey and mapping information, will be tied to the City's GPS monument network.

Records research will be performed to obtain the record deed for the current ownership and available survey maps for the site. A field search will be performed to locate property corner monuments or other boundary evidence. A title report will be purchased and existing easements from that report will be shown. New property monuments will not be set, and no Record of Survey will be filed with the County.

Baseline data used for horizontal control will be coordinated with past surveys at the site, as available and provided by the City, such that a baseline established for this project is the same as a baseline used in a past survey, or it can be converted back to the previous baseline, if necessary. The coordinates and elevations shall be shown in Imperial units. Survey control traverses shall be diagrammed (in the field book) in Imperial units.

**Topographic and Boundary Task/Activities:**

- Use provided survey control from client; otherwise utilize state plane coordinates.
- Set new survey monuments, as needed.
- Set targets for aerial surveying.
- Perform aerial topographic survey for the site.
- Perform land survey to pick up surface features identified as relevant by the City.
- Perform QC survey to check the topographic survey and other survey documents provided by others.
- Process and draft topographic survey.
- Perform final QC for topographic survey.
- Perform subsurface utility assessment within the allowance included in this estimate, as listed below.

**Assumptions and Exclusions for Task 3.2:**

- The City will provide a list of surface features/items to be picked up with the land survey as surface visible and which can be completed in one mobilization.
- Having recently purchased the site, we understand a boundary survey already exists.
- New property monuments will not be set.
- No Record of Survey will be filed.
- No engineered traffic control will be provided.
- No legal descriptions, easements, parcel numbers or ALTA survey included.
- No potholing allowances.
- For budgeting purposes, \$25,000 has been allotted for subsurface utility investigations and mapping. If desired by the City, this allowance could be used by for the survey and civil team to obtain County, Pacific Gas and Electric Company (PG&E), and other available utility maps to compile for approximate utility locations. This would not include septic tanks, wastewater, water, and gas lines to the structures that are not part of these maps. No subsurface features will be “positivity identified,” but assumed to be approximately located based on this work. This information could then be added to the site maps. The contractor could then confirm these locations for construction.

- Work will be completed in one mobilization.

#### **Deliverables for Task 3.2:**

- Topography and digital terrain model (DTM) for the site, including utility mapping.
- A drawing file incompatible with AutoCAD 2018 or newer format, at one-foot contour intervals.
- Aerial photogrammetric photo of the area.

#### **Task 3.3 Geotechnical**

Conduct a geotechnical investigation to inform the Conceptual Planning and CEQA tasks of potential geotechnical constraints that may exist at the site, such as the presence of unsuitable soils. This geotechnical investigation program will be conducted in the planning phase to get a general understanding of the site for planning level decisions about site configuration, presence of unsuitable subsurface conditions, etc. This study will not be appropriate for design level guidance however to constrain the costs of the investigation until the planning level decisions are resolved. The work to be performed for the planning phase is described below.

#### **Planning Phase Geotechnical Study**

As described in Task 2, the HDR Team will undertake a planning effort that will, among other things, help determine the types of facilities that will be needed and their locations. In support of this effort, conduct a planning phase subsurface exploration program and prepare a preliminary geotechnical report for general site information. The preliminary geotechnical report can also be used to support the work effort that will be required under CEQA, including preparation of the EIR.

#### Review of Information

Review available geotechnical and geologic information regarding the Project area, including published geologic information pertaining to the site vicinity. Additionally, review the logs of previous geotechnical explorations provided.

#### Field Exploration and Laboratory Testing

The field investigation program will consist of four to eight borings drilled across the site area to characterize general subsurface conditions. An effort will be made to perform the borings in areas where facilities structures are anticipated to be located. A drilling subcontractor will perform the borings using hollow stem auger drilling equipment. Prior to performing the field exploration, the drilling sub will obtain the required City soil boring permits. A site reconnaissance to locate the exploration point and mark the proposed test borings will be conducted and Underground Service Alert (USA) will be notified prior to undertaking test borings.

An HDR field representative will observe drilling of the borings, log the soil encountered, and obtain soil samples for further visual classification and laboratory testing. The borings will be backfilled upon completion per City boring permit requirements.

Laboratory testing will be conducted on selected samples recovered from the test borings. These tests could include, as appropriate:

- Classification and Index Tests such as fines content, gradation, and Atterberg limits.
- Moisture Content and Density Tests.
- Strength tests.

#### Preliminary Engineering Evaluation and Preliminary Report Preparation

Based on the conditions encountered in the field exploration and laboratory test results, an engineering evaluation will be prepared to develop preliminary geotechnical conclusions and recommendations. A summary planning level geotechnical report describing the subsurface conditions encountered will be prepared and include, as appropriate, field and laboratory test data, logs of the test borings, and a site plan showing the locations of the explorations. The report will present preliminary discussions, conclusions, and recommendations regarding the following, as appropriate:

- Vicinity map and exploration location plan.
- Logs of test borings.
- Site geology and seismicity.
- Soil conditions.
- Groundwater levels.
- Discussion of the potential for seismic hazards, including liquefaction potential.
- Discussion of other geologic and geotechnical considerations for the proposed development.
- Preliminary conclusions and recommendations for anticipated building foundation types and earthwork considerations, including suitability of on-site soil for reuse as fill.

The draft preliminary geotechnical report will be issued in PDF format only, for review and comment by the Project team. Following receipt of review comments, a final preliminary geotechnical report will be prepared in PDF format only.

#### **Assumptions for Geotechnical Task 3.3:**

- Field work will occur during normal weekday work hours.
- Driller will be provided ready access to the site.
- Soil cuttings can be left on site at boring locations.
- The soil cuttings will be relatively free of contaminants. If that is not the case, additional fee would be required for special handling and disposal.
- Potentially liquefiable soil would not be encountered to an extent that would lead to the site being categorized as Site Class F. The California Building Code (CBC) 2019 and American Society of Civil Engineers (ASCE) 7-16 criteria require that site-specific seismic response analysis be performed for Site Class F sites. Additionally, the 2019 CBC extends the requirement for site-specific site response analysis to Site Classes D

and E (in high seismic areas) with three exceptions allowing the use of code-based (i.e., non-site-specific) procedures. It is assumed the Project will meet the appropriate exception(s) and that code-based procedures will be followed to develop project design response spectra. The scope and fee required for site-specific seismic hazard analysis would be additional to what is presented herein and can be determined at a later time, should it be needed. Additional time in the Project schedule would also be required to perform such an analysis.

**Deliverables for Task 3.3:**

- Draft and final planning level geotechnical report in PDF format.

**Task 3.4 Potable Water System – New Well and Potable Pipeline Extension Evaluation**

We will assess the condition, capacity, and water quality of the existing site wells to determine potential viability for use as water supply. Scope activities include:

- Request and review available well data from the City, County, West Placer Ground Sustainability Agency (GSA), California Department of Water Resources (DWR), and GEI files from previous work for the City including well logs, groundwater levels, and water quality.
- Request and review available portable water data from the City and County including utility maps, hydraulic reports, and assessor maps.
- One site visit.

**Deliverables for Task 3.4:**

- Summary TM to summarize options, describe selection metrics and methodology, and preferred option.

**Assumptions for Task 3.4:**

- Existing groundwater wells have geotechnical, installation, historical performance, and maintenance records sufficient for desktop evaluation. Well evaluation and performance pump tests may be required in the future (scoped as Optional Task 3.5).
- Extending the existing potable water utility to the site will be contingent upon available hydraulic flow capacities and right-of-way procurements.
- There are sufficient existing potable water system capacities to meet new RRTO water needs.
- Right-of-way easement for potable water pipeline extension to the site will neither be cost prohibitive or obstructive.
- Scope excludes hydraulic analysis, property title searches, and right-of-way easement procurement.

### **Task 3.5 Existing Well Evaluation (OPTIONAL)**

The HDR Team will assess the condition, capacity, and water quality of the existing site wells to determine potential viability for use as water supply. Scope activities include:

- Examine each well and document the surface conditions with photographs and document physical conditions (e.g., well diameter, casing height above grade, pump information from branding plate, flow control and conveyance equipment).
- Measure the static depth to water if an access port is available.
- In coordination with the farmer and the City, operate each well for a short period (up to 2 hours). Measure the flow of the well (via a temporary flow meter, orifice plate, weir, or other device), wellhead pressure, and pumping level to determine the current well specific capacity. Also monitor temperature, pH, ORP, and conductivity of the groundwater discharge.
- During pump operation, measure pump vibration and, if an electric motor is used, current and voltage of each power lead.
- Work with a pump subcontractor to perform a downhole evaluation of each well.
  1. Remove the pump from each well.
  2. Complete video surveys to evaluate the condition of each well (e.g., depth to groundwater, perforated interval, total depth, condition of blank and perforated casing, presence of scale and/or biomass).
  3. Brush the interior of the well to remove scale and biomass that may have accumulated with age.
  4. Complete a second video survey if scale or biomatter obscured the view of the first survey.
  5. Complete a cement bond log to identify the depth of the annular cement seal below grade.
  6. Complete a 4-arm caliper log of the entire well to evaluate the roundness of the well screens and casing as an indication of unbalance stresses.
  7. Install a test pump and conduct pumping tests to evaluate the capacity of each well, including the following:
    - Step-drawdown pumping test: up to four (4) hours per well to evaluate pumping efficiency (four 1-hour steps) and identify an optimal rate of operation.
    - Constant-rate pumping test: up to eight (8) hours per well to further define flow capacity of each well and the hydraulic characteristics of the aquifer.
    - Measure water levels in the other three wells during each constant-rate test to identify the drawdown caused by each pumping well on the other non-pumping wells.

- Collect a sample of groundwater at the end of each constant-rate test for laboratory analysis of general mineral constituents and Title 22 constituents for drinking water.
- 8. Complete a location survey of each well, including the coordinates of the well center and the elevations of grade and top of casing reference, to support the accurate determination of groundwater direction and gradient of flow.
- 9. Reinstall the existing pump and motor and replace components that were destroyed or damaged during the well assessment if operation of the well is likely to occur in the future.
- 10. If pump/motor appear to have performance characteristics appropriate for production, have the pump and several sections of the line-shaft column disassembled and evaluated by Eaton Pumps to determine remaining service life before reinstalling in the well. (Note: cost for pump contractor evaluation is additional and is not included in the fee.)

#### **Deliverables for Task 3.5 (OPTIONAL):**

- Technical write up to describe the fieldwork and present an interpretation of the findings, including pump and motor condition, for the potential use of these wells for water supply.

#### **Assumptions for Task 3.5 (OPTIONAL):**

- Rehabilitation, such as mechanical swabbing, pumping, and /or chemical treatment to improve flow into the well and remove residual screen deposits, may be recommended based on the second well video.

#### **Task 3.6 Hydrogeologic Investigation (OPTIONAL)**

GEI will conduct hydrogeologic investigations to determine subsurface conditions for suitability for an Aquifer Storage and Recovery well on the project site. We will prepare a technical report to present an interpretation of the findings for the suitability of the subsurface for ASR operations, based on the data review and fieldwork completed in Task 3.4. The report will include a tabulation of the various types of information (e.g., groundwater levels, water quality constituents, flow). Specific activities include:

- Review proposed ASR source water quality information compiled by the City. A recommendation for additional water quality analyses will be provided to the City to reduce uncertainty in the results of the geochemical compatibility assessment.
- Hydrogeologic information compiled in Task 3.4 will be supplemented with data related to aquifer mineralogy, location of existing and planned high-capacity wells, and potentiometric surface information to estimate regional groundwater flow direction and velocity, as well as associated impacts on stored water loss. A spreadsheet model will be used to estimate annual losses for seasonal and drought storage options, based on flow gradient.
- ASR Zone Characterization:
  - Estimate the sustainable injection and recovery rates and potential storage volumes.

- Conduct a preliminary geochemical evaluation to investigate the potential adverse chemical reactions between the source water and groundwater. Potential chemical reactions between the storage zone native water and aquifer matrix, and the recharge water will be identified to assess potential impacts on ASR operations. The U.S. Geological Survey modeling program PHREEQC v.3 (Parkhurst and Appelo, 2013) will be used to simulate potential chemical reactions.
- Estimate cost of a typical ASR well and site improvements, include both capital and operational costs.
- Summarize regulatory requirements for implementing an ASR system.

**Deliverables for Task 3.6 (OPTIONAL):**

- Summary Technical Memorandum – A draft technical memorandum will be prepared to summarize the results of the assessment. A final TM will be prepared to incorporate City review comments.

**Assumptions for Task 3.6 (OPTIONAL):**

- Current/future supply and demand budgets will not be developed or considered.
- City to provide water quality data for the water proposed for ASR management.
- Participate in one project meeting to discuss the results of the investigation.

## **TASK 4. Conceptual Design**

The purpose of this task is to develop preliminary designs of the overall facility Project, inclusive of possible functional uses of the site.

Building on the strategic planning task, we will use the information gained in Task 2 above as input in developing the conceptual design. For this task, we will create a conceptual design for site features (schematic design), including building locations, other structures, demolition requirements, parking and staging areas, traffic circulation, landscape features, and temporary and permanent utilities. The sizing for each of these features will be based on the insights gained in Task 2 but refreshed by city staff if new insights are gained in interim. Additionally, we will develop planning level opinions of probable cost for construction and finalize project level descriptions for incorporation into CEQA process.

We will develop initial design concepts and options to meet the identified Project objectives. As noted above, we will prepare schematic design exhibits indicative of alternative approaches of the facility layout.

We will continue the use of the Facility Team as above, using two separate groups, namely group focused on the Corporation Yard and a separate group focused on the Solid Waste/Recycling functions of the facility. Each group will continue their focus on their respective portion of the future facility but will confer and work together to prepare the conceptual design, resolve the use of shared access, infrastructure, staffing, etc.

The Corporation Yard team will reengage Environmental Utility staff to discuss facility sizing related aspects of the Corporation Yard. The Corp Yard team will continue to be led by Darren Penn, who will prepare the Corporation Yard sizing and conceptual site arrangement efforts. We will continue the use of virtual meetings to conserve budget. We will prepare up to three schematic site arrangements of the Corporation Yard that will be transmitted to the city for review and consideration.

Similar to the Corp Yard functionality, the Solid Waste/Recycling group will reengage to prepare the site sizing and related site configuration plans for the conceptual design. The Solid Waste/Recycling group will continue to be led by Tim Raibley and supported by our national waste facilities lead Bob Rella. The solid waste/recycling group will prepare site sizing analysis and coordinate with the Corporation Yard group to discuss site ingress, utilities and share infrastructure. As mentioned briefly in Task 2 above, the solid waste and recycling group will revisit and refine/reduce the assumptions of future solid waste and recycling options the site will serve. By this time of the project, we will need to focus the conceptual design to address a single, preferred remedy that addresses a defined throughput quantity of recyclables, a preferred remedy for transfer/disposal of MSW and the preferred organics transfer or on-site technology for processing. The Solid Waste/Recycling group will also reengage the city staff to discuss facility sizing related aspects of the solid waste, recycling and organics aspects of the facility. We will also continue the use of virtual meetings to conserve budget. We will prepare up to three schematic site arrangements of the RRTO that will be transmitted to the city for review and consideration.

These efforts will focus on analyzing growth projections and changes in regulations for the administration building, parking, vehicle maintenance facility, vehicle charging facilities, and solid waste handling and processing facilities to refine objectives for the layout and sizing of each functional facility.

To incorporate the preferred site arrangements of both the Corporation Yard and the RRTO, the preferred schematic layout of each of these facilities will be combined into a single site arrangement plan for the city's review and consideration.

The conclusion of this task will be incorporated into the CEQA task for environmental studies and subsequent permitting. So, this task will need to be constrained to the specifics that will be analyzed in the EIR of Task 5.

Although much of our work in this task is anticipated to occur in virtual meetings, we have included time for up to three in-person workshops with City staff to identify current and future objectives for the Environmental Utility Operations Center and to review and refine the overall conceptual general arrangements. We anticipate the preparation of the combined overall site plan will require two of these meetings; one for initial presentation and discussion of benefits/limitations, and the second to incorporate the city's input and to reach consensus of the preferred site before proceeding onto the CEQA task.

We will advance the utilities evaluation study to a conceptual level of design which will include a phasing plan for the sanitary sewer, potable water and power services to proposed facilities for the RRTO needs as defined in the City's Phase 1 development. Upon development of the utility phasing concept, we will meet and review the conceptual design with the applicable parties. Prior comments and responses will also be reviewed and discussed regarding implementation into the design. Deliverables will be provided in electronic format.

We will prepare a Concept Design Report that will discuss:

- Option(s) for the facilities layout:
  - Overall development of known future features.
  - Functional plan requirements.
  - Design considerations.
  - Basic facility construction.
  - Specialty Finishes.
  - Features.
  - Benefits.
- Space requirements.
- Site and operations circulation.
- High/Planning level Construction Cost Estimate(s).
- Offsite improvements at a planning level

We will prepare a conceptual level opinion of probable cost for construction of the project as defined in the Concept Design Report. This estimate will be a Concept/Planning Level (Class 4, assuming equipment is not identified) estimate based on AACE which is a +50/-30% estimate utilizing HCSS estimating software. Design assumptions will be based upon the conceptual design. The draft opinion of probable cost for construction will be submitted to the City for consolidated comments before developing the final deliverable. Deliverables will be provided in electronic format.

#### **Assumptions for Task 4:**

- a. Produce up to three (3) overall concept design layouts following City review and input.
- b. Two (2) rounds of revisions of concept review with the City are assumed. Internal QC comments and City comments will be consolidated and incorporated into the concept documents to prepare the Final Deliverables.

#### **Deliverables for Task 4:**

- Schematic design exhibits.
- Conceptual/Planning level opinions of probable cost.
- Conceptual Design Report.

### **TASK 5. Environmental Services**

The purpose of Task 5 Environmental Services is to prepare an environmental analysis of the proposed future site development pursuant to California Environmental Quality Act (CEQA).

The analysis will utilize the prior BODR for the RRTO and the Conceptual Site Design for the Corporation Yard/City Service Center. Develop Project kickoff, data review, and site visit. This will be accomplished by the following steps:

- a. Create notice of preparation and scoping meeting.
- b. Create Project description such that the subsequent state/regional permits and design efforts may proceed.
- c. Prepare administrative draft EIR with Project description, CEQA required analysis, and alternatives analysis.
- d. Develop final EIR, statement of overriding considerations, and mitigation monitoring and report plan.
- e. Conduct public outreach meetings as defined below.

It is assumed that CEQA compliance with a stand-alone EIR that includes both Project-level and programmatic analysis, making maximum use of other analyses in the area, including the recent Sunset Area Plan EIR and the Roseville Industrial Park project EIR that is currently in preparation. For the purposes of this scope of work, it is assumed that the Project-level analysis will focus on the RRTO, administrative building, maintenance facility, vehicle charging stations, parking areas, and associated site improvements, whereas the programmatic analysis will focus on the optional organics processing system and potential future components and potential future phases of facility expansion. It is also assumed that 508 compliance is not required for the project but can be performed upon request and with amendment to this scope of work.

## **Task 5.1 Project Initiation and Scoping**

### **Task 5.1.1 Project Kickoff, Data Review, and Site Visit**

The HDR PM Ascent's PM and Project Director will attend one Project kickoff meeting with City, staff, and other members of the Project team to discuss the status of Project development and design, identify/confirm project objectives, areas of controversy and potential strategies, key issues and sensitivities and establish communication/review protocols. The general Project schedule will also be discussed. Coordinate with City staff to establish an agenda prior to the meeting. The kickoff meeting will provide the HDR Team an opportunity to inquire further about the Project, the process, and receive new or additional studies or documents.

### **Task 5.1.2 Notice of Preparation and Scoping Meeting**

We will prepare a draft Notice of Preparation (NOP). At this time an Initial Study (IS) is assumed not to be necessary. The NOP will include a brief Project description, Project location, and a list of probable environmental effects. A draft NOP will be submitted to the City for review, incorporate comments received, and produce the final NOP for distribution. It is assumed that City staff will submit (electronically) the NOP to the Placer County Clerk-Recorder. It is anticipated the City maintains a mailing list of interested agencies and parties, and that NOP distribution will be the responsibility of the City.

We will prepare for and attend a scoping meeting and be available to discuss the EIR process, as needed. It is anticipated the City staff will arrange for the meeting space and prepare presentation materials pertaining to the project itself and its technical issues. We will prepare

materials (assumed to be portions of a PowerPoint presentation) pertaining to CEQA and the environmental process. Comment cards will be provided for use by meeting participants and notes of public and agency comments will be recorded. It is anticipated that verbatim recording or hire of a court reporter is not necessary. Public and agency notice of the meeting and logistics (location, times) will be the responsibility of the City.

### **Task 5.1.3 Project Description**

We will utilize project information developed in the Strategic Planning tasks to prepare the EIR Project description as early in the process as possible to confirm that elements of the project are appropriately described. As a part of this effort, we will engage our Permitting staff who will have the responsibility to secure the various state and regional permits for the facility. The future permitting aspects of the project will need to be provided at the time the project description is being crafted, to capture insights and expectations we believe the local and state permitting agencies will require. In particular, these include requirements that CalRecycle and the Health Department will need for the future Solid Waste Facility Permit.

We will coordinate with City staff to fill in gaps identified. The EIR project description will identify Project objectives; Project characteristics, including permanent Project features and operational details; construction information such as phasing, timing (to the degree known), and equipment use; and a list of discretionary approvals expected to be needed for project implementation. The draft Project description will also describe existing characteristics and features of the site. A draft Project description will be submitted to the City for review and comment. Comments will be incorporated and a “final” Project description for use in the EIR.

### **Task 5.2 Draft EIR**

#### **Task 5.2.1 Prepare Administrative Draft EIR**

Prepare the Administrative Draft EIR accordingly. The environmental setting and regulatory setting for each resource area will only focus on the issues of concern for the project. At this time, the EIR is proposed to include chapters addressing the following:

#### Introduction/Project Description

The Introduction will describe the history of the project and the environmental review process to date including a summary of past environmental documents for the project site. The Project description will include a list of required permitting actions, project characteristics, including on- and offsite components, infrastructure support required to serve the Project, schedule, operational characteristics, and other information relevant to an understanding of the Project.

#### Aesthetics and Visual Resources

The EIR analysis will describe how implementation of the Project would alter views of the site from nearby viewpoints and describe light- and glare-related impacts. The EIR will also describe the potential modification of views as a result of potential widening/paving of roadways to and from the Project site. Mitigation will be recommended to reduce or eliminate Project impacts, where necessary. Visual simulations are not anticipated to be required and are not included as part of this scope of work.

#### Land Use Planning and Agricultural Resources

It is anticipated that the Project may affect agricultural soils and/or lands that would be considered according to the State's Farmland Mapping & Monitoring Program. It will include a section that evaluates the project's consistency with existing plans and zoning, addresses the potential loss of important farmland, and provides mitigation to address impacts where appropriate. It is assumed that forestry resources will be identified as an issue not evaluated further within the Draft EIR for this determination.

### Air Quality

The project is located in Placer County, which is under the local air quality jurisdiction of the Placer County Air Pollution Control District (PCAPCD). The EIR setting will include a description of existing air quality conditions in the Project area and the nearby vicinity. This will include information on the location of existing sensitive receptors (e.g., residences) and emission sources, ambient air quality concentration data from the applicable monitoring station(s), attainment designations, and natural factors that relate to the transport and dispersion of air pollutants. Applicable federal, state, and local regulations will also be presented, including thresholds of significance as recommended by PCAPCD and rules for which compliance will be required.

Consistent with the 2017 PCAPCD CEQA Air Quality Handbook, the California Emissions Estimator Model (CalEEMod) will be used to estimate project-generated construction-related and operational-related emissions of criteria air pollutants and precursors on a regional level for mobile and area source types (e.g., vehicle trip generation, natural gas usage, and landscape maintenance equipment). This modeling will be based on PCAPCD-recommended input parameters, project-specific operational data (e.g., type and size of proposed land uses, operational schedule), model default settings, and specific data from the traffic analysis (i.e. VMT). The City's preferred methodology for evaluating cumulative criteria air pollutant impacts diverges from the preferred PCAPCD approach as such the City's approach when evaluating the proposed project will be utilized. It should be noted that the City's approach is more consistent with other APCDs in the Sacramento Valley Air Basin. Evaluate potential mitigation measures, including those described in Appendices C and E of the PCAPCD handbook, as necessary to reduce the impacts of the proposed Project. To address the California Supreme Court decision in *Sierra Club v. County of Fresno* (Case No. S219783), additional discussion to draw the connection between the adequacy of the air quality analysis as it relates to health impacts will be included. No photochemical or air dispersion modeling is proposed for criteria air pollutants and ozone precursors.

Localized carbon monoxide (CO) impacts will be qualitatively addressed based on PCAPCD methodologies. Based on the anticipated level and type of development proposed, it is considered unlikely that CO modeling will be required.

The potential exposure of sensitive receptors to toxic air contaminant (TAC) and odor sources will be assessed quantitatively (e.g., air dispersion modeling and a formal health risk assessments will be performed). As part of the quantitative Human Reliability Assessment (HRA), perform air dispersion modeling using the American Meteorological Society/Environmental Protection Agency Regulatory Model (AERMOD) to determine the average concentration of TACs at nearby receptors. Estimate levels of cancer risk, as well as the chronic and acute non-cancer risks, associated with exposure to these TAC concentrations using the California Air Resources Board's (CARB) Hotspots Analysis and Reporting Program,

Version 2 (HARP2). Risk levels will be estimated in accordance with the latest guidance from the Office of Environmental Health Hazard Assessment and PCAPCD. This scope of work assumes that pre-processed, representative AERMOD-ready meteorological data is available from PCAPCD.

We will prepare dispersion modeling and provide health risk estimates for one Project scenario and include modeling output and risk calculations. We will utilize this output to generate one set of risk isopleths. If the HRA indicates that nearby receptors would be exposed to an incremental increase in health risk that exceeds the thresholds recommended by PCAPCD, identify feasible measures to reduce the level of health risk at affected receptors. More specifically, the HRA will address diesel particulate matter (diesel PM) and other TACs emitted by operational sources at the site, including diesel-powered trucks operating in delivery areas, occasional testing of emergency backup diesel generators, and TACs emitted by either diesel-fueled or natural gas-fired boilers/generators. The quantity of diesel PM emitted by delivery trucks and other mobile sources, as well as boilers and backup diesel generators, will be estimated using guidance from PCAPCD and/or from another APCD (e.g., the San Joaquin Valley Air Pollution Control District's Guidance for Air Dispersion Modeling). Estimate emissions from these TAC sources based on information provided by City staff.

Based on an initial evaluation of naturally occurring asbestos (NOA) in the Project area, it is considered unlikely to occur, and prepare a qualitative assessment of potential impacts related to NOA.

With respect to odors, the proposed transfer and composting operations may result in odors, depending on the type of on-site operations that would occur. At present, it is assumed that the City's composting operation would include design considerations to manage odors such that the EIR may rely on a qualitative analysis, provided by evidence in support of the manner in which composting would occur to manage odors. Dispersion modeling of potential odors can be conducted with an amendment to this scope and cost; however, odor dispersion modeling relies on TAC dispersion modeling techniques and may present an overly conservative analysis.

### Greenhouse Gas Emissions

The EIR will discuss the current state of the science (e.g., Intergovernmental Panel on Climate Change's [IPCC] Fifth Assessment Report) along with applicable regulatory framework (e.g., Assembly Bill [AB] 32, Senate Bill [SB] 375) and relevant guidance. In addition, the setting will describe the City's Sustainability Action Plan (SAP), which was approved in February 2012. The SAP describes six areas targeted for Greenhouse Gas (GHG) emission reduction: land use and green building, energy efficiency, recycling and waste reduction, transportation, water conservation, and marketing and education. Based on the GHG inventory conducted as part of the SAP, the largest percentage (44 percent) of Roseville's GHG emissions are attributed to on-road mobile sources, with residential energy use comprising 22 percent of the GHG emissions inventory.

The analysis of climate change impacts will evaluate the GHG emissions associated with construction and operation of the proposed Project. To the extent feasible, the analysis will also examine the project's consistency with the General Plan, SAP policies, and assumptions in the SAP's GHG emissions forecast. The EIR will also include a discussion of consistency with the Sacramento Area Council of Governments (SACOG) SCS. Pursuant to CEQA Guidelines Section 15064.4(a)(1), project generated GHG emissions will be estimated using CalEEMod.

This modeling will be based on the same assumptions used for the air quality analysis, i.e., PCAPCD-recommended input parameters, Project-specific construction data (e.g., type and size of proposed land uses, construction phasing schedule), model default settings, and specific data from the traffic analysis. GHG emissions modeling assumptions will be reconciled with those used in the GHG emissions inventory to provide consistency. If new additional, feasible mitigation measures are available that are specific to the proposed Project and were not identified in the SAP, those measures will be evaluated for potential to further reduce impacts of Project-related GHG emissions.

### Biological Resources

The biological resources section will summarize the results of previous studies conducted at or near the project site, the observations made onsite during site reconnaissance surveys, local biological inventories, and California Department of Fish and Wildlife (CDFW) and U.S. Fish and Wildlife Service (USFWS) databases for local/regional sensitive species. Based on our current understanding of the site, the majority of the site is agricultural or nonnative grassland, similar to conditions elsewhere within the western portion of the City.

The environmental setting section of the biological resources section of the EIR will be prepared and will include an exhibit showing the location and extent of potential sensitive biological resources in the Project area. Potentially significant direct and indirect impacts on biological resources that could result from implementation of the proposed Project will be described. Feasible and practical mitigation measures that would reduce or eliminate potential adverse impacts on biological resources will be provided. For the purposes of this analysis, it is assumed that a jurisdictional delineation of potential wetlands and/or other waters of the US/State will not be required.

### Cultural and Tribal Cultural Resources

Conduct a cultural resources survey and report for the Project. Due to the potential for regulatory permitting related to work near Pleasant Grove Creek, it is assumed that compliance with National Historic Preservation Act (NHPA) Section 106 (36 CFR 800) will be necessary, in addition to CEQA requirements (California Code of Regulations [CCR] 14 Section 15064.5 and Public Resources Code [PRC] Section 21083.2). Coordinate a records search at the California Historical Resources Information System's North Central Information Center to identify previously recorded sites and previous cultural resource studies documented within a one-half-mile radius of the Project site. Additionally, a request of a sacred lands file search from the California Native American Heritage Commission (NAHC) will be conducted. The NAHC will provide a list of tribal contacts that may have further information regarding the Project area. As part of the Section 106 process, submit a project information letter and location map to each tribal representative on the NAHC list.

Once background research has been completed, conduct an intensive pedestrian field survey of the Project site (~240 acres). An archaeologist meeting the Secretary of the Interior's Standards and Guidelines for Archaeology and Historic Preservation (36 CFR Part 61) will conduct the survey using transects spaced at maximum intervals of 15 meters. For purposes of this proposal, it is assumed a maximum of five archaeological resources will be identified; these resources will be recorded on the appropriate California Department of Parks and Recreation (DPR) 523 forms and evaluated for California Register of Historical Resources eligibility. This proposal assumes no Phase 2 testing of archaeological sites. The cultural report will include

recommendations for additional cultural studies and provide management recommendations for the proposed Project in accordance with CEQA Guidelines Section 15064.5. Locations of sensitive archaeological sites or Native American cultural resources depicted or described in the report will be considered confidential; the report may not be distributed to the public. The report will meet the Secretary of the Interior's Standards and Guidelines and will follow Archaeological Resource Management Reports: Recommended Contents and Format guidelines.

As it relates to compliance with PRC Section 21080.3.1 (AB 52, Statutes of 2014), this scope of work assumes that the City will notify interested Native American tribes of the Project and conduct requested consultation. For the purposes of this scope of work, it is anticipated to assist with the preparation a letter template, one online meeting, and one on-site meeting as part of AB 52 consultation.

Prepare a cultural resources section for the EIR that will address archaeological, historical, and tribal cultural resources, including a discussion of the applicable federal, State, or local policies and regulations; a summary of the prehistoric, ethnographic, and historic-era setting of the Project area; a summary of the methods used to evaluate cultural resources; a description of known historic properties or archaeological resources; and a discussion of impacts and mitigation measures as needed. The analysis of archaeological and historical resources will be developed based on the cultural resources technical report, and the analysis of tribal cultural resources will be based on the outcome of AB 52 consultation, as described above. Based on the lack of existing structures within the Project boundaries, the potential for on-site historic structures is considered low.

### Energy

Evaluate the potential for Project implementation to result in the wasteful, inefficient, or unnecessary consumption of energy resources. Coordinate with City staff to determine levels of energy consumption associated with construction and operation of the Project, including the consumption of diesel fuel, gasoline, natural gas, and electricity. Energy consumption estimates will be consistent with the methodologies used to estimate air pollutant and GHG emissions, including the use of CalEEMod. The City's SAP and 2035 General Plan policies will be important to consider in this analysis, particularly in addressing the question of whether the Project would result in the wasteful use of energy or conflict with adopted renewable energy policies and/or plans.

### Geology and Soils

This section will analyze potential Project-related environmental impacts related to soil stability, landslides, seismicity, and soil erosion. It is assumed the City will provide some information regarding historic geologic/geotechnical evaluations of the project area, or the EIR will be based on other available published information (soils maps, general plan discussions, etc.). The EIR will provide a brief description of the geologic setting, including soil characteristics, and topography. The EIR will describe groundwater monitoring system proposed as part of the Project, within its analysis. Feasible mitigation measures to reduce or avoid significant impacts will be provided. Potential impacts related to mineral resources as part of this section of the EIR will also be evaluated.

### Hazards and Hazardous Materials

The EIR will describe the existing site operations and will identify potential human exposure hazards associated with these operations. The potential for the Project to increase the use of hazardous materials or to increase the acceptance of hazardous materials will be identified. The requirement for the facility to prepare and implement a Hazardous Materials Business Plan will be discussed, including estimates on the types and/or quantities of hazardous materials being handled at the facility.

The storage, processing and composting of waste materials on the site can attract flies, rodents and other vectors. The effectiveness of these and other potential measures to manage vectors associated with the Project operations will be evaluated. In addition, other management practices will be identified, as appropriate.

### Hydrology and Water Quality

The EIR will describe the existing hydrologic setting of the site and surrounding area. Local drainage conditions will be discussed, as well as the regulatory context for both drainage management and water quality. The information included in the previous EIR and recent planning documents regarding the site's existing drainage characteristics will be summarized. The existing drainage facilities that could be affected by the proposed Project will be identified.

Based on existing studies and documentation, this section will include an assessment of the water quality effects of implementing the Project, which may include composting, the processing of food waste on the site, the use of dry fermentation anaerobic digestion processes, the use of wet in-vessel digestion process, and the operation of biogas facilities. The EIR will also describe leachate and surface water monitoring systems as part of its analysis. Potential water quality degradation and soil erosion within the site's drainage system associated with site construction and operations will be qualitatively described. The focus of the analysis will be on the operational components of the Project that could degrade water quality due to the volume of waste materials that would be processed on the site, although a discussion of potential construction effects and how management practices will be implemented may also be necessary. Original research, additional subsurface exploration, additional laboratory testing, and additional modeling are assumed to not be needed. Mitigation measures will be recommended for significant and potentially significant effects.

### Noise and Vibration

The EIR setting will include a presentation of fundamental noise principles and descriptors; identification of applicable federal, State, and local regulations; and a description of existing noise and vibration conditions within the Project area and the nearby vicinity. Noise specialists will review the locations of nearby noise-sensitive receptors and rural residences. The noise setting will include identification of major noise sources in the area (e.g., vehicle traffic, agricultural activities), ambient noise levels, and natural factors that relate to the attenuation thereof. This information will be based on existing documentation and site reconnaissance, including short-term (i.e., 15-minute) noise measurements conducted for the Roseville Industrial

Park project to the east of the Project site. Other relevant noise data will also be used to characterize the noise setting in the Project area.

For Project-generated construction- and operation-related noise, reference measurement data for both airborne noise and ground vibration coupled with prediction methods will be used. Noise impacts identified at the nearest noise-sensitive receptors will be identified, as necessary. The noise specialist will work with the City to identify the appropriate standards to use in this evaluation.

Noise sources associated with the Project would include heavy off-road equipment (e.g., excavators, loaders, dozers), haul vehicles used to transport waste materials to and from the site, the processing and movement of waste materials on the site, and operation of various onsite facilities. Equipment noise estimates will be reviewed and analyzed using reference measurement data and standard attenuation rates to assess impacts at the nearest noise-sensitive receptors.

The significance of short-term and long-term noise impacts will be determined based on comparison to applicable regulations. Mitigation measures will be prepared, as needed, that clearly identify timing, responsibility, and performance standards. This scope of work does not include the assessment of specific abatement measures (e.g., exact sound barrier location and heights), as the level of effort cannot be determined at this time.

#### Population, Employment, and Housing

The EIR will describe the population of the region, as well as local and regional employment and housing statistics. The project is expected to provide jobs, which could increase demand for housing in Roseville, as well as in other nearby communities, including Rocklin, unincorporated Placer County, and potentially others. The focus of the impact discussion will be potential for growth inducement from construction of new uses. No housing would be displaced by the Project; therefore, this issue will be briefly discussed.

#### Public Services

The conversion of the Project site to municipal uses would result in an increased demand for public services, especially emergency services (police and fire). The EIR section will discuss the anticipated demand for services and analyze the capacity of the existing services to serve the Project, based on review of the City's Municipal Service Review (MSR) (police and fire) and communication with service providers (including school districts). School enrollment and capacity information will be provided. This section will describe the Project's potential to result in increased demands for public services including police, fire, emergency services, and recreational facilities such that new or expanded facilities might be constructed or that proposed facilities would result in significant impacts to the environment.

#### Public Utilities

The EIR section will discuss the potential demand for public utilities based on research, discussion with utilities providers, and review of the City's MSR of the Project. Potential future demand from the proposed uses will be estimated to determine if the Project would result in substantial increases in the demand for water, water treatment, wastewater treatment, natural gas, and electricity supplies and infrastructure. This section will discuss impacts from the change in demand for these services. This section will include the extension of public utilities to

the site from the nearest terminus of public utilities which is understood to be near the intersection of Blue Oaks Boulevard and Westbrook Boulevard. For the purposes of this scope of work, it is assumed that utility extensions will be located within the roadway bounds of Phillip Road. If additional land area is necessary, including widening of Phillip Road or alternative routes for utility line extensions, amendment of this scope of work may be necessary. Based on the preliminary components of the Project, it is assumed that the potential water demand for on-site uses will not necessitate preparation of a formal water supply assessment (WSA).

### Transportation and Circulation

The specialized traffic consultant will be utilized for the Transportation and Circulation portion of the EIR. We will analyze the transportation impacts of the Project based on its vehicle miles traveled (VMT) per recent updates to City transportation analysis practices. The City of Roseville General Plan DEIR (2020) utilized VMT per service population (i.e., residents plus employees) along with VMT per capita for citywide VMT estimation purposes. The updated Section 4 of the City's Design Standards states the following: "Analysis may be based on an alternative metric (e.g., VMT/employee) provided it relies on the data and analysis of the current citywide VMT analysis and is reviewed and approved by the City." It should be noted that the selection of VMT per employee requires a comprehensive citywide VMT calculation to calculate the citywide average. A modified approach could focus exclusively on municipal/industrial-type employees versus employees (which would include retail employees). The trip generation, distribution, study area, and methodology for the transportation analysis will be confirmed with City staff prior to initiating studies.

For the purposes of this scope of work, it is assumed that the analysis will use the City's travel forecasting model conversion factors for Public/Quasi-Public which is (3) employees per KSF. A comparison of the project's VMT against baseline VMT will be established to determine if it exceeds thresholds. We will obtain and run the City's travel demand model to obtain VMT information. VMT will be evaluated for Project and program level assessments. Consideration for moving existing services to the new facility will be included to account for the existing trips and trip lengths. A list of feasible mitigation measures that would either reduce impacts to below the threshold or reduce impacts would be provided and quantified to the extent feasible. These typically consist of Transportation Demand Management (TDM) strategies focused on reducing the number of vehicle trips generated by the Project's employees. The City of Roseville General Plan DEIR (2020) contains various TDM strategies that may be considered for the Project.

Following one round of review of the VMT analysis by the City, we will incorporate the analysis provided therein into the transportation section for the EIR.

### Congestion Analysis

Although not required for the CEQA analysis, a limited amount of intersection operations (i.e., level of service [LOS]) analysis is recommended to determine how the Project would affect the City's General Plan LOS policy. This study will be prepared in accordance with the City's Design Standards for Traffic Impact Studies. The study will include level of service evaluation, site access design review, crash history, and traffic signal warrants as needed. Connections for bicycle, pedestrian, and transit facilities will also be included. The LOS traffic analysis is assumed to include up to 12 intersections in the vicinity. It is assumed new traffic counts will be collected and compared to available historical data. Planned roadway network changes and forecast volumes will be utilized for near term and long-term conditions, we will obtain turning

movement volumes for cumulative conditions from the City's travel demand model. Peak hour analyses for existing, baseline (opening year), baseline plus project, baseline plus program, cumulative (including program), and cumulative plus project scenarios are assumed to be needed. Analysis will be performed using Synchro software using the methodology outlined in Highway Capacity Manual, 6th Edition.

This analysis would be prepared as a separate, stand-alone report (a draft Traffic Impact Study) to be submitted to the City for review and comment. Coordination with Placer County and other jurisdictions or agencies that may be affected by the study area will be included and given a chance to review the draft Traffic Impact Study. A comment review meeting will be held with City staff, and response to one set of consolidated comments will be generated on the draft. Hard copies and an electronic version of a final Traffic Impact Study will be submitted that includes changes based on comment resolution from the draft submittal. Fees for model use are included in the budget. However, the budget for this task does not include fees that may be required by the City to review and process the traffic impact study; those fees are assumed to be paid by others.

### Wildfire

The EIR will include a section evaluating the potential effects related to wildfire using the questions included in the recently updated CEQA Guidelines Appendix G checklist. The analysis will consider the wildfire severity zones and policies in the Safety Element of the City's General Plan. It is assumed that preparation of a site-specific evacuation analysis is not required, as the Project site not located within a high or very high fire hazard area.

### Cumulative Impacts

Evaluate the impacts of cumulative development on the resource issues evaluated in the EIR. To the degree feasible, incorporate the analysis included in the previous EIR. Work closely with City staff, as well as County staff, to establish the cumulative setting, which involves identification of a reasonably foreseeable related development based on existing land use diagrams and an accurate list of cumulative projects (proposed, approved, and under construction). The EIR section will also describe how the cumulative spatial context varies among, and even within, the various environmental issues areas.

### Alternatives

The EIR will include a comprehensive discussion of feasible alternatives to the proposed Project. Up to four alternatives, including the No Project Alternative will be evaluated in the EIR. The three action alternatives will be determined through consultation with the City and design team and will be based on reducing environmental impacts. Some preliminary evaluation of feasible design alternatives has already been completed, which will be considered as part of the CEQA analysis. However, CEQA requires that an EIR evaluate a reasonable range of alternatives that would reduce the significant impacts of the Project. This requirement may preclude certain, already-considered design alternatives from being considered alternatives pursuant to CEQA. Potential alternatives could include mitigated design and/or an offsite alternative. If it is determined that an offsite alternative is not feasible, the EIR will include a discussion describing why this conclusion was reached. Once a reasonable range of alternatives has been determined, each alternative will be analyzed at a level of detail less than

that of the proposed Project but will include adequate detail to allow a comparison of the impacts.

#### Growth Inducement

This section will qualitatively evaluate the Project's potential to induce growth and subsequent environmental impacts that would occur (pursuant to CEQA Guidelines Section 15126[d]). The Project is not expected to be growth inducing, per se, and the analysis will be brief. It is not anticipated that the composting activities at the site would be a source of substantial growth.

#### Significant and Unavoidable Impacts

This section will clearly and succinctly summarize significant and unavoidable environmental effects of the proposed Project and alternatives as evaluated in the EIR.

#### Other Sections Required by Statute

CEQA provides very specific requirements for the contents of an EIR. Provide the City with an EIR, containing sections required by CEQA. Sections required by CEQA not mentioned above include table of contents, an executive summary, an introduction, effects not found to be significant, a discussion of irreversible commitment of resources, references, and a list of individuals and agencies consulted. The EIR will include visual aids, such as maps and diagrams, to clearly present the environmental analysis to the decision makers, responsible agencies, and the public.

We will assemble sections of the EIR and produce one cohesive document. The document will comply with the City's typical format and style. Submit a full Administrative Draft EIR and appendices, electronically, to the City for review.

It is assumed the City will provide one set of consolidated comments on the Administrative Draft EIR. Attend a meeting to discuss the City's comments on the Administrative Draft EIR and approach to responses/revisions (see Phase 2, Task 2.2).

### **Task 5.2.2 Prepare Draft EIR**

Based on one set of consolidated comments from the City, incorporate written comments on the Administrative Draft EIR to produce a Screen check Draft EIR for City review. Once one set of consolidated Screen check Draft EIR comments are received from City staff, incorporate those comments and produce a Draft EIR, along with the NOA and Notice of Completion (NOC) form for OPR. Consistent with the approach to the NOP (Task 1.4, above), it is assumed that the City will handle posting of the environmental review documents to its website, the County Clerk, and a local newspaper. Provide electronic copies of the Draft EIR, as well as 20 hardcopies for City use. We will prepare for, attend, and present at one public hearing on the Draft EIR. We will assist with describing the conclusions presented in the EIR and respond to questions on the EIR analysis. We will prepare materials (assumed to be portions of a PowerPoint presentation) pertaining to CEQA and the environmental process and provide comment cards for use by meeting participants. We will capture summary notes of public and agency comments. It is assumed that verbatim recording or hire of a court reporter is not necessary.

### **Task 5.3 Final EIR and Mitigation Monitoring and Reporting Plan**

#### **Task 5.3.1 Administrative Final EIR**

We will review the written and oral comments received during the Draft EIR comment period and respond to those comments. For budgetary purposes, 120 hours of professional technical staff time (excluding word processing/document production) have been assumed for preparing responses to comments. If comments require more effort than has been assumed in this scope, a contract amendment will be required. We will compile a standalone Administrative Final EIR that will include an introduction, summary of the Project, comment letters and oral testimony provided on the EIR, and responses to each raised environmental issue. A separate "Revisions to the Draft EIR" section will be included, if needed, to document changes or corrections to the text of the EIR. This scope of work assumes that the Draft EIR will not be reproduced within the Final EIR. Rather, the Draft EIR together with the response to comments document will constitute the Final EIR.

It is assumed that the City will provide one set of consolidated comments on the Administrative Final EIR. We will attend a meeting to discuss the City's comments on the Administrative Final EIR and approach to responses/revisions (see Phase 3, Task 3.2).

### **Task 5.3.2 Final EIR**

We will attend a meeting to review the comments on the Final EIR. The team will incorporate the comments received and will prepare the Public Final EIR. It is assumed that the City will handle distribution of the Final EIR to commenting agencies and interested parties, including local landowners, as appropriate. It should be noted that the City, as lead agency under CEQA, is only required to provide written responses to public agency comments received during public review of the EIR. Prepare the Mitigation Monitoring and Report Program (MMRP), based on the mitigation measures of the EIR, as amended through responses to comments. It is assumed that one draft and one final version of the MMRP would be provided electronically to the City, as well as 20 hardcopies of the Final EIR.

Key HDR Team members will attend and present at two (2) public hearings on the Final EIR and assist with describing the conclusions presented in the EIR and respond to questions on the EIR analysis.

### **Task 5.3.3 Prepare Statement of Overriding Considerations and Findings**

We will prepare the CEQA Findings and, if there are significant and unavoidable impacts, a Statement of Overriding Considerations (SOC). The Findings/SOC will specify which mitigation measures have been incorporated into the Project and those measures that have not and will explain why certain measures have been found to be infeasible. If applicable, the Findings/SOC will also identify feasible Project alternatives that could reduce adverse environmental effects but are not being implemented, with an explanation as to why they are considered to be infeasible. If requested, prepare an administrative draft of the Findings/SOC and will submit (electronically) to the City for review and comment. Once comments are received, we will incorporate comments and produce the final Findings/SOC.

We will prepare and post of the Notice of Determination (NOD) following Project and Final EIR approval and certification. It is assumed that the City would handle the CDFW filing fees associated with the NOD.

### Meetings Requirements:

- Project Development Team (PDT) Meetings. The CEQA team will attend monthly PDT coordination meetings with City staff to confirm that the Project design is proceeding consistent with the CEQA Project description.
- Other Public Meetings/Outreach – assume three meetings: We will attend and prepare presentation materials for the following public meetings and prepare written meeting summaries: a Notice of Preparation/Public Scoping Meeting (assume one meeting); City of Roseville Public Utility Commission Meeting (assume one meeting), and Roseville City Council (assume one meeting).
- Notice of Preparation/Public Scoping Meetings.

HDR will prepare the CEQA Notice of Preparation (NOP). Prepare scoping meeting project overview information, develop and provide overview presentation and record public and agency comment received during the meeting(s). Prepare NOP Scoping Meeting Summaries as necessary to document the meeting(s) and comments received.

### **Assumptions for Task 5:**

HDR assumes the following:

- Two (2) rounds of revisions of each of the Project description and Administrative Draft EIR from the City's review. Internal QC comments and City comments will be consolidated and incorporated into the concept documents to prepare the Final deliverables.
- After finalization of the Project description, the overall scope of the Project remains unchanged as the preparation of the EIR proceeds.
- The EIR preparation efforts from commencement to publishing the Administrative Draft EIR can be accomplished in approximately nine (9) months.
- Our support of the public engagement process is limited to the prerequisite notices and public meetings.
- No species or habitats of special concern are encountered at the site such that an extended field study schedule is required.
- The point of connection for off-site utilities is not known at this time. The CEQA analysis for off-site utilities is limited to the alignment of Phillips Road from the site to the existing utilities located near the intersection of Blue Oaks Boulevard and Westbrook Boulevard. The utility extension is assumed to occur within the paved road along Philip Road alignment. If the utility extension improvement alignment extends beyond the paved areas such that additional environmental assessments are necessary, such environmental assessments are beyond the scope of this proposal.

### **Deliverables for Task 5:**

Meetings and Environmental Documents:

- Attend a Project kick off meeting and include scope for project coordination meetings as noted above.
- Execute requirements of Assembly Bill 52 and associated Tribal Consultation through the City as the CEQA lead agency.
- Review and incorporate available City of Roseville data in the environmental document.
- Prepare a CEQA compliant Initial Study for the project, including technical studies/reports as necessary to determine level of CEQA review (IS/MND or EIR).
- Prepare required CEQA Notices (NOP, NOC).
- Prepare and submit documents on the City's behalf to the State Clearing House.
- Prepare Final EIR, including responses to comments on the environmental document; the scope assumes up to 120 hours for comment review, development of responses to comments with one review cycle with client, and development of a Response to Comments appendix. Findings of Fact and Statement of Overriding Considerations will also be included in Final EIR documentation.
- Prepare a Mitigation Monitoring and Reporting Program
- Attend meetings (referenced above); and provide the following deliverables:
  - Administrative Drafts (one Word file and one PDF file).
  - Screen Check Public Drafts (one PDF file).
  - Public Draft (20 hard copies, one Word file, and one PDF file for internet posting).
  - Final documents and Response to Comments (20 hard copies, one Word file, and one PDF file for internet posting).

## **Phase 1B**

The following tasks are deferred from the Phase 1A – Planning portion of the project until the CEQA task (Task 5) has been completed.

### **TASK 6. Preliminary Design and Basis of Design Report for the RRTO**

These services are included but will be negotiated at a later date.

### **TASK 7. Permitting (*HDR proposed task*)**

These services are included but will be negotiated at a later date.

### **TASK 8. Final Design of RRTO and Temporary Site Utilities**

These services are included but will be negotiated at a later date.

### **TASK 9. Construction Documents and Contracting Support for the RRTO Facilities**

These services are included but will be negotiated at a later date.

## **TASK 10. Engineering Services During Construction and Construction Management**

These services are included but will be negotiated at a later date.

## EXHIBIT “B”

# Exhibit B – Cost Information

City of Roseville

City of Roseville Environmental Utilities Operations Center - Cost Proposal Summary Table

| Task # | Task Description                         | HDR Labor    | Subconsultants | HDR Expenses | Total         |
|--------|------------------------------------------|--------------|----------------|--------------|---------------|
| 1      | Project Management and Meetings          | 429,789.20   | 143,298.23     | 1,684.80     | 574,800.00    |
| 2      | Strategic Planning Teams                 | 290,342.00   | 116,295.90     | 8,697.50     | 415,400.00    |

## COUNCIL COMMUNICATION

**CC #: 2680**  
**File #: 0800-05**

**Title:** Internet Protocol version 4 (IPv4) - Engagement Agreement  
**Contact:** Jesse Ravera 916-774-5125 jravera@roseville.ca.us

**Meeting Date: 5/3/2023**  
**Item #: 7.12.**

### RECOMMENDATION TO COUNCIL

Staff recommends that the City Council adopt a resolution authorizing the City Manager to execute an Engagement Agreement with Hilco IP Services LLC dba Hilco Streambank (Hilco Streambank) to broker the sale and transfer of excess City of Roseville owned Internet Protocol version 4 (IPv4) addresses. Staff further requests authority for the City Manager, or his designee, to execute any related forms and agreements needed to effectuate the transactions.

### BACKGROUND

The City of Roseville currently has 57,344 Internet Protocol version 4 (IPv4) addresses that are not in use and are not anticipated to be needed by the City in the future. RFP 12-025 was released to solicit responses from American Registry for Internet Numbers (ARIN) approved brokers to facilitate the sale and transfer of these available IP addresses. The City received three responses and after evaluation selected Hilco IP Services LLC dba Hilco Streambank (Hilco Streambank) to facilitate the sale based on the qualifications of the company and the projected total benefit to the City.

Based on the agreement, Hilco Streambank will facilitate the auction/sale of blocks of available IP addresses to the highest bidder to maximize benefit to the City for the rate of 3% commission of the total sales price.

### FISCAL IMPACT

The City will sell between 32,766 and 57,344 IP addresses with a minimum sale price of \$43 per IP address. The net proceeds of approximately \$1.4 million to \$2.4 million will be deposited into the Information Technology Replacement Fund to be used for future technology replacement projects.

### ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) only applies to projects which have the potential to cause a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA. (CEQA Guidelines §15061(b)(3)).

## CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal A - Remain fiscally responsible in a changing world

Respectfully Submitted,

Jesse Ravera, Assistant Information Technology Director

Hong Sae, Chief Information Officer

## General Terms & Conditions

1. **Engagement:** Hilco IP Services LLC dba Hilco Streambank ("Hilco Streambank") shall be engaged as the Seller's exclusive agent to market and sell the Internet Protocol Numbers ("IP Addresses") and Autonomous System Numbers (each an "ASN" and together with IP Addresses, the "Number Resources") effective as of the date (the "Commencement Date") of execution of this Agreement (the "Agreement").
2. **Scope of Services:** Hilco Streambank will (a) work with the Seller to collect and secure all the available information and other data concerning the Number Resources. (b) If necessary, assist Seller in obtaining control over the Number Resources at the applicable regional internet registry. (c) solicit offers privately and/or list the Number Resources on its online platform at [Auctions.ipv4.global](https://Auctions.ipv4.global) (the "Platform"). (d) assist the Seller in connection with the transfer of the Number Resources to the acquirer(s) who offer the highest or otherwise best consideration for the Number Resources. (e) provide escrow services at no additional charge.
3. **Escrow Agent.** Hilco Streambank shall act as the escrow agent for any transactions under this Agreement and shall be responsible for release of the net sales proceeds of any sale to the Seller in accordance with the terms of this Agreement. In the event of any dispute between the parties to a transaction Hilco Streambank shall hold the funds and Assignment of Assets pending resolution of the issue by the parties or by a court of proper jurisdiction in accordance with this Agreement.
4. **Terms of Sale:**
  - a. **Online Sales:** Seller agrees that all sales occurring through Platform shall be in accordance with the terms of use and purchase (the "Sale Terms") set forth on the Platform at <https://Auctions.ipv4.global/terms> and may be amended from time to time prior to any auction of Seller's Number Resources. Seller shall have full discretion regarding setting of reserve pricing for online listings.
  - b. **Private Sales:** The terms and conditions of private sales shall be set forth in a private agreement between buyer and Seller. Hilco Streambank shall assist Seller with negotiations of terms and conditions. Pricing and terms are in the sole discretion of Seller.
5. **Term:** The initial term of this engagement shall be as set forth on the Cover Page to this Agreement (the "Exclusive Term"). Thereafter, the Exclusive Term shall continue until terminated by either party on 30-days advance written notice.
6. **Exclusivity:** During the Term of this Agreement Hilco Streambank shall have the sole and exclusive right to market and sell the Seller's Number Resources listed on the Cover Page A and shall have no right to market and sell any other Number Resources of the Seller absent an additional agreement between the parties.
7. **Compensation to Hilco Streambank:** Hilco Streambank shall be paid a commission based on aggregate Gross Proceeds generated from the sale or other disposition of the Number Resources during the Exclusive Term, computed on a per transaction basis as set forth on the Cover Page of this agreement ("Commission"). Payment of Commission is due at the closing of each sale of IP addresses, and payable out of the sale proceeds of the closed sale.
8. **Seller's Representation RE: Rights to Number Resources:** The Seller represents that they are the rightful holders of the Number Resources, and have the authority to transfer their rights, title, and interests in the Number Resources to a purchaser. The Seller holds their rights to the Number Resources subject to applicable Regional Internet Registry (RIR) and Local Internet Registry (LIR) rights and regulations, if any.
9. **Announcements:** The Seller agrees that it will stop all announcements of the Number Resources prior to any listing of the Number Resources on the Platform. If at any time after the sale of the Number Resources to a buyer, the buyer discovers any old announcements or IRR entries it wishes to have removed the Seller will make a good faith effort to assist in their removal.
10. **No Guaranty:** Hilco Streambank has not guaranteed, and is not hereby guarantying, any specific result on the sale, assignment, license, or other disposition of the Number Resources.
11. **Entire Agreement/Amendment:** This Agreement constitutes the entire agreement between the Seller and Hilco Streambank and supersedes all prior discussions, negotiations and agreements, whether oral or written. This Agreement shall not be modified or amended in any respect except by a written instrument executed by or on behalf of the parties to this Agreement.
12. **Governing Law:** This Agreement shall be governed by and interpreted in accordance with the laws of the State of California, without reference to any conflict of law's provisions thereof. Each of the parties hereto irrevocably and unconditionally submits, for itself and its properties, to the exclusive jurisdiction of the Federal and State courts of California, in any action or proceeding arising out of or relating to this Agreement.
13. **WAIVER OF JURY TRIAL:** EACH OF HILCO STREAMBANK AND THE SELLER WAIVES ANY RIGHT TO A TRIAL BY JURY IN ANY ACTION OR PROCEEDING TO ENFORCE OR DEFEND ANY RIGHTS UNDER THIS AGREEMENT AND ANY AMENDMENT, INSTRUMENT, DOCUMENT OR AGREEMENT DELIVERED OR WHICH MAY IN THE FUTURE BE DELIVERED IN CONNECTION HERewith OR THEREWITH OR ARISING FROM ANY RELATIONSHIP EXISTING IN CONNECTION WITH ANY OF THE FOREGOING, AND AGREES THAT ANY SUCH ACTION OR PROCEEDING SHALL BE TRIED BEFORE A COURT AND NOT BEFORE A JURY.
14. **Limitation of Liability:** Hilco Streambank's maximum liability to the Seller arising for any reason out of or relating to this Agreement, whether a claim in tort, contract, or otherwise, shall be limited to the amount of fees paid by the Seller to Hilco Streambank under this Agreement for these services, except to the extent such liability is finally determined to have been caused by gross negligence or willful misconduct of Hilco Streambank.

15. **Indemnification:** The Seller shall indemnify and hold Hilco Streambank and its affiliates harmless from and against all liabilities, claims, demands, damages, costs and expenses (including reasonable attorneys' fees) arising from or related to (a) the acts or omissions of the Seller or their consultants, members, employees, representatives, and principals; (b) the breach of any provision of, or the failure to perform any obligation under this Agreement by the Seller; and (c) any liability or other claims asserted by the Seller's consultants, shareholders, members, employees, representatives, principals, advisors, or any other person (excluding Hilco Streambank) against Hilco Streambank arising out of or related to the Seller's conduct of the sale, assignment, license, or other disposition of the Number Resources, except claims arising from Hilco Streambank's gross negligence or willful misconduct. Hilco Streambank shall indemnify and hold the Seller harmless from and against all liabilities, claims, demands, damages, costs and expenses (including reasonable attorneys' fees) arising from or related to (a) the acts or omissions of Hilco Streambank or its consultants, members, employees, representatives, and principals; and (b) the breach of any provision of, or the failure to perform any obligation under this Agreement by Hilco Streambank, except claims arising from the Seller's gross negligence or willful misconduct.
16. **Further Assurances:** Hilco Streambank and the Seller shall take all such further actions as are necessary or appropriate to carry out the terms and conditions of the Agreement, including (without

limitation) any and all sales, assignments, licenses, or other dispositions of the Number Resources.

17. **Notices.** All notices, requests, demands and other communications hereunder must be in writing (emails acceptable) and, if delivered by email, will be deemed to have been received upon acknowledgment of receipt, or if delivered by overnight delivery, it will be deemed effective when delivered. The notice address for Seller is as set forth on the Cover Page. The notice address for Hilco Streambank is as follows:

Hilco Streambank  
1500 Broadway, 26th floor  
New York, NY 10036  
Attn: Jack Hazan  
Email: [jhazan@hilcoglobal.com](mailto:jhazan@hilcoglobal.com)

The notice addresses may be changed from time to time by such Party by giving notice of the new address to all other Parties hereto.

18. **TECHNOLOGY DISCLAIMER:** HILCO STREAMBANK DOES NOT WARRANT THAT THE FUNCTIONS, FEATURES OR CONTENT CONTAINED IN ANY WEBSITE USED IN CONNECTION WITH THE SALE OF THE NUMBER RESOURCES, INCLUDING ANY THIRD-PARTY SOFTWARE, PRODUCTS OR OTHER MATERIALS USED IN CONNECTION WITH ANY SUCH WEBSITE, WILL BE TIMELY, SECURE, UNINTERRUPTED, OR THAT DEFECTS WILL BE CORRECTED.

## COUNCIL COMMUNICATION

**CC #: 2670**

**File #: 0214 & 0716**

**Title:** Building Forward Library Facilities Improvement Program - Grant Application

**Contact:** Natasha Martin 916-774-5234 nmartin@roseville.ca.us

**Meeting Date: 5/3/2023**

**Item #: 7.13.**

### RECOMMENDATION TO COUNCIL

Staff recommends that the City Council adopt a resolution to approve submission of a grant application for California State Library's Building Forward Library Facilities Improvement Program: Round Two funding.

### BACKGROUND

The Building Forward Library Facilities Improvement Program helps create local libraries capable of meeting the 21st century needs of California's communities. In this round there will be \$175,000,000 in competitive grant funding available. The deadline to apply for round two funding is May 18, 2023. Awarded funds must be expended by June 30, 2027.

Applications are accepted for any library facility-related capital project that addresses critical maintenance needs, improves energy efficiency, improves sustainability, expands digital access or expands physical access. Priority will be given to projects supporting high poverty areas of the state, although projects are not limited to those criteria.

Grantees may request a reduction in the required local match according to conditions included in the California Budget Act of 2022. Roseville qualifies for a reduction that requires the City to contribute 20% of the total cost for these proposed capital projects, and will apply for the match reduction upon submission of the grant application.

### FISCAL IMPACT

The total matching requirements for each project are as follows: Martha Riley Community Library, \$412,759, Maidu Library, \$609,106, and Downtown Library, \$905,298. The matching funds for these projects will be included in future Capital Improvement Plan funding for the General Fund.

### ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) only applies to projects which have the potential

to cause a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA. (CEQA Guidelines §15061(b)(3)).1

## CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal C - Maintain a safe and healthy community

Goal E - Deliver exceptional city services

Goal F - Invest in well-planned infrastructure and growth

Respectfully Submitted,

Natasha Martin, Parks, Recreation & Libraries Manager

Jill Geller, Parks, Recreation, and Libraries Director

---

Dominick Casey, City Manager

### **Description**

Resolution 23-149

Application Approval & Certification

Building Forward Project Summary

RESOLUTION NO. 23-149

APPROVING A GRANT APPLICATION TO THE CALIFORNIA STATE LIBRARY  
FOR THE BUILDING FORWARD LIBRARY FACILITY IMPROVEMENT PROGRAM,  
AND AUTHORIZING THE CITY MANAGER TO EXECUTE ALL CONTRACT  
DOCUMENTS ON BEHALF OF THE CITY OF ROSEVILLE

WHEREAS, the Legislature and Governor of the State of California have provided funds for the program referenced above; and

WHEREAS, the California State Library has been delegated the responsibility for the administration of this grant program, establishing necessary procedures; and

WHEREAS, said procedures established by the California State Library require a resolution certifying the approval by the potential grantee's governing board either before submission of said application(s) to the State or prior to execution of the grant agreement; and

WHEREAS, The City of Roseville, if selected, will enter into an agreement with the State of California to carry out the project; and

WHEREAS, The City of Roseville proposes to implement Building Forward Facilities Improvement Program: Round Two; and

WHEREAS, The City of Roseville has the legal authority and is authorized to enter into a funding agreement with the State of California; and

WHEREAS, The City of Roseville intends to apply for grant funding from the California State Library for the Building Forward Facilities Improvement Program: Round Two;

THEREFORE, BE IT RESOLVED that the City Council of the City of Roseville authorize as follows:

1. That pursuant and subject to all of the terms and provisions of the California Budget Act, the City of Roseville City Manager or designee is hereby authorized and directed to prepare and file an application for funding with the California State Library, and take such other actions necessary or appropriate to obtain grant funding.

2. The City of Roseville City Manager, or designee is hereby authorized and directed to execute the funding agreement with the California State Library and any amendments thereto.

3. The City of Roseville City Manager or designee is hereby authorized and directed to submit any required documents, funding requests, and reports required to obtain grant funding; and

4. Certifies that the project will comply with any laws and regulations including, but not limited to, the California Environmental Quality Act (CEQA), legal requirements for building codes, health and safety codes, the California Labor Code, disabled access laws, and, that prior to commencement of the project, all applicable permits will have been obtained.

PASSED AND ADOPTED by the Council of the City of Roseville this \_\_ day of \_\_\_\_\_, 2023, by the following vote on roll call:

AYES            COUNCILMEMBERS:

NOES           COUNCILMEMBERS:

ABSENT        COUNCILMEMBERS:

## Building Forward Library Facilities Improvement Program: Round Two Grant Overview

---

### Martha Riley Community Library

The Martha Riley Community Library serves the expanding west side of Roseville, and the adjacent unincorporated areas of Placer County. The location serves over 300,000 visitors and circulates 600,000 items annually. It accounts for close to 60% of all visitation and circulation in our three libraries. The facility is heavily impacted by the City's growth, and reconfiguration of spaces to meet community needs is required. In addition there are a few critical maintenance issues that need to be addressed, such as replacing the existing HVAC system installed in 2008, new gutters, additional security features and LED lighting.

This project will allow us to reconfigure our interior spaces to better meet the needs of the community. We currently do not have a programming space to accommodate attendance for our children and teen programming. We conduct programs outside weather permitting, due the large number of families attending. For example, we typically have over 100 in attendance at storytime outside, but have to greatly limit participation indoors. We also have a need for expanded shelving for materials, and to create smaller study spaces and an expanded teen area, as we are within walking distance to a local high school. Facility maintenance needs, such as a new HVAC, new gutters, upgraded lighting and security systems have not been replaced since the building was constructed in 2008.

| Description                                             | Project Cost       | Grant Contribution | Match Contribution |

|                                                         |                    |                    |                    |
| <b>Grand Total</b>                                      | <b>\$2,063,794</b> | <b>\$1,651,035</b> | <b>\$412,759</b>   |

## Maidu Library

Maidu Library is the smallest of Roseville's three branches, and has outgrown the facility that was built in 1990. At only 10,000 square feet the facility is inadequate in meeting the needs of the community, lacks in space for materials, space for programs and study spaces, and does not have a children's or teen area suitable for the population who frequent this facility. As our second busiest location, we have long ago outgrown the space and have to limit the services we can offer to the east side of Roseville.

When the Maidu Library was constructed in 1990, there were 44,000 residents in the City of Roseville. Today there are 151,000 residents. The Maidu Branch serves the east and central regions of the City, as well as the outlying areas of Placer County. The bulk of this project cost is to add up to 6,000 additional square feet of space to the existing 10,000 square feet. We currently have no room to add more book shelves, study space, program space or children's and teen areas. Maidu Library is by far our smallest branch in the City, but its circulation and visitation exceeds our much larger Downtown Library. The demographics of the community have shifted over the past five years, and more families are buying homes and moving into the surrounding neighborhood. The branch is also in walking distance to a high school and middle school, and we need program space, study space and teen areas to better meet the needs of this community. In addition, there are existing critical maintenance items that need to be addressed, such as a new roof, upgraded security alarm system and upgrades to exterior and interior LED lighting fixtures.

| Description              | Project Cost       | Grant Contribution | Match Contribution |
|--------------------------|--------------------|--------------------|--------------------|
|                          |                    |                    |                    |

|                          |                    |                    |                    |
| <b>Grand Total</b>       | <b>\$3,045,529</b> | <b>\$2,436,423</b> | <b>\$609,106</b>   |

## Downtown Library

The Downtown Library, constructed in 1979, is in need of several critical maintenance repairs and building reconfiguration to serve the population in Roseville's core neighborhood. As part of a revitalized downtown Roseville, serving our most at-risk and economically challenged residents is a priority. We need to address deferred maintenance projects, such as a new HVAC system, new exterior siding and windows, upgrade lighting and other critical infrastructure needs which will greatly improve the quality of service to our residents. This location serves as the City's Cooling Center during the summer months, and needs a highly functional HVAC system.

If awarded, these grant funds will serve to address critical building maintenance improvements and improve energy efficiency to the 1979 structure. Deferred maintenance projects that are critical include an updated, efficient HVAC system, new siding, windows and doors, and upgraded restrooms to meet current ADA guidelines. We plan to greatly improve energy efficiency in the facility by installing solar panels with battery backup, so that we have a constant power source. As the City's official Cooling Center, is critical that we have reliable power at all times. We will also upgrade lighting to LED fixtures, and reroof the building. This project will help us reconfigure interior spaces to better serve our customer's needs. Customer usage has changed in the last 40+ years since the building was constructed, and needs have changed since the pandemic. This funding will allow us to offer programming space to be used for all ages programming, and allow us to create more small study spaces for online meetings, job interviews, adult literacy sessions and tutoring. Funding will also provide security enhancements such as additional interior cameras, improved public service desk locations and security key card readers to access staff work areas.

| Description                                                          | Project Cost       | Grant Contribution | Match Contribution |
|----------------------------------------------------------------------|--------------------|--------------------|--------------------|
|                                                                      |                    |                    |                    |
| Replace HVAC, install backup generator, install fencing around units | \$677,250          | \$541,800          | \$135,450          |

## COUNCIL COMMUNICATION

CC #: 2676

File #: 0709-05 & 0214

**Title:** Homeless Prevention and Rapid Rehousing - Grant Agreement Amendment

**Contact:** Trisha Isom 916-746-1239 tisom@roseville.ca.us

**Meeting Date:** 5/3/2023

**Item #:** 7.14.

### RECOMMENDATION TO COUNCIL

Staff recommends that the City Council approve the Homeless Prevention and Rapid Rehousing contract amendment between AMI Housing and the City for an extension of the contract from June 30, 2023 to June 30, 2024 and adopt a resolution authorizing the City Manager to execute it.

### BACKGROUND

On May 18, 2022, City Council approved the FY2022-23 Homeless Prevention and Rapid Rehousing (HPRR) funding allocations, which included an agreement with AMI Housing for a grant of \$500,000. HPRR programs provide temporary assistance to prevent an individual or family from losing permanent housing and provide temporary assistance to homeless individuals and families in obtaining permanent housing. Eligible services for this grant funding include temporary rental assistance, short-term hotel vouchers, housing relocation and stabilization services, housing navigation services, mediation, outreach and incentives to property owners, credit repair, security deposits, utility payments, and case management related to these activities. These services are extremely effective in reducing the financial burden and trauma of homelessness.

Roseville Housing Authority (RHA) is collaborating with AMI Housing to use up to \$50,000 of their HPRR funding to help fund the new Landlord Incentive Program. Participating property owners will receive a one-time \$1,000 payment each time they enter into a lease and contract with a Housing Choice Voucher holder. HUD's Emergency Housing Voucher's (EHV) came with services fees that allowed for a similar incentive program that proved extremely effective in leasing the EHV's.

The new program is meant to encourage private landlords to participate in the Housing Choice Voucher Program and create more available units for all voucher holders. The proposed contract amendment requests to extend the contract through June 30, 2024 to allow for use of the remaining funds. The extension of the contract requires no additional funds at this time.

### FISCAL IMPACT

The Homeless Prevention and Rapid Rehousing grant program is funded with State of California Permanent Local Housing Allocation (PLHA) funding for the Cities of Roseville and Rocklin and the Low and Moderate Income Housing Asset Fund (Low/Mod funds). The program significantly reduces instances and durations of homelessness in Roseville and Rocklin and has reduced costs to the cities and to the community as a whole. No General Fund resources were used for the original contract and the recommended action does not result in any cost to the General Fund.

### ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Approval of AMI Housing's grant agreement amendment does not include the potential for a significant environmental effect, and therefore is not subject to CEQA.

## COUNCIL COMMUNICATION

CC #: 2660

File #: 0900-04-02

**Title:** Bridge Preventative Maintenance Project - Notice of Completion

**Contact:** Nicolas Bumb 916-746-1313 nfbumb@roseville.ca.us

**Meeting Date:** 5/3/2023

**Item #:** 7.15.

### RECOMMENDATION TO COUNCIL

Staff recommends that the City Council accept the Bridge Preventative Maintenance Project as complete and adopt a resolution authorizing the Public Works Director to execute the Notice of Completion.

### BACKGROUND

The Bridge Preventative Maintenance Project included rehabilitation of 16 bridges at various locations. Methacrylate bridge deck treatment has been applied to 15 of the bridges (methacrylate bridge deck treatment is intended to seal and protect the structural integrity of bridges and extend their service life). Other spot repairs included minor concrete surface repairs, joint seal replacement, and minor bridge approach paving.

The bridges for this project are located on the following roads:

- 3 locations on Roseville Pkwy,
- 2 locations on Harding Blvd,
- 2 locations on Foothills Blvd,
- Atkinson St,
- Blue Oaks Blvd,
- Lincoln St,
- N Sunrise Ave,
- Old Auburn Rd,
- Secret Ravine Pkwy,
- Vernon St,
- Wills Rd, and
- Woodcreek Oaks Blvd.

Exact locations may be seen in the attached Exhibit A.

At the March 21, 2021 meeting, Council approved the plans and specifications for the project and authorized staff to call for bids. At their September 21, 2022 meeting, Council awarded the

project to American Civil Constructors. Notice to proceed on the Bridge Preventative Maintenance Project was issued October 7, 2022 and construction was completed April 8, 2023.

The Public Works Engineering Division has made the final inspection of the Bridge Preventative Maintenance Project and has found the work to be completed in accordance with the improvement plans and City Specifications and is now ready for acceptance. As required by the Specifications and Faithful Performance Bond, the Contractor shall guarantee the installation of all improvements for a period of 12 months from the date of the Notice of Completion.

### FISCAL IMPACT

The project was funded by a Highway Bridge Program (HBP) grant and City Roadway Funds. No General Fund resources were used for this project.

Staff are completing the final accounting of project costs and will submit a final reimbursement request to Caltrans for the balance of grant funding in the coming weeks.

### ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Approval of a Notice of Completion meets the above criteria and is not subject to CEQA. No additional environmental review is required.

## COUNCIL COMMUNICATION

CC #: 2664

File #: 0323 & 0705

**Title:** School Resource Officers - Memorandum of Understanding Amendment

**Contact:** Mark Peinado 916-774-5021 mcpeinado@roseville.ca.us

**Meeting Date:** 5/3/2023

**Item #:** 7.16.

### RECOMMENDATION TO COUNCIL

Staff recommends that the City Council adopt a resolution to approve the Second Amendment to the Memorandum of Understanding (MOU) between the City of Roseville and the Roseville Joint Union High School District (RJUHSD) regarding School Resource Officers, and authorize the City Manager to execute it.

### BACKGROUND

The Police Department assigns sworn police officers as School Resource Officers (SRO's), formerly known as Youth Services Officers, to high school campuses. SRO's are assigned to the Social Services Unit. SRO's investigate crimes that occur on campus or that involve the student population, educate and develop positive relationships with students and staff, monitor and enforce truancy laws and act as liaison with county agencies that also support and work with student populations including probation, children's protective services, mental health, social service agencies and the courts. SRO's help school officials maintain a safe and secure learning environment on campuses.

For the 2023-2026 school years, the City and the District have agreed to assign SRO's to the District's five school campuses in Roseville, which are Oakmont High School, Roseville High School, Woodcreek High School, Adelante High School, and West Park High School.

### FISCAL IMPACT

The City cost for providing SRO's for the nine-month school year is approximately \$142,547 per officer for salary and benefits and \$16,938 for vehicle cost, for a total amount of \$797,425 for five officers. This cost does not include the cost for uniforms or equipment. Cost to the City may increase with additional years, due to increase costs for salaries, benefits, and vehicles.

RJUHSD has agreed to offset the costs as follows:

2023-2024: Five Officers = \$553,717

2024-2025: Five Officers = \$570,326

2025-2026: Five Officers = \$570,325

The net cost to the City is approximately \$243,708 for school year 2023-2024, and \$227,100 for school years 2024-2025 & 2025-2026. Funding for the SRO's has been included in the Police Department's General Fund budget.

### ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. An amendment to an MOU for SRO's meets the above criteria and is not subject to CEQA. No additional environmental review is required.

**SECOND AMENDMENT TO MEMORANDUM OF UNDERSTANDING  
BETWEEN THE CITY OF ROSEVILLE AND THE  
ROSEVILLE JOINT UNION HIGH SCHOOL DISTRICT  
REGARDING SCHOOL RESOURCE OFFICERS**

THIS SECOND AMENDMENT TO MEMORANDUM OF UNDERSTANDING is made and entered into this \_\_\_\_ day of \_\_\_\_\_, 20\_\_\_\_, by and between the City of Roseville, a municipal corporation ("CITY"), and the Roseville Joint Union High School District, a public school district ("DISTRICT"); and

WITNESSETH:

WHEREAS, CITY and DISTRICT (hereinafter "Parties") entered into a Memorandum of Understanding (hereinafter "MOU") for Youth Services Officers on August 15, 2018; and

WHEREAS, pursuant to Section 13 of the MOU, the MOU and each provision may be waived, amended, supplemented, or eliminated through mutual written agreement of the Parties; and;

WHEREAS, CITY and DISTRICT amended the MOU on August 5, 2020 ("First Amendment").

NOW, THEREFORE, the parties agree as follows:

1. The term "Youth Services Officers" ("YSOs") referenced throughout the MOU is replaced with "School Resource Officers" ("SROs").
2. Exhibit "A" to the MOU is hereby replaced with Exhibit "A" to this Second Amendment to MOU, attached hereto and incorporated herein by reference, which reflects the scope of work.

3. Section 1(a) shall be amended to read as follows:

“Law Enforcement Services.

- a. CITY will provide one SRO to perform regular duty law enforcement services at Woodcreek High School, one SRO at Roseville High School, one SRO at Oakmont High School, one SRO at Adelante High School, and one SRO at West Park High School during the schools’ 2023-2024, 2024-2025, and 2025-2026 school calendars on student days of attendance and during the schools’ normal hours of operation, typically defined as 8:15 a.m. to 3:45 p.m. on student days of operation; subject, however, to the availability of the SROs as determined by CITY as set forth in subsection (e).”

4. Section 1(b) shall be removed.

5. Section 2 shall be amended to read as follows:

“2. DISTRICT Payment.

- a. It is understood and agreed by DISTRICT and CITY that DISTRICT will pay CITY less than full time cost of providing the SROs. To partially offset CITY’s operational budget costs in providing SROs for the 2023-2024 through 2025-2026 school years, DISTRICT shall pay CITY the following:

1. 2023-2024: five (5) SROs at one hundred ten thousand, seven hundred forty three dollars (\$110,743) for a total of five hundred fifty three thousand, seven hundred seventeen dollars (\$553,717).

2. 2024-2025: five (5) SROs at one hundred fourteen thousand, sixty five dollars (\$114,065) for a total of five hundred seventy thousand, three hundred twenty six dollars (\$570,326).

3. 2025-2026: five (5) SROs at one hundred fourteen thousand, sixty five dollars (\$114,065) for a total of five hundred seventy thousand, three hundred twenty five dollars (\$570,325).

b. If CITY receives additional funding from a Federal or State agency to be used to address school safety, the DISTRICT's payment may be negotiated at the DISTRICT's request."

6. Section 3 shall be amended to read as follows:

"Term of Agreement. This MOU shall commence upon execution and expire on June 30, 2026, unless terminated earlier in accordance with this MOU."

7. Section 15 shall be amended to read as follows:

"Notices. Any notices to parties required by this MOU shall be delivered personally or mailed, U.S. first class postage prepaid, addressed as follows:

CITY OF ROSEVILLE

Troy Bergstrom  
Police Chief  
City of Roseville  
1051 Junction Blvd.

## EXHIBIT "A"

### Scope of Work

A. Maintaining Safety, Order and Discipline. SROs will maintain safety, order and discipline within their assigned school by:

- Patrolling the assigned school buildings, grounds and surroundings
- Conducting searches of students, vehicles and lockers when requested by school administration or when necessary in investigating criminal activity
- Monitoring campus activity
- Assisting school staff in preventing and eliminating violent conflicts
- SROs shall wear a City-supplied police uniform and operate a marked police patrol vehicle while on duty, unless otherwise authorized by RPD for a specific purpose

B. Investigating Crimes on Campus. SROs will investigate crimes on their assigned campuses by:

- Conducting interviews of witnesses, victims or suspects
- Collecting and packaging evidence, pursuant to RPD policy
- Writing reports
- Developing intelligence on criminal activity in the schools and in the community

C. Community Relations. SROs will establish relationships with students, parents and school staff by:

- Counseling students on an individual basis in a variety of areas
- Counseling parents on parenting, drug awareness and the judicial system
- Sharing information with school staff on drug awareness, laws and law enforcement
- Assisting school administration with policy decisions regarding campus safety and discipline

D. Instruction. SROs will provide instruction that will enhance the students' understanding of RPD's mission and the responsibilities of citizenship by:

- Teaching classes or lecturing students as requested by teachers; however, responding to incidents or conducting investigations will always take precedence over instructing in the classroom

E. Truancy Laws. SROs will monitor and enforce state truancy laws by:

- Participating in RJUHSD's School Attendance Mediation (SAM) process

F. Liaison with other Agencies. SROs will serve as a liaison between various Placer County departments, agencies, and students as appropriate, including, but not limited to, the following:

- Probation
- Child Protective Services
- Mental Health Agencies
- Law Enforcement and Court Agencies

G. Training. SROs shall attend all State of California and RPD mandated training sessions, seminars and briefings. SROs will be absent from their designated school sites during such mandated training sessions, seminars and briefings.

## COUNCIL COMMUNICATION

**CC #: 2684**  
**File #: 0800-04**

**Title:** Purchase of Motor Vehicles Ordinance  
**Contact:** Brandy LeBeau 916-774-5531 blebeau@roseville.ca.us

**Meeting Date: 5/3/2023**  
**Item #: 7.17.**

### RECOMMENDATION TO COUNCIL

Staff recommends that the City Council introduce for first reading an uncoded ordinance for Fleet Services purchases, granting the Purchasing Officer authority to purchase motor vehicles equal to or greater than the bid amount established in the City Charter for a period of two years.

### BACKGROUND

The Fleet Services Division of the Public Works Department is responsible for procuring motor vehicles and equipment for the City of Roseville. The current bid amount established in the Municipal Code and City Council approval process timeline limits the ability to secure and procure vehicles in the current environment. With the inflated cost of vehicles, almost all replacements are over the \$75,000 threshold and need approval by the City Council. In the time (typically four weeks) it takes for staff to get on the agenda and receive council approval, manufacturer order windows are often missed, or the dealer vehicles are no longer available. This has caused an extremely competitive environment and the loss of purchasing much-needed City vehicles.

In recent months, supply chain issues have caused fleet motor vehicle manufacturers to reduce production quantities, short-release order notifications, and limited time order windows. In addition, manufacturers are adjusting accepted production orders only to produce quantities based on average orders from the past five years. These practices have resulted in the manufacturer canceling orders, rolling the orders into the next calendar year to wait and determine if the order will be fulfilled. The Fleet Division currently has 31 trucks awaiting production for the past three calendar years, and an additional 43 replacements have been requested for FY2023-24. All of these trucks meet the City's replacement requirements of either high mileage or age, and being unable to replace them on time causes the City to incur more maintenance and repair costs to keep the vehicles in good condition until replacements are available.

For Fleet Services to keep up with the demand and provide staff with the best service and safety, the request is to grant the Purchasing Officer authority to purchase vehicles equal to or greater than the bid amount established in the City Charter. This would assist in procuring vehicles that become available at dealers or placing orders as soon as the manufacturer order windows open. Fleet Services would continue to follow the competitive bidding process and award to the lowest

responsible bidder, allowing staff to secure the vehicle once the lowest bidder is established. All purchases will be within the approved Fleet Replacement Fund budget. The ordinance would terminate by its own terms after two years from the approved date.

### FISCAL IMPACT

There is no fiscal impact on the General Fund. Funding for all purchases is included in the approved fiscal year budgets, and no additional funds are requested for this action.

### ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Approval of authority to purchase vehicles and trucks meets the above criteria and is not subject to CEQA. No additional environmental review is required.

### CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal A – Remain fiscally responsible in a changing world.

Goal E – Deliver exceptional city services.

Goal F – Invest in well-planned infrastructure and growth.

Respectfully Submitted,

Brandy LeBeau, Fleet Manager

Jason Shykowski, Public Works Director

Description

Fleet Ordinance

ORDINANCE NO.

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE  
GRANTING THE PURCHASING OFFICER AUTHORITY TO MAKE PURCHASES OF  
MOTOR VEHICLES EQUAL TO OR GREATER THAN THE BID AMOUNT ESTABLISHED  
IN THE CITY CHARTER FOR A PERIOD OF TWO YEARS AND DECLARING THIS  
ORDINANCE TO BE EFFECTIVE JUNE 16, 2023

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. The Fleet Services Division of the Public Works Department is responsible for procurement of motor vehicles for the City of Roseville. In recent months, supply chain issues have plagued motor vehicle manufacturers, resulting in an insufficient quantity of new motor vehicles being produced to meet demand. This has resulted in an extremely competitive environment in motor vehicle procurement. Dealers are releasing new motor vehicles for purchase in increasingly short windows of time.

SECTION 2. The Fleet Services Division frequently encounters situations where it is not able to procure needed motor vehicles solely due to the length of time that is required to have a purchase order for such motor vehicles approved by the City Council, as required by the City's procurement laws and policies. This impairs the City's ability to procure new motor vehicles and results in the City's existing fleet vehicles being utilized for longer than planned, leading to increased costs for maintenance and repair.

SECTION 3. Section 7.21 of the Charter of the City of Roseville provides that competitive prices or bids for all purchases and public works and improvements shall be obtained where practicable and the purchase made from, or the contract awarded to, the lowest responsible bidder. Section 7.21 further provides that sealed bids shall be asked for in all transactions involving the expenditure of seventy-five thousand dollars (\$75,000) or more.

SECTION 4. Section 4.12.090(A) of the Roseville Municipal Code provides that purchases of supplies or equipment of an estimated value equal to or greater than the bid amount established in the City Charter, shall be by written purchase order with the lowest responsible bidder. Section 4.12.090(D) provides that following an opening of bids for the purchase of such supplies or equipment, City staff shall submit a recommendation to the City Council for award. Section 4.12.090(F) provides that bids shall be awarded by the City Council, and a purchase order issued by the Purchasing Officer, to the lowest responsible bidder.

SECTION 5. The City Council desires to temporarily exempt, for a period of two (2) years, the purchase of motor vehicles in an amount of seventy-five thousand dollars (\$75,000.00) or more from the requirement that such purchase orders be approved by the City Council. This temporary exemption for motor vehicle purchases only applies to purchases that are 1) competitively bid pursuant to the City's existing laws and policies and; 2) within the budget previously approved by the City Council.

SECTION 6. Accordingly, notwithstanding the provisions of Chapter 4.12 of the Roseville Municipal Code to the contrary, purchases of motor vehicles in the amount of seventy-five thousand dollars (\$75,000) or more may be awarded by the Purchasing Officer to the lowest

responsible bidder without further City Council approval. This authority is expressly conditioned upon such purchases being within the previously allocated and approved budget of the Fleet Services Division of the Public Works Department. This Ordinance shall terminate on June 16, 2025.

SECTION 7. The City Clerk is hereby authorized and directed to post a true copy of the foregoing ordinance in each of three (3) conspicuous locations in the City and shall immediately after such posting enter in the Ordinance Book under the record of the ordinance a certificate under her hand stating the time and place of said publication by posting.

## COUNCIL COMMUNICATION

**CC #: 2677**

**File #: 0324 & 0201-01**

**Title:** Emergency Medical Services Program - Capital Asset Donation and Budget Adjustment

**Contact:** Michael Bradley 916-774-5806 mbradley@roseville.ca.us

**Meeting Date: 5/3/2023**

**Item #: 7.18.**

### RECOMMENDATION TO COUNCIL

The Fire Department recommends that the City Council accept a donation of \$13,837 in capital assets from the Sierra Sacramento Valley Emergency Medical Services (EMS) Agency and adopt an ordinance to approve a \$36,837 budget adjustment for the purchase and contribution of essential emergency medical equipment.

### BACKGROUND

The Sierra Sacramento Valley EMS Agency (SS-V) has an EMS Fund that provides essential equipment to local EMS agencies. In 2023, the Roseville Fire Department was provided \$23,000 to purchase video laryngoscopes and given a chest compression system with an extended service agreement providing for a \$13,837 capital asset contribution.

The video laryngoscopes will improve the speed and accuracy of securing a compromised airway in the emergency medical setting, improving patient care and outcomes. These are innovative tools which take advantage of hospital technology and integrating it into emergency field medicine.

In addition, SS-V is providing a chest compression system to add to existing equipment which will allow the department to have one unit on every front-line engine.

### FISCAL IMPACT

The capital asset donation, the associated extended maintenance agreement and the video laryngoscopes are provided through S-SV without a negative impact to the General Fund. It will provide for a \$13,837 capital asset contribution and the \$23,000 for video laryngoscopes will be fully reimbursed.

### ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Approval of a Capital Asset Donation and Budget Adjustment meets the above criteria and are not subject to CEQA. No additional environmental review is required.

### CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal C - Maintain a safe and healthy community

Respectfully Submitted,

Michael Bradley, Fire Battalion Chief

Rick Bartee, Fire Chief

## **Video Laryngoscopy UE VL460**

### **Intent**

Roseville Fire Department respectfully submits a request for funds to purchase 10 video laryngoscopes. In the setting of the critically ill patient securing endotracheal intubation by direct laryngoscopy, multiple attempts are often required with a higher complication rate due to the emergent, uncontrolled setting, comorbidities, and variability in expertise of operators. We hypothesized that video laryngoscopy would be superior to direct laryngoscopy during urgent endotracheal intubation.

### **Need**

The Roseville Fire Department provides Advanced Life Support response to the City of Roseville and extends that level of care to mutual and automatic aid requests throughout the County and the State under the master mutual aid system. Roseville currently operates direct laryngoscopy devices on each emergency response unit. Currently the Roseville Fire Department is operating 2 video laryngoscopy devices in a field trial. We are requesting 10 VL devices so that each of our engines can deliver the same level of care and are equipped appropriately.

With a direct laryngoscope, it is necessary to obtain a line of sight from the maxillary teeth to the glottis, by placing the patient's head on a pillow and extending the head on the neck (sniffing position) to displace the tongue and epiglottis, which frequently obstruct the line of sight. In addition, an assistant is frequently required to apply pressure to the thyroid cartilage to obtain a clear view of the glottis, and it is often difficult for the assistant to adjust the direction and the degree of the pressure. With a video laryngoscope, because the image of the glottis is captured near the tip of the blade, only a few centimeters of line of sight will be required. In addition, an assistant can adjust the direction and degree of pressure on the neck by confirming the improvement of the view of the glottis on a video screen. Therefore, theoretically, a video laryngoscope would provide a better view of the glottis increasing the success rate of tracheal intubation.

Aziz *et al.* performed a randomized, controlled study assessing the efficacy of a video laryngoscope (C-MAC video laryngoscope) in 300 patients with predicted difficult tracheal intubation and have found that the success rate of tracheal

intubation at the first attempt with the video laryngoscope was significantly higher (93%) than with a conventional Macintosh laryngoscope (84%). The view of the glottis at laryngoscopy was significantly better, and the use of an endotracheal tube introducer (a gum elastic bougie) and pressure to the larynx (to obtain a better view of the glottis) was less frequently required for the video laryngoscope.

|                |         |        |         |             |             |
|                |         |        |         |             |             |
|                |         |        |         |             |             |
| TOTAL          |         |        |         | -           |             |

### Justification for Budget Adjustment:

The Fire Department was approved to spend \$23,000 for video laryngoscopes and a donated chest compression system with maintenance agreement for the Emergency Medical Services program through the EMS fund managed by the Sierra-Sacramento (S-SV) EMS, a Placer County government agency responsible for regulating EMS services in the county. The department is requesting \$38,837 budget increase to purchase the equipment through the S-SV program and recognize the donated capital equipment.

## COUNCIL COMMUNICATION

CC #: 2673

File #: 0324 & 0201-01

**Title:** Fire Department Strike Team - Budget Adjustment

**Contact:** Jason Rizzi 916-774-5802 jrizzi@roseville.ca.us

**Meeting Date:** 5/3/2023

**Item #:** 7.19.

### RECOMMENDATION TO COUNCIL

Staff recommends that the City Council adopt an ordinance to approve a budget adjustment to recognize \$436,994 in additional overtime expense, \$3,108 in other reimbursable items/logistics, a \$187,694 contribution to available General Fund resources for fleet usage and overhead, and an associated \$627,796 in revenue related to the department participation in reimbursable strike teams.

### BACKGROUND

As a participant in the California Fire Assistance Agreement (CFAA) and California Task Force Seven of the National Urban Search and Rescue Response System, the Roseville Fire Department sends resources, upon emergency request, to assist in the management and control of large emergency incidents that occur throughout our region every year. The CFAA can also provide resources to Roseville Fire should the department require and request them. This fiscal year to date, Fire Department crews have assisted throughout California (15 assignments) and participated on two urban search and rescue deployments to the eastern United States. The contracts provide reimbursement for staff, vehicle use and overhead.

### FISCAL IMPACT

After the incremental overtime and other expenses are reimbursed, there is a positive impact on the General Fund of \$187,694 from the reimbursement for fleet usage and overhead.

### ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378.

The Fire Department strike team budget adjustment meets the above criteria and is not subject to

CEQA. No additional environmental review is required.

CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal A - Remain fiscally responsible in a changing world.

Respectfully Submitted,

Jason Rizzi, Assistant Fire Chief

Rick Barteo, Fire Chief

## Justification for Budget Adjustment:

During FY2022-23, the Fire Department has been deployed on two urban search and rescue deployments, 14 fire assignments, and one storm assignment statewide through the California Fire Assistance Agreement and other state/federal aid contracts. The \$627,796 budget adjustment is being requested for \$436,994 in reimbursable overtime labor costs, \$3,108 in additional materials, services, and supplies costs incurred, and other reimbursable items not requiring a budget increase in the amount of \$187,694. This budget request will be funded through reimbursements from our Federal, State, and local partners and will increase the General Fund available resources by \$187,694.

## COUNCIL COMMUNICATION

CC #: 2678

File #: 0214 & 0800-02 & 0201-01

**Title:** Electric Charging Station Project - Grant Awards, Grant Agreement and Budget Adjustment

**Contact:** Brandy LeBeau 916-774-5531 blebeau@roseville.ca.us

**Meeting Date:** 5/3/2023

**Item #:** 7.20.

### RECOMMENDATION TO COUNCIL

Staff recommends the City Council adopt:

- A resolution accepting grant awards from Roseville Electric and Placer County Air Pollution Control District for the Electric Charging Station project, approving a Grant Agreement with Placer County Air Pollution Control District, and authorizing the City Manager to execute it and any related documents on behalf of the City of Roseville; and
- An ordinance to approve a budget adjustment of \$107,102.

### BACKGROUND

#### Clean Air Grant Program – Carl Moyer Memorial Air Quality Attainment Program

The Placer County Air Pollution Control District's Clean Air Grant Program provides monetary grants to public agencies to fund projects that enable the deployment of alternative, advanced, and cleaner technologies to support the State's air quality goals. Providing funding to support California's transformation toward zero and near-zero technologies, including installation of fueling or energy infrastructure to fuel or power-covered sources.

#### Roseville Electric Utility

Roseville Electric Utility's "Charge ahead Roseville" commercial electric vehicle program provides rebates to install commercial electric vehicle charging stations. Roseville Electric received funding from the state to incentivize commercial businesses by offering \$4,500 incentives for each Level 2 hardwired wall or pedestal-mounted electric vehicle charger port.

In May of 2022, the Fleet Services Division submitted a grant application to Placer County Air Pollution District's Clean Air Grant program Alternative Fueling Infrastructure. As a result, the Placer County Air Pollution Control District awarded Fleet Services a total of \$31,360 toward the City's electric vehicle charging station in the downtown parking garage. In addition, the Fleet Services Division applied to the Roseville Electric rebate program for electric vehicle charging stations. As a result, Roseville Electric awarded \$63,000 to purchase level 2 electric vehicle charger ports. With the combined funding from Placer County and Roseville Electric, seven (7) dual-head electric charging ports will be installed in the downtown parking garage to support the

City's electric fleet vehicles located downtown.

### FISCAL IMPACT

The Placer County Air Control Pollution District grant, Roseville Electric rebate award, and Fleet Services will fund the total for the City's fleet electric charging station infrastructure project amount of \$107,102. Funding under this grant will be awarded upon approved post-inspection by Placer County Air Pollution Control District or contract end date of April 30, 2027. There is no General Fund impact.

### ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) only applies to projects which have the potential to cause a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA. (CEQA Guidelines §15061(b)(3)).

### CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal A – Remain fiscally responsible in a changing world.

Goal E – Deliver exceptional city services.

Goal F – Invest in well-planned infrastructure and growth.

Respectfully Submitted,

Brandy LeBeau, Fleet Manager

Jason Shykowski, Public Works Director

---

Dominick Casey, City Manager

Description

Resolution 23-153

PCAPCD Grant Agreement

Ordinance 6646  
Budget Adjustment

RESOLUTION NO. 23-153

ACCEPTING GRANT AWARDS FROM ROSEVILLE ELECTRIC AND PLACER COUNTY AIR POLLUTION CONTROL DISTRICT, APPROVING A GRANT AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND THE PLACER COUNTY AIR POLLUTION CONTROL DISTRICT AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT AND ANY RELATED DOCUMENTS ON BEHALF OF THE CITY OF ROSEVILLE

WHEREAS, Roseville Electric received funding from the state to incentivize commercial businesses by offering \$4,500 incentives for each Level 2 hardwired wall or pedestal-mounted electric vehicle charger port; and

WHEREAS, the Fleet Services Division applied for and was awarded \$63,000 to purchase level 2 electric vehicle charger ports.

WHEREAS, the Placer County Air Pollution Control District's Clean Air Grant Program provides monetary grants to public agencies to fund projects that enable the deployment of alternative, advanced, and cleaner technologies to support the State's air quality goals; and

WHEREAS, the Fleet Services Division submitted a grant application to Placer County Air Pollution Control District in order to receive funding towards the City's electric vehicle charging station project in the downtown parking garage; and

WHEREAS, the City was awarded \$31,360 from the Placer County Air Pollution District's Clean Air Grant Program for the electric vehicle charging station; and

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Roseville that the City of Roseville accepts the grant award from Roseville Electric; and

BE IT FURTHER RESOLVED that the City of Roseville accepts the grant award from Placer County Air Pollution Control District and the City Manager is hereby authorized to execute the Grant Agreement on behalf of the City of Roseville; and

BE IT FURTHER RESOLVED that as the grant recipient, the City of Roseville agrees to comply with all conditions and requirements related to the awards.

PASSED AND ADOPTED by the Council of the City of Roseville this \_\_\_\_ day of \_\_\_\_\_, 20\_, by the following vote on roll call:

## **GRANT AGREEMENT**

**PCAPCD Contract Year:** FY 22-23

**Contract Number:** SCN105336R

**Board Resolution:** 18-07

**Grant Description:** Electric Vehicle Charging Station - Oak Street

This AGREEMENT is between the Placer County Air Pollution Control District (hereinafter “PCAPCD”) and City of Roseville (Public Works - Fleet Services), (hereinafter “GRANTEE”).

The parties agree as follows:

### **1. Services**

- a) GRANTEE agrees, during the term of this AGREEMENT, to perform the contracting services set forth below and in Exhibit A – Scope of Services (hereinafter “PROJECT”).
- b) GRANTEE shall be obligated to devote as much time, attention, skill, and effort as may be reasonably required to perform the PROJECT services, in a professional and timely manner, consistent with the elements of the PROJECT.

### **2. Contract Period**

- a) The term of this contract shall begin on the last date signed by the parties below and conclude on or before the end dates listed in Exhibit B – Contract Term and Payment for Services Rendered, unless terminated or amended.
- b) This contract may be canceled by either party upon serving thirty (30) days’ notice in writing to the other party.

### **3. Payment**

- a) PCAPCD agrees to pay for the services covered by this AGREEMENT pursuant to the payment terms set forth below and in Exhibit B – Contract Term and Payment for Services Rendered.
- b) The amount paid to the GRANTEE shall constitute full payment for all services set forth herein. GRANTEE shall not be reimbursed for any additional expenses incurred beyond the maximum approved sum.

- c) GRANTEE shall bill PCAPCD upon completion of the PROJECT and after all of the conditions for funding outlined in this AGREEMENT are met. If the PROJECT funded under this AGREEMENT is performed in phases or over a period of time, then requests can be made by the GRANTEE for partial payment. Partial requests for payments must receive prior authorization by PCAPCD. GRANTEE agrees to provide a detailed invoice to PCAPCD with copies of purchase orders, signed contracts, or receipts referencing the contract number. PCAPCD retains the right to require proof of services performed or costs incurred prior to any payment under this AGREEMENT.
- d) Notwithstanding any other terms of this AGREEMENT, no payments shall be made to GRANTEE until PCAPCD is satisfied that work of such value has been rendered pursuant to this AGREEMENT.

#### **4. Notices**

- a) Any notice or demand desired or required to be given hereunder shall be in writing and deemed given when personally delivered, sent via email with confirmed receipt, or deposited in the mail, postage prepaid, sent certified or registered and addressed to the parties as follows:

**PCAPCD:**

Placer County Air Pollution Control District  
Attn: Air Pollution Control Officer (APCO)  
110 Maple Street  
Auburn, CA 95603  
Email: [ecwhite@placer.ca.gov](mailto:ecwhite@placer.ca.gov)

**GRANTEE:**

City of Roseville (Public Works - Fleet Services)  
Attn: Dominick Casey  
311 Vernon Street  
Roseville, CA 95678  
Email: [dcasey@roseville.ca.us](mailto:dcasey@roseville.ca.us)

- b) Any notice so delivered personally shall be deemed to be received on the date of delivery, any notice so delivered via email with confirmed receipt shall be deemed to be received on the date of receipt confirmation, and any notice mailed shall be deemed to be received five (5) days after the date on which it was mailed.

#### **5. Obligations of PCAPCD**

- a) PCAPCD agrees to pay GRANTEE an amount not to exceed the requirements set forth in Exhibit B – Contract Term and Payment for Services Rendered, in accordance with the requirements listed in Exhibit A – Scope of Services.
- b) PCAPCD shall not reimburse GRANTEE for any expenses incurred by GRANTEE in the performance of PROJECT described in Exhibit A unless such reimbursement is specifically authorized in the Payment Schedule. GRANTEE shall not be reimbursed for any additional expenses incurred beyond the maximum amount.

- c) Except for the payment obligations set forth above, PCAPCD shall have no other obligations or responsibilities to GRANTEE under this AGREEMENT.

## **6. Obligations of GRANTEE**

- a) GRANTEE has or will obtain all additional funding set forth in Exhibit B of this AGREEMENT.
- b) GRANTEE has or will obtain all required licenses, permits, fees, and other legal authorizations from all applicable Federal, State, and local jurisdictions necessary to commence and properly complete, in a professional manner, the PROJECT described in Exhibit A and will produce said documents if requested by PCAPCD.
- c) Labor, equipment, material, supply costs and other charges will be in conformance with the requirements of Exhibit A.
- d) No component of the monies to be paid by PCAPCD to GRANTEE shall be used for grant administration or any interest costs.
- e) GRANTEE shall provide proof of PROJECT completion and verification of costs as set forth in Exhibit A and Section 3 above.

## **7. Hold Harmless/Indemnity**

- a) The GRANTEE hereby agrees to protect, defend, indemnify, and hold PCAPCD free and harmless from any and all losses, claims, liens, demands, and causes of action of every kind and character including, but not limited to, the amounts of judgments, penalties, interest, court costs, legal fees, and all other expenses incurred by PCAPCD arising in favor of any party, including claims, liens, debts, personal injuries, death, or damages to property (including employees or property of PCAPCD) and without limitation by enumeration, all other claims or demands of every character occurring or in any way incident to, in connection with or arising directly or indirectly out of, the contract or agreement. GRANTEE agrees to investigate, handle, respond to, provide defense for, and defend any such claims, demand, or suit at the sole expense of the GRANTEE. GRANTEE also agrees to bear all other costs and expenses related thereto, even if the claim or claims alleged are groundless, false, or fraudulent. This provision is not intended to create any cause of action in favor of any third party against GRANTEE or PCAPCD or to enlarge in any way the GRANTEE's liability but is intended solely to provide for indemnification of PCAPCD from liability for damages or injuries to third persons or property arising from GRANTEE's performance pursuant to this contract or agreement.
- b) As used above, the term PCAPCD means PCAPCD or its officers, agents, employees, and volunteers.

## **8. Insurance Requirements**

- a) It is recognized that GRANTEE is self-insured, and as such provides coverage for General Liability and Worker's Compensation.

- b) GRANTEE shall file with PCAPCD, concurrently herewith, Certificates of Insurance. All certificates are to be received and approved by PCAPCD before work commences. However, failure to obtain the required documents prior to the work beginning shall not waive the GRANTEE's obligation to provide them. PCAPCD reserves the right to require complete, certified copies of all required insurance policies, required by these specifications, at any time.
- c) GRANTEE shall maintain the following insurance coverage in full force and effect during the term of this contract:

#### WORKER'S COMPENSATION AND EMPLOYERS LIABILITY INSURANCE

If GRANTEE represents that they have no employees, and does not hire SUBCONTRACTORS with employees, then they are not required to have Workers Compensation coverage.

Worker's Compensation Insurance shall be provided as required by any applicable law or regulation. Employer's liability insurance shall be provided in amounts not less than one million dollars (\$1,000,000) each accident for bodily injury by accident, one million dollars (\$1,000,000) policy limit for bodily injury by disease, and one million dollars (\$1,000,000) each employee for bodily injury by disease.

If there is an exposure of injury to GRANTEE'S employees under the U.S. Longshoremen's and Harbor Worker's Compensation Act, the Jones Act, or under laws, regulations, or statutes applicable to maritime employees, coverage shall be included for such injuries or claims.

GRANTEE shall require all SUBCONTRACTORS to maintain adequate Workers' Compensation insurance. Certificates of Workers' Compensation shall be filed with PCAPCD upon demand.

#### GENERAL LIABILITY INSURANCE

A. Comprehensive General Liability or Commercial General Liability insurance covering all operations by or on behalf of GRANTEE, providing insurance for bodily injury liability and property damage liability for the limits of liability indicated below and including coverage for:

→ Contractual liability insuring the obligations assumed by GRANTEE in this Agreement.

B. One of the following forms is required:

1. Comprehensive General Liability;
2. Commercial General Liability (Occurrence); or
3. Commercial General Liability (Claims Made).

C. If GRANTEE carries a Comprehensive General Liability policy, the limits of liability shall not be less than a Combined Single Limit for bodily injury damage, and Personal Injury Liability of:

- One million dollars (\$1,000,000) each occurrence
- One million dollars (\$1,000,000) aggregate

D. If GRANTEE carries a Commercial General Liability (Occurrence) policy:

1. The limits of liability shall not be less than:
  - One million dollars (\$1,000,000) each occurrence (combined single limit for bodily injury and property damage)
  - One million dollars (\$1,000,000) for Products-Completed Operation
  - One million dollars (\$1,000,000) General Aggregate
2. If the policy does not have an endorsement providing that the General Aggregate Limit applies separately, or if defense costs are included in the aggregate limits, then the required aggregate limit is two million dollars (\$2,000,000).

E. Special Claims Made Policy Form Provisions:

1. The limits of liability shall not be less than:
  - One million dollars (\$1,000,000) each occurrence (combined single limit for bodily injury and property damage)
  - One million dollars (\$1,000,000) aggregate for Products Completed Operations
  - One million dollars (\$1,000,000) General Aggregate
2. The insurance coverage provided by GRANTEE shall contain contract in order to provide insurance coverage for the hold harmless provisions herein if the policy is a claims-made policy.

## **9. Facilities, Equipment and Other Materials**

Except as set forth herein, GRANTEE shall, at its sole cost and expense, furnish all facilities, equipment, and other materials which may be required for furnishing services pursuant to this AGREEMENT. PCAPCD shall furnish GRANTEE only those facilities, equipment, and other materials, and shall perform only those obligations as listed herein.

## **10. Non-Discrimination**

GRANTEE shall not discriminate in its employment practices because of race, religious creed, color, national origin, ancestry, disability, medical condition, marital status, sex, sexual preference, or in contravention of any other protected classification or practice identified in the California Fair Employment and Housing Act; Government Code section 12900 et seq.

## **11. Records and Documents**

- a) GRANTEE shall maintain at all times complete, detailed records with regard to work performed under this AGREEMENT, in a form acceptable to PCAPCD, and PCAPCD shall have the right to inspect such records at any reasonable time.
- b) GRANTEE agrees to return to PCAPCD, upon termination of this AGREEMENT, all documents, drawings, photographs, and other written or graphic material, however produced, received from PCAPCD and used by GRANTEE in the performance of its services. All work papers, drawings, internal memoranda, graphics, photographs, and any written or graphic material, however produced, prepared by GRANTEE in connection with its performance of services hereunder shall be, and shall remain after termination of this AGREEMENT, the property of PCAPCD and may be used by PCAPCD for any purpose whatsoever. PCAPCD agrees that any future use of documents produced by the GRANTEE under the terms of this contract shall be at the sole discretion of PCAPCD and GRANTEE shall bear no liability for the decisions on whether and how to use such documents.

## **12. Independent Status**

- a) GRANTEE shall perform this contract as an independent contractor and not as an employee of PCAPCD. GRANTEE acknowledges that GRANTEE is not entitled to any of PCAPCD's fringe benefits, including without limitation; paid holidays, life insurance, sick leave, or travel or any other expenses in connection with services performed hereunder. No part of the compensation payable to GRANTEE hereunder shall be deducted or withheld for payment of Federal or State income or other employment related taxes. It shall be the responsibility of GRANTEE to provide all coverage necessary for GRANTEE's own benefit and not as an employee of PCAPCD.
- b) Except as PCAPCD may specify in writing, GRANTEE shall have no authority, express or implied, to act on behalf of PCAPCD in any capacity whatsoever as an agent. GRANTEE shall have no authority, express or implied, pursuant to this AGREEMENT to bind PCAPCD to any obligation whatsoever.

## **13. Warranties**

GRANTEE warrants that its services are performed, with the usual thoroughness and competence; in accordance with the standard for professional services at the time those services are rendered.

## **14. Licenses, Permits, Etc**

GRANTEE represents and warrants to PCAPCD that it has or will obtain before initiation of the PROJECT, all licenses, permits, qualifications, and approvals of whatever nature, which are legally required for GRANTEE to practice its profession. GRANTEE represents and warrants to PCAPCD that GRANTEE shall, at its sole cost and expense, keep in effect or obtain at all times during the term of this AGREEMENT, any licenses, permits, and approvals which are legally required for GRANTEE to practice its profession at the time the services are performed.

**15. Assignment or Transfer**

GRANTEE may assign any of its rights, burdens, duties, or obligations under this AGREEMENT only upon the prior written consent of PCAPCD. Approval will be at the sole discretion of PCAPCD.

**16. Modification of Agreement**

This AGREEMENT cannot be changed or supplemented orally, and may be modified or superseded only by written instrument executed by all parties.

**17. Waiver**

One or more waivers by one party of any major or minor breach or default of any provision, term, condition, or covenant of this AGREEMENT shall not operate as a waiver of any subsequent breach or default.

**18. Entirety of AGREEMENT**

This AGREEMENT constitutes the entire AGREEMENT and understanding between the parties. There are no oral understandings, terms, or conditions, and no party has relied upon any representation, express or implied, not contained in this AGREEMENT. Any prior understandings, terms, or conditions are deemed merged into this AGREEMENT. This AGREEMENT is intended as the complete and exclusive statement of the parties' Agreement pursuant to Code of Civil Procedure section 1856.

**19. Jurisdiction**

This AGREEMENT, and the right and obligations of the parties, shall be governed by and construed in accordance with the laws of the State of California. If any action is instituted to enforce or interpret this AGREEMENT, venue shall only be in the appropriate state or federal court having venue over matters arising in Placer County, California, provided that nothing in this AGREEMENT shall constitute a waiver of immunity to suit by PCAPCD.

**20. Exhibits**

All exhibits referred to herein and attached hereto are fully incorporated by this reference.

**21. Electronic Signatures**

An Electronic Signature refers to any representation in electronic form used to express intent, including a typed name placed in a signatory area, a digitized image or copy of a handwritten signature, a scanned signature on a PDF document, a biometric mark, a sound, or a digital signature. An Electronic Signature provides who signed, what was signed, captures intent and consent. If parties agree to a transaction by electronic means and are required by law to provide, send, or deliver information in writing, the requirement is satisfied if the information is

provided, sent, or delivered in an electronic record, which the recipient can retain at the time of receipt.

By the action of applying an Electronic Signature to this AGREEMENT, parties to the AGREEMENT are certifying their willingness to use electronic signatures and records delivered via electronic means. A signed copy of this AGREEMENT, or any other related ancillary agreement or amendment, transmitted by facsimile, email, electronic signature application, or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signature.

**The parties so agree.**

**Project Scope:**

Purchase and have installed a private electrical vehicle charging station located at 405 Oak Street, Roseville, CA 95661. The charging station shall include seven, dual-port, Level 2 or higher electric vehicle chargers and associated equipment and infrastructure as outlined in GRANTEE's Clean Air Grant application and associated quotes. The station shall be able to charge fourteen vehicles at a time.

**Usage:**

Usage of the electric vehicle charging station is anticipated to consist of 100 monthly charging events, for an estimated minimum total of 1200 visits per year. GRANTEE shall make every possible effort to meet this usage goal, for the first three years of operation.

**I. To be Completed Prior to Funding and Prior to Project Completion End Date**

Prior to funding and prior to the close of the Project Completion End Date, as outlined in Exhibit B, the GRANTEE shall meet the following conditions:

- A. Purchase and install electric vehicle charging station as described above, and as outlined in GRANTEE's Carl Moyer grant application and associated quotes. If, after execution of this AGREEMENT, GRANTEE wishes to amend/modify project scope, from what was herein described, GRANTEE shall submit a request to PCAPCD as soon as possible to seek approval to do so. Changes to project scope and description may only occur with PCAPCD written permission. Additional project costs from such changes, or costs not eligible for funding shall be borne by the GRANTEE.
- B. Battery charging station installations which are available to the public must be reported to the Department of Energy Alternative Fuel Data Center located at: <http://www.afdc.energy.gov/locator/stations/>.

- C. GRANTEE (or its representative) shall provide to PCAPCD:
- 1) Copies of invoices relative to the purchase of equipment and services funded under this AGREEMENT.
  - 2) Proof and terms of financing, including lender and amount financed (if applicable).
  - 3) Warranty and its terms for installed equipment.
  - 4) Original invoice to PCAPCD, for the amount of requested grant funds for reimbursement. Note that the invoice cannot be paid until all of the requirements for funding have been completed. PCAPCD may require GRANTEE to re-submit the invoice if payment requirements have not been met in the current PCAPCD fiscal year (7/1 through 6/30).
  - 5) GRANTEE shall provide documentation identifying that they have obtained all applicable land use permits from agencies needed to install and operate the stations.
  - 6) Certification from the GRANTEE that all funding sources that they have applied for or received for the PROJECT have been disclosed, and that the GRANTEE will notify PCAPCD of additional sources of funding received for the total cost of the PROJECT, including any sources that become available after contract execution, prior to PROJECT funding. GRANTEE is prohibited from receiving grants and other funds that exceed the total project amount.
  - 7) An AB 841 Certification Statement that certifies the project complied with all AB 841 (2020) requirements or describes why the AB 841 requirements do not apply to the project. The certification shall be signed by the GRANTEE's authorized representative. If AB 841 requirements apply, the Certification Statement will include the Electric Vehicle Infrastructure Training Program (EVITP) Certification Number of each EVITP certified electrician that installed electric vehicle charging infrastructure or equipment.
- D. Visibly display at each charging station that funding was made available by PCAPCD. Any graphics used for this purpose need to be approved in advance by PCAPCD staff.
- E. Have a post inspection conducted by PCAPCD staff in order to verify PROJECT completion and operation as outlined in this AGREEMENT and the GRANTEE's grant application.
- F. A determination by PCAPCD that the PROJECT and all associated documentation have satisfied the requirements for reimbursement.
- G. Charger must be certified by a Nationally Recognized Testing Laboratory (e.g., Underwriter's Laboratories, Intertek) located at:  
<https://www.osha.gov/dts/otpc/nrtl/nrtllist.html>

## **II. To Be Completed During Project Implementation Period**

During the PROJECT Implementation Period, the GRANTEE shall complete the following reporting and recordkeeping requirements. The PROJECT Implementation Period refers to the timeframe between the PCAPCD Approved Post-Inspection date and the Contract End Date:

- A. GRANTEE shall keep records in order to satisfy the requirements of the Annual Monitoring Report, as outlined in Exhibit C of this AGREEMENT. Such records shall

include quantity of fuel/electricity used at each station, number and type of users, and any downtime encountered, including duration and cause of downtime.

- B. GRANTEE shall provide PCAPCD Annual Monitoring Reports as described in Exhibit C. The first annual monitoring report shall be submitted no later than 13 months after PROJECT post-inspection and continuing annually thereafter throughout the PROJECT Implementation Time Frame of this AGREEMENT. At a minimum, noncompliance with the reporting requirements will require an on-site inspection(s). At the sole discretion of PCAPCD, ten (10) percent of the awarded grant amount, as outlined in Exhibit B, will be withheld pending the submittal and approval of the first Annual Monitoring Report as outlined in Exhibit C – Monitoring Report Format.
- C. GRANTEE shall maintain and retain usage and other records associated with the PROJECT for at least three years after the end of the contract term.
- D. Pursuant to Section 8 of this AGREEMENT, GRANTEE shall provide proof of insurance prior to performing work on this PROJECT, and throughout the term of this contract.

### **III. General Conditions**

- A. Work associated with the installation of the charging/alternative fueling infrastructure must be done by a licensed contractor. GRANTEE agrees to be bound by the provisions of State Labor Code Section 1771 regarding prevailing wages, as applicable. If applicable, GRANTEE shall monitor all agreements subject to reimbursement from this agreement to ensure that the prevailing wage provisions of State Labor Code Section 1771 are being met.
- B. AB 841 requires that electric vehicle infrastructure and equipment on the customer side of the electrical meter be installed by contractors with the appropriate license classification as determined by the Contractors State License Board. Specifically, at least one electrician on each crew, at any given time, must hold an EVITP certification; and
  - 1) Projects that install a charging port supplying 25 kilowatts (kW) or more to a vehicle, must have at least 25 percent of the total electricians working on the crew for the project, at any given time, hold an Electric Vehicle Infrastructure Training Program (EVITP) certification; and
  - 2) One member of each crew may be both the contractor and an EVITP certified electrician.
  - 3) The requirements stated in 1) and 2) above do not apply to any of the following:
    - a. Electric vehicle charging infrastructure installed by employees of an electrical corporation or local publicly owned electric utility.
    - b. Electric vehicle charging infrastructure funded by moneys derived from credits generated from the Low Carbon Fuel Standard Program (Subarticle 7 (commencing with Section 95480) of Article 4 of Subchapter 10 of Chapter 1 of Division 3 of Title 17 of the California Code of Regulations).
    - c. Single-family home residential electric vehicle chargers that can use an existing 208/240-volt outlet.

- 4) GRANTEE acknowledges the project will comply with the AB 841 requirements and provide the AB 841 Certification Statement, as specified in Exhibit A, Section I.C.7, with submission of the invoice requesting grants funds for reimbursement.

**Initials:** {{InitContractor es .signer4:initials}}

- C. Eligible costs are limited to the purchase and installation of the equipment for power delivery or fueling directly related to the infrastructure project and must utilize commercially available technologies. Refer to the 2017 Carl Moyer Guidelines, Chapter 10, for a complete list of eligible, discretionary and ineligible costs.
- D. Publicly accessible stations, at a minimum must be accessible to the public daily, during regular business hours.
- E. Equipment and parts must be new.
- F. For Battery charging stations, chargers must be Level 2 or higher.
- G. Publicly accessible light-duty battery charging stations must use a valid and universally accepted charge connector protocol (e.g. Society of Automotive Engineers, CHAdeMO).
- H. Equipment must have at least a one-year warranty.
- I. The equipment funded under this AGREEMENT must be in operable condition throughout the term of this AGREEMENT.
  - 1) Publicly accessible infrastructure projects must maintain a 95 percent successful charging rate with 24/7 customer service available on site, via toll free telephone number. If equipment becomes non-functional, the GRANTEE is responsible for ensuring that repairs are made and the station is up and running within 48 hours. The GRANTEE must notify PCAPCD of any downtime beyond the 48 hours and work with PCAPCD to ensure publicly accessible stations become operational.
  - 2) For non-publicly accessible infrastructure projects, if the equipment becomes non-functional, the GRANTEE has 15 business days to report the problem to PCAPCD and begin working with PCAPCD promptly to ensure infrastructure equipment is operational.
  - 3) During the PROJECT Implementation Time Frame, if the fuel/energy meter fails for any reason, the fuel/energy meter must be repaired or replaced as soon as possible and is considered a maintenance expense, therefore not an eligible cost for reimbursement.
- J. PROJECTS must comply with all applicable federal, State, and local laws and requirements, including environmental laws and State building, environmental, and fire codes.
- K. For charging/alternative fueling infrastructure projects that receive a grant of \$50,000 or more, PCAPCD shall submit a Uniform Commercial Code-1 Financing Statement Form to the California Secretary of State. The financing statement shall list PCAPCD as the secured party.
- L. GRANTEE shall notify PCAPCD in writing if installation and/or implementation of this PROJECT will deviate from the scope of work as outlined in the GRANTEE's Grant Application or this AGREEMENT at any time during the term of this AGREEMENT. GRANTEE shall notify the APCO within 15 days of recognizing such deviation. If

funding has not yet been disbursed at the time of recognizing such deviation, then the GRANTEE shall notify the APCO at least 30 days in advance of any request for payment. The APCO has the sole discretion to approve, deny, or adjust funding amount as outlined in Exhibit B of this AGREEMENT, based on the extent of the deviation.

- M. GRANTEE shall maintain the equipment funded under this AGREEMENT according to the manufacturer's specifications for the term of the AGREEMENT and shall not tamper with it in any way as to void the warranty.
- N. GRANTEE shall allow PCAPCD, CARB, or other designee to conduct an inspection or audit of the PROJECT being funded under this AGREEMENT, including the engine, equipment, and associated records, during the contract term. At the time of execution of this AGREEMENT, GRANTEE's signature shall be a certification that its fleet, engine(s), and vehicles are in compliance with all applicable federal, State, and local air quality rules and regulations and shall continue to maintain, for the term of the AGREEMENT, compliance with all applicable federal, State, and local air quality rules and regulations for the full contract term.
- O. Throughout the term of this AGREEMENT, the PROJECT cannot be used to generate credits or compliance extensions, and must be excluded when determining regulatory compliance, when applicable.
- P. GRANTEES that receive co-funding for the PROJECT funded under this AGREEMENT must meet all criteria associated with each funding source used to fund the PROJECT.
- Q. GRANTEES that are not a public entity must provide at least 15 percent of the PROJECT's Moyer eligible costs from non-public sources.
- R. In addition to the terms of this AGREEMENT, GRANTEE shall adhere to all requirements outlined in the applicable California Air Resources Board Guidelines. If there is a conflict between the terms of this contract and California Air Resources Board's Guidelines, the California Air Resources Board's Guidelines shall prevail.
- S. By executing this AGREEMENT, GRANTEE understands and agrees to operate and maintain their station(s) according to the terms herein and to cooperate with PCAPCD and CARB in implementation, monitoring, enforcement, and other efforts to assure the emission benefits are real, quantifiable, surplus, and enforceable.
- T. CARB, as an intended third party beneficiary, reserves the right to enforce the terms of this AGREEMENT at any time during the term of this AGREEMENT to ensure emission reductions are obtained.

#### **IV. Repercussions for Nonperformance**

- A. If for any reason, after PROJECT funding, the PROJECT does not perform according to what was submitted in the GRANTEE's application, or in conjunction with the application, or if the conditions of this AGREEMENT are not met, PCAPCD or CARB may require reimbursement of grant funds.
- B. CARB and PCAPCD have the authority to pursue any remedies available under the law for noncompliance with Moyer Program requirements and nonperformance of terms outlined in this AGREEMENT, in an effort to ensure emission reductions are obtained.

**EXHIBIT B**  
**CONTRACT TERM AND PAYMENT FOR SERVICES RENDERED**

**Grant Description: Electric Vehicle Charging Station - Oak Street**

**Contract Schedule (to occur on or before the following dates)**

|                                    |                                         |
|------------------------------------|-----------------------------------------|
| Start Date:                        | last date signed by the parties         |
| Project Completion End Date:       | 4/30/2024                               |
| Project Implementation Start Date: | Upon approved Post-Inspection by PCAPCD |
| Project Implementation Period:     | 3 years                                 |
| Contract End Date:                 | 4/30/2027                               |

**Budget**

|                                           |             |
|-------------------------------------------|-------------|
| Amount Awarded by PCAPCD:                 | \$31,360.00 |
| Estimated Co-Funding (including in-kind): | \$63,000.00 |
| Estimated Total PROJECT Amount:           | \$94,360.00 |

If the Total PROJECT Amount is less than what is listed above, then the GRANTEE may be required to provide an equivalent percentage of Co-Funding based on the reduced Total PROJECT Amount. The Amount Awarded by PCAPCD, as listed above, shall be adjusted accordingly.

**Payment**

PCAPCD will provide up to \$31,360.00 (Thirty-One Thousand Three Hundred Sixty Dollars) in funding, in accordance with the requirements listed in this AGREEMENT. Payment(s) shall be made to the GRANTEE within thirty (30) days after the billing is received and approved by PCAPCD.

At the sole discretion of PCAPCD, ten (10) percent of the awarded grant amount, as outlined in this exhibit, will be withheld pending the submittal and approval of the first Annual Monitoring Report as outlined in Exhibit C – Monitoring Report Format.

A completed federal W-9 form and California 590 form must be submitted prior to payment. An IRS Form 1099 will be issued for incentive funds received under this AGREEMENT, if applicable. It is the GRANTEE's responsibility to determine tax liability associated with receiving grant incentive funds.

**Invoices**

Invoices shall be submitted to PCAPCD in an original format and include the contract number. Along with submitting an invoice for reimbursement, provide copies of all paid receipts and proof of in-kind support (when applicable), and evidence of financing, associated with the PROJECT funded under this AGREEMENT.

**EXHIBIT C**  
**MONITORING REPORT FORMAT**

**Grant Description: Electric Vehicle Charging Station - Oak Street**

The first annual monitoring report shall be submitted no later than 13 months after PROJECT post-inspection and continuing annually thereafter throughout the PROJECT Implementation Period of this AGREEMENT. The report can be emailed, mailed, or delivered in person to PCAPCD.

The report shall include the following:

1. GRANTEE's name, address, and telephone number.
2. Reference Contract Number.
3. Qualitative description of public and private uses.
4. Annual and cumulative PROJECT total of usage per charger (e.g. kilowatt-hour) and number of plug in events.
5. If the charging station has incorporated solar or wind power generation equipment, then provide the amount of electricity generated (kilowatt-hour) from the solar or wind power generating equipment.
6. Any unscheduled downtime, including duration of downtime and causes of downtime.

Note: After the monitoring report is submitted to PCAPCD, staff may conduct a performance evaluation on the PROJECT.

ORDINANCE NO. 6646

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE  
AUTHORIZING CERTAIN AMENDMENTS TO THE FISCAL YEAR 2022-23  
BUDGET AND DECLARING THIS ORDINANCE TO BE IMMEDIATELY  
EFFECTIVE AS AN APPROPRIATION MEASURE

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. The City of Roseville Annual Budget, Fiscal Year 2022-23, is hereby amended as listed on the attached budget adjustment for the fleet services electric charging station project.

SECTION 2. This ordinance is hereby declared to be an appropriation measure, immediately effective pursuant to the provisions of Section 5.03 of the Charter.

SECTION 3. The City Clerk is hereby authorized and directed to post a true copy of the foregoing ordinance in each of three (3) conspicuous locations in the City and she shall immediately after such posting enter in the ordinance book, under the record of the ordinance, a certificate under her hand stating the time and place of such publication by posting.

PASSED AND ADOPTED by the Council of the City of Roseville, this \_\_\_\_\_  
day of \_\_\_\_\_, 2023, by the following vote on roll call:

### Justification for Budget Adjustment:

This budget adjustment is requested to establish project 700044 - Clean Air Grant Program - Alternative Fueling Infrastructure. This project will design and install seven (7) dual-head chargers in the downtown parking garage (405 Oak Street) and support the City's electric fleet vehicles in the downtown area.

The total project budget is \$107,102 and is funded by:

- \$31,360 from Placer County Air Pollution Control District grant
- \$63,000 from COR Electric charger rebate program award
- \$12,742 from Fleet Services to cover increased project costs

Ordinance 6649

ORDINANCE NO. 6649

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE AMENDING SECTIONS 11.33.010, 11.33.020, 11.33.030, 11.33.060, 11.33.070, 11.33.080, 11.33.090, 11.33.100, 11.33.110 AND 11.33.120 OF CHAPTER 11.33 OF TITLE 11 OF THE ROSEVILLE MUNICIPAL CODE AND DELETING SECTIONS 11.33.130 AND 11.33.140 OF CHAPTER 11.33 OF TITLE 11 OF THE ROSEVILLE MUNICIPAL CODE REGARDING TRANSPORTATION SYSTEM MANAGEMENT

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. Section 11.33.010 of Chapter 11.33 of Title 11 of the Roseville Municipal Code is hereby amended to read as follows:

**11.33.010 Findings.**

The city council of the City of Roseville finds and determines that:

A. In 2021, the population of Roseville was approximately 146,875. With buildout of the General Plan, the City is estimated to have a total population of approximately 198,000, with approximately 75,200 dwelling units, 60 million square feet of non-residential building square footage, and between 120,000 and 150,000 local jobs. As population increases, coupled with the increases in employment, there is a need to promote travel modes other than single occupant vehicles in order to minimize road congestion and air pollution in the region, and to fulfill the goals, policies and implementation measures in the general plan is needed.

B. Ridesharing and other alternative transportation modes among employees for home to work trips is a simple, inexpensive and effective means of reducing peak hour, single occupant motor vehicle trips and vehicles miles traveled (VMT). A reduction in such trips and VMT can be expected to result in an improvement to the region's air quality, and a reduction in traffic congestion and energy consumption impacts relating to anticipated growth.

C. Implementation of a transportation systems management program focusing on alternative transportation modes is required to protect the public health, safety and welfare.

D. Cooperation with and coordination of transportation systems management programs with other cities, counties, and communities in the region and through regional agencies will demonstrate the viability and enhance the effectiveness of such programs.

SECTION 2. Section 11.33.020 of Chapter 11.33 of Title 11 of the Roseville Municipal Code is hereby amended to read as follows:

**11.33.020 Establishment of transportation systems management (TSM) program and purpose.**

The City of Roseville transportation systems management (TSM) program is established. The purposes and intent of this TSM program are to:

A. Reduce total vehicle emissions in the City of Roseville to achieve local, regional and statewide greenhouse gas emission reduction goals and improve air quality in the region.

B. Reduce vehicle miles traveled in the City of Roseville by expanding mobility options and encouraging viable non-automotive means of transportation in and through Roseville.

C. Increase the efficiency of the existing transportation network and contribute to achieving acceptable level of service (LOS) C on the roadway system in the City of Roseville.

D. Cooperate and coordinate with other cities, counties, communities and regional agencies in these endeavors.

E. Develop a program that secures the participation of local developers, businesses, institutions and public and private agencies to fulfill the purposes expressed herein.

SECTION 3. Section 11.33.030 of Chapter 11.33 of Title 11 of the Roseville Municipal Code is hereby amended to read as follows:

#### **11.33.030 Definitions.**

As used in this chapter, the following terms shall be given the meaning ascribed to them in this section.

A. **Applicant.** An applicant for any development approval, design review permit, tentative subdivision map or parcel map or for a use or uses which, individually or collectively, may be reasonably expected to generate employment for 50 or more employees at a major common work location.

B. **Carpool.** A motor vehicle occupied by two or more, but less than eight persons traveling to a common destination. Employees who work for different employers as well as non-employed persons, excluding children, are included within the definition so long as they are in the vehicle for the majority of the total trip distance.

C. **Clean Air Vehicle.** Any combination of a low-emitting, fuel-efficient, and carpool/vanpool vehicle.

D. **Commute Trip.** The trip made by an employee from home-to-work or work-to-home. The commute trip may include stops between the home and the work site.

E. **Common Work Location.**

1. A common work location shall consist of any office, commercial or industrial project or a single employer in separate or common ownership having more than 10 but fewer than 50 employees, which can generally be characterized by one or more of the following:

- a. Known by a common name given to the project by its developer;
- b. Governed by a common set of covenants, conditions, and restrictions, which requires common area maintenance agreement or owner's association;
- c. Approved, or is to be approved, as a single entity by the city;
- d. Covered by a single parcel map or final subdivision map; or
- e. Functions as a single retail, business center, or industrial park.

2. A "major common work location" is any common work location as defined in this section with 50 or more employees.

F. **Commuter.** An employee who travels regularly to and from a common work location or major common work location two or more days a week.

G. **Commuter Rideshare Matchlisting Service.** The rideshare program and commuter information service operated by the Sacramento Area Council of Governments (SACOG).

H. **EV.** Electric Vehicle

I. **Existing TSM Plan and TSM Agreement.** A TSM plan and TSM agreement existing prior to the adoption of this amendment to this chapter.

J. **Flexible Work Hours.** A system for shifting the workday of an employee so that the workday starts and/or ends outside of the peak hours.

K. **Level of Service (LOS).** A scale that measures the operating capacity likely to be encountered on a roadway or at the intersection of roadways, based on a volume-to-capacity ratio, with levels ranging from A to F, with A representing the highest level of service and F the lowest level of service.

L. **Peak Hours.** The periods of the day with the greatest volume of vehicular street traffic. In Roseville, the peak hours are generally between 7:00 a.m. and 9:00a.m. and 4:00 p.m. and 6:00 p.m. from Monday through Friday.

M. **Peak Hour Commuter.** A commuter who regularly arrives at, or departs from, a common work location or major common work location during the peak hours.

N. **Peak Hour Trip.** An arrival at, or departure from, a common work location or major common work location during the peak hours by a motor vehicle.

O. **Placer County Transportation Planning Agency (PCTPA).** The Regional Transportation Planning Agency (RTPA) for the Placer County jurisdictions, except for that portion of the county within the Tahoe Regional Planning Agency (TRPA). One of the PCTPA's

responsibilities is maintaining the congestion management program (CMP) which is to coordinate the interrelationship of transportation, land use and air quality including trip reduction and travel demand. Some of the programs implemented by PCTPA include marketing materials for alternative transportation promotions and site coordinator meetings.

**P. Project Controller.**

1. A project controller is the owner, lessor and/or manager of a common work location whose tenants, individually or collectively, employ 10 or more but less than 50 employees, or an employer who employs 10 or more but less than 50 employees.

2. A major project controller is the owner, lessor, and/or manager of a major common work location whose tenants, individually or collectively, employ 50 or more employees, or an employer who employs 50 or more persons.

**Q. Ridesharing.** A commute alternative to driving alone, which includes, but is not limited to, carpooling, vanpooling, public transit, walking and bicycling.

**R. Shift of Employment.** Any group of employees who work at a common work location or major common work location and who arrive and depart from work in a common time interval not greater than one hour.

**S. Single Occupant Vehicle (SOV).** A motor vehicle occupied by one employee for commute purposes.

**T. Telecommuting (also known as Telework or Work-From-Home).** A system of working at home or at an off-work site (non-home telecommute facility) for the full workday on a regular basis for at least one day per week.

**U. Transportation Commission.** The transportation commission of the City of Roseville.

**V. Transportation Coordinator.** The person responsible for implementing a TSM plan including employee education, in-house rideshare matching, and posting of information relating to alternative transportation.

1. **City Transportation Coordinator.** The transportation coordinator of the City of Roseville as designated by the city manager.

2. **Site Transportation Systems Management (TSM) Coordinator.** The person designated by the employer, property manager, or major project controller who is responsible for implementing a TSM plan at the major common work location. Such person is commonly referred to as the employee transportation coordinator (ETC) or the property transportation coordinator (PTC).

**W. Transportation Survey.** A survey report designed and distributed by the city's transportation coordinator and filled out by the site TSM coordinator which provides employee commute information in order to evaluate TSM program effectiveness.

X. **Transportation Systems Management (TSM) Agreement.** Written agreement with the city obligating the applicant to comply with the TSM Plan.

Y. **Transportation Systems Management (TSM) Toolkit.** An explanatory guide meant to provide clarification for site TSM coordinators and other interested persons. The TSM Toolkit describes how TSM plans are prepared by applicants, reviewed by the city and implemented by the site TSM coordinator.

Z. **Transportation Systems Management (TSM) Plan.** A plan submitted by an applicant and approved by the city pursuant to this chapter that is designed to reduce the number of vehicle trips to and from a major common work location. Such plan attempts to improve the movement of persons by providing employees with information regarding better and more efficient utilization of existing infrastructure (e.g., streets, roads, freeways) and new and innovative alternative commute modes (e.g., transit, carpooling, bicycling, telecommuting) in accordance with this chapter.

AA. **Vanpool.** A motor vehicle suited for occupancy by more than seven but less than 16 persons including the driver, traveling to and from work.

BB. **Vehicle Miles Traveled (VMT).** A measurement of travel demand - it is the number of miles traveled by vehicles in some amount of time (e.g., VMT per day or annual VMT).

SECTION 4. Section 11.33.060 of Chapter 11.33 of Title 11 of the Roseville Municipal Code is hereby amended to read as follows:

**11.33.060 Project requirements for a common work location.**

Every project controller shall encourage the TSM program at a common work location by:

A. **Disseminating TSM Information.** On a regular basis, share commute alternative information on ridesharing, transit, bicycling and other commute alternatives.

B. **Educating new employees about alternative transportation options.**

C. **Posting TSM Information.** Posting in a conspicuous place or places informational materials for employees provided by the city transportation coordinator, PCTPA or other regional rideshare agencies to encourage alternative transportation methods. Such informational material shall be kept current and may include, but is not limited to, the following:

1. Posters or flyers on how to obtain transportation information;
2. Current schedules, rates, procedures for obtaining transit passes, and routes of public transit service to the common work location;
3. Bike route maps;

4. Posters or flyers encouraging alternative modes of transportation;

SECTION 5. Section 11.33.070 of Chapter 11.33 of Title 11 of the Roseville Municipal Code is hereby amended to read as follows:

**11.33.070 Project requirements for a major common work location.**

For each existing employer or major common work location having 50 or more employees, and for every employer or common work location upon reaching 50 or more employees, the major project controller shall submit a TSM plan for the major common work location within 90 days of demand by the city. For each proposed development project, the applicant shall submit a TSM plan to the city during the development review stage of the planning process. The TSM plan shall include the following:

A. Project Description. A description of the business activity and operating characteristics of the proposed or existing project (e.g., business hours and peak hours of traffic generation).

B. Employee Description. A description of the tenants and/or employees anticipated at the project site, including the total number of employees per shift and an estimate of their commuting characteristics (e.g., travel distance and mode).

C. Site Plan. A site plan of the project depicting the location of the required bicycle facilities and designated EV capable spaces.

1. Bicycle Parking. Bicycle parking spaces shall be provided based on the number of total vehicular parking spaces as follows, or as required by the California Green Building Code, whichever is stricter:

- i. Short-term bicycle parking: Provide permanently anchored bicycle racks within 100 feet of the main entrance, or as otherwise approved, based on five percent of the visitor parking spaces, where 10 or more total vehicle spaces are provided, with a minimum of one two-bike capacity rack.
- ii. Long-Term bicycle parking: Provide secured bicycle parking for five percent of the employee parking spaces, with a minimum of one long-term bicycle parking space where 10 or more total vehicle spaces are provided.

The design and location of the bicycle parking shall be reviewed and approved by Alternative Transportation.

2. EV capable Parking. The major project controller shall designate parking spaces for electric vehicles based on the total number of vehicular parking spaces. The number of spaces shall be as follows, or as required by the California Green Building Code, whichever is stricter:

- i. No EV capable spaces required for 0-9 spaces;

- ii. 4 EV capable spaces for 10-25 spaces;
- iii. 8 EV capable spaces for 26-50 spaces;
- iv. 13 EV capable spaces for 51-75 spaces;
- v. 17 EV capable spaces for 76-100 spaces;
- vi. 25 EV capable spaces for 101-150 spaces;
- vii. 35 EV capable spaces for 151 - 200 spaces;
- viii. At least 20% EV capable for 201 and over spaces.

These spaces shall be marked “EV capable”, or as otherwise determined by Alternative Transportation. The location of the spaces shall be reviewed and approved by Alternative Transportation. A percentage of designated EV capable spaces shall be located for convenient access by the employee.

- 3. The tenant and visitor parking ratio shall be based on the total parking devoted to employees and visitor as determined through the development review process.

D. Showers and Lockers. To help encourage bicycling as a viable commute transportation alternative, major project controllers shall consider installing showers and lockers for their employees.

E. Site TSM Coordinator. The name, title, address, email and telephone number of the site TSM coordinator shall be included in the TSM plan. This information shall be updated and provided in writing to the city transportation coordinator during the triennial survey or at any time that there is a change in the site TSM coordinator. A statement of such site TSM coordinator’s responsibilities pursuant to Section 11.33.080 of this chapter shall be included in the TSM plan.

SECTION 6. Section 11.33.080 of Chapter 11.33 of Title 11 of the Roseville Municipal Code is hereby amended to read as follows:

**11.33.080 Site TSM coordinator’s responsibilities.**

The site TSM coordinator’s responsibilities include:

A. Monitoring common work locations, communicating with employees and/or tenants, and obtaining information from the city transportation coordinator to meet the requirements of 11.33.60.

B. Marketing the Commuter Rideshare Matchlisting Service. As applicable, disseminating to all tenants and employees, or to new tenants and employees when hired, written information provided by the city transportation coordinator and/or other regional rideshare agencies regarding regional commuter rideshare match listing services.

C. Participating in and/or promoting other programs, as applicable. Participating in measures or programs on a voluntary basis or if required by project conditions and/or mitigation measures. Examples of programs include:

1. Emergency Ride Home Program. Participation in this program requires an agreement between the project controller and the City of Roseville. If a site has an agreement, site TSM coordinator shall promote the emergency ride home program. The program provides for the transportation of employees who use alternative transportation modes for home to work commuting in case of a personal, family or other major emergency. The program is designed to help employees get home, to a hospital, clinic, child's daycare or school. The emergency ride home is a service provided by the City of Roseville.
2. Transit Pass Subsidy. Promoting the use of public transportation by providing to employees a transit pass subsidy to help offset the cost to the employee. Typically, the employer purchases the transit passes.
3. Vanpool Program. Establishing and/or promoting vanpooling for employees as a cost effective way to commute to work. Typically, the employees lease a van and the vanpool participants shall cover the operating costs for the van.

D. Participating in Informational Meetings and Training Opportunities. The site TSM coordinator will be invited to training events offered by the city's TSM coordinator and/or other agencies. These training events will include information and materials for promoting such alternative transportation programs.

E. Promoting Alternative Transportation Opportunities. In addition to the above programs, the site TSM coordinator shall encourage employers and employees to use alternative transportation. The city transportation coordinator may provide resources on programs. Such alternative transportation promotional opportunities include, but are not limited to, the following:

1. In-House Carpool Matching Opportunities. Provide an opportunity for employees to identify persons interested in being matched into carpools.
2. Telecommuting (also known as Telework or Work-From-Home). Telecommuting by allowing employees to work regularly and/or periodically from their home or an off-site location close to home.
3. Variable Work Hours. Encouraging employers and employees to eliminate commute trips or relocate the commute trip out of the peak period through the use of:
  - a. Compressed Work Weeks. A work schedule for an employee which eliminates at least one round trip commute biweekly. For example, 40 hours of work in four 10-hour days or a work plan that allows one day off every other week, known as the nine-eighty plan;
  - b. Staggered work hours involving a shift in the set work hours of all employees at the workplace; and

c. Flexible work hours involving individually determined work hours within guidelines established by the employer.

SECTION 7. Section 11.33.090 of Chapter 11.33 of Title 11 of the Roseville Municipal Code is hereby amended to read as follows:

**11.33.090 Review of TSM plan.**

A. During the planning process for new development or for any existing TSM plan, which the applicant proposes to revise, the applicant shall submit the TSM plan to the city transportation coordinator for evaluation for consistency with this chapter.

SECTION 8. Section 11.33.100 of Chapter 11.33 of Title 11 of the Roseville Municipal Code is hereby amended to read as follows:

**11.33.100 TSM agreement.**

If required through a planning document, upon approval of the TSM plan and prior to certificate of occupancy for new construction, or at any time after the approval of a revised TSM plan, the project owner shall enter into a written agreement with the city obligating the project owner to comply with the TSM plan. Such agreement shall be recorded, run with the land and bind all successors in interest, and shall constitute an equitable servitude on the property. Where appropriate, the city may require the agreement to include provisions for enforcement, including right of entry, in the event of breach by the project owner or a successor in interest.

SECTION 9. Section 11.33.110 of Chapter 11.33 of Title 11 of the Roseville Municipal Code is hereby amended to read as follows:

SECTION 10. Section 11.33.120 of Chapter 11.33 of Title 11 of the Roseville Municipal Code is hereby amended to read as follows:

**11.33.120 Transportation survey report.**

The city transportation coordinator map periodically prepare and distribute a survey report form to the major project controller. Each major project controller subject to the requirements of this chapter, and all successors in interest of said major project controller obligated to carry out a TSM plan or any part thereof, shall submit a transportation survey report to the city transportation coordinator upon request describing the effectiveness of the TSM plan. The report may contain at a minimum the following information:

- A. Tenant/Employee Characteristics.
- B. Site Characteristics.
- C. A description of the measures taken to comply with this chapter.
- D. Tenant/Employee Commute Characteristics.
- E. A description of any employer sponsored programs, such as vanpool or transit pass subsidy programs.
- F. Contact information for the site TSM coordinator.
- G. Other Information pertaining to implementation and goals of the TSM program

SECTION 11. Section 11.33.130 of Chapter 11.33 of Title 11 of the Roseville Municipal Code is hereby deleted in its entirety:

SECTION 12. Section 11.33.140 of Chapter 11.33 of Title 11 of the Roseville Municipal Code is hereby deleted in its entirety:

SECTION 13. This ordinance shall be effective at the expiration of thirty (30) days from the date of adoption.

SECTION 14. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

## COUNCIL COMMUNICATION

**CC #: 2659**

**File #: 0400-04-12-1 & 0400-07**

**Title:** Sierra Vista Specific Plan - Baseline Marketplace DF Properties, Inc. - Large Lot Subdivision Final Map  
**Contact:** Kerry Andrews 916-774-5346 kandrews@roseville.ca.us

**Meeting Date: 5/3/2023**

**Item #: 7.22.**

### RECOMMENDATION TO COUNCIL

It is recommended that the City Council take the following actions:

1. Approve the final map on file with the City Clerk and accept, on behalf of the public, the easements offered thereon, but reject at this time, on behalf of the public, all irrevocable offers of dedication, and approve the abandonment of the rights of way and easements listed thereon.

### BACKGROUND

The Development Services - Engineering section has reviewed the subject final map and found that it is in compliance with the Subdivision Map Act and the City's Subdivision Ordinance and all conditions of the tentative map have been met.

This map will be creating 28 large lots for future development and 1 public open space lot.

### FISCAL IMPACT

There is no fiscal impact to the City's General Fund associated with this approval.

### ENVIRONMENTAL REVIEW

Approval of the Baseline Marketplace DF Properties, Inc., Large Lot Subdivision final map is an action that is subject to California Environmental Quality Act (CEQA). Project level CEQA compliance for the Baseline Marketplace DF Properties, Inc., Large Lot Subdivision final map was accomplished with preparation of the Sierra Vista Specific Plan EIR (Adopted: May 5, 2010) (SCH#2008032017) and the Mitigated Negative Declaration (MND) and associated Mitigation Monitoring Program approved by the City of Roseville on June 6, 2012. Because the Baseline

Marketplace DF Properties, Inc., Large Lot Subdivision final map is consistent with the project evaluated in the Sierra Vista Specific Plan Environmental Impact Report (EIR), no new effects would be expected to occur and all applicable mitigation measures from the Sierra Vista Specific Plan EIR will be implemented. As such, no additional CEQA action is required at this time.

#### CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal F - Invest in well-planned infrastructure and growth

Respectfully Submitted,

Kerry Andrews, Assistant Engineer

Mike Isom, Development Services Director

OWNER'S STATEMENT

THE UNDERSIGNED HEREBY CERTIFY THAT THEY ARE THE ONLY PERSONS HAVING ANY RECORD TITLE INTEREST IN THE REAL PROPERTY INCLUDED WITHIN THE SUBDIVISION SHOWN UPON THIS FINAL MAP OF "BASELINE MARKETPLACE DF PROPERTIES, INC. LARGE LOT SUBDIVISION" AND THEY HEREBY CONSENT TO THE PREPARATION AND RECORDATION OF THIS FINAL MAP AND HEREBY OFFER FOR DEDICATION AND DO HEREBY DEDICATE FOR SPECIFIC PURPOSES THE FOLLOWING:

THE REAL PROPERTY DESCRIBED BELOW IS DEDICATED AS EASEMENTS FOR PUBLIC PURPOSES:

- (A) A PUBLIC EASEMENT FOR THE INSTALLATION AND MAINTENANCE OF, BUT NOT LIMITED TO ELECTROLIERS, WATER AND GAS PIPES, SEWER AND DRAINAGE PIPES, AND FOR UNDERGROUND WIRE AND CONDUITS FOR ELECTRIC, TELEPHONE AND TELEVISION SERVICES AND TRAFFIC CONTROL APPURTENANCES TOGETHER WITH ANY AND ALL APPURTENANCES PERTAINING THERETO ON, OVER, UNDER AND ACROSS THE PUBLIC STREETS SHOWN HEREON AS PAVILION DRIVE, SAN FERNANDO DRIVE AND UPLAND DRIVE, AND THOSE STRIPS OF LAND LYING CONTIGUOUS TO THE RIGHT-OF-WAYS AS SHOWN HEREON AND DESIGNATED "PUE" (PUBLIC UTILITY EASEMENT).
- (B) A PUBLIC EASEMENT FOR PEDESTRIAN ACCESS ON AND ACROSS THOSE STRIPS OF LAND SHOWN HEREON AND DESIGNATED "PE" (PEDESTRIAN EASEMENT).

THE REAL PROPERTY DESCRIBED BELOW IS IRREVOCABLY DEDICATED IN FEE FOR PUBLIC PURPOSES:

- (A) AS PUBLIC RIGHT-OF-WAY (INCLUDING ALL IMPROVEMENTS THEREON) THE STREETS SHOWN HEREON AS UPLAND DRIVE, SAN FERNANDO DRIVE AND PAVILION DRIVE.
- (B) LOT A SHOWN HEREON TO THE CITY OF ROSEVILLE FOR PUBLIC OPEN SPACE PURPOSES.

## COUNCIL COMMUNICATION

**CC #: 2688**  
**File #: 0102-10**

**Title:** Resolution - Darrell Robbson  
**Contact:** Blair Hutchison 916-774-5266 bmhutchison@roseville.ca.us

**Meeting Date: 5/3/2023**  
**Item #: 7.23.**

### RECOMMENDATION TO COUNCIL

Commend Darrell Robbson for his 27 years of outstanding service and dedication to the City of Roseville, congratulate him for his many accomplishments, and wish him a long, healthy, and enjoyable retirement.

### BACKGROUND

Not applicable.

### FISCAL IMPACT

Not applicable.

### ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Ceremonial documents meet the above criteria and are not subject to CEQA. No additional environmental review is required.

### CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Not applicable.

Respectfully Submitted,

Blair Hutchison, City Clerk Technician

Carmen Avalos, City Clerk

Resolution - Darrell Robbison

# Resolution

**WHEREAS**, Darrell Robbison began his distinguished career with the City of Roseville in 1995 and has chosen to retire after 27 years of dedicated service; and

**WHEREAS**, Darrell was originally hired as a Utility Maintenance Worker I with the Environmental Utilities Wastewater Collection Division and promoted to a Utility Maintenance Worker II in 1996; and

**WHEREAS**, in 2006, Darrell was promoted to Construction Inspector I and moved to the Public Works Department, where he would become the subject matter expert on MS4 permits related to construction, in addition to his normal inspection activities. Darrell's excelled performances and leadership skills earned him promotions to Construction Inspector II, and Senior Construction Inspector; and

**WHEREAS**, in 2020, Darrell was promoted to Construction Inspection Supervisor where he has done an exceptional job at assigning projects and collaborating with other departments; and

**WHEREAS**, Darrell's hard work and value to the City of Roseville have been recognized through various awards, including receipt of the Pride of Roseville Award in 1998 for an engineering archiving project, and in 2006, as part of the team that completed the Wastewater Collection Systems Condition Assessment Project. Darrell was also recognized by City Council in 1997 for being part of the collection team recognized as the "best collection system in Sacramento" and receiving a Special Engineering Achievement award; and

**WHEREAS**, Darrell has inspected hundreds of millions of dollars in public and private infrastructure and commercial projects, helping to ensure the residents and visitors of Roseville can reliably use these resources; and

**WHEREAS**, Darrell's long career with the City gave him the opportunity to develop relationships with contractors, developers, and City staff across multiple departments, where he will be remembered for his friendly smile, happy nature, resourcefulness, and dedication.

**NOW, THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA**, that **DARRELL ROBBISON** be commended for his 27 years of outstanding service and dedication to the City of Roseville, congratulated for his many accomplishments, and wished a long, healthy, and enjoyable retirement.

**SIGNED AND APPROVED this 3<sup>rd</sup> day of May 2023.**

**BRUCE HOUDSHELDT, MAYOR**

## COUNCIL COMMUNICATION

CC #: 6648

File #: 0400-04-12-1 & 0201-01

**Title:** Sierra Vista Specific Plan Westbrook Boulevard - Reimbursement Agreement and Budget Adjustment  
**Contact:** Marc Stout 916-774-5482 mstout@roseville.ca.us

Meeting Date: 5/3/2023

Item #: 8.1.

### RECOMMENDATION TO COUNCIL

Staff recommends that the City Council adopt a resolution to approve the City/Developer Reimbursement Agreement with John Mourier Construction, Inc., and authorize the City Manager to execute it on behalf of the City of Roseville; and recommends that the City Council adopt an ordinance approving a budget adjustment to appropriate \$4,000,000 from the Strategic Improvement Fund (SIF), \$400,000 from the Sierra Vista Traffic Mitigation Set-Aside Fund, \$100,000 from Electric Fund and \$1,040,000 from the Electric Rate Stabilization Fund to the City's Developer Reimbursement account.

### BACKGROUND

The Sierra Vista Specific Plan Development Agreements allow for build-as-you-go public infrastructure associated with private development projects within the plan area. This allowance was made to help facilitate the development of the plan area by allowing for smaller portions of public infrastructure to be constructed with each private development project. John Mourier Construction, Inc. (JMC) has been constructing single family homes within the Sierra Vista Specific Plan (SVSP) and the public infrastructure to support their private development since 2018. As a result of the build-as-you-go allowance in the SVSP Development Agreements, there are currently gaps in public infrastructure that have been constructed by JMC and other SVSP developers. The most significant piece of missing infrastructure within the SVSP is an approximate one thousand lineal foot segment of Westbrook Blvd. The construction of this remaining segment of Westbrook Blvd would provide a direct connection from Baseline Road north to the currently developing Amoruso Specific Plan north of Blue Oaks Boulevard.

The current impacts of the missing Westbrook Blvd roadway segment affect traffic circulation, emergency response times, and electric infrastructure reliability. With continued growth in West Roseville, the lack of roadway continuity through the SVSP is forcing additional traffic to use existing roadways like Pleasant Grove Blvd and Fiddymont Road to travel southbound to Baseline Road. The intersection of Pleasant Grove Blvd and Fiddymont Road in particular is experiencing higher than necessary volumes of traffic during peak commute hours due to the lack of continuity

within the roadway infrastructure in West Roseville. Completing the final segment of Westbrook Blvd would not only provide better traffic circulation and help reduce traffic congestion during peak West Roseville commute hours, but would also provide alternative and more direct routes for emergency response vehicles called to the SVSP. Finally, included in constructing the final segment of Westbrook Blvd, electric infrastructure from the SVSP would be extended north and tied into the existing sub-station located in the northern part of the plan area. This will provide better redundancy and reliability for Roseville Electric customers within the plan area and is critical to support the continued residential and commercial development in the southern portion of the SVSP.

At current absorption rates of single family development with the SVSP, it is anticipated that it could be up to three years before the necessary private development would trigger the developer obligation to complete Westbrook Blvd. As such, staff explored alternative options to accelerate the timing of this critical infrastructure improvement. The result is a reimbursement agreement with JMC that would allow JMC to begin construction on the final segment of Westbrook Blvd in spring/summer of 2023. The terms of the reimbursement agreement are such that the City will advance JMC the Improvement Costs, including Reimbursable Costs, as identified in the reimbursement agreement, for the cost of constructing the Public improvements and JMC will reimburse the City in full for the Reimbursable Costs portion. The terms of the agreement dictate that as JMC proceeds with future development of single family homes within the SVSP a portion of the total Reimbursable Costs will be reimbursed to the City with each project. It is anticipated that the total Reimbursable Costs will most likely be reimbursed to the City within a three (3) year time period, but the agreement does provide for a payment in full obligation backstop of not more than ten (10) years.

The funding sources and amounts for this infrastructure project are clearly outlined in the reimbursement agreement, Section E. Of the total \$4,528,881 Improvement Costs for this project, \$461,069 is being funded by the City via developer impact fees, while the remaining \$4,067,812 will be advanced Reimbursable Costs that are reimbursed to the City in full over time. As such, this request is to move the following amounts from the specified funds to the City's Developer Reimbursement account to allow staff to pay the obligated reimbursement outlined in the reimbursement agreement.

- \$4,000,000 Strategic Improvement Fund (SIF)
- \$1,040,000 Electric Rate Stabilization Fund
- \$400,000 Sierra Vista Specific Plan Traffic Mitigation Set-Aside Fund
- \$100,000 Electric Fund

The SIF funds being requested are more than the currently anticipated construction costs, but additional funding is being requested to cover any increase incurred with actual bids and project change orders. Any SIF funds not used on this project will be returned upon completion of the project. Advancement of funds for completion of this important roadway segment provides a significant public benefit in the form of improved emergency response, traffic circulation, electric reliability, and a reduction in the inordinate wear and tear of other City roadways currently resulting from the incomplete roadway network.

## FISCAL IMPACT

The actions requested as part of this item will have no impact to the City's General Fund. All

costs associated with the construction of public infrastructure will be paid from the SIF, Electric Fund, Electric Rate Stabilization Fund and Sierra Vista Traffic Mitigation Set-Aside Fund to the City's Developer Reimbursement account. Per the terms of the City/Developer Reimbursement Agreement between the City and John Mourier Construction, Inc. all SIF and Electric Rate Stabilization funds will be repaid to the City in their entirety.

### ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Approval of the reimbursement agreement and a budget adjustment meets the above criteria and is not subject to CEQA. No additional environmental review is required.

### CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal F - Invest in well-planned infrastructure and growth

Respectfully Submitted,

Marc Stout, City Engineer

Mike Isom, Development Services Director

Resolution 23-157

Reimbursement Agreement

Ordinance 6648

Budget Adjustment

RESOLUTION NO. 23-157

APPROVING A REIMBURSEMENT AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND JOHN MOURIER CONSTRUCTION, INC., AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE

WHEREAS, a City/Developer Reimbursement Agreement for the Sierra Vista Specific Plan – Westbrook Blvd. Segment 4 project, by and between the City of Roseville and John Mourier Construction, Inc., has been reviewed by the City Council.

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Roseville that said Reimbursement Agreement is hereby approved and that the City Manager is authorized to execute it on behalf of the City of Roseville and take any other action the City Manager deems necessary to effectuate the purpose and intent of this Reimbursement Agreement.

PASSED AND ADOPTED by the Council of the City of Roseville this \_\_\_\_ day of \_\_\_\_\_, 2023, by the following vote on roll call:

AYES COUNCILMEMBERS:

NOES COUNCILMEMBERS:

ABSENT COUNCILMEMBERS:

\_\_\_\_\_  
MAYOR

ATTEST:

\_\_\_\_\_  
City Clerk

CITY/DEVELOPER  
REIMBURSEMENT AGREEMENT

(Project: Sierra Vista Specific Plan - Westbrook Blvd. Segment 4)

THIS AGREEMENT ("Agreement") is made and entered into this \_\_\_\_ day of \_\_\_\_\_, 20\_\_ , by and between the City of Roseville, a municipal corporation, ("CITY") and John Mourier Construction, a California corporation ("DEVELOPER"), and/or its successors in interest; and

W I T N E S S E T H:

A. DEVELOPER is the owner of a certain parcel(s) of real property under development within the City of Roseville, located at: Sierra Vista Specific Plan - Westbrook Blvd. Segment 4 and described as Assessor's Parcels Number(s) 498-020-048 (the "Westbrook Blvd. Segment 4 Property"). The Westbrook Blvd. Segment 4 Property is subject to an Irrevocable Offer of Dedication in favor of the City.

B. DEVELOPER has agreed to construct and install certain Public Improvements as shown within Exhibit "A" and described within Exhibit "B," attached hereto and made part of this agreement ("Public Improvements").

C. DEVELOPER and CITY will substantially benefit from the construction and installation of the Public Improvements as described in paragraph B above.

D. The total cost of constructing the Public Improvements as estimated using current prevailing wages and in accordance with the Improvement Plans is estimated as approximately Four Million Five Hundred Twenty Eight thousand Eight Hundred Eighty One Dollars (\$4,528,881.00)

("Improvement Costs"), as more particularly set out in the breakdown of costs ("Breakdown of Costs"), Exhibit "C," attached and incorporated by this reference.

E. Pursuant to the Breakdown of Costs, the parties have determined that the obligation of Improvement Costs will be allocated between CITY, and DEVELOPER as follows:

|                                    | INITIAL WORK<br>PAID BY CITY | REIMBURSEMENT<br>DEVELOPER TO CITY |
|------------------------------------|------------------------------|------------------------------------|
| DEVELOPER (SIF Funds)              | \$3,027,812                  | \$3,027,812                        |
| ROSEVILLE ELECTRIC                 | \$1,040,000                  | \$1,040,000                        |
| CITY (SVSP TMF SET-ASIDE<br>FUNDS) | \$365,027                    | \$0                                |
| ROSEVILLE ELECTRIC                 | \$96,042                     | \$0                                |
| <b>TOTAL</b>                       | <b>\$4,528,881</b>           | <b>\$4,067,812</b>                 |

Included as part of the Improvement Costs and Reimbursable Costs (as defined below) is an allowance for Soft Costs equal to twenty percent (20%) of the eligible Hard Costs, as those terms are defined and used in the SVSP Fee Program (as defined below) and its standard SVSP Reimbursement Agreement(s) terms (as defined below). For the avoidance of doubt, the TMF and a portion of the Roseville Electric fees shall not constitute Reimbursable Costs (as defined below) for which DEVELOPER is required to reimburse CITY. City shall, however, advance to DEVELOPER the full amount of the Improvement Costs set forth above.

F. DEVELOPER and CITY desire to enter into this Agreement providing for the direct installation by DEVELOPER of the Public Improvements in accordance with the approved Improvement Plans, with CITY advancing DEVELOPER the Improvement Costs for the benefit of CITY and in the public's best interest for the connection of important infrastructure, and then for subsequent reimbursement by DEVELOPER of that portion of the total Improvement Costs representing Reimbursable Costs from DEVELOPER directly to CITY on the timeline, as more fully described below.

NOW, THEREFORE, in consideration of the covenants set forth herein, CITY and DEVELOPER hereby agree as follows:

1. Construction of the Public Improvements. DEVELOPER shall cause the Public Improvements to be constructed and installed in accordance with the approved Improvement Plans. DEVELOPER is also required, and the specifications and bid and contract documents shall require all contractors and subcontractors, to pay prevailing wages and to otherwise comply with applicable provisions of the California Labor Code, Government Code, and Public Contracts Code relating to public works projects of cities and/or as may be required by CITY standards and procedures. Any payment or performance bonds required by CITY shall be the responsibility of the contractors performing the work and not a responsibility of DEVELOPER, unless otherwise required by law.

2. Contractor Registration. No contractor or subcontractor may be listed on a bid proposal for the Public Improvements or work on the Public Improvements unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. DEVELOPER shall be responsible for ensuring that these contractor registration requirements are adhered to since this project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.

3. Reimbursement of the Costs of the Public Improvements. In consideration of the satisfactory completion of the Public Improvements and based on the CITY advance to DEVELOPER, DEVELOPER shall reimburse CITY for those portions of the Improvement Costs actually advanced to DEVELOPER, including the 20% Soft Costs allowance, as set forth in Recital E, hereof, less that portion of the Improvement Costs representing the TMF and a portion of the Roseville Electric fees (the "Reimbursable Costs"). CITY and DEVELOPER acknowledge that the actual Improvement Costs, and therefore the actual value of Reimbursable Costs, may vary from the

estimated costs, depending upon the actual costs of constructing and installing the Public Improvements and as actually advanced to DEVELOPER.

The Improvement Costs shall equal the contract bid amount for the Public Improvements as reflected on the Breakdown of Costs subject to reasonable change orders, as approved by CITY.

4. Timing of Advance and Reimbursements.

4.1 Advance. CITY shall advance the Improvement Costs to DEVELOPER on a monthly basis after submission by DEVELOPER and approval by CITY Engineer of itemized invoices evidencing the costs corresponding to such monthly billing (the "Supporting Information"). CITY shall advance such costs directly to DEVELOPER within thirty (30) business days of CITY's receipt of such invoices and Supporting Information. Each such advance shall be subject to a retention of 5% of the amount of the invoice, which retention shall be advanced to DEVELOPER and released to contractor when and as required by Public Contract Code section 7107.

4.2 Reimbursement. DEVELOPER shall reimburse CITY for the total actual Reimbursable Costs as follows:

Reimbursement from DEVELOPER to CITY shall occur as described below, with, however, full reimbursement to CITY occurring no later than within ten (10) years, as described below; or prior to the time of assigning, disposing, selling, transferring or changing ownership of the Westbrook Blvd. Segment 4 Property (except pursuant to the IOD) or a substantial portion or all of DEVELOPER's assets (except in the ordinary course of DEVELOPER's business) and/or the winding up of its primary business purpose. Additionally, DEVELOPER acknowledges that should it fail to repay CITY as required hereunder, CITY may, at its option, recover any amounts owed hereunder through available Community Facilities District ("CFD") funds. Further, all rights of CITY under this Agreement are specifically reserved and any payment, act or omission shall not impair or prejudice any remedy or right of CITY under it; any right or remedy in this Agreement

shall not preclude the exercise of any other right or remedy under this Agreement, under any applicable law, or at equity, nor shall any action taken in the exercise of any right or remedy be deemed a waiver of any other rights or remedies.

a. Administered on a subdivision by subdivision basis, when and as DEVELOPER becomes entitled to any fee credits ("SVSP Fee Credits") pursuant to any Infrastructure Fee Credit/Fee Reimbursement Agreement or Infrastructure Fee Credit/Fee Reimbursement Agreements ("SVSP Reimbursement Agreement(s)") with CITY under the City of Roseville Sierra Vista Specific Plan Infrastructure Fee Program established pursuant to City of Roseville Ordinance No. 4932 (the "SVSP Fee Program"), DEVELOPER shall reimburse CITY for such amount of Reimbursable Costs for which DEVELOPER, based on the "Reimbursement Criteria" (set forth below), is able to reimburse CITY, until such time as DEVELOPER has reimbursed CITY for all of the Reimbursable Costs. For purposes of this Section 4.2.a, "Reimbursement Criteria" means the following:

(1) For each future subdivision within the SVSP Fee Program for which DEVELOPER builds supporting infrastructure (other than the Public Improvements described herein) ("Additional Infrastructure"), DEVELOPER shall first prioritize receipt of SVSP Fee Credits by DEVELOPER for such Additional Infrastructure (plus applicable contingencies) through the SVSP Fee Program, which, on a subdivision by subdivision basis, may result in no payment or some payment by DEVELOPER to CITY for Reimbursable Costs owed.

(2) For each future subdivision within the SVSP Fee Program for which DEVELOPER requires SVSP Fee Credits (in addition to any SVSP Fee Credits earned through the construction of Additional Infrastructure), DEVELOPER shall

reimburse CITY for Reimbursable Costs in the amount of the additional SVSP Fee Credits (if any) required by DEVELOPER for such subdivision until (subject to any and all reimbursements for Additional Infrastructure for any future subdivision or subdivisions within the SVSP Fee Program) DEVELOPER has reimbursed CITY for all Reimbursable Costs.

(3) CITY acknowledges that the Reimbursement Criteria may result in DEVELOPER being reimbursed for Additional Infrastructure for multiple subdivisions before CITY is reimbursed by DEVELOPER for any or all of its Reimbursable Costs and that DEVELOPER may build multiple future subdivisions for which DEVELOPER requires additional SVSP Fee Credits resulting in reimbursement to CITY under (2) above before CITY will be reimbursed in full for the Reimbursable Costs. DEVELOPER acknowledges, however, that the determination per subdivision of whether a reimbursement payment will be made by DEVELOPER to CITY, does not include or allow for carrying over the value of excess SVSP Fee Credits to other subdivisions and that the amount, if any, of Reimbursable Costs to be paid to CITY is determined on a subdivision by subdivision basis; provided, however, DEVELOPER shall have the right to carry over the value of excess SVSP Fee Credits to other subdivisions to the extent such subdivisions are subject to the same SVSP Reimbursement Agreement.

b. Notwithstanding any other provision herein, if on the date that is the tenth (10<sup>th</sup>) anniversary of the date of this Agreement, DEVELOPER has not reimbursed CITY for all Reimbursable Costs pursuant to Section 4.2.a above, DEVELOPER will reimburse CITY for the balance of the Reimbursable Costs, regardless of and without reference to its recovery

of SVSP Fee Credits or any other condition or qualification. Notwithstanding, CITY shall reasonably cooperate with DEVELOPER in entering into an SVSP Reimbursement Agreement or SVSP Reimbursement Agreements permitting DEVELOPER to recover all eligible and appropriate Reimbursable Costs under the SVSP Fee Program, but without any guarantee thereto.

5. Permits. DEVELOPER shall be responsible for obtaining all necessary permits the cost of which shall be reimbursable to DEVELOPER hereunder. CITY shall approve all plans prior to issuing any permit.

6. Changes in the Scope of Work. If during the course of construction field conditions require a change of scope different than contemplated in either Exhibit "A," "B" or "C" as referenced above, and prior to making any changes that will affect the scope of this Agreement, the DEVELOPER shall contact CITY and get approval by CITY for those changes. CITY shall approve such changes when required by law or by the approved construction documents for the construction of the Public Improvements.

7. Prior To Commencement of Work. Prior to commencement of Work, DEVELOPER shall comply with the following: (1) obtain pre-approval from CITY of DEVELOPER's construction documents; (2) cause its contractor to obtain an encroachment permit from City prior to commencement of construction activities in CITY's right of way (and adjacent thereto); and, (3) cause its contractor to provide insurance, bonds and related documentation to CITY in accordance with Paragraph 9 of this Agreement. In addition, as required by California Labor Code Section 1773.3, DEVELOPER shall notify the Department of Industrial Relations of the project within five (5) days of the award of a contract to a contractor for the Public Improvements.

8. Indemnification. To the fullest extent allowed by law, DEVELOPER shall defend, indemnify, and save and hold harmless CITY, its officers, agents, employees and volunteers from

any claims, suits or actions of every name, kind and description brought forth, or on account of, injuries to or death of any person (including but not limited to workers and the public), or damage to property, resulting from or arising out of DEVELOPER's willful misconduct or negligent act or omission while engaged in the performance of obligations or exercise of rights created by this Agreement, except those matters arising from CITY's sole or active negligence or willful misconduct. The parties intend that this provision shall be broadly construed.

DEVELOPER's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.

9. Insurance. Prior to the issuance of an encroachment permit and commencement of any field construction for those certain improvements as shown on Exhibit "A," the DEVELOPER shall, or shall cause its contractor to, have on file with CITY throughout the duration of construction and maintain in full force the following policies of insurance:

| <u>POLICY</u>                                                                                                                                                                                                                                                                         | <u>LIMITS OF LIABILITY</u>                                                                                                                                                                            |

a. Form. DEVELOPER shall submit a certificate evidencing such coverage for the period covered by this Agreement in a form satisfactory to Risk Management and the City

Attorney, prior to undertaking any work hereunder. Any insurance written on a claims made basis is subject to the approval of Risk Management and the City Attorney.

b. Additional Insureds. DEVELOPER shall also provide a separate endorsement form or section of the policy showing CITY, its officers, agents, employees and volunteers as additional insureds for each type of coverage, prior to undertaking any work hereunder. Such insurance shall specifically cover the contractual liability of DEVELOPER. The additional insured coverage under the DEVELOPER's policy shall be primary and noncontributory, as evidenced by a separate endorsement or section of the policy, and shall not seek contribution from CITY's insurance or self-insurance. In addition, the additional insured coverage shall be at least as broad as the Insurance Services Office ("ISO") CG 20 01 Endorsement. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be: (1) the minimum coverage and limits specified in this Agreement; or (2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater.

c. Cancellation/Modification. DEVELOPER shall provide ten (10) days written notice to CITY prior to cancellation or modification of any insurance required by this Agreement.

d. Umbrella/Excess Insurance. The limits of insurance required in this Agreement may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of CITY (if agreed to in a written contract) before CITY's own insurance shall be called upon to protect it as a named insured.

e. Contractors. DEVELOPER agrees to include in its contracts with all contractors the same requirements and provisions of this Agreement, including the indemnity and insurance requirements, to the extent they apply to the scope of the contractor's work.

Furthermore, DEVELOPER shall require its contractors to agree to be bound to DEVELOPER and CITY in the same manner and to the same extent as DEVELOPER is bound to CITY under this Agreement. Additionally, DEVELOPER shall obligate its contractors to comply with these same provisions with respect to any subcontractor, regardless of tier. A copy of CITY's indemnity and insurance provisions will be furnished to the contractor or any subcontractor upon request.

f. Self-Insured Retentions. All self-insured retentions ("SIR") must be disclosed to Risk Management for approval and shall not reduce the limits of liability.

Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or CITY. CITY reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.

g. Waiver of Subrogation. DEVELOPER hereby agrees to waive subrogation which any insurer of DEVELOPER may acquire from DEVELOPER by virtue of the payment of any loss under a Workers Compensation, Commercial General Liability or Automobile Liability policy. All Workers Compensation, Commercial General Liability and Automobile Liability policies shall be endorsed with a waiver of subrogation in favor of CITY, its officers, agents, employees and volunteers for all work performed by DEVELOPER, its employees, agents and subcontractors.

h. Liability/Remedies. Insurance coverage in the minimum amounts set forth herein shall not be construed to relieve DEVELOPER of liability in excess of such coverage, nor shall it preclude CITY from taking such other actions as are available to it under any other provisions of this Agreement or law.

10. Obligations Arising From Agreement. CITY hereby represents and warrants to DEVELOPER that CITY has allocated sufficient dedicated funds to satisfy its obligations arising under this Agreement.

11. Successors and Assigns. This Agreement shall be binding upon and shall inure to the benefit of the respective successors and assigns of the parties hereto, in the same manner as if such parties had been expressly named herein.

12. Attorney's Fees; Venue; Governing Law. If either party commences any legal action against the other party arising out of this Agreement or the performance thereof, the prevailing party in such action shall be entitled to recover its reasonable litigation expenses, including but not limited to, court costs, expert witness fees, discovery expenses, and attorneys' fees. Any action arising out of this Agreement shall be brought in Placer County, California, regardless of where else venue may lie. This Agreement shall be governed by and construed in accordance with the laws of the State of California.

13. Modification. This Agreement and each provision contained herein may be waived, amended, supplemented or eliminated only by mutual written agreement of the parties.

14. Severability. If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

15. Integrated Agreement. This is an integrated agreement and contains all of the terms, considerations, understanding and promises of the parties. It shall be read as a whole.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation has authorized the execution of this Agreement in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. \_\_\_\_\_, adopted by the Council of the City of Roseville on the

\_\_\_ day of \_\_\_\_\_, 20\_\_\_, and DEVELOPER has caused this Agreement to be executed.

## **EXHIBIT "B"**

### **DESCRIPTION OF ELIGIBLE IMPROVEMENTS**

#### **SIERRA VISTA SPECIFIC PLAN INFRASTRUCTURE FEE PROGRAM\***

#### **SIERRA VISTA SPECIFIC PLAN CITY TMF PUBLIC IMPROVEMENTS**

##### **WESTBROOK BOULEVARD SEGMENT 4**

The Public Improvements, as shown in Exhibit "A" *Depiction of Eligible Improvements*, are a portion of work included in the "Sierra Vista- Westbrook Boulevard Segment 4" improvement plans. The Public Improvement being constructed for Westbrook Boulevard Segment 4 include improvements eligible for the Sierra Vista Specific Plan (SVSP) Infrastructure Fee Program and the Sierra Vista Specific Plan City TMF. SVSP Infrastructure Fee Program eligible improvements include: Grading/Demolition, Utilities (Sewer, Storm Drainage, Water Quality Appurtenances, Potable Water, Recycled Water, and Dry Utilities), and Surface Improvements (Streetwork and Concrete), required for the construction of Westbrook Boulevard Segment 4, approximately 1,050-LF. City TMF eligible improvements include: partial traffic signal improvements (loops, conduits, wires and appurtenances) and construction of the inside lanes of Westbrook Boulevard (earthwork excavation, subgrade preparation, full pavement section of 5" AC on 20" AB, and striping).

##### **PROJECT ASSUMPTIONS:**

1. This segment of Westbrook Boulevard will connect to the existing segments of Westbrook Boulevard at the northern and southern connection points
2. The estimated quantities in Exhibit "C" were taken from the third submittal Improvement Plans for Sierra Vista- Westbrook Boulevard Segment 4 (CWJ#191016 EN22-0734)

\*The Parties understand that nothing herein guarantees or binds relative to SVSP Fee Program eligibility, as those determinations are ultimately made by the SVSP Fee Program Administrator.

## Justification for Budget Adjustment:

This budget adjustment will allocate funds to expedite the construction of a 1,000-linear foot segment of Westbrook Boulevard, an essential infrastructure project in the Sierra Vista Specific Plan. It will be constructed in Spring/Summer 2023 through an agreement with JMC. The City will provide JMC with a loan to cover the construction costs, which will be repaid over time. This will be funded via the new Westbrook Blvd – Segment 4 project and funded from three City funds: the Strategic Improvement Fund (\$4,000,000—all reimbursable), the Electric Fund (\$1,140,000—all but \$100,000 is reimbursable), and the TMF Sierra Vista Set-Aside Fund (\$400,000—not reimbursable). The total project cost is \$5,540,000, of which \$5,040,000 is reimbursable.

## COUNCIL COMMUNICATION

**CC #: 2682**  
**File #: 0103-22**

**Title:** Measure B Local Sales Tax Citizens' Oversight Committee Report  
**Contact:** Scott Pettingell 916-774-1306 [spettingell@roseville.ca.us](mailto:spettingell@roseville.ca.us)

**Meeting Date: 5/3/2023**  
**Item #: 9.1.**

### RECOMMENDATION TO COUNCIL

Staff recommends City Council receive an informational report and presentation from the Local Sales Tax Citizens' Oversight Committee on the fiscal year 2021-22 revenue and expenditures of the Measure B sales and use tax.

### BACKGROUND

The Local Sales Tax Citizens' Oversight Committee (Committee) was created when Measure B was passed by Roseville voters in the November 6, 2018 election. The Committee is charged with the annual review and report to the City Council on the revenue and expenditures of the Measure B sales and use tax.

As part of the EngageRoseville effort that led to Measure B, the City asked the community about its priorities for city services to help guide the City in developing future budgets. Those priorities, along with Council priorities, were reflected in the FY2021-22 budget as follows:

#### Services maintained

- Specialized police and fire services
- Fire engine company
- Recreation and library programs
- Street maintenance levels
- Job-creation and business recruitment initiatives

#### Services restored

- Library hours
- 4th of July fireworks
- Fire training and investigations
- Goat grazing for thatch management in open space
- Park maintenance standards
- Industry training and development

#### Services added

- Establish new police beat in West Roseville
- Maintenance for three citywide parks, allowing for construction to occur

#### Fiscal health investments

- Build economic stabilization reserve fund
- Pay down CalPERS pension obligation
- Pay down retiree health liability

The Committee met on March 16, 2023, and received a presentation on the City's year-end report from staff. The presentation was a summary of the information provided to the Committee, including the following documents:

- o Measure B Scorecard
- o 2022 City of Roseville Annual Comprehensive Financial Report (ACFR)
- o FY2021-22 Fourth Quarter Report
- o General Ledger Detail
- o General Fund Reserves Policy
- o FY2021-22 Annual Budget
- o FY2021-22 Year-end Report and Budget Adjustment Council Communication
- o Roseville Citizens' Oversight Committee Memo March 29, 2022 Final

The Committee met again on March 30, 2023, to finalize its annual review and report to the City Council on the revenue and expenditures of the Measure B sales and use tax.

#### FISCAL IMPACT

There is no fiscal impact related to receiving this report.

#### ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. The report to the City Council from the Local Sales Tax Citizens' Oversight Committee meets the above criteria and is not subject to CEQA. No additional environmental review is required.

#### CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal A - Remain fiscally responsible in a changing world

Respectfully Submitted,

Scott Pettingell, Assistant Finance Director

Dennis Kauffman, Assistant City Manager/ Chief Financial Officer

**ATTACHMENTS:**

Description

Report to the City Council

# Memorandum

---

**To: Roseville City Council**

**From: Local Sales Tax Citizens' Oversight Committee**

**Date: March 30, 2023**

**Subject: Citizens' Oversight Committee update for May 3, 2023 Roseville City Council Meeting**

## **History of Measure B**

- Measure B is a half-cent local sales and use tax to protect Roseville's essential services and was approved by voters in the November 6, 2018 election, with the expected annual revenue of \$16 to \$19 million.
- On April 1, 2019, the sales and use tax rate in Roseville increased from 7.25% to 7.75%.

## **Role of the Citizen Oversight Committee**

- The Citizens' Oversight Committee (Committee) was proposed as an independent citizen oversight on the Measure B funds.
- The Committee was created when Measure B passed in the November 6, 2018 election.
- The Committee is charged with the annual review and report to the City Council on the revenue and expenditures of the Measure B sales and use tax.

| <b>Current Members</b> | <b>Term End</b> |
|------------------------|-----------------|
| Richard Duffy          | 6/30/2023       |
| Stephanie Hill         | 6/30/2025       |
| Kathryn Kitchell       | 6/30/2023       |
| Meghan Krafka          | 6/30/2023       |
| John Speight           | 6/30/2025       |

Measure B is a General Tax and the monies collected are appropriated to the General Fund where revenues are not allocated and tracked for a specific purpose. The Measure B ballot information stated that "the City may use the funds for any municipal purpose, including but not limited to essential services such as neighborhood police patrols, fire protection, 9-1-1 emergency response; crime suppression/investigation; street and pothole repair; libraries, parks and recreation; and job creation and economic improvement programs." It is not possible for the Committee to determine the exact programs/services supported by Measure B revenues.

## **Review of Committee Meeting**

- The March 16, 2023 meeting consisted of the following:
  - Appointment of Chair and Vice Chair
  - Presentation of the City's year-end report by Dennis Kauffman, Assistant City Manager/Chief Financial Officer, and Scott Pettingell, Assistant Finance Director. The presentation was a summary of information provided to the Committee as exhibits:
    - Year-end Report: Discussion of Fiscal year July 1, 2021 to June 30, 2022  
General Fund revenues and expenditures
      - Measure B Scorecard
      - 2022 City of Roseville ACFR
      - FY2021-22 Fourth Quarter Report
      - General Ledger Detail
      - General Fund Reserves Policy
      - FY2021-22 Annual Budget
      - FY2021-22 Year-end Report and Budget Adjustment Council Communication
      - Roseville Citizens' Oversight Committee Memo March 29, 2022 Final
  - Recommendation by the City staff that the Committee designate one or two Committee members to prepare the Committee's report to the City Council.

## **Citizens' Oversight Committee Report of the Funds from Fiscal Year 2021/2022**

- Fiscal year 2021/2022 resulted in \$28.3M in Measure B revenue which was \$7.2M more than budgeted. Actual Measure B revenues exceeded budget primarily due to the conservative approach in budgeting for major tax revenues to compensate for impacts of the COVID-19 pandemic and general economic recovery.
- The Committee notes that because Measure B revenue is a general tax comingled with other General Fund revenue and pooled for General Fund expenditures, it is not possible to trace specific expenditures back to Measure B revenue.
- General Fund expenditures were \$2.9M less than budgeted. The bulk of this reduction was in salary savings from vacant positions.
- The Police and Fire Departments spent virtually 100% of their budgets.
- Actual results for the year indicate a one-time budget surplus of \$31.5M. Staff prepared a memo to City Council recommending General Fund appropriations that align with the City Council Strategic Plan. The Council approved the recommended appropriations, including a \$15M increase to the Roseville Soccer Complex project budget toward their goal to

enhance economic vitality by advancing sports tourism opportunities, including destination-type amenities.

- The Scorecard (attached) provided the Committee with additional information in determining the level of services in comparison to the previous year (FY2021). The Scorecard indicates that budgeted expenditures, staffing levels, and Investment in Reserves for FY2022 were comparable to those in the previous year.
- The Committee concludes that, based on the data provided by City staff and our analysis as described above, police, fire, public works, and parks, recreation and library services were all maintained as evidenced by an increase in expenditures. The Committee also concludes FY2022 Measure B funds were used for their intended purpose.

CC: Dennis Kauffman, Assistant City Manager/Chief Financial Officer  
Terry Bradley, Recording Secretary

**Attachment: FY2022 Measure B Scorecard**

## Measure B Scorecard

Fiscal Year 2021-22 (FY2021-22)

Measure B is a half-cent local sales and use general purpose tax passed by voters during the November 6, 2018, election to protect Roseville's essential services.

The primary function of Measure B is to maintain essential services. Revenue generated by Measure B allows the City of Roseville to provide for the continuity of services by restoring and maintaining priority service levels and building and maintaining an Economic Stabilization Reserve Fund as a safeguard for the future. Prior to the passage of Measure B, the City of Roseville faced significant reductions in services, under-funding of long-term obligations, and growing expenses.

Roseville's Measure B scorecard uses a green, yellow, and red scoring method to present how Measure B funds have impacted services.

- **Green** indicates a restored or enhanced level of resources.
- **Yellow** indicates a maintained level of resources.
- **Red** indicates a diminished level of resources.

Below is a dashboard snapshot of ratings for FY 2021-22 (the fiscal year that started on July 1, 2021, and ended on June 30, 2022); additional details follow.

| Category                                         | Rating |
|--------------------------------------------------|--------|
| <b><i>Fiscal Investment Snapshot</i></b>         |        |
| Police                                           | ●      |

| All other General Fund departments and transfers | ●      |
| Investment in Reserves                           | ●      |

In summary, during FY2021-22, Measure B revenues continued allowing the City to maintain current service levels, restore services, and strategically invest in high-priority areas while achieving a balanced budget.

## Measure B Priorities

Measure B was passed by voters with the commitment to maintain service levels, invest in high-priority service areas, and build and maintain the City's economic stabilization reserve fund. Measure B sales tax revenue has helped stabilize General Fund services, protect Roseville's quality of life, and increase reserves to weather future economic downturns.

## Measure B-related investments in Fiscal Year 2021-22

### Maintained essential services

- Cost of doing business increases
- Specialized police and fire services
- Fire engine company
- Recreation and library programs
- Street maintenance levels
- Job-creation and business-recruitment initiatives
- One additional dispatcher
- Unsheltered camp cleanup
- Library, parks, and events stabilization
- Maintenance at citywide parks
  - Crabb Park
  - Central Park
  - Pistachio Park
- Street paving

### Restored services that had been reduced prior to Measure B

- Library hours
- 4<sup>th</sup> of July fireworks
- Fire training and investigations
- Goat grazing for thatch management in open space
- Park maintenance standards
- Industry training and development

### Services Added

- Establish new police beat in West Roseville
- One additional police traffic officer
- Additional staff to implement a body-worn camera (BWC) program
- Begin establishment of a Real-Time Crime Center (RTCC)
- Additional staff to support increased efforts to address homelessness (Police; Parks, Recreation & Libraries; Development Services (Code Enforcement))
- One additional Engineer in Public Works to support capital improvement projects (aging infrastructure and increased street miles)
- Increased investment in facility rehabilitation and equipment replacement

### Fiscal Health Investments

- Fully fund economic stabilization reserve fund at 15% of the General Fund operations budget
- Pay down CalPERS pension obligation
- Pay down retiree health liability

## General Fund Budget Data

A primary objective of Measure B is to ensure the continuity of services for residents. This is demonstrated by the level of investment in General Fund operating departments. The City seeks to keep pace with growth while maintaining a high level of service and meeting the community's needs. This scorecard uses a green, yellow, and red scoring method to present how Measure B funds have impacted services.

- **Green** indicates a restored or enhanced level of resources.
- **Yellow** indicates a maintained level of resources.
- **Red** indicates a diminished level of resources.

| General Fund                                         | Adopted Budget Expenditures |                      |                       |                                       |        |

\* The Finance Department is included in this chart's "All other General Fund departments" category. The Utility Billing Services (UBS) division, funded by the Electric and Environmental Utility enterprise funds, was overseen by the Finance Department through FY2020-21. Effective FY2021-22, the UBS division was moved to the Electric Department. FY2018-19 and FY2020-21 staffing figures were adjusted to exclude UBS to accurately reflect General Fund staffing.

## Notable Changes

The FY2021-22 budget was built on a status quo foundation, including known operational expenses. It did not include any General Fund service level reductions but only included the most critical augmentations, given the uncertainty surrounding the pandemic at the time.

The Police Department's budget increased by 6% in FY2021-22, primarily due to increased labor costs. Police Department staffing increased by four positions during FY2020-21, after the budget was adopted, and by three positions in the adopted FY2021-22 budget. Following is a summary of the position increases:

Police Officers – The City entered into an agreement with Sutter Roseville Medical Center for police services. This agreement funded four additional Police Officers.

Community Services Officer - A CSO position was added to the Department's Investigations Unit to administer the new tiered state-mandated sex offender registry program. The new program requires substantially more work than the current offender registry process and requires a full-time position to keep up with the increased workload since the new registry process took effect on July 1, 2021.

Police Property and Evidence Clerk - The Police Department implemented a body-worn camera (BWC) program. BWCs improve agency transparency and evidence collection; document encounters between law enforcement and the public; strengthen officer performance and accountability; and assist with investigating and resolving complaints and officer-involved incidents. Additionally, BWCs allow law enforcement leadership to gain significant insights into field operations, enabling them to make necessary training, policy, and process improvements. The FY2021-22 budget included additional funds to add a Property Clerk position to support the Department's BWC program.

Records Supervisor - The Records Division has many new mandates, including changing how crimes are reported to the Department of Justice through the new National Incident-Based Reporting System (NIBRS) system, implementing the Racial Identify Profiling Reporting Act, and several other state-mandated programs. In addition, the number of Public Records Act requests has increased significantly. With only one supervisor in Records, the workload has become unmanageable and requires a second supervisory position. In addition, this allows for succession planning in this unit with many technical requirements and requires several years to develop proficiency.

The Fire Department's budget increased by 9% in FY2021-22 due to increasing labor costs and materials, services, and supply costs. Staffing remained constant at 119 positions. With the new fire station #8 underway, additional positions to staff the new station are planned for the FY2023-24 budget.

The Parks, Recreation, and Libraries (PRL) Department budget increased by 4%, and staffing increased by 8% in the FY2021-22 budget. This change is primarily due to increased labor and materials, services, and supply costs associated with maintaining current service levels and additional funding, with associated revenue from community facilities districts, to support the new General Fund positions and program requirements highlighted below.

In FY2021-22, the PRL budget included a new Parks Supervisor, three Park Maintenance Workers, and related equipment to help support and maintain the continually growing park system, which now consists of 80 parks. Eighty-eight park acres and 18 additional acres of streetscapes have been added in recent years. Additional funding to support park maintenance service levels will be invested into replacing aging infrastructure, including playgrounds, restrooms, lighting, signage, improved turf care, planting beds, tree maintenance, and sports fields.

The Public Works budget increased by 5% in FY2021-22 due to increased labor costs and materials, services, and supply costs. Staffing increased by 6% or seven positions from 111 to 118. One of the seven positions was added during FY2021-22 after the budget was adopted, and the remaining six were part of the FY2021-22 budget. The positions funded by the General Fund included:

**Engineer** - Over the past decade, City street miles have increased by nearly 25 percent, and the City population has grown by 30 percent. These increases, combined with aging infrastructure, have led to a significant increase in maintenance projects, traffic study requests, and the urgent need to construct many of the City's planned CIPs. To meet these demands, an additional full-time Engineer was included in the Public Works FY2021-22 budget.

**Office Assistant** - Over the past decade, the number of Roseville streets miles has increased by nearly 25 percent, and the City population has grown by 30 percent. This growth has resulted in more street miles to maintain and more resident concerns to address. In addition, there has been a proportionate increase in the number of work orders to process, invoices to process, assets to track, and paperwork to manage. The existing Street Maintenance support staff resources are unable to keep up with the growing backlog. The FY2021-22 budget included the conversion of a temporary part-time Office Assistant to a regular full-time position to address these ever-increasing workload requirements.

The budget in the All Other General Fund expenditures and transfers category increased by 22%, primarily due to a \$6 million Additional Discretionary Payment (ADP) to CalPERS to pay down the City's pension liability. In addition, the budget included a \$1.2 million transfer to the Emergency Reserve and a \$2.4 million transfer to the Stabilization Reserve to reach the target reserves of 10% and 15%, respectively.

General Fund expenditures ended FY2021-22 at 98% of the budget, with the Police and Fire departments spending 100% of their budget. The Parks, Recreation, and Libraries Department expended 96% of its funding due to cost controls in materials, services, supplies, and temporary and full-time positions vacancies. The year-end savings in PRL offset a shortfall in park and recreation programming revenue. The Public Works Department ended the year expending 98% of its budget. The two percent variance from the budget is attributed to vacant positions. Development Services expenditures ended the year at 90 percent of the budget, primarily due to higher than anticipated reimbursements from full-cost recovery development projects.

## Investment in Reserves

Through June 30, 2022, the City Council transferred nearly \$26 million of General Fund resources, including Measure B revenue, to the General Fund Stabilization Reserve. These funds strengthen the City's financial position and will help continue essential services during a future economic downturn.

The Government Finance Officers Association (GFOA) recommends a minimum 17% reserve, with higher reserves recommended based on a government's revenue portfolio. An informal staff survey found that cities in California similar in population report an average of 25% reserves. The City of Roseville's total General Fund reserves (Stabilization + Emergency) is approximately \$43 million as of June 30, 2022, which equates to the Council-adopted policy target of 25% of operating expenditures.

## Sales Tax Revenue

Measure B revenue (shown in red) has steadily increased, enabling the City of Roseville to maintain and expand service priorities to meet the needs of a growing population. Measure B revenues for FY 2021-22 were \$28,328,053.

## COUNCIL COMMUNICATION

CC #: 2681  
File #: 0600-04

**Title:** Long-Term Liabilities Update - Pension and Other Postemployment Benefits  
**Contact:** Dennis Kauffman 916-774-5313 dkauffman@roseville.ca.us

Meeting Date: 5/3/2023  
Item #: 9.2.

### RECOMMENDATION TO COUNCIL

Staff recommends that the City Council receive a presentation on the City's long-term liabilities for pension and other postemployment benefits (OPEB).

### BACKGROUND

Staff will provide the City Council with an update on the City's long-term liabilities for pension and other postemployment benefits (OPEB).

### FISCAL IMPACT

Not applicable.

### ENVIRONMENTAL REVIEW

Not applicable.

### CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal A - Remain fiscally responsible in a changing world

Respectfully Submitted,

Dennis Kauffman, Assistant City Manager/Chief Financial Officer

A handwritten signature in blue ink, consisting of several overlapping loops and a horizontal line, positioned above a horizontal line.

Dominick Casey, City Manager

## COUNCIL COMMUNICATION

CC #: 2661  
File #: 0900-04

**Title:** Capital Improvement Projects Preview for Fiscal Year 2023-24  
**Contact:** Jason Shykowski 916-774-5331 jshykowski@roseville.ca.us

Meeting Date: 5/3/2023  
Item #: 9.3.

### RECOMMENDATION TO COUNCIL

This is an informational item. No action is required.

### BACKGROUND

Staff will provide an overview of the capital improvement projects (CIP's) planned for the coming fiscal year. This presentation will include a preview of CIP's for all City departments.

### FISCAL IMPACT

There is no fiscal impact from this presentation.

### ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. A presentation of Capital Improvement Projects meets the above criteria and is not subject to CEQA. No additional environmental review is required.

### CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal F - Invest in well-planned infrastructure and growth

Respectfully Submitted,

Jason Shykowski, Public Works Director

Dominick Casey, City Manager

## COUNCIL COMMUNICATION

**CC #: 2663**  
**File #: 0113-02**

**Title:** Community Development Block Grant – 2023 Annual Action Plan  
**Contact:** Trisha Isom 916-746-1239 tisom@roseville.ca.us

**Meeting Date: 5/3/2023**  
**Item #: 10.1.**

### RECOMMENDATION TO COUNCIL

Staff recommends that the City Council:

1. Hold a Public Hearing and receive public comment on the City of Roseville 2023 Annual Action Plan; and
2. Adopt a resolution approving the 2023 Annual Action Plan and authorizing the City Manager to execute necessary documents and certifications on behalf of the City of Roseville for submittal to the U.S. Department of Housing & Urban Development.

### BACKGROUND

The City became a Community Development Block Grant (CDBG) entitlement jurisdiction in 1986, and has traditionally funded housing activities, public facilities and improvements, removal of architectural barriers, planning, program administration, and public service activities. As an entitlement jurisdiction, the City of Roseville receives an annual allocation of CDBG funds from the U.S. Department of Housing and Urban Development (HUD) to promote affordable housing and community development programs for low-income residents.

Each year the City must produce an Annual Action Plan explaining how CDBG funds will be used to address the goals of the five-year Consolidated Plan. HUD has announced that the City of Roseville will receive \$691,234 in CDBG funding for program year 2023-2024. Additionally, it is anticipated that the City will receive at least \$50,000 of CDBG program income during program year 2023, of which \$8,500 (20%) may be used for program administration activities.

A virtual public meeting was held on January 12, 2023, at the beginning of the CDBG application process, in order to identify community needs and to discuss proposed projects for use of CDBG funding. Staff representatives from seventeen agencies were in attendance to discuss local needs and potential programs and projects of the CDBG program. The draft Annual Action Plan (Attachment 1) was made available for public review and comment during a more than 30-day period beginning March 31, 2023. The public review period for the draft Annual Action Plan ends May 3, 2023 with Council's action. The City plans to submit the Annual Action Plan to HUD no later than May 15, 2023.

## 2023 Annual Action Plan

The Annual Action Plan provides an overview of the City's use of CDBG funds to address community needs in the fourth year of the five year Consolidated Plan. Federal regulations require that at least 70% of CDBG funds be used for projects that primarily benefit persons under the low-income limit defined as persons from households at or below 80% of Area Median Income (AMI) adjusted by family size. For example, the current income limit for a family of four in Placer County is \$81,050. However, most of the activities proposed for funding address families at or below the very low-income limit (\$50,650 for a family of four).

### Public Service and Capital Improvements Project Applications

In response to a notice of funding availability published in the Press Tribune, the City received eight applications requesting a total of \$284,025 in assistance. Six of the eight applications were for public service programs, which are currently limited to \$15,000 each by the Rating and Ranking Guidelines. Of the six public service applications received, five were for ongoing programs under the City's current and past funding year cycles. One of the public service programs requesting funding was deemed ineligible at this time due to the funding structure of the organization.

Two applications for capital improvements projects were received. The Gathering Inn submitted a proposal to create a transitional jobs program. The Salvation Army submitted a proposal for funds to provide rental, deposit, and utility assistance. Although neither of these project proposals fit within CDBG guidelines for capital improvement projects the City was able to fund the Salvation Army with \$15,000 for their application under the public services program. Six of the eight applications are being recommended to receive funding. More details regarding the funding recommendations can be found below and in Attachment 2.

### Housing projects

Funds totaling \$100,000 are proposed to be allocated to the City's Owner-Occupied Housing Rehabilitation Program. The program currently has approximately \$500,000 in State of California HOME funds available. However, there are a few items that are not eligible with HOME funds but that are allowable with CDBG funds, such as emergency repairs and grants.

Lastly, \$412,987 is proposed to be allocated towards support of affordable rental and transitional housing development. Transitional housing was added to the draft plan when a non-profit operator requested that funding be made available for this purpose. Once the proposed Action Plan is reviewed and approved by HUD, the City will release a Notification of Funding Availability to use these funds for acquisition of a site designated for affordable housing development in order to benefit low-income households and individuals.

The following is a summary of proposed funding in the 2023 Annual Action Plan:

| <b>Project</b>                                                           | <b>2023 CDBG Allocation</b> |
|--------------------------------------------------------------------------|-----------------------------|
| AMI Housing Temporary Rent & Utility Assistance with Supportive Services | \$15,000                    |
| KidsFirst Family Mental Wellness Program                                 | \$15,000                    |
| Placer Veterans Stand Down                                               | \$15,000                    |
| Seniors First Meals on Wheels                                            | \$15,000                    |
|                                                                          |                             |

|                                                                |                  |
|----------------------------------------------------------------|------------------|
| St. Vincent de Paul Society BAGS Food Home Delivery Program    | \$15,000         |
| Salvation Army                                                 | \$15,000         |
| City of Roseville Owner-Occupied Housing Rehabilitation        | \$100,000        |
| Affordable Rental and Transitional Housing Development Project | \$412,987        |
| Administration and Planning                                    | \$138,247        |
| <b>Total</b>                                                   | <b>\$741,234</b> |

## FISCAL IMPACT

The adoption of the 2023 CDBG Action Plan will not have any fiscal impact to the General Fund. Estimates of total employment created can be based on expenditure data, consistent with guidance from the Council of Economic Advisers (CEA), a three-member council that analyzes and interprets economic development, and which advises the President of the United States on national economic policy. Total employment not only includes direct and indirect jobs, but also induced jobs. CEA estimates that total employment is increased by one job-year for every \$92,000 in direct government spending.

## ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. The 2023 Annual Action Plan meets the above criteria and is not subject to CEQA. No additional environmental review is required.

CDBG funds are subject to the National Environmental Protection Act (NEPA) as implemented by HUD at 24 CFR 58. NEPA reviews will be completed for each program and project funded prior to any expenditures for these activities.

## CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal C - Maintain a safe and healthy community

Respectfully Submitted,

Trisha Isom, Housing Manager

Melissa Anguiano, Economic Development Director

# 2023 Annual Action Plan

(July 1, 2023 – June 30, 2024)

**DRAFT**

**CITY OF ROSEVILLE**

**2023 ANNUAL ACTION PLAN**

**Executive Summary**

**AP-05 Executive Summary - 24 CFR 91.200(c), 91.220(b)**

**1. Introduction**

The 2023-2024 Annual Action Plan constitutes the fourth year of the 2020-2024 Five-year Consolidated Planning period.

The City of Roseville (City) will receive \$691,234 in Community Development Block Grant (CDBG) funds from the U.S. Department of Housing and Urban Development (HUD) for Program Year 2023 (July 1, 2023 through June 30, 2024). CDBG funds are designated for the promotion of affordable housing and community development programs for lower-income residents. The 2023 Annual Action Plan provides an overview of the City's use of CDBG funds to address community needs established in the 2020-2024 Consolidated Plan.

Federal regulations require that at least 70% of CDBG funds must be used for projects that primarily benefit persons under the Low- and Moderate-Income limit defined as persons from households at or below 80% of Area Median Income (AMI) for Placer County. Low- and Moderate-Income persons and households are referred to as Low-Income throughout this document. The remainder of CDBG funds may be used to address slum and blight, or to address an urgent and unexpected community need such as floods or earthquakes.

Under CDBG regulations, projects serving an area with 51% or more low-income residents may be eligible for CDBG funding on an Area Benefit basis using census data. An exception is allowed for communities with few or no qualifying areas. The City of Roseville was determined to be an Exception Grantee for Program Year 2022. Projects serving census tracts and block groups with 46.81% or more low-income residents may qualify for Area Benefit. Exception Grantee status may change each year, depending on HUD calculations of income estimates. This information will be updated for program year 2023 when it is available.

The City of Roseville's Housing Division is the lead agency responsible for the development of the Consolidated Plan and Annual Action Plan. The Housing Division is also the primary agency responsible

for the administration and management of programs and projects covered by the Consolidated Plan and identified in the Annual Action Plan (Plan).

The City plans to incur costs for 2023 CDBG activities prior to the award of funds. These costs will be limited to those that the City has found to be necessary for the efficient and timely performance of the CDBG program and the funded activity. Costs will not be incurred prior to the completion of the public comment period, and not prior to the approval of the Annual Action Plan by the City Council. Pre-award costs will not exceed one-half of the estimated award. Pre-award costs will be funded from the 2023 award only. Subsequent award years will not be impacted.

The City will utilize CDBG funds as well as other Federal, State and local resources, including its Section 8 Housing Choice Voucher Rental Assistance Contract, State Administered HOME funds, and local developer contributions to address housing and community development priority needs identified in the Consolidated Plan.

The Annual Action Plan identifies a variety of activities, including public services, public facility improvements and housing activities the City proposes to undertake during Program Year 2023 to meet underserved needs identified in the Consolidated Plan. In addition, the Action Plan discusses the actions the City will take to address: lead-based paint hazards; barriers to affordable housing; housing needs of households at or below the poverty level; and Fair Housing resource needs. All proposed activities address the CDBG primary national objective of addressing the needs of Low- and Moderate-Income persons.

## **2. Summarize the objectives and outcomes identified in the Plan**

This could be a restatement of items or a table listed elsewhere in the plan or a reference to another location. It may also contain any essential items from the housing and homeless needs assessment, the housing market analysis or the strategic plan.

The City will allocate investment of resources on a city-wide basis for affordable housing programs such as the Section 8 Housing Choice Voucher and Owner-Occupied Housing Rehabilitation Program. In addition, rental and purchase units provided under the City's 10% Affordable Housing Goal will be offered on a City-wide basis.

Activities identified under the public service category and targeted to special needs populations will be offered on a city-wide basis and/or where resources can be coordinated with existing facilities or services.

The 2023 Annual Action Plan allocates \$557,987 in CDBG funding to activities/programs that address the need for affordable housing and the need to address homelessness, identified as High Priority Needs in the 2020-2024 Consolidated Plan.

The City will continue to apply for funding and/or support applications by service providers to expand affordable housing opportunities as well as homeless assistance and supportive services consistent with the Consolidated Plan.

**Affordable Housing** — The Roseville Housing Authority will apply for additional Section 8 Housing Choice Vouchers, if made available, to increase the number of extremely low and very low-income households receiving rental assistance. The City will continue to implement the City's 10% Affordable Housing Goal to increase the number of rental and purchase units affordable to very low, low, and moderate income households; support private development of affordable housing using Low Income Housing Tax Credits (LIHTCs), Tax Exempt Bond financing, and city and state Local Housing Trust Funds (LHTF); utilize HOME (state) Program Income funds in order to continue to expand the City's Housing Rehabilitation Programs for low-income households. Under this plan, the City will allocate CDBG funding towards development of housing affordable to Low-Income Households.

**Homeless** — The City will continue its efforts to meet the underserved needs of the homeless population through participation in a county-wide Continuum of Care process.

**Supportive Services** — The City will continue its support of applications by public and private social service agencies to expand support services to help meet underserved needs. The City will provide CDBG funding for a variety of public services in Roseville.

### **3. Evaluation of past performance**

This is an evaluation of past performance that helped lead the grantee to choose its goals or projects.

During the 2022 Program Year, the City expended CDBG and CARES Act CDBG-CV funds on eligible activities that primarily benefit low- and moderate-income persons. The City implemented programs to achieve its goals as specified in the Consolidated and Annual Action Plans using CDBG funds for affordable housing and public services by focusing on the needs of the most vulnerable populations, which included seniors, the individuals and families who were homeless, and those at-risk of becoming homeless. Additionally, with the use of CDBG-CV funds, the City also made progress towards the goal of preventing, preparing for, and responding to the impacts of the COVID-19 virus.

Over the last year, the Housing Division assisted 1,512 low income persons, and 6 low income households through the use of CDBG and other housing and community development funds. During Program Year 2022, \$2,075,891 from federal, state, and local funding sources was spent for blight removal, housing rehabilitation, public services, affordable housing, and homeless shelter and prevention services. Funding included payment of Housing Division administrative expenses to manage these programs.

The Roseville Housing Authority (federal rental assistance program) assisted 712 households with \$6,037,382 million in rental subsidies. This includes regular Housing Choice Vouchers, Non-Elderly Disabled (NED) vouchers, Veterans Affairs Supportive Housing (VASH) vouchers, Mainstream Vouchers, Emergency Housing Vouchers and Project-Based Vouchers.

The City uses other Federal, State and local resources when available, including Housing Choice Voucher Rental Assistance Contracts, State-administered HOME funds, and local developer contributions to address housing and community development priority needs identified in the Consolidated Plan.

#### **4. Summary of Citizen Participation Process and consultation process**

Summary from citizen participation section of plan.

Throughout the preparation of the Annual Action Plan, City staff sought input and collected data for the Plan from interested citizens, housing providers, service providers, local agencies and non-profit organizations. The City encouraged others to participate in the development of the Plan via public notice and invitations to a public meeting to more than one hundred regional and local services agencies, non-profit organizations, city staff, and interested individuals.

A virtual Community Meeting was held on January 12, 2023. For those unable to attend the public meetings, the invitation encouraged written comments be submitted.

The January 2023 meeting began the Action Plan process; the purpose of the Plan was discussed and those attending were encouraged to identify community needs and proposed strategies for meetings those needs. The meeting also discussed the 2022/2023 application process for CDBG funding. Seventeen staff from seventeen different service agencies attended the workshop.

The public comment period is March 31, 2023 through May 3, 2023. The public hearing is anticipated be held before the Roseville City Council on May 3, 2023. xxx

Applications for funding requests for the 2023 Program Year were accepted online. The City received \$284,025 in requests: seven requests for public services grants totaling \$180,000; and one request for a non-public service activity for \$104,025.

Funding for the public services category is subject to a 15 percent federal cap. According to the City's PY 2023 allocation of \$691,234, plus 15% of estimated program income received in program year 2022, the maximum amount available for public service activities is \$105,782.

#### **5. Summary of public comments**

This could be a brief narrative summary or reference an attached document from the Citizen Participation section of the Con Plan.

xxx. To be completed following the required 30 day public comment period 4/3/23 to 5/3/23.

**6. Summary of comments or views not accepted and the reasons for not accepting them**

xxx. To be completed following the required 30 day public comment period 4/3/23 to 5/3/23.

**7. Summary**

xxx. To be completed following the required 30 day public comment period of 4/3/23 to 5/3/23.

## PR-05 Lead & Responsible Agencies – 91.200(b)

### 1. Agency/entity responsible for preparing/administering the Consolidated Plan

Describe the agency/entity responsible for preparing the Consolidated Plan and those responsible for administration of each grant program and funding source.

| Agency Role        | Name      | Department/Agency                                  |
|--------------------|-----------|----------------------------------------------------|
| CDBG Administrator | ROSEVILLE | Economic Development Department - Housing Division |

**Table 1 – Responsible Agencies**

### Narrative (optional)

The City of Roseville Housing Division is the lead agency responsible for the development of the Consolidated Plan. The Housing Division is responsible for administration of the Community Development Block Grant (CDBG) program, HOME funding, the Roseville Housing Authority and City housing programs such as the Owner-Occupied Housing Rehabilitation Program; in addition to programs and projects supporting affordable homeownership, housing stability and maintenance of affordable housing stock.

The mission of the Roseville Housing Division is to serve the citizens of Roseville by:

- Providing affordable housing opportunities in a safe environment.
- Revitalizing and maintaining neighborhoods.
- Forming effective partnerships to maximize social and economic opportunities.

Roseville is located in Northern California, north of Sacramento, in southwestern Placer County. The City's geography is primarily rolling hills and grasslands. The City was originally a "railroad town" and in the early 1900's was a major railroad service center. The railroad played a role in the development of early Roseville. Other factors that have impacted the City's development have been the construction of Folsom Dam and completion of Interstate 80 in the 1950's. These projects impacted Roseville's growth by shifting the development of business, commercial, and residential development to "East Roseville". The City has continued to grow outward in all directions. In addition to the city's core, Roseville

currently has fourteen specific plan areas and growth has provided a wide variety of residential, business, commercial and industrial development.

The majority of the City's older, low-income housing stock and business/commercial areas are located in the City's core, near the rail lines. Based on the 2015-2019 American Community Survey, HUD estimates that 33.1% of Roseville residents are at or below 80% of the Family Area Median Income (AMI) for Placer County. This document refers to persons at or below 80% AMI as "low-income". This Plan focuses on developing strategies to address the needs of low-income Roseville residents.

## **AP-10 Consultation – 91.100, 91.200(b), 91.215(I)**

### **1. Introduction**

The consolidated planning process requires jurisdictions to contact and consult with other public and private agencies when developing the Annual Action Plan. The Plan itself must include a summary of the consultation process, including identification of the agencies that participated in the process. Jurisdictions are required to summarize their efforts to enhance coordination between public and private agencies.

### **Provide a concise summary of the jurisdiction's activities to enhance coordination between public and assisted housing providers and private and governmental health, mental health and service agencies (91.215(I))**

In preparing the Annual Action Plan, the City consulted with various organizations located in Roseville and Placer County that provide services to low-income residents of Roseville. In many instances, these consultations are part of ongoing interactions between Roseville's Housing Division and the agency or group described.

#### City of Roseville

1. City Council - Conducts a public hearing prior to authorization of the submission of the Consolidated Plan and Annual Action Plan to HUD.
2. City of Roseville Housing Division - Responsible for development of the Consolidated Plan and Annual Action Plan governing the use of CDBG funding, including the citizen participation process. Administers the CDBG program and State of California HOME funded activities.
3. City of Roseville Development Services Department Planning Division - Reviews CDBG and HOME funded development projects to determine whether proposed development activities comply with the General Plan and Zoning Code; is responsible for drafting the Roseville General Plan 2035, adopted in 2020, including the Housing Element which was updated and certified in 2021. The update has been cited throughout this Plan as the Housing Element of the General Plan 2021-2029.
4. City of Roseville Economic Development Department - Provides assistance with business needs such as starting or expanding a business, finding a site, or connecting with other City services.
5. Roseville Housing Authority - Addresses the housing needs of extremely low- and low-income residents in the City through a variety of programs including the Housing Choice Voucher Program.

## County of Placer

1. Placer County Community Development Department, Planning Services Division - Coordinates the housing programs and funding. Responsible for drafting the Placer County General Plan Housing Element, as well as an incentive program intended to encourage the development of new affordable housing units in the unincorporated areas.
2. Placer County Department of Health and Human Services, Behavioral Health Division - Provides information regarding the needs of Placer County residents who have mental disabilities. Representatives of this division also participate in various Continuum of Care working groups.
3. Placer County Department of Health and Human Services, Public Health Division - Provides information regarding the potential of lead-based paint hazards in the county.

### **Describe coordination with the Continuum of Care and efforts to address the needs of homeless persons (particularly chronically homeless individuals and families, families with children, veterans, and unaccompanied youth) and persons at risk of homelessness.**

Significant aspects of the Consolidated Plan development process included consultations with the Homeless Resource Council of the Sierras (HRCS) which acts as the Nevada-Placer Continuum of Care (CoC), Placer Collaborative Network (PCN), and the Placer Consortium on Homelessness (PCOH). Efforts to address the needs of homeless persons are described in greater detail later in this Plan.

The PCOH, a regional planning group of the HRCS, addresses the needs of all homeless subpopulations, including: domestic violence victims; persons with mental illness, substance abuse, and HIV+/AIDS; veterans; and youth. Current and formerly homeless individuals attend PCOH meetings. Other representatives include members from the faith-based community, nonprofits, businesses, and City and County government. The consortium's annual submissions to HUD reflect the demographics, needs and available shelter, housing, and services in all three HUD entitlement grantees within its jurisdiction in order to provide a cohesive shelter system throughout the County. The Food Closet Collaborative coordinates the work of over 14 food closets in conjunction with the Placer Food Bank.

A complete inventory of facilities and services provided throughout Placer County, including Roseville, is identified on the Homeless Resource Council of the Sierras Continuum of Care website at <https://hrscoc.org/hmis/#resources-and-forms>.

### **Describe consultation with the Continuum(s) of Care that serves the jurisdiction's area in determining how to allocate ESG funds, develop performance standards for and evaluate outcomes of projects and activities assisted by ESG funds, and develop funding, policies and procedures for the operation and administration of HMIS**

#### Homeless Resource Council of the Sierras (HRCS) Governance Board

The City of Roseville collaborates with HRCS (the Nevada-Placer Continuum of Care) to address the needs of persons experiencing or at risk of homelessness. The HRCS Governance Board works toward developing a continuum of services where the ultimate goal is to prevent and eradicate homelessness in Nevada and Placer counties. Efforts are aimed at permanent solutions, and the range of services is designed to meet the unique and complex needs of individuals who are currently experiencing homelessness or are at risk of becoming homeless. The Governance Board responds to and implements HUD's Policy and Program Priorities. The Governance Board also oversees all planning processes, the regional planning groups, committees, and the CoC Program and Emergency Solutions Grant (ESG) application processes. A HRCS subcommittee, Outcomes and Measurements, administers the Rating and Ranking Committee and its process of ranking applications. Issues are framed at the Board level; they are then considered by the three regional planning groups. Recommendations are sent back to the Governance Board, which makes the final decisions.

### Regional Planning Groups

Three Regional Planning Groups are directly involved in CoC-wide planning activities including setting priorities, reviewing performance data, project review and selection, discharge planning, the Consolidated Application, conducting homeless counts, and 10-year plan coordination. Each addresses homelessness in its own area and then forwards that information to the Governance Board. The Placer Consortium on Homelessness (PCOH) covers the more populated western part of Placer County that includes Roseville, Rocklin, Lincoln, Loomis, Auburn, and the foothills. The Nevada County Coordinating Council addresses Nevada City, Grass Valley, North San Juan, Penn Valley, and Alta Sierra. The Tahoe Truckee Homelessness Group covers both counties in the greater North Lake Tahoe and Truckee region.

These regional planning groups ensure that homeless needs from all areas of the CoC are represented. The groups are very inclusive, and all those involved with homeless issues are recruited. The CoC supports currently or formerly homeless individuals in attending; extensive e-mail to listserv groups is used to reach out to all sectors of the CoC areas. The HRCS Board is representative of all areas of the CoC and all targeted homeless populations. The HRCS Board is currently in the process of splitting the two continuums back into Nevada County and Placer County, in an effort to maximize funding opportunities, but HRCS would remain the collaborative applicant and coordinator amongst the two Continuums of Care.

### Outcomes and Measurements

The Outcomes and Measurements Committee addresses the CoC's overall outcomes, application ranking, as well as monitoring the writing of the homeless strategies plan. The Committee sets selection criteria and organizes the Rating and Ranking panels for specific funding sources such as the CoC Program and ESG funds. The Committee is responsible for developing performance measurements and reviews all CoC Program and ESG-funded projects on an annual basis. The Committee presents its work to the regional planning groups and the HRCS Governance Board.

The Outcomes and Measurements Committee uses a rating and ranking panel that is responsible for developing, implementing, and improving the Coordinated Assessment process and the ESG Written Standards for identifying areas where the CoC Program and the ESG Programs should be integrated. No jurisdiction within the two counties receives ESG funds directly from HUD; therefore, the agencies must apply to the California Department of Housing and Community Development (HCD) for ESG funds.

**2. Describe Agencies, groups, organizations and others who participated in the process and describe the jurisdiction's consultations with housing, social service agencies and other entities**

**Table 2 – Agencies, groups, organizations who participated**

|   |                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                         |

**Identify any Agency Types not consulted and provide rationale for not consulting**

The City of Roseville contacted all known agencies working with lower-income residents and neighborhoods regarding development of the Annual Action Plan.

**Other local/regional/state/federal planning efforts considered when preparing the Plan**

| Name of Plan      | Lead Organization                               | How do the goals of your Strategic Plan overlap with the goals of each plan?                                                                                                                                               |
|-------------------|-------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Continuum of Care | Homeless Resource Council of the Sierras (HRCs) | Serving the basic needs of the homeless community is the CoCs primary concern. The City of Roseville Consolidated Plan identifies addressing homelessness as a high priority need and is a goal of the Annual Action Plan. |

**Table 3 – Other local / regional / federal planning efforts**

**Narrative (optional)**

Broadband issues are a concern for low-income residents. The City’s Housing Authority has provided information regarding low cost internet service to its clients, and information has been advertised through the City’s social media and city newsletter platforms. This service is called the Affordable Connectivity Program and it provides households \$30 a month to cover the cost of internet service. Regarding disaster resiliency, the City has a partnership with Placer County’s 211, which provides residents with information, local services, emergency or disaster recover assistance. Additionally, the City has an Emergency Management Team that operates during emergencies but also meets regularly to be prepared for emergencies of all types. The City will continue to seek consultation on this in the future and continue to work to address these issues as they come up.

## AP-12 Participation – 91.105, 91.200(c)

### 1. Summary of citizen participation process/Efforts made to broaden citizen participation Summarize citizen participation process and how it impacted goal-setting

The City receives calls throughout the year and makes note of needed projects. The City also attends stakeholder meetings to hear and make note of the needs of the community. Finally, the City holds a community meeting, a public hearing, and publishes a public notice in the local English paper. To address the Spanish speaking community, the City posts the public notice translated to Spanish in the same local English paper, as well as on the City website. The City also sends the public notices to the Latino Leadership Council, a local organization comprised of various non-profits and agencies, in order to provide outreach to the Spanish-speaking community in the region.

## Expected Resources

### AP-15 Expected Resources – 91.220(c)(1,2)

#### Introduction

During the five-year Consolidated Plan period, the City estimates receipt of \$700,000 annually in CDBG funds from HUD and \$50,000 annually in program income generated by previous CDBG funded activities. The City primarily uses CDBG funds for public services, housing and homeless activities and administrative costs. The table below provides a breakdown of anticipated CDBG funding over the first year of the planning period.

In addition to CDBG funding received directly from HUD, the City currently has approximately \$1,500,000 in State of California HOME funds (all Program Income) available for housing rehabilitation and administrative costs. HOME funds may also be used for the First Time Homebuyer program.

#### Anticipated Resources

| CDBG    | public - federal | Acquisition<br>Admin and Planning<br>Economic Development<br>Housing<br>Public Improvements<br>Public Services | 691,234                          | 50,000             | 0                        | 741,234   | 700,000                                           | HUD has announced that the City of Roseville is awarded \$691,234 in CDBG funds for program year 2023. The City anticipates receiving \$50,000 in CDBG program income available for program year 2023-2024. There are no prior year resources available as of the date of this plan. |

**Table 5 - Expected Resources – Priority Table**

**Explain how federal funds will leverage those additional resources (private, state and local funds), including a description of how matching requirements will be satisfied**

The City's CDBG and HOME funds are often coupled with local funds, allowing capital projects to compete for tax credits, bonds, and other state financing programs. An investment by the City makes projects more competitive under many funding programs. The City's public service grants are limited to \$15,000 to encourage programs to use CDBG as leverage for other funding sources. The City uses local funds as explained below to leverage CDBG public service funding available for low- and moderate-income residents.

The HUD CDBG Entitlement program and the State HOME program do not require matching funds. However, the City is committed to being as creative as possible to seek local, state, federal, and private resources to develop and deliver efficient and cost-effective projects.

**If appropriate, describe publicly owned land or property located within the jurisdiction that may be used to address the needs identified in the plan**

The City owns two pieces of surplus land which are in the process of being sold to affordable housing developers. One piece of land is located at the corner of Royer Street and Taylor Street, while the other is located on Oak Street. Both of these pieces of land are located in Downtown Roseville area, and as part of the City's Downtown Specific Plan, will be used for 100% affordable housing development.

**Discussion**

The City of Roseville Citizen's Benefit Fund was established in 1993 following the sale of the city-owned Roseville Hospital. The proceeds were placed in a trust and a portion of the interest earned each year is made available for grants with the purpose of improving the quality of life for the citizens of Roseville. Public agencies, schools and non-profit 501(c)3 or 501(c)4 are eligible to apply.

The Roseville Employees Annual Charitable Hearts Fund (REACH) is a community giving fund created through the generosity of Roseville employees and retirees. These employee-donated funds are dispersed to local charitable organizations that serve youth, seniors and families in the South Placer County region.

|   | <b>Goal Description</b> | Provide assistance for the rehabilitation of single family homes occupied by low-income homeowners.                                         |

## Projects

### AP-35 Projects – 91.220(d)

#### Introduction

During program year 2023-2024, the City of Roseville will use CDBG funds to address the following needs identified in the 2020-2024 Consolidated Plan.

#### High Priority Needs:

- Shelter and Housing for Homeless Persons
- Affordable Rental Housing

#### Priority Needs:

- Services for Seniors and Persons with Disabilities
- Services for Youth
- Food and Nutrition Programs
- Maintaining the Affordable Housing Stock
- Services for Sexual Assault and Domestic Violence Victims

#### Projects

| 9 | Roseville Owner-Occupied Housing Rehabilitation Program (2023-09)                  |

**Table 7 - Project Information**

#### **Describe the reasons for allocation priorities and any obstacles to addressing underserved needs**

All projects address priority needs in the 2020-2024 Consolidated Plan. CDBG Applications were evaluated based on the following criteria: meeting a CDBG National Objective, CDBG eligibility,

performance on prior year grants, monitoring compliance, administrative capacity, project feasibility and fiscal responsibility. Remaining funds were allocated to the development of affordable rental and transitional housing, a high priority need as identified in the Consolidated Plan and the Roseville Owner-Occupied Housing Rehabilitation Program.

Community and local service providers identified the need for more affordable housing as a high priority for Roseville. The most significant obstacle to creating affordable housing is the high cost of development in the region and throughout California. The Roseville Housing Authority anticipates awarding 15 Project Based Vouchers to developers of new affordable housing. Additionally, the City will continue to work with affordable housing developers to increase housing opportunities available and affordable to low-income residents over the course of the five year Consolidated Plan.

|   | <b>Project Name</b>                                                                            | Roseville Owner-Occupied Housing Rehabilitation Program (2023-09)                                                                                                                                                                                                                                                                                                                                              |

|   |                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|---|------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 9 | <b>Target Area</b>                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|   | <b>Goals Supported</b>                                                                         | Rehabilitation of Owner-Occupied Housing                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|   | <b>Needs Addressed</b>                                                                         | Maintaining the Affordable Housing Stock                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|   | <b>Funding</b>                                                                                 | CDBG: \$100,000                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|   | <b>Description</b>                                                                             | §570.202(b)(1) Financial assistance for rehabilitation of owner-occupied single family homes. §208(a)(3) Low/Mod Housing benefit. 14A Rehabilitation: Single-Unit Residential; 14H Rehab: Administration; 14I Lead-based Paint/Lead Hazards Testing/Abatement. Program provides financial assistance to low-income homeowners for home repairs and improvements. The City will utilize a combination of State of California HOME funds and CDBG funds for rehabilitation projects. |
|   | <b>Target Date</b>                                                                             | 6/30/2024                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|   | <b>Estimate the number and type of families that will benefit from the proposed activities</b> | It is estimated that CDBG funds will provide assistance to 2 low-income homeowner households. Should the City of Roseville receive more CDBG program income than anticipated, additional low-income households may receive assistance.                                                                                                                                                                                                                                             |
|   | <b>Location Description</b>                                                                    | Program is administered by the City of Roseville, Housing Division, 316 Vernon Street #150, Roseville, CA 95678. Eligible participants will reside in the City of Roseville.                                                                                                                                                                                                                                                                                                       |
|   | <b>Planned Activities</b>                                                                      | The City of Roseville Owner-Occupied Housing Rehabilitation Program provides financial assistance to low-income homeowners for home repairs and improvements. The City will utilize a combination of State of California HOME and CalHome funds, in addition to CDBG funds for rehabilitation projects.                                                                                                                                                                            |

## **AP-50 Geographic Distribution – 91.220(f)**

### **Description of the geographic areas of the entitlement (including areas of low-income and minority concentration) where assistance will be directed**

The City of Roseville does not allocate funding on a geographic basis. Funds are allocated to organizations and projects providing low-income households with housing and supportive services, and to activities addressing the needs of low-income neighborhoods. The City prioritizes the use of CDBG, HOME and other federal and State funding for the development and preservation of affordable housing serving low-income households and addressing homelessness.

The City allocates investment of affordable housing resources on a citywide basis. The City's affordable housing programs include the Housing Choice Voucher program and the Owner-Occupied Housing Rehabilitation program. In addition, rental and purchase units created under the City's 10% Affordable Housing Goal are offered on a citywide basis. Public service activities targeted to special needs populations are offered on a citywide basis and/or where resources can be coordinated with existing facilities or services.

### **Geographic Distribution**

| <b>Target Area</b> | <b>Percentage of Funds</b> |
|--------------------|----------------------------|
|                    |                            |

**Table 8 - Geographic Distribution**

### **Rationale for the priorities for allocating investments geographically**

Not applicable.

### **Discussion**

## Affordable Housing

### AP-55 Affordable Housing – 91.220(g)

#### Introduction

Affordable housing is one of the highest priority concerns identified in the consolidated planning process. Increasing opportunities for affordable housing is a goal of the City Council 2020-2024 Strategic Plan. The development of affordable housing is constrained by the cost of land, construction, fees and financing. The City of Roseville is committed to maintaining the existing affordable housing stock and increasing the supply of affordable housing available to low-income families. The numbers in the charts below represent housing activities planned for program year 2023, including development of affordable rental units, temporary rental and utility assistance, and rehabilitation of owner-occupied housing.

| One Year Goals for the Number of Households to be Supported |     |
|-------------------------------------------------------------|-----|
| Homeless                                                    | 85  |
| Non-Homeless                                                | 10  |
| Special-Needs                                               | 15  |
| Total                                                       | 110 |

**Table 9 - One Year Goals for Affordable Housing by Support Requirement**

| One Year Goals for the Number of Households Supported Through |    |
|---------------------------------------------------------------|----|
| Rental Assistance                                             | 30 |
| The Production of New Units                                   | 8  |
| Rehab of Existing Units                                       | 2  |
| Acquisition of Existing Units                                 | 0  |
| Total                                                         | 40 |

**Table 10 - One Year Goals for Affordable Housing by Support Type**

#### Discussion

The City prioritizes the use of CDBG, HOME and other federal and State funding for the development and preservation of affordable housing serving low-income households and addressing homelessness. The City's affordable housing programs include the Housing Choice Voucher program and the Owner-Occupied Housing Rehabilitation program. In program year 2023, the City will provide CDBG funds to developers of new affordable housing. In addition, rental and purchase units are created under the City's 10% Affordable Housing Goal.

## **AP-60 Public Housing – 91.220(h)**

### **Introduction**

The Roseville Housing Authority (RHA) administers the Housing Choice Voucher Program for both the City of Roseville and the City of Rocklin. The RHA administers 813 Roseville Housing Choice Vouchers which include 75 Veterans Affairs Supportive Housing (VASH) Vouchers, 33 Mainstream Vouchers, 75 Non-Elderly Disabled (NED) Vouchers and 50 Emergency Housing Vouchers (EHV). VASH Vouchers provide housing assistance to homeless veterans that is coupled with services provided by the Veterans Administration. Mainstream Vouchers are reserved for households with a disabled family member between the ages of 18 and 62. NED Vouchers are limited to families with a disabled head of household or spouse that is under age 63. EHV vouchers are reserved for those who are homeless or at risk of homelessness. The RHA does not own or operate public housing units.

The RHA acts in accordance with federal regulations relating to persons with disabilities. The RHA has implemented fair, thorough, and accessible reasonable accommodations request process. Private owners participating in the voucher program are expected to understand and comply with all federal, state, and local laws as they relate to nondiscrimination and accessibility for persons with disabilities.

### **Actions planned during the next year to address the needs to public housing**

The RHA does not own or operate any public housing units.

### **Actions to encourage public housing residents to become more involved in management and participate in homeownership**

The RHA does not own or operate any public housing units.

### **If the PHA is designated as troubled, describe the manner in which financial assistance will be provided or other assistance**

HUD has not designated RHA as a troubled housing authority.

### **Discussion**

The City of Roseville supports the provision of affordable housing opportunities offered by the Roseville Housing Authority. These include Housing Choice Vouchers for both the City of Roseville and the City of Rocklin, Veterans Affairs Supportive Housing Vouchers (VASH) and Mainstream Vouchers for non-elderly persons with disabilities.

## **AP-65 Homeless and Other Special Needs Activities – 91.220(i)**

### **Introduction**

The City of Roseville actively participates in the Placer County Continuum of Care CA-515 (CoC) and the Homeless Resource Council of the Sierras (HRCS). HRCS is a regional planning group acting as the collaborative applicant for the Placer and Nevada County CoCs and documents the demographics of persons experiencing homelessness through the Homeless Management Information System (HMIS). Member agencies of the Placer CoC include: Placer County Adult System of Care, Placer County CalWORKs, The Gathering Inn, Volunteers of America, Enhanced Care Management, Whole Person Learning, Advocates for Mentally Ill Housing (AMI Housing), Stand Up Placer, Placer Independent Resource Services, Project Go, City of Roseville, City of Rocklin, Tahoe/Truckee Health and Human Services, and the Sierra Foothills AIDS Foundation.

### **Describe the jurisdictions one-year goals and actions for reducing and ending homelessness including**

#### **Reaching out to homeless persons (especially unsheltered persons) and assessing their individual needs**

The member agencies of the CoC take primary responsibility for outreach to homeless persons residing in the City. Member agencies include Placer County Adult System of Care, Placer County CalWORKs, The Gathering Inn, Volunteers of America, Enhanced Care Management, Whole Person Learning, Advocates for Mentally Ill Housing (AMI Housing), Stand Up Placer, Placer Independent Resource Services, Project Go, City of Roseville, City of Rocklin, Tahoe/Truckee Health and Human Services, and the Sierra Foothills Aids Foundation. The City provides CDBG funds to several of these agencies to support this important work.

The Placer Collaborative Network (PCN) was created to bring community leaders together to develop creative solutions for change surrounding homelessness. As a member of PCN, the City is involved with on-the-ground projects, leadership development, linkages and referrals to services; and creative and collaborative solutions for the most pressing community issues in Placer County through collaboration, creativity and service.

The City supports the following outreach and assessment activities:

- Placer County Continuum of Care (CoC) administration of coordinated entry for all households who are entering the homeless system or are at risk of homelessness.
- CoC coordination of outreach to homeless households (especially unsheltered persons) to assess individual needs using a coordinated entry and common assessment tool; collection of information to determine the underlying issues and risk factors and develop a plan to address

those issues.

- Continuation of street outreach conducted by the Social Services Unit of the Police Department and the Placer County Enhanced Care Management program.
- Reduction of recidivism through system-wide implementation of evidenced-based practices known to effectively address trauma and address cycles into homelessness.
- Addressing the emergency shelter needs of people living outside through increased street outreach and assessment of their health needs.
- Implementation of a low and no-barrier approach to housing and outcome-based reporting that uses measurements to assess appropriate use of funds and program success.

### **Addressing the emergency shelter and transitional housing needs of homeless persons**

The City has identified affordable housing and addressing homelessness as its two top priority needs and goals for the 2020-2024 Consolidated Plan. The City supports the following activities with a combination of HUD CDBG funds, State funds and local funds when available:

- Provision of emergency shelter with a focus on case management and supportive services
- Transitional housing programs
- Rapid re-housing for persons at risk of homeless or who recently became homeless

Additionally, short-term strategies include but are not limited to the following:

- Expanding street outreach efforts to prioritize the needs of persons living outside, especially those whose health is compromised. These efforts are being extended through the Social Services Unit of the Police Department and the County's Whole Person Care program.
- Sustaining existing emergency shelter inventory and helping those in shelter exit to permanent housing through rental assistance and case management addressing specific barriers to obtaining and retaining housing. Through the Placer County Housing Coordinators, Roseville Housing vouchers, and the Whole Person Care staff noted above, more individuals are existing to permanent housing options.

**Helping homeless persons (especially chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth) make the transition to permanent housing and independent living, including shortening the period of time that individuals and families experience homelessness, facilitating access for homeless individuals and families to affordable housing units, and preventing individuals and families who were recently homeless from becoming homeless again**

Persons experiencing homelessness often require supportive services to make a successful transition into a permanent housing situation. The following efforts support individuals and families transitioning to permanent and independent living situations in Roseville. The City provides funding to most of these

programs.

The Roseville Housing Authority administers the following special voucher programs:

- 75 HUD-VASH vouchers. VASH vouchers provide housing assistance to homeless veterans and veteran families, coupled with supportive services provided by the Veterans Administration. Volunteers of America also assists veterans and veteran families through the Veterans Families Program and Homeless Reintegration Program.
- 43 Mainstream vouchers. Mainstream vouchers are reserved for households with a disabled family member between the ages of 18 and 62 that are homeless or at risk of homelessness.
- 50 Emergency Housing Vouchers (EHV). EHV vouchers are reserved for those who are homeless or at risk of homelessness.

Additional community resources serving special needs populations include:

- The Transition to Independence Process (TIP) serves Transition Aged Youth ages 14 to 24 who are experiencing emotional and/or behavioral difficulties. Youth receive assistance to make a successful transition into adulthood.
- The Placer County Whole Person Care program provides services to persons who are homeless or at risk of homelessness who are high users of multiple services, including emergency departments, probation, mental health and substance use programs and social services to coordinate physical health, behavioral health, and social services.
- Advocates for Mentally Ill Housing (AMI Housing) provides case management, housing and support services to individuals with mental illness including homeless and persons at risk of homelessness.
- The Gathering Inn provides emergency homeless shelter services and mental health clinician services for homeless individuals and families with children.
- Volunteers of America Home Start program provides shelter, housing and supportive services to individuals and families with children who are experiencing homelessness.

**Helping low-income individuals and families avoid becoming homeless, especially extremely low-income individuals and families and those who are: being discharged from publicly funded institutions and systems of care (such as health care facilities, mental health facilities, foster care and other youth facilities, and corrections programs and institutions); or, receiving assistance from public or private agencies that address housing, health, social services, employment, education, or youth needs.**

Both affordable housing and supportive services are needed in the community to enable persons with special needs to live independently and to avoid becoming at risk for homelessness or at risk of

institutionalization. The following services are available in the City of Roseville:

- The City provides funding for rapid re-housing to help at risk individuals and families to avoid entering a cycle of homelessness.
- The Roseville Housing Authority administers 43 Housing Choice Voucher Mainstream Vouchers reserved for households with a disabled family member, and 75 Non-Elderly Disabled Vouchers that provide rental assistance to make housing affordable even to households at the extremely low-income level.
- The Placer County Department of Health and Human Services, Adult System of Care provides assistance to vulnerable populations throughout the county, including Roseville residents. The agency provides mental health services, substance abuse treatment, in-home support services for elderly and disabled; and also operates housing programs for clients.
- Advocates for Mentally Ill Housing (AMIH) provides case management, permanent supportive housing and other services to individuals with mental illness including homeless and persons at risk of homelessness.
- KidsFirst offers intensive social services and individual therapy to children and families with young children.
- The Transition to Independence Process (TIP) serves Transition Aged Youth ages 14 to 24 who are experiencing emotional and/or behavioral difficulties. Youth receive assistance to make a successful transition into adulthood.

## **Discussion**

Homelessness continues to be of concern in the City of Roseville. The City actively participates in the Placer County Regional Homelessness Response Planning Team that meets monthly to discuss homelessness on a regional level. The City also has an Internal Homelessness Team that consists of members of the Housing Division, the City Manager's Office, City Attorney's Office, Police Department and Parks and Recreation. This team meets monthly to discuss how to best coordinate City services.

## **AP-75 Barriers to affordable housing – 91.220(j)**

### **Introduction:**

The most significant barrier to affordable housing in the City of Roseville is the cost of land, construction and financing. The City targets housing resources, including entitlement CDBG and State of California HOME funds, to the creation and preservation of affordable rental units and permanent supportive housing for low-income and very low-income households.

In 2019, the City completed a regional effort that updated the 2000 Analysis of Impediments to Fair Housing Choice (AI) pursuant to the 2015 AFFH Final Rule. The City shall continue to actively participate in the ongoing region-wide collaborative effort to improve fair housing choice and affirmatively further fair housing.

### **Actions it planned to remove or ameliorate the negative effects of public policies that serve as barriers to affordable housing such as land use controls, tax policies affecting land, zoning ordinances, building codes, fees and charges, growth limitations, and policies affecting the return on residential investment**

The following is a summary of the City's plan to address public policies that may impact affordable housing development as noted in the 2021 Housing Element.

- **Development Process.** To expedite project facilitation and provide internal support to project applicants, the City established the Development Advisory Committee to function as a liaison building relationships between the City and development community, providing input into delivery of development services, cost of services, construction standards, development impact fees, and other development service policy areas. The City will continue to review its fee system and work toward graduated fees as a means of reducing the cost of housing development. The City's Development Services Department works with the Development Advisory Committee.
- **Review of Subdivision Improvement Standards and Zoning Ordinances.** The City will review and modify its Subdivision Improvement Standards, where reasonable, to provide cost savings in the development of residential units while continuing to ensure the public health, safety, and welfare.
- **Public Education Program.** The City will continue to educate its citizens regarding the necessity of providing the affordable housing needed to support the job growth occurring in Roseville. Specifically, this information will focus on the need to provide affordable housing in close proximity to jobs in an effort to reduce the traffic and air quality impacts that result from long commutes. In addition, the City will continue to monitor community opposition to affordable housing projects in an effort to remove negative perceptions. Education will occur through public hearings, presentations to various service organizations, and other community groups, articles published in the local newspaper, the City's newsletter.
- **Public Participation.** The Planning Division will continue to encourage developers to meet with

interested parties before the public decision making process begins. Preliminary neighborhood forums allow persons directly affected by the project to have their questions and concerns addressed early in the planning process.

- Fair Housing: The City will continue to provide assistance regarding equal housing opportunities through its Housing Division and Housing Authority. The City of Roseville will continue its collaborative Housing Education Campaign to provide fair housing counseling workshops and one-on-one counseling for Roseville residents, landlords/property owners, and tenants, with counseling provided by Legal Services of Northern California through the City's Fair Housing Education Program. In addition to the provision of workshops and one-on-one counseling, the City's website includes fair housing information and referral service data with links to other Fair housing resources. The City has also contracted with Project Sentinel, a Fair Housing Services provider, to provide outreach and education regarding fair housing for both landlords and tenants of Roseville.

**Discussion:**

## **AP-85 Other Actions – 91.220(k)**

### **Introduction:**

The City of Roseville 2023 Annual Action Plan targets CDBG funding to address needs and strategies identified in the City's 2020-2024 Consolidated Plan.

One of the primary obstacles to meeting underserved needs of residents is the availability of funding. The City actively seeks additional funding opportunities and will continue to do so when funds are available. The City collaborates with private, non-profit and governmental partners to maximize benefits to needy and vulnerable residents.

### **Actions planned to address obstacles to meeting underserved needs**

Throughout the public participation process, the community emphasized the need for more affordable housing, shelter, homeless services, mental health services and services for seniors. The City will provide 2023 CDBG funding to support the development of affordable housing, to programs providing rental assistance to persons who are homeless or at risk of homelessness, rental assistance for persons with mental illness, mental health treatment for homeless and youth, food and nutrition services for seniors, to mental health counseling for families with children, and to rehabilitation of owner-occupied homes for low-income residents.

### **Actions planned to foster and maintain affordable housing**

The City will continue to implement the 10% Affordable Housing Goal to increase the number of rental and purchase units affordable to very low-, low-, and moderate-income households. As a part of this process, the City will support private development of affordable housing by assisting with funding to leverage the use of Low Income Housing Tax Credits (LIHTCs) and Tax Exempt Bond financing. State of California HOME Program Income and CDBG funds, when available, will be used to continue to expand the City's Owner-Occupied Housing Rehabilitation Program for low-income homeowners.

The Roseville Housing Authority will apply for additional Section 8 Housing Choice Vouchers, if made available, to increase the number of extremely low- and very low-income households receiving rental assistance. As noted above, 2023 CDBG funds are allocated to support the development of affordable housing, rehabilitation of owner-occupied homes, and temporary rental assistance for persons experiencing or at risk of homelessness.

### **Actions planned to reduce lead-based paint hazards**

The City's Owner-Occupied Housing Rehabilitation Program requires inspections for the presence of lead-based paint and the potential hazard such paint may pose to occupants for all units built prior to 1978. If the inspection reveals that a potential hazard exists, the City requires the mitigation or removal

of the lead-based paint hazard in accordance with HUD guidelines. The City addresses the issue of lead-based paint hazards by providing lead-based paint hazard notices to landlords and tenants who participate in the Housing Choice Voucher Program, to all participants of the Housing Rehabilitation Program. Additionally, all rental units that are rehabilitated with CDBG or HOME funds are subject to lead-based paint compliance requirements. The creation of new affordable housing units and reduction of hazards through rehabilitation of older units provides low-income households with homes that are free of lead-based paint hazards.

### **Actions planned to reduce the number of poverty-level families**

Program Year 2023 CDBG funds will be used to support case management and counseling that will assist participants to access income assistance such as Disability Insurance, Social Security or Temporary Aid to Families (TANF); and employment counseling to obtain jobs, when possible, to sustain family wealth.

The Roseville Housing Authority Family Self Sufficiency Program (FSS) is a voluntary program designed to assist families to access community resources and achieve self-reliance through education, job training, and other supportive services. The FSS Coordinator establishes a supportive case management relationship with participants and provide guidance to help define career goals, identify and reduce the barriers to achieve those goals, and access resources that foster independence from public assistance programs. Participants are eligible for an interest-bearing escrow account for wealth generation as an incentive for full program participation.

### **Actions planned to develop institutional structure**

The City actively participates in the Placer County Continuum of Care CA-515 (CoC) the Placer Collaborative Network, and the Homeless Resource Council of the Sierras (HRCS). HRCS is a regional planning group acting as the collaborative applicant for the Placer and Nevada County CoCs and documents the demographics of persons experiencing homelessness through the Homeless Management Information System (HMIS). Member agencies of the Placer CoC include: Placer County Adult System of Care, Placer County CalWORKs, The Gathering Inn, Volunteers of America, Enhanced Care Management, Whole Person Learning, Advocates for Mentally Ill Housing, Stand Up Placer, Placer Independent Resource Services, Project Go, City of Roseville, City of Rocklin, Tahoe/Truckee Health and Human Services, Sierra Foothills AIDS Foundation.

### **Actions planned to enhance coordination between public and private housing and social service agencies**

The City relies on private, nonprofit organizations as well as for-profit developers to build new affordable units and to rehabilitate existing housing units. City staff will continue to work closely with these entities to ensure that as many new affordable units are produced as possible in each year, in addition to maintenance of existing affordable housing stock. The City relies on the nonprofit service

sector to provide emergency shelter, transitional and special needs housing and services to special needs and homeless populations. The City will continue to support these organizations and their activities to the fullest extent possible.

## Program Specific Requirements

### AP-90 Program Specific Requirements – 91.220(l)(1,2,4)

#### Introduction:

As a recipient of CDBG funds from HUD, the City of Roseville is required to present the following information regarding funds to be available during program year 2023/2024.

#### Community Development Block Grant Program (CDBG)

##### Reference 24 CFR 91.220(l)(1)

Projects planned with all CDBG funds expected to be available during the year are identified in the Projects Table. The following identifies program income that is available for use that is included in projects to be carried out.

|                                                                                                                                                                                                |          |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| 1. The total amount of program income that will have been received before the start of the next program year and that has not yet been reprogrammed                                            | 0        |
| 2. The amount of proceeds from section 108 loan guarantees that will be used during the year to address the priority needs and specific objectives identified in the grantee's strategic plan. | 0        |
| 3. The amount of surplus funds from urban renewal settlements                                                                                                                                  | 0        |
| 4. The amount of any grant funds returned to the line of credit for which the planned use has not been included in a prior statement or plan                                                   | 0        |
| 5. The amount of income from float-funded activities                                                                                                                                           | 0        |
| <b>Total Program Income:</b>                                                                                                                                                                   | <b>0</b> |

#### Other CDBG Requirements

|                                                                                                                                                                                                                                                                                                                                                                                                    |         |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 1. The amount of urgent need activities                                                                                                                                                                                                                                                                                                                                                            | 0       |
| 2. The estimated percentage of CDBG funds that will be used for activities that benefit persons of low and moderate income. Overall Benefit - A consecutive period of one, two or three years may be used to determine that a minimum overall benefit of 70% of CDBG funds is used to benefit persons of low- and moderate-income. Specify the years covered that include this Annual Action Plan. | 100.00% |

The City of Roseville anticipates expending all CDBG funds towards activities that benefit persons from low- and moderate-income households during Program Year 2023.

## COUNCIL COMMUNICATION

CC #: 2666

File #: 0400-02 & 0321

**Title:** Zoning and Sign Ordinance Update

**Contact:** Lauren Hocker 916-774-5272 lhocker@roseville.ca.us

**Meeting Date:** 5/3/2023

**Item #:** 10.2.

### RECOMMENDATION TO COUNCIL

At the March 23, 2023 Planning Commission hearing, the Planning Commission recommended the City Council take the following action:

1. Adopt the two (2) findings of fact and introduce for first reading an Ordinance amending Zoning Ordinance Chapters 19.08, 19.12, 19.26, 19.28, 19.60, 19.74, and 19.82 of the Roseville Municipal Code regarding Commercial Zones, Parking Space Requirements, Density Bonus Regulations, Accessory Dwelling Units, Permit Requirements, and Major Project Permit Processing.

At the March 23, 2023 Planning Commission hearing, the Planning Commission reviewed and provided feedback on the Ordinance Amendments to Title 17 of the Roseville Municipal Code. Staff recommends the City Council take the following action:

1. Adopt the two (two) findings of fact and introduce for first reading an Ordinance amending Sign Ordinance Chapters 17.04 and 17.08 of the Roseville Municipal Code regarding Appeals and Definitions.

### BACKGROUND

Each year, staff reviews the Zoning Ordinance to identify needed maintenance updates, including updates needed in response to legislation. The proposed updates identified for this annual update are relatively minor, and consist of the below changes. A more detailed description of each change is contained within the Planning Commission staff report, included as Attachment 1.

- **Section 19.08.080 and Section 19.08.090 (Residential Use Types and Commercial Use Types):** This update corrects some errors within the definitions for Long Term Care.
- **Section 19.08.090 (Commercial Use Types):** The update includes adding a definition for stand-alone electric vehicle charging stations and proposes to change the definition of "gas station" to "fuel station" with other text adjustments.
- **Section 19.12.020 (Commercial Zones, Permitted Use Types):** The permitted use table is proposed to be amended to reflect the changes above for charging stations and fuel

stations. The update also includes adding table note 14 which clarifies that, in addition to a Conditional Use Permit, residential uses on commercial sites will require a Unit Transfer or Specific Plan Amendment if there are no units allocated or fewer allocated to the commercial site than are proposed.

- **Section 19.26.030 (Parking Space Requirements by Use Type):** AB 2244 requires amendments to allow a 50% reduction in required religious use parking spaces in conjunction with a housing project on property which is owned, controlled, and operated by a religious institution and is used for regular assembly by members of the institution.
- **Chapter 19.28 (Density Bonus):** Assembly Bill 682 made various changes to density bonus law, all of which are minor changes and are not expected to impact the City.
- **Chapter 19.60 (Accessory Dwelling Units):** Assembly Bill 2221 made various changes to accessory dwelling unit (ADU) law, many of which add clarifications which are already consistent with City practice. Other changes include that parking is not required for an ADU submitted together with a permit application to build a new single-family or multi-family dwelling, and adding that if a junior ADU does not include a separate bathroom the unit must have interior access to the home and it's own exterior access. The bill also includes changes to the definition of the so-called "mandatory minimum" ADU, which establishes that one or more standards must be waived to allow an ADU of certain minimum dimensions. The bill changed the permitted height of a mandatory minimum ADU, and added the front setback to the list of standards potentially subject to a waiver. However, the law does not require all of the standards be waived; the City has the discretion to waive standards other than the front setback, so it is unlikely the City will be required to allow an ADU in the front yard.
- **Section 19.74.010 (Permit Requirements):** The approving authority for a Design Review Permit for a Residential Subdivision (DRRS) is proposed to be amended from the Planning Commission to the Planning Manager. Over the past decade it has become increasingly common to defer the DRRS application, because the subdivision is typically submitted by a development company and then the property is sold to a builder, and the builder applies for the DRRS. The current process effectively requires most Medium Density Residential subdivisions to be heard by Planning Commission twice: once to establish the subdivision map and a second time to establish the exterior appearance of the homes. Staff is requesting City Council approve a modification which would allow Planning Manager approval of the DRRS.
- **Section 19.82.010 and 19.82.040 (Purpose and Amendments to an Approved Major Project Permit):** The process description in this section has proven confusing to applicants and is in need of clarification. The proposed changes do not alter the process; the changes merely clarify the process.
- **Section 17.08.510 (Sign Ordinance, Appeals from the decision of the director):** Staff noticed an error in the referenced section which is proposed for correction. The section identifies the Design Committee as the appeal authority but a later sentence erroneously refers to a hearing by City Council. The phrase "City Council" is proposed to be deleted and replaced with "Design Committee."
- **Section 17.04.090 (Building façade definition):** Certain sign regulations limit sign length based on the length of the "building façade if a tenant occupies more than one tenant

space.” This has occasionally led to some confusion, because the Sign Ordinance definition of “building façade” is the entire building. Staff proposes to amend the definition of building façade to indicate that, for the purpose of sign regulations limiting sign length, the length of the building façade or tenant space means the length of a single, uninterrupted wall plane in the portion of the building occupied by the tenant.

#### Evaluation

Section 19.86.050 of the City of Roseville Zoning Ordinance requires two findings be made in order to approve a zoning ordinance amendment. The two findings are listed below in italicized, bold text and are followed by an evaluation of the project in relation to the findings. There is no advisory body for Title 17, so staff requested Planning Commission review and comment on changes to Title 17. Planning Commission had no comments or concerns about the proposed changes.

1. ***The project is consistent with the public interest, health, safety, or welfare of the City.***
2. ***The project is consistent with the General Plan and any applicable specific plan of the City of Roseville.***

The proposed changes to the Zoning Ordinance are to bring the City’s regulations into consistency with enacted state law and to make other needed maintenance updates. Annual maintenance updates ensure a clear set of regulations for both the public and for City staff. For these reasons, staff finds that the project is consistent with the public interest, health, safety, or welfare of the City and that the project is consistent with the General Plan and applicable specific plans.

Title 17 of the City of Roseville Zoning Ordinance was adopted by City Council on the basis of the findings listed in Section 17.02.020, as shown below.

1. Signs are an essential element of any community. As such, their location, number, size, design, and relationship to each other and to other structures have a significant influence upon a community’s appearance and welfare, and a resultant effect upon a viewer’s perception of the community. Signs serve a useful purpose in communicating messages, whether commercial, non-commercial, or merely informative, or otherwise.
2. Where signs are not properly regulated and maintained, they contribute to visual clutter, confusion, aesthetic blight, and create an unpleasant impression. They may cause traffic hazards and impede rather than enhance commerce and communication. In such situations, signs may fail to achieve their original objective of communication. Failure to appropriately regulate signs adversely affects the public health, safety and welfare.

The proposed minor changes to Title 17 have no impact on the findings made upon adoption of the Sign Ordinance, and ensures a clear set of regulations for both the public and for City staff.

#### Public Outreach

A General Information Memorandum (GIM) to City Council discussing the bills passed in the 2022 legislative session was published on January 11, 2023. Staff discussed the zoning ordinance updates at the Roseville Coalition of Neighborhood Associations (RCONA) General Board meeting of February 16, 2023 and also posted a general notice of the Project on the RCONA website on February 17, 2023. RCONA Board members asked several questions about the amendments, but expressed no comments or concerns. To date, no comments or concerns have been received.

Text amendments of the City’s Zoning Ordinance and Sign Ordinance are not site-specific, and therefore public hearing notices were not mailed to individual property owners. Consistent with

noticing requirements for a citywide project public hearing notices of the Planning Commission hearing and the City Council hearing were published in the Press Tribune and were posted on the RCONA website.

#### Summary of Planning Commission Meeting

The proposed amendments were heard by the City's Planning Commission on March 23, 2023. A Commissioner asked for confirmation that a Design Review Permit for a Residential Subdivision approved at the Planning Manager level requires public notification, and staff confirmed that a 10-day Notice of Intent to approve is mailed out to all property owners within 300 feet of the project. If a request for a hearing is received during the 10-day notice period, the item would be elevated to a public hearing.

The Planning Commission unanimously recommended the City Council approve the Zoning Ordinance amendments. There is no advisory body for Title 17, so staff requested Planning Commission review and comment on changes to Title 17. Planning Commission had no comments or concerns about the proposed changes.

#### FISCAL IMPACT

The project has no impact on the City's General Fund.

#### ENVIRONMENTAL REVIEW

The proposed Zoning Ordinance and Sign Ordinance amendments are policy and procedure-making activities, and the California Environmental Quality Act (CEQA) only applies to projects which have the potential to cause a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA. (CEQA Guidelines §15061(b)(3)).

#### CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal F - Invest in well-planned infrastructure and growth

Respectfully Submitted,

Lauren Hocker, Senior Planner

Mike Isom, Development Services Director

---

Dominick Casey, City Manager

## **ATTACHMENTS:**

### **Description**

Attachment 1 Planning Commission Staff Report

Exhibit A RMC Chapter 19 Amendments

Exhibit B RMC Chapter 17 amendments

**Planning Division Staff Report**  
**Planning Commission Meeting**

**March 23, 2023**

Prepared by: Lauren Hocker, Senior Planner

**ITEM 6.3:**                    **ORDINANCE AMENDMENT – CITYWIDE – ZONING AND SIGN ORDINANCE**  
**UPDATE 2023 – PL23-0007**

**REQUEST**

The project is a city-initiated update to Title 19 (Zoning Ordinance) of the Roseville Municipal Code (RMC) to reflect changes in state law and implement annual maintenance updates. The project also includes two minor corrections to Title 17 (Sign Ordinance) of the Roseville Municipal Code. The request includes an Ordinance amending Zoning Ordinance Section 19.08.080 (Residential Use Types) to correct errors in the definition of long-term care facilities; Section 19.08.090 (Commercial Use Types) to correct an error in the definition of long-term care facilities, to add a definition for electric vehicle charging facilities, and adjust the definition of gas stations to recognize alternative fuels; Section 19.12.020 (Commercial Zones, Permitted Use Types) to add electric vehicle charging facilities to the permitted use table, carry forward the adjustment to the gas station definition, and add a new table note; Section 19.26.030 (Parking Space Requirements by Use Type) to add a religious-use parking reduction in conjunction with a housing project pursuant to Assembly Bill 2244; Chapter 19.28 (Density Bonus) in various places to add shared housing to the density bonus provisions and make other minor clarifications pursuant to Assembly Bill 682; Chapter 19.60 (Accessory Dwelling Units) to adjust the height limitations for “mandatory minimum” accessory dwelling units and make other clarifications pursuant to Assembly Bill 2221; Section 19.74.010 (Permit Requirements) to change the approving authority for a Design Review Permit for a Residential Subdivision (DRRS) from the Planning Commission to the Planning Manager; and Section 19.82 (Major Projects Permit Processing) to clarify the purpose and process description for amendments to a Major Project Permit. The project also includes a minor correction to Title 17 (Sign Ordinance) Section 17.08.510 (Appeals from the decision of the director) to correct an internal inconsistency in which the Design Committee is identified as the appeal authority but a later sentence erroneously refers to a hearing by City Council and to Section 17.04.090 (Building façade definition) to clarify that for the purposes of sign length, the façade is the length of a single, uninterrupted wall plane.

Applicant – City of Roseville  
 Owner – Citywide

**SUMMARY RECOMMENDATION**

The Planning Division recommends the Planning Commission take the following actions:

1. Consider the two (2) findings of fact and recommend City Council approve the Ordinance Amendment to Title 19 of the Roseville Municipal Code.
2. Review and comment on the Ordinance Amendment to Title 17 of the Roseville Municipal Code.

**SUMMARY OF OUTSTANDING ISSUES**

There are no outstanding issues associated with this request.

**BACKGROUND**

Each year, staff reviews the Zoning Ordinance to identify needed maintenance updates, including updates needed in response to legislation. The proposed updates identified for this annual update are relatively minor, and consist of the following changes (see Exhibit A and Exhibit B):

- **Section 19.08.080 and Section 19.08.090 (Residential Use Types and Commercial Use Types):** This update corrects some errors within the definitions for Long Term Care, ensuring that the Residential Use Types include the correct definition of Long Term Care, Small (six or fewer)

and Long Term Care, Large (12 or fewer) and the Commercial Use Types includes Long Term Care Facility (commercial facility with no limit on number).

- **Section 19.08.090 (Commercial Use Types):** Stand-alone electric vehicle charging facilities, similar to traditional gas stations, are an emerging new use. The update includes adding a definition for electric vehicle charging stations. Similarly, the definition of “gas station” is proposed for amendment to “fuel station,” with other text adjustments to recognize that vehicle fueling stations provide forms of fuel other than petroleum products.
- **Section 19.12.020 (Commercial Zones, Permitted Use Types):** The permitted use table is proposed to be amended to reflect the change in title from “gas station” to “fuel station” and to include electric vehicle charging stations, subject to the same use restrictions as fuel stations. The update also includes adding table note 14 which clarifies that, in addition to a Conditional Use Permit, residential uses on commercial sites will require a Unit Transfer or Specific Plan Amendment if there are no units allocated or fewer allocated to the commercial site than are proposed.
- **Section 19.26.030 (Parking Space Requirements by Use Type):** AB 2244 requires amendments to allow a 50% reduction in required religious use parking spaces in conjunction with a housing project on property which is owned, controlled, and operated by a religious institution and is used for regular assembly by members of the institution.
- **Chapter 19.28 (Density Bonus):** Assembly Bill 682 made various changes to density bonus law. Minor changes include clarifying the types of standards which qualify as a “development standard” and clarifying how density must be calculated (this was to address situations where a site has no assigned density, and uses Floor Area Ratio or similar standards). The remaining changes are all related to the addition of “shared housing” as a use type which is eligible for a density bonus. Simply put, shared housing is defined as a building with five or more units and one or more common kitchens and dining areas.
- **Chapter 19.60 (Accessory Dwelling Units):** Assembly Bill 2221 made various changes to accessory dwelling unit (ADU) law. Minor changes include requiring that when construction of an ADU will include demolition of a detached garage the permits must be reviewed and issued concurrently (this is already City practice), that parking is not required for an ADU submitted together with a permit application to build a new single-family or multi-family dwelling, clarifying that attached garages and other enclosed uses within a residence are considered “within the walls of the proposed or existing single-family residence” and may be used for a junior ADU (this is already City practice), and adding that if a junior ADU does not include a separate bathroom the unit must include a separate entrance from the main entrance to the residence and must include an interior entry into the main living area.

The bill also includes changes to the definition of the so-called “mandatory minimum” ADU, which establishes that certain standards must be waived in order to allow an ADU of certain minimum dimensions. One or more of the following standards must be waived: height, setbacks, lot coverage, floor area ratio, open space, front setbacks, and lot sizes. Front setbacks are new to this list. However, the law does not require all of the standards be waived, just that one or more on the list be waived so that a mandatory minimum ADU may be built. The City has the discretion to waive standards other than the front setback, so it is unlikely that the City will be required to allow an ADU in the front yard. The previous mandatory minimum was an 800-square-foot ADU with a height of up to 16 feet and side and rear setbacks of four feet. The bill revises the height limitations, allowing 18 feet for a detached ADU if within ½-mile of a major transit stop or high

quality transit corridor, allowing 18 feet for a detached ADU on a multifamily site, and allowing 25 feet for an ADU attached to the primary dwelling.

- **Section 19.74.010 (Permit Requirements):** The approving authority for a Design Review Permit for a Residential Subdivision (DRRS) is proposed to be amended from the Planning Commission to the Planning Manager. When this process was first established the typical DRRS was submitted concurrently with a Subdivision Map. Subdivision Maps are heard by the Planning Commission, and so DRRS were also established as a Planning Commission item. Over the past decade it has become increasingly common to defer the DRRS application, because the subdivision is typically submitted by a development company and then the property is sold to a builder, and the builder applies for the DRRS. The current process effectively requires most Medium Density Residential subdivisions to be heard by Planning Commission twice: once to establish the subdivision map and a second time to establish the exterior appearance of the homes. Staff is requesting the Planning Commission recommend the approval of a modification which would allow Planning Manager approval of the DRRS.
- **Section 19.82.010 and 19.82.040 (Purpose and Amendments to an Approved Major Project Permit):** The process description in this section has proven confusing to applicants and is in need of clarification. The proposed amendments are intended to clearly explain the three tiers of Major Project Permit amendments and their purpose: those which are exempt from permit (a letter of approval), those which are minor (administrative approval), and those which are major (public hearing required). The proposed changes do not alter the process; the changes merely clarify the process.
- **Section 17.08.510 (Sign Ordinance, Appeals from the decision of the director):** Staff noticed an error in the referenced section which is proposed for correction. The section identifies the Design Committee as the appeal authority but a later sentence erroneously refers to a hearing by City Council. The phrase “City Council” is proposed to be deleted and replaced with “Design Committee.”
- **Section 17.04.090 (Building façade definition):** Certain sign regulations limit sign length based on the length of the “building façade if a tenant occupies more than one tenant space.” This has occasionally led to some confusion, because the Sign Ordinance definition of “building façade” is the entire building. Staff proposes to amend the definition of building façade to indicate that, for the purpose of sign regulations limiting sign length, the length of the building façade or tenant space means the length of a single, uninterrupted wall plane in the portion of the building occupied by the tenant.

## **EVALUATION**

Section 19.86.050 of the City of Roseville Zoning Ordinance requires two findings be made in order to approve a zoning ordinance amendment. The two findings are listed below in ***italicized, bold*** text and are followed by an evaluation of the project in relation to the findings. There is no advisory body for Title 17, so staff is requesting Planning Commission review and comment on changes to Title 17, and will pass those comments on to City Council.

1. ***The project is consistent with the public interest, health, safety, or welfare of the City.***
2. ***The project is consistent with the General Plan and any applicable specific plan of the City of Roseville.***

The proposed changes to the Zoning Ordinance are to bring the City's regulations into consistency with enacted state law and to make other needed maintenance updates. Annual maintenance updates ensure a clear set of regulations for both the public and for City staff. For these reasons, staff finds that the project is consistent with the public interest, health, safety, or welfare of the City and that the project is consistent with the General Plan and applicable specific plans.

Title 17 of the City of Roseville Zoning Ordinance was adopted by City Council on the basis of the findings listed in Section 17.02.020, as shown below. There is no advisory body for Title 17, so staff is requesting Planning Commission review and comment on changes to Title 17, and will pass those comments on to City Council.

1. Signs are an essential element of any community. As such, their location, number, size, design, and relationship to each other and to other structures have a significant influence upon a community's appearance and welfare, and a resultant effect upon a viewer's perception of the community. Signs serve a useful purpose in communicating messages, whether commercial, non-commercial, or merely informative, or otherwise.
2. Where signs are not properly regulated and maintained, they contribute to visual clutter, confusion, aesthetic blight, and create an unpleasant impression. They may cause traffic hazards and impede rather than enhance commerce and communication. In such situations, signs may fail to achieve their original objective of communication. Failure to appropriately regulate signs adversely affects the public health, safety and welfare.

The proposed minor changes to Title 17 have no impact on the findings made upon adoption of the Sign Ordinance, and ensures a clear set of regulations for both the public and for City staff.

### **PUBLIC OUTREACH**

A General Information Memorandum (GIM) to City Council discussing the bills passed in the 2022 legislative session was published on January 11, 2023. Staff discussed these updates at the Roseville Coalition of Neighborhood Associations (RCONA) General Board meeting of February 16, 2023 and also posted a general notice of the Project on the RCONA website on February 17, 2023. RCONA Board members asked several questions about the amendments, but expressed no comments or concerns. To date, no comments or concerns have been received.

Text amendments of the City's Zoning Ordinance and Sign Ordinance are not site-specific, and therefore public hearing notices were not mailed to individual property owners. Consistent with noticing requirements for a citywide project a public hearing notice was published in the Press Tribune and was posted on the RCONA website.

### **ENVIRONMENTAL DETERMINATION**

The proposed Zoning Ordinance and Sign Ordinance amendments are policy and procedure-making activities, and the California Environmental Quality Act (CEQA) only applies to projects which have the potential to cause a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA. (CEQA Guidelines §15061(b)(3)).

## **RECOMMENDATION**

The Planning Division recommends the Planning Commission take the following actions:

- A. Consider the findings of fact as stated in the staff report and recommend City Council approve the **Title 19 ORDINANCE AMENDMENT – CITYWIDE – ZONING AND SIGN ORDINANCE UPDATE 2023 – PL23-0007**.
- B. Review and comment on the **Title 17 ORDINANCE AMENDMENT – CITYWIDE – ZONING AND SIGN ORDINANCE UPDATE 2023 – PL23-0007**.

## **Exhibits**

- A. Zoning Ordinance Redlines (RMC 19.08, 19.12, 19.26, 19.28, 19.60, 19.74, and 19.82)
- B. Sign Ordinance Redlines (RMC 17.04 and 17.08)

**Note to Applicant and/or Developer:** Please contact the Planning Division staff at (916) 774-5276 prior to the Commission meeting if you have any questions on any of the recommended conditions for your project. If you challenge the decision of the Commission in court, you may be limited to raising only those issues which you or someone else raised at the public hearing held for this project, or in written correspondence delivered to the Planning Manager at, or prior to, the public hearing.

ORDINANCE NO. \_\_\_\_

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE AMENDING SECTIONS 19.08.080 AND 19.08.090 OF CHAPTER 19.08, AMENDING SECTION 19.12.020 OF CHAPTER 19.12, AMENDING SECTION 19.26.030 OF CHAPTER 19.26, AMENDING SECTIONS 19.28.020 AND 19.28.040 OF CHAPTER 19.28, AMENDING SECTIONS 19.60.030, 19.60.060, 19.60.070 AND 19.60.120 OF CHAPTER 19.60, AMENDING SECTION 19.74.010 OF CHAPTER 19.74, AND AMENDING SECTIONS 19.82.010 AND 19.82.040 OF CHAPTER 19.82 OF TITLE 19 OF THE ROSEVILLE MUNICIPAL CODE REGARDING ZONING

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. Section 19.08.080 of Chapter 19.08 of Title 19 of the Roseville Municipal Code is hereby amended to read as follows:

**19.08.080 Residential use types.**

Residential use types include the occupancy of living accommodations on a wholly or primarily non-transient basis and includes uses which are typically associated with and provide support to residential areas, but exclude institutional living arrangements providing 24-hour skilled nursing or medical care and those providing forced residence, such as asylums and prisons. Transitional housing and supportive housing are considered residential uses. Specific residential use types referred to in this title are:

**A. Accessory Dwelling Unit/Junior Accessory Dwelling Unit.** An accessory dwelling unit shall be as defined by Government Code Section 65852.2, as it now exists or may hereafter be amended, and means an attached or a detached residential dwelling unit that provides complete independent living facilities for one or more persons. The unit shall be located on a permanent foundation, have an independent exterior access, and shall include permanent provisions or infrastructure to support permanent provisions (such as stubbing gas, water or sewer lines) for living, sleeping, eating, cooking, and sanitation on the same parcel as where a single-family, two-family or multi-family dwelling unit is situated or proposed to be situated. Accessory dwelling units can also include efficiency units, as defined in Section 17958.1 of the Health and Safety Code, manufactured homes, as defined in Section 18007 of the Health and Safety Code, second dwelling units, granny flats, in-law quarters, carriage units, and tiny houses as long as such units otherwise meet this definition. A junior accessory dwelling unit shall be as defined by Government Code Section 65852.22, as it now exists or may hereafter be amended, and means a unit that is no more than 500 square feet in size and contained entirely within a single-family dwelling. A junior accessory dwelling unit may include separate sanitation facilities, or may share sanitation facilities with the existing structure. (Also see Chapter 19.60.)

**B. Caretaker/employee housing,** includes permanent or temporary housing that is secondary or accessory to the primary use of the property. Such housing is used for caretakers employed on the site of a non-residential use where a caretaker is needed for security or to provide 24-hour care or monitoring of facilities, equipment, or other conditions on the site.

**C. Community care facility, small,** includes a dwelling where non-medical care is provided to six or fewer persons on a 24-hour basis. Small community care facilities shall be licensed by the State Department of Social Services.

**D. Community care facility, large,** includes a dwelling where non-medical care is provided to no less than seven and no more than 12 persons on a 24-hour basis and which is operated and occupied by the owners. Large community care facilities shall be licensed by the State Department of Social Services, shall permit no more than two persons per bedroom and shall be designed so as to be compatible with the residential character of the neighborhood.

**E. Efficiency units,** includes a room or group of internally connected rooms that have independent sleeping, cooking, eating and sanitation facilities, which constitutes an independent housekeeping unit, occupied by or intended for one household on a long-term basis.

**F. Dwelling,** includes a room or group of internally connected rooms that have sleeping, cooking, eating, and sanitation facilities, but not more than one kitchen, which constitutes an independent housekeeping unit, occupied by or intended for one household on a long-term basis. Types of dwellings include single-family dwellings, duplexes, accessory dwelling units, multi-family dwellings, mobile homes, condominiums, and townhouses, all of which are separately defined.

**1. Multi-family,** includes a building designed and intended for occupancy by three or more families living independently of each other, each in a separate dwelling unit, which may be owned individually or by a single landlord. Includes apartments, condominiums, rowhouses, triplexes and fourplexes.

**2. Single-family,** includes an attached or detached building designed exclusively for occupancy by one family. Includes houses, half-plexes and townhomes.

**3. Two-family,** includes a duplex, or other buildings designed for occupancy by two families living independently of each other, where both dwellings are located on a single lot.

**G. Family day care homes, small,** includes a dwelling unit where providers dwell in that provides care, protection and supervision for eight or fewer children, including children under 10 years of age who reside at the home, for periods of less than 24 hours or as otherwise provided by State law.

**H. Family day care homes, large,** includes a dwelling unit where providers dwell in that provides care, protection and supervision for seven to 14 children, inclusive, including children under 10 years of age who reside at the home, as set forth in Section 1597.465 of the Health and Safety Code, as may be amended from time to time. (Also see Chapter 19.46.)

**I. Live/work,** includes units that are occupied by business operators who live in the same structure that contains commercial activity. The units functions primarily as a workspace with incidental residential accommodations.

**J. Long term care, small,** is a residential home with a capacity of no more than six beds, which provides inpatient care, including medical supervision, 24-hour nursing and supportive care, and other medical services (such other medical services are defined by Health and Safety Code Section 1250(i)(1), congregate living health facility, as may be amended from time to time).

**K. Long term care, large,** includes a dwelling with a capacity of no less than seven and no more than 12 beds, which provides inpatient care, including medical supervision, 24-hour nursing and supportive care, and other medical services (such other medical services are defined

[by Health and Safety Code Section 1250\(i\)\(1\), congregate living health facility, as may be amended from time to time\).](#)

**JL.** **Low-barrier navigation centers**, means a “housing first,” low-barrier, service-enriched shelter focused on moving people into permanent housing that provides temporary living facilities while case managers connect individuals experiencing homelessness to income, public benefits, health services, shelter, and housing. (Also see Chapter 19.47.)

**KM.** **Mobile home park**, includes any site that is planned and improved to accommodate two or more mobile homes used for residential purposes, or on which two or more mobile home lots are rented, leased, or held out for rent or lease, or were formerly held out for rent or lease and later converted to a subdivision, cooperative, condominium, or other form of resident ownership, to accommodate mobile homes used for residential purposes. (Also see Chapter 19.48.)

**LN.** **Rooming and boarding houses**, includes the renting of individual bedrooms within a dwelling by a property owner or other manager in residence to three or more people, whether or not meals are provided; or a single-family dwelling occupied by six or more unrelated people, living together as a single housekeeping unit; by prearrangement for definite periods greater than 30 calendar days, with compensation (typically monetary compensation).

**MO.** **Short-Term Rental.** A short-term rental as defined in Chapter 4.25 (Short-Term Rentals) means any single-family dwelling unit located in a residential or commercial zone that is rented in whole or in part on a short-term basis, which is 30 calendar days or less.

**NP.** **Single room occupant**, includes lodging establishments providing a room(s) which does not include a kitchen or bathroom. These establishments include a communal bathroom and may

have a communal kitchen and/or living area. This is not a temporary or transitional housing type and is typically found on the second story above a retail use.

**EQ.** **Supportive housing**, includes housing with no limit on length of stay, that is occupied by the target population as defined in Health and Safety Code Section 53260(d), and that is linked to on- or off-site services that assist the supportive housing resident in retaining the housing, improving his or her health status, and maximizing his or her ability to live, and when possible, work in the community. (California Health and Safety Section 50675.14(b).)

**1. Target Population**, includes adults with low income having one or more disabilities, including mental illness, HIV or AIDS, substance abuse, or other chronic health conditions, or individuals eligible for services provided under the Lanterman Developmental Disabilities Services Act and may, among other populations, include families with children, elderly persons, young adults aging out of the foster care system, individuals exiting from institutional settings, veterans, or homeless people. (California Health and Safety Section 53260(d).)

**PR.** **Transitional housing and transitional housing development**, includes buildings configured as rental housing developments, but operated under program requirements that call for the termination of assistance and recirculation of the assisted unit to another eligible program recipient at some predetermined future point in time, which shall be no less than six months. (California Health and Safety Section 50675.2(h).)

**SECTION 2.** Section 19.08.090 of Chapter 19.08 of Title 19 of the Roseville Municipal Code is hereby amended to read as follows:

## **19.08.090 Commercial use types.**

Commercial use types include the distribution, sale and rental of goods, and the provision of services other than those classified as civic or industrial use types. Specific commercial use types referred to in this title are:

- A. Adult-oriented businesses,** include those uses specifically referred to in Chapters 9.11 and 19.32 of this Code and include any adult arcade, adult bookstore, adult cabaret, adult hotel/motel, adult motion picture theater, adult theater or modeling studio defined therein. Any reference in this Code to “adult business establishment” shall mean adult-oriented business, as provided herein.
- B. Animal sales and services,** includes establishments primarily engaged in animal-related sales and services. The following are animal sales and services use types:

  - 1. Grooming and pet stores,** includes grooming or selling of dogs, cats, and similar small animals with limited indoor boarding. Typical uses include dog bathing and clipping salons, pet grooming shops, and pet stores.
  - 2. Kennels,** includes indoor and outdoor kennel services for dogs, cats, and similar small animals. Typical uses include boarding kennels, pet hotels, and dog training centers.
  - 3. Veterinary clinic,** includes a fully enclosed veterinary facility containing only enough cage arrangements as necessary to provide services for small animals requiring acute medical or surgical care, as well as boarding and grooming.

4. **Veterinary hospital**, includes a veterinary facility conducted in an enclosed building and an outdoor space which provides long-term medical care, boarding and grooming.

C. **Automotive and equipment**, includes establishments primarily engaged in automotive-related or heavy equipment sales or services. The following are automotive and equipment use types:

1. **Automotive body and equipment repair**, includes automobile body repair and painting; repair of equipment such as aircraft, boats, recreational vehicles, and trucks; and the installation and servicing of tractor-trailer, semi-trucks and heavy construction equipment.

2. **Automotive rentals**, includes rental from the premises of automobiles, light trucks, and recreational vehicles. Typical uses include car rental agencies.

3. **Automotive repairs**, includes repair of automobiles and the sale, installation, and servicing of automobile equipment and parts completely within an enclosed building, but excluding body repair and painting. Typical uses include muffler shops, automobile repair garages, automobile glass shops, and minor services including oil change, tuneup/lube shops, tire installation, and stereo and car accessory installation.

4. **Automotive sales**, includes the sale, retail or wholesale, of automobiles, light trucks, boats, recreational vehicles, motorcycles, motor homes, and trailers together with associated enclosed repair services and parts sales, but excluding body repair and painting. Typical uses include automobile dealers and recreational vehicle sales agencies.

5. **Car wash and detailing**, includes washing and polishing of automobiles. Typical uses include automobile detailing services and car washes.

6. **Commercial parking**, includes parking of operable motor vehicles on a temporary basis within a privately owned off-street parking area with or without a fee. Typical uses include commercial parking lots and garages.

7. **Heavy equipment rental and sales**, includes rental and sales of heavy equipment such as aircraft, trucks, tractor-trailer, semi-trucks and heavy construction equipment.

8. ~~Gasoline~~**Fuel sales**, includes establishments primarily engaged in the retail sale, from the premises, of petroleum, ~~or natural gas, or other fuel~~ products primarily for use by individual vehicles with the incidental sale of tires, batteries, and replacement items, lubricating services, or minor repair services and may include drive through car washes, convenience eating places and neighborhood commercial. Typical uses include automobile service stations, filling stations and neighborhood commercial uses with gas sales.

9. **Electric vehicle charging center**, includes establishments primarily engaged in the provision, from the premises, of charging for electric vehicles, with the incidental sale of tires, batteries, and replacement items, lubricating services, or minor repair services and may include drive through car washes, convenience eating places and neighborhood commercial. This definition does not include accessory use electric vehicle charging stations, which are individual electric vehicle charging stations located in parking lots on parcels which support residential, commercial, or employment uses as the primary use, and are principally permitted as an Accessory Use pursuant to Chapter 19.22.

**D. Banks and financial services,** includes financial institutions including: banks and trust companies; lending and thrift institutions, credit agencies; brokers and dealers in securities and commodity contracts; security and commodity exchanges; holding, (but not predominantly operating) companies; and other investment companies; vehicle finance leasing agencies. Automated teller machines (ATMs) located away from banks are included under the definition of “personal services.”

**E. Bars and drinking places,** includes establishments within a building where alcoholic beverages are sold for on-site consumption, that are not part of a restaurant. Includes bars, taverns, pubs, brew pubs, wine bars and similar establishments where any food service is subordinate to the sale of alcoholic beverages. Dance floors are not permitted.

**F. Broadcasting and recording studios,** includes commercial and public communications uses including telegraph, telephone, radio and television broadcasting and receiving stations and studios, and television production and sound recording studios, with facilities entirely within buildings. Private transmission and receiving apparatus, such as towers, reflectors and antennas are included under the definition of “antennas, communications facilities.”

**G. Building material stores,** includes retail establishments selling lumber (which may include the cutting of precut lumber) and other large building materials, and also including paint, wallpaper, glass, fixtures, nursery stock, lawn and garden supplies (which may also be sold in hardware stores, included under the definition of “retail sales and services”). Includes all such stores selling to the general public, even if contractor sales account for a larger proportion of total sales.

**H. Business support services,** includes establishments within buildings, providing other businesses with services including maintenance, repair and service, testing, rental, etc., also includes:

1. Blueprinting;
2. Business equipment repair services (except vehicle repair, see “Automotive repair”);
3. Commercial art and design (production);
4. Computer-related services (rental, repair, maintenance);
5. Equipment rental businesses within buildings;
6. Film processing laboratories;
7. Mail advertising services (reproduction and shipping);
8. Outdoor advertising services;
9. Photocopying; and
10. Photo-finishing.

**I. Commercial recreation,** includes establishments primarily engaged in the provision of sports, entertainment, or recreation for participants or spectators. The following are commercial recreation use types:

1. **Amusement center,** includes public places of amusement or public places of business in which four or more coin-operated amusement devices are installed and includes

any place open to the public, whether or not the primary use of the premises is devoted to the operation of such devices.

**2. Indoor entertainment,** includes predominantly spectator uses conducted within an enclosed building, excluding uses classified under adult oriented businesses. (See Chapter 19.32.) Typical uses include motion picture theaters, and live theater.

**3. Indoor sports and recreation,** includes predominantly participant sports and health activities conducted within an enclosed building. Typical uses include bowling alleys, billiard parlors, ice and roller skating rinks, indoor racquetball courts, soccer arenas, athletic clubs, and health clubs.

**4. Outdoor entertainment,** includes predominantly spectator uses conducted in open or partially enclosed or screened facilities. Typical uses include outdoor amphitheaters, concert halls and sports arenas, BMX tracks, racing facilities, drive in theaters, and zoos.

**5. Outdoor sports and recreation,** includes predominantly participant sports conducted in open or partially enclosed or screened facilities. Typical uses include amusement parks, driving ranges, miniature golf courses, golf courses, swimming pools, and tennis courts.

**6. Residential recreation facilities,** includes predominantly participant sports which are normally associated with a country club, or private residential community. Typical uses include country clubs, racquet clubs, golf courses, swimming pools, tennis courts, and other secondary uses including restaurants, and retail sales.

**7. Large amusement complexes,** includes a theme park or similar complex open to the public which exceeds 100,000 square feet and which:

- a. Includes outdoor amusement attractions such as mechanized or carnival-type rides or water slides; and
- b. Meets any two of the following three criteria:
  - i. The complex has a maximum daily capacity of more than 500 users per day,
  - ii. The complex is required to provide off-street parking for more than 200 vehicles, or
  - iii. The complex operates during any part of the year during the hours after 6:00 p.m. This does not apply to publicly owned or operated parks or facilities.

**J. Community care facility,** includes any facility serving as a residence where non-medical care is provided on a 24-hour basis with central or private kitchen facilities, dining, recreational and other facilities. Typical uses include assisted living facilities and facilities licensed by the State Department of Social Services. Does not include long-term care facilities.

**K. Day care centers,** includes commercial or non-profit facilities that provide care, protection and supervision of 13 or more minor children or adults in need of assistance for periods of less than 24 hours per day, typically while parents or family are working, and/or before or after daily attendance at an elementary school, as defined by Chapter 3.6 of the Health and Safety Code, commencing with Section 1597.30 includes preschools.

**L. Eating and drinking establishments,** includes establishments primarily engaged in the sale of prepared food and beverages for on-premises consumption, but excludes those uses classified under “bars and drinking places” and “nightclubs.” An eating and drinking

establishment that provides amplified live or recorded music and that provides space(s) for dancing or hold public dances under Municipal Code Chapter 9.45 shall be considered a nightclub per subsection U of this section. Eating and drinking establishment use types include:

**1. Fast food with drive-through,** includes establishments primarily engaged in the preparation and retail sale of food and beverages at a walk up counter and at a drive through window, and may include seating.

**2. Convenience,** includes establishments primarily engaged in the preparation and retail sale of food and beverages, at a walk up counter and which does not include a drive through or provide for ordering at the tables, if any. Typical uses include pizza parlors, ice cream parlors, and sandwich shops.

**3. Full service,** includes establishments primarily engaged in the preparation and retail sale of food and beverages, where food is ordered and served at a table, and which may include sales of alcoholic beverages as an accessory or secondary service. Fixed seating or tables and chairs are provided for the seating of each patron or customer at all times.

Typical uses include full service restaurants.

**M. Food and beverage retail sales,** includes establishments primarily engaged in the retail sale of food and beverages for home consumption. Typical uses include groceries, liquor stores, and delicatessens.

**N. Funeral and interment services,** includes establishments primarily engaged in the provision of services involving the care, preparation, or disposition of human remains other than in cemeteries.

**O. Lodging services,** includes establishments primarily engaged in the provision of commercial lodging on a less than monthly basis to the general public. Lodging services includes incidental food, drink, and other sales and services intended for the convenience of guests. Typical uses include hotels, motels, and bed-and-breakfasts.

~~**P. Long term care facility, small,** includes an institution or a portion of an institution that is licensed or approved to provide health care under medical supervision for 24 or more consecutive hours as defined by the Health and Safety Code Section 1267.16, as may be amended from time to time. Typical uses include extended care facilities, intermediate care facilities, skilled nursing facilities, hospices and other facilities licensed by the State Department of Health Services.~~

**QP. Long term care facility, large,** includes an institution or a portion of an institution that is licensed or approved to provide health care under medical supervision for 24 or more consecutive hours as defined by Health and Safety Code Section 1267.16, as may be amended from time to time. Typical uses include extended care facilities, intermediate care facilities, skilled nursing facilities, hospices and other facilities licensed by the State Department of Health Services. ~~includes any congregate living health facility of more than six beds for persons who are terminally ill and any congregate living health facility of more than six beds for persons who are catastrophically and severely disabled and are licensed by the State Department of Health Services.~~

**RQ. Maintenance and repair,** includes all uses that provide maintenance and repair services for furniture, appliances and equipment normally used within a building. Typical uses include sewing machine and appliance repair.

**SR.** **Medical services**, includes establishments primarily engaged in the provision of personal health services on an outpatient basis ranging from prevention, diagnosis and treatment, or rehabilitation services provided by physicians, dentists, nurses, and other health personnel as well as the provision of medical testing and analysis-services, but excludes uses classified under any civic use type. Medical services use types include:

1. **General**, includes the range of medical services described above. Typical uses include individual medical and dental offices, dental and medical laboratories, health maintenance organizations, substance abuse treatment clinics, immediate care facilities and offices for physical therapists, chiropractors, and acupuncturists.
2. **Low traffic generating**, includes medical services with a low patient frequency or longer than average patient appointment time which creates a lower parking demand. Typical uses include dialysis clinics and imaging services.
3. **Medical campus/medical office building (MOB)**, includes a cluster of buildings or a singular building that provides a range of outpatient services such as medical offices, dental or medical laboratories, imaging, physical therapists, and pharmacy services, with a range of parking demands.

**TS.** **Neighborhood commercial**, includes establishments primarily engaged in the provision of frequently or recurrently needed small personal items or services for residents within a reasonable walking distance. These uses are compatible with residential development due to low traffic and noise generation and include various retail sales and personal services of an appropriate size and scale to meet the above criteria. Typical uses include neighborhood grocery

stores, drug stores, beauty salons, and offices, but do not include drive-through restaurants, bars and drinking places, or liquor stores.

**UT.** **Nightclubs**, includes establishments or places of entertainment within a building, open primarily at night, usually but not necessarily serving alcohol, and providing floor space for amplified live or recorded music, or having spaces for “public dances” as per Chapter 9.45 of the Roseville Municipal Code. Fixed seating or chairs are not provided for the seating of each patron or customer. Meals or refreshments may be served and an admission may be charged. Excludes uses classified under this section as commercial use types as “eating or drinking establishments,” “commercial recreation,” and Chapter 19.32, “Adult Oriented Businesses.” Additional requirements are contained in Chapter 19.49.

**VU.** **Nursery, retail**, includes establishments primarily engaged in the sale of nursery goods, landscaping materials, chips, rocks, sand, soil and merchandise. This use type is typically conducted primarily outdoors. The sale of nursery goods, landscaping materials, chips, rocks, sand, soil and merchandise indoors is permitted under retail sales and services.

**WV.** **Offices, professional**, includes professional or government offices including:

1. Accounting, auditing and bookkeeping services;
2. Advertising agencies;
3. Architectural, engineering, interior design, and surveying services;
4. Attorneys;
5. Call and telemarketing centers;

6. Computer software designers;
7. Court reporting services;
8. Data processing and computer services;
9. Detective agencies and similar services;
10. Secretarial and word processing services;
11. Government offices including agency and administrative office facilities;
12. Insurance agencies;
13. Management, public relations and consulting services;
14. Real estate agencies; and
15. Writers, photographers and artists offices outside the home.

**XW.** **Personal services**, includes establishments primarily engaged in the provision of personal improvement or appearance, and similar non-business related or non-professional services, but excludes services classified under other use types. Typical uses include barber shops, beauty salons, tailors, shoe repair shops, massage therapist, tattoo studios, tutoring services, and dry cleaning pick up stations.

**YX.** **Retail sales and services**, includes establishments primarily engaged in the sale of goods and merchandise, but excludes those classified under animal sales and services, automotive and equipment, business support services, building materials stores, neighborhood commercial, food and beverage retail sales, and gasoline sales. Typical uses include:

1. Auto parts;
2. Bakeries, retail;
3. Bicycle sales;
4. Department stores;
5. Drug and discount stores;
6. Furniture stores;
7. Hardware;
8. Orthopedic supplies;
9. Photography studios;
10. Self-service laundries/dry cleaning stores; and
11. Sporting goods and equipment.

**ZY.** **Specialized education and training**, includes private establishments providing training or educational programs. Typical uses include:

1. **Vocational schools**, includes businesses, secretarial schools and vocational schools offering specialized trade and commercial courses and establishments furnishing educational courses by mail or online. Facilities, institutions and conference centers are included that offer specialized programs in personal growth and development (including fitness, environmental awareness, arts, communications, and management, as examples).

2. **Specialty schools**, includes specialized non-degree granting schools such as: music schools; dramatic schools; language schools; driver education schools; martial arts studios; ballet and other dance studios.

**A.A.Z. Storage, personal storage facility**, includes a structure or group of structures containing generally small, individual, compartmentalized stalls or lockers rented as individual storage spaces. This use type does not include the outdoor storage of boats, cars, recreational vehicles, or equipment, and does not include the rental of trucks or other equipment. (Also see Chapter 19.54.)

SECTION 3. Section 19.12.020 of Chapter 19.12 of Title 19 of the Roseville Municipal Code is hereby amended to read as follows:

**19.12.020 Permitted use types.**

Primary uses are permitted in commercial zones subject to the requirements of this title as designated below:

- A. Principally permitted use, designated as “P”;
- B. Conditionally permitted use, designated as “CUP”; and
- C. Administratively permitted use, designated as “A.”

Refer to the Downtown Code for permitted uses within the CBD and HD zones.

**COMMERCIAL ZONE DISTRICTS PERMITTED USES**

Notes:

(1) Reserved.

(2) Additional requirements are contained in Chapter 19.32.

(3) Additional requirements are contained in Chapter 19.40.

(4) Additional requirements are contained in Chapter 19.39.

(5) Additional requirements are contained in Chapter 19.38.

(6) Additional requirements are contained in Chapter 19.49.

(7) Additional requirements are contained in Chapter 19.34.

(8) Additional requirements are contained in Chapter 19.36.

(9) Additional requirements are contained in Chapter 19.55.

(10) Transitional housing and supportive housing are considered residential use types and are permitted (P) where residential uses are permitted (P) or conditionally permitted (CUP).

(11) Accessory dwelling /junior accessory dwelling units are only permitted within areas zoned to allow single-family, two-family or multi-family residential use and must be located on a lot that contains an existing or proposed

single-family, two-family or multi-family dwelling unit which has an approved CUP as defined in Sections 19.08.080(F)(1) and (F)(2) (Residential Use Types). See Chapter 19.60 for additional accessory dwelling/junior accessory dwelling unit regulations.

(12) A conditional use permit is required for fast food with drive through establishments ~~or gasoline-fuel~~ sales establishments or electric vehicle charging centers contiguous to: (a) properties with a residential zoning designation; (b) parcels designated as a public utilities easement or landscape easement which are contiguous to a property having a residential zoning designation; and (c) any other parcel of land upon which a building cannot be developed and which separates the subject parcel by less than 100 feet which is contiguous to a property having a residential zoning designation. A conditional use permit is not required for these uses if the subject parcel is separated from properties with a residential zoning designation by a public roadway.

(13) Multi-family uses are permitted with an Administrative Permit in the NC and CC zone districts when the housing development is constructed on or adjacent to a site occupied by a non-profit organization, and a non-profit organization will offer supportive services to the proposed residents. Examples of supportive services include transportation, child care, education assistance, and the provision of clothing and other supplies.

(14) For sites within a specific plan, residential units are only permitted with a CUP if the specific plan has allocated units to the site. If no units are allocated or if fewer units are allocated than are proposed, a unit transfer or specific plan Amendment is required in addition to the CUP.

**SECTION 4.** Section 19.26.030 of Chapter 19.26 of Title 19 of the Roseville Municipal Code is hereby amended to read as follows:

**19.26.030 Parking space requirements by use type.**

The number of off-street parking spaces required for the land uses identified by Article II (Zoning Districts and Permitted Uses) shall be as provided by this section, except where parking

requirements are established by Article IV (Special Area and Specific Use Requirements) for a particular use.

**A. Number of Spaces Required.** The number of off-street parking spaces required for new uses shall be based upon the use type, listed below.

**1. Terms Used in Tables.** The following terms are used throughout the tables and are defined below:

“Square feet” means the total gross building/tenant space area;

“Use area” means the total of gross building/tenant space area plus the gross area of any outdoor/storage/activity.

**2.** Civic use types shall provide off-street parking spaces as follows:

| CIVIC USE TYPES                  | NUMBER OF PARKING SPACES REQUIRED                                                                  |
|----------------------------------|----------------------------------------------------------------------------------------------------|
| Community Assembly               |                                                                                                    |
| Places of Worship <sup>(u)</sup> | 1 per 3 fixed seats or 1:50 sq. ft. for non-fixed seats in the assembly area, plus 1 per classroom |
| Club, Lodges, Meeting Halls      | 1 per 3 fixed seats or 1:50 sq. ft. for non-fixed seats in the assembly area                       |
| Public Community Facilities      | As determined as part of the design review approval                                                |
| Community Services               | As determined as part of the design review approval                                                |

| Public Parking Services                           | As determined as part of the design review approval                                                      |
| <b>Schools</b>                                    |                                                                                                          |
| College and Universities                          | As determined as part of the design review approval                                                      |
| Public/Private Elementary, Middle and Junior High | 2 per classroom, plus 60 lineal feet of loading area for every 100 students                              |
| High Schools                                      | 1 per classroom, plus 1 per every 4 students, plus 60 lineal feet of loading area for every 200 students |
| <b>Social Services</b>                            |                                                                                                          |
| Emergency Shelter                                 | 1 per staff member                                                                                       |
| Food Distribution                                 | 1 per employee, plus 1 per every 500 sq. ft. of floor area                                               |
| Food Service Facility                             | 1 per employee, plus 1 per every 4 seats within facility                                                 |

Notes:

(1) A 50% reduction in required religious-use parking spaces is permitted by-right in conjunction with a housing development project proposed on property owned, controlled, and operated by a religious institution, and which is used for the purpose of regular assembly by members of the institution. (Refer to Government Code Section 65913.6, as may be amended from time to time.)

3. Residential use types shall provide off-street parking spaces as follows:

| <b>RESIDENTIAL USE TYPES</b>   | <b>NUMBER OF PARKING SPACES REQUIRED</b>                                                                               |
|--------------------------------|------------------------------------------------------------------------------------------------------------------------|
| Accessory Dwelling Units       |                                                                                                                        |
| Studios                        | None                                                                                                                   |
| 1+ Bedrooms                    | 1 per dwelling. For exceptions, see Chapter 19.60 (Accessory Dwelling Units)                                           |
| Caretaker/Employee Housing     | 2 per dwelling                                                                                                         |
| Community Care Facility, Small | 2 per dwelling                                                                                                         |
| Community Care Facility, Large | 2 per dwelling plus 0.5 per sleeping room (a maximum of 2 spaces may be located within the front setback)              |
| Dwelling                       |                                                                                                                        |
| Multi-Family                   |                                                                                                                        |
| Studio                         | 1.5 per unit, plus guest parking (see below)                                                                           |
| 1 Bedroom                      | 1.5 per unit, plus guest parking (see below)                                                                           |
| 2+ Bedrooms                    | 2 per unit, plus guest parking (see below)                                                                             |
| Senior Citizen Apartments      | 1 per unit, plus guest parking (see below)                                                                             |
| Guest Parking                  | Projects with 10 or more dwelling units shall provide 1 additional space for each 10 dwelling units or portion thereof |
| Single-Family and Two-Family   | 2 per dwelling                                                                                                         |
| Mobile Home Park               | 2 per dwelling unit plus 1 guest space for each 10 dwelling units or portion thereof                                   |
| Rooming and Boarding Houses    | 2 per dwelling plus 0.5 per sleeping room (a maximum of 2 spaces may be located within the front setback)              |

4. Commercial use types shall provide off-street parking spaces as follows, but no fewer than four spaces for each separate commercial use or tenant:

| <b>COMMERCIAL USE TYPES</b>   | <b>NUMBER OF PARKING SPACES REQUIRED</b>                                                                                                                      |
|-------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Adult Business Establishments | 1 per 300 sq. ft.                                                                                                                                             |
| Animal Sales and Service      |                                                                                                                                                               |
| Grooming and Pet Stores       | 1 per 300 sq. ft.                                                                                                                                             |
| Kennels                       | Minimum 10 spaces                                                                                                                                             |
| Veterinary Clinic             | 1 per 150 sq. ft.                                                                                                                                             |
| Veterinary Hospital           | 1 per 150 sq. ft.                                                                                                                                             |
| Automotive and Equipment      |                                                                                                                                                               |
| Automotive Rentals            | 1 per 300 sq. ft. of office plus 1 per 1,000 sq. ft. of fleet or vehicle storage area                                                                         |
| Automotive Repairs            | 1 per 400 sq. ft. plus 1 per bay plus 1 for every company vehicle                                                                                             |
| Automotive Sales              | 1 per 1,000 sq. ft. of indoor and outdoor display area                                                                                                        |
| Car Wash and Detailing        |                                                                                                                                                               |
| Full Service                  | 10 spaces or 3 times internal washing capacity, whichever is greater; additional parking required for drying or vacuum areas and 100 lineal feet for stacking |
| Self-Service                  | 4 spaces; additional parking required for drying or vacuum areas and 20 lineal feet in front of each bay for stacking                                         |
| Automatic Car Wash Service    | 1 space per drying and vacuum areas plus 100 linear feet in front of car wash for stacking                                                                    |
| Commercial Parking            | As determined as part of the design review approval                                                                                                           |
| Equipment Rental and Sales    | 1 per 300 sq. ft. of office plus 1 per 1,000 sq. ft. of outdoor display area                                                                                  |

| <b>COMMERCIAL USE TYPES</b>           | <b>NUMBER OF PARKING SPACES REQUIRED</b>                                                                                                    |
|---------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------|
| Gasoline Sales                        |                                                                                                                                             |
| With Neighborhood Commercial Sales    | 1 per 300 sq. ft. of commercial sales area with a 5 space minimum                                                                           |
| Without Neighborhood Commercial Sales | 5 spaces                                                                                                                                    |
| With Repair                           | 1 per 300 sq. ft. of commercial sales area with a 5 space minimum plus 2 spaces per service bay                                             |

| Furniture, Large Appliance, Floor Covering                                                                                                                       | 1 per 400 sq. ft.                                                                                                                                                                                                                                                                                                                                   |
| General Retail                                                                                                                                                   | 1 per 300 sq. ft.                                                                                                                                                                                                                                                                                                                                   |
| Shopping Centers<br>(minimum of 4 commercial establishments, designed or planned in a coordinated fashion, utilizing such elements as common access and parking) | Designed and planned at 1 per 200 sq. ft. As tenant spaces are leased, each tenant shall utilize the parking requirement for that use as outlined in this chapter                                                                                                                                                                                   |

| <b>COMMERCIAL USE TYPES</b>           | <b>NUMBER OF PARKING SPACES REQUIRED</b>                                     |
|---------------------------------------|------------------------------------------------------------------------------|
| Specialized Education and Training    |                                                                              |
| ational Schools and Specialty Schools | 1 per 50 sq. ft. of instructional area plus 1 per 250 sq. ft. of office area |
| Storage, Personal Storage Facilities  | 4 spaces plus 2 spaces for the manager's quarters                            |

5. Industrial use types shall provide off-street parking spaces as follows, but no fewer than four spaces for each separate industrial use or tenant:

| <b>INDUSTRIAL USE TYPES</b>          | <b>NUMBER OF PARKING SPACES REQUIRED</b>                                                                                                                                                                                                                  |
|--------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Day Care Centers, Secondary          | None, see parking requirements for applicable industrial use type                                                                                                                                                                                         |
| Equipment and Material Storage Yards | 1 per 300 sq. ft. plus 1 per 10,000 sq. ft. of yard area                                                                                                                                                                                                  |
| General Industrial                   | 1 per 1,000 sq. ft. Where other uses exceed 10% of the gross floor area (e.g., office, warehouse, etc.) the parking requirement shall be the combined total for each use as outlined in this chapter or as otherwise determined by design review approval |
| Hazardous Materials Handling         | 1 per 1,000 sq. ft. Where other uses exceed 10% of the gross floor area (e.g., office, warehouse, etc.) the parking requirement shall be the combined total for each use as outlined in this chapter or as otherwise determined by design review approval |
| Light Manufacturing                  | 1 per 1,000 sq. ft. Where other uses exceed 10% of the gross floor area (e.g., office, warehouse, etc.) the parking requirement shall be the combined total for each use as outlined in this chapter or as otherwise determined by design review approval |
| Recycling, Scrap and Dismantling     |                                                                                                                                                                                                                                                           |
| Enclosed                             | 1 per 250 sq. ft. of office area, plus 1 per 10,000 sq. ft. of yard area                                                                                                                                                                                  |

| <b>INDUSTRIAL USE TYPES</b> | <b>NUMBER OF PARKING SPACES REQUIRED</b>                                                                                                                                                                                                                  |
|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Unenclosed                  |                                                                                                                                                                                                                                                           |
| Research Services           | 1 per 3,000 sq. ft., plus 1 per company vehicle                                                                                                                                                                                                           |
| Specialized Industrial      | As determined as part of the design review approval                                                                                                                                                                                                       |
| Wholesale and Distribution  |                                                                                                                                                                                                                                                           |
| Light                       | 1 per 1,000 sq. ft. Where other uses exceed 10% of the gross floor area (e.g., office, warehouse, etc.) the parking requirement shall be the combined total for each use as outlined in this chapter or as otherwise determined by design review approval |
| Heavy                       |                                                                                                                                                                                                                                                           |

6. Transportation and communication use types shall provide off-street parking spaces as follows:

| <b>TRANSPORTATION AND COMMUNICATION USE TYPES</b> | <b>NUMBER OF PARKING SPACES REQUIRED</b>               |
|---------------------------------------------------|--------------------------------------------------------|
| Antennas and Communications Facilities            |                                                        |
| Developed Lot                                     | None, see parking requirements for applicable use type |
| Undeveloped Lot                                   | 1 per full-time employee                               |
| Bus Depots                                        | As required by Chapter 19.36                           |
| Heliports                                         | As determined as part of the design review approval    |
| Intermodal Facilities                             | As determined as part of the design review approval    |

**B. Special Parking Requirements.** The number of parking spaces required for uses not specifically listed in subsection A shall be determined by the Planning Manager based on

common functional, product or compatibility characteristics and activities, as provided for in Section 19.08.050 (Classification of uses not specifically listed).

**1. Uses Not Listed.** The number of parking spaces required for uses not specifically listed in subsection A shall be determined by the Planning Manager based on common functional, product or compatibility characteristics and activities, as provided for in Section 19.08.050 (Classification of uses not specifically listed).

**2. New Buildings or Development Projects Without Known Tenants.** If the type of tenants that will occupy a non-residential building are not known at the time of the development entitlement or building permit approval, the amount of parking to be provided shall be:

The minimum number of parking spaces required by subsection A for any land use allowed on the site by the applicable zoning, provided that the Planning Manager determines the proposed building as designed can reasonably accommodate such use, and provided further a zoning clearance certification is obtained to authorize the use.

**3. Mixed Use Projects.** Where a project contains more than one major use classification (such as a residential and a commercial use), the amount of parking to be provided shall be the total of that required for each use, except as otherwise provided by subsection C (Adjustment to Number of Required Parking Spaces).

**4. Tenant Spaces with Multiple Functions.** When a tenant has several functions, such as sales and office, the amount of parking to be provided for the tenant shall be calculated as specified by subsection A for the primary use, using the gross floor area of the tenant space.

**5. Tenant Spaces with Accessory Storage.** When a tenant has enclosed accessory storage in excess of 2,000 square feet, the required parking for that portion of the tenant space dedicated to storage shall be calculated as specified by subsection (A)(5) for warehousing which is one parking space per 1,000 square feet of warehousing. The required parking for the remainder of the tenant space shall be calculated as specified in subsection A using the primary use.

**6. Changes in Use.** When an existing use is enlarged, increased or intensified, or a new use having greater parking requirements than the previous use is proposed, the required number of parking spaces for the new use or existing, enlarged, increased or intensified use shall be calculated as specified by subsection A.

**7. Rounding Off.** When the required number of parking spaces is other than a whole number, the total number of spaces shall be rounded to the nearest whole number (0.49 and below round down, 0.50 and above round up).

**8. Commercial Centers.** Commercial centers and building complexes shall provide parking which is the sum of all users within the commercial center or building complex as specified in subsection A, regardless of whether or not the parking is provided on a single or multiple parcels. Where parking is provided on multiple parcels, reciprocal parking and access agreements shall be recorded to provide equal use and access to parking for all users within the commercial center or building complex.

**9. Professional Office Uses.** Professional office projects shall calculate parking based on the net leasable square footage of the proposed office building(s). Net square footage shall be 90 percent of the total square footage of the proposed building(s). The net square

footage shall be determined at original building shell approval and subsequent tenant improvements shall not be granted any additional reduction for net square footage.

**C. Adjustment to Number of Required Parking Spaces.** The number of parking spaces required by subsection A may be reduced as follows:

**1. Specific Plan Provisions.** Provisions may be made in a specific plan to allow reductions in the number of required parking spaces based upon special provisions, such as providing golf cart or electric car parking where special provisions are made for golf carts or electric cars.

**2. Parking Reductions for Shared Parking.** If an applicant believes the number of parking spaces required for their building complex as specified in subsection A (which is the sum of all the users within the building complex) is not applicable because the hours of operation of different tenants/uses within the building complex will effectively allow for dual use of the parking spaces then the applicant may request an Administrative Permit. The Approving Authority shall be the Planning Manager. The applicant shall have the burden of proof for requesting a reduction in the total number of required off-street parking spaces, and documentation shall be submitted substantiating this request. Shared parking reductions shall only be approved by the Approving Authority if:

- a. A sufficient number of spaces are provided to meet the greatest parking demand of the participating uses;
- b. Satisfactory evidence is provided describing the nature of the uses and the times when the uses operate so as to demonstrate the lack of potential conflict between them;

- c. Overflow parking will not impact any adjacent use; and
- d. Additional documents, covenants, deed restrictions, or other agreements as may be deemed necessary by the Planning Manager are executed to assure that the required parking spaces provided are maintained and uses with similar hours and parking requirements as those uses sharing the parking facilities remain for the life of the project.

**3. Parking Reductions for an Individual Use.** If an applicant for a proposed use believes the number of parking spaces required for their use as specified in subsection A is not applicable because their use functions differently than the generic use type and associated parking standards established in this title, then the applicant may request an Administrative Permit. The Approving Authority shall be the Planning Manager. The applicant shall have the burden of proof for requesting a reduction in the total number of required off-street parking spaces, and documentation shall be submitted substantiating the request. Such documentation may include, but is not limited to: a parking study of another facility of the same use which is similar in size and operation, calculating the required parking spaces with field data of peak parking usage. Reduced parking shall only be approved by the Approving Authority if:

- a. Satisfactory evidence is provided describing the nature of the use, the operation and data from other facilities or similar facilities so as to demonstrate that the required parking standards are excessive and the proposed parking standards are appropriate; and
- b. Overflow parking will not impact any adjacent use.

**4. Parking Reductions for Eating and Drinking Establishments.** The Approving Authority for any application for a parking reduction by an eating and drinking establishment as defined in Section 19.08.090(L) shall be the Planning Commission.

**D. Downtown/Old Town Parking Requirements.** All principally permitted uses within the historic district (HD) and central business district (CBD) zone districts, with the exception of community assembly, colleges and universities, and new uses requiring and discretionary permit shall be permitted in the HD and CBD zone districts without the need to provide additional off-street parking.

Community assembly, college and university uses and new uses which require a discretionary permit, shall comply with the parking standards specified in subsection A, or request approval of a parking reduction or variance from the parking standards.

SECTION 5. Section 19.28.020 of Chapter 19.28 of Title 19 of the Roseville Municipal Code is hereby amended to read as follows:

**19.28.020 Definitions.**

For the purpose of this chapter, the following words and phrases shall have the following meanings:

**A.** “Approving authority” is as defined in the Roseville Municipal Code Title 19, Zoning Section 19.78.020.

**B.** “Child care facility” is defined as a child day care facility other than a family day care home, including, but not limited to, infant centers, preschools, extended day care facilities, and school-age child care centers.

**C.** “Density bonus” is defined as an increase in density over the otherwise maximum allowable residential density under the applicable general plan designation as of the date of filing of an application for density bonus with City or, if elected by the applicant, a lesser percentage of density increase. A density bonus request shall be considered as a component of a qualified housing development.

**D.** “Development standard” is defined as the site, development, or construction standards and/or conditions of approval that apply to a residential development, and includes (but is not limited to) a height limitation, a setback requirement, a floor area ratio, an onsite open space requirement, a minimum lot area per unit requirement, or a parking ratio.

**E.** “Housing development” is defined as a development project for five or more residential units, including mixed-use developments, constructed within a large lot parcel. For the purposes of this chapter, “housing development” also includes a subdivision or common interest development as defined in Section 4100 of the Civil Code and consists of residential units or unimproved residential lots. A density bonus shall be permitted in geographic areas of the housing development other than the areas where the affordable units are located, so long as the density bonus units are located on the same large lot parcel.

**F.** “Incentive” is defined as a reduction in site development standards or a modification of zoning code requirements or architectural design requirements that exceed the minimum building standards approved by the California Building Standards Commission. An incentive can be

requested by the applicant for purposes of reducing the cost of development to make the project financially feasible. The term “incentive” includes the term “concession” as that term is used in California Government Code Sections 65915 through 65918.

**G.** “Large lot parcel” is defined as that term is used in any applicable specific plan (large lot parcel is hereby generally deemed as a geographic area).

**H.** “Located within one-half mile of a major transit stop” means that any point on a proposed development, for which an applicant seeks a density bonus, other incentives or concessions, waivers or reductions of development standards, or a vehicular parking ratio pursuant to this chapter, is within one-half mile of any point on the property on which a major transit stop is located, including any parking lot owned by the transit authority or other local agency operating the major transit stop.

**I.** “Lower income” is defined as less than 80 percent of the area median income, as defined by Section 50079.5 of the California Health and Safety Code.

**J.** “Lower income unit” is defined as a unit with an affordable rent or payment that does not exceed 30 percent of 60 percent of area median income adjusted for family size appropriate for the unit.

**K.** “Major transit stop” is defined as a site containing any of the following: (1) an existing rail or bus rapid transit station; (2) a ferry terminal served by either a bus or rail transit service; or (3) the intersection of two or more major bus routes with a frequency of service interval of 15 minutes or less during the morning and afternoon peak commute periods.

L. “Maximum allowable residential density” or “base density” means the maximum number of units allowed under the zoning ordinance, specific plan, or land use element of the General Plan, or if a range of density is permitted, means the maximum number of units allowed by the specific zoning range, specific plan, or land use element of the General Plan applicable to the project. If the density allowed under the zoning ordinance is inconsistent with the density allowed under the land use element of the General Plan or specific plan, the greater shall prevail. Density shall be determined using dwelling units per acre. However, if the applicable zoning ordinance, specific plan, or land use element of the general plan does not provide a dwelling-units-per-acre standard for density, then the number of units shall be calculated by:

1. Estimating the realistic development capacity of the site based on the objective development standards applicable to the project, including, but not limited to, floor area ratio, site coverage, maximum building height and number of stories, building setbacks and stepbacks, public and private open space requirements, minimum percentage or square footage of any nonresidential component, and parking requirements, unless not required for the base project. Parking requirements shall include considerations regarding number of spaces, location, design, type, and circulation. A developer may provide a base density study and the City shall accept it, provided that it includes all applicable objective development standards.

2. Maintaining the same average unit size and other project details relevant to the base density study, excepting those that may be modified by waiver or concession to accommodate the bonus units, in the proposed project as in the study.

**LM.** “Moderate income” is defined as less than 120 percent of the area median income, as defined in Section 50093 of the California Health and Safety Code.

**MN.** “Moderate income unit” is defined as a unit with an affordable rent or payment that does not exceed 35 percent of 120 percent of area median income adjusted for family size appropriate for the unit.

**O.** “Shared housing building” means a residential or mixed-use structure, with five or more shared housing units and one or more common kitchens and dining areas designed for permanent residence of more than 30 days by its tenants. The kitchens and dining areas within the shared housing building shall be able to adequately accommodate all residents. If any section of this code further restricts the attributes of a shared housing building beyond the requirements established in this section, the code definition shall apply to the extent that it does not conflict with the requirements of this section.

**1.** A “shared housing building” may include other dwelling units that are not shared housing units, provided that those dwelling units do not occupy more than 25 percent of the floor area of the shared housing building. A shared housing building may include 100 percent shared housing units.

**2.** A “shared housing building” may include incidental commercial uses, provided that those commercial uses are otherwise allowable and are located only on the ground floor or the level of the shared housing building closest to the street or sidewalk of the shared housing building.

**P.** “Shared housing unit” means one or more habitable rooms, not within another dwelling unit, that includes a bathroom, sink, refrigerator, and microwave, is used for permanent

residence, that meets the “minimum room area” specified in Section R304 of the California Residential Code (Part 2.5 of Title 24 of the California Code of Regulations), as may be amended from time to time, and complies with the definition of “guestroom” in Section R202 of the California Residential Code, as may be amended from time to time. If a local ordinance further restricts the attributes of a shared housing building beyond the requirements established in this section, the local definition shall apply to the extent that it does not conflict with the requirements of this section.

**Q.** “Total units” or “total dwelling units” means a calculation of the number of units that:

1. Excludes a unit added by a density bonus awarded pursuant to this section or any local law granting a greater density bonus.

2. Includes a unit designated to satisfy an inclusionary zoning requirement.

For purposes of calculating a density bonus granted pursuant to this section for a shared housing building, “unit” means one shared housing unit and its pro rata share of associated common area facilities.

**NR.** “Unobstructed access to a major transit stop” means a resident is able to access the major transit stop without encountering natural or constructed impediments. “Natural or constructed impediments” includes, but is not limited to, freeways, rivers, mountains, and bodies of water, but does not include residential structures, shopping centers, parking lots, or rails used for transit.

**OS.** “Very low income” is defined as less than 50 percent of the area median income, as defined in Section 50105 of the California Health and Safety Code.

**P.T.** “Very low income unit” is defined as a unit with an affordable rent or payment that does not exceed 30 percent of 50 percent of the area median income, adjusted for family size appropriate for the unit.

**Q.U.** “Senior citizen housing development” is defined as a housing project where residency is restricted to persons 62 years of age or older, or 55 years of age or older in a senior citizen housing development per Section 51.3 of the California Civil Code.

SECTION 6. Section 19.28.040 of Chapter 19.28 of Title 19 of the Roseville Municipal Code is hereby amended to read as follows:

**19.28.040 Eligibility for bonus.**

A developer of a housing development containing five or more units may qualify for a density bonus and at least one other incentive as provided by this chapter if the developer does one of the following:

**A.** Agrees to construct and maintain at least five percent of the units for rental or sale dedicated to very low income households (includes a shared housing building development, in which case minimum unit size or bedroom requirements shall not conflict with the definition of “shared housing building”).

**B.** Agrees to construct and maintain at least 10 percent of the units for rental or sale dedicated to lower income households (includes a shared housing building development, in which case minimum unit size or bedroom requirements shall not conflict with the definition of “shared housing building”).

**C.** Agrees to construct and maintain at least 10 percent of the units of a housing development to be sold to moderate income households, provided that all units in the development are offered to the public for purchase;

**D.** Agrees to construct and maintain a senior citizen housing development ([“development” includes a shared housing building development](#)), as defined in Section 19.28.020 of this chapter, or a mobilehome park that limits residency based on age requirements for housing for older persons pursuant to Section 798.76 or 799.5 of the California Civil Code, as may be amended from time to time;

**E.** Donates land to the City dedicated for the construction of very low income units pursuant to Section 19.28.080 of this chapter;

**F.** Includes a qualifying child care facility as described in Section 19.28.070 of this chapter in addition to providing housing as described in subsections A through C of this section;

**G.** Agrees to construct and maintain at least 10 percent of the units of a housing development for transitional foster youth, as defined in Section 66025.9 of the California Education Code, as may be amended from time to time, disabled veterans, as defined in Section 18541 of the California Government Code, as may be amended from time to time, or homeless persons, as defined in the federal McKinney-Vento Homeless Assistance Act (42 U.S.C. Sec. 11301 et seq.), as may be amended from time to time, dedicated to very low income households;

**H.** Agrees to construct and maintain at least 20 percent of the units for lower income students in a student housing development pursuant to Section 19.28.085 of this chapter; or

I. Agrees to construct and maintain 100 percent of the units, including total units and density bonus units, but exclusive of a manager's unit or units, dedicated to lower income households, except that up to 20 percent of the units, including total units and density bonus units, may be dedicated to moderate income households [\(includes a shared housing building development\)](#).

SECTION 7. Section 19.60.030 of Chapter 19.60 of Title 19 of the Roseville Municipal Code is hereby amended to read as follows:

**19.60.030 Definitions.**

For the purposes of this chapter, the following words and phrases shall have the meanings respectively ascribed to them by this section. Words and phrases not defined in this section, shall have the meanings respectively ascribed to them in Chapter 19.95 (Definitions of Terms and Phrases).

A. "Accessory dwelling unit" shall be as defined by Government Code Section 65852.2, as it now exists or may hereafter be amended, and means an attached or a detached residential dwelling unit that provides complete independent living facilities for one or more persons. The unit shall be located on a permanent foundation or a permanent chassis if a manufactured home, have an independent exterior access (if located within a single-family dwelling unit), and shall include permanent provisions or infrastructure to support living, sleeping, eating, cooking, and sanitation on the same parcel as where a single-family, two-family or multi-family dwelling [\(including detached garages\)](#) is situated or proposed to be situated. Accessory dwelling units can also include efficiency units, as defined in Section 17958.1 of the Health and Safety Code,

manufactured homes, as defined in Section 18007 of the Health and Safety Code, second dwelling units, granny flats, in-law quarters, casitas, carriage units, and tiny houses as long as such units otherwise meet this definition.

**B.** “Accessory structure” means a structure that is accessory and incidental to a single-family, two-family or multi-family dwelling located on the same lot.

**C.** “Car share vehicle” means a vehicle that can be rented for short periods of time and is available 24-hours a day, seven days a week at unattended self-service locations.

**D.** “Existing structure,” for the purposes of defining an allowable space that can be converted to an accessory dwelling unit, means the following:

- 1.** The proposed accessory dwelling unit is located within the walls and roofline of a fully enclosed, existing structure (i.e., the existing footprint); and

- 2.** The existing structure can be made safely habitable under local building codes at the determination of the building official, regardless of any nonconforming zoning conditions.

**E.** “Junior accessory dwelling unit” shall be as defined by Government Code Section 65852.22, as it now exists or may hereafter be amended, and means a unit that is no more than 500 square feet in size and contained entirely within an existing or proposed single-family dwelling. A junior accessory dwelling unit may include separate sanitation facilities, or may share sanitation facilities with the existing structure.

**F.** “Living area” means the interior habitable area of a dwelling unit, including basements and attics, but does not include a garage or any accessory structure.

**G.** “Nonconforming zoning condition” means a physical improvement on a property that does not conform with current zoning standards.

**H.** “Passageway” means a pathway that is unobstructed clear to the sky and extends from a street to one entrance of the accessory dwelling unit.

**I.** “Permanent provisions or infrastructure,” in the context of the definition of an “accessory dwelling unit,” means a permanent kitchen consisting of a sink, a counter for food preparation, a food storage area, and either a minimum 220V receptacle or a dedicated gas line for a cooking appliance (a 110V receptacle for a microwave, toaster, hotplate, etc. is not a permanent provision); a toilet connected to plumbing; a bathroom sink connected to plumbing; and a bathing facility connected to plumbing, such as a shower or bathtub.

**J.** “Primary dwelling unit” means a proposed or existing single-family, two-family or multi-family dwelling unit located on the lot where the accessory dwelling unit is proposed to be developed, and includes attached, enclosed accessory structures, such as a garage.

**K.** “Proposed dwelling” means a dwelling that is the subject of a permit application and that meets the requirements for permitting.

**L.** “Public transit” means a location, including, but not limited to, a bus stop or train station, where the public may access buses, trains, subways, and other forms of transportation that charge set fares, run on fixed routes, and are available to the public.

**M.** “Tandem parking” means that two or more automobiles are parked on a driveway or in any other location on a lot, lined up behind one another.

N. “Within the existing space” includes areas within an existing primary dwelling unit or within an existing attached or detached accessory structure such as a garage, storage area, a carriage house, a pool house, studio, and similar enclosed structures. The addition of square footage, including, but not limited to, the addition of another floor, is not considered to be “within the existing space,” unless the expansion is for the purposes of ingress and egress and does not exceed 150 square feet. Additions of square footage which are not “within the existing space” are considered new construction.

SECTION 8. Section 19.60.060 of Chapter 19.60 of Title 19 of the Roseville Municipal Code is hereby amended to read as follows:

**19.60.060 Development standards for accessory dwelling units proposed within existing structures or existing living areas.**

Accessory dwelling units are permitted to be developed within existing structures or within the living area of an existing primary dwelling unit. Accessory dwelling units developed within existing structures or living areas shall be allowed only in compliance with the following standards:

A. **Setbacks.** No setback shall be required for an accessory dwelling unit, including porches, decks, balconies, stairs, and patios which are attached to and for the use of the accessory dwelling unit, built within the footprint and dimensions of an existing living area or existing structure. Garages are subject to the setbacks of Section 19.22.030 (Accessory structures).

**B. Floor Area.** The total floor area of an attached accessory dwelling unit developed within an existing primary dwelling unit shall not exceed the floor area of the existing primary dwelling unit, except that an expansion of up to 150 square feet beyond the same physical dimensions as the existing primary dwelling unit is permitted for accommodating ingress and egress. The total floor area for a detached accessory dwelling unit developed within an existing detached accessory structure shall not exceed the floor area of the existing detached accessory structure, except that an expansion of up to 150 square feet beyond the same physical dimensions as the existing detached accessory structure is permitted for accommodating ingress and egress. Expansions beyond 150 square feet must comply with the standards set forth in Section 19.60.070 (Development standards for accessory dwelling units proposed as new construction).

**C. Unit Sizes.**

1. An accessory dwelling unit shall not be less than the minimum size for an efficiency unit, as defined in Section 17958.1 of the Health and Safety Code, as it now exists or may hereafter be amended.
2. An accessory dwelling unit shall not be more than 850 square feet for a studio or one-bedroom or more than 1,000 square feet for an accessory dwelling unit that provides more than one bedroom.

**D. Minimum Facilities.** Accessory dwelling units developed within existing structures or living areas shall include permanent provisions for independent living, sleeping, eating, cooking, and sanitation within the unit and must include a separate exterior entrance from the primary dwelling unit if the primary dwelling is a single-family dwelling.

**E. Appearance.** The accessory dwelling unit shall be designed and constructed so as to be compatible with the existing primary dwelling unit and neighborhood in terms of height, form, and materials, as determined by the Planning Manager or designee applying objective standards, and the accessory dwelling unit shall be subordinate to the primary dwelling unit. Manufactured homes shall meet the architectural standards set forth in Section 19.10.030(E) (Residential zone general development standards).

**F. Parking Requirements.** Accessory dwelling units developed within existing structures or living areas shall not be required to provide parking. A garage, carport, or covered parking structure shall be subject to the development regulations of Section 19.22.030 (Accessory structures), if the owner chooses to provide parking as part of the accessory dwelling unit. In addition, when a garage, carport, or covered parking structure is converted to an accessory dwelling unit, the required off-street parking spaces for the primary dwelling unit, if eliminated, do not need to be replaced. If the property owner chooses to replace the parking spaces, the replacement spaces may be located in any configuration on the same lot as the accessory dwelling unit, including within the front yard or street side setback, and may be covered spaces subject to conformance with the applicable requirements set forth in Section 19.22.030(C)(2) (Permitted accessory structures to dwelling use type (single-family and two-family)) or Section 19.22.030(D)(3) (Permitted accessory structures to dwelling use type (multi-family)), uncovered spaces or tandem spaces. All replacement parking shall comply with the requirements set forth in Section 11.20.110 (Parking on private property prohibited), Section 19.10.030(F) (Residential zone general development standards), and Section 19.26.040(A) (Design and improvement of parking).

**G. Passageways.** No passageways shall be required in conjunction with accessory dwelling units developed within existing structures or living areas.

**H. Building and Fire Codes.** Except as otherwise provided in this chapter, accessory dwelling units developed within existing structures or living areas shall comply with all local building and fire codes. [A demolition permit for a detached garage that is to be replaced with an accessory dwelling unit must be reviewed with the application of the accessory dwelling unit and issued at the same time.](#)

**I. Fire Sprinklers.** Accessory dwelling units developed within existing structures or living areas shall not be required to provide fire sprinklers if fire sprinklers were not required for the primary dwelling unit.

**J. Utilities.** Accessory dwelling units developed within existing structures or living areas shall not be required to install a new or separate utility connection directly between the accessory dwelling unit and the public utility infrastructure, unless the accessory dwelling unit was constructed with a new single-family dwelling unit. However, if necessary utility infrastructure does not exist with capacity available to serve both the primary dwelling unit and the accessory dwelling unit, the property owner shall be responsible for all costs related to installation of necessary infrastructure or upsizing existing infrastructure. Property owners may install a new or separate utility connection directly between the accessory dwelling unit and the public utility infrastructure at the property owner's option and expense.

**K. Height.** An accessory dwelling unit shall not exceed the height limits prescribed in Section 19.10.030 (Residential zone general development standards) for the zone in which the

accessory dwelling unit will be located, or if not within a residential zone, the height shall not exceed the standards established in Section 19.10.030 for the single-family residential (R1) zone.

**L. Number Permitted.** Except as otherwise permitted by subsection M, only one accessory dwelling unit is permitted per lot.

**M. Exceptions to Development Standards.**

1. One accessory dwelling unit and one junior accessory dwelling unit is permitted per lot with a proposed or existing single-family dwelling if all of the following apply:

- a. The accessory dwelling unit or junior accessory dwelling unit is within the proposed space of a single-family dwelling unit or existing space of a single-family dwelling unit or accessory structure and may include an expansion of not more than 150 square feet beyond the same physical dimensions as the existing accessory structure. An expansion beyond the physical dimensions of the existing accessory structure shall be limited to accommodating ingress and egress.
- b. The space has exterior access from the proposed or existing single-family dwelling unit.
- c. The side and rear setbacks are sufficient for fire and safety.
- d. The junior accessory dwelling unit complies with the requirements of Government Code Section 65852.22, as it now exists or may hereafter be amended.

2. Multiple accessory dwelling units within portions of existing multi-family dwelling units are permitted in areas not used as livable spaces, including, but not limited to, storage

rooms, boiler rooms, passageways, attics, basements, or garages, if all of the following apply:

- a. Each unit complies with state building codes for dwellings.
  - b. At least one accessory dwelling unit is permitted within an existing multi-family dwelling or up to 25 percent of the existing multi-family dwelling units may be converted to accessory dwelling units, whichever is greater.
3. Two detached accessory dwelling units are permitted per lot that has an existing multi-family dwelling unit, subject to ~~a height limit of 16 feet and~~ four-foot rear and side setbacks and the following height standards:

a. A height of 16 feet for a detached accessory dwelling unit on a lot with an existing or proposed single family or multi-family dwelling unit.

b. A height of 18 feet for a detached accessory dwelling unit on a lot with an existing or proposed single family or multi-family dwelling unit that is within ½-mile of a major transit stop or a high-quality transit corridor, as those terms are defined in Section 21155 of the Public Resources Code, as may be amended from time to time. An additional two feet in height is also permitted when the height is to accommodate a roof pitch on the accessory dwelling unit that is aligned with the roof pitch of the primary dwelling unit.

c. A height of 18 feet for a detached accessory dwelling unit on a lot with an existing or proposed multi-family, multistory dwelling.

d. A height of 25 feet or the height limitation in this code that applies to the primary dwelling, whichever is lower, for an accessory dwelling unit that is attached to a primary dwelling. This clause shall not require City to allow an accessory dwelling unit to exceed two stories.

N. **Waivers.** Notwithstanding anything to the contrary contained in this title, limits on height, setbacks, lot coverage, floor area ratio, open space, front setbacks, and lot sizes are hereby waived if they do not permit at least an 800 square foot accessory dwelling unit ~~that is at least 16 feet in height, and~~ which provides four-foot rear and side setbacks and meets the following height standards:-

1. A height of 16 feet for a detached accessory dwelling unit on a lot with an existing or proposed single family or multi-family dwelling unit.

2. A height of 18 feet for a detached accessory dwelling unit on a lot with an existing or proposed single family or multi-family dwelling unit that is within ½-mile of a major transit stop or a high-quality transit corridor, as those terms are defined in Section 21155 of the Public Resources Code, as may be amended from time to time. An additional two feet in height is also permitted when the height is to accommodate a roof pitch on the accessory dwelling unit that is aligned with the roof pitch of the primary dwelling unit.

3. A height of 18 feet for a detached accessory dwelling unit on a lot with an existing or proposed multi-family, multistory dwelling.

4. A height of 25 feet or the height limitation in the this code that applies to the primary dwelling, whichever is lower, for an accessory dwelling unit that is attached to a primary

dwelling. This clause shall not require City to allow an accessory dwelling unit to exceed two stories.

**SECTION 9.** Section 19.60.070 of Chapter 19.60 of Title 19 of the Roseville Municipal Code is hereby amended to read as follows:

**19.60.070 Development standards for accessory dwelling units proposed as new construction.**

Newly constructed accessory dwelling units are permitted to be attached to a proposed or existing primary dwelling unit or detached from a proposed or existing primary dwelling unit as long as the newly constructed accessory dwelling unit is located on the same lot as a proposed or existing primary dwelling unit. Newly constructed accessory dwelling units shall be allowed only in compliance with the following standards:

- A. Minimum Lot Area.** There is no minimum lot area.
- B. Maximum Lot Coverage.** There is no maximum lot coverage.
- C. Setbacks.** No setback shall be required for an accessory dwelling unit constructed in the same location (i.e., footprint) and to the same dimensions as an existing accessory structure. A setback of four feet from the side and rear lot lines shall be required for an accessory dwelling unit that is otherwise newly constructed, including porches, decks, balconies, stairs, and patios which are attached to and for the use of the accessory dwelling unit.

**D. Floor Area.** The total floor area of an attached accessory dwelling unit shall not be less than 150 square feet nor exceed the standards of subsection E (Unit sizes). The total floor area for a detached accessory dwelling unit shall not be less than 150 square feet nor exceed the standards of subsection E (Unit sizes).

**E. Unit Sizes.**

1. An accessory dwelling unit shall not be less than the minimum size for an efficiency unit, as defined in Section 17958.1 of the Health and Safety Code, as it now exists or may hereafter be amended.

2. An accessory dwelling unit shall not be more than 850 square feet for a studio or one-bedroom or more than 1,000 square feet for an accessory dwelling unit that provides more than one bedroom.

**F. Minimum Facilities.** The accessory dwelling unit shall include permanent provisions for independent living, sleeping, eating, cooking, and sanitation within the unit and must include a separate exterior entrance from the primary dwelling unit if the primary dwelling is a single-family dwelling.

**G. Appearance.** The accessory dwelling unit shall be designed and constructed so as to be compatible with the proposed or existing primary dwelling unit and neighborhood in terms of height, form, and materials, as determined by the Planning Manager or designee applying objective standards, and the accessory dwelling unit shall be subordinate to the primary dwelling unit. Manufactured homes shall meet the architectural standards set forth in Section 19.10.030(E) (Residential zone general development standards).

**H. Parking Requirements.** Except as otherwise provided by this chapter, the parking required by this section is in addition to that required for the primary dwelling unit located on the lot by Chapter 19.26 (Off-Street Parking and Loading). Garages, carports, and covered parking structures attached to the accessory dwelling unit and built to satisfy the required parking standards for the accessory dwelling unit are subject to the same setbacks and other development regulations as the accessory dwelling unit.

1. Accessory dwelling units with one or more bedrooms shall provide at least one off-street parking space. Studios shall not be required to provide any parking spaces. The parking requirement for accessory dwelling units with bedrooms can be met by providing the required parking space within the front yard setback and may be located in tandem with other on-site parking as long as it complies with the requirements set forth in Section 11.20.110 (Parking on private property prohibited), Section 19.10.030(F) (Residential zone general development standards), and Section 19.26.040(A) (Design and improvement of parking).

2. When a garage, carport, or covered parking structure is demolished in conjunction with the construction of an accessory dwelling unit, the required off-street parking spaces for the primary dwelling unit, if eliminated, do not need to be replaced. If the property owner chooses to replace these parking spaces, the replacement spaces may be located in any configuration on the same lot as the accessory dwelling unit, including within the front yard or street side setback, and may be covered spaces subject to conformance with the applicable requirements set forth in Section 19.22.030(C)(2) (Permitted accessory structures to dwelling use type (single-family and two-family)) or Section 19.22.030(D)(3) (Permitted accessory structures to dwelling use type (multi-family)), uncovered spaces or tandem

spaces. All replacement parking shall comply with the requirements set forth in Section 11.20.110 (Parking on private property prohibited), Section 19.10.030(F) (Residential zone general development standards), and Section 19.26.040(A) (Design and improvement of parking).

**3.** Notwithstanding the above, accessory dwelling units shall not be required to provide parking in any of the following circumstances:

- a. When the accessory dwelling unit is located within one-half mile walking distance of public transit.
- b. When the accessory dwelling unit is located within the Old Town Historic District (DT-4) or the Central Business District (DT-6).
- c. When the accessory dwelling unit is part of an existing or proposed primary dwelling unit or an existing accessory structure.
- d. When on-street parking permits are required but not offered to the occupant of the accessory dwelling unit.
- e. When there is a car share vehicle located within one block of the accessory dwelling unit.

[f. When a permit application for an accessory dwelling unit is submitted with a permit application to create a new single-family or multi-family dwelling.](#)

**I. Passageways.** No passageways shall be required in conjunction with the construction of an accessory dwelling unit.

**J. Building and Fire Codes.** Except as otherwise provided in this chapter, newly constructed accessory dwelling units shall comply with all local building and fire codes.

**K. Fire Sprinklers.** Accessory dwelling units shall not be required to provide fire sprinklers if fire sprinklers were not required for the primary dwelling unit.

**L. Utilities.** New or separate utility connections directly between the accessory dwelling unit and the public utility infrastructure shall only be required if directed by the environmental utilities department or the electric department. In such cases, if necessary utility infrastructure does not exist with capacity available to serve both the primary dwelling unit and the accessory dwelling unit, the property owner shall be responsible for all costs related to installation of necessary infrastructure or upsizing existing infrastructure.

**M. Height.** An accessory dwelling unit shall not exceed the height limits prescribed in Section 19.10.030 (Residential zone general development standards) for the zone in which the accessory dwelling unit will be located, or if not within a residential zone, the height shall not exceed the standards established in Section 19.10.030 for the single-family residential (R1) zone.

**N. Number Permitted.** Except as otherwise permitted by subsection O, only one accessory dwelling unit is permitted per lot.

**O. Exceptions to Development Standards.**

1. One newly constructed detached accessory dwelling unit that does not exceed four-foot rear and side setbacks, which may be combined with one junior accessory dwelling unit, is permitted per lot if all of the following apply:

- a. The total floor area for the newly constructed detached accessory dwelling unit shall not exceed 800 square feet.
- b. The newly constructed detached accessory dwelling unit shall not exceed ~~16 feet in height~~the following height standards:
- i. A height of 16 feet for a detached accessory dwelling unit on a lot with an existing or proposed single family or multi-family dwelling unit.
  - ii. A height of 18 feet for a detached accessory dwelling unit on a lot with an existing or proposed single family or multi-family dwelling unit that is within ½-mile of a major transit stop or a high-quality transit corridor, as those terms are defined in Section 21155 of the Public Resources Code, as may be amended from time to time. An additional two feet in height is also permitted when the height is to accommodate a roof pitch on the accessory dwelling unit that is aligned with the roof pitch of the primary dwelling unit.
  - iii. A height of 18 feet for a detached accessory dwelling unit on a lot with an existing or proposed multi-family, multistory dwelling.
  - iv. A height of 25 feet or the height limitation in this code that applies to the primary dwelling, whichever is lower, for an accessory dwelling unit that is attached to a primary dwelling. This clause shall not require City to allow an accessory dwelling unit to exceed two stories.

2. Two newly constructed detached accessory dwelling units are permitted per lot that has an existing multi-family dwelling unit, subject to ~~a height limit of 16 feet and~~ four-foot rear and side setbacks- and the following height standards:

a. A height of 16 feet for a detached accessory dwelling unit on a lot with an existing or proposed single family or multi-family dwelling unit.

b. A height of 18 feet for a detached accessory dwelling unit on a lot with an existing or proposed single family or multi-family dwelling unit that is within ½-mile of a major transit stop or a high-quality transit corridor, as those terms are defined in Section 21155 of the Public Resources Code, as may be amended from time to time. An additional two feet in height is also permitted when the height is to accommodate a roof pitch on the accessory dwelling unit that is aligned with the roof pitch of the primary dwelling unit.

c. A height of 18 feet for a detached accessory dwelling unit on a lot with an existing or proposed multi-family, multistory dwelling.

d. A height of 25 feet or the height limitation in this code that applies to the primary dwelling, whichever is lower, for an accessory dwelling unit that is attached to a primary dwelling. This clause shall not require City to allow an accessory dwelling unit to exceed two stories.

**P. Waivers.** Notwithstanding anything to the contrary contained in this title, limits on height, setbacks, lot coverage, floor area ratio, open space, front setbacks, and lot sizes are hereby waived if they do not permit at least an 800 square foot accessory dwelling unit ~~that is at least 16-~~

~~feet in height, and~~ which provides four-foot rear and side setbacks: and meets the following height standards:

1. A height of 16 feet for a detached accessory dwelling unit on a lot with an existing or proposed single family or multi-family dwelling unit.
2. A height of 18 feet for a detached accessory dwelling unit on a lot with an existing or proposed single family or multi-family dwelling unit that is within ½-mile of a major transit stop or a high-quality transit corridor, as those terms are defined in Section 21155 of the Public Resources Code, as may be amended from time to time. An additional two feet in height is also permitted when the height is to accommodate a roof pitch on the accessory dwelling unit that is aligned with the roof pitch of the primary dwelling unit.
3. A height of 18 feet for a detached accessory dwelling unit on a lot with an existing or proposed multi-family, multistory dwelling.
4. A height of 25 feet or the height limitation in this code that applies to the primary dwelling, whichever is lower, for an accessory dwelling unit that is attached to a primary dwelling. This clause shall not require City to allow an accessory dwelling unit to exceed two stories.

SECTION 10. Section 19.60.120 of Chapter 19.60 of Title 19 of the Roseville Municipal Code is hereby amended to read as follows:

**19.60.120 Junior accessory dwelling units.**

**A.** Junior accessory dwelling units are principally permitted within areas zoned to allow single-family residential use and must be located on a lot that contains an existing or proposed single-family dwelling unit as defined in Section 19.08.080(F)(2) (Residential use types).

**B.** Junior accessory dwelling units are subject to the following conditions:

- 1.** Only one junior accessory dwelling unit is permitted per residential lot.
- 2.** A junior accessory dwelling unit shall not exceed 500 square feet.
- 3.** The property owner shall occupy the single-family dwelling unit in which the junior accessory dwelling unit will be permitted. The property owner may reside in either the remaining portion of the single-family dwelling unit or the newly created junior accessory dwelling unit. Owner-occupancy shall not be required if the owner is a governmental agency, land trust, or housing organization.
- 4.** Following final inspection approval of a building permit for a junior accessory dwelling unit, a deed restriction, in a form approved by the City Attorney, shall be recorded with the Placer County Recorder's office, which shall include the applicable restrictions and limitations of a junior accessory dwelling unit identified in this chapter. Said deed restriction shall run with the land, and shall be binding upon any future owners, heirs, or assigns. A copy of the recorded deed restriction shall be filed with the City stating that:
  - a.** The junior accessory dwelling unit shall not be sold separately from the single-family dwelling unit.

- b. The junior accessory dwelling unit is restricted to the development standards, including maximum size, identified in this chapter.
  - c. The junior accessory dwelling unit shall be considered legal only so long as either the single-family dwelling unit, or the junior accessory dwelling unit, is occupied by the owner of record of the property.
  - d. The restrictions shall be binding upon any successor in ownership of the property and lack of compliance with this provision may result in legal action against the property owner, including revocation of any right to maintain a junior accessory dwelling unit on the property.
5. The junior accessory dwelling unit shall be constructed within the walls of the proposed or existing single-family dwelling unit, including attached garages.
6. The junior accessory dwelling shall include a separate entrance from the main entrance to the proposed or existing single-family dwelling unit, and if the junior accessory dwelling unit does not include a separate bathroom, the junior accessory dwelling unit shall also include an interior entry into the main living area.
7. The permitted junior accessory dwelling unit must include an efficiency kitchen, which shall include at a minimum all of the following:
- a. A cooking facility with appliances.
  - b. A food preparation counter and storage cabinets that are of reasonable size in relation to the size of the junior accessory dwelling unit.

8. Junior accessory dwelling units shall comply with all local building and fire codes applicable to the existing single-family dwelling unit except that fire sprinklers shall not be required if fire sprinklers were not required for the single-family dwelling unit.

9. Junior accessory dwelling units may be rented as long as the rental term exceeds 30 calendar days. Accordingly, short-term rental permits authorized pursuant to Chapter 4.25 (Short-Term Rentals) will not be issued for junior accessory dwelling units.

10. Junior accessory dwelling units shall not be required to provide parking nor be required to provide replacement parking if constructed within an attached garage.

11. Junior accessory dwelling units shall comply with all other applicable requirements set forth in this chapter.

C. Junior accessory dwelling units shall not be required to provide parking.

SECTION 11. Section 19.74.010 of Chapter 19.74 of Title 19 of the Roseville Municipal Code is hereby amended to read as follows:

**19.74.010 Permit requirements.**

In addition to any other approval required by this Code or by applicable law, the following discretionary approvals may be required:

A. **Administrative Permit (AP).** An Administrative Permit shall be obtained pursuant to this title prior to initiation of certain activities or construction of improvements which are permitted pursuant to Articles II, III and IV of this title and only upon compliance with specific standards

as specified in this title. The approving authority for Administrative Permits shall be the Planning Manager as outlined in Section 19.78.020 (and following public notice, the Planning Manager may waive the requirement for a public hearing). If a public hearing is requested, the Planning Manager shall schedule and notice the permit for public hearing by the Planning Commission except as otherwise specified by this title.

**B. Conditional Use Permit (CUP).** A Conditional Use Permit shall be obtained prior to initiation, modification or expansion of a use pursuant to Article II and III, and upon compliance with specific standards, as applicable, of Article IV of this title. The approving authority for Conditional Use Permits shall be the Planning Commission as outlined in Section 19.78.020.

**C. Design Review Permit, Minor (MDRP).** A Minor Design Review Permit shall be obtained prior to the issuance of a building permit for minor improvements to multi-family residential and nonresidential developments, including, but not limited to, the following types of projects:

1. Minor façade improvements including color changes and/or the introduction of a new exterior building material, provided these are consistent with the Community Design Guidelines and/or the applicable specific plan design guidelines;
2. A project within the Downtown Specific Plan area which is consistent with the design guidelines and regulations outlined within the Downtown Code; and
3. Other minor alterations, enlargements or remodels to existing buildings, structures and/or improvements which are: (a) compatible with and in substantial conformance with the existing development and/or the previously approved permit; (b) do not create the need

for new parking nor affect existing required parking; and (c) meet all the requirements of this title and the Community Design Guidelines.

With the exception of projects involving a significant building, a MDRP is not required for: a single family residence or a two family residence; repair and maintenance including repainting and replacement with same colors and materials; or for projects listed in Section 19.72.020 that are issued a Zoning Clearance Certificate. The approving authority for Minor Design Review Permits is the Planning Manager, as outlined in Section 19.78.020.

If in the opinion of the Planning Manager, a project is not in substantial conformance with applicable adopted design guidelines or prior conditions of approval, or if the Planning Manager determines that, because of location, size or design that the public hearing should not be waived, the Planning Manager may require the project be processed as a modification to the original design review permit, as outlined in subsection (I) below.

**D. Design Review Permit (DRP).** A Design Review Permit shall be obtained prior to the issuance of a building permit or improvement plan for the following types of multi-family and nonresidential projects:

1. New construction of multi-family residential, commercial and industrial projects;
2. Significant site, circulation, and parking modifications which in the opinion of the Planning Manager, significantly differs from the project originally approved by the approving authority, and which the Planning Manager determines will not be processed through a Modification;

3. Demolition of a significant building as defined in Chapter 19.61 of this title, and as otherwise required by this title;
4. Projects which deviate from the requirements or standards of adopted Community Design Guidelines or an applicable, adopted specific plan;
5. Any other improvements subject to design review as designated by resolution of the City Council from time to time; and
6. Any other improvements subject to design review that the Planning Manager determines, based on the project size, complexity, significant changes or other factors, shall be processed through a Design Review Permit.

With the exception of projects involving a significant building, a Design Review Permit is not required; for a single-family residence or a two family residence; repair and maintenance including repainting and replacement with same colors and materials of multi-family residential or nonresidential buildings; for projects processed through a Major Project Permit as outlined in Chapter 19.82; for projects processed through a Design Review Permit for Residential Subdivision (DRRS) identified in subsection E; or for qualified affordable housing projects, as defined in Section 19.95.030(Q)(1), where the applicant has elected to process their qualified project using the City's Objective Design Standards through the ministerial building permit process in lieu of the City's discretionary Design Review Permit process. The approving authority for a Design Review Permit is the Design Committee, as outlined in Section 19.78.020, unless the Design Review Permit is being processed in conjunction with any permit where Chapter 19.74 identifies the Planning Commission as the approving authority.

**E. Design Review Permit for Residential Subdivisions (DRRS).** A Design Review Permit for Residential Subdivisions shall be obtained when required in Article II concurrent or following processing an application for a tentative residential subdivision map. The approving authority for design review for residential subdivisions is the Planning Commission when processed concurrently with a tentative residential subdivision map, and is the Planning Manager when processed subsequent to approval of a tentative residential subdivision map. If, in the opinion of the Planning Manager, a Design Review Permit for Residential Subdivision is not consistent with the goals and intent of the compact residential component of the Community Design Guidelines, the Planning Manager may refer the application to the ~~Design Committee for an advisory recommendation to be considered by the~~ Planning Commission.

**F. Extension (EXT).** An extension shall be obtained pursuant to the requirements of Section 19.76.210. The approving authority for extensions shall be the Planning Manager, unless the Planning Manager determines that a public hearing is required. The Planning Commission shall be the approving authority for all other extensions requiring a public hearing.

**G. Flood Encroachment Permit (FEP).** A flood encroachment permit shall be obtained prior to commencement of any use or activity, as listed in Chapter 19.18, within the floodway or floodway fringe zone. The approving authority for a flood encroachment permit shall be the Planning Commission.

**H. Major Project Permit (MPP).** A major project permit shall be obtained pursuant to Chapter 19.82, prior to initiation of construction on a project as defined in Section 19.82.020. The approving authority for each stage of a major project permit shall be as indicated in Chapter 19.82.

**I. Modification (MOD).** A modification shall be obtained pursuant to the requirements of Section 19.76.180. The approving authority for modifications shall be the Planning Manager, unless the Planning Manager determines that a public hearing is required. If a public hearing is required for a modification, refer to the table in Section 19.78.020 for the approving authority of the original entitlement.

**J. Tree Permit (TP).** A Tree Permit shall be obtained, pursuant to Chapter 19.66 prior to conducting any regulated activity within the protected zone of a native oak tree or the removal of a native oak tree. The approving authority for Tree Permits shall be the Planning Commission, unless the Tree Permit is processed in conjunction with a permit reviewed by the Design Committee (DC) in which case the approving authority shall be the DC.

**K. Tree Permit, Administrative (ATP).** An Administrative Tree Permit shall be obtained, pursuant to Chapter 19.66 prior to conducting any regulated activity within the protected zone of a native oak tree or the removal of a native oak tree, pursuant to Section 19.66.030. The approving authority for Administrative Tree Permits shall be the Planning Manager, unless the Administrative Tree Permit is processed in conjunction with another permit or variance under this title, in which case the approving authority shall be the approving authority for the other permit or variance.

**SECTION 12.** Section 19.82.010 of Chapter 19.82 of Title 19 of the Roseville Municipal Code is hereby amended to read as follows:

**19.82.010 Purpose.**

This chapter provides for staged approval of major projects. This allows for the [comprehensive review and](#) resolution of site development issues early in the City’s review and approval process for major projects, [and provides streamlining for projects which implement the major project permit](#). The level of required project information detail increases as each stage of approvals/entitlements are granted. [It is understood that implementing projects may need to modify the design approved via the major project permit, and the intent of this section is to establish a tiered modification process that grants streamlining to minor or less intensive changes.](#)

**SECTION 13.** Section 19.82.040 of Chapter 19.82 of Title 19 of the Roseville Municipal Code is hereby amended to read as follows:

**19.82.040 Amendments to an approved major project [permit](#).**

A. **[Letter of Approval.](#)** ~~A minor modification to an approved major project shall be limited to changes which~~ If a request for revision or amendment to the approved major project [permit](#) is found to be ~~minor~~ [consistent with the below requirements](#) by the Planning Manager and the Planning Manager finds that the revision requested is otherwise ~~found~~ consistent with the major project [permit](#) approvals and certified environmental document, the Planning Manager shall issue a letter of approval. [A letter of approval will be issued for modifications to an approved major project permit if the proposed modification:](#)

1. [Does](#) not substantially increase the total project square footage. [Building locations may be altered if, in the professional judgement of the Planning Manager, the change is](#)

found not to negatively affect site circulation, driveway locations, access for public safety vehicles, or to cause other inconsistencies with design standards which cause negative effects~~or dramatically alter the location of buildings;~~

2. ~~Are~~Is substantially consistent with the intent of the original approval and conditions;

3. Does not change the finding(s) upon which the approval was based; and

4. Does not have a substantial or significant effect on the property rights of adjacent landowners; or

5. Is a ~~Other minor~~ modification ~~as determined found by the Planning Manager~~which does not negatively affect site circulation, driveway locations, or access for public safety vehicles, and is not otherwise inconsistent with design standards in a manner which would cause negative effects, as determined by the Planning Manager.

B. Major Project Permit, Minor Modification (Administrative). ~~If a~~A request for revision or amendment to an approved major project permit ~~is~~ not found to be ~~minor~~consistent with the findings for a letter of approval, as noted above in Section A, but which meets one or more of the below findings is considered minor~~the request may be approved through the Administrative Permit process~~. The Planning Manager may approve, conditionally approve, or deny a minor modification to a major project permit ~~modification pursuant to the Type A notification procedures of Section 19.78.020~~, provided the ~~improvement~~project complies with one or ~~all~~more of the following:

1. The improvement meets the intent of the original approval, conditions of approval and environmental document;

2. The improvement is limited to façade, landscaping or parking lot improvements;
3. The improvements consists of color changes;
4. The improvement consists of a modification to or the introduction of a new exterior building material; and/or
5. The improvement meets all the requirements of this title and the Community Design Guidelines and is minor in nature as determined by the Planning Manager.

C. Major Project Permit, Modification (Public Hearing Required). All other requests for revision or amendment to the approved major project permit shall be reviewed in the same manner as required for the initial approval of that stage of the project. The Planning Manager's determination whether a revision or amendment is minor shall be final.

SECTION 14. This ordinance shall be effective at the expiration of thirty (30) days from the date of adoption.

SECTION 15. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

ORDINANCE NO. \_\_\_\_

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE AMENDING SECTION  
17.04.090 OF CHAPTER 17.04, AND AMENDING SECTION 17.08.510 OF CHAPTER 17.08  
OF TITLE 17 OF THE ROSEVILLE MUNICIPAL CODE REGARDING SIGNS

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. Section 17.04.090 of Chapter 17.04 of Title 17 of the Roseville Municipal  
Code is hereby amended to read as follows:

**17.04.090 Building façade.**

“Building façade” means the exterior elevation of a building or individual use (whichever  
is applicable) which has the primary entrance for such building or use. [For the purpose of sign  
regulations limiting sign length, the length of the building façade or tenant space means the  
length of a single, uninterrupted wall plane occupied by the tenant \(see illustrative example  
below\).](#)

SECTION 2. Section 17.08.510 of Chapter 17.08 of Title 17 of the Roseville Municipal Code is hereby amended to read as follows:

**17.08.510 Appeals from the decision of the director.**

If a person is aggrieved by a decision of the director made pursuant to this title, a person may, within 10 calendar days of such decision, appeal the decision to the design committee upon the filing of a written appeal with the city clerk and the payment of a non-refundable fee as established by city council resolution. The ~~city council~~ design committee shall thereafter hold a public hearing regarding the appeal.

SECTION 3. This ordinance shall be effective at the expiration of thirty (30) days from the date of adoption.

SECTION 4. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general

circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

## COUNCIL COMMUNICATION

CC #: 2676  
File #: 0320-01

**Title:** 2023 Weed Abatement - Public Hearing  
**Contact:** Jason Rizzi 916-774-5802 jrizzi@roseville.ca.us

**Meeting Date:** 5/3/2023  
**Item #:** 10.3.

### RECOMMENDATION TO COUNCIL

To initiate the 2023 Weed Abatement Program, staff recommends that the City Council adopt a resolution overruling all objections to the proposed abatement of all weeds, rubbish, dirt and/or rank growth, as well as ordering the Fire Chief to abate, or cause to be abated, the subject nuisances within the City of Roseville in accordance with the law.

### BACKGROUND

On April 19, 2023, the City Council approved Resolution No. 23-138 declaring all weeds, rubbish, dirt and/or rank growths a public nuisance. It also set the date, time and place for the required public hearing. The attached resolution is the second and final step necessary to initiate the 2023 Weed Abatement Program.

### FISCAL IMPACT

Owners of private parcels that are abated by the City are responsible for the costs associated with providing abatement services. A bill is sent to each property owner detailing the abatement costs, as well as an administrative fee. If the property owner fails to pay the bill, the City places a lien on the subject property and the monies owed are reimbursed through the property tax collection process.

### ENVIRONMENTAL REVIEW

The Weed Abatement Program involves minor alteration in the condition of the land, water, and or vegetation which will not remove healthy, mature scenic trees. This activity is categorically exempt from CEQA as a Class 4 Exemption (State CEQA Guidelines Section 15304). The Exemption has been prepared and no further CEQA action is required.

### CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal C - Maintain a safe and healthy community.

Respectfully Submitted,

Jason Rizzi, Assistant Fire Chief

Rick Bartee, Fire Chief

---

Dominick Casey, City Manager

RESOLUTION NO. 23-141

ORDERING THE DESTRUCTION OR REMOVAL OF ALL WEEDS, DIRT, RUBBISH AND  
RANK GROWTHS IN THE CITY OF ROSEVILLE, AND OVERRULING ANY AND ALL  
OBJECTIONS THERETO

WHEREAS, on April 19, 2023, the Council of the City of Roseville, adopted Resolution No. 23-138 declaring all weeds, dirt, rubbish and rank growths within the City of Roseville to be a public nuisance and setting a time and place for hearing any objections to the proposed destruction or removal of such weeds, dirt, rubbish and rank growths; and

WHEREAS, said public hearing was held on May 3, 2023, at which time all property owners having objections to the proposed abatement of the nuisance were given an opportunity to be heard;

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Roseville as follows:

1. Any and all objections to the proposed abatement of the nuisance in Resolution No. 23-138 adopted April 19, 2023, are hereby overruled.
2. The Fire Chief is hereby ordered to abate, or cause to be abated, the nuisance by having all weeds, dirt, rubbish and rank growths within the City of Roseville removed in accordance with the law.

PASSED AND ADOPTED by the Council of the City of Roseville this \_\_\_\_\_ day of \_\_\_\_\_, 2023, by the following vote on roll call:

June 1, 2023

#### NOTICE TO ABATE FIRE HAZARD

*This letter is intended for parcels that are undeveloped.*

***If the property has been developed or sold, please disregard the following and complete the information on the following page(s) and return it to the Roseville Fire Department, 316 Vernon Street, Suite 480, Roseville, CA 95678.***

*This letter is to notify you that a fire hazard may exist on the undeveloped parcel(s) listed on the following page(s). The law requires that all cut or uncut weeds, grass, vines, vegetation, or other combustible materials be removed when determined to be a fire hazard. Roseville Fire Code (RFC) 304.1.3; H&S Code, Division 12, Part 5.*

*If applicable, all necessary work shall be completed no later than **July 1, 2023**. If the property owner does not comply with this notice, the required firebreaks will be made by the City of Roseville. All costs incurred by the City, including a **\$356.00** per parcel administration fee, shall be billed directly to the property owner.*

#### WEED ABATEMENT GUIDELINES

*A clear firebreak of a minimum 30-foot width shall be created and maintained in all areas designated by the City of Roseville. Clear firebreaks shall be provided around all combustible buildings, fences, vehicles, structures, or storage on this parcel or on adjacent properties. We ask that you adhere to the following abatement requirements:*

- 1. The preferred method of weed abatement shall be accomplished by discing and completed so that all weeds, grass, other vegetation or organic material which can be expected to burn are completely removed or turned under so there is insufficient fuel to sustain or allow the spread of fire.*
  - Discing does not negate the requirement for weed removal up to the structure.*
- 2. Where discing is not practical, mowing is permitted where the material is mulched and the remaining weeds do not exceed two inches in height.*
- 3. Spark arrestors shall be installed on all outdoor equipment with internal combustion engines.*
- 4. Parcels that are one acre or less shall be completely abated.*

*Prior to abating weeds, seasonal rains should be considered. Late rains will produce late growing weeds. Weeds once mowed, may require additional mowing. The weed abatement program's intent is to reduce the fire hazard during fire season.*

Notice to Abate Fire Hazard

## COUNCIL COMMUNICATION

**CC #: 2686**  
**File #: 0800-02**

**Title:** Water, Wastewater, and Waste Services - Proposed Utility Rate Adjustments and Municipal Code Revisions for Fiscal Year 2023-24 and Fiscal Year 2024-25  
**Contact:** Devin Whittington 916-774-5783 dwhittington@roseville.ca.us

**Meeting Date: 5/3/2023**  
**Item #: 10.4.**

### RECOMMENDATION TO COUNCIL

Staff recommends that City Council:

1. Conduct the scheduled public hearing to receive public comment and respond to questions regarding the proposed adjustments to water, wastewater, and waste services utility rates; and
2. Introduce for first reading an ordinance amending Roseville Municipal Code sections pertaining to water (14.08.090, 14.08.100) and wastewater (14.16.200, 4.17.080) utility rates to implement the adjustments and add modifications for clarity and consistency as shown in Attachment A1; and
3. Introduce for first reading an ordinance amending Roseville Municipal Code sections pertaining to waste services (9.12.030, 9.12.070, 9.12.090, 9.17.040) utility rates to implement the adjustments and add modifications for clarity and consistency as shown in Attachment A2; and
4. Adopt the utility rate adjustments as presented. The proposed changes would result in the following:
  - Beginning July 1, 2023, the estimated monthly rate adjustment for a typical residential customer will be:
    - Water: \$2.10
    - Wastewater: \$2.86
    - Waste Services: \$0.00
  - Beginning July 1, 2023, the estimated monthly rate adjustment for a typical residential customer will be:
    - Water \$2.17
    - Wastewater: \$3.03
    - Waste Services: \$0.00

A typical residential customer uses an average of 1,400 cubic feet of water per month, has a flat wastewater rate, a single 90-gallon garbage container, and a single 90-gallon green waste container.

## **BACKGROUND**

Based on City Council direction since 2005, small and incremental rate adjustments for water, wastewater, and waste services utilities are preferred over larger, longer-term adjustments. This biennial rate analysis was conducted in accordance with City Council's directive and concludes a yearlong effort consisting of a ten-year financial planning horizon from fiscal year (FY) 2023-24 through FY2032-33. The study meets the legal requirement for setting rates that are equal to the cost of services provided. The proposed two-year rate implementation meets the financial goal of generating sufficient revenue given the current assessment of future expenses and maintaining appropriate reserve targets.

### **Environmental Utilities Department**

The Environmental Utilities Department (EU) operates municipal water, wastewater, and waste services utilities for residential, commercial and industrial customers. City ownership of these utilities provides customers the benefit of reliable service while still having rates among the lowest in the region. High quality and environmentally sound water, wastewater, and waste services utility operations are essential for protecting public health, maintaining regulatory compliance and continued economic vitality.

### **Charter of the City of Roseville**

The Roseville City Charter mandates that each utility be financially self-sufficient, meet its financial obligations for debt service, and provide for ongoing maintenance and operations. It also allows utility reserve funds to be set aside for the replacement, improvement, and extension of the utilities. Section 10.01 of the Charter states:

*“ . . . Each city-owned utility shall be financially self-sufficient, and shall fully compensate the city general fund for all goods, services, real property and rights to use or operate on or in city-owned real property. (Amended by general municipal election on November 7, 2000.)”*

The Charter further states in section 7.075:

*“The Council shall annually set aside from the income of each of its revenue producing public utilities the following amounts and in the following order, to wit:*

*First: An amount fully sufficient for the payment of principal, interest, reserve fund and sinking fund requirements of any revenue bonds or general obligation bonds secured in whole or in part from such utility revenues, the proceeds of which bonds have been applied to the acquisition, construction or completion of such public utilities.*

*Second: An amount sufficient to pay or provide for the payment of maintenance and operation of such public utilities, including a reserve for maintenance and operation.”*

In conjunction with the City mandate to be financially self-sufficient, each utility within EU is represented by an enterprise fund to account for “business-type activities” similar to that of private industry. They do not make a profit and all expenses and revenues are accounted for completely separate from the City's General Fund. Funding for utility operations is primarily from monthly utility charges.

### **Utility Rate Analysis and Results**

EU contracted with IB Consulting, LLC, an independent rates consultant, to conduct the rate analysis with City staff. The comprehensive rate study report is included as Attachment B. The

rates analysis considered the forecasted costs of utility operations, funding rehabilitation and capital project needs, while meeting fiscal policies and does the following:

1. Complies with Proposition 218, the main components of which are:
  - An agency cannot collect revenue beyond what is necessary to provide service.
  - No charge may be imposed for a service unless that service is actually used or immediately available to the owner of the property.
  - Revenues derived from the charge shall not be used for any other purpose other than that for which the charge was imposed.
  - Fairness in apportionment of total costs of service amongst ratepayer classes to avoid subsidization within the rates.
2. Reflects EU's adopted fiscal policies for economic reserves:
  - Water and wastewater: rate stabilization funds equivalent to 50 percent of operating expenses and emergency reserves equivalent to 25 percent of operating expenses.
  - Waste services: rate stabilization and emergency reserve funds totaling 25 percent of operating expenses.
3. Ensures EU can meet commitments made to bond investors for the water and wastewater utilities by meeting or exceeding a revenue coverage requirement of 1.2X (ratio of net revenues to expenses) as required by bond covenants. Meeting these commitments is critical to maintaining the City's excellent bond rating.

The process to establish stable and consistent rates relies on long-term financial planning, fiscal discipline and sound fiscal policies. Even with an abundance of advance planning and fiscal discipline, each utility continues to be subject to increases in significant regulatory, operational, and rehabilitation costs which cannot be controlled locally. General cost increases for all utilities include:

- Debt coverage requirements: Water and wastewater utility net revenue calculation fiscal policy goal of > 1.8x (the actual bond covenant requirements are lower at 1.2x).
- Inflation: In the past year inflation has hovered around eight percent, which is a 40-year high.
- Cost of City services: As an enterprise funded department, EU reimburses the General Fund for its proportionate share for administrative and support services such as for Human Resources, Finance, and the City Attorney.
- Salaries: Labor costs are forecast based on existing negotiated labor contracts. No additional labor increases were assumed beyond the current negotiated contracts for the two-year duration of the proposed rate adjustments and current labor contracts.
- Regulatory requirements: Water, wastewater, and waste services utilities are highly regulated. On average, 20 percent of utility expenses are associated with "new" regulatory compliance, over and above the basic utility function, which is also driven largely by regulatory mandates. These "new" regulatory requirements and unfunded

mandates are expensive and are generally associated with reducing carbon emissions, continued reduction of pollutants and ever-increasing data reporting requirements.

The rates analysis concluded that adjustments to water and wastewater utility rates are necessary to maintain current service levels while keeping the utilities fiscally sound. With the proposed rate adjustments, the City will maintain its position as one of the lowest overall cost and highest value utility providers in the region.

### **Public Outreach**

Consistent with City Council's priority to provide information to the community on a timely basis, staff conducted public outreach through a number of different venues. A summary of outreach efforts is included in this report as Attachment C.

In compliance with Proposition 218, a California law since 1996, notices were sent to all property owners on March 1, 2023. A copy of the notice is included in this report as Attachment D. The notice outlines rate details and the process for protesting the proposed rate adjustments. Protest ballots could be mailed or hand-delivered to the City Clerk on or before the public hearing date, or in person at the public hearing on May 3, 2023. At the close of the Public Hearing, the City Clerk will announce the total number of protest responses. If written protests against the proposed rate adjustments are presented by a majority of the owners of identified parcels, City Council cannot impose the adjustments.

### **Rehabilitation Costs**

In 2003, the City Council adopted a financial policy to set aside funds for rehabilitation and replacement of aging utility infrastructure. EU has since set aside a portion of its utility revenues for infrastructure rehabilitation. Utility rehabilitation programs are based upon condition assessments of infrastructure assets and facilities based on the probability and consequence of asset failure. From this information, a prioritized rehabilitation and replacement program and a schedule of implementation is developed over a 10-to-20-year period of time. Setting aside funds as described provides the resources for the utilities to rehabilitate or replace expensive infrastructure assets, without incurring debt. This practice ultimately saves rate payers by avoiding interest costs and fees associated with bond financing.

In the period covered by the proposed rate adjustment, funds will be evaluated annually to ensure adequate rehabilitation fund balances. Rehabilitating aging pipes, equipment, solid waste containers, and other aspects of the waste services, water, and wastewater system is vital in order to maintain system reliability and regulatory compliance.

In addition to routine system maintenance and rehabilitation, over the next two years, water rehabilitation funds will pay for several projects including water distribution mains rehabilitation, corrosion protection of water mains, and replacement of program logic controllers, water facility security enhancements, water supply resiliency improvements and recoating of a 2 million gallon tank at the Water Treatment Plant, among other improvements. Rehabilitation funds in wastewater will fund a sewer collection system cured-in-place pipe rehabilitation project, as well as the City's share of costs for the Dry Creek Wastewater Treatment Plant motor control center and switchgear replacement, the Pleasant Grove Wastewater Treatment Plant influent pump station rehabilitation, the Dry Creek Wastewater Treatment Plant primary odor control rehabilitation project, and the decommissioning of several regional wastewater lift stations.

### **Economic Reserves**

Economic reserves are an essential part of the utilities' operating procedures and ensure the continuation of services during revenue shortfalls, systems failures or other unforeseen circumstances. Staff recommends consistency with current fiscal policy that would, over time, achieve minimum emergency reserve levels for the water and wastewater utilities at 25 percent of annual operating expenses and 50 percent of annual operating expenses in rate stabilization funds. For waste services, the total for emergency reserves and rate stabilization funds is 25 percent of annual operating expenses in each reserve. It should be noted that a part of the recommended rate adjustments are needed in the short-term to avoid rapid declines in the target reserves in all three utilities. EU fiscal policies are included in this report as Attachment E. The policies reflect the need to supplement rate stabilization and economic reserve levels, which would:

- Improve assurance of adequate available funding in the event of a future drought or other event that results in increased expenses or reduced revenues.
- Protect the City's credit rating.
- Address City Council direction to preclude the need for surcharges in any future water shortage conditions.
- Maintain consistency with industry standards for reserve fund target levels.

#### **Debt Service Coverage**

In addition to increased costs, the City is also obligated to meet debt service coverage related to long-term debt as part of a rate covenant made to bondholders. The current rate covenant for debt issued on water and wastewater capacity improvement projects requires a minimum debt service coverage ratio of 1.20. Although utility rates are not currently used for payment of debt service, utility revenues are used as security for repayment of debt. Connection fees (developer paid) are the primary funding source for capacity improvement projects and for the payment of debt service costs related thereto.

#### **FISCAL IMPACT**

The proposed rate adjustments will result in additional combined revenue over the next two years of approximately \$4.0 million to the water utility, and \$5.7 million to the wastewater utility. All EU rate revenues are received in each respective utility' operating fund.

#### **ENVIRONMENTAL REVIEW**

Approval of the proposed utility rates is considered statutorily exempt from CEQA (State CEQA Guidelines section 15273). The project involves the modification, of rates, by a public agency for the purpose of: (1) Meeting operating expenses, including employee wage rates and benefits; (2) Purchasing or leasing supplies, equipment, or materials; (3) Meeting financial reserve needs and requirements; and (4) Obtaining funds for capital projects, necessary to maintain service within existing service areas. No further CEQA action is required.

#### **CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS**

Goal A - Remain fiscally responsible in a changing world  
Goal B - Support community engagement and advocacy  
Goal C - Maintain a safe and healthy community  
Goal D - Enhance economic vitality  
Goal E - Deliver exceptional city services  
Goal F - Invest in well-planned infrastructure and growth

Respectfully Submitted,

Devin Whittington, Environmental Utilities Assistant Director

Richard Plecker, Environmental Utilities Director

---

Dominick Casey, City Manager

ORDINANCE NO. \_\_\_\_

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE AMENDING SECTIONS  
14.08.090 AND 14.08.100 OF CHAPTER 14.08, AMENDING SECTION 14.16.200 OF  
CHAPTER 14.16, AND AMENDING SECTION 14.17.080 OF CHAPTER 14.17, OF TITLE  
14 OF THE ROSEVILLE MUNICIPAL CODE REGARDING PUBLIC UTILITIES

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. Section 14.08.090 of Chapter 14.08 of Title 14 of the Roseville Municipal  
Code is hereby amended to read as follows:

**14.08.090 Service charges for metered service.**

There shall be due and payable the following monthly charges, upon submission of the  
bill by the city to the owner of the property supplied with service, for all treated water measured  
by meters for residential, commercial, industrial and manufacturing or other purposes:

A. Monthly Quantity Rates. Effective July 1, 202~~3~~<sup>4</sup> and July 1, 202~~4~~<sup>5</sup>, the monthly  
quantity rates on billings shall be as follows:

|                                       | Effective 7/1/202 <del>3</del> <sup>4</sup> | Effective 7/1/202 <del>4</del> <sup>5</sup> |
|---------------------------------------|---------------------------------------------|---------------------------------------------|
| Potable water usage (per cubic foot)  | \$0. <del>0140</del> <sup>0159</sup>        | \$0. <del>0145</del> <sup>0166</sup>        |
| Recycled water usage (per cubic foot) | \$0. <del>0084</del> <sup>0105</sup>        | \$0. <del>0102</del> <sup>0107</sup>        |

B. Monthly Service Charges. Effective July 1, 202~~3~~<sup>4</sup> and July 1, 202~~4~~<sup>2</sup>, the monthly service charges on billings shall be as follows:

| Meter Size<br>(inches) | Peak Flow Rate<br>(gallons per minute) | Effective 7/1/202 <del>3</del> <sup>4</sup> | Effective 7/1/202 <del>4</del> <sup>2</sup> |
|------------------------|----------------------------------------|---------------------------------------------|---------------------------------------------|
| Up to 3/4              | 30                                     | <del>\$28.63</del> <u>\$29.63</u>           | <del>\$29.49</del> <u>\$30.82</u>           |
| 1                      | 50                                     | <del>\$44.20</del> <u>\$45.74</u>           | <del>\$45.53</del> <u>\$47.57</u>           |
| 1-1/2                  | 100                                    | <del>\$83.14</del> <u>\$86.00</u>           | <del>\$85.64</del> <u>\$89.44</u>           |
| 2                      | 160                                    | <del>\$129.86</del> <u>\$134.32</u>         | <del>\$133.76</del> <u>\$139.70</u>         |
| 3                      | 350                                    | <del>\$277.83</del> <u>\$287.32</u>         | <del>\$286.17</del> <u>\$298.82</u>         |
| 4                      | 630                                    | <del>\$495.88</del> <u>\$512.79</u>         | <del>\$510.76</del> <u>\$533.31</u>         |
| 6                      | 1300                                   | <del>\$1,017.64</del> <u>\$1,052.31</u>     | <del>\$1,048.17</del> <u>\$1,094.41</u>     |
| 8                      | 2800                                   | <del>\$2,185.76</del> <u>\$2,260.20</u>     | <del>\$2,251.34</del> <u>\$2,350.61</u>     |
| 10                     | 4200                                   | <del>\$3,276.01</del> <u>\$3,387.56</u>     | <del>\$3,374.30</del> <u>\$3,523.07</u>     |

C. The total amount due and payable shall be the sum of the monthly service charge plus the quantity rate. The monthly service charge is due and payable regardless of whether water has been consumed. The service charge shall be the greater of the charge based on the meter size or flow rate, with the following exceptions:

1. No service charge shall be made for fire service that has backflow prevention with detector check devices approved by the environmental utilities director.
2. No service charge shall be made for recycled water utility back-up systems that are required for reliability only and have backflow prevention and metering approved by the environmental utilities director. This exclusion does not extend to systems that are regularly

required as part of normal operation. The recycled water operation shall be responsible for water volumetric charges for these services and any costs associated with meter maintenance.

D. For purposes of charging for treated water measured by meters:

1. A residential account is defined as a single metered water service which serves three or less dwelling units.

2. A nonresidential account is defined as a single metered water service which serves more than three dwelling units, or serves commercial, industrial, manufacturing, irrigation or other nonresidential land uses.

E. For single-family residential services that require automatic fire protection systems pursuant to Section 16.16.120, the increased meter size will not be assessed an additional charge associated with the fire protection system requirement. Service charges shall be based on the required service size as determined by the Uniform Plumbing Code without consideration for any fire protection system required by Section 16.16.120.

SECTION 2. Section 14.08.100 of Chapter 14.08 of Title 14 of the Roseville Municipal Code is hereby amended to read as follows:

**14.08.100 Flat water rates.**

The following service charges shall apply to flat rate consumers that the environmental utilities director determines are not cost effective to assign metered rates. The environmental utilities director shall conduct a water use study for consumers whom he or she determines may

not be reasonably metered, and the director shall assign such consumers to an appropriate service rate level as set forth in this section. Water service rates for flat rate residential consumers shall be due and payable on a monthly basis according to the appropriate grouping set out in this section.

Effective July 1, 202~~3~~<sup>4</sup>, and July 1, 202~~4~~<sup>2</sup>, the flat rates on billings shall be as follows:

| Nonmetered or Flat Service Charges                                                                                                                                                                                                                                                                                                                       | Effective<br>7/1/202 <del>3</del> <sup>4</sup> | Effective<br>7/1/202 <del>4</del> <sup>2</sup> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------|------------------------------------------------|
| Single-family lots under 4,900 square feet; each mobile home unit not within a park maintaining its own distribution system and service; each dwelling unit of duplexes, triplexes, fourplexes, unmetered apartments and other multiple living units; other detached living units; and offices and stores with less than peak use of 250 gallons per day | \$ <del>45.28</del> <sup>48.97</sup>           | \$ <del>46.64</del> <sup>50.93</sup>           |

Formatted Table

SECTION 3. Section 14.16.200 of Chapter 14.16 of Title 14 of the Roseville Municipal Code is hereby amended to read as follows:

**14.16.200 Monthly unit sewer service charge established.**

Except as otherwise provided in this chapter, a monthly unit sewer service charge shall be paid by each user connected to the city-owned public sewer. The monthly unit sewer service charge on billings shall be:

A. The monthly sewer charge shall be \$~~44.86~~50.42 per sewer unit, effective on billings as of July 1, 202~~3~~4, and \$~~47.56~~53.45 per sewer unit, effective on billings as of July 1, 202~~4~~2.

B. Commercial customers without a sewer meter that are not subject to a flat rate per Section 14.16.220 and are associated to their potable water usage (metered consumption) shall have a monthly per sewer unit charge (the same as in subsection A) and a quantity rate as follows:

|                                                                                 | Effective 7/1/202 <del>3</del> <u>4</u>          | Effective 7/1/202 <del>4</del> <u>2</u>          |
|---------------------------------------------------------------------------------|--------------------------------------------------|--------------------------------------------------|
| Monthly per sewer unit charge                                                   | \$ <del>44.86</del> <u>50.42</u>                 | \$ <del>47.56</del> <u>53.45</u>                 |
| Associated sewer consumption charge above 560 cubic feet of potable water usage | \$0. <del>0417</del> <u>04696</u> per cubic foot | \$0. <del>0443</del> <u>04978</u> per cubic foot |

C. Commercial customers with a cubic-foot sewer meter shall have a monthly per sewer unit charge (the same as in subsection A) and a quantity rate as follows:

|                                               | Effective 7/1/202 <del>3</del> <u>4</u>          | Effective 7/1/202 <del>4</del> <u>2</u>          |
|-----------------------------------------------|--------------------------------------------------|--------------------------------------------------|
| Monthly per sewer unit charge                 | \$ <del>44.86</del> <u>50.42</u>                 | \$ <del>47.56</del> <u>53.45</u>                 |
| Sewer consumption charge above 560 cubic feet | \$0. <del>0417</del> <u>04696</u> per cubic foot | \$0. <del>0443</del> <u>04978</u> per cubic foot |

D. For commercial customers with a gallon sewer meter, the consumption rate will be based on the per cubic foot rate in subsection B and converted to a per gallon rate as follows:

Effective 7/1/2023~~1~~: \$0.0~~4696417~~ / 7.48 = \$0.~~00557~~~~00628~~ per gallon.

Effective 7/1/2024~~2~~: \$0.0~~4978443~~ / 7.48 = \$0.~~00592~~~~00665~~ per gallon.

Some commercial and industrial customers may require an additional surcharge per Section 14.16.220.

SECTION 4. Section 14.17.080 of Chapter 14.17 of Title 14 of the Roseville Municipal Code is hereby amended to read as follows:

**14.17.080 Fees and charges—Delinquency—Disconnection or termination.**

A. All fees, charges, deposits or penalties provided for in this chapter, including recycled water charges, shall be in the amount set forth in Chapter 14.08 or as established by resolution adopted by the city council, as amended from time to time.

B. Payment by a customer for recycled water service shall be due and payable as specified in Chapter 14.04 for water service. If payment is not received in accordance with Chapter 14.04, then the recycled water service may be disconnected or terminated. In the event the city disconnects or terminates recycled water service pursuant to this section, then in addition to the payment due for recycled water, the customer shall pay any and all delinquent and reconnection charges for recycled water service as specified in Chapter 14.04 for water service.

C. Price of Recycled Water. Effective July 1, 2023~~1~~, the price for recycled water sold, supplied, distributed or transported to customers of the city shall be at a rate or charge equal to ~~60 the sum of 80 percent of the monthly service charge and 66~~ percent of the rate or charge

which the city council may establish from time to time as set forth in Chapter 14.08 for potable water and which is in effect on the date of delivery of recycled water by the city to such customer. ~~Such charge or rate shall be the sum of the customer charge, commodity charge and adjustments as detailed in this chapter and specified in Chapter 14.08.~~ Effective July 1, 202~~4~~<sup>2</sup>, the price for recycled water will increase to ~~70~~ the sum of 90 percent of the monthly service charge and 64.5 percent of the rate or charge for potable water.

SECTION 5. This ordinance shall be effective at the expiration of thirty (30) days from the date of adoption.

SECTION 6. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

PASSED AND ADOPTED by the Council of the City of Roseville this \_\_\_\_ day of \_\_\_\_\_, 20\_\_, by the following vote on roll call:

ORDINANCE NO. \_\_\_\_

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE AMENDING SECTIONS  
9.12.030, 9.12.070, AND 9.12.090 OF CHAPTER 9.12, AND AMENDING SECTION 9.17.040  
OF CHAPTER 9.17 OF TITLE 9 OF THE ROSEVILLE MUNICIPAL CODE REGARDING  
WASTE COLLECTION AND REFUSE HAULING AND RECYCLING

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. Section 9.12.030 of Chapter 9.12 of Title 9 of the Roseville Municipal  
Code is hereby amended to read as follows:

**9.12.030 Organic waste generator requirements.**

A. Single-family organic waste generators shall comply with the following  
requirements:

1. Subscribe to and maintain organic waste collection services for all organic waste.  
The city shall have the right to review the number and size of a generator's containers to evaluate  
adequacy of capacity provided for each type of collection service for proper separation of  
materials and containment of materials. Single-family organic waste generators shall adjust  
service level for their collection services as requested by the city. Generators may additionally  
manage their organic waste by preventing or reducing their organic waste, managing organic  
waste on site, and/or using a community composting site pursuant to 14 CCR Section  
18984.9(c).

2. Participate in the city's organic waste collection service(s) by placing source separated organic waste in the container identified and designated for source separated organic waste and placing all other materials in the container identified and designated for such materials.

3. Place containers as follows:

a. Residences Having Street Frontage Only. Containers must be placed for collection at curbside in front of residence. The wheels of the container will be placed in the gutter with the handle facing the residence. Containers will be at least six feet from any obstruction such as automobiles, trailers, motor homes, fences, lampposts, portable basketball hoops, mailboxes, or other automated containers. Containers are not to block pedestrian access.

b. Residences with Alley Access. Containers must be placed for collection on private property adjacent to the alley property line, with direct access from the alley. The base of the container will be placed on a stable, level surface with the handle facing the residence. Containers will be at least six feet from any obstructions such as automobiles, trailers, motor homes, fences, portable basketball hoops, lampposts, mailboxes, or other automated containers.

c. All containers must be at curbside by 6:00 a.m. on scheduled collection days, holidays included. Collection trucks will come back for containers that are put out after truck has passed a residence upon payment of an extra pick-up service charge.~~no later than the time as directed by the environmental utilities director or his or her designee.~~

B. Generators that are commercial businesses, including multifamily residential dwellings shall comply with the following requirements:

1. Subscribe to and maintain organic waste collection services for all organic waste.

The city shall have the right to review the number and size of a generator's containers to evaluate adequacy of capacity provided for each type of collection service for proper separation of materials and containment of materials. Commercial business organic waste generators shall adjust service level for their collection services as requested by the city. Generators may additionally manage their organic waste by preventing or reducing their organic waste, managing organic waste on site, and/or using a community composting site pursuant to 14 CCR Section 18984.9(c).

2. Participate in the city's organic waste collection service(s) by placing source separated organic waste in the container identified and designated for source separated organic waste and placing all other materials in the container identified and designated for such materials.

3. Supply and allow access to adequate number, size and location of collection containers with labels or colors sufficient for employees, contractors, tenants, and customers, in compliance with the city's collection service requirements.

4. Excluding multifamily residential dwellings, commercial businesses shall provide containers for the collection of source separated organic waste and garbage in all indoor and outdoor areas where disposal containers are provided for customers, for materials generated by that business. Furthermore, the commercial businesses shall place containers in such place as shall be convenient to the city for removal of organic waste and garbage. Storage of other equipment or material will not be allowed.

5. Excluding multifamily residential dwellings, containers provided by commercial businesses shall have either:

a. A body or lid that conforms with the container colors provided through the collection service provided by the city, with either lids conforming to the color requirements or bodies conforming to the color requirements or both lids and bodies conforming to color requirements. A commercial business is not required to replace functional containers, including containers purchased prior to January 1, 2022, that do not comply with the requirements of this subsection prior to the end of the useful life of those containers, or prior to January 1, 2036, whichever comes first.

b. Container labels that include language or graphic images, or both, indicating the primary material accepted and the primary materials prohibited in that container, or containers with imprinted text or graphic images that indicate the primary materials accepted and primary materials prohibited in the container.

C. Generators that are commercial businesses, excluding multifamily residential dwellings shall:

1. To the extent practical through education, training, inspection, and/or other measures, prohibit employees from placing materials in a container not designated for those materials per the city's collection service.

2. Periodically inspect all containers for contamination and inform employees if containers are contaminated and of the requirements to keep prohibited container contaminants out of those containers pursuant to the Act.

3. Annually provide information to employees, contractors, tenants, and customers about organic waste proper sorting and recovery requirements.

4. Nothing in this section prohibits a generator subject to these provisions from preventing or reducing waste generation or managing organic waste on site.

5. Commercial businesses that are tier one or tier two commercial edible food generators shall comply with food recovery requirements, pursuant to Section 9.12.110 of this chapter.

SECTION 2. Section 9.12.070 of Chapter 9.12 of Title 9 of the Roseville Municipal Code is hereby amended to read as follows:

**9.12.070 Container requirements.**

A. Residential. Place containers as follows:

1. Residences Having Street Frontage Only. Containers must be placed for collection at curbside in front of residence. The wheels of the container will be placed in the gutter with the handle facing the residence. Containers will be at least six feet from any obstruction such as automobiles, trailers, motor homes, fences, lampposts, portable basketball hoops, mailboxes, or other automated containers. Containers are not to block pedestrian access.

2. Residences with Alley Access. Containers must be placed for collection on private property adjacent to the alley property line, with direct access from the alley. The base of the container will be placed on a stable, level surface with the handle facing the residence.

Containers will be at least six feet from any obstructions such as automobiles, trailers, motor homes, fences, portable basketball hoops, lampposts, mailboxes, or other automated containers.

3. All containers must be at curbside by 6:00 a.m. on scheduled collection days, holidays included. Collection trucks will come back for containers that are put out after truck has passed a residence upon payment of an extra pick-up service charge.

B. Commercial placement.

Garbage receptacles at places of business shall be located in such place as shall be convenient to the city for removal of garbage. City-approved trash enclosures are to be used for refuse removal equipment only. Storage of other equipment or material will not be allowed.

C. Container Type. –The environmental utilities director or his or her designee shall determine the size and specifications of all containers used for the purposes of collection under this chapter.

SECTION 3. Section 9.12.090 of Chapter 9.12 of Title 9 of the Roseville Municipal Code is hereby amended to read as follows:

**9.12.090 Charges for collection.**

A. Residential.

1. Each and every householder or tenant occupying any dwelling, house, or residence, shall pay to the city, or its authorized agent, a fixed minimum charge as set forth in this section

as a refuse rate. Such fixed minimum is based upon service of one call per week, irrespective of whether there is any refuse to remove from any premises.

2. Automated Container Service. Each premises shall be assigned city-owned containers. Containers will be serviced by automated collection. All garbage and source separated organic waste for collection must be contained within the container(s) designated for such materials with the lid closed and must fall freely from container when dumped. Each such premises shall be provided collection regularly, as determined by the environmental utilities director or his or her designee.

~~3. Collection services may be discontinued upon request for a period of no less than two months when a dwelling, house, or residence will be unoccupied. A service fee will be charged to the utility user for the removal of the assigned automated container(s) when service has been temporarily discontinued. This service fee will be paid at the time service is discontinued. Upon occupancy of a dwelling, house or residence, the utility user must contact the city to restart service and will be charged an associated restart fee. If the occupant of a dwelling, house, or residence does not contact the city to restart service, the city may bill back to the discontinuance of service all monthly charges.~~

34. For collection of additional containers beyond those covered by the fixed minimum rates established in this chapter, the collection charge shall be that identified in this section.

45. Return Trip Services.

a. Extra Pickup. An additional or “extra” pickup may be requested beyond the minimum service required by this chapter. Each such additional or extra pickup shall be subject to a fixed fee.

b. Out Late. Return service for containers placed out late may be requested. Each “out late” pickup shall be subject to a fixed fee.

c. Missed Pickup. A “missed” container must be reported within 48 hours of collection day or an “out late” charge shall be applied to the account.

56. Rates for Residential Collection. Effective July 1, 2021, and July 1, 2022, the residential rates on billings shall be as follows:

| Residential Refuse Service                                                                                                                                                    | Effective 7/1/2021  | Effective 7/1/2022  |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|---------------------|
| Fixed refuse monthly charge (one trash container and one <u>source separated organics waste (green waste)</u> container as identified in Section 9.12.090 (A)(2))             | \$31.06             | \$36.05             |
| Each additional mixed waste container                                                                                                                                         | \$21.24             | \$24.65             |
| Each additional source separated organic waste <u>(green waste)</u> container                                                                                                 | \$11.28             | \$13.10             |
| Additional pickup of a mixed waste container (also “out late” fee) <u>(also source separated organic waste (green waste) container emptied as trash due to contamination)</u> | \$20.30             | \$23.56             |
| Additional pickup of a source separated organic waste <u>(green waste)</u> container (also “out late” fee)                                                                    | \$14.92             | \$17.32             |
| <del>Fixed fee for the return of a confiscated source-separated organic waste container due to contamination</del>                                                            | <del>\$145.00</del> | <del>\$168.27</del> |
| <del>Temporary removal of a residential service</del>                                                                                                                         | <del>\$62.08</del>  | <del>\$72.05</del>  |
| Move in box pick-up                                                                                                                                                           | \$109.77            | \$127.39            |

| <b>Residential Refuse Service</b>                                                                              | <b>Effective 7/1/2021</b> | <b>Effective 7/1/2022</b> |
|----------------------------------------------------------------------------------------------------------------|---------------------------|---------------------------|
| Temporary dumpster delivery and removal (6 yards only)                                                         | \$152.19                  | \$176.65                  |
| <del>Restart service (per occurrence)</del>                                                                    | <del>\$30.36</del>        | <del>\$35.24</del>        |
| Source separated organic waste contamination fee<br>( <del>applied to account after third notification</del> ) | \$30.36                   | \$35.24                   |
| Residential return trip fee (applied when service is requested but container is inaccessible)                  | \$30.36                   | \$35.24                   |

| Container exchange (due to misuse—melted or damaged beyond reuse)                                              | \$90.70                   | \$105.26                  |

B. Commercial.

1. A landlord, property owner, property manager or management company of a commercial business that has a commercial dumpster shall pay to the city, or its authorized agent, a fixed charge as set forth by the city council as a refuse rate. Monthly charges will be applied to a single account per service. Such rates and fees are based upon a minimum service of one call per week, irrespective of whether there is any refuse to remove from any premises.

A landlord, property owner, property manager or management company with multiple tenants who must share a commercial dumpster shall be responsible for the refuse utility bill of the tenants.

The Environmental Utilities Director may at his discretion consolidate billing accounts where service costs are being split by two or more landlords, property owners, property managers or management companies.

2. Commercial frontloader, rearloader, roll-off, and automated container services are provided by the city.

An additional or extra pick up may be requested beyond the minimum service required by this chapter. Each such additional or extra pick up shall be subject to a fixed fee.

Temporary commercial collection must be charged to a City of Roseville customer utility account. A “garbage only” account may be requested for temporary services. See Chapter 14.04 “Utility Customer Billing, Accounting and Collections” for information about establishing a new account.

Timeframe for Temporary Customer Service. Temporary dumpsters for commercial business use must be serviced weekly and removed within a 90-day period. It is the customer’s responsibility to schedule services. If a temporary dumpster is not emptied within seven consecutive days of its delivery or last collection, the account shall be assessed a weekly rental fee per subsection (B)(5), Rates for Commercial Collection.

3. Multifamily residential dwellings will not be required to recycle food waste, but will need to provide proof to the city that other source separated organic waste such as green waste are being recycled or diverted from the landfill in an appropriate manner. The city can also provide green waste services, if necessary.

The city will collect all source separated organic waste, unless a commercial business had collection services in place before September 28, 2014, the date AB 1826 was approved. Any commercial business with a collection contract in effect before this date can continue with providers until the contract expires. Once the contract expires the commercial business will default to city collection service as provided for in this chapter.

4. An additional or special pickup may be requested beyond the minimum service required by this chapter. Each such additional or special pickup shall be subject to a fixed fee.

5. Rates for Commercial Collection. Effective July 1, 2021, and July 1, 2022, the commercial rates on billings shall be as follows:

| <b>Frontloader and Rearloader Commercial Services*</b>                                                                                                                           | <b>Effective<br/>7/1/2021</b>             | <b>Effective<br/>7/1/2022</b>             |

C. Shared Compactor Rates. Shared compactor rates are applicable to the City of Roseville downtown specific plan area. Exact rates are determined on a site-specific basis based on the following criteria:

|                                                                                                                                                                                                    | <b>Cost per 1,000 square feet of building area or per dwelling unit</b><br><b>Effective 7/1/2021</b> | <b>Cost per 1,000 square feet of building area or per dwelling unit</b><br><b>Effective 7/1/2022</b> |                                                                                                                                                                                                 |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Below are the square footage rates for shared compactors. If a customer's site-specific charge does not exceed the fixed minimum charge, they will be subject to the monthly fixed minimum charge. |                                                                                                      |                                                                                                      |                                                                                                                                                                                                 |
| Monthly Minimum (Fixed)                                                                                                                                                                            | \$34.83                                                                                              | \$40.42                                                                                              |                                                                                                                                                                                                 |
| Tier 1: Cost per 1,000 square feet of building area or per dwelling unit                                                                                                                           | \$7.28                                                                                               | \$8.45                                                                                               | Tier 1 includes business types that are determined low use by the environmental utilities director. Typical examples of low use are retail and office establishments and small apartment units. |
| Tier 2: Cost per 1,000 square                                                                                                                                                                      | \$29.34                                                                                              | \$34.05                                                                                              | Tier 2 includes business types that are determined medium use by the                                                                                                                            |

|                                                     |         |         |                                                                                                                                                                                                                                                                                                                                                                                |
|-----------------------------------------------------|---------|---------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| feet of building area                               |         |         | environmental utilities director. Typical examples of medium use are relatively smaller establishments such as bars and grills, coffee shops and delis; selling or serving food but not considered a full-service restaurant.                                                                                                                                                  |
| Tier 3: Cost per 1,000 square feet of building area | \$61.98 | \$71.93 | Tier 3 includes business types that are determined high use by the environmental utilities director. A typical example of high use is full-service restaurants, restaurant/bakeries, and similar establishments. Full-service restaurants are defined as primarily dine-in establishments with established menus, and a minimum of two meals per day (e.g., lunch and dinner). |

D. Shared Compactor Organic Tiers. Organics tiers are applicable to some shared compactor units depending on compactor tier and usage type. Exact rates are determined on a site-specific basis based on the following criteria:

| <b>Commercial Shared Compactor Organic Tiers</b> | <b>Effective 7/1/2021</b> | <b>Effective 7/1/2022</b> |
|--------------------------------------------------|---------------------------|---------------------------|
| Tier 1                                           | \$0.00                    | \$0.00                    |
| Tier 2                                           | \$99.50                   | \$115.47                  |
| Tier 3                                           | \$198.92                  | \$230.85                  |

E. Rates for Commercial Organic Waste Collection. Effective July 1, 2021 and July 1, 2022, the commercial organic waste collection rates on billings shall be as follows:

| <b>Organic Waste Collection Rates</b>    | <b>Minimum Monthly Charge (Effective 7/1/2021)</b> | <b>Minimum Monthly Charge (Effective 7/1/2022)</b> |
|------------------------------------------|----------------------------------------------------|----------------------------------------------------|
| 0-2 yards                                | \$99.50                                            | \$115.47                                           |
| 0-4 yards                                | \$198.92                                           | \$230.85                                           |
| 5 yards                                  | \$248.66                                           | \$288.57                                           |
| 6 yards                                  | \$298.34                                           | \$346.22                                           |
| 7 yards                                  | \$348.22                                           | \$404.10                                           |
| 8 yards                                  | \$397.83                                           | \$461.68                                           |
| 9 yards                                  | \$447.52                                           | \$519.34                                           |
| 10 yards                                 | \$497.24                                           | \$577.04                                           |
| 11 yards                                 | \$547.12                                           | \$634.92                                           |
| 12 yards                                 | \$596.68                                           | \$692.44                                           |
| Additional empty of organics container   | \$74.62                                            | \$86.60                                            |
| Empty of contaminated organics container | \$99.50                                            | \$115.47                                           |

Effective October 1, 2023, the commercial organic waste collection rates on billings shall be as follows:

| <u>Monthly Organics Cost Effective October 1, 2023</u> |                                  |                                  |                                  |                                  |                                  |

SECTION 4. Section 9.17.040 of Chapter 9.17 of Title 9 of the Roseville Municipal

Code is hereby amended to read as follows:

**9.17.040 Franchise term and franchise fee.**

A franchise for refuse hauling shall be for a term of two years. In addition to a franchise application fee, each franchise shall be required to pay a franchise fee of six dollars and eighty-eight cents to the city for every ton of refuse collected and disposed of within the city. The franchise fee set forth in this section may be amended from time to time by resolution of the city council. The franchise fee shall be assessed based on the monthly reports required in Section 9.17.080, and shall be paid monthly by the franchisee~~upon submission of the required report.~~

A franchise may be renewed for one or more additional periods aggregating not more than two years, upon the recommendation of the director. Any person holding a franchise for refuse hauling shall obtain, provide and continuously maintain a city business license, and shall obtain, provide and continuously maintain insurance pursuant to city insurance requirements as set forth in Section 9.17.110.

If franchise fees are not paid by the franchisee at the times required by this section, then in addition to the franchise fees, the franchisee shall pay a late payment charge in an amount equal to two percent of the franchise fee that is due, plus interest equal to one and one-half percent per month of the entire balance due until paid in full.

SECTION 5. This ordinance shall be effective at the expiration of thirty (30) days from the date of adoption.

SECTION 6. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

PASSED AND ADOPTED by the Council of the City of Roseville this \_\_\_\_ day of \_\_\_\_\_, 20\_\_, by the following vote on roll call:

## Executive Summary

---

The City of Roseville (City) reviews its utilities every two years to determine if adjustments are required to continue meeting its operational costs, system improvements, and satisfy reserve requirements. The last rate study in 2021 set rates for Fiscal Years (FY) 2022 and FY 2023. The City hired IB Consulting to conduct a comprehensive cost-of-service analysis to develop proposed rates for FY 2024 and FY 2025 (Rate Setting Period) for its water and wastewater utilities, including recycled rates. MSW Consultants was a part of the IB Consulting team and assisted with updating rates for waste services, which has been provided as a separate report from MSW.

Updating a utility's long-term financial plan and performing a comprehensive cost-of-service analysis is a prudent business practice to ensure a utility can fully fund its revenue needs over the Rate Setting Period and beyond. As part of reviewing and updating utility rates, the first step is to conduct a thorough review of the financial health of each utility. Based on a 5-year financial plan, FY 2024 – FY 2028 (Financial Plan Period), revenues from existing rates are reviewed to determine if current revenues sufficiently cover operating expenses; capital spending and satisfy minimum reserve requirements through the Financial Plan Period. With financial planning, it is critical to not only look at the short-term outlook but also review revenue needs beyond the Rate Setting Period. This approach ensures that the City plans for future obligations and obtains a clear understanding of each utility's current financial position.

### Water Utility

The City's water rate structure includes a monthly fixed charge and a uniform variable rate per hundred cubic feet (CCF) to all metered customers. Non-Metered customers are charged a flat monthly rate that captures both fixed costs and variable costs based on the projected usage of non-metered accounts. The updated cost-of-service fixed revenue recovery will remain at approximately 57% of total revenue, similar to the 2021 study. The proposed rate structure reflects an updated cost-of-service analysis that identifies which expenses are recovered through the monthly meter charges versus variable rates.

The proposed rates derived within this report includes two years of adjustments, commencing on July 1, 2023. With the proposed rates, the utility will continue to generate positive net income above operating, fully fund its capital repair and replacement program through cash on hand and meet minimum reserve targets over the Rate Setting Period<sup>1</sup>. The recommended rates have been incorporated into a notice and mailed to each customer as part of the Proposition 218 noticing requirements. A Public Hearing is scheduled for May 3, 2023 on the proposed rates identified in [Table 1](#), [Table 2](#), and [Table 3](#).

---

<sup>1</sup> The Proposed financial plan assumes water usage does not fall below 25,200 acre feet for FY 2024 and 25,452 acre feet for FY 2025, and future expenses do not exceed the projected costs identified herein.

*Table 1: Proposed Water Monthly Fixed Charges*

| Fixed Meter Charges (\$/Month) |            |            |
|--------------------------------|------------|------------|
| Meter Size                     | FY 2024    | FY 2025    |
| 3/4"                           | \$29.63    | \$30.82    |
| 1"                             | \$45.74    | \$47.57    |
| 1 1/2"                         | \$86.00    | \$89.44    |
| 2"                             | \$134.32   | \$139.70   |
| 3"                             | \$287.32   | \$298.82   |
| 4"                             | \$512.79   | \$533.31   |
| 6"                             | \$1,052.31 | \$1,094.41 |
| 8"                             | \$2,260.20 | \$2,350.61 |
| 10"                            | \$3,387.56 | \$3,523.07 |

*Table 2: Proposed Water Variable Rates*

| Variable Rates (\$/CCF) |         |         |
|-------------------------|---------|---------|
| Metered Usage Rate      | FY 2024 | FY 2025 |
| Uniform                 | \$1.59  | \$1.66  |

*Table 3: Proposed Water Monthly Non-Metered Flat Charges*

| Non-Metered (\$/Month)                  |         |         |
|-----------------------------------------|---------|---------|
| Flat Monthly Charges                    | FY 2024 | FY 2025 |
| Single family lots up to 4,900 s.f.     | \$48.97 | \$50.93 |
| Single family lots 4,901 - 8,900 s.f.   | \$53.06 | \$55.19 |
| Single family lots 8,901 - 12,000 s.f.  | \$60.31 | \$62.73 |
| Single family lots 12,001 - 15,000 s.f. | \$66.55 | \$69.22 |

## Wastewater Utility

The wastewater utility is part of this study and includes a financial plan update for proposed wastewater rates over the Rate Setting Period. The City's existing wastewater collection rate structure consists of monthly fixed charges to all customers and Commercial flow rates. The proposed wastewater rates derived within this report are for FY 2024 and FY 2025. With the proposed rates, the utility will continue to generate positive net income above operating, generate additional funding for the reinvestment in the wastewater collection system that averages \$8.5M over the Financial Plan Period, and satisfies reserve requirements through the Rate Setting Period. The recommended rates have been incorporated into the notice and mailed to each customer as part of the Proposition 218 noticing requirements. A Public Hearing is scheduled for May 3, 2023, on the proposed rates identified in Table 4.

# City of Roseville – *Water, Wastewater, and Recycled Rate Study*

*Table 4: Proposed Wastewater Rates*

| Monthly Fixed Charges (\$/ Month) |         |         |
|-----------------------------------|---------|---------|
| Customer Class                    | FY 2024 | FY 2025 |
| Residential                       | \$50.42 | \$53.45 |
| Commercial - Metered              | \$50.42 | \$53.45 |
| Commercial - Flat                 | \$50.42 | \$53.45 |

| Variable Rate (\$/ccf) |          |          |
|------------------------|----------|----------|
| Customer Class         | FY 2024  | FY 2025  |
| Commercial - Metered   | \$4.6958 | \$4.9776 |

## Recycled Utility

The wastewater treatment plants also produce recycled water, and the City delivers approximately one billion gallons of recycled water annually to its recycled customers. The Recycled cost center (#74340) captures most of the operating costs for the recycled utility. In addition, a portion of the electricity costs from the Dry Creek and Pleasant Grove Wastewater Treatment plants are also included as part of the recycled utility's operating expenses. Using this approach, annual revenue requirements for recycled can clearly be identified for determining proposed rates. Currently, recycled customers are charged a monthly fixed charge that varies by meter size and a uniform variable rate for recycled water usage. The existing recycled water fixed charges and variable rates are lower than potable water rates. One of the City's objectives is to increase recycled fixed charges annually to eventually be equivalent to potable water fixed charges by FY 2026 and the variable rate will recover the remaining revenue requirements that reflect the total cost of providing service. For the Rate Setting Period, recycled fixed charges are set at 80% of potable water fixed charges for FY 2024 and 90% of potable water fixed charges for FY 2025. A Public Hearing is scheduled for May 3, 2023, on the proposed rates identified in Table 5 and Table 6.

*Table 5: Proposed Recycled Monthly Fixed Charges*

| Fixed Meter Charges (\$/Month) |            |            |
|--------------------------------|------------|------------|
| Meter size                     | FY 2024    | FY 2025    |
| 3/4"                           | \$23.71    | \$27.74    |
| 1"                             | \$36.60    | \$42.82    |
| 1 1/2"                         | \$68.80    | \$80.50    |
| 2"                             | \$107.46   | \$125.73   |
| 3"                             | \$229.86   | \$268.94   |
| 4"                             | \$410.24   | \$479.98   |
| 6"                             | \$841.85   | \$984.97   |
| 8"                             | \$1,808.16 | \$2,115.55 |
| 10"                            | \$2,710.05 | \$3,170.77 |

Table 6: Proposed Recycled Variable Rates

| Variable Rate (\$/CCF) |         |         |
|------------------------|---------|---------|
| Recycled               | FY 2024 | FY 2025 |
| Variable Unit Rate     | \$1.05  | \$1.07  |

# Water Utility

## Water System

The City is located east of Sacramento in Placer County, and the Environmental Utility Department (EU) serves a population of 145,000 with water service and operates a 100 Million Gallon per Day (MGD) treatment plant. The water system also includes 600 miles of transmission & distribution lines, three water tanks, and a network of groundwater wells.

Figure 1: City of Roseville Water System

The City’s capital spending will average approximately \$8.4M annually over the Financial Plan Period. Figure 2 shows the City’s capital repair and replacement plan through FY 2028.

Figure 2: Water Utility Capital Improvement Plan

Customers

As of July 1, 2022, the City served 49,417 active accounts (49,345 metered customers and 72 non-metered customers). Table 7 provides a summary of metered accounts by meter size, and Table 8 provides a summary of non-metered accounts by lot size.

Table 7: Metered Accounts by Meter Size

| Meter Size    | Number of Accounts |
|---------------|--------------------|
| 3/4"          | 37,126             |
| 1"            | 9,804              |
| 1 1/2"        | 852                |
| 2"            | 1,216              |
| 3"            | 173                |
| 4"            | 123                |
| 6"            | 33                 |
| 8"            | 11                 |
| 10"           | 7                  |
| Total Metered | 49,345             |

# City of Roseville – *Water, Wastewater, and Recycled Rate Study*

*Table 8: Non-Metered Accounts by Lot Size*

| Lot Size                                | Number of Accounts |
|-----------------------------------------|--------------------|
| Single family lots up to 4,900 s.f.     | 57                 |
| Single family lots 4,901 - 8,900 s.f.   | 13                 |
| Single family lots 8,901 - 12,000 s.f.  | 1                  |
| Single family lots 12,001 - 15,000 s.f. | 1                  |
| <b>Total Non-Metered</b>                | <b>72</b>          |

Figure 3 shows historical water sales (blue bars) and projected water sales (hatched bars) in acre-feet (1 acre foot = 325,851 gallons) through the Financial Plan Period. FY 2024 water usage is projected to reflect 25,200 AF, and a 1% growth rate is assumed through FY 2026.

*Figure 3: Water Usage*

As previously mentioned, the existing rate structure consists of a monthly fixed meter charge and uniform variable rate to all metered customers and flat monthly charges to non-metered customers. Existing metered fixed charges and variable rates are identified in Table 9, followed by Table 10 identifying non-metered monthly flat charges.

# City of Roseville – *Water, Wastewater, and Recycled Rate Study*

Table 9: FY 2023 Metered Fixed Charges and Variable Rates

| Fixed Meter Charges (\$/Month) |            |
|--------------------------------|------------|
| Meter Size                     | Existing   |
| 3/4"                           | \$29.49    |
| 1"                             | \$45.53    |
| 1 1/2"                         | \$85.64    |
| 2"                             | \$133.76   |
| 3"                             | \$286.17   |

| Single family lots up to 4,900 s.f.     | \$46.64  |
| Single family lots 4,901 - 8,900 s.f.   | \$50.17  |
| Single family lots 8,901 - 12,000 s.f.  | \$56.42  |
| Single family lots 12,001 - 15,000 s.f. | \$61.78  |

## Financial Plan Overview – Water Utility

### Financial Planning

Financial planning incorporates numerous considerations, including projecting revenues and forecasting expected costs using various inflationary adjustments. Utilities also need to account for changes in water demand driven by variations in weather, water availability, state mandates, growth, and economic factors. In addition, system maintenance and reinvestment, reserves, and debt compliance all influence the revenues needed in future years. Therefore, a comprehensive financial plan reviews the following:

- 1) Historical water sales and consumption patterns to determine an appropriate level of usage for projecting future water use.
- 2) Operational costs that may change over the planning period as a result of inflation as well any new expenditures incurred to meet strategic goals, state mandates, or changes in operations.
- 3) Multi-year system improvement needs, and scheduling based on priority. This review also considers available funding sources to complete projects such as pay-as-you-go (PAYGO), grants, loans, and debt financing.
- 4) Reserve funding to meet adopted reserve policies. The goal is to generate adequate cash on hand to mitigate financial risks related to operating cashflow needs, unexpected increases in expenses, shortages in system reinvestment, and mitigating potential system failures.

Figure 4 illustrates the key elements when developing a long-term financial plan.

*Figure 4: Financial Plan Key Elements*

# City of Roseville – Water, Wastewater, and Recycled Rate Study

## Financial Planning Assumptions

Developing a long-term financial plan requires an understanding of the utility's financial position by evaluating existing revenue streams, ongoing expenses, how those expenses will change over time, existing debt coverage requirements, and reserve policies. With these considerations, certain assumptions are required for projecting revenues, expenses, and expected ending fund balances. **Table 11** identifies assumptions used for forecasting revenues and **Table 12** identifies assumptions used for forecasting increases in expenses over the Financial Plan Period, with personnel related expenses based on a Labor Forecast analysis provided by the City. In addition, the City experienced a significant increase in chemical costs and FY 2024 assumes a one-time 59% adjustment for establishing a new baseline cost. Increases for General Liability and Workers Comp are also significant, which will continue through the Financial Plan Period.

*Table 11: Water Assumptions for Forecasting Revenues*

| Key Assumptions                                  | FY 2024           | FY 2025           | FY 2026           | FY 2027           | FY 2028           |
|--------------------------------------------------|-------------------|-------------------|-------------------|-------------------|-------------------|
| <b>Revenue Escalation</b>                        |                   |                   |                   |                   |                   |
| Non-Inflated                                     | 0.0%              | 0.0%              | 0.0%              | 0.0%              | 0.0%              |

## Current Financial Position

### Revenues

Based on the forecasting assumptions, revenues were calculated using existing rates (Table 9 and Table 10), multiplied by the number of accounts listed by meter size and lot size, and projected total water sales shown (Table 11). Table 13 shows the calculated rate revenues through the Financial Plan Period. Table 14 summarizes calculated rate revenues and other non-rate revenues available through the Financial Plan Period with future projections rounded to the nearest thousands. Non-rate revenues increase over the Financial Plan Period using the inflation factor in Table 11.

# City of Roseville – *Water, Wastewater, and Recycled Rate Study*

## Expenses

The FY 2023 budget was used as the utility's baseline Operational & Maintenance (O&M) expenses and adjusted in subsequent years based on the escalation factors shown in [Table 12](#). In addition, the City recently completed an independent valuation on staffing needs throughout the City and the results were captured within a long-term labor staffing forecast (labor forecast), which were incorporated into the O&M expense projections through the Financial Plan Period. [Table 15](#) provides projected O&M expenses with future projections rounded to the nearest thousands. Each expense category includes detailed line-item expenditures that were discussed with staff to determine the appropriate escalation factor to use for forecasting how costs will increase over time.

*Table 15: Water Projected O&M Expenses*

| Expenditure Summary                          | FY 2024             | FY 2025             | FY 2026             | FY 2027             | FY 2028             |
|----------------------------------------------|---------------------|---------------------|---------------------|---------------------|---------------------|
| Operating Expenses                           |                     |                     |                     |                     |                     |
| Water UBS - Admin                            | \$681,000           | \$747,000           | \$782,000           | \$822,000           | \$866,000           |
| Water UBS - Field                            | \$337,000           | \$373,000           | \$276,000           | \$290,000           | \$307,000           |

# City of Roseville – Water, Wastewater, and Recycled Rate Study

## Reserves

Figure 5: Water Utility Reserves

Established reserves include Operating Reserve, Rehabilitation Reserve, and Rate Stabilization Reserve. These reserves help mitigate risks to the utility by ensuring sufficient cash is on hand for daily operations and to fund annual system improvements. In addition, these reserves help smooth rates and mitigate rate spikes due to emergencies or above-average system costs. The most recent adopted reserve policies identify the function of each reserve. Table 16 summarizes the minimum reserve requirements and the ideal funding targets of each reserve. In addition, the City has a Construction Fund for capacity fees, which pays the 2015 Certificates of Participation debt associated with advanced water metering.

Table 16: Water Reserve Requirements and Targets

| Reserve            | Minimum Requirement                   | Reserve Target              |
|--------------------|---------------------------------------|-----------------------------|
| Operating          | 90 days of operating costs            | 180 days of operating costs |
| Rehabilitation     | 1% of Asset Value                     | -                           |
| Rate Stabilization | 50% of next year's operating expenses | -                           |

The reserve balance as of July 1, 2022 equaled approximately \$58.7M.

Financial Outlook at Existing Rates

Calculating revenue using existing rates and projecting expenses helps determine the current financial health of the utility. Revenues from existing rates are sufficient to fund O&M through FY 2027, but net operating income (net cashflow before transfers) continue to reduce as operating expenses increase over time. Annual net cashflow is not sufficient to fund operating revenue requirements and system reinvestment needs while meeting minimum reserve requirements through the Financial Plan Period. Figure 6 illustrates the operating position of the utility, where O&M expenses are identified with the dashed red trendline and total revenues at existing rates are shown by the horizontal black trendline. The bars represent the amount of net operating income available for direct transfers (reimbursements and debt), capital spending and reserve funding.

Figure 6: Water Current Operating Financial Position

With the capital spending reflecting approximately \$42M over the Financial Plan Period, as shown in Figure 2, reserves will be utilized to cover the remaining capital expenses to ensure necessary projects continue to move forward as scheduled. Figure 7 reflects the projected ending balances of reserves after operating and capital projects are funded. By FY 2027, reserves dip below the total minimum reserve target and continue to deplete in subsequent years.

Figure 7: Water Projected Ending Reserves at Existing Rates

### Proposed Financial Plan – Water Utility

---

From the financial outlook at existing rates, a proposed financial plan can be developed to adequately fund the multi-year revenue requirements, while meeting reserve requirements. Based on funding the capital plan over the Financial Plan Period and ensuring reserves meet minimum targets, [Table 17](#) forecasts projected revenues and expenses over the Financial Plan Period, including projected revenue adjustments outside the Rate Setting Period for FY 2026 through FY 2028. [Table 18](#) identifies reserve and other City Department transfers, reserve activity through the Financial Plan Period, and projected FY 2024 starting reserve balances identified for each reserve.

# City of Roseville – Water, Wastewater, and Recycled Rate Study

Table 17: Water Proposed Financial Plan

| Revenue                                        |             | FY 2024            | FY 2025             | FY 2026             | FY 2027             | FY 2028             |
|------------------------------------------------|-------------|--------------------|---------------------|---------------------|---------------------|---------------------|
| Service Charge                                 |             | \$23,666,000       | \$23,892,000        | \$24,120,000        | \$24,120,000        | \$24,120,000        |

# Cost-of-Service Analysis – Water Utility

## Cost-of-Service Process

The next step in developing rates is to perform a cost-of-service analysis. It is important to understand **how** costs are incurred in order to determine the most appropriate way to recover these costs. The following graphic summarizes the cost-of-service process. Through this process, costs incurred are allocated to customers based on their proportional share. As a result, proposed rates are cost-based and reflect the costs incurred to provide service to customers.

Figure 11: Cost-of-Service Process

## Revenue Requirements

With FY 2024 as the first year of the proposed rate schedule, revenue requirements are determined for FY 2024 and used for the cost-of-service. Revenue requirements include O&M expenses, transfers, available revenue offsets from other revenues, and reserve funding. The proposed revenue adjustments and corresponding rates accumulate the necessary funding over the Rate Setting Period to fund the scheduled capital projects and comply with minimum reserve requirements. The results of the financial plan analysis are summarized in [Table 19](#) and represent the revenue required from rates over the Rate Setting Period (FY 2024 and FY 2025).

# City of Roseville – *Water, Wastewater, and Recycled Rate Study*

**Table 19: FY 2024 – FY 2025 Water Revenue Requirements**

|                                              | FY 2024              | FY 2025              |
|----------------------------------------------|----------------------|----------------------|
| Revenue Requirements                         | Total                | Total                |

## Define Cost Components

The utility incurs costs to accommodate total water demand that varies throughout the year. Therefore, to determine the most appropriate way to recover the utility's expenses, cost components are identified to allocate expenses based on how they are incurred. Through review of the revenue requirements and an understanding of the utility system, it is appropriate and reasonable to utilize the base-extra capacity methodology outlined in the American Water Works Association M1 Manual. This methodology accounts for utility systems costs as a function of meeting revenue needs based on average annual usage and total demand. The cost components shown in Figure 12 reflect the cost components used for this study.

*Figure 12: Water Cost Components*

**Account Services** – Fixed expenses that do not necessarily fluctuate based on usage nor is a function of meter size. Expenses associated with customer service, billing services, outreach, a portion of administration, and other expenses incurred based on having an account.

**Meter Capacity** – Expenses associated with operating and maintaining the system, planning, support services, capital, and a portion of overhead.

**Conveyance** – Expenses associated with operating and maintaining the distribution system, treatment costs, and capital expenses of the water system incurred to deliver water to all customers. These costs tend to vary with the volume of water sold.

## Allocate Expenses to Cost Components

The analysis herein establishes cost components for developing fixed charges and variable rates. When allocating expenses to the defined costs components, it is important identify which expenses were allocated to a fixed versus a variable or split between both fixed and variable. The distribution of expenses to the cost components should be straight-forward to ensure the method of apportionment is **understandable** and easily **correlates to how expenses are incurred**.

# City of Roseville – *Water, Wastewater, and Recycled Rate Study*

Table 20 summarizes the percent allocation of O&M revenue requirements to the cost components and Table 21 uses the percent allocations in Table 20 to allocate expenses in dollars to each cost component.

*Table 20: Water O&M Expense Allocation to Cost Components (%)*

| Operations and Maintenance                   | Methodology / Allocation Basis | Account Services | Meter Capacity | Conveyance | Total  |

## City of Roseville – Water, Wastewater, and Recycled Rate Study

Other Funding includes direct transfers, revenue offsets, and reserve funding. All items under “Other Funding” were allocated to the cost components based on O&M percentages derived in Table 21 to maintain proportionality in how expenses were allocated to each cost component. Table 22 summarizes the percent allocation of Other Funding to the cost components, and Table 23 uses the percent allocations in Table 22 to allocate expenses in dollars to each cost component.

*Table 22: Water Other Funding to Cost Components (%)*

| Other Funding         | Methodology / Allocation Basis | Account Services | Meter Capacity | Conveyance | Total  |
|-----------------------|--------------------------------|------------------|----------------|------------|--------|
| Direct Transfers      | O&M Allocation                 | 7.9%             | 49.9%          | 42.3%      | 100.0% |

## Rate Design – Water Utility

### Develop Units of Service

Unit rates for each cost component are derived by spreading the corresponding revenue requirements over appropriate units of service (distribution basis). This approach provides a clear connection between costs incurred and the proportionate share attributable to each customer. When designing rates, the most critical component is to connect costs to the proposed rates, resulting in a cost-based rate structure in compliance with Proposition 218.

In the previous section, costs were summarized by expense category and allocated to cost components based on how each cost is incurred. The next step in designing rates is to allocate each cost component to customers through fixed charges and variable rates. The method of apportionment considers each customer's share of system costs and is reflected by the units of service used to equitably distribute the cost components to each customer account. The distribution basis varies by cost component and includes total accounts, Meter Equivalents (MEs), which reflect demand placed on the system, and total water sales.

For non-metered accounts, projected water usage was estimated based on the average annual usage of metered customers (12.20 CCF) and water efficiency standards for indoor use on a gallons per capita per day (gpcd) basis. Using an indoor water use of 55 gpcd, projected indoor usage equals 5.88 CCF, which is assumed for all non-metered accounts. Projected outdoor water usage is derived by taking the difference between the average annual metered usage of 12.2 CCF and indoor usage of 5.88 CCF (result is 6.32 CCF). The 6.32 CCF is assigned to the 4,900 square foot (s.f.) lot size and each lot size category greater than 4,900 s.f. has an increased projected outdoor water usage to account for the bigger lot sizes. Table 25 reflects the projected water usage for non-metered accounts.

In Table 26, each meter size was assigned an equivalency factor based on the flow characteristics of a 3/4" meter based on the safe maximum operating flow capacity for City meter types, as identified in the AWWA M1 Manual, 6th Edition, Table B-2. The safe maximum operating flow capacity for each meter was divided by the base meters' safe operating flow capacity of 30 gallons per minute (gpm) to determine the equivalent meter ratio. The Capacity Ratio represents the potential flow through each meter size compared to the flow through a 3/4" meter to establish parity between meter sizes. Total MEs are determined by multiplying the number of meters by the Capacity Ratio and then multiplying the result by the number of billing periods. Non-Metered are assigned a base ME of 1.0.

**Table 25: Metered and Non-Metered Projected Water Usage**

| Customer Class                          | Accounts | Square Footage | Allocation Factor | Monthly Indoor Allotment | Monthly Outdoor Allotment | Monthly Water Allotment | Annual / Projected Usage (CCF) |
|-----------------------------------------|----------|----------------|-------------------|--------------------------|---------------------------|-------------------------|--------------------------------|
|                                         | [A]      | [B]            | [C] = (B / 4,900) | [D]                      | [E] = C x 6.32 ccf        | [F] = (D + E)           | [G] = F x A x 12 bills         |

# City of Roseville – Water, Wastewater, and Recycled Rate Study

With the units of service shown in Table 25 and Table 26, the distribution basis can be identified for each cost component. Figure 13 identifies the total revenue requirements by cost component from Table 24 and the corresponding units of service.

Figure 13: Water Distribution Basis and Units of Service by Cost Component

Using the FY 2024 revenue requirements, the cost-of-service allocates expenses to customers based on the service demands that each place on the system (cost causation). This cost causation approach ensures that each customer proportionately shares in the financial obligation of the utility. For the following unit rate computations for each cost component, unit rates were rounded up to the nearest penny.

## Fixed Cost Recovery

### Account Services

Account Services costs are incurred by each customer regardless of the type of land use, meter size, or total amount of water used in a month. These costs should be spread equally across all accounts. This is achieved by using the distribution basis of Total Bills. Total Bills are determined by multiplying the number of accounts by 12 billing periods (Table 26). Therefore, the revenue requirement for Account Services is apportioned based on the Total Bills to determine the monthly unit cost-of-service shown in Table 27.

Table 27: FY 2024 Water Account Services Monthly Unit Rate

| Account Services Component Unit Rate |             |
|--------------------------------------|-------------|
| Revenue Requirement                  | \$3,241,795 |
| ÷ Annual Bills                       | 593,004     |
| Monthly Unit Rate                    | \$5.47      |

# City of Roseville – Water, Wastewater, and Recycled Rate Study

## Meter Capacity

The Meter Capacity includes system-wide operations costs, capital, and a portion of reserves. The revenue requirement for Meter Capacity is apportioned based on meter size. Larger sized meters can generate a greater demand on the system from the amount of potential water flow that may pass through the meter in gpm. The revenue requirement for Meter Capacity is apportioned to meter size as represented by total MEs (Table 26) in Table 28.

*Table 28: FY 2024 Water Meter Capacity Monthly Unit Rate*

### Meter Capacity Component Unit Rate

|                          |                |
|--------------------------|----------------|
| Revenue Requirement      | \$20,553,777   |
| ÷ Annual ME's            | 850,816        |
| <b>Monthly Unit Rate</b> | <b>\$24.16</b> |

## Variable Cost Recovery

The remaining cost component of Conveyance is recovered through a variable rate. The proposed rate structure consists of a uniform rate per CCF across all metered accounts. Non-metered accounts are allocated a proportional share of variable cost based on their projected usage shown in Table 25 and incorporated as part of the non-metered accounts' monthly flat charges.

## Conveyance

Conveyance costs are incurred based on the total volume of water produced and delivered to customers throughout the year. Therefore, the revenue requirement for Conveyance is apportioned based on projected total water usage identified in Table 25 to determine the unit cost-of-service, as shown in Table 29. The amount allocated to non-metered accounts is further apportioned to the five corresponding non-metered rate categories as shown in Table 30, based on the projected usage in Table 25.

*Table 29: FY 2024 Water Conveyance Unit Rate*

| Customer Class | Projected Usage (ccf)<br>[A] | % Allocation<br>[B] = A as % | Revenue Requirement<br>[C] = Rev Req x B | Unit Rate<br>[D] = C ÷ A |
|----------------|------------------------------|------------------------------|------------------------------------------|--------------------------|
| Metered        | 10,977,021                   | 99.9%                        | \$17,395,739                             | \$1.59                   |

## Cost-Based Rates – Water Utility

### Proposed Monthly Fixed Charges

The proposed monthly fixed charges for FY 2024 are shown in Table 31, reflecting the combined charges of Account Services and Meter Capacity. Meter Capacity charges increase with the size of the meter in relation to the Capacity Factors. Table 32 provides the two-year metered fixed charge schedule through FY 2025. For FY 2025, the 4% revenue adjustment is applied across-the-board to the cost-of-service rates derived for FY 2024.

Table 31: FY 2024 Water Monthly Fixed Charges

| Meter Size | Meter Capacity Ratio | Account Services | Meter Capacity    | Proposed Fixed Charge |
|------------|----------------------|------------------|-------------------|-----------------------|
|            | [A]                  | [B] = \$5.47     | [C] = \$24.16 x A | [D] = B + C           |
| Metered    |                      |                  |                   |                       |
| 3/4"       | 1.00                 | \$5.47           | \$24.16           | \$29.63               |
| 1"         | 1.67                 | \$5.47           | \$40.27           | \$45.74               |
| 1 1/2"     | 3.33                 | \$5.47           | \$80.53           | \$86.00               |
| 2"         | 5.33                 | \$5.47           | \$128.85          | \$134.32              |
| 3"         | 11.67                | \$5.47           | \$281.85          | \$287.32              |
| 4"         | 21.00                | \$5.47           | \$507.32          | \$512.79              |

Table 32: Proposed Water Metered Monthly Fixed Charges

| Revenue Adjustments:           |            | 4.0%       |
|--------------------------------|------------|------------|
| Fixed Meter Charges (\$/Month) |            |            |
| Meter Size                     | FY 2024    | FY 2025    |
| 3/4"                           | \$29.63    | \$30.82    |
| 1"                             | \$45.74    | \$47.57    |
| 1 1/2"                         | \$86.00    | \$89.44    |
| 2"                             | \$134.32   | \$139.70   |
| 3"                             | \$287.32   | \$298.82   |
| 4"                             | \$512.79   | \$533.31   |
| 6"                             | \$1,052.31 | \$1,094.41 |
| 8"                             | \$2,260.20 | \$2,350.61 |
| 10"                            | \$3,387.56 | \$3,523.07 |

Proposed Variable Rate

Table 33 provides the two-year variable rate schedule through FY 2025. For FY 2025, the 4% revenue adjustment is applied across-the-board to the cost-of-service rates derived for FY 2024 while accounting for increased usage from account growth.

Table 33: Proposed Water Variable Rates

|                         |         |         |
|-------------------------|---------|---------|
| Revenue Adjustments:    |         | 4.0%    |
| Variable Rates (\$/CCF) |         |         |
| Metered Usage Rate      | FY 2024 | FY 2025 |
| Uniform                 | \$1.59  | \$1.66  |

Proposed Non-Metered Monthly Flat Charges

Table 34 provides the two-year non-metered flat charge schedule through FY 2025. The monthly flat charges combine the variable charges and fixed charges identified in Table 30 and Table 31 for FY 2024. For FY 2025, the 4% revenue adjustment is applied across-the-board to the cost-of-service rates derived for FY 2024.

Table 34: Proposed Water Non-Metered Monthly Flat Charges

|                                         |         |         |
|-----------------------------------------|---------|---------|
| Revenue Adjustments:                    |         | 4.0%    |
| Non-Metered (\$/Month)                  |         |         |
| Flat Monthly Charges                    | FY 2024 | FY 2025 |
| Single family lots up to 4,900 s.f.     | \$48.97 | \$50.93 |
| Single family lots 4,901 - 8,900 s.f.   | \$53.06 | \$55.19 |
| Single family lots 8,901 - 12,000 s.f.  | \$60.31 | \$62.73 |
| Single family lots 12,001 - 15,000 s.f. | \$66.55 | \$69.22 |

# Wastewater Utility

## Wastewater System

The City operates two wastewater treatment plant facilities that serve the City of Roseville, portions of Placer County, and several unincorporated communities. The two treatment plants combined can treat a total capacity of 30 MGD. The City’s wastewater collections system includes 505 miles of sewer mainlines and the plants treat approximately 4.0 MGD of effluent from City customers.

Figure 14: City of Roseville Wastewater System

The City’s capital spending will average approximately \$8.5M annually through the Financial Plan Period. Figure 15 shows the City’s capital repair and replacement plan through FY 2028.

Figure 15: Wastewater Capital Improvement Plan

# City of Roseville – *Water, Wastewater, and Recycled Rate Study*

## Customers

For FY 2023, the City projected a 1% growth rate, resulting in 60,327 sewer units, which includes total residential dwelling units and commercial accounts. Table 35 provides a summary of accounts and sewer units by customer class.

*Table 35: Wastewater Accounts by Customer Class*

| Sewer Monthly Service Units       | Sewer Units |
|-----------------------------------|-------------|
| Residential                       | 57,727      |
| Commercial - Metered              | 1,612       |
| Commercial - Flat                 | 1,576       |
| Total Sewer Monthly Service Units | 60,915      |

The current wastewater rate structure consists of monthly fixed charges and variable rates for commercial customers for water usage over 560 cubic feet. Existing charges and rates are identified in Table 36.

*Table 36: FY 2023 Wastewater Fixed Charges and Variable Rates*

| Monthly Fixed Charges (\$/ Month) |          |
|-----------------------------------|----------|
| Customer Class                    | Existing |
| Residential (per month)           | \$47.56  |
| Commercial - Metered              | \$47.56  |
| Commercial - Flat                 | \$47.56  |
| Variable Rate (\$/ccf)            |          |
| Customer Class                    | Existing |
| Commercial - Metered              | \$4.43   |

## Financial Plan Overview - Wastewater Utility

### Financial Planning Assumptions

Developing a long-term financial plan requires understanding the utility's financial position by evaluating existing revenue streams, ongoing expenses, how those expenses will change over time, existing debt requirements, new strategic objectives, and reserve policies. With these considerations, certain assumptions are required for projecting revenues, expenses, and expected ending fund balances. [Table 37](#) identifies assumptions used for forecasting revenues, and [Table 38](#) identifies assumptions used for forecasting increases in expenses through the Financial Plan Period.

*Table 37: Wastewater Assumptions for Forecasting Revenues*

| Key Assumptions                             | FY 2024        | FY 2025        | FY 2026        | FY 2027        | FY 2028        |
|---------------------------------------------|----------------|----------------|----------------|----------------|----------------|
| <b>Revenue Escalation</b>                   |                |                |                |                |                |
| Non-Inflated                                | 0.0%           | 0.0%           | 0.0%           | 0.0%           | 0.0%           |

# City of Roseville – Water, Wastewater, and Recycled Rate Study

## Current Financial Position

### Revenues

Based on the forecasting assumptions, revenues were calculated using existing rates (Table 36), multiplied by the number of sewer units and projected billable water usage (Table 37). Table 39 shows the calculated revenues through the Financial Plan Period. Table 40 provides a summary of calculated rate revenues (rounded to thousands) and other non-rate revenues available through the Financial Plan Period. Non-rate revenues increase over the Financial Plan Period using the inflation factor in Table 37.

*Table 39: Wastewater Calculated Rate Revenues*

| Fixed Revenues                      | FY 2024             | FY 2025             | FY 2026             | FY 2027             | FY 2028             |
|-------------------------------------|---------------------|---------------------|---------------------|---------------------|---------------------|
| <b>Monthly Service Charge</b>       |                     |                     |                     |                     |                     |

# City of Roseville – Water, Wastewater, and Recycled Rate Study

## Expenses

The FY 2023 budget was used as the utility's baseline expenses and adjusted in subsequent years based on the escalation factors shown in Table 38. In addition, the City recently completed an independent valuation on staffing needs throughout the City and the results were captured within a long-term labor staffing forecast (labor forecast), which were incorporated into the O&M expense projections. Table 41 provides projected O&M expenses through the Financial Plan Period (rounded to thousands). Each expense category includes detailed line-item expenditures that were discussed with staff to determine the appropriate escalation factor to use for forecasting how costs will increase over time.

*Table 41: Wastewater Projected O&M Expenses*

| Expenditure Summary                    | FY 2024             | FY 2025             | FY 2026             | FY 2027             | FY 2028             |

# City of Roseville – *Water, Wastewater, and Recycled Rate Study*

## Reserves

The wastewater utility incorporates similar reserves as the water utility. These reserves help mitigate risks to the utility by ensuring sufficient cash is on hand for daily operations and to fund annual system improvements. In addition, these reserves help smooth rates and mitigate rate spikes due to emergencies or above-average system costs. The most recent adopted reserve policies identify each reserve's function. [Table 42](#) summarizes the minimum reserve requirements and the ideal funding targets of each reserve.

*Table 42: Wastewater Reserve Requirements and Targets*

| Reserve            | Minimum Requirement                   | Reserve Target              |
|--------------------|---------------------------------------|-----------------------------|
| Operating          | 90 days of operating costs            | 180 days of operating costs |
| Rehabilitation     | 1% of Asset Value                     | -                           |
| Rate Stabilization | 50% of next year's operating expenses | -                           |

The reserve balance as of July 1, 2022 equaled approximately \$65.8M.

## Financial Outlook at Existing Rates

Calculating revenue using existing rates and projecting expenses helps determine the current financial health of the utility. Revenues from existing rates are sufficient to fund O&M through FY 2025; however, in FY 2026 expenses outpace revenues. Only a portion of the system needs can be funded with projected net operating income resulting in the use of reserves to cover the remaining capital costs. [Figure 16](#) illustrates the operating position of the utility, where O&M expenses are identified with the dashed red trendline, and total revenues at existing rates are shown by the horizontal black trendline. The bars represent the amount of net operating income available. [Figure 17](#) reflects the projected ending balances of reserves after funding operating and capital projects through the Financial Plan Period. By FY 2026, reserves are below the minimum target.

Figure 16: Wastewater Current Operating Financial Position

Figure 17: Wastewater Projected Ending Reserves at Existing Rates

## Proposed Financial Plan – Wastewater Utility

From the financial outlook at existing rates, a proposed financial plan can be developed to adequately fund the multi-year revenue requirements, while meeting reserve requirements. Based on funding the capital plan over the Financial Plan Period and ensuring reserves meet minimum targets, **Table 43** forecasts projected revenues and expenses over the Financial Plan Period, including projected revenue adjustments outside the Rate Setting Period for FY 2026 through FY 2028.

**Table 43: Wastewater Proposed Financial Plan**

| Revenue                                                |                           | FY 2024             | FY 2025             | FY 2026             | FY 2027             | FY 2028             |
|--------------------------------------------------------|---------------------------|---------------------|---------------------|---------------------|---------------------|---------------------|
| Monthly Service Charge                                 | Table 40                  | \$35,104,000        | \$35,446,000        | \$35,791,000        | \$35,791,000        | \$35,791,000        |
| Variable Revenues                                      |                           | \$4,585,000         | \$4,630,000         | \$4,677,000         | \$4,677,000         | \$4,677,000         |
| <b>Total Rate Revenue</b>                              |                           | <b>\$39,689,000</b> | <b>\$40,076,000</b> | <b>\$40,468,000</b> | <b>\$40,468,000</b> | <b>\$40,468,000</b> |

# City of Roseville – Water, Wastewater, and Recycled Rate Study

Figure 18 identifies the operating position based on the proposed financial plan, and Figure 19 shows the capital plan with funding sources. Figure 20 identifies the ending reserve balance, after direct transfers to the rehabilitation fund for capital expenses.

Figure 18: Wastewater Proposed Operating Position

Figure 19: Wastewater Capital Improvement Plan with Funding Sources

Figure 20: Wastewater Proposed Ending Reserves

### Cost-of-Service Analysis – Wastewater Utility

---

#### Cost-of-Service Process

The proposed wastewater rates derived within this report maintains the prior cost-of-service analysis. The City is currently conducting an audit on assigned Sewer Units to each parcel at the point of development and whether the Sewer Units require adjustments based on the current land use of each parcel. Therefore, proposed wastewater rates over the Rate Setting Period applies the revenue adjustments identified in [Table 43](#) to the existing wastewater rates. An updated cost-of-service analysis will be completed during the next rate cycle once the Sewer Unit audit is completed.

#### Revenue Requirements

The proposed revenue requirements over the Rate Setting Period include O&M expenses, treatment plant expenses, available revenue offsets, non-rate revenues, and reserve funding. The proposed revenue adjustments and corresponding rates accumulate the necessary funding over the Rate Setting Period to fund O&M, capital projects and comply with minimum reserve requirements. The results of the financial plan analysis are summarized in [Table 45](#) and represent the revenue required from rates over the Rate Setting Period (FY 2024 and FY 2025).

## Cost-Based Rates – Wastewater Utility

### Proposed Charges

Table 46 provides the two-year wastewater rate schedule through FY 2025. The revenue adjustment for FY 2024 (6%) is applied to the current rates to derive proposed FY 2024 wastewater rates. Similarly, the revenue adjustment for FY 2025 (6%) is applied across-the-board to the proposed FY 2024 wastewater rates to derive FY 2025 proposed wastewater rates.

Table 46: Proposed Wastewater Fixed Charges and Variable Rates

| Revenue Adjustments:              |          | 6.0%     | 6.0%     |
|-----------------------------------|----------|----------|----------|
| Monthly Fixed Charges (\$/ Month) |          |          |          |
| Customer Class                    | Existing | FY 2024  | FY 2025  |
| Residential (per month)           | \$47.56  | \$50.42  | \$53.45  |
| Commercial - Metered              | \$47.56  | \$50.42  | \$53.45  |
| Commercial - Flat                 | \$47.56  | \$50.42  | \$53.45  |
| Variable Rate (\$/ccf)            |          |          |          |
| Customer Class                    | Existing | FY 2024  | FY 2025  |
| Commercial - Metered              | \$4.4300 | \$4.6958 | \$4.9776 |

## Recycled Water

The wastewater system produces approximately one billion gallons of recycled water annually. The City has been ramping up its reinvestment in the recycled water system that keeps up with its asset depreciation. The increase in capital spending will continue to gradually build up over the years, with \$486k in FY 2024 and reaching \$928k by FY 2028. Figure 21 shows the City's capital plan through the Financial Plan Period.

Figure 21: Recycled Capital Improvement Plan

## Customers

As of July 1, 2022, the City serves a total of 214 recycled accounts as shown in Table 47 by meter size.

Table 47: Recycled Accounts by Meter Size

| Meter Size | Number of Accounts |
|------------|--------------------|
| 3/4"       | 8                  |
| 1"         | 22                 |
| 1 1/2"     | 42                 |
| 2"         | 93                 |
| 3"         | 28                 |
| 4"         | 11                 |
| 6"         | 5                  |
| 8"         | 3                  |
| 10"        | 2                  |
| Total      | 214                |

# City of Roseville – *Water, Wastewater, and Recycled Rate Study*

The current recycled rate structure consists of monthly fixed charges and a uniform variable rate. Existing meter charges and variable rate are identified in Table 48.

Table 48: FY 2023 Recycled Water Fixed Charges and Variable Rate

| Fixed Meter Charges (\$/Month) |            |
|--------------------------------|------------|
| Meter size                     | Existing   |
| 3/4"                           | \$20.64    |
| 1"                             | \$31.87    |
| 1 1/2"                         | \$59.95    |
| 2"                             | \$93.63    |
| 3"                             | \$200.32   |
| 4"                             | \$357.53   |
| 6"                             | \$733.72   |
| 8"                             | \$1,575.94 |
| 10"                            | \$2,362.01 |
| Variable Rate (\$/CCF)         |            |
| Recycled                       | Existing   |
| Variable Unit Rate             | \$1.02     |

## Financial Plan Overview – Recycled Utility

### Financial Planning Assumptions

Similar to the other utilities, certain assumptions are required for projecting revenues, expenses, and expected ending fund balances. Table 49 identifies assumptions used for forecasting revenues. Table 50 identifies assumptions used for forecasting increases in expenses through the Financial Plan Period.

*Table 49: Recycled Assumptions for Forecasting Revenues*

| Key Assumptions            | FY 2024    | FY 2025    | FY 2026    | FY 2027    | FY 2028    |
|----------------------------|------------|------------|------------|------------|------------|
| Revenue Escalation         |            |            |            |            |            |
| Non-Inflated               | 0.0%       | 0.0%       | 0.0%       | 0.0%       | 0.0%       |
| Non-Rate Revenues          | 2.0%       | 2.0%       | 2.0%       | 2.0%       | 2.0%       |
| Reserve Interest           | 0.5%       | 0.5%       | 0.5%       | 0.5%       | 0.5%       |
| Meter Size                 | FY 2024    | FY 2025    | FY 2026    | FY 2027    | FY 2028    |
| Recycled                   |            |            |            |            |            |
| 3/4"                       | 8          | 8          | 8          | 8          | 8          |
| 1"                         | 22         | 22         | 22         | 22         | 22         |
| 1 1/2"                     | 42         | 42         | 42         | 42         | 42         |

# City of Roseville – *Water, Wastewater, and Recycled Rate Study*

## Current Financial Position

### Revenues

Based on the forecasting assumptions, revenues were calculated using existing recycled rates (Table 48), multiplied by meters by size and recycled water usage (Table 49). Table 51 shows the calculated revenues through the Financial Plan Period. Table 52 provides a summary of calculated rate revenues and other non-rate revenues available through the Financial Plan Period (rounded to thousands). Non-rate revenues increase over the Financial Plan Period using the inflation factor in Table 49.

*Table 51: Recycled Calculated Rate Revenues*

| Calculated Revenue             | FY 2024            | FY 2025            | FY 2026            | FY 2027            | FY 2028            |
|--------------------------------|--------------------|--------------------|--------------------|--------------------|--------------------|
| Monthly Service Charge Revenue | \$417,048          | \$417,048          | \$417,048          | \$417,048          | \$417,048          |
| Variable Revenues              | \$1,663,603        | \$1,663,603        | \$1,663,603        | \$1,663,603        | \$1,663,603        |

# City of Roseville – *Water, Wastewater, and Recycled Rate Study*

## Expenses

The FY 2023 budget was used as the utility's baseline expenses and adjusted in subsequent years based on the escalation factors shown in Table 50. In addition, the City recently completed an independent valuation on staffing needs throughout the City and the results were captured within a long-term labor staffing forecast (labor forecast), which were incorporated into the O&M expense projections. Table 53 provides projected O&M expenses through the Financial Plan Period (rounded to thousands). Each expense category includes detailed line-item expenditures that were discussed with staff to determine the appropriate escalation factor to use for forecasting how costs will increase over time. Recycled water also pays a proportional share of electricity costs at the wastewater plants for tertiary treatment of influent.

*Table 53: Recycled Projected O&M Expenses*

| Expenditure Summary                | FY 2024            | FY 2025            | FY 2026            | FY 2027            | FY 2028            |
|------------------------------------|--------------------|--------------------|--------------------|--------------------|--------------------|
| Operating Expenses                 |                    |                    |                    |                    |                    |
| Recycled Water                     | \$709,000          | \$864,000          | \$891,000          | \$919,000          | \$1,128,000        |
| Allocated Electricity Costs        | \$580,000          | \$603,000          | \$627,000          | \$652,000          | \$679,000          |
| <b>Subtotal Operating Expenses</b> | <b>\$1,289,000</b> | <b>\$1,467,000</b> | <b>\$1,518,000</b> | <b>\$1,571,000</b> | <b>\$1,807,000</b> |

## Reserves

For financial planning, similar reserve targets for water and wastewater were used, except for the rehabilitation fund. The rehabilitation target was set at a rolling 5-year average of upcoming capital due to the increase in capital spending planned. These reserves help mitigate risks to the utility by ensuring sufficient cash is on hand for daily operations and to fund annual system improvements. These reserves help smooth rates and mitigate rate spikes due to emergencies or above-average system costs. Table 54 summarizes the recommended minimum reserve requirements and the ideal funding targets of each reserve.

*Table 54: Recycled Reserve Requirements and Targets*

| Reserve            | Minimum Requirement                   | Reserve Target                        |
|--------------------|---------------------------------------|---------------------------------------|
| Operating          | 90 days of operating costs            | 180 days of operating costs           |
| Rehabilitation     | 5-year average of upcoming capital    | -                                     |
| Rate Stabilization | 25% of next year's operating expenses | 50% of next year's operating expenses |

The reserve balance as of July 1, 2022 equaled approximately \$600k.

Financial Outlook at Existing Rates

Calculating revenue using existing rates and projecting expenses helps determines the current financial health of the utility. Revenues from existing rates are sufficient to fund O&M through the Financial Plan Period. However, only a portion of the system rehabilitation needs can be funded with projected net operating income resulting in the use of reserves to cover the remaining capital costs that are ramping up. By FY 2026, reserves are below the minimum requirement. Figure 22 illustrates the operating position of the utility, where O&M expenses are identified with the dashed red trendline, and total revenues at existing rates are shown by the horizontal black trendline. The bars represent the amount of net operating income available. Figure 23 reflects the projected ending balances of reserves after operating, and capital projects are funded through the Financial Plan Period.

Figure 22: Recycled Current Operating Financial Position

Figure 23: Recycled Projected Ending Reserves at Existing Rates

## Proposed Financial Plan – Recycled Utility

From the financial outlook at existing rates, a proposed financial plan can be developed to adequately fund the multi-year revenue requirements while meeting reserve requirements. Based on funding the capital plan and ensuring reserves meet minimum targets over the Financial Plan Period, **Table 55** forecasts projected revenues and expenses over the Financial Plan Period, including projected revenue adjustments outside the Rate Setting Period for FY 2026 through FY 2028.

**Table 55: Recycled Proposed Financial Plan**

| Revenue                                         |                    | FY 2024     | FY 2025     | FY 2026     | FY 2027     | FY 2028     |
|-------------------------------------------------|--------------------|-------------|-------------|-------------|-------------|-------------|
| Rate Revenue                                    |                    |             |             |             |             |             |
| Monthly Service Charge Revenue                  | Table 52           | \$417,000   | \$417,000   | \$417,000   | \$417,000   | \$417,000   |
| Variable Revenues                               |                    | \$1,664,000 | \$1,664,000 | \$1,664,000 | \$1,664,000 | \$1,664,000 |
| Total Rate Revenue                              |                    | \$2,081,000 | \$2,081,000 | \$2,081,000 | \$2,081,000 | \$2,081,000 |
| Additional Revenue (from revenue adjustments) : |                    |             |             |             |             |             |
| Fiscal Year                                     | Revenue Adjustment |             |             |             |             |             |
| FY 2024                                         | 5.0%               | \$104,000   | \$104,000   | \$104,000   | \$104,000   | \$104,000   |
| FY 2025                                         | 5.0%               |             | \$109,000   | \$109,000   | \$109,000   | \$109,000   |

# City of Roseville – Water, Wastewater, and Recycled Rate Study

Figure 24 identifies the operating position based on the proposed financial plan, and Figure 25 show the capital plan with funding sources. Figure 26 identifies the ending reserve balances.

Figure 24: Recycled Proposed Operating Position

Figure 25: Recycled Capital Improvement Plan with Funding Sources

Figure 26: Recycled Proposed Ending Reserves

## Cost-of-Service Analysis – Recycled Utility

### Cost-of-Service Process

The next step in developing recycled rates is to perform a cost-of-service analysis. Through this process, costs incurred are allocated to customers based on their proportional share. As a result, proposed rates are cost-based and reflect the costs incurred to provide service to customers.

### Revenue Requirements

FY 2024 revenue requirements were used for the cost-of-service analysis. Revenue requirements include O&M expenses, electricity expenses from the treatment plants, revenue offsets, and reserve funding. The proposed revenue adjustments and corresponding rates accumulate the necessary funding over the Financial Plan Period to fund O&M, capital projects, and comply with minimum reserve requirements. The results of the financial plan analysis are summarized in [Table 57](#) and represent the revenue required from rates over the Rate Setting Period (FY 2024 and FY 2025).

*Table 57: FY 2024 – FY 2025 Recycled Revenue Requirements*

|                                  | FY 2024     | FY 2025     |
|----------------------------------|-------------|-------------|
| Revenue Requirements             | Total       | Total       |
| Operations and Maintenance       |             |             |
| Recycled Water                   | \$709,000   | \$864,000   |
| Allocated Electricity Costs      | \$580,000   | \$603,000   |
| Total Operations and Maintenance | \$1,289,000 | \$1,467,000 |
| Revenue Offsets                  |             |             |
| Licenses and Permits             | (\$1,000)   | (\$1,000)   |
| Other Fees                       | (\$4,000)   | (\$4,000)   |
| Capital Contributions            | (\$15,000)  | (\$15,000)  |
| Total Revenue Offsets            | (\$20,000)  | (\$20,000)  |
| Adjustments                      |             |             |
| Reserve Funding                  | \$916,000   | \$847,000   |
| Total Adjustments                | \$916,000   | \$847,000   |
| Revenue Required from Rates      | \$2,185,000 | \$2,294,000 |

## Cost-Based Rates – Recycled Utility

Based on City policy, recycled fixed charges are set as a percent of potable meter charges and the remaining revenue requirement identified in Table 57 are recovered through the variable rate to cover the cost of providing service. For FY 2024, recycled meter charges are set to 80% of the proposed potable meter charges and, in FY 2025, recycled meter charges are set to 90%. The City plans to increase recycled fixed charges to equal potable fixed charges by FY 2026. The amount of annual revenues generated by the meter rates for each fiscal year are determined and then used to derive variable rates for FY 2024 and FY 2025, respectively.

### Fixed Cost Recovery

Table 58 derives the FY 2024 and FY 2025 recycled monthly meter charges based on 80% and 90% of potable meter charges, respectively, and calculates total revenue generated by the proposed fixed charges.

*Table 58: Proposed Recycled Monthly Meter Charges*

| Potable Meter Charges          | FY 2024    | FY 2025    |
|--------------------------------|------------|------------|
| 3/4"                           | \$29.63    | \$30.82    |
| 1"                             | \$45.74    | \$47.57    |
| 1 1/2"                         | \$86.00    | \$89.44    |
| 2"                             | \$134.32   | \$139.70   |
| 3"                             | \$287.32   | \$298.82   |
| 4"                             | \$512.79   | \$533.31   |
| 6"                             | \$1,052.31 | \$1,094.41 |
| 8"                             | \$2,260.20 | \$2,350.61 |
| 10"                            | \$3,387.56 | \$3,523.07 |
| Recycled Fixed % of Potable    | 80.0%      | 90.0%      |
| Fixed Meter Charges (\$/Month) |            |            |
| Meter size                     | FY 2024    | FY 2025    |
| 3/4"                           | \$23.71    | \$27.74    |
| 1"                             | \$36.60    | \$42.82    |
| 1 1/2"                         | \$68.80    | \$80.50    |
| 2"                             | \$107.46   | \$125.73   |
| 3"                             | \$229.86   | \$268.94   |
| 4"                             | \$410.24   | \$479.98   |
| 6"                             | \$841.85   | \$984.97   |
| 8"                             | \$1,808.16 | \$2,115.55 |
| 10"                            | \$2,710.05 | \$3,170.77 |
| Projected Revenue              | \$478,570  | \$559,932  |

Variable Cost Recovery

Table 59 derives the proposed variable rates by taking the total revenue requirement identified in Table 57 and reducing the amount by total fixed revenue calculated in Table 58. The net amount is divided by total recycled water sales to determine the recycled variable rate for FY 2024 and FY 2025.

Table 59: Proposed Recycled Variable Rates

| Variable Rate (\$/CCF)              |                    |                    |
|-------------------------------------|--------------------|--------------------|
| Recycled                            | FY 2024            | FY 2025            |
| Recycled Revenue Requirement        | \$2,185,000        | \$2,294,000        |
| Less: Projected Revenue from Fixed  | (\$478,570)        | (\$559,932)        |
| <b>Variable Revenue Requirement</b> | <b>\$1,706,430</b> | <b>\$1,734,068</b> |
| ÷ Projected Recycled Usage (ccf)    | 1,630,983          | 1,630,983          |
| <b>Variable Unit Rate</b>           | <b>\$1.05</b>      | <b>\$1.07</b>      |

## **1. EXECUTIVE SUMMARY**

The City provides its residents and businesses with a broad range of solid waste and recyclables collection services. These services include the recently established commercial organics collection service. The charges for these services are included in the City's utility bills. The City periodically analyzes the rates that it charges to ensure that they generate adequate revenue to cover its operating and capital costs.

In May 2021, as a result of a previous study, the City approved a two-year annual rate adjustment. The first adjustment of 15.65% became effective on July 1, 2021. The second adjustment of 16.05% became effective on July 1, 2022.

This rate study found that the current solid waste rates were adequate to cover the City's projected operating and capital costs through fiscal 2025. However, to meet its longer term operating costs, the City's solid waste rates will need to be increased by 4.7% on July 1, 2025, by another 4.7% on July 1, 2026, and by 5.7% on July 1, 2027. This study also found that the rates charged for commercial organics collection service should be better aligned with the cost of service.

## **2. BACKGROUND AND OBJECTIVES**

### **2.1 Background**

The City provides the following types of solid waste services:

- Residential Trash Collection
- Residential Green Waste Collection
- Commercial Organic Collection
- Commercial Trash Collection
- Commercial Cardboard/Recycling Collection
- Rolloff Collection

In addition to the fee-based waste collection services it provides to its customers, the City also engages in several waste collection activities that provide an overall benefit to the community such as household hazardous waste collection, and neighborhood cleanup events.

In 2016, the State adopted SB 1383, which requires all jurisdictions to provide organics collection programs. In response to this new law, the City began providing organics collection service to commercial customers.

The revenue from the fees charged by the City, as well as its solid waste operating and capital expenditures, are recorded in the City's solid waste enterprise fund. Each of the types of services listed above has its own cost center in the solid waste enterprise fund.

In December 2022, the City retained IB Consulting to conduct a cost of service study of the City's water, wastewater, and solid waste rates. MSW Consultants served as subcontractor to IB Consulting to perform the solid waste portion of this rate study. The purpose of the study was to update the City's financial plan for the solid waste enterprise fund, and to review and potentially adjust the City's solid waste rates. In particular, the City wanted to redesign the rates for its commercial organics collection operations. This report is the result of that study.

This report outlines the study's objectives, and the work we performed. It sets forth the City's solid waste rate-making objectives, and lists the key assumptions on which our financial projections are based. Further, this report includes a financial plan for the solid waste enterprise fund, and includes recommended changes to the City's commercial organic rates.

## 2.2 Objectives

The objectives of this solid waste rate study are to:

- Analyze the solid waste enterprise fund's projected revenues and expenditures, and project its total revenue requirement through fiscal 2028.
- Prepare a financial plan that will enable the City to budget and plan for its operating and capital expenditures, and operating cash balance.
- Identify the nexus between the City's organics collection cost of service and the individual rates the City charges customers for organics collection service.
- Design cost-based rates for the City's commercial organics collection service.

### 3. TASKS PERFORMED, KEY ASSUMPTIONS, AND LIMITATIONS

#### 3.1 Task Performed

In performing the solid waste rate study, and in developing our recommendation, we performed the following tasks:

- Gathered financial and operational information from the City including financial reports, and a download of customer information from the City's billing system.
- Updated the City's solid waste revenue model, and built cost of service rate model for organic waste service.
- Projected the enterprise fund's operating expenses based on certain assumptions about inflation and customer volume growth.
- Developed rate adjustment recommendations designed to achieve the City's objectives.
- Reviewed the model with City staff and discussed the impact on various customers.

#### 3.2 Key Assumptions

Our analysis was based on certain assumptions. These include:

- Growth due to changes in the number of customers will be flat.
- Non-rate revenue will grow at an annual rate of 2%.
- The *ideal* targeted reserve cash balance is equal to 180 days of operating expenses, or 50% of annual operating costs.
- The *minimum* targeted reserve cash balance is equal to 90 days of operating expenses, or 25% of annual operating costs.
- Expenses will grow at the annual rates shown on the following page in Table 1.

**Table 1 - Key Assumptions**

| Financial Inputs       | FY 2024 | FY 2025 | FY 2026 | FY 2027 | FY 2028 |
|------------------------|---------|---------|---------|---------|---------|
| Expenditure Escalation |         |         |         |         |         |
| Benefits               | 3.0%    | 3.0%    | 3.0%    | 3.0%    | 3.0%    |

### 3.3 Limitations

The financial projections in this report are subject to certain limitations. These projections were prepared pursuant to the assumptions described above and are based on information provided by the City. These projections were prepared for the sole use of the City for the purpose of analyzing the City's solid waste collections rates. They are not intended to be used for any other purpose.

Moreover, these projections are based on assumptions regarding future inflation, customer account growth rates, and planned capital expenditures. There may be differences between projected and actual results because events and circumstances do not always occur as expected, and those differences may be material.

#### 4. FINANCIAL PLAN – SOLID WASTE ENTERPRISE FUND

The financial plan for the solid waste enterprise fund consists of an analysis of the enterprise fund's projected annual operating results and ending cash balances.

##### 4.1 Operating Results

Based on the key assumptions, the solid waste enterprise fund's projected operating results are shown below in Table 2.

**Table 2 - Projected Operating Results**

| Description                                | FY 2022         | FY 2023         | FY 2024         | FY 2025         | FY 2026         | FY 2027         | FY 2028         |
|--------------------------------------------|-----------------|-----------------|-----------------|-----------------|-----------------|-----------------|-----------------|
| <b>Rate Revenue</b>                        |                 |                 |                 |                 |                 |                 |                 |

in 000s

Table 2 shows that total rate revenue is projected to increase from approximately \$35.2 million in fiscal 2022 to approximately \$42.1 million in fiscal 2023. This is primarily due to the 16.05% rate adjustment that was implemented on July 1, 2022.

Table 2 also shows that the rate adjustments projected to occur in July 2025, 2026, and 2027 will generate new revenue of approximately \$2.0 million in fiscal 2026, \$4.0 million in fiscal 2027, and \$6.6 million in fiscal 2028.

Table 2 also shows that total expenses are projected to increase from \$36.3 million in fiscal 2023 to approximately \$48.1 million in fiscal 2028, an average increase of approximately 6.4% per year.

The amount of net cash flow is projected to decrease significantly from fiscal 2023 through fiscal 2025. This is due to projected expenses continuing to increase while rate revenues remain the same. Net cash flow is projected to remain positive through fiscal 2028. The positive net cash flow in fiscal 2026, 2027, and 2028 is due to the projected rate adjustments beginning in fiscal 2026.

Chart 1 below show the relationship between projected revenues and expenses and the resulting net cash flow.

**Chart 1 – Projected Revenue, Expenses and Net Cash Flow**

## 4.2 Operating Cash Balance

Table 3 below shows that the operating cash balance is projected to increase from approximately \$12.7 million in fiscal 2022 to approximately \$20.7 million in fiscal 2028. This increase is primarily due to the positive net cash flow in fiscal years 2022, 2023 and 2024.

Table 3 shows that the ending cash balance in fiscal 2028 is projected to be approximately \$20.7 million. This amount is well above the minimum target amount of approximately \$11.9 million (based on 90 days of operating expenses), and somewhat below the ideal target amount of approximately \$23.7 million (based on 180 days of operating expenses).

**Table 3 – Operating Cash Balance**

| Operating Fund                          | FY 2022         | FY 2023         | FY 2024         | FY 2025         | FY 2026         | FY 2027         | FY 2028         |

| <b>Ending Balance</b>                   | <b>\$12,747</b> | <b>\$17,069</b> | <b>\$19,156</b> | <b>\$19,736</b> | <b>\$20,360</b> | <b>\$20,548</b> | <b>\$20,662</b> |

|         |          |          |          |          |          |          |          |
|---------|----------|----------|----------|----------|----------|----------|----------|
| Target  |          |          |          |          |          |          |          |
| Minimum | \$6,343  | \$8,953  | \$9,533  | \$10,080 | \$10,589 | \$11,205 | \$11,869 |
| Ideal   | \$12,686 | \$17,906 | \$19,066 | \$20,159 | \$21,179 | \$22,411 | \$23,737 |

in 000s

Chart 2 below shows the relationship between the projected ending cash balance, and the minimum and ideal target balances.

**Chart 2 - Ending Cash Balance and Target Reserves**

### **4.3 Recommend Rate Adjustments**

Based on the analysis of the enterprise fund's projected operating results and projected cash balances, we recommend that the City not adjust rates for fiscal 2024 and fiscal 2025 (with the exception of the reduction in commercial organics discussed in the following section). However, to generate positive net cash flow in fiscal 2026, 2027, and 2028, we recommend that the City plan on increasing solid waste rates across the board by 4.7% on July 1, 2025, 4.7% on July 1, 2026, and 5.7% on July 1, 2027.

## 5. COST OF SERVICE – COMMERCIAL ORGANICS COLLECTION

The cost-of-service analysis determines the equitable allocation of the total revenue requirement among the various types of cost for commercial organics collection service. The following tables show how the revenue requirement for commercial organics collection is allocated among various types of cost. These types of cost include Service Area Travel Time, Container Emptying Time, Processing Facility Travel Time, and Processing Facility Tipping Fee cost.

### 5.1 Breakdown of Revenue Requirement Among Cost Categories

Table 4 shows the breakdown of the total revenue requirement for commercial organic waste collection service. According to the City's financial system, the total revenue requirement in fiscal 2023 of \$367,223 is comprised of \$219,223 in route operating cost, and \$148,000 in processing facility tipping fee cost.

**Table 4 - Revenue Requirement for Organic Waste Service**

| <b>Cost Category</b>                    | <b>FY 2023 Annual Amount</b> | <b>% of Total Revenue Requirement</b> |
|-----------------------------------------|------------------------------|---------------------------------------|
| Driver Labor                            | \$82,941                     | 23%                                   |
| Labor Burden                            | 52,252                       | 14%                                   |
| Fuel                                    | 22,000                       | 6%                                    |
| Vehicle Maintenance                     | 56,908                       | 15%                                   |
| Other Operating Cost                    | 5,123                        | 1%                                    |
| <b>Subtotal: Route Operating Cost</b>   | <b>\$219,223</b>             | <b>60%</b>                            |
| <b>Processing Facility Tipping Fees</b> | <b>\$148,000</b>             | <b>40%</b>                            |
| <b>Total Annual Revenue Requirement</b> | <b>\$367,223</b>             | <b>100%</b>                           |

### 5.2 Route Operating Statistics

Table 5 on the following page shows the proportionate share of a typical day that the commercial organics route spends on various tasks. The percentages in Table 5 are used further below to allocate cost categories (labor, processing costs, etc.) to the types of cost (service area travel time, etc.).

**Table 5 - Route Operating Statistics**

| Description                        | Hours per Day | % of Operating Time |
|------------------------------------|---------------|---------------------|
| Travel time in service area        | 3.75          | 46.9%               |
| 65 gallon dumping time             | 2.69          | 33.6%               |
| 2 yard dumping time                | 0.91          | 11.4%               |
| Travel time to processing facility | 0.65          | 8.1%                |
| <b>Total</b>                       | <b>8.00</b>   | <b>100.0%</b>       |

Table 6 shows how the percentages in Table 5 are used to allocate the revenue requirement to the various types of cost.

**Table 6 - Revenue Requirement after Route Operating Cost Reallocation**

| Cost Type                             | Allocation Factor | Annual Amount of Revenue Requirement | Monthly Amount of Revenue Requirement |
|---------------------------------------|-------------------|--------------------------------------|---------------------------------------|
| Route Operating Cost :                |                   |                                      |                                       |
| Service area travel time cost         | 46.9%             | \$102,761                            | \$8,563                               |
| 65 gallon dumping time                | 33.6%             | 73,603                               | 6,134                                 |
| 2 yard dumping time                   | 11.4%             | 25,047                               | 2,087                                 |
| Processing facility site travel time  | 8.1%              | 17,812                               | 1,484                                 |
| <b>Subtotal: Route Operating Cost</b> | <b>100.0%</b>     | <b>\$219,223</b>                     | <b>\$18,269</b>                       |
| Processing Facility Cost              |                   | 148,000                              | 12,333                                |
| <b>Total Cost:</b>                    |                   | <b>\$367,223</b>                     | <b>\$30,602</b>                       |

## **6. RATE DESIGN – COMMERCIAL ORGANICS COLLECTION**

In this section, cost-based organic waste rates were designed for each level of service to achieve the revenue requirement discussed in the last section. Rates were designed by identifying the “cause-and-effect” relationship between the activities or use of resources (cost drivers), and the resulting costs incurred. As a result, the individual customer rates reflect the nexus between the cost of service and the rate charged to the customer.

### **6.1 Rate Design Method**

Cost-based collection rates were designed by identifying the cost types associated with each of the following cost “drivers”:

- **Service Area Travel Time Cost** - The time to travel to the service area. It begins when the truck arrives in the service area, ends when the truck leaves for the processing facility, and excludes the time spent emptying containers. This type of cost was allocated among customers based on the number of stops. For example, a commercial customer with three pickups per week was allocated three times as much of this cost as a customer with one pickup per week.
- **Container Emptying Time Cost** - The time spent emptying containers. It begins when the truck arrives in front of the container(s) at a customer stop and ends when the last container is emptied and the truck leaves for the next stop. This type of cost was allocated among customers based on the number of containers. For example, a commercial customer with two containers was allocated twice as much of this cost as a customer with one container.
- **Processing Facility Travel Time Cost** - The time it takes to travel to the processing facility, unload the truck, and return to the service area. This type of cost was allocated among customers based on the amount of container capacity serviced per week. This is because a customer with twice as much container capacity serviced per week causes the truck to fill up faster and travel to the processing facility more frequently, than a customer with half as much container capacity serviced per week. For example, a commercial customer with six cubic yards of capacity serviced per week was allocated twice as much of this cost as a customer with three cubic yards of capacity serviced per week.
- **Processing Facility Tipping Fee Cost** – The variable cost of fees per ton incurred at processing facilities. This type of cost was allocated among customers based on the amount of container capacity serviced per week (same as Processing Facility Travel Time Cost). This is because the amount of container capacity serviced per week is a reasonable measure of the relative weight of waste collected and delivered to the processing facility. For example, a

commercial customer with six cubic yards of capacity serviced per week was allocated twice as much of this cost as a customer with three cubic yards of capacity serviced per week.

## 6.2 Rate Design Approach

The following tables in this section describe how the cost types from Table 6 are allocated to each level of service based on certain operating statistics. Once these cost types are allocated to each level of service, they are combined to derive the actual cost for each level of service, which are the recommended rates.

The recommended rates for each level of service are extended by the number of customers at each level of service (and multiplied by twelve months) to calculate the annual revenue requirement. Finally, the recommended rates are compared to the existing rates.

## 6.3 Customer Distribution

Table 7 below shows the customer distribution of commercial organics customers by level of service.

**Table 7 - Customer Distribution and Operational Data**

| Bin Capacity | No. of Bins | Pickups per Week: |    |   |   |   | Total |
|--------------|-------------|-------------------|----|---|---|---|-------|
|              |             | 1                 | 2  | 3 | 4 | 5 |       |
| 65 Gallon    | 1           | 79                | 15 | 0 | 0 | 0 | 94    |
| 65 Gallon    | 2           | 26                | 25 | 0 | 0 | 0 | 51    |
| 65 Gallon    | 3           | 14                | 17 | 3 | 0 | 1 | 35    |
| 65 Gallon    | 4           | 2                 | 2  | 0 | 0 | 0 | 4     |
| 65 Gallon    | 5           | 0                 | 0  | 0 | 0 | 0 | 0     |
| 65 Gallon    | 6           | 0                 | 1  | 0 | 0 | 0 | 1     |
| 2 Cubic Yard | 1           | 21                | 21 | 7 | 1 | 1 | 51    |
| 2 Cubic Yard | 2           | 0                 | 1  | 1 | 0 | 1 | 3     |

## 6.4 Operating Statistics

Table 8 below shows the operating statistics of the City's commercial organics collection operations. The operational statistics in Table 8 are calculated based on the customer distribution and operational data in Table 7.

**Table 8 - Operational Statistics Based on Customer Distribution**

| Operational Statistic            |                        | Pickups per Week: |       |     |     |     | Total |
|----------------------------------|------------------------|-------------------|-------|-----|-----|-----|-------|
|                                  |                        | 1                 | 2     | 3   | 4   | 5   |       |
| Stops per Month:                 |                        |                   |       |     |     |     |       |
| 65 Gallon                        |                        | 524               | 520   | 39  | 0   | 22  | 1,104 |
| 2 Cubic Yards                    |                        | 91                | 191   | 104 | 17  | 43  | 446   |
| Total                            |                        |                   |       |     |     |     | 1,550 |
| Container-Lifts per Month:       |                        |                   |       |     |     |     |       |
| 65 Gallon                        |                        | 784               | 1,126 | 117 | 0   | 65  | 2,091 |
| 2 Cubic Yards                    |                        | 91                | 199   | 117 | 17  | 65  | 489   |
| Total                            |                        |                   |       |     |     |     | 2,581 |
| Cubic-yards Collected per Month: |                        |                   |       |     |     |     |       |
| 65 Gallon                        | 1                      | 110               | 42    | 0   | 0   | 0   | 152   |
|                                  | 2                      | 73                | 140   | 0   | 0   | 0   | 213   |
|                                  | 3                      | 59                | 143   | 38  | 0   | 21  | 260   |
|                                  | 4                      | 11                | 22    | 0   | 0   | 0   | 34    |

| Subtotal of containers           |                        | 181               | 130   | 9   | 0   | 3   | 323   |
| 2 Cubic Yard                     | 1                      | 21                | 21    | 7   | 1   | 1   | 51    |
|                                  | 2                      | 0                 | 2     | 2   | 0   | 2   | 6     |
|                                  | Subtotal of containers |                   | 21    | 23  | 9   | 1   | 3     |
| Total Number of Containers:      |                        | 202               | 153   | 18  | 1   | 6   | 380   |
| Number of Customers:             |                        | 142               | 82    | 11  | 1   | 3   | 239   |

## 6.5 Service Area Travel Time Cost

Table 9 below calculates the Service Area Travel Time Cost. Table 9 shows that the \$8,563 in monthly Service Area Travel Time in Table 6 when divided by the 1,550 stops from Table 8 is equal to \$5.52 per month per stop. This amount is multiplied by the number of stops per month to determine the monthly Service Area Travel Time cost per stop. For example, a container collected once per week is collected an average of 4.33 weeks in a month. As a result, the monthly Service Area Travel Time cost for one 65-gallon container collected once per week is \$23.92 (\$5.52 X 4.33 weeks in a month).

**Table 9 - Service Area Travel Time Cost**

### Service Area Travel Time Cost

Cost of traveling in the service area and emptying the containers.

#### Service Area Travel Time Cost per Stop:

Monthly Service Area Travel Time Cost \$8,563

Number of Stops per Month 1,550

Service Area Travel Time Cost per Stop **\$5.52**

| Bin Capacity | No. of Bins | Pickups per Week: |         |         |         |          |
|--------------|-------------|-------------------|---------|---------|---------|----------|
|              |             | 1                 | 2       | 3       | 4       | 5        |
| 65 Gallon    | 1           | \$23.92           | \$47.84 | \$71.76 | \$95.68 | \$119.60 |
| 65 Gallon    | 2           | \$23.92           | \$47.84 | \$71.76 | \$95.68 | \$119.60 |
| 65 Gallon    | 3           | \$23.92           | \$47.84 | \$71.76 | \$95.68 | \$119.60 |
| 65 Gallon    | 4           | \$23.92           | \$47.84 | \$71.76 | \$95.68 | \$119.60 |
| 65 Gallon    | 5           | \$23.92           | \$47.84 | \$71.76 | \$95.68 | \$119.60 |
| 65 Gallon    | 6           | \$23.92           | \$47.84 | \$71.76 | \$95.68 | \$119.60 |
| 2 Cubic Yard | 1           | \$23.92           | \$47.84 | \$71.76 | \$95.68 | \$119.60 |
| 2 Cubic Yard | 2           | \$23.92           | \$47.84 | \$71.76 | \$95.68 | \$119.60 |

#### Formula:

The number of stops per week multiplied by the Operating Cost per Stop multiplied by 4.33 weeks.

#### Example (outlined above) 65gallon serviced once per week:

One stop times \$5.52 times 4.33 weeks equals: **\$23.92**

## 6.6 Container Emptying Time Cost

Table 10 on the following page calculates the Container Emptying Time Cost. Table 10 shows that the \$6,134 in monthly Container Emptying Time Cost for 65-gallon containers in Table 6 when divided by the 2,091 container lifts from Table 8 is equal to \$2.93 per month per lift.

This amount is multiplied by the number of lifts per month to determine the monthly Container Emptying Time cost per lift. For example, a container collected once per week is collected an average of 4.33 weeks in a month. As a result, the monthly Container Emptying Time cost for one 65-gallon container collected once per week is \$12.70 (\$2.93 X 4.33 weeks in a month).

**Table 10 - Container Emptying Time Cost**

**Container Emptying Time Cost**

Cost of the time taken to empty containers while on the customers property.

**Container Emptying Time Cost per Lift:**

Monthly Container Emptying Time

Cost:

|                             |         |
|-----------------------------|---------|
| 65 Gallon Dumping Time Cost | \$6,134 |
| 2 Yard Dumping Time Cost    | \$2,087 |

Number of Lifts per Month:

|                           |       |
|---------------------------|-------|
| 65 Gallon Container Lifts | 2,091 |
| 2 Yard Container Lifts    | 489   |

Container Emptying Cost per Lift:

|                               |               |
|-------------------------------|---------------|
| 65 Gallon Cont. Cost per Lift | <b>\$2.93</b> |
| 2 yard Cont. Cost per Lift    | <b>\$4.27</b> |

| Bin Capacity | No. of Bins | Pickups per Week: |          |          |          |          |
|--------------|-------------|-------------------|----------|----------|----------|----------|
|              |             | 1                 | 2        | 3        | 4        | 5        |
| 65 Gallon    | 1           | \$12.70           | \$25.40  | \$38.10  | \$50.80  | \$63.49  |
| 65 Gallon    | 2           | \$25.40           | \$50.80  | \$76.19  | \$101.59 | \$126.99 |
| 65 Gallon    | 3           | \$38.10           | \$76.19  | \$114.29 | \$152.39 | \$190.48 |
| 65 Gallon    | 4           | \$50.80           | \$101.59 | \$152.39 | \$203.18 | \$253.98 |
| 65 Gallon    | 5           | \$63.49           | \$126.99 | \$190.48 | \$253.98 | \$317.47 |
| 65 Gallon    | 6           | \$76.19           | \$152.39 | \$228.58 | \$304.77 | \$380.97 |
| 2 Cubic Yard | 1           | \$18.47           | \$36.94  | \$55.41  | \$73.88  | \$92.36  |
| 2 Cubic Yard | 2           | \$36.94           | \$73.88  | \$110.83 | \$147.77 | \$184.71 |

**Formula:**

The number of lifts per week multiplied by the Container Emptying Cost per Lift multiplied by 4.33 weeks.

**Example (outlined above) 65gallon serviced once per week:**

One lift times \$2.93 times 4.33 weeks equals: **\$12.70**

## 6.7 Processing Facility Travel Time Cost

Table 11 below calculates the Processing Facility Travel Time Cost. Table 11 shows that the \$1,484 in monthly Processing Facility Travel site time cost in Table 6 when divided by the 1,654 cubic yards from Table 8 is equal to \$0.90 per month per cubic yard. This amount is multiplied by the number of cubic yards per month to determine the monthly Processing Facility Travel time cost per cubic yard. For example, a 65-gallon container collected once per week is equal to 0.323 cubic yards per month. As a result, the monthly Processing Facility Travel Time cost for one 65-gallon container collected once per week is \$1.26 (\$0.90 X .323 cubic yards X 4.33 weeks in a month).

**Table 11 - Processing Facility Travel Time Cost**

### Processing Facility Travel Time Cost

Cost of the time it takes to travel from the service area to the processing facility, empty the load and return to the service area.

### Processing Facility Travel Time Cost per Yard

Monthly Processing Facility Travel Time Cost: \$1,484

Number of Cubic Yards Collected per Month 1,654

Processing Facility Travel Time Cost per Cubic Yard Collected: \$0.90

| Bin Capacity | No. of Bins | Pickups per Week: |         |         |         |         |
|--------------|-------------|-------------------|---------|---------|---------|---------|
|              |             | 1                 | 2       | 3       | 4       | 5       |
| 65 Gallon    | 1           | \$1.26            | \$2.51  | \$3.77  | \$5.02  | \$6.28  |
| 65 Gallon    | 2           | \$2.51            | \$5.02  | \$7.53  | \$10.04 | \$12.55 |
| 65 Gallon    | 3           | \$3.77            | \$7.53  | \$11.30 | \$15.06 | \$18.83 |
| 65 Gallon    | 4           | \$5.02            | \$10.04 | \$15.06 | \$20.08 | \$25.10 |
| 65 Gallon    | 5           | \$6.28            | \$12.55 | \$18.83 | \$25.10 | \$31.38 |
| 65 Gallon    | 6           | \$7.53            | \$15.06 | \$22.59 | \$30.12 | \$37.65 |
| 2 Cubic Yard | 1           | \$7.77            | \$15.54 | \$23.31 | \$31.08 | \$38.86 |
| 2 Cubic Yard | 2           | \$15.54           | \$31.08 | \$46.63 | \$62.17 | \$77.71 |

### Formula:

The number of cubic yards collected per week multiplied by the Processing Facility Travel Cost per Yard multiplied by 4.33 weeks

### Example (outlined above) 65gallon serviced once per week:

0.323 cubic yds. times \$0.90 times 4.33 weeks equals: **\$1.26**

## 6.8 Processing Facility Tipping Fee Cost

Table 12 below calculates the Processing Facility Tipping Fee Cost. Table 12 shows that the \$12,333 in monthly Processing Facility Tipping Fee cost in Table 6 when divided by the 1,654 cubic yards from Table 8 is equal to \$7.46 per month per stop. This amount is multiplied by the number of cubic yards per month to determine the monthly Processing Facility Tipping Fee cost per cubic yard. For example, a 65-gallon container collected once per week is equal to 0.323 cubic yards per month. As a result, the monthly Processing Facility Tipping Fee cost for one 65-gallon container collected once per week is \$10.43 (\$7.46 X 0.323 cubic yards X 4.33 weeks in a month).

**Table 12 - Processing Facility Tipping Fee Cost**

**Processing Facility Tipping Fee Cost per Yard:**

|                                       |               |
|---------------------------------------|---------------|
| Average Monthly Disposal Tip Fee Cost | \$12,333      |
| Cubic Yards Collected per Month       | 1,654         |
| Tip Fee per Cubic Yard                | <b>\$7.46</b> |

| Bin Capacity | No. of Bins | Pickups per Week: |          |          |          |          |
|--------------|-------------|-------------------|----------|----------|----------|----------|
|              |             | 1                 | 2        | 3        | 4        | 5        |
| 65 Gallon    | 1           | \$10.43           | \$20.86  | \$31.28  | \$41.71  | \$52.14  |
| 65 Gallon    | 2           | \$20.86           | \$41.71  | \$62.57  | \$83.43  | \$104.28 |
| 65 Gallon    | 3           | \$31.28           | \$62.57  | \$93.85  | \$125.14 | \$156.42 |
| 65 Gallon    | 4           | \$41.71           | \$83.43  | \$125.14 | \$166.85 | \$208.56 |
| 65 Gallon    | 5           | \$52.14           | \$104.28 | \$156.42 | \$208.56 | \$260.70 |
| 65 Gallon    | 6           | \$62.57           | \$125.14 | \$187.71 | \$250.28 | \$312.85 |
| 2 Cubic Yard | 1           | \$64.57           | \$129.14 | \$193.71 | \$258.28 | \$322.85 |
| 2 Cubic Yard | 2           | \$129.14          | \$258.28 | \$387.43 | \$516.57 | \$645.71 |

**Formula:**

The number of cubic yards collected per week multiplied by the Processing Facility Tipping Fee per Yard multiplied by 4.33 weeks.

**Example (outlined above) 65gallon serviced once per week:**

0.323 cubic yds. times \$7.46 times 4.33 weeks equals: **\$10.43**

## 6.9 Monthly Cost of Service – Recommended Rates

Table 13 on the following page calculates the recommended rates. Table 13 combines the monthly cost of service at each level of service from Table 9, Table 10, Table 11, and Table 12

to arrive at the total monthly cost for each level of service. These are the recommended rates for commercial organics collection service.

**Table 13 - Monthly Cost of Service – Recommended Rates**

**Monthly Cost-based Rate Schedule**

Proposed Rate Schedule

| Bin Capacity   | No. of Bins | Pickups per Week: |          |          |          |            |
|----------------|-------------|-------------------|----------|----------|----------|------------|
|                |             | 1                 | 2        | 3        | 4        | 5          |
| 65 Gallon      | 1           | \$48.30           | \$96.60  | \$144.90 | \$193.20 | \$241.50   |
| 65 Gallon      | 2           | \$72.68           | \$145.36 | \$218.04 | \$290.72 | \$363.40   |
| 65 Gallon      | 3           | \$97.06           | \$194.12 | \$291.18 | \$388.24 | \$485.30   |
| 65 Gallon      | 4           | \$121.44          | \$242.88 | \$364.32 | \$485.76 | \$607.20   |
| 65 Gallon      | 5           | \$145.82          | \$291.64 | \$437.46 | \$583.28 | \$729.10   |
| 65 Gallon      | 6           | \$170.20          | \$340.40 | \$510.60 | \$680.80 | \$851.00   |
| Additional Can |             | \$24.38           | \$48.76  | \$73.14  | \$97.52  | \$121.90   |
| 2 Cubic Yard   | 1           | \$114.73          | \$229.46 | \$344.19 | \$458.92 | \$573.65   |
| 2 Cubic Yard   | 2           | \$205.55          | \$411.10 | \$616.65 | \$822.20 | \$1,027.75 |
| Addl 2-yd bin  |             | \$90.82           | \$181.64 | \$272.46 | \$363.28 | \$454.10   |

**Formula:**

Sum of Service Area Travel Cost, Container Emptying Cost, Processing Facility Travel Time Cost, and Processing Facility Tipping Fee Cost.

**Example (outlined above) 65gallon serviced once per week:** 65 gal \*1/wk 2cy \*1/wk

|                                      |         |          |
|--------------------------------------|---------|----------|
| Service Area Travel Time Cost        | \$23.92 | \$23.92  |
| Container Emptying Time Cost         | \$12.70 | \$18.47  |
| Processing Facility Travel Time Cost | \$1.26  | \$7.77   |
| Processing Facility Tip Fee Cost     | \$10.43 | \$64.57  |
| Total                                | \$48.30 | \$114.73 |

### 6.10 Calculated Revenue Requirement

Table 14 on the following page shows how the recommended cost-based rates in Table 13 when multiplied by the number of customers in Table 7 and multiplied by twelve months, is equal \$367,206 in annual rate revenue, which is essentially equivalent to the annual revenue requirement of \$367,226 from Table 6. This demonstrates that the recommended rates are designed to meet the revenue requirement for the City's commercial organics collection program.

**Table 14 - Calculated Revenue Based on Recommended Cost-based Rates**

**Monthly and Annual Revenue**

Summary of Revenue Generated from each Level of Service

| Bin Capacity | No. of Bins | Pickups per Week: |            |            |          |            | Monthly Total   | Annual Total     |
|--------------|-------------|-------------------|------------|------------|----------|------------|-----------------|------------------|
|              |             | 1                 | 2          | 3          | 4        | 5          |                 |                  |
| 65 Gallon    | 1           | \$3,815.70        | \$1,449.00 | \$0.00     | \$0.00   | \$0.00     | \$5,265         | \$63,176         |
| 65 Gallon    | 2           | \$1,889.68        | \$3,634.00 | \$0.00     | \$0.00   | \$0.00     | \$5,524         | \$66,284         |
| 65 Gallon    | 3           | \$1,358.84        | \$3,300.04 | \$873.54   | \$0.00   | \$485.30   | \$6,018         | \$72,213         |
| 65 Gallon    | 4           | \$242.88          | \$485.76   | \$0.00     | \$0.00   | \$0.00     | \$729           | \$8,744          |
| 65 Gallon    | 5           | \$0.00            | \$0.00     | \$0.00     | \$0.00   | \$0.00     | \$0             | \$0              |
| 65 Gallon    | 6           | \$0.00            | \$340.40   | \$0.00     | \$0.00   | \$0.00     | \$340           | \$4,085          |
| 2 Cubic Yard | 1           | \$2,409.33        | \$4,818.66 | \$2,409.33 | \$458.92 | \$573.65   | \$10,670        | \$128,039        |
| 2 Cubic Yard | 2           | \$0.00            | \$411.10   | \$616.65   | \$0.00   | \$1,027.75 | \$2,056         | \$24,666         |
| <b>Total</b> |             |                   |            |            |          |            | <b>\$30,601</b> | <b>\$367,206</b> |

**6.11 Comparison between Current and Recommended Rates**

Table 15 below shows the current organic waste rates.

**Table 15 - Current Rates**

| Bin Capacity  | No. of Bins | Pickups per Week: |          |          |          |            |
|---------------|-------------|-------------------|----------|----------|----------|------------|
|               |             | 1                 | 2        | 3        | 4        | 5          |
| 65 Gallons    | 1           | \$115.47          | \$230.85 | \$346.22 | \$461.68 | \$577.04   |
| 65 Gallons    | 2           | \$115.47          | \$230.85 | \$346.22 | \$461.68 | \$577.04   |
| 65 Gallons    | 3           | \$115.47          | \$230.85 | \$346.22 | \$461.68 | \$577.04   |
| 2 Cubic Yards | 1           | \$115.47          | \$230.85 | \$346.22 | \$461.68 | \$577.04   |
| 2 Cubic Yards | 2           | \$230.94          | \$461.70 | \$692.44 | \$923.36 | \$1,154.08 |

Table 16 on the following page shows the difference between the current rates and the recommended rates, and Table 17 further below on the following page shows the percent difference between the current and the recommended rates.

# Customer notification of two-year rate adjustments

## PROPOSITION 218

NOTIFICATION TO PROPERTY OWNERS OF PUBLIC HEARING ON PROPOSED WATER, WASTEWATER, AND WASTE SERVICES RATE INCREASES.

**NOTICE IS HEREBY GIVEN** that the City of Roseville will hold a public hearing on Wednesday, May 3, 2023, at 6:00 p.m. in the City Council Chambers at 311 Vernon Street, Roseville, California, to consider adoption of proposed adjustments to rates for the water, wastewater, and waste services utilities. Reasons for the proposed rate adjustments and instructions for protesting the rate adjustments are described in more detail below.

### Proposition 218 and Public Hearing

In 1996, California voters approved Proposition 218, which amended the state constitution relating to the passage of property-related fees. Proposition 218 requires the City to: (1) inform property owners and ratepayers that rate adjustments are being considered; (2) clearly demonstrate the basis on which the rates are calculated; and (3) hold a public hearing at least 45 days after public notification. Utility rate adjustments are subject to majority protest. Any protests must: (1) be in writing; (2) state which utility service rate adjustment(s) the identified property owner or tenant is protesting; (3) provide the location of the identified parcel (by street address or assessor's parcel number); and (4) include the name and signature of the property owner or tenant submitting the written protest. Only one written protest will be counted per identified parcel.

Written protests may be hand-delivered or mailed to the City of Roseville City Clerk, 311 Vernon Street, Roseville, CA 95678, on or before the public hearing date or in person at the public hearing (specified above). To be counted, all written protests must be received before the conclusion of the public comment portion of the public hearing. Any protests submitted via e-mail or other electronic means will not be accepted as a qualified formal protest unless it is a scanned copy of a protest letter containing the signature of the author of such letter. Please identify on the front of the envelope, whether you mail or submit in person, Attn: City Clerk – Public Hearing on Proposed Utility Rate adjustments. Pursuant to California Government Code section 53759, there is a 120-day statute of limitations for challenging any new, increased, or extended fee or charge.

The City Council will hear public comments and consider the written protests regarding the rate adjustments to the City's water, wastewater, and waste services rates at the public hearing. Oral comments at the public hearing will not qualify as formal protests unless accompanied by a proper, written protest. Upon the conclusion of the public hearing, the City Council will consider adoption of the adjustments in utility rates as described in this notice. If a majority of the affected property owners and tenants file written protests, the proposed adjustments will not be imposed.

### What do water, wastewater, and waste services rates fund?

The City provides water, wastewater (sewer), and waste services (garbage, recycling, and green waste) utilities to more than 50,000 customers (residential and commercial). The City Charter requires all the City's utilities to be financially self-sufficient. Therefore, utility revenue from the rates paid by customers does not fund general government expenses. It solely funds the operational costs of the utilities such as purchasing raw water, energy, and chemicals; rehabilitation and replacement of infrastructure; maintenance; regulatory compliance; and labor.

### Proposed changes to water, wastewater, and waste services rates

Utility rates are calculated based on the cost of providing services. The City hired IB Consulting, independent rate consultants, to update the City's utility rates. Based on the findings and recommendations of the study, a rate increase is necessary to recover sufficient revenues to operate and maintain the water and wastewater due to the increasing costs of operations tied to inflationary pressures (chemical, equipment, construction and labor), necessary rehabilitation, security and water resiliency costs, as well as the requirement to maintain prudent financial reserves. The proposed rate adjustment accounts for vacancies. The only proposed rate adjustments for the waste services utility are for commercial organics collection rates.

For additional details on the cost of service and rate structuring, please call (916) 774-5300. If approved, rate adjustments would become effective on July 1, 2023, and subsequently, July 1, 2024, unless otherwise noted. The proposed rates are the maximum that may be implemented without the City providing additional notification to property owners and customers.

*An example of the impact to utility bills for a typical single-family home is shown in Table 1: Proposed Rate Increases 2023-2024 - Impact on Typical Residential Customer.*

## Long-range utility planning helps Roseville both now and into the future

When you turn the tap for water, flush your toilet, or pull the garbage can out for pick-up, these essential utility services started with a thoughtful plan years ago to identify system requirements and funding needs to keep those services going. A key component of maintaining service reliability is Environmental Utilities' long-range planning. This effort ensures that the current infrastructure remains well-kept, even as we grow the system to handle future demands.

Environmental Utilities runs a major multi-million dollar capital improvement program – a compilation of infrastructure and significant maintenance projects designed to enhance, expand, and preserve the infrastructure so that you receive reliable utility services daily.

Environmental Utilities manages dozens of projects annually, including condition assessments and engineering design. Staff also constructs new facilities and rehabilitates or replaces infrastructure across all three utility services.

Staff prioritizes these projects on meeting public safety objectives, preventing extensive and costly maintenance, replacing infrastructure beyond its useful life, and refurbishing or improving utility systems to maintain reliability. This proactive approach keeps the integrity of Roseville's utility systems high and your utility rates low.

## Our rate setting process

Environmental Utilities' rate adjustment planning is based on a 10-year horizon, looking at historical and future trends and the revenue needed to operate. We take the rate-setting process seriously, and our goal is to reduce customer impacts while also having the required capital to maintain high-quality services.

The cost of delivering utility services continues to rise, and to keep pace with these increased costs, Environmental Utilities is considering a necessary rate adjustment. We adopted a biennial schedule for rates review to account for minor adjustments under real-world conditions versus adjusting them every four or five years like other agencies, which could amount to more significant adjustments. This allows us to plan for needed revenue to ensure we are running a reliable utility service, which includes daily operations, keeping pace with changing regulations, rehabilitation of infrastructure, and other capital improvements.

## Fiscal policies help reduce rate adjustment impacts

One of the ways we are reducing customer impacts is based on a reserve policy implemented by Roseville City Council in 2015. These prudent policy decisions were part of a long-term planning approach that includes both a rate stabilization fund and an economic reserve.

These funds provide a level of fiscal stewardship where a small portion of your monthly bill is collected and set aside to offset unforeseen circumstances – and protect against unanticipated shortfalls that could otherwise affect your reliable utility service. In the event of savings at the end of each fiscal year, we will place those savings back into rate stabilization funds for the future.

| <b>Total***</b> | <b>\$133.40</b>           | <b>\$4.96</b>                              | <b>\$138.36</b>             | <b>\$5.20</b>                                           | <b>\$143.56</b>             |

\*A typical residential customer uses 1,400 cubic feet of water per month, has a flat wastewater rate, a single 90-gallon garbage container, and a single 90-gallon green waste container.

\*\*These rates do not apply to customers receiving water utility bills from the Placer County Water Agency or the San Juan Water District.

\*\*\*Rate adjustments are approximate. Actual charges may vary due to rounding.

## Impact on residential customer bills

**Water** – In July 2023, the approximate monthly water bill for a single-family home with typical water usage will increase by \$2.10 (from \$49.79 to \$51.89). In July 2024, there will be an additional increase of \$2.17 (from \$51.89 to \$54.06). These proposed water rate adjustments reflect the need to fund required water facility security enhancements, water reliability infrastructure projects to create access and delivery of existing water supplies beyond Folsom Reservoir, provide initial funding to meet state-mandated electrification requirements, and investments in maintaining and rehabilitating aging water infrastructure.

**Wastewater** – In July 2023, a single-family home can expect its monthly wastewater bill to increase \$2.86 (from \$47.56 to \$50.42). The proposed July 2024 rate would increase the bill by \$3.03 to \$53.45. These rate adjustments reflect inflationary pressures on costs for chemicals, electricity, equipment, construction and labor. Additionally, the adjustments account for maintaining appropriate reserves for rehabilitation and replacement of aging treatment plant and collection system infrastructure.

**Waste services** – Previous rate adjustments and stabilizing fuel costs using compressed and renewable natural gas are sufficient to meet service delivery and regulatory requirements. Therefore, there is no proposed rate increase for the residential waste services utility (trash, recycling, and green waste services). There is a proposed restructuring of commercial organics rates that reduces costs to those customers.

**Impact on commercial customer bills** – Commercial water, wastewater, and waste services rates vary by type of customer and usage levels.

**TABLE 2:  
CURRENT AND PROPOSED WATER RATES**

| Quantity Rate (Residential and Commercial)      | Current    | Effective 7/1/2023 | Effective 7/1/2024 |
|-------------------------------------------------|------------|--------------------|--------------------|
| Potable water use (per cubic foot)              | \$0.0145   | \$0.0159           | \$0.0166           |
| Non-Metered or Flat Service Charge (\$/month)   | Current    | Effective 7/1/2023 | Effective 7/1/2024 |
| Single family lots up to 4,900 square feet      | \$46.64    | \$48.97            | \$50.93            |
| Single family lots 4,901 to 8,900 square feet   | \$50.17    | \$53.06            | \$55.19            |
| Single family lots 8,901 to 12,000 square feet  | \$56.42    | \$60.31            | \$62.73            |
| Single family lots 12,001 to 15,000 square feet | \$61.78    | \$66.55            | \$69.22            |
| Meter Service Charge (\$/month)                 | Current    | Effective 7/1/2023 | Effective 7/1/2024 |
| 3/4" meter                                      | \$29.49    | \$29.63            | \$30.82            |
| 1" meter                                        | \$45.53    | \$45.74            | \$47.57            |

# **1. Executive Summary**

The Roseville Environmental Utilities Department (the “EUD” or the “Department”) manages the city’s water, wastewater and solid waste utilities (the “Utilities”). The Utilities are separately managed financial entities and as such, each faces different constraints and environments and must manage its finances accordingly. With this notion in mind, the Utilities developed this Financial Management Policy (the “Policy”) with the intent of giving each Utility a set of guidelines with which it can successfully and prudently manage its finances.

The Policy affirms the currently used Rehabilitation and Enterprise Fund guidelines, clarifies and adjusts targets for cash flows available for debt service and operating costs, and establishes targets for sizing Reserves (previously 10% of Operating Expenses).

Specifically, the Policy sets cash flow management guidelines for both the debt holding and non-debt holding enterprises and recommends reserve levels based on each Utility’s respective risk profile. To the extent that a Utility holds public debt, the Policy establishes Debt Service Coverage (“DSC”) targets to ensure the Utility’s ability to meet both its operating and debt service obligations; otherwise, the Policy recommends managing cash flow by targeting an Operating Ratio (Operating Income divided by Operating Expenses). The Policy then sets recommends reserve levels in order to help the Utilities manage exposure to operating risks, critical failures, and rate volatility. The Policy also provides recommended conditions for rate actions when cash flows and/or Reserves deviate from their prescribed targets.

## 2. Introduction

The Utilities are publicly-owned community assets for the City of Roseville (“Roseville” or the “City”) that provide safe, reliable, competitively-priced water, wastewater, solid waste, and recycled water services to all of their customers. The Utilities prepared the Policy with the intent of establishing guidelines for managing the financial profiles of each Utility.<sup>1</sup>

The Policy is divided into six sections: Purpose, Defining Financial Strength, Enterprise Fund Fees and Rates, Rehabilitation Funds, Recommended Debt Service Coverage and Operating Ratio Policies, Recommended Reserve Policies, and Interaction between Coverage and Reserves.

It is intended that to maintain relevance, the Utilities will revisit the Policy periodically if there is a material change in risk exposures or conditions.

---

<sup>1</sup>The Policy focuses on the Water, Wastewater, and Solid Waste Utilities as the Recycled Water Utility does not keep independent financial records but is currently part of the Wastewater Utility.

### **3. Purpose**

The purpose of this Financial Management Policy is to provide a set of guidelines for prudently managing the financial profiles of the Utilities. In practice, this Policy will discipline the budgeting and rate setting practices, establish guidelines to improve the financial health of each Utility over the long term, and seek to balance the need for capacity growth while maintaining competitively low rates.

Like all enterprises, the Utilities manage cash flow to cover expenditures and hold reserves to address anticipated and unanticipated funding requirements.

The Policy is based upon the understanding that the following factors are important and should serve as the relevant goals of the Policy. These goals establish that each Utility should:

1. Manage rates to avoid significant year-over-year rate adjustments.
2. Strive to maintain and invest in its respective system.
3. Maintain reserves for financial exposures.
4. Cost-effectively obtain funds to maintain and invest in its respective system.

The Policy is further intended to offer the Roseville City Council (the “City Council”) guiding directives to staff for decisions and recommendations related to the financial profile of each Utility.

The Policy is not prescriptive in terms of how the Utilities set rates; however, there is a nexus between the rates that each Utility charges and its respective financial profile. While the Policy attempts to recognize the balance between each enterprise’s risk management, financial risk management and rate setting, the Policy cannot resolve conflicts between competing objectives and so it instead provides guidelines for the financial management of each Utility to be considered by the City Council and staff in coordination with other considerations.

## 4. Defining Financial Strength and Credit Considerations

The Utilities' businesses are subject to a number of significant environmental, market, and regulatory considerations on national, state, and local levels. The determination of financial strength is subjective, but it ultimately relates to the expectation that the Utilities can continue to meet their primary financial goals in the context of the macro considerations that each Utility faces.

### **Anticipated and Unanticipated Financial Considerations**

One characteristic of financial strength is the ability to prepare for anticipated events and obligations including, but not limited to:

- Operation and maintenance expenses (O&M).
- Debt service payments.
- Exposure to weather related events such as droughts.
- Response to existing or impending regulations.

Another characteristic of financial strength is the ability to address unanticipated considerations including, but not limited to:

- Unanticipated general reduction in customer demand.
- One or more operational events (natural disaster or other events including force majeure, etc.) that could dramatically increase costs or reduce resource options, the loss of one or more large customers.
- Market disruption that increases the cost of borrowed funds.
- Counterparty's inability to perform on a contract.
- Change in regulatory or environmental regulations.
- Unanticipated increase in compensation costs.

While such considerations are by nature, unanticipated, the Policy recognizes that the financial strength of each Utility is at least partially related to the ability to address such considerations should they arise.

### **Ratings as Indicators of Financial Strength**

While credit ratings are important yardstick indicators of financial strength, the Policy is not focused on maintaining credit ratings but rather the overall financial strength of the Utilities as only some of the Utilities have or will have ratings. It is expected, however, that by following the guidelines of the Policy, the Utilities will maintain strong credit ratings. Specifically, it is expected that the Water Utility will be able to maintain A+ category ratings and will be able to make a strong case for AA- category ratings while the Wastewater Utility will be able to support the South Placer Wastewater Authority ("SPWA") in maintaining AA-, or higher, category ratings. SPWA issues debt on behalf of the City of Roseville, Placer County and South Placer Municipal Utility District for regional wastewater treatment facilities to be used by these agencies.

## 5. Enterprise Fund Rates and Fees

Environmental Utilities are 100% self-sufficient. The primary revenue streams for the Utilities are rates and fees established by the City Council. This Policy identifies the manner in which rates and fees are set and the extent to which they cover the cost of services provided. A revenue system that requires the identification of both the cost of the programs and the portions of the cost that will be recovered through those revenues allow the Department and its utility customers to develop a better understanding of the cost of services and to consider the appropriateness of established rates and fees.

### Policy

The City will set rates and fees at levels related to cover the reasonable cost of providing services which includes direct and indirect costs such as operating and maintenance, overhead, infrastructure rehabilitation, and debt service. The Department will review these rates and fees annually in the budget process and will recommend rates that are expected to produce revenues sufficient to fully fund the reasonable costs of providing services. Further,

- All rates and fees shall be adopted in accordance with the provisions of Prop 218 and AB1600.
- The City will examine utility rates through the cost of service process every two years or as otherwise determined in an effort to avoid the rate shock that occurs when rates are evaluated less frequently.
- Revenue and expenses will be projected using conservatism.
- Revenue requirements will be based on long-term planning objectives.

During the rate and fee setting process, the City will consider the rates and fees of other agencies as comparing the City's rates and fees to other agencies' provides useful background information because:

- Other agencies' rates and fees reflect in some ways the current "market's" rates for similar services provided by the Utilities and can assist the City is assessing the reasonableness of proposed rate and fee changes.
- They can serve as a benchmark for how cost-effectively the Utilities are providing their services.

Rates and fee comparisons, however, should never be the sole or primary criteria used in the City's rate and fee setting process. The City should also place under consideration:

- What level of cost recovery is the rate and/or fee intended to achieve?
- What costs are considered in the computation of rates and fees?

- Timing: When was the last time the other agencies' fees were comprehensively evaluated?
- What level of service do the other agencies provide compared to the City's?
- Are other agencies' rate structures significantly different than the City's and what is each entities' rate structure intended to achieve?

## 6. Rehabilitation Funds

The Utilities have established Water, Wastewater and Solid Waste Rehabilitation Funds (the "Rehabilitation Funds". The Water and Wastewater Rehabilitation Funds administer the capital rehabilitation and replacement of existing infrastructure assets. Solid Waste Rehabilitation Funds are used for the rehabilitation and replacement of bins and cans.

### Policy

#### *Sources of Revenue*

The primary source of revenue for the Rehabilitation Funds is Utility rates. City Council adopted Utility rate schedules include an amount for the rehabilitation or replacement of infrastructure assets or capital assets for each utility. The rates are collected in the Operations Funds and transferred to the Rehabilitation Funds.

The Wastewater Rehabilitation Fund also includes local wastewater connection fees. These fees are collected for the specific purpose of purchasing and/or replacing capital equipment required for the maintenance of wastewater facilities. Other sources of revenue for the Wastewater Rehabilitation Fund include:

- Interest earned on unexpended funds or reserves that will remain in the Rehabilitation Funds and be available for approved expenditures.
- Any grant, loan, or other source of revenue obtained for the purpose of capital rehabilitation or replacement or infrastructure assets will be included in the Rehabilitation Fund, made available for approved expenditures, and accounted for as required by the grant, loan, or other source.

#### *Expenditures*

Rehabilitation Funds may only be used for Water and Wastewater infrastructure asset or Solid Waste capital asset capital rehabilitation or replacement expenditures. These expenditures:

- Must serve the purpose of benefiting the existing Water, Wastewater, or Solid Waste Utility customers.
- Must be approved by City Council.

- Must be included in the Rehabilitation Plan unless needed for unanticipated utility emergency purposes.
- May include updates necessary to comply with changes to regulatory requirements.
- Must be necessary to maintain the existing level of service which may include technological advancements.
- Must not increase capacity or conduct improvements beyond the scope described above.
- May be approved to pay for the respective utilities' debt service.
- If incurred in conjunction with an outside source of revenue (i.e. grant), must be accounted for as required by the outside revenue source.

### *Investments*

Investments must be made in accordance with City investment policies.

### *Fund Balances*

The Rehabilitation Funds will be administered independent of each other and of any other funds within the Utilities or the City. Lending of funds to or from the Rehabilitation Funds must be approved by City Council, must be considered only for the benefit of the respective water, wastewater, and solid waste systems and utility funds, and only for the benefit of the respective water, wastewater, and solid waste customers. Interest will be paid at the then prevailing interest rate for city-pooled investments. Further, the majority of each Utility's Rehabilitation Fund balances should be invested or held in "liquid" assets (e.g. cash, money market accounts, treasuries, etc.) in order to ensure that immediate rehabilitation expenses can be met in a timely manner. Lending from the Rehabilitation funds will only be considered if they do not conflict with planned capital plan needs over the horizon of the repayment period.

### *Assessment of Capital Plan*

The water and wastewater capital rehabilitation and replacement needs will be reevaluated periodically. Items to be considered include, but are not limited to:

- Asset lifetimes by class of asset
- Inflation rates for both operating and capital costs
- Unit costs for asset replacement
- Fund interest yield rates
- Condition, criticality, and operational usefulness of assets
- Desired levels of service
- Consequences when desired levels are not met
- Risk of asset failure and level of acceptable risk of failure
- Measurements of various asset attributes that indicate how well an asset performs

The amounts transferred from Operation Funds to Rehabilitation Funds will be adjusted as necessary to reflect changes in the rehabilitation and replacement funding requirements. The impact of such adjustments on utility rates will also be analyzed to determine if an adjustment to water, wastewater, or solid waste utility rates is necessary.

#### *Roseville Public Utilities Commission*

The Roseville Public Utilities Commission will provide recommendations on the implementation of these policies, as appropriate, consistent with their role as an advisory body to the Roseville City Council.

#### *Rehabilitation Fund Policy Review*

The Rehabilitation Fund Policies designate a reassessment of the policies from time to time to determine if any changes are necessary. Any changes must be approved by the City Council.

## 7. **Recommended Debt Service Coverage and Operating Ratio Policies**

This Policy recommends managing funds primarily to Debt Service Coverage (“DSC”) or Operating Ratios while maintaining a focus on reserves as well in order to meet each Utility’s management goals.

### **Policy**

A practical minimum DSC is 1.00x without reserves because at 1.00x, the Utilities are paying operating costs and debt service on a cash flow basis. There are, however, below the line cash outflows that should also be considered.

#### *Direct Debt Service Coverage and Operating Ratio Policy*

This Policy recommends the Water and Wastewater Utilities maintain DSC of 1.80x. This level maintains a cushion above the bond covenant requirement of 1.10x for the Wastewater Utility and 1.20x for the Water Utility. At 1.80x DSC, the Water and Wastewater Utilities can reliably use cash flow to pay for their operations including related depreciation expenses. The 1.80x DSC would leave adequate cash funding available to invest in general system improvements; however, significant capital improvements or additions would probably have to be financed with debt. This strikes a balance between funding capital through higher rates paid by current customers and funding capital through bond financing paid by future customers.

The Solid Waste Utility has historically enjoyed stable Net Operating Revenues. Due to the lack of volatility and overall lack of depreciable assets, it is recommended that the Solid Waste Utility maintain an Operating Ratio of 1.30x. The 1.30x Operating Ratio would leave sufficient cash funding available to invest in any necessary capital improvements on a pay-go basis.

#### *Using Reserves to Meet Coverage*

The Policy recommends that the Utilities calculate DSC and Operating Ratios without Reserves and without accounting for Rate Stabilization Fund draws. The use of rolling coverage in calculating DSC is very useful for legal compliance purposes but it is not recommended for operating and financial management purposes as it may give an inaccurate depiction of financial health.

## 8. Recommended Reserve Policy

Reserves are important to the Utilities because they help to:

- Ensure cash exists for the timely payment of bills.
- Maintain the short-term and long-term financial health of each Utility.
- Maintain stable rates for customers.
- Fund unanticipated cost contingencies.
- Ensure funds exist for system improvements.
- Act as a significant factor in bond ratings.
- Identify when financing should be procured.
- Identify the need for rate actions.

### Policy

The most common approach to sizing Reserves is by number of days of expenses. Water and wastewater utilities of about equivalent size to the City of Roseville Water and Wastewater Utilities typically have reserves of at least 250 days. Reserves of approximately 365 Days' Cash would be more typical for AA-/A+ category rated utilities and would be more appropriate to match the risks that the Water and Wastewater Utilities manage. It is recommended that the Solid Waste Utility maintain Days' Cash of approximately 90 days for the reasons described below.

#### *Operating Risk Management*

The Utilities use reserves to handle fluctuations and adjustments in every day expenses.

It is recommended that each Utility maintains approximately 90 days' worth of Operating Expenses as one subcomponent of the Reserves. Such reserves would, amongst other things, be intended to cover timing issues with regard to payments, fluctuations in purchased water costs, and other operational issues. In consideration of these fluctuations in cost and cash requirement, 90 Days' Cash for regular operation management is a modest first component of the recommended Reserves.

#### *System Critical Failure*

Each Utility should consider maintaining a portion of the Reserves that is for a single emergency event (e.g. treatment facility closure, conveyance disruption, etc.). In total, it is recommended that the Reserves set aside for system critical failure be equivalent to approximately 1.0 - 2.0% of the Capital Assets belonging to each respective Utility. Due to the lack of Capital Assets possessed by the Solid Waste Utility, it is not recommended that the Solid Waste Utility keep any reserves for the event of a system critical failure.

This component of the Reserves may be forgone if it is determined that each Utility's exposure to critical failures is adequately covered through insurance.

### *Rate Stabilization*

In addition to addressing operating and maintenance issues, Reserves serve two other important purposes:

1. Reserves act as a shock absorber for ratepayers.
2. Reserves offer security to each Utility's debt holders. If an unusual financial or operating event leaves a Utility short of cash, Reserves can be used to avoid an immediate increase in rates to cover the shortfall.

Keeping some Reserves for rate stabilization would allow the Utilities to ensure that under virtually no circumstance would an Event of Default situation occur within a single year, and that the City Council would have the year to contemplate ways to prevent investors from enforcing rate actions on the Utilities' customers.

For such reasons, it is advisable that the Water and Wastewater Utilities target Reserves sized for rate stabilization at approximately 50% of annual operating expenses or roughly 180 Days' Cash. Because the Solid Waste Utility does not hold any debt and has historically experienced very stable net revenues, it is recommended that the Solid Waste Utility not hold any reserves for the purpose of rate stabilization.

### *Other Uses for Reserves*

The aforementioned categories are those that most clearly merit the allocation of Reserves but are by no means the only categories of financial exposure that the Utilities could manage with Reserves. For instance, the Utilities have significant Pension and Other Post-Employment Benefit liabilities that could generate a cash requirement. Further, to the extent that the Solid Waste Utility faces fees for the closure of a landfill or similar occurrence, it may be prudent to hold additional reserves for such an event. Other risk categories such as interest rate exposure are relatively small and do not need to be reserved for separately, but are real risks that could potentially be managed with Reserves.

### *Reserve Policy Summary*

These recommendations would suggest that the following would be the appropriate Reserve levels for each Utility:

- Operating Risk Management: 90 Days' Cash
- System Critical Failure (Water and Wastewater Only): 1.0 - 2.0% of Capital Assets
- Rate Stabilization (Water and Wastewater only): ~180 Days' Cash
- Total Reserves: ~270 Days' Cash plus 1.0 - 2.0% of Capital Assets (Water and Wastewater); 90 Days' Cash (Solid Waste)

While these areas of consideration were evaluated in order to conceptualize the appropriate size of the Reserves, each Utility intends to maintain a single Reserve without separate buckets. These Reserve allocations are neither abnormally high nor low for industry standards. Each component of the Reserves is sized at less than the maximum possible exposure for each component because there is a recognition that it is unlikely several of the risks each Utility faces would materialize simultaneously.

### *Building and Drawing Upon Reserves*

The Water and Wastewater Utilities are targeting Reserves of about 270 Days' Cash plus 1.0 - 2.0% of Capital Assets while the Solid Waste Utility is targeting 90 Days' Cash, however, there is no intention of setting rates to maintain Reserves equal to the levels prescribed above. The purpose of Reserves is to address the financial impacts of revenue and expense fluctuations and unanticipated events. Excess reserves can be used for several financial imperatives including but not limited to: financing capital improvements on a pay-go basis, paying down existing debt, or lowering rates. The general philosophy of the proposed range is that the Water and Wastewater Utilities should target 270 Days' Cash plus 1.0 - 2.0% of Capital Assets and the Solid Waste Utility should target reserves of 90 Days' Cash. Each of the Utilities should limit reserves to 130% of the respective reserve targets.

Each Utility's Reserves would increase or decrease depending upon many factors for a given year; however, to the extent that each Utility achieves its DSC or Operating Ratio Policy targets, Reserves would remain fairly stable. Reserves would increase or decrease under the following conditions:

- Net Revenues Available for Debt Service are higher or lower than budgeted/projected as a result of higher or lower Revenues and Expenses
- Debt Service is higher or lower than budgeted/projected
- Capital investment in the system from Net Revenues is higher or lower than budgeted/projected
- Debt issued for capital investment is greater or less than budgeted/projected

## **9. Interaction Between Coverage and Ratios, Reserves, and Rates**

For reasons described in the sections above, the Policy prescribed specific targets for DSC and Operating Ratios and Reserves. However, the Policy anticipates that in practice there is a range of acceptable results and a balance between cash flow and reserve levels is warranted.

A rate increase should be considered by the City Council if any of the following conditions (the “Rate Increase Conditions”) are projected in the five-year forecast:

- DSC without Reserves will be less than 1.80x
- Operating Ratios (Solid Waste Only) without Reserves will be less than 1.30x
- Any rate increase would be greater than six percent
- A major expenditure is expected

Rate increases indicated by the above conditions that would exceed six percent in any one year can be spread over multiple years.

No rate increase for the purpose of increasing reserves or DSC should be considered if DSC or Operating Ratios without Reserves are above their respective targeted levels and Reserves are projected to be greater than the targeted levels of 270 Days’ Cash plus 1.0 – 2.0% of Capital Assets for the Water and Wastewater Utilities and 90 Days’ Cash for the Solid Waste Utility.

Lastly, it is important to note that recommendations in the Policy are associated with projected financial conditions for the Fiscal Year End of future years. Actual results will vary based on weather, market conditions, etc. In addition, Reserves and cash flow may be more or less robust within a Fiscal Year, relative to the Fiscal Year End but considering such fluctuations within a year would overly complicate monitoring with only marginal benefit.

## 10. Conclusion

The Policy was drafted with the intent of providing guiding directives to the Utilities' management and staff for decisions and recommendations related to each Utility's financial profile.

The Policy is a fairly incremental change from existing policies. Specifically, the Policy affirms the currently used Rehabilitation and Enterprise Fund guidelines, clarifies and adjusts targets for cash flows available for debt service and operating costs, and adjusts targets for sizing Reserves (previously 40% of Operating Expenses).

In its most abbreviated form, the Policy targets 1.80x DSC without Reserves for the Water and Wastewater Utilities and an Operating Ratio of 1.30x for the Solid Waste Utility. It targets Unrestricted Reserves sized at 270 Days' Cash plus 1.0 – 2.0% of Capital Assets for the Water and Wastewater Utilities and 90 Days' Cash for the Solid Waste Utility and establishes tolerable maximums. The Policy also provides recommended conditions for rate actions when cash flows and/or Reserves deviate from the targets. The table below summarizes the policy targets described above.

| Summary of Policy Targets                           |                              |                              |             |
|-----------------------------------------------------|------------------------------|------------------------------|-------------|
| Utility                                             | Water                        | Wastewater                   | Solid Waste |
| <b>Debt Service Coverage or Operating Ratio (x)</b> | 1.80 DSC                     | 1.80 DSC                     | 1.30        |
| <b>Reserves (Days' Cash)</b>                        |                              |                              |             |
| Operating Risk Management                           | 90                           | 90                           | 90          |
| System Critical Failure (% of Capital Assets)       | 1-2%                         | 1-2%                         | 0%          |
| Rate Stabilization                                  | 180                          | 180                          | 0           |
| <b>Total</b>                                        | 270 + 1-2% of Capital Assets | 270 + 1-2% of Capital Assets | 90          |

The Policy is intended to be revisited and updated periodically if there are material changes in the risk exposures or conditions each Utility faces.

Finally, and perhaps most importantly, the Policy is ultimately intended to serve as a guide and it in no way restricts the ability of the City Council to review proposed rate actions, debt issuances, or other actions of substance to each Utility.
